Reader's Guide to the Catalog

Organization

The University of Oregon's largest academic units are its colleges and professional schools. Each consists of smaller units called departments or programs. The academic year is divided into three terms (fall, winter, spring) and one summer session.

Where to Find It

This catalog has four sections. The first section contains information about admission, registration, academic policies, undergraduate degree requirements, tuition and fees, financial aid and scholarships, employment, and academic and career planning. The second section outlines the majors, minors, and specializations defining the degrees and certificates that may be earned at the University of Oregon, as well as the array of general-education courses available that make up the foundational requirements of those degrees. The third (or curriculum) section describes all the university's academic programs in detail: faculty members, degree and nondegree programs, and course listings. This section includes the College of Arts and Sciences, the honors college, the six professional schools and colleges, the Graduate School and graduate studies information, and ends with a review of undergraduate studies and supplemental academic programs. The final section contains information on academic resources and student services, physical education and recreation, and the academic calendar.

Definitions

The academic terms defined in the following list are used throughout this catalog.

Certificate. A formal document that recognizes academic achievement in a specific discipline—only as an adjunct to an undergraduate degree program and either as an adjunct to or separate from a graduate degree program, and only for students in an admitted status. Stand-alone noncredit certificates are offered through Academic Extension to all students.

Colloquium. An academic meeting or assembly for discussion, sometimes led by a different lecturer speaking on a different topic at each meeting; a seminar with consultation, report, and exchange.

Competency. A specific skill in a specific area.

Corequisite. A course or other educational requirement that must be completed simultaneously with another course.

Course. A subject, or an instructional subdivision of a subject, offered through part of a term or a whole term. Each course is assigned a course level. Courses numbered 100–499 are undergraduate courses; 100–299 are lower division, and 300–499 are upper division. Courses numbered 500 and above are graduate or professional.

1 credit. Represents approximately three hours of the student's time each week for one term in a lower-division undergraduate course. This frequently means a minimum of one hour in the lecture hall or laboratory in addition to two hours spent in outside preparation. The number of

lecture, recitation, laboratory, or other periods required each week for a course is listed in each term's class schedule.

Curriculum. An organized program of study arranged to provide integrated cultural or professional education.

Discipline. A branch of learning or field of study (e.g., mathematics, history, psychology).

Dissertation or Thesis. A written document resulting from study or research and submitted as a major requirement for a degree.

Electives. Courses that students may choose to take, as contrasted with courses that are required for an academic program.

Endorsement. An affirmation of teaching competency by the Teacher Standards and Practices Commission.

Experimental course. A course under development that has not received formal acceptance to the curriculum. Subject matter, instructional materials, and activities are evaluated for effectiveness and long-term value to the discipline. *Experimental courses may not be used to clear general-education requirements.*

Field studies. A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Generic courses. Courses numbered 100, 300, 196, 198, 199, 399–410, 503–510, 601–610, and 704–710, for which credit is variable and which may be repeated for credit. Instructor's permission is often required for registration.

Grade point average (GPA). The GPA is determined by dividing the total points for all grades by total credits.

Grading option. Unless specified otherwise, nonmajors may take courses either graded (A+ through F) or pass/no pass (P/N). The online class schedule identifies courses for which majors are limited to a particular grading option.

Graduate specialization. A subdivision of a graduate major or an interdisciplinary track in which a strong graduate-level curriculum is available. For more details, visit the website (<https://gradschool.uoregon.edu/policies-procedures/graduate-specialization>).

Group-satisfying course. A course that counts toward partial fulfillment of bachelor's degree requirements in one of the three general-education groups: arts and letters, social science, science.

Interdisciplinary or multidisciplinary. A course of study from two or more academic disciplines.

Internship. Unpaid professional practice in an organization that integrates concepts studied at the university with career-related work experience.

License. See Endorsement.

Major. A primary undergraduate or graduate field of specialized study.

Minor. A secondary undergraduate field of specialized study.

Multilisted course. A single course that is listed under more than one subject code; course numbers end with the letter M.

Multicultural course. A course that counts toward partial fulfillment of bachelor's degree requirements in one of three categories: American cultures; identity, pluralism, and tolerance; international cultures.

Option. A subarea of specialized study within an undergraduate or graduate major or undergraduate minor.

Preparatory programs. Undergraduate courses of study taken in preparation for professional or graduate degrees.

Prerequisite. A course or other educational requirement that must be completed prior to registering for another course or before proceeding to more advanced study.

Practicum. A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Reading and conference. A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable for credit. Only courses designated "repeatable" may be repeated for credit. Except for generic, studio, or performance courses, the circumstances under which a course may be repeated for credit are restricted.

Research. Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Residence credit. Academic work completed while the student is formally admitted and officially registered at the University of Oregon; this includes courses taken in UO study abroad programs.

Semester. One-half the academic year (sixteen weeks), applicable only to the UO School of Law.

1 semester credit. One semester credit equals one and one-half quarter (or term) credits.

Seminar. A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Sequence. Two or three closely related courses that must be taken in specified order.

Series. Two or more closely related courses that may be taken in any order.

Special studies. A colloquium or experimental course, often taken concurrently with another course as a satellite seminar.

Specialization. A graduate-level subdivision of a major or an interdisciplinary track in which a strong graduate-level curriculum is available.

Subject code. An abbreviation used with a course number to indicate an academic subject area. See the list of subject codes in this section of the catalog.

Supervised college teaching. A student, under faculty supervision and sponsorship, accepts responsibility for teaching a university course.

Supervised tutoring. A student, under faculty supervision, accepts responsibility for tutoring other students within the discipline.

Temporary multilisted course. Courses numbered 200M, 400M, 500M, and 600M, which may be offered once without formal approval.

Term. Approximately one-third of the academic year (eleven weeks), either fall, winter, or spring.

Terminal project. A presentation incorporating the knowledge and skills acquired from course work completed for the master's degree.

Waive. To set aside without credit certain requirements for a degree or major.

Workshop. An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Courses

Abbreviations

The following abbreviations are used in course descriptions:

- **Coreq:** corequisite
- **H:** honors content of significant difficulty
- **M:** multilisted courses
- **Prereq:** prerequisite
- **R:** repeatable for credit

Sample Course Listings

The following examples are from Biology (BI):

BI 122. *[BI lower-division course number]* **Introduction to Human Genetics.** *[course title]* **4 credits.** *[course credits]* Basic concepts of genetics as they relate to humans. Blood groups, transplantation and immune reaction, prenatal effects, the biology of twinning, selection in humans, and sociological implications. Lectures, discussions. *[course description]*

BI 523. *[BI graduate course number]* **Human Molecular Genetics.** *[course title]* **4 credits.** *[course credits]* Advanced topics in genetics that relate to human development and disease. The human genome, sex determination, X-chromosome inactivation, chromosomal abnormalities, trinucleotide repeat expansions, cancer. *[course description]* Prereq: BI 320. *[course prerequisite]*

BI 607. *[BI graduate-only course number]* **Seminar: [Topic].** *[course title]* **1–3 credits.** *[course credit range]* Topics may include neurobiology, developmental biology, ecology colloquium, genetics, molecular biology, and neuroscience. *[course description]* Repeatable. *[repeatable for credit indicator]*

Subject Codes

Course Numbering System

Except at the 500 and 600 levels, courses in University of Oregon catalogs are numbered in accordance with the course-numbering plan

of the schools in the Oregon University System. Institutions vary in their treatment of 500- and 600-level courses.

1–99

Remedial, terminal, semiprofessional, or noncredit courses that do not apply to degree requirements

100–299

Lower-division (freshman- and sophomore-level) courses

300–499

Upper-division (junior- and senior-level) courses

500–599

Courses that offer graduate-level work in classes that include undergraduate students

600–699

Courses for graduate students only

700–799

Except in the School of Music and Dance, professional or technical courses that apply toward professional degrees but not toward advanced academic degrees such as the MA, MS, or PhD. Both 600 and 700 numbers in the School of Music and Dance indicate graduate courses only.

Temporary Multilisted and Group-Satisfying Courses

100

Temporary lower-division group-satisfying course

200M

Temporary lower-division multilisted course

298

Temporary lower-division group-satisfying course

300

Temporary upper-division group-satisfying course

400M

Temporary upper-division multilisted course

500M

Temporary graduate-level multilisted course

600M

Temporary graduate-level multilisted course

Generic Courses

Certain numbers are reserved for generic courses that may be repeated for credit under the same number. Except in the School of Law, courses numbered 503, 601, and 603 are offered pass/no pass only.

Credit is assigned according to the work load in a particular course. Credit ranges indicate minimum and maximum credits available in a

single course for a single term, and departments determine their own credit ranges.

196 Field Studies: [Topic]

198 Workshop: [Topic] or **Laboratory Projects:** [Topic] or **Colloquium:** [Topic]

199 Special Studies: [Topic]

399 Special Studies: [Topic]

401 Research: [Topic]

402 Supervised College Teaching

403 Thesis

404 Internship: [Topic]

405 Reading and Conference: [Topic]

406 Field Studies: [Topic] or **Special Problems:** [Topic]

407/507 Seminar: [Topic]

408/508 Workshop: [Topic] or **Laboratory Projects:** [Topic] or **Colloquium:** [Topic]

409 Practicum: [Topic] or **Supervised Tutoring**

410/510 Experimental Course: [Topic]

503 Thesis

601 Research: [Topic]

602 Supervised College Teaching

603 Dissertation

604, 704 Internship: [Topic]

605, 705 Reading and Conference: [Topic]

606, 706 Field Studies: [Topic] or **Special Problems:** [Topic]

607, 707 Seminar: [Topic]

608, 708 Workshop: [Topic] or **Special Topics:** [Topic] or **Colloquium:** [Topic]

609, 709 Practicum: [Topic] or **Supervised Tutoring or Terminal Project**

610, 710 Experimental Course: [Topic]

Catalog Expiration and Requirements Policies

The *University of Oregon Catalog* lists requirements for active degrees offered by the university.

Each catalog goes into effect at the beginning of fall term the academic year of issue. It expires at the end of summer session the seventh academic year after publication.

Advisors and other university employees are available to help, but students have final responsibility for satisfying degree requirements for graduation.

Undergraduate Students

To receive an undergraduate degree, a student must have satisfied, at the time of graduation, all requirements for the degree listed in one of the following:

1. the unexpired catalog in effect when the student was first admitted and enrolled at the University of Oregon, **or**
2. any subsequent catalog that has not yet expired

To fulfill major or minor program requirements, a student must complete the requirements in effect

1. when the student first declared the major or minor, **or**
2. when the student changed to a different major or minor

Exceptions to major or minor requirements may be made by the department or program offering the major or minor.

Graduate Students

To receive a graduate degree, a continuously enrolled student must have completed, at the time of graduation, all requirements described in the department and **Graduate School** sections of the catalog in effect when the student was first admitted and enrolled at the University of Oregon. A student who has not maintained continuous enrollment is subject to the requirements described in the department and **Graduate School** sections of the catalog in effect the first term the student was readmitted by the Graduate School and reenrolled at the University of Oregon.

Requests for exceptions to graduate degree requirements must be submitted in writing to the Graduate School prior to graduation.

While every effort is made to ensure the accuracy of the information in this catalog, the University of Oregon has the right to make changes at any time without prior notice. This catalog is not a contract between the University of Oregon and current or prospective students.

About the University of Oregon

Mission Statement

Serving the state, the nation, and the world since 1876.

The University of Oregon is a comprehensive public research university committed to exceptional teaching, discovery, and service. The university is a community of scholars, helping members of its community to question critically, think logically, reason effectively, communicate clearly, act creatively, and live ethically.

Purpose

The university community strives for excellence in teaching, research, artistic expression, and the generation, dissemination, preservation, and application of knowledge, devoted to fostering the next generation of leaders and informed participants in the global community. Through these pursuits, the social, cultural, physical, and economic well-being of the students, the state, the nation, and the world are enhanced.

Vision

The university community aspires to create a preeminent and innovative public research university encompassing the humanities and arts, the natural and social sciences, and the professions, seeking to enrich the human condition through collaboration, teaching, mentoring, scholarship, creative inquiry, scientific discovery, outreach, and public service.

Values

The university community values

- the passions, aspirations, individuality, and success of the students and the members of its faculty and staff who work and learn here
- academic freedom, creative expression, and intellectual discourse
- diversity, and seeks to foster equity and inclusion in a welcoming, safe, and respectful community
- the unique geography, history, and culture of Oregon that shapes its identity and spirit
- a shared charge to steward resources sustainably and responsibly

Inspiration and Discovery

Generations of leaders and citizens have studied at the University of Oregon since it opened in 1876. Today's students, like the 200,000 alumni before them, have access to the most current knowledge in lectures, laboratories, and seminars conducted by active researchers. By sharing their research through teaching, faculty members are better able to articulate their findings and to integrate their specialized studies with broader areas of knowledge.

University of Oregon students select courses from departments and programs in the College of Arts and Sciences and from six professional schools and colleges and the Robert Donald Clark Honors College. Some 1,678 full-time faculty members, 53 full-time librarians, and 1,463 graduate and research assistants serve as mentors, colleagues, and friends to the 22,760 undergraduate and graduate students enrolled at the university.

Although more than half of all students are from Oregon, 38 percent are from other states and 10 percent are from other countries. The mix of backgrounds gives students a chance to know people they might not meet otherwise—a real asset in a world where national and international relations influence everyday life.

Teaching, research, and a spirit of sharing are characteristics of the campus community. Faculty members and students engage in research programs that bring to the university approximately \$123.2 million in competitive research awards. The university's science departments receive national attention for their work in such areas as computer science, genetics, materials, optics, and neuroscience. Thirteen faculty members belong to the prestigious American Academy of Arts and Sciences, and nine have been elected to the National Academy of Sciences.

Connection to Community

The sharing of knowledge and the love of learning do not stop at the campus borders. Public service is important to the university.

Members of the UO faculty share their experience and knowledge in community activities that include service in local and state governments. They also serve as consultants for businesses, industries, school districts, and government agencies. Students work as interns in a variety of educational programs in the community and volunteer for service activities.

University programs that serve the public include Academic Extension, which offers for-credit and noncredit activities throughout the state. Planning and technical assistance from the Community Service Center helps Oregon communities solve local problems and improve the quality of life in rural Oregon. For more than four decades, the Oregon Bach Festival has offered an annual program of concerts and master classes to music lovers in the Pacific Northwest. The UO's classical music radio station, KWAX-FM, is an affiliate of the Public Radio International Classical 24. KWAX programs are rebroadcast on translators in several coastal and central Oregon communities and cybercasts entertain listeners around the world. A second radio station, KWVA-FM, serves the Eugene-Springfield metropolitan area and has a live internet stream, playing a varied mix of music in addition to talk shows and live college sports broadcasts. KWVA is a voice for UO students as well as a place for them to gain broadcast, production, and operation experience.

The university's presence is evident at its off-campus facilities—Pine Mountain Observatory in central Oregon near Bend—and its academic programs in Portland and at the coastal Oregon Institute of Marine Biology in Charleston. Access is enabled through several online and hybrid programs.

The university is one of the largest and most stable employers in the state, directly employing 10,567 people. Overall, University of Oregon activity affects more than \$790 million in household earnings and 24,500 jobs in the state.

The Campus Experience

The university's 295-acre campus is an arboretum of more than 4,000 trees of approximately 500 species. Campus buildings date from 1876, when Dady Hall opened, to the present, with the new Cheryl Ramberg Ford and Allyn Ford Alumni Center, John E. Jaqua Academic Center for Student Athletes, Global Scholars Hall, and Robert and Beverly Lewis Integrative Science Building.

The Museum of Natural and Cultural History is located at East 15th Avenue and Columbia Street. Across campus, the Jordan Schnitzer Museum of Art, a member of the American Alliance of Museums, is noted for its collections of Asian and Northwest art.

The UO Libraries, a member of the Association of Research Libraries, is an important research facility for scholars throughout the Northwest. The free Oregon Card Program allows Oregon residents who are sixteen or older to borrow from the libraries' three-million-volume collection.

Campus athletic facilities include the 54,000-seat Autzen Stadium, the Len Casanova Athletic Center, Ed Moshofsky Sports Center, Papé Field, Jane Sanders Stadium, PK Park, Hayward Field and its all-weather track, Bowerman Family Building, Student Recreation Center, Matthew Knight Arena, and open-air and covered tennis courts.

Student-guided tours of the university are available Monday through Saturday. Tours may be arranged by calling 541-346-1274. Campus maps and pamphlets describing university programs, answers to questions about services and office locations, and general information about the university are available at the information desk in the main lobby of the Ford Alumni Center.

The university's website has daily news updates and information about programs and events: www.uoregon.edu.

Equal Opportunity

The university is committed to equal access to programs, course offerings, facilities, admission, and employment for all of its employees, students, and campus community members. It is the policy of the university to maintain an environment free from harassment and discrimination against any person.

The Office of Investigations and Civil Rights Compliance, formerly the Office of Affirmative Action and Equal Opportunity and the Office of the Title IX Coordinator, offers the UO community a place to discuss and report issues, concerns, and conflicts regarding discriminatory or harassing behavior. The office also helps identify how such concerns and conflicts may best be addressed and resolved. The office supports the university's compliance with federal and state laws regarding discrimination and harassment, affirmative action, and equal employment opportunity.

The office works with students, members of the faculty and staff, and campus community members by

- promoting a learning and working environment free from discrimination and harassment
- receiving concerns and complaints from any member of the UO community—students, faculty and staff members, visitors, and program participants—regarding issues of potential discrimination and discriminatory harassment at the university. In this investigative role, the office does not act as an advocate for employees, students, or community members while going through its process, but rather serves a neutral, impartial function
- addressing and resolving concerns and complaints of discrimination and harassment through a variety of means including facilitated conversations and mediations, education and training, and investigations
- explaining and clarifying university policies and procedures as well as federal and state laws and regulations regarding discrimination, harassment, retaliation, and affirmative action

- supporting diversity in recruitment and hiring by assisting administrative and academic departments in meeting these goals and adhering to affirmative action guidelines

Direct related inquiries to the Office of Investigations and Civil Rights Compliance, 677 E. 12th Ave., Suite 452, 5221 University of Oregon, Eugene, Oregon 97403-5221; telephone 541-346-3123.

Accreditation

The University of Oregon was elected to membership in the Association of American Universities in 1969. The university is accredited by the Northwest Commission on Colleges and Universities. Individual programs in the university's professional schools and colleges are accredited by the following organizations:

Accrediting Council on Education in Journalism and Mass Communications
 Association to Advance Collegiate Schools of Business
 American Alliance of Museums
 American Bar Association
 American Chemical Society
 American Psychological Association
 American Speech-Language-Hearing Association
 Commission on Accreditation for Marriage and Family Therapy Education
 Commission on English Language Program Accreditation
 Council for Interior Design Accreditation
 Landscape Architecture Accreditation Board
 National Architectural Accrediting Board
 National Association of Schools of Art and Design
 National Association of Schools of Music
 National Association of Schools of Public Affairs and Administration
 Network of Schools of Public Policy, Affairs, and Administration
 Planning Accreditation Board

University of Oregon Board of Trustees

The University of Oregon is an independent public body governed by the Board of Trustees of the University of Oregon. The trustees have broad authority to supervise and manage the university and may exercise all of the powers, rights, duties, and privileges expressly granted by law or that are incident to the board's powers, rights, duties, and privileges. Except for the university president, who is an ex officio, nonvoting member, the trustees are appointed by the governor and confirmed by the Oregon Senate.

The names of the members follow. The expiration date for each term is June 30 of the year shown.

Chuck Lillis, PhD '72, board chair, 2021
 Ginevra Ralph, BA '83, MA '85, board vice chair, 2019
 Marcia Aaron, BA '86, 2021

Disclaimer

While every effort is made to ensure the accuracy of the information in this catalog, the University of Oregon has the right to make changes at any time without prior notice. This catalog is not a contract between the University of Oregon and current or prospective students.

This publication will be made available in accessible formats upon request. Call Marketing Communications–Design and Editing Services, 541-346-2087.

From Admission to Graduation

This section of the catalog holds basic information for prospective students on how to apply to the University of Oregon, choose a major, register for courses, and apply for scholarships, grants, and financial aid, in addition to outlining and explaining their rights and responsibilities.

Admissions

Jim Rawlins, Director, Office of Admissions

541-346-3201
541-346-5815 fax
240 Oregon Hall

Admission requirements apply to all students seeking to enroll at the University of Oregon.

Application Deadlines for Fall 2020

Student Classification	Enrollment Deadline
Freshman, early action	November 1, 2019
Freshman, standard notification	January 15, 2020
University scholarship	January 15, 2020
International freshman	January 15, 2020
Transfer scholarship	February 15, 2020
Transfer, early notification	March 15, 2020
Graduate and undergraduate reenrollment	April 20, 2020
Transfer, standard notification	May 15, 2020
International transfer	May 15, 2020
Postbaccalaureate nongraduate or graduate	Thirty days before the start of the term
Graduate	Set by individual departments

Departmental Application Deadlines

The following majors require a separate application in addition to the university application and have strictly enforced deadlines for admission. Students who plan to enter the university as majors in architecture, art, interior architecture, landscape architecture, product design, or music should be aware of the special admission requirements and the application deadlines (given below). Details are in the departmental sections of this catalog.

Major	Department Application Deadline
Architecture, Interior Architecture, Landscape Architecture, Music, Product Design	January 15, 2020
Art and Technology	Departmental applications are accepted at any time and are reviewed on a monthly basis

Music majors audition for placement and take a musicianship examination scheduled on several dates throughout the spring. Art majors need to declare their major by completing the declaration form available both online (<https://art.uoregon.edu/sites/art1.uoregon.edu/files/>)

downloads/undergrad/ARTMajorDeclarationForm.pdf) and at the art office located at 198 Lawrence Hall.

Application Deadlines for Winter–Summer 2020

Student Classification	Enrollment Deadline
Winter 2020 Enrollment	
All classifications	October 15, 2019
Spring 2020 Enrollment	
All classifications	February 1, 2020
Summer 2020 Enrollment	
Freshman	March 1, 2020
International	March 15, 2020
Transfer	April 15, 2020
Postbaccalaureate	April 15, 2020
Graduate	April 15, 2020

Freshman Admission

Standard Admission Process

Through the standard admission process, applications are evaluated based on the following criteria:

- Strength of academic course work
- Grades earned
- Grade trends, especially in junior and senior year of high school
- Standardized test scores (SAT or ACT)
- Senior-year course load
- Writing skill, personal characteristics, and special circumstances as shared in the various written and narrative sections of the application
- Extracurricular activities, including community service and employment
- Ability to enhance the diversity of the university community
- Special talents

Application Procedure

Freshman applicants must submit the following to the Office of Admissions:

- Completed application for admission, including essays and activities and a nonrefundable application fee, by the standard application deadline. Students can use either the UO's own application, the Common Application, or the Coalition Application, and need to submit only one version of an application. Details are available online (<https://admissions.uoregon.edu/freshmen>).
- Official high school transcript reflecting grades through at least the end of the junior year
- Official test scores (a score for either SAT or ACT is required for all US applicants) or scores appearing on an official high school transcript

Standard Admission Requirements

Graduation from a Standard or Regionally Accredited High School

Applicants who graduate from a nonaccredited high school, were homeschooled, or earned a general equivalency diploma (GED) must

meet the alternative admission requirements explained in more detail online (<http://admissions.uoregon.edu/freshmen/alternativeadmission>).

Completion of Required Course Work

Applicants must satisfactorily complete the following high school course work. To meet minimum admission requirements, applicants must complete 15 units in the core areas listed below with a grade of C– or better in each course. These requirements may be in progress at the time of application, provided they are complete by the time the student enrolls at Oregon.

- **English—four years.** All four years should be in preparatory composition and literature, with emphasis on and frequent practice in writing expository prose
- **Mathematics—three years.** Must include first-year algebra and two additional years of college-preparatory mathematics. An advanced mathematics course is highly recommended in the senior year. Algebra and geometry taken prior to ninth grade are acceptable. Regardless of the pattern of mathematics courses or the number of years of mathematics taken, the mathematics course work must include Algebra II (or equivalent) or higher
- **Science—three years.** Must include a year each in two fields of college-preparatory science such as biology, chemistry, physics, or earth and physical science. One year of laboratory science is recommended
- **Social studies—three years.** May include areas such as global studies, history, or social studies electives
- **Second-language proficiency.** Demonstrate with one of the following:
 - Two years of the same second language in high school
 - Two college terms of the same second language
 - Proficiency test (e.g., SAT Subject Test or BYU Foreign Language Assessment)
 - Other options for meeting the second-language requirement, including American Sign Language

Exceptions to this requirement are only considered for students graduating from high schools that do not offer two years of any second language.

College work may be used to complete courses missed in high school. A one-term transferable college course of at least 3 credits (quarter system) is equal to one year of high school work. Applicants are strongly encouraged to contact the UO Office of Admissions to verify that the courses completed will satisfy course pattern deficiencies.

An examination in a second language is strongly recommended to qualify a student for admission by meeting the second-language proficiency requirements. Students who do not take an SAT Subject Test in a second language must prove language proficiency through another approved process.

The UO offers tentative admission based on sixth- or seventh-semester transcripts and planned senior schedule. Final admission is granted only after the Office of Admissions has received transcripts verifying successful completion of all admission requirements and graduation. If an applicant's final record shows a substantial change, or if the applicant does not complete a course that was in progress at the time of application or admission or completes it with a low grade, the offer of admission may be withdrawn by the university.

Submission of Scores from Standardized Tests

The University of Oregon accepts scores for the SAT or ACT when reported on official high school transcripts or submitted to the Office of Admissions directly from the testing service. Test scores for applicants planning to participate in intercollegiate athletics must be received directly from the testing service.

When taking the test, applicants should list the University of Oregon as a score recipient. The school code number to use for the SAT is 4846; the code for the ACT is 3498.

Consideration of Narratives and Essays

Freshman applicants are required to submit an essay that serves as a personal statement to show not only writing ability but insights into the applicant's personal characteristics. Students are also offered a chance to write on a specified topic in a second, optional essay.

Consideration of Activities, Work, and Accomplishments

Most applicants are required to share a set number of examples of their activities outside the classroom. Students choose a variety of ways to be involved in activities—lead, volunteer, intern, hold jobs, and achieve special recognition. No type of activity will be valued more highly than another, so students should consider anything they have done as a possibility to share and discuss. However, applicants are limited to a finite number of items, because the selection process does not reward sheer volume of activity. Instead, the university seeks to use this information to better understand who the applicants are, and to learn more about their most meaningful interests and accomplishments.

Explanation of Special Circumstances (optional)

Applicants whose high school or college performance was affected by any serious illness, diagnosed disability, personal difficulties, or family circumstances should provide a statement to summarize their situation. Dates should be included when applicable. Applicants with D or F grades, especially those grades that make them fall short of course requirements, are strongly encouraged to address the reasons for these grades in this section.

Alternative Admission

The requirements for standard admission confer no guarantees of admission, and applicants who meet them may or may not be admitted due to the selective, holistic process that takes many academic and personal factors into consideration. Also, students who do not meet these requirements will still be considered for admission. Students who fall short of the standard requirements in any way should never let that deter them from applying; they are strongly encouraged to contact the UO Office of Admissions for further guidance and additional requirements. Students from homeschool settings and those who attend nonaccredited schools may be required to submit additional test scores. Students who fall short of core subject requirements or those with low grades (especially those who fall below a 3.00 GPA) are encouraged to explain the reasons for their situation in the application.

Premajor Status

Departments or programs with premajor admission requirements are the Lundquist College of Business, certain majors in the College of Design, the College of Education, the School of Journalism and Communication, and the Department of International Studies. These units typically only permit newly admitted students to be considered premajors for

their majors. A premajor student is eligible to take advantage of the department's advising services and, in most cases, complete lower-division course work required for the major. Each department screens enrolled premajor students who have completed some university study and decides if they may advance to major status.

Transfer Admission

For applicants who have completed 35 or fewer quarter credits (or 23 or fewer semester credits) by the time of expected enrollment at Oregon, admission will be based on both freshman and transfer admission requirements.

For applicants who have completed 36 or more quarter credits (or 24 or more semester credits) by the time of expected enrollment at Oregon, admission will be based only on the transfer admission requirements.

Course Requirements

A grade of C– or better is required in the following:

- College-level composition and writing
- College-level mathematics
- Second language: two years in high school or two terms in college

Applicants who will not have completed these courses should still consider applying, and they are encouraged to submit a letter of explanation or include an explanation in the special circumstances statement.

Required GPA

In college-transferable courses, the following cumulative GPAs are required for admission consideration:

- 2.25 for Oregon residents
- 2.50 for applicants without Oregon residency
- 2.00 for applicants, regardless of residency, who earn an associate of arts Oregon transfer (AAOT) degree from an Oregon community college, an associate of science Oregon transfer (ASOT) degree in business, or an Oregon Transfer Module (OTM) from any public two-year or four-year institution in Oregon

The University of Oregon may recalculate grades for purposes of establishing an admissions GPA. This means that an applicant's admission GPA is not identical to the one presented by the previous institution. These recalculations will be made in regard to transferability of credit, repeat policies, or limits on certain types of credit.

Second-Language Proficiency

Applicants who graduated from high school or earned a general equivalency diploma (GED) in spring 1997 or later must document second-language proficiency by submitting an official transcript or score report verifying one of the following:

- Two years of the same language in high school
- Two terms of the same language in college
- Proficiency test (e.g., SAT Subject Test or Brigham Young University Foreign Language Achievement Test)

Options for meeting the second language requirement, including American Sign Language, are available on the Office of Admissions (<http://admissions.uoregon.edu/apply/secondlanguage.htm>) website. Applicants admitted with an exception to this requirement are required to

complete two college terms of the same language before graduating from the University of Oregon.

Additional Considerations

Even if an applicant meets the minimum requirements stated above, factors of concern, especially a drop in GPA from recent course work, may still be considered before a decision on admission is made. In addition, when considering applicants who do not meet minimum admission requirements, the Office of Admissions considers additional factors such as whether the applicant holds an associate of arts Oregon transfer degree from an Oregon community college or associate of arts degree from select community colleges in other states; which of the applicant's completed courses fulfill university graduation requirements; the applicant's grade point average (GPA); and the applicant's grade trend throughout his or her academic history. Academic potential and special talents are also considered.

Application Procedure

Transfer applicants must submit the following to the Office of Admissions:

1. A completed application for admission and a nonrefundable application fee
2. An official transcript from each college and university attended. It is a firm requirement that applicants submit transcripts from any previous institution where credit was attempted, regardless of the grades or amount of credit earned, and regardless of how or whether the applicant intends to apply these credits toward UO requirements. Applicants who omit record of previous work attempted will be denied admission, and admitted students for whom this omission is discovered can have their offer of admission revoked, even if it is after they have begun enrollment at Oregon
3. A high school transcript is not always required, but is often needed—not only for admission but for federal aid eligibility. Students should provide the high school transcript at the time of application whenever possible

Transfer students may submit their applications up to six months before they plan to enroll at the university, but may be asked to provide updated transcripts before final decisions are reached. Applications and official transcripts should be received by the university by the deadlines listed above to allow time for a complete evaluation of the transferred credits.

Transfer of Credit

The amount of credit transferred depends on the nature of the applicant's college work, which is evaluated according to the academic requirements of the University of Oregon. Only college-level academic course work from regionally accredited two- and four-year colleges or universities will be considered for transfer. Up to 124 credits from regionally accredited community or junior colleges, of which only 90 credits may be transferred from an international junior college, may be applied to the bachelor's degree.

See **Bachelor's Degree Requirements** (<http://catalog.uoregon.edu/bachelorrequirements>) for requirements that apply to new undergraduates.

Premajor Status

Departments or programs with premajor admission requirements are the Lundquist College of Business, certain majors in the College of Design, the College of Education, the School of Journalism and Communication, and the Department of International Studies. These units only permit

newly admitted students to be considered premajors for their majors. A premajor student is eligible to take advantage of the department's advising services and, in most cases, complete lower-division course work required for the major. Each department screens enrolled premajor students who have completed some university study and decides if they may advance to major status.

Dual Enrollment Program

The University of Oregon has dual-enrollment agreements with Lane Community College and Southwestern Oregon Community College. These programs provide students with the academic and administrative advantages of simultaneous enrollment in two institutions. More information and applications for admission are available from the UO Office of Admissions and at either community college. No student can be in the dual enrollment program without first being successfully admitted to the University of Oregon.

International Admission

Applicants who are not United States citizens or permanent residents are considered for admission to the university as international students.

International applicants, whether freshman or transfer, may apply for admission fall, winter, and spring terms and summer session. The international freshman application deadline for fall term is January 15. The international transfer student application deadline for fall term is May 15. Applications received after the deadlines are considered on a space-available basis. See the admission requirements for individual countries (<http://admissions.uoregon.edu/international/apply/requirements>).

A GPA of 2.50 is required for undergraduates who want to transfer from another university or college.

English Proficiency. Students whose native language is not English must supply results of a standardized language-proficiency test. The University of Oregon currently accepts both the TOEFL and IELTS examinations for establishing proficiency, as well as the SAT or ACT. To be considered for full admission without an English placement test upon arriving, applicants must score an 88 on the TOEFL iBT, or 6.5 in the IELTS. An applicant with at least a 61 TOEFL or 6.0 IELTS can be considered for full admission and will take an English language placement test after arriving at the university. Placement test results determine whether students are required to take language support courses in the Academic English for International Students (AEIS) program. Students placed in AEIS courses also concurrently enroll in regular university credit courses.

Conditional admission. International applicants who do not meet the proficiency requirements above may be offered conditional admission if their academic record is otherwise strong for admission. Through the conditional admission program, the student can take courses through the Intensive English Program (IEP), then proceed to regular university credit courses once IEP requirements are satisfied.

More information about the American English Institute and AEIS and IEP courses may be found in the **Academic Resources** section of this catalog and on the institute's website (<http://aei.uoregon.edu>).

Application Procedure

International applicants for freshman or transfer admission must submit the following to the Office of Admissions:

1. A completed international application for admission and a nonrefundable application fee
2. Official transcripts of all schoolwork taken beyond the eighth year of school (i.e., the equivalent of the American secondary school grades 9–12 and for any college or university work). An official transcript is an original or a certified copy in a sealed envelope
3. An official test score report from one of the English proficiency tests described above
4. Proof of sufficient funds to pay one year's tuition and living expenses while at the University of Oregon, consisting of a bank statement or certificate of balance prepared within the last six months, or a scholarship letter. This proof is a requirement of the US government

Postbaccalaureate Admission

Students who have earned a bachelor's degree and want to earn a second undergraduate degree or to take additional work without entering a formal degree or certification program may be admitted with postbaccalaureate nongraduate status. These students pay appropriate undergraduate fees. Applications and information are available from the Office of Admissions.

Graduate Admission

Students planning to earn graduate degrees at the university must be admitted to the Graduate School and the departments in which they plan to study. General admission requirements for the Graduate School are described in that section of this catalog. Each school and department in the university determines its specific requirements and application deadlines for graduate admission. For this reason, inquiries concerning graduate admission should be sent directly to the department or school of interest.

Notice to Nonresidents of the State of Oregon

Definitions

The following words and phrases mean:

(1) *"Domicile" is a person's true, fixed, and permanent home and place of habitation. It is the place where a person intends to remain and to which the person expects to return when the person leaves without intending to establish a new domicile elsewhere. In order to establish a domicile in Oregon, a person must maintain a predominant physical presence in Oregon for 12 consecutive months after moving to the state.*

(2) *A "financially independent person" is a person who, at the time of application for residency status:*

(a) *declares himself or herself to be financially independent;*

(b) *has not been claimed as a dependent during the immediately preceding tax year, and will not be claimed as a dependent during the current tax year, on the federal or state income tax returns of any other person; and*

(c) *has not received in the immediately preceding calendar year, and will not receive during the current calendar year, one-half or more of his or her support, in cash or in kind, from another person or persons, except for support received from his or her spouse.*

A "financially dependent person" is a person who, at the time of application for residency status:

(a) has been claimed as a dependent on the federal and state income tax returns of another person during the immediately preceding tax year; or

(b) is eligible to be claimed as a dependent for tax purposes and can provide evidence that one-half or more of the individual's financial support was provided by another person or persons.

Determination of Residence

(1) For purposes of admission and instruction fee assessment, the University of Oregon shall classify a student as an Oregon resident or nonresident. In determining resident or nonresident classification, the primary issue is a person's intent in coming to Oregon. Intent is inferred from a person's conduct and history as they relate to the requirements of these residency rules. If a person is in Oregon primarily for the purpose of obtaining an education, that person will be considered a nonresident. It is possible for an individual to qualify as a resident of Oregon for purposes of voting or obtaining an Oregon driver's license and not meet the residency requirements established by these rules.

(2) An Oregon resident is a financially independent person who, prior to the term for which Oregon resident classification is requested, has both:

(a) established and maintained a domicile in Oregon for 12 consecutive months; and

(b) during that period, has been primarily engaged in activities other than those of being a college student.

(3) A student may be considered primarily engaged in educational activities regardless of the number of hours for which the student is enrolled. However, a student who is enrolled for more than 8 hours in any semester or quarter during the 12-month period referred to in section (2) of this rule shall be presumed to be in Oregon for primarily educational purposes. Such period of enrollment shall not be counted toward the establishment of a bona fide domicile of 12 consecutive months in this state unless the student proves, in fact, establishment of a bona fide domicile in this state primarily for purposes other than educational.

(4) An Oregon resident is also a financially dependent person who is claimed as a dependent by another person who has both:

(a) established and maintained an Oregon domicile for 12 consecutive months; and

(b) during that period, has been primarily engaged in activities other than those of being a college student.

(5) A financially dependent person who is claimed as a dependent by another person who has not established and maintained an Oregon domicile shall be presumed to be a non-resident. This presumption may be overcome by evidence of the student's long-standing presence in Oregon and demonstration of other factors.

(6) The criteria for determining Oregon resident classification shall also be used to determine whether a person who has moved from Oregon has established a non-Oregon residence.

(7) If institution records show that the residence of a student or the person upon whom the student is dependent is outside of Oregon, the student shall continue to be classified as a nonresident until entitlement to resident classification is shown. The burden of showing that the residence classification should be changed is on the student requesting the change.

(8) Notwithstanding section (4) of this rule, a student who is financially dependent on a non-Oregon resident may nonetheless be considered an Oregon resident if the student resides in Oregon for at least 12 consecutive months with a parent or legal guardian who has both:

(a) established and maintained an Oregon domicile for 12 consecutive months; and

(b) during that period, has been primarily engaged in activities other than those of being a college student.

Residency Consideration Factors

(1) The following factors, although not necessarily conclusive or exclusive, have probative value in support of a claim for Oregon resident classification:

(a) Reside in Oregon for 12 consecutive months prior to the beginning of the term for which resident classification is sought and during that period be primarily engaged in activities other than those of a college student;

(b) Reliance upon Oregon resources for financial support;

(c) Domicile in Oregon of persons legally responsible for the student;

(d) Acceptance of an offer of permanent employment in Oregon; and

(e) Ownership by the person of his or her living quarters in Oregon.

(2) The following factors, standing alone, do not constitute sufficient evidence to effect classification as an Oregon resident:

(a) Voting or registration to vote;

(b) Employment in any position normally filled by a student;

(c) The lease of living quarters;

(d) Admission to a licensed practicing profession in Oregon;

(e) Automobile registration;

(f) Public records, for example, birth and marriage records, Oregon driver's license;

(g) Continuous presence in Oregon during periods when not enrolled in school;

(h) Ownership of property in Oregon or the payment of Oregon income or other Oregon taxes; or

(i) Domicile in Oregon of the student's spouse.

(3) Reliance upon non-Oregon resources for financial support is an inference of residency in another state.

Evidence of Financial Dependency

(1) In determining whether a student is financially dependent, a student must provide:

(a) Evidence of established domicile of the person claiming the student as a dependent; and

(b) The identification of the student as a dependent on the federal and state income tax returns of the person claiming the student as a dependent. Additional documentation to substantiate dependency during

the current calendar year may be required at a later time if deemed necessary by the institution.

(2) A student who provides evidence that he or she is a financially dependent person under these rules shall not be required to establish a 12-month domicile prior to classification of resident status, provided such a student may not be classified as a resident while receiving financial assistance from another state or state agency for educational purposes.

Residence Classification of Armed Forces Personnel

(1) For purposes of this rule, members of the armed forces means officers and enlisted personnel of:

(a) The Army, Navy, Air Force, Marine Corps, and Coast Guard of the United States;

(b) Reserve components of the Army, Navy, Air Force, Marine Corps, and Coast Guard of the United States;

(c) The National Guard of the United States and the Oregon National Guard.

(2) Active members of the armed forces and their spouses and dependent children shall be considered residents for purposes of the instructional fee if the members:

(a) Reside in this state while assigned to duty at any base, station, shore establishment, or other facility in this state;

(b) Reside in this state while serving as members of the crew of a ship that has an Oregon port of shore establishment as its home port or permanent station; or

(c) Reside in another state or a foreign country and file Oregon state income taxes no later than 12 months before leaving active duty.

(3) An Oregon resident entering the armed forces retains Oregon residence classification until it is voluntarily relinquished.

(4) An Oregon resident who has been in the armed forces and assigned on duty outside of Oregon, including a person who establishes residency under section (2)(c) of this rule, must, within a reasonable time, demonstrate an intent to retain classification as an Oregon resident. Such intent may be shown by returning to Oregon within six months after completing service in the armed forces.

(5) A person who continues to reside in Oregon after separation from the armed forces may count the time spent in the state while in the armed forces to support a claim for classification as an Oregon resident.

(6) The dependent child and spouse of a person who is a resident under section (2) of this rule shall be considered an Oregon resident. "Dependent child" includes any child of a member of the armed forces who:

(a) Is under 18 years of age and not married, otherwise emancipated or self-supporting; or

(b) Is under 23 years of age, unmarried, enrolled in a full-time course of study in an institution of higher learning, and dependent on the member for over one-half of his/her support.

Residence Classification of Members of Oregon Tribes

(1) Students who are enrolled members of federally recognized tribes of Oregon or who are enrolled members of a Native American tribe which had traditional and customary tribal boundaries that included parts of the state of Oregon or which had ceded or reserved lands within the state of Oregon shall be assessed resident tuition regardless of their state of residence.

(2) For purposes of this rule, the federally recognized tribes of Oregon are:

(a) Burns Paiute Tribe;

(b) Confederated Tribes of Coos, Lower Umpqua and Siuslaw;

(c) Confederated Tribes of Grand Ronde Community of Oregon;

(d) Confederated Tribes of Siletz Indians of Oregon;

(e) Confederated Tribes of the Umatilla Indian Reservation;

(f) Confederated Tribes of the Warm Springs Indian Reservation;

(g) Coquille Indian Tribe;

(h) Cow Creek Band of Umpqua Indians;

(i) Klamath Tribes.

(3) For purposes of this rule, the Native American tribes which had traditional and customary tribal boundaries that included parts of the state of Oregon or which had ceded or reserved lands within the state of Oregon are:

(a) CALIFORNIA:

(A) Benton Paiute Tribe;

(B) Big Bend Rancheria;

(C) Big Lagoon Rancheria;

(D) Blue Lake Rancheria;

(E) Bridgeport Indian Colony;

(F) Cedarville Rancheria;

(G) Fort Bidwell Indian Tribe;

(H) Hoopa Valley Tribe;

(I) Karuk Tribe of California;

(J) Likely Rancheria;

(K) Lookout Rancheria;

 (E) Yakama Indian Nation.

(4) A student seeking to be assessed resident tuition under the provisions of this rule shall submit, following procedures prescribed by the OUS institution where the student seeks to enroll, a photocopy of tribal enrollment that documents tribal membership.

Residence Classification of Non-Citizens

A person who is not a citizen of the United States may be considered an Oregon resident if the person qualifies as a resident and is one of the following:

- (1) A lawful permanent resident. The date of receipt of an application for lawful permanent residency shall be the earliest date upon which the 12-month residency requirements may begin to accrue.
- (2) An immigrant granted refugee or political asylum in the United States, or entering through a special parole program (such as the Haitian Family Reunification Parole Program, the Cuban Family Reunification Parole Program, the Central American Minor Refugee/Parole Program, the Filipino World War II Veterans Parole Program). The date of receipt of an application for political asylum, refugee status, or qualifying special parole program shall be the earliest date upon which the 12-month residency requirements under Section B may begin to accrue.
- (3) A person holding one of the following non-immigrant visa classifications: A, E, G, H-1B, H-1C, the spouse or child of a person holding an H-1B or H-1C visa, I, K, L, NATO, O, R, S, T, TN, U, or V. The date of the issuance of a visa for one of these classifications shall be the earliest date upon which the 12-month residency requirements may begin to accrue. A person possessing a non-immigrant or temporary visa that is not identified under this rule shall not be considered an Oregon resident.
- (4) A person who is a citizen of an American territory or a sovereign nation that does not require a nonimmigrant visa to travel to the US.

(5) An immigrant granted a federal status leading to the establishment of permanent residency or citizenship in the United States. Documentation of a status that is not explicitly included in this compact will be at the discretion of the Interinstitutional Residency Committee.

Changes in Residence Classification

- (1) If an Oregon resident student enrolls in an institution outside of Oregon and later seeks to re-enroll in a University that applies these residency standards, the residence classification of that student shall be re-examined and determined on the same basis as for any other person.
- (2) A student who becomes eligible for resident tuition during a term of enrollment at a University will not qualify for resident tuition until the beginning of the next term.
- (3) Once established, classification as a resident continues so long as the student remains in continuous academic year enrollment in the classifying institution.
- (4) A person who seeks classification as a resident under these rules shall complete and submit a notarized Residence Information Affidavit. The affidavit and all required supportive documents and materials must be submitted by the last day to register for the term in which resident status is sought.
- (5) No other institution is bound by any determination of residency except by duly authorized officials under procedures prescribed by these rules including timely submittal of the notarized affidavit.

Review of Residence Classification Decisions

An interinstitutional residency committee (IRC) is established consisting of the officers who determine student residence classification at each university that applies this residency procedure. The chair of the committee shall rotate among the universities with no chair serving more than two consecutive years. A majority of the members of the committee shall constitute a quorum. A majority of a quorum may make recommendations.

Residence cases of unusual complexity, especially where there may be conflict of rules, may be referred to by the originating classification officer to the IRC for its recommendation.

Any person who is aggrieved by the originating classification officer's classification decision may, within 10 days of the date of mailing or other service of the classification decision, request that the IRC review the classification and make recommendations to the registrar or designee of the originating university. The appeal must be in writing and shall be filed with the originating university. An aggrieved person may supply written statements to the IRC for consideration in reviewing the case and may also make oral presentation to the IRC on a date to be scheduled by the IRC. The IRC shall make a recommendation to the registrar or designee of the originating university. That registrar or designee shall then issue a decision. The decision of the registrar or designee shall be final unless appealed.

A person dissatisfied with the decision of the registrar or designee may, within 10 days of the date of the mailing or other service of the decision, appeal the decision to the president or designee of the originating university. An appeal shall be in writing only. The decision of the president or designee shall be final.

A person granted a meritorious hardship exception to residency under the Oregon Administrative Rules regarding residency prior to July 1, 1990, shall not lose the exception solely because of the repeal of the exception authorization.

Registration and Academic Policies

Julia Pomerenk, University Registrar

541-346-6682 fax

234 Oregon Hall

registrar@uoregon.edu

Student Records Policy

In compliance with the Family Educational Rights and Privacy Act, the University of Oregon has formulated the Student Records Policy to outline the proper handling and release of student educational records. The following is a summary of that policy.

The university maintains only student records relevant to the educational or related purposes of the university. Students enrolled in the university generally have the right to inspect educational records maintained by the university that directly affect them. Those records are not released to anyone other than the student without the signed, written consent of the student, with the following exceptions:

1. University personnel who have legitimate interests
2. Officials at another school where the student seeks to enroll or is already enrolled
3. At the direction of a court
4. In situations of health or safety emergency
5. The disclosure is information designated as directory information

Upon request, the university releases directory information about the student, but the student may request, in writing, that such information not be released. Contact the Office of the Registrar for details about making a request for nonrelease.

The full text of the Student Records Policy is available from the Office of the Registrar and on the registrar's website.

Academic Year

The university divides the academic year into three terms of approximately 11 weeks each (except for the School of Law, which uses a semester calendar).

The summer session supplements the work of the fall, winter, and spring terms; announcements are issued for that session.

Students may enter the university at the beginning of any term, with the exception of architecture students, who should see Application Deadlines under **Admissions**. The university's new-student orientation, IntroDUCkTion, is held in July and August for freshman and transfer students who enter fall term. All new students are urged to attend; students who do not attend IntroDUCkTion are oriented and register for classes during the Week of Welcome. See the **Academic Calendar** for other important dates during the current academic year.

Students are held responsible for familiarity with university requirements governing such matters as registration, add/drop deadlines, academic standards, student activities, student conduct, and organizations. Academic regulations are listed on the registrar's website.

About the UO Catalog

This publication, the 2019–20 University of Oregon Catalog, is a statement of university rules, regulations, and calendars that goes into effect at the opening of fall term 2019. Changes to the university curriculum that were made through winter term 2019 are reflected in the academic sections of the catalog. **Bachelor's Degree Requirements**, in this section of the catalog, have been updated to reflect curriculum changes that were made through spring term 2019.

A student who is admitted and enrolls at the university during any academic year may graduate under the general requirement provisions of the catalog in effect that year, provided the catalog has not expired. A student may choose to graduate under the general requirements of a subsequent catalog, provided he or she completes all of those requirements. Major requirements are determined by the academic departments and programs; requirements are subject to change for students who are not continuously enrolled. See Catalog Expiration and Requirements Policies in the **Reader's Guide to the Catalog** section for more information.

Undergraduate and graduate degrees and certificates are listed in the **Degrees, Majors, Minors, and Certificates** section of this catalog. For details about graduate degrees, see the **Graduate School** section.

Grading Systems

The university has two grading systems. When regulations permit, a student may elect to be evaluated for a course with a letter grade or pass/no pass (P/N). Letter-graded work is designated A, B, C, D, or F. Pass/no pass work is designated P or N. An asterisk after the P or N indicates that the course is offered P/N only. See Bachelor's Degree Requirements for regulations on graded credits.

Each department, school, or special program establishes regulations on pass/no pass courses for its majors. Before exercising the P/N option, students should confer with advisors.

Students must choose their grading option at the time of registration and are permitted to change it only within the period allowed.

Students who register and never attend or participate in a course and students who attend and participate in part of the course but do not complete the course requirements will receive a grade of F or N, based on the grading option in registration.

Graded

Student work is graded as follows: A, excellent; B, good; C, satisfactory; D, inferior; F, unsatisfactory (no credit awarded). Instructors may affix + or – to the grades A, B, C, and D.

Pass/No Pass

Courses that are offered pass/no pass only are assigned P* or N* grades. Courses offered for letter grades or pass/no pass use P or N grades without an asterisk.

Student work may be graded as follows: P (pass), satisfactory performance (C– or better for undergraduate course work, B– or better for graduate course work), or N (no pass), unsatisfactory performance, no credit awarded (D+ or worse for undergraduate course work, C+ or worse for graduate course work). The class schedule designates courses that are offered only pass/no pass. Passing credits are also awarded for advanced placement and College-Level Examination Program work and for work taken at another collegiate institution when that institution has already recorded a pass/no pass mark or if the registrar's staff cannot equate the quality of the work to the UO grading system.

Marks

AU (Audit)

Student-initiated mark. Audit enrollments are recorded on the student's academic record, but no credit is earned by audit. Audited classes do not satisfy degree requirements, nor do they count toward the Graduate School's continuous enrollment requirement.

I (Incomplete). Instructor-Initiated Mark

A mark of I may be issued when the quality of work is satisfactory but a minor yet essential requirement of the course has not been completed for reasons acceptable to the instructor. Faculty and students should develop a contract outlining the requirements and specific deadlines for making up the incomplete. Contracts should be filed in the faculty member's departmental office. Students should not reregister or attend the same course to make up an incomplete.

Incompletes Assigned to Undergraduate Students Prior to Winter Term 2005

Incompletes assigned prior to winter term 2005 will remain on the academic record and cannot be removed.

Incompletes Assigned to Undergraduate Students Beginning Winter Term 2005

Effective winter term 2005, undergraduate students have one calendar year to make up an incomplete mark assigned by a UO faculty member. Earlier deadlines may be set by the instructor, dean, or department head. Failure to make up the incomplete by the end of one calendar year will result in the mark of I automatically changing to a grade of F or N. *Exception: students approved to reserve credit for a graduate degree follow the graduate student policy for those courses.*

For students graduating, removal of incompletes awarded must be submitted on DuckWeb no later than the Friday following exam week of the graduating term. Incompletes awarded will be automatically changed to a grade of F or N prior to conferral of the degree. Grade changes must be submitted no later than thirty days after the degree is awarded. Grades of F or N will remain on the academic record after the degree is awarded and cannot be removed.

Incompletes Assigned to Graduate Students

Graduate students must convert incompletes within one calendar year of the assignment of the incomplete. Students may request additional time for the removal of the incomplete by submitting a petition stating the course requirements that were not initially completed, with the instructor's signature, to the dean of the Graduate School for review. This policy does not apply to incompletes routinely assigned to courses applying to the completion of research (601), thesis (503), dissertation (603), and terminal or master's projects (609, 709, AAAP 611, ARCH 619, BA 740, CRES 611, IARC 611, LA 699, and LT 611).

For students graduating, removal of incompletes awarded must be submitted on DuckWeb no later than the Friday following exam week of the graduating term. Grade changes must be submitted no later than 30 days after the degree is awarded. Incompletes will remain on the academic record after the degree is awarded and cannot be removed.

W (Withdrawal)

Student-initiated mark. Students may withdraw from a course through web registration. See the online class schedule for deadlines.

X (No Grade Reported)

Registrar-initiated mark. The instructor did not report a grade for the student.

Y (No Basis for Grade)

Instructor-initiated mark used prior to fall 2017. There is no basis for evaluating the student's performance.

Effective fall 2017, the Y mark is no longer used. Instructors issue a grade of F or N, as indicated by the grading option, to students who register and never attend or participate in the course, and to students who attend and participate in part of the course but do not complete all course requirements.

Grade Point Average

For terms prior to fall 2016, grades for courses taken at the University of Oregon appear on both the official and unofficial transcript and are included in the term and cumulative GPA calculation.

Effective fall 2016, grades for undergraduate courses taken at the University of Oregon appear on both the official and unofficial transcript and are included in the term GPA calculation. However, for undergraduate courses not designated as repeatable for credit, only the second grade earned of a repeated course is calculated into the cumulative GPA. Credit for nonrepeatable courses is given only once.

Grades recorded as a result of sanctions and/or academic misconduct are included in the cumulative GPA and will not be excluded in any event of repetition. Conduct grades may not be petitioned.

Four points are assigned for each credit of A, three points for each credit of B, two points for each credit of C, one point for each credit of D, and zero points for each credit of F. The plus sign increases the points

assigned the letter grade by 0.3 per credit, and the minus sign decreases the points assigned the letter grade by 0.3 per credit. The grade point average is calculated by dividing total points by total credits of A, B, C, D, and F. Marks of AU, I, W, X, Y, and the grades of P and N are disregarded in the computation of the grade point average.

Academic Standing

When there is evidence of lack of satisfactory progress toward meeting graduation requirements, the Scholastic Review Committee may place students on academic probation or disqualify them from attendance at the university. For information and assistance, students should inquire at the Office of Academic Advising, 101 Oregon Hall.

After grades are processed at the end of each term, term and cumulative UO GPAs are calculated for each undergraduate student, admitted or nonadmitted. A student's academic standing is based on attempted and earned hours and on the term and cumulative UO GPAs.

If a grade change affects the student's term and cumulative UO GPAs and academic standing, the student should ask the instructor to submit the grade change through DuckWeb immediately. Retroactive changes to a term's academic standing are made only to remove probation from the term record and only if grade changes are submitted by the last day to register and add classes for the following term. If grade changes that affect GPAs and academic standing are submitted later than this, the student's probation standing for the previous term is not amended.

Academic Warning. Students receive an academic warning when the UO term GPA is between 0.00 and 1.99, inclusive, even if the UO cumulative GPA is 2.00 or higher. This notation is not recorded on the student's official academic transcript, but does appear on the unofficial transcript. Terms with marks resulting in no GPA are considered to be below 2.00 unless all attempted credits for that term were passed. Students who completely withdraw from a term with W marks receive a 0.00 term GPA, and are thus subject to academic warning, probation, and/or disqualification.

Academic warning is given as a courtesy to advise students of potential academic difficulty. Academic probation does not depend on the student receiving prior notice of academic warning.

Academic Probation

Academic probation is earned and the notation "Academic Probation" is recorded on the student's academic transcript whenever the following conditions exist:

1. When the UO cumulative GPA is lower than 2.00. Students who have earned 44 or fewer credits are allowed two terms of probation before they are subject to disqualification. Students with more than 44 credits are only allowed one term of probation before they are subject to disqualification. Students on academic probation whose UO cumulative GPA is lower than 2.00 and whose UO term GPA is 2.00 or higher remain on academic probation
2. When students have received academic warning for two consecutive terms and their subsequent UO term GPAs are between 0.00 and 1.99, inclusive, even if the UO cumulative GPA is above a 2.00. Terms with marks resulting in no GPA are considered to be below 2.00 unless all attempted credits for that term were passed. Students who completely withdraw from a term with W marks receive a 0.00 term GPA, and are thus subject to academic warning, probation, and/or disqualification

Students on academic probation are limited to a study load of no more than 15 credits. Incoming students may be admitted on academic probation and are notified when such action has been taken; these students may be subject to disqualification after a single term of probation.

Academic Disqualification

Academic disqualification is earned and the notation "Disqualification" is recorded on the student's academic transcript whenever the following conditions exist:

1. Students on academic probation for having a UO cumulative GPA lower than 2.00 who earn a UO term GPA lower than 2.00 in their next term
2. Students on academic probation for having a term GPA below 2.00 after two consecutive terms on academic warning and who earn less than a 2.00 term GPA for the fourth consecutive term. Terms with marks resulting in no GPA are considered to be below 2.00 unless all attempted credits for that term were passed. Students who completely withdraw from a term with W marks receive a 0.00 term GPA, and are thus subject to academic warning, probation, and/or disqualification

Students may apply for reinstatement after disqualification by contacting the Office of Academic Advising. Petitions are reviewed to determine the probability that a student can satisfactorily complete the requirements of a degree program. The student may enroll during the academic year only if the Scholastic Review Committee allows the student to continue on probationary status. Students may enroll for summer classes without being reinstated. Students who have been disqualified must petition for reinstatement to graduate.

Exceptions to Academic Regulations

1. Two standing university committees review requests in writing for exceptions to university rules, regulations, deadlines, policies, and requirements: the Academic Requirements Committee and the Scholastic Review Committee. For information about how to submit a petition to the Academic Requirements Committee, inquire at the Office of the Registrar, 234 Oregon Hall; call 541-346-2935. For information about how to submit a petition to the Scholastic Review Committee, inquire at the Office of Academic Advising, 101 Oregon Hall; call 541-346-3211
2. For information about removal from academic probation and academic reinstatement options, inquire at the Office of Academic Advising

Registering for Classes

Class Schedule

The class schedule is published online two weeks prior to priority registration each term. The schedule lists courses offered for the term. Dates, deadlines, procedures, and information about tuition and fees can be found on the registrar's website.

Registration

A registration period takes place before the start of classes each term; the dates are published in advance. Students are not officially registered and are not entitled to attend classes until they have completed the prescribed registration procedures. Students must minimally be registered for "audit" to sit in on classes.

Once registered, students are academically and financially responsible for their course enrollments until they officially withdraw. Withdrawal after the term begins results in some financial liability. Appropriate withdrawal procedures are explained on the registrar's website.

New Student Registration

Entering undergraduate students should plan to attend IntroDUCKtion, offered during the summer. After being notified of admission to the University of Oregon for fall term, new students receive information about this program. Space is limited, so sign up early. IntroDUCKtion is a requirement for all new students. Students admitted in terms other than fall term will attend an orientation session specific to the term for which they are admitted. Additional information is available on the Student Orientation (<https://orientation.uoregon.edu/introducttion>) website.

Reenrollment

Admitted undergraduate students who plan to register any time during an academic year after an absence of four or more terms, not including summer session, must notify the Office of the Registrar by filing a reenrollment form, available on the registrar's website.

Reenrollment procedures for graduate students are described in the **Graduate School** section of this catalog.

Summer Session

Nonadmitted students planning to register for summer session should file the registration eligibility form, which is provided on the Community Education Program website (<https://cep.uoregon.edu>). The form is also available from the Continuing and Professional Education office or the Office of the Registrar. Nonadmitted students who were enrolled spring term one year earlier or after that term will not need to submit this form. Admitted undergraduate or graduate students may register without making any special request, subject to the normal reenrollment policies for their student level. Disqualified undergraduate students must file a reenrollment form if they have not enrolled during the preceding academic year.

Transcripts

Students are required to send official transcripts to the Office of the Registrar for any academic work taken at other institutions while completing their baccalaureate degree program. A student's official UO academic record must be kept complete at all times. Exceptions are made only for special and provisional students who are formally admitted under individual arrangements, and for summer transient and community education students who are not formally admitted. Failure to file required records can result in the cancellation of admission or registration; disciplinary action may be initiated and sanctions may be imposed by the university.

Nonrepeatable Courses

Undergraduate students may not (without prior approval by the Academic Requirements Committee) register for nonrepeatable courses in which they are currently enrolled or for which they have already earned a Pass or C or better at the UO or from a transferring institution. Students may register for a nonrepeatable course for which they have already earned a No Pass or C– or less at the UO or from a transferring institution without prior approval, but not more than three times in total. All attempts are counted toward this limit. Credits for nonrepeatable courses are awarded only one time. All graded attempts of repeated courses taken at the UO

are calculated into the term and cumulative GPAs. Additional information is available on the registrar's website.

Alternate Ways to Earn Credit

The university has established programs through which students may earn credit toward graduation and, at the same time, decrease the cost and time required for standard undergraduate study. Brief descriptions of these programs appear below. Additional information is available from the Office of the Registrar.

Advanced Placement

Students who receive satisfactory grades in advanced placement examinations administered by the College Board may, on admission to the university, be granted credit toward a bachelor's degree in comparable university courses. Information about credit awarded and scores required is available from the registrar's website.

College-Level Examination Program

For some courses, departments have authorized the use of subject examinations prepared by the College-Level Examination Program (CLEP). Examinations are available, for example, in calculus, chemistry, economics, French, German, literature, Spanish, and sociology. Once a student is admitted to the university, it accepts as transfer credit the successful completion of CLEP subject examinations by students. More information is available online on the registrar's website (<http://registrar.uoregon.edu/current-students/alternative-ways-to-earn-credit>) and at testing.uoregon.edu.

Community Education Program

Individuals who want to enroll for 8 credits or fewer per term in university courses without formally applying for admission may do so through the Community Education Program. Part-time students of all ages choose from a variety of courses. More information is available at the Academic Extension office located at the Baker Downtown Center, 975 High St., Suite 110, 541-346-5614.

Credit by Examination

Credit by examination allows formally admitted undergraduate students to challenge undergraduate university courses without registering for the courses. Students seeking to receive credit by examination must be registered for the term in which the exam is given. Credit by examination may be earned only in courses whose content is identified by title in the University of Oregon catalog. Students should contact the Office of the Registrar to determine eligibility for credit by examination. If eligible, students will be issued an examination form. Students then obtain faculty and department approvals before the exam can be scheduled. Students are billed an examination fee of \$25 per credit.

Successful credit by examination is shown as transfer credit on the UO transcript and may be recorded as a pass (P) or graded (A, B, C, D), consistent with the options listed in the class schedule. Credit by examination may not be counted toward the satisfaction of the graduation residency requirement or for fulfillment of the requirement to complete 45 credits graded A, B, C, D at the University of Oregon. However, credit by examination may be counted toward the requirement to complete 168 credits graded A, B, C, D, P* from all institutions attended.

The following are not available for credit by examination:

- Courses numbered 0–99; Field Studies (196); Workshop, Laboratory Projects, or Colloquium (198); Special Studies (199); courses numbered 200 or 399–410
- First-year second-language courses
- 100-level mathematics courses and MATH 211, MATH 212, MATH 213
- English composition courses (WR 121, WR 122, WR 123)
- An elementary language course taught in the student's native language
- A course for which a CLEP examination is available
- A course that substantially duplicates credit already earned
- A course that is more elementary in nature than credit already earned
- A course in which the student is already enrolled for credit
- A course for which the student has received a grade of A, B, C, D, P, P*, I, X, or Y
- A course for which the student has already taken and failed an examination for credit

Contact the Office of the Registrar for more information.

International Baccalaureate

Students who receive satisfactory grades in International Baccalaureate examinations may, on admission to the university, be granted credit in comparable university courses toward a bachelor's degree. Credit can be earned, for example, in art, biology, business, chemistry, Chinese, computer science, economics, English, French, German, history, geography, Japanese, Chinese, mathematics, music, physics, psychology, social and cultural anthropology, Spanish, Swedish, and theater arts. A complete list of university credit earned by International Baccalaureate examinations is available from the registrar's website.

Military Credit

The university generally grants credit for military education experiences as recommended by the American Council on Education's *Guide to the Evaluation of Educational Experiences in the Armed Services*, and in accordance with University of Oregon policies regarding transfer credits. Students may request evaluation of credits earned through the Community College of the Air Force, Defense Language Institute, or military education. Students must submit official copies of college transcripts or a Certificate of Completion from the Defense Language Institute. An official copy of the student's DD Form 214, DD Form 295, or a Joint Services Transcript (JST) is required for military credit.

Bachelor's Degree Requirements

To earn a University of Oregon bachelor's degree, students must satisfy the following requirements.

University Requirements

Credits

The bachelor of arts, bachelor of science, bachelor of education, bachelor of music, and bachelor of music in music education degrees require a total of 180 credits with passing grades. The bachelor of fine arts and bachelor of landscape architecture require a total of 220 credits. The bachelor of interior architecture requires a total of 225 credits, and the bachelor of architecture requires a total of 231 credits.

Concurrent Degrees

Concurrent degrees are awarded under the following conditions:

1. The second degree may be offered by the same school or college
2. The student completes the departmental requirements for each major
3. The student completes the core education requirements (formerly the general-education requirements) for each degree
4. The student completes a minimum of 36 credits at the UO beyond those required for the degree that has the highest credit requirement
5. The student applies for the first degree on DuckWeb and submits a request to the Office of the Registrar for the second degree

Not all colleges or schools permit concurrent degrees; the Undergraduate Council reviews and approves all concurrent degrees offered within the same college or school.

Academic Major

All bachelor's degrees must be awarded with a major. Minimum requirements are 36 credits in the major, including 24 in upper-division work. Specific requirements are listed under individual departments.

A student may be awarded a bachelor's degree with more than one major by completing the general university degree requirements for the designated majors and degree and all requirements in each major as specified by the major departments, schools, or colleges.

Declaring a Major (First-Time, Full-Time Freshman Students)

1. Undergraduates who matriculated into the UO as first-time, full-time freshmen, should declare a major by the end of the fourth week of their sixth term of enrollment (typically spring term of the second year at Oregon)
2. Students who have not declared a major by the end of the fourth week of the sixth term of enrollment will need to see an advisor and receive a personal identification number (PIN) before they can register for the next term's classes. Advisors can either assist students in choosing a major or grant an exception and help students develop a plan to declare a major

Declaring a Major (Transfer Students)

1. Transfer students should declare a major by the end of the fourth week of the third term of enrollment at Oregon
2. Transfer students who have not declared a major by the end of the fourth week of the third term of enrollment at the UO will need to see an advisor and receive a PIN before they can register for the next term's classes. Advisors can either assist students in choosing a major or grant an exception and help students develop a plan to declare a major

Academic Minor

Unless specified by a particular department, a minor is not required for a bachelor's degree. Students choosing to complete a minor must earn a minimum of 24 credits, including 12 in upper-division work. Minor requirements, including residency, are listed under department headings. A minor may be awarded only at the time a bachelor's degree is conferred.

Upper-Division Work

A minimum of 62 credits in upper-division courses (300 level or higher) are required.

Residency

After completing 120 of the 180 required credits, 160 of the 220 required credits, 165 of the 225 required credits, or 171 of the 231 required credits, each student must complete at least 45 credits of UO courses in residence at the university.

Total Credits of A, B, C, D, P*

Students must earn 168 transfer or University of Oregon credits with grades of A, B, C, D, or P*. Credits earned in courses offered only pass/no pass use the P* designation.

UO Credits of A, B, C, D

A minimum of 45 credits graded A, B, C, or D must be earned at the University of Oregon. Courses required in the major and designated in the class schedule as pass/no pass (P/N) only may be counted toward the 45-credit requirement only if the 168-credit requirement has been satisfied.

Satisfactory Work

Graduation from the university requires a minimum UO cumulative grade point average of 2.00.

Written English

Two courses (College Composition I (WR 121) and either College Composition II (WR 122) or College Composition III (WR 123) or equivalents) passed with grades of C– or better or P are required for all undergraduate degrees. For placement, prerequisites, or exemption, see policies in the **English** section of this catalog.

Requirements for Bachelor of Arts and Bachelor of Science

Students must choose to graduate with a specific degree and major (for example, bachelor of arts with a major in chemistry or bachelor of science with a major in chemistry). See degrees listed in the **Degrees, Majors** (p. 41), **Minors** (p. 42), and **Certificates** (p. 45) section of this catalog.

Bachelor of Arts Requirements

The bachelor of arts (BA) degree requires proficiency in a second language. The second-language requirement may be met in one of the following ways:

1. Completion of at least the third term, second year of a second-language course taught in the language, with a grade of C– or better or P
2. Satisfactory completion of an examination administered by the appropriate language department, showing language proficiency equivalent to that attained at the end of two years of college study
3. For students whose native language is not English: provide a final official high school transcript to the Office of the Registrar as evidence of formal training in the native language and completion of College Composition I (WR 121) and either College Composition II (WR 122) or College Composition III (WR 123) with grades of C– or better or P
4. Students may fulfill the UO second-language requirement by passing three upper-division Hebrew courses; they are repeatable and may

be taken in any order: Biblical Narrative (HBRW 311), Biblical Poetry (HBRW 312), and Postbiblical Literature (HBRW 313)

Bachelor of Science Requirements

The bachelor of science (BS) degree requires proficiency in mathematics or computer and information science or a combination of the two. The requirement may be satisfied in one of the following ways, depending on the student's experience in mathematics. Courses must be completed with grades of C– or better or P.

1. Students with a limited background in mathematics can complete the requirement with any of the combinations of three courses listed below. Inquire at the Office of Academic Advising for other possible combinations.

Code	Title	Credits
Option 1		
Select three of the following:		12
MATH 105	University Mathematics I	
MATH 106	University Mathematics II	
MATH 107	University Mathematics III	
MATH 111	College Algebra	
Option 2		
MATH 105	University Mathematics I	4
MATH 111	College Algebra	4
MATH 243	Introduction to Methods of Probability and Statistics	4
Option 3		
MATH 111	College Algebra	4
MATH 241–242	Calculus for Business and Social Science I-II	8
Option 4		
CIS 105	Explorations in Computing	4
CIS 122	Introduction to Programming and Problem Solving	4
MATH 111	College Algebra	4
Option 5		
CIS 105	Explorations in Computing	4
CIS 111	Introduction to Web Programming	4
MATH 111	College Algebra	4

2. Students who placed above the College Algebra (MATH 111) level on the mathematics placement test may complete the requirement with any two courses chosen from the following:

Code	Title	Credits
MATH 112	Elementary Functions	4
MATH 241	Calculus for Business and Social Science I	4
MATH 425	Statistical Methods I	4

3. Students who have College Algebra (MATH 111) skills and an additional prerequisite course or appropriate skills may complete the requirement with one course chosen from the following:

Code	Title	Credits
MATH 231	Elements of Discrete Mathematics I	4
MATH 242	Calculus for Business and Social Science II	4
MATH 246	Calculus for the Biological Sciences I	4

MATH 251	Calculus I	4
MATH 261	Calculus with Theory I	4
CIS 210	Computer Science I	4
CIS 211	Computer Science II	4
CIS 212	Computer Science III	4

4. Satisfactory completion of MATH 211–213.

Areas of Inquiry Requirements

To promote educational breadth, bachelor's degree candidates are required to complete work in each of three groups representing comprehensive fields of knowledge: arts and letters, social science, and science (or areas of inquiry, formerly known as group requirements). Approved group-satisfying courses must be at least 3 credits each.

The current list of group-satisfying courses is available online at registrar.uoregon.edu/group_courses.

"One Course" Restriction

Students may use only one course that has the same subject code as their major to fulfill group requirements.

"Double-Dipping" Restriction

Students may not use courses that fulfill the second-language requirement for the bachelor of arts degree to fulfill the arts and letters group requirement. Courses used to demonstrate proficiency in mathematics or in computer and information science or in a combination of the two for the bachelor of science degree may not also be used to fulfill the science group requirement.

Group Requirements for Specific Degrees

- Bachelor of Arts, Fine Arts, or Science.** Students must complete a minimum of 45 credits—15 of those credits in approved group-satisfying courses in each of three general-education groups: arts and letters, social science, and science. Each group must include (a) at least two courses with the same subject code and (b) at least one course with a different subject code. No more than three courses with the same subject code may be used to fulfill the 45-credit requirement.
- Bachelor of Architecture, Education, Interior Architecture, Landscape Architecture, Music, or Music in Music Education.** Students must complete a minimum of 36 credits—12 of those credits in approved group-satisfying courses in each of three general-education groups: arts and letters, social science, and science. Each group must include at least two courses with different subject codes. Two groups must each include at least two courses with the same subject code. No more than three courses with the same subject code may be used to fulfill the total 36-credit requirement.

Substituting a Minor or Second Major

Some minors or second majors may be used to satisfy part of one group requirement. Students should consult their advisors or the Office of the Registrar for more information.

United States: Difference, Inequality and Agency

These courses develop the analytical and reflective capacities of students to help them understand and view in an ethical framework the power imbalances—cultural, economic, political, social—that have shaped and

continue to shape the United States and the relationship of the United States to other regions of the world. Each course includes scholarship, perspectives, and voices from members of communities historically marginalized by these legacies of inequality.

Each course will address the following:

- Intersecting aspects of identity such as race, gender, sexuality, socioeconomic status, native rights, national origin, religion, or ability
- The uses of power to classify, rank, and marginalize on the basis of these aspects of identity, as well as considerations of agency on the part of marginalized groups
- Historical and contemporary structures, forms of knowledge, cultural practices, or ideologies that perpetuate or change the distribution of power in society

Global Perspectives

These courses foster a student's critical reflection on cultures, identities, and ways of being in a global context. Each course includes substantial scholarship, perspectives, and voices from members of communities under study, as sources permit.

Each course will engage in the review of one or more of the following:

- Texts, literature, art, testimonies, practices, or other cultural products that reflect systems of meaning or beliefs beyond US borders
- Power relations involving word regions or different nations, peoples, and identity groups
- Consideration of hierarchy, marginalization, or discrimination based on race, ethnicity, gender, religion, sexual orientation, nationality, ability, or combinations of these bases

Study-abroad programs that are ten weeks or longer automatically satisfy this requirement. Programs between five and nine weeks in duration may qualify if specific criteria are met. Contact Global Education Oregon (<http://geo.uoregon.edu>) for further information.

Bachelor's degree candidates must complete one course in each of the two categories listed above; a minimum of 6 credits in approved courses must be earned.

The current list of courses that satisfy these requirements are available online at registrar.uoregon.edu/group_courses.

General Limitations

1. A maximum of 124 credits may be transferred from an accredited junior or community college; of this, only 90 credits may be transferred from an international junior college
2. A maximum of 60 credits may be earned in correspondence study
3. A maximum of 48 credits in law, medicine, pharmacy, chiropractic medicine, dentistry, technology, or any combination may be accepted toward a degree other than a professional degree
4. A maximum of 24 credits may be earned in the following areas (a, b, c, and d) with not more than 12 in any one area:
 - a. Lower-division professional-technical courses
 - b. Physical education and dance activity courses
 - c. Performance in music (MUP), except for majors in music
 - d. Applied and/or experiential courses, courses focusing on academic support skills, or career and professional development courses

5. For music majors, a maximum of 24 credits in music performance (MUP), of which not more than 12 may be taken in the student's freshman and sophomore years, may count toward requirements for the BA or BS degree
 6. For dance majors, a maximum of 36 credits of DANC may count toward requirements for the BA or BS degree
 7. A maximum of 12 credits in University Teaching and Learning Center courses (subject code TLC) and a maximum of 12 credits in field experience courses—whether earned at the UO or transferred—may be counted toward the bachelor's degree. These limits (12 credits in TLC courses, 12 credits in field experience courses) are independent of the limits of category 4(d)
 8. University of Oregon academic records are sealed thirty days after the conferral of a degree. After this date, changes to majors and minors, addition of departmental honors, removal of incompletes, grade changes, or other changes to an academic record cannot be made
 9. Undergraduate credits earned through credit by examination (course challenge), Advanced Placement Program (AP), International Baccalaureate Program (IB), and the College-Level Examination Program (CLEP) are counted toward the satisfaction of bachelor's degree requirements except residency and the 45 UO credits graded A, B, C, D. The university grants pass credit for successful completion of AP, IB, and CLEP examinations
 10. Courses cannot be repeated for credit unless designated as repeatable by the University of Oregon Committee on Courses. Credit for duplicated courses is deducted, but grades for these courses are included in the GPA. *Effective fall 2016*: grades for courses taken in fall 2016 or after at the University of Oregon are included in the term GPA calculation. However, only the second attempt of the repeated course is calculated into the cumulative GPA. Credit for nonrepeatable courses is awarded only once.
 11. No courses are available for credit to students whose competence in that area exceeds the scope of a particular course; departments determine whether credit will be deducted
 12. Students may not receive credit for courses that are prerequisites for courses in which they are currently enrolled
 13. Students may not receive credit for courses that are prerequisites for courses for which they have already received credit
 14. Students must be enrolled with degree-seeking status in order to earn a certificate; certificates are only awarded at the time the degree is awarded
3. A minimum of 18 credits must be graded A, B, C, D if the prior bachelor's degree was earned at the University of Oregon, or 23 credits if at another institution
 4. At least 75 percent of all course work required in the major for the second degree must be completed after the conferral of the most recent bachelor's degree
 5. The bachelor of Arts degree requires proficiency in a second language. Students whose native language is not English may satisfy this requirement by providing a final official high school transcript to the Office of the Registrar as evidence of formal training in the native language and satisfactorily completing College Composition I (WR 121) and either College Composition II (WR 122) or College Composition III (WR 123). The bachelor of science degree requires proficiency in mathematics and/or computer and information science
 6. Students pursuing the bachelor of fine arts degree must complete either the bachelor of arts proficiency in a second language or the bachelor of science proficiency in mathematics and/or computer and information science

Bachelor's Degree with Honors

Information about Latin honors, academic honors, and honor societies is listed in the **Honors and Awards** section of this catalog. Fellowship and scholarship information is in the **Student Financial Aid and Scholarships** (p. 30) and departmental sections of this catalog.

Oregon Transfer Module

The Oregon Transfer Module (OTM) provides a one-year curriculum for students who plan to transfer to a State of Oregon university or community college. The module allows students to complete one year of general-education foundation course work that is academically sound and readily transferable within Oregon. Although the OTM is not a certificate or degree, it documents that students have met a subset of common general-education requirements at all Oregon two- and four-year public institutions of higher education.

Students should work closely with the Office of Academic Advising to ensure selection of appropriate course work. Upon transfer, students may be required to complete additional course work in general education, in an academic major, or in bachelor's degree requirements specific to the receiving institution. Students who transfer prior to the completion of the OTM will have their courses individually evaluated by the receiving institution, and may find that some individual courses are transferable, whereas others are not.

Transferring to the University of Oregon with an OTM

Students transferring to the University of Oregon with an OTM from another institution will have completed 45 credits of the university's general-education requirements.

Earning an OTM at the University of Oregon

To receive an OTM at the University of Oregon, students must complete a minimum of 45 credits—12 in residence at the UO—in foundational skills (writing, oral communication, and mathematics) and introduction to the disciplines (arts and letters, social sciences, and sciences). All courses must be completed with a grade of C– or better and students must have a minimum cumulative GPA of 2.00 at the time the OTM is posted on the transcript.

Second Bachelor's Degree

A student who has been awarded a bachelor's degree from an accredited institution may earn an additional bachelor's degree at the University of Oregon. The student must satisfactorily complete all departmental, school, or college requirements for the second degree. Of these requirements, the following must be completed after the prior degree has been awarded:

1. The student must complete an additional 36 credits at the university as a formally admitted student if the prior bachelor's degree was awarded by the University of Oregon, or an additional 45 credits at the university if the prior bachelor's degree was awarded by another institution
2. A minimum cumulative UO GPA of 2.00 in courses taken for the second bachelor's degree is required for the second bachelor's degree

Application for an Undergraduate Degree

Undergraduates who plan to receive a bachelor's degree from the University of Oregon must submit an application through DuckWeb, the university's online information system, by the fourth Sunday of the anticipated term of graduation.

The Office of the Registrar encourages students to apply to graduate the term preceding their graduation term. This allows students to plan or change their final term's course schedule to ensure completion of all requirements.

Students who have been academically disqualified must petition for reinstatement to the Scholastic Review Committee to graduate. Students who are out of status due to suspension or expulsion cannot be awarded a degree until they are officially back in status with the university.

All grade changes, removals of incompletes, UO study abroad course work, and transfer work necessary for completion of degree requirements must be on file in the Office of the Registrar by the Friday following the end of the term of graduation. Academic records are sealed thirty days after the conferral of a degree; no changes to the record will be made following that date.

Students who do not apply to graduate will not receive retroactive degrees even if degree requirements were completed at an earlier date.

Applications for graduate degrees are available from the Graduate School.

Tuition and Fees

Kelly Wolf, Director, Office of Business Affairs

541-346-3170

Thompson's University Center

Tuition

Tuition is a basic charge paid by students enrolled at the University of Oregon. It includes instruction costs, health service fees, incidental fees, technology fee, building fees, registration fee, and recreation center bond fee. Except in the School of Law, for a full-time student in 2018–19, the health service fee was \$198.00, the incidental fee was \$250.50, the recreation center fee was \$62.50, the recreation center bond fee was \$38.00, the Erb Memorial Union fee was \$67.00, the technology fee was \$50.00, and the building fee was \$45.00. Each law student paid a \$297.00 health service fee, a \$376.00 incidental fee, a \$94.00 recreation center fee, a \$57.00 recreation bond fee, a \$101.00 Erb Memorial Union fee, a \$75.00 technology fee, and a \$68.00 building fee. Each admitted student, at the time of first enrollment, is assessed a matriculation fee of \$430.00 to cover the cost of enrollment services. The fees are subject to change for 2019–20.

Payment of tuition entitles students to many services including instruction in university courses, use of the university libraries, use of laboratory and course equipment and certain materials in connection with courses for which students are registered, use of various microcomputer laboratories, medical attention at the University Health Center at reduced rates, and use of gymnasium equipment and laundry service for physical activity courses. Additional fees may be assessed for some services and courses. No reduction is made for students who do not want to use some of these services.

Tuition for resident and nonresident law students is listed in the School of Law catalog, available free from the UO School of Law. Health services and some incidental fee benefits are not available to students enrolled in the Community Education Program.

Tuition is paid by students under the standard conditions of undergraduate or graduate study, and it is payable as specified in official notices during registration each term. Special fees are paid under the conditions noted. The university's policies on student charges and refunds follow the guidelines recommended by the American Council on Education. Details of the policies are available at the Office of Business Affairs in Thompson's University Center, 720 E. 13th Avenue, Eugene, Oregon.

In the schedule, tuition is specified for one term only. There are three terms in the academic year: fall, winter, and spring (except for the School of Law, which operates on a two-semester system). Summer session operates on a separate tuition schedule that includes course self-support fees.

The University of Oregon reserves the right to make changes in the tuition schedule.

The tuition figures that follow are for 2018–19. Increases proposed for 2019–20 had not been confirmed at publication.

Tuition Schedule

All figures rounded down to the nearest dollar.

Undergraduate Tuition

	Resident	Nonresident
1 credit	\$217	\$741
2 credits	434	1,482
3 credits	651	2,223
4 credits	868	2,964
5 credits	1,085	3,705
6 credits	1,302	4,446
7 credits	1,519	5,187
8 credits	1,736	5,928
9 credits	1,953	6,669
10 credits	2,170	7,410
11 credits	2,387	8,151
12 credits	2,604	8,892
13 credits	2,821	9,633
14 credits	3,038	10,374
15 credits	3,255	11,115
16 credits	3,472	11,856
17 credits	3,689	12,597
18 credits	3,906	13,338
Each additional credit beyond 18	217	741

Following is the base rate for graduate students.

Graduate Tuition

	Resident	Nonresident
Full-time registration (one term):		

9–16 credits	\$4,842	\$8,676
Part-time registration:		
1 credit	\$538	\$964
2 credits	1,076	1,928
3 credits	1,614	2,892
4 credits	2,152	3,856
5 credits	2,690	4,820
6 credits	3,228	5,784
7 credits	3,766	6,748
8 credits	4,304	7,712
Each additional credit beyond 16 is \$538 for residents and \$945 for nonresidents		
Graduate assistant (9–16 credits)	61	61

The graduate tuition rates listed are the base rate only. Each professional school has its own set of tuition rates; they are higher than the base rate listed in the table. Students must contact the relevant school to learn the specific cost for the major.

Tuition Billing

Tuition may be paid in monthly installments. Unpaid balances are assessed a \$6 billing fee and are charged 9 percent annual interest. The university uses an electronic billing process to bill student for charges incurred; payments are due on the first of each month.

Community Education Program

Tuition for Community Education Program students enrolling for 8 or fewer credits is determined by the level of the courses taken. Courses accepted for graduate credit are assessed at the graduate tuition level; all others are assessed at the undergraduate level.

Special Fees

Special fees, fines, penalties, service charges, and other additional charges for specific courses, services, or supplies not covered in the tuition fee are set forth on a list available in many departmental offices or in the Office of Business Affairs. (This list is issued each year in accordance with OAR 571-60-005.)

The following fees are assessed to university students under the special conditions noted:

Type of Fee	Fee Amount	Information
Application Fee	\$65	Required of students not previously enrolled at the University of Oregon and payable when the application for admission is submitted. The fee is not refundable.

Bicycle Registration	\$0	Bicycle registration with the Department of Public Safety is mandatory; there is no charge for a permanent permit. Bicycle racks and ramps are provided throughout the campus, and the development of cycling paths continues on campus and in the community. Copies of the complete university bicycle parking regulations and fines are available at the Department of Public Safety, 1319 E. 15th Ave.
Credit by Examination	\$25 per credit	Assessed for taking an examination to challenge undergraduate university courses.
Exceptions to Procedures	\$25–\$50	Approved exceptions to registration deadlines are subject to this fee.
Late Registration	\$100	A \$100 fee is charged for registration after the eighth day of class.
Matriculation Fee	\$430	For undergraduate and graduate students.
Parking Permits	<ul style="list-style-type: none"> \$33 per month student automobile permit \$8 per month student motorcycle permit 	A minimal amount of parking space is available near residence halls and on city streets. Students using university parking lots must purchase and display proper parking permits. All parking fees are subject to change. Parking permits may be purchased from Transportation Services, 1401 Walnut Street. Parking regulations are enforced at all times. A city bus system connects the university with most community areas. Student fees ensure each student a pass that allows unlimited free rides.
Replacement of Photo ID Card	\$22	
Returned Check	\$20	Charge billed to the writer of any check that is returned to the university by the bank. Exceptions are bank or university errors. If not paid within 30 days, a returned check may be subject to a fine of \$100 to \$500.

Senior Citizens	\$0	Oregon senior citizens who are neither seeking academic credit nor working toward a degree may attend classes as senior auditors if space is available on the first day of classes and if the department approves, at no cost. Charges may apply for special course materials. Senior citizens who want to audit a self-support course must pay self-support tuition and fees for the course. Incidental fee services are not provided. Registration is handled through the Office of the Registrar, second floor, Oregon Hall.
Staff	30% of resident undergraduate tuition, for up to 12 credits per term	University employees are permitted to enroll in university classes with the approval of their department head. Students who register for more than 12 credits are charged tuition at the rate appropriate to their student type. Course fees and self-support fees remain the responsibility of the student. Certain academic programs are excluded from the staff reduced tuition benefit.
Family of Staff	30% of resident undergraduate tuition, for up to 12 credits per term, plus applicable fees (e.g., building, health, incidental)	Students who register for more than 12 credits are charged tuition at the rate appropriate to their student type. Course fees and self-support fees remain the responsibility of the student. Certain academic programs are excluded from the staff reduced tuition benefit.
Testing	\$3–\$50	

Transcripts	\$0-\$15, other costs may apply	Instructions and delivery options are available at https://registrar.uoregon.edu/transcripts . Transcripts are available at no charge, but charges may apply for associated additional services. Students who attended Fall 1986 or later may order a transcript using DuckWeb. Students who attended prior to Fall 1986 must submit a signed, written request to authorize release of their academic record. The mailing address is Transcript Department, Office of the Registrar, 5257 University of Oregon, Eugene, Oregon 97403-5257. The university reserves the right to withhold transcripts of students who have unpaid financial obligations to the institution. Debtors contesting their accounts should contact the collections department for counseling and instructions for a written appeal. The collections department is located in the Office of Business Affairs in the Thompson University Center. The mailing address is Collections Department, Office of Business Affairs, PO Box 3237, University of Oregon, Eugene, Oregon 97403-0237; call 541-346-3215
-------------	---------------------------------	--

Tuition and Fee Refunds

In the event of complete withdrawal from the university or a reduction in course load, refunds may be granted to students in accordance with the refund schedule on file in the Office of Business Affairs in Thompson's University Center. Refunds may take from four to six weeks to process. All refunds are subject to the following regulations:

1. Refunds are calculated from the date the student officially withdraws from the university, not from the date the student ceased attending classes, except in unusual cases when formal withdrawal has been delayed through causes largely beyond the student's control
2. No refunds are made for any amount less than \$1.00 unless a written request is made
3. In case of complete withdrawal, students who received financial aid are responsible for repayment of that aid in accordance with the university's financial aid repayment policy and schedule. See the class schedule for details

For complete withdrawal, obtain withdrawal forms from the Office of Academic Advising, 101 Oregon Hall.

The university has an appeal process for students or parents contending that individual circumstances warrant exceptions to published policy if circumstances of withdrawal or course-load reduction are beyond the student's control. Petitions for exception to the refund policy may be

obtained from the Office of the Registrar on the second floor of Oregon Hall or from the Office of Academic Advising.

Veterans Access, Choice, and Accountability Act of 2014

Veterans Health Care and Benefits Improvement Act of 2016

Department of Veterans Affairs Expiring Authorities Act of 2018

The following individuals shall be charged the in-state rate, or otherwise considered a resident, for tuition and fees purposes:

- A veteran using educational assistance under either Chapter 30 (Montgomery GI Bill—Active Duty Program) or Chapter 33 (Post-9/11 GI Bill), of Title 38, United States Code, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence) and enrolls at the University of Oregon within three years of discharge or release from a period of active duty service of 90 days or more.
- Anyone using transferred post-9/11 GI Bill benefits (38 U.S.C. § 3319) who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence) and enrolls at the University of Oregon within three years of the transferor's discharge or release from a period of active duty service of 90 days or more.
- Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the University of Oregon. The person so described must have enrolled at the University of Oregon prior to the expiration of the three-year period following discharge or release as described above and must be using educational benefits under either Chapter 30 or Chapter 33 of Title 38, United States Code.
- Anyone using benefits under the Marine Gunnery Sergeant John David Fry Scholarship [38 U.S.C. § 3311(b)(9)] who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using transferred post-9/11 GI Bill benefits (38 U.S.C. § 3319) who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence) and the transferor is a member of the uniformed service who is serving on active duty.
- Anyone using educational assistance under Chapter 31, Vocational Rehabilitation and Employment, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence)

GI Bill® is a registered trademark of the US Department of Veterans Affairs. More information about education benefits offered by the department is available at the official US government website (<https://www.benefits.va.gov/gibill>).

Student Financial Aid and Scholarships

Jim Brooks, Director

541-346-3221
541-346-1175 fax
260 Oregon Hall

1278 University of Oregon
Eugene OR 97403-3221
financialaid@uoregon.edu

Financial aid in the form of scholarships, grants, loans, and employment is available to eligible students who need assistance to attend school. The Office of Student Financial Aid and Scholarships provides counseling and information services to students and parents and administers a comprehensive program of financial assistance. Office hours are 8:00 a.m.–5:00 p.m., Monday, Tuesday, Thursday, and Friday, and 9:00 a.m.–5:00 p.m. on Wednesday. Drop-in counselors are available Monday through Friday, 9:00 a.m.–4:00 p.m.

Federal and state regulations are subject to change and may affect current policies, procedures, and programs.

Estimated Student Expenses

The following information is provided to help students estimate the total cost of attending the University of Oregon.

Budgets established for financial aid purposes are based on average expenses. Some students have higher costs in a few categories. For example, students in the College of Design, the School of Music and Dance, and some of the science departments have expenses ranging from \$30 to \$500 a year for equipment, supplies, and field trips in addition to books. Students living alone in an apartment or in university housing may spend more than the budgeted amount for meals and housing, based on personal choice.

Residence hall room and board rates for 2018–19 ranged from \$9,007 to \$22,249. The rates for 2019–20 are not yet available, but rates are expected to increase between 3 to 5 percent. Cooperative housing costs are generally less than the minimum residence hall rate. Sorority and fraternity costs are typically higher.

Although the university does not require proof of health insurance for domestic students, the provisions of the Affordable Care Act may apply. International students are required to purchase health insurance. For more information about health services and coverage, please visit the University Health Center website. (<https://healthcenter.uoregon.edu/Home.aspx>)

Personal expenses are governed by individual preference but may include such items as transportation, health care, and entertainment.

The figures in the following table are the 2018–19 tuition and fees for an undergraduate student enrolled in 15 credits and a graduate student enrolled in 9 credits. Tuition rates for 2019–20 are not yet available, therefore tuition schedules are subject to revision. See the **Tuition and Fees** section of this catalog.

Tuition and Fees

Student Classification	One Term or Semester	Three Terms or Semesters
Undergraduate resident	\$3,966	\$11,898
Undergraduate nonresident	\$11,836	\$35,478
Graduate tuition varies by program. A base tuition would be as follows:		
Graduate resident	\$5,553	\$16,659

Graduate nonresident	\$9,387	\$28,161
Law resident (semester)	\$11,806	\$35,418
Law nonresident (semester)	\$14,674	\$44,022

The Office of Student Financial Aid and Scholarships used the expenses in the following tables to estimate a student's educational costs for the 2018–19 academic year.

Meals and Housing

	One Term	Three Terms
Student commuter living with parents	\$948	\$2,844
Undergraduate student living off campus	\$3,344	\$10,032
Undergraduate student living on campus	\$3,974	\$11,922
Graduates	\$3,950	\$11,850
Law (semester)	\$5,925	\$11,850

A dependent child-care allowance may be added to the budget for each child less than 12 years of age who is living with a student and for whom the student is paying child-care expenses.

Books and Supplies

	One Term	Three Terms
Graduates and undergraduates	\$382	\$1,146
Law (semester)	\$573	\$1,146

Transportation

	One Term	Three Terms
Resident undergraduate or graduate	\$122	\$366
Nonresident undergraduate or graduate	\$430	\$1,290
Law resident (semester)	\$183	\$366

Undergraduates	\$678	\$2,034
Graduates	\$678	\$2,034
Law (semester)	\$1,017	\$2,034

Applying for Financial Aid

Undergraduate, graduate, and law students use the following procedure to apply for financial aid:

1. Complete the Free Application for Federal Student Aid (FAFSA) online. The official website is www.fafsa.ed.gov (<http://www.fafsa.ed.gov>)
2. List the University of Oregon (using code number 003223) on the FAFSA application as a school to receive the application information
3. Apply for admission to the University of Oregon

Deadlines

To be given priority consideration for the Federal Supplemental Educational Opportunity Grant, Federal Work-Study Program, and tuition waivers for all or part of any given academic year, a valid FAFSA must be received by the federal processor on or before March 1 prior to the academic year for which the student is applying. To meet this deadline, submit the FAFSA no later than February 15. The FAFSA is available on October 1 prior to the academic year for which the student is applying. Signing the FAFSA electronically is the recommended method for submission. If applicable, online applicants should mail the FAFSA signature page, obtained from the FAFSA website, in early February to meet the priority deadline.

Eligibility

Financial aid eligibility for any student is determined by the difference between the estimated cost of education at the University of Oregon and the expected family contribution (as determined by the FAFSA) from the student's family, the student and parents if the student is a dependent, or the student and spouse if the student is married. Students (and their families if appropriate) are expected to bear the primary responsibility for meeting educational costs. When a student's expected family contribution is less than the cost of education, the university attempts to meet the difference with need-based financial aid.

Assessing Financial Aid Eligibility

The university uses a method prescribed by law to determine an expected contribution from the student and family toward the cost of the student's education. The expected family contribution, derived from using the federal formula, is based on income and asset information as well as certain variables such as family size and number of family members attending college. This system ensures that students receive consistent and equitable treatment. Financial aid counselors review unique circumstances on a case-by-case basis, at the request of the student.

Satisfactory Academic Progress

To be eligible for financial aid, students must make satisfactory academic progress toward their degrees, maintain a minimum cumulative grade point average (GPA) and acceptable pace of completion, and graduate within the maximum time frame. Progress is reviewed annually at the end of spring term.

The minimum cumulative GPA needed to meet satisfactory academic progress is 2.00 for an undergraduate and 3.00 for a graduate student (except for law students seeking a JD or LLM degree, who require a 2.00 GPA). For more information on how your cumulative UO GPA is calculated, including how incompletes, withdrawals, or repetitions may affect your GPA, please visit the GPA calculator (<https://registrar.uoregon.edu/current-students/grading-system/#calculating-a-grade-point-average>). If a student's cumulative GPA drops below the required minimum at the time of the evaluation, eligibility for financial aid will be suspended unless the student appeals and is approved for

reinstatement. Students may also reestablish eligibility for the subsequent term after raising their GPA to the minimum requirement.

Pace of completion toward a degree is a further requirement, determined by dividing the number of credits attempted by the number of credits earned. Students are expected to earn credit for at least 67 percent of the credits attempted on an aggregate basis. Credit is earned for grades A, B, C, D, and P. Credit is not earned for grades of F, W, I, Y, N, and X. A pace calculator (https://financialaid.uoregon.edu/pace_calculator) is located online.

Students must also complete their degrees within a maximum time frame. A student must graduate before accumulating 150 percent of the attempted credits required for completing his or her major. Most majors at the University of Oregon require 180 credits; 270 would be 150 percent of that. If a student is unable to fulfill the requirements for his or her degree before reaching this maximum time frame or the financial aid office determines that it is mathematically impossible to graduate within the maximum time frame, financial aid will be suspended.

Visit the website (http://financialaid.uoregon.edu/satisfactory_academic_progress) for information on the appeals process.

Completely withdrawing from (or not passing any) courses during a student's first term at the University of Oregon, or during any two consecutive terms, constitutes failure to meet satisfactory academic progress standards regardless of GPA, pace, or time frame.

For additional information, visit the website (http://financialaid.uoregon.edu/satisfactory_academic_progress).

Financial Aid Packages

Students will receive notification of their awards after their financial aid eligibility has been established. The Office of Student Financial Aid and Scholarships attempts to award financial aid to students up to their estimated cost of education, which could include scholarship and grant money, work-study, and loan eligibility.

A student may not receive assistance from any financial aid (Title IV) program if

1. The student is in default on any educational (Title IV) loan
2. The student has borrowed in excess of federal (Title IV) loan limits
3. The student owes a refund on federal or state grants or a Federal Perkins Loan due to an overpayment
4. The student has been convicted of violating certain federal or state drug possession or sale laws within a certain time period

A parent may not borrow from the Federal Direct Parent Loan for Undergraduate Students (Parent PLUS) if the parent or student is in default on any educational loan or owes a refund on an educational grant as described above.

Federal law requires, in most cases, that male students born after 1960 be registered with Selective Service to receive financial aid.

There may be other conditions when a student would be ineligible for financial aid—for example, when a student is not maintaining satisfactory academic progress or when not enrolled in an eligible program.

Undergraduates

Federal Pell Grants, Oregon Opportunity Grants, and university scholarships are considered to be part of the student's financial

aid package, even though the Office of Student Financial Aid and Scholarships may not determine eligibility for these programs.

The office determines the student's eligibility for and the amount of assistance from the Federal Supplemental Educational Opportunity Grant and the Federal Work-Study Program.

Financial aid offers are made in accordance with federal and state regulations, as well as university policies. Some awards are tentative if selected for verification and may be revised after verification has been completed.

Graduate and Law Students

The Office of Student Financial Aid and Scholarships determines eligibility and the amount of assistance that may be received from the Federal Work-Study Program, Federal Direct Unsubsidized Loan, and Federal Direct Graduate PLUS Loan. Offers are made in accordance with federal regulations and university policies.

Refunds and Repayment

Students who withdraw from school may be required to repay a portion of their financial aid. According to a formula prescribed by state and federal regulations, any refundable amount used to pay tuition and fees or for university housing is returned to the appropriate financial aid sources. Students may also be required to pay the unearned portion of assistance that was directly disbursed to them.

Additional information concerning the institution's refund policy may be found on the website for the Office of the Registrar. (<https://registrar.uoregon.edu/calendars/refund-schedules>)

Additional information concerning return of financial aid (http://financialaid.uoregon.edu/return_of_financial_aid) and participation requirements (<http://financialaid.uoregon.edu/participation>) may be found on the website for the Office of Student Financial Aid and Scholarships.

Notification of Financial Aid

Beginning in March, financial aid award letters are mailed to first-year students who have supplied the necessary information to the Office of Student Financial Aid and Scholarships and the Office of Admissions. Award letters are then mailed on a continuing basis to those entering students who supply the necessary information to the offices after the March 1 priority deadline.

When aid is accepted, the student (and spouse if married) and the student's parents (if applicable) may be asked to provide documents, such as federal income tax returns (IRS Form 1040), to verify the information on the application.

Students should read the financial aid award letter and instructions carefully.

An explanation of revision and appeal policies and procedures may be found on the financial aid website. A financial aid package may be revised when a student's eligibility changes. The student receives a revised notification and, if necessary, is advised of any repayment of aid. The federal regulations covering financial aid programs, the explanation of the federal method of determining student and family contributions, and the university policies and procedures for offering financial aid are available in the Office of Student Financial Aid and Scholarships.

Students are welcome to review them during office hours or on the financial aid website.

Financial Aid Programs

To be eligible for certain financial aid programs that depend on federal or state funding, the student must be a citizen of the United States or in the United States for other than a temporary purpose and with the intention of becoming a permanent resident. Students who are citizens of the Freely Associated States (the Republic of the Marshall Islands, the Federated States of Micronesia, or the Republic of Palau) may be eligible for certain types of federal (Title IV) aid.

Financial aid is typically disbursed to students near the beginning of a term based on their enrollment at that time. However, financial aid is actually earned over the course of a term. Therefore, if a student completes a term at a different enrollment status than he or she began the term, some or all of the student's financial aid may need to be returned.

Federal Pell Grant

This program provides grants (funds that do not require repayment) to eligible undergraduates who do not have a bachelor's degree.

To be eligible for a Federal Pell Grant, a student must be admitted to the university in a program leading to a degree and enrolled in good standing. The amount of Federal Pell Grant funds a student may receive over their lifetime is limited to the equivalent of six years of Pell Grant funding.

The grant is reduced proportionately if the student is enrolled less than full time (12 credits a term).

The Federal Pell Grant program determines eligibility based on the student's and parents' income and assets, or the student's and spouse's if applicable. The university disburses the money.

Federal Supplemental Educational Opportunity Grant (FSEOG)

Federal supplemental grants, which do not need to be repaid, are for undergraduates with exceptional need. To be eligible, a student must be admitted to the university in a program leading to a degree and enrolled in good standing. The amount a student receives is determined by university policy and fund availability.

Funds are granted to the university by the federal government to award to eligible students.

Iraq and Afghanistan Service Grants

The Iraq and Afghanistan Service Grant is a federal grant that, although it does not need to be repaid, has special eligibility criteria. This grant is for undergraduates who

- are not eligible for the Federal Pell Grant on the basis of their expected family contribution but meet the remaining Federal Pell Grant eligibility requirements
- have a parent or guardian who was a member of the US armed forces and died as a result of military service performed in Iraq or Afghanistan after the events of September 11, 2001
- were under 24 years old or enrolled in college at least part-time at the time of their parent's or guardian's death

State of Oregon Opportunity Grants

Oregon Opportunity Grants are awarded to eligible undergraduate Oregon residents who complete the FAFSA or the Oregon Student Aid Application (ORSAA).

A grant may be renewed for a total of 12 terms if the student applies each year, demonstrates financial need, is enrolled at least half time (6 credits a term) in a program leading to a degree, and has not completed a bachelor's degree. In addition, the State of Oregon Office of Student Access and Completion (OSAC) requires that a student receive the Oregon Opportunity Grant during the fall term in order to have any eligibility for the remainder of the year.

OSAC determines eligibility and notifies the university. The funds are provided by the state and disbursed by the university.

University of Oregon Tuition Waiver (Grant)

The UO Tuition Waiver may remit (reduce) a portion of a full-time Oregon resident's tuition charges, for undergraduates who demonstrate financial need and complete their FAFSA application by the published priority deadline. Funding is limited and the amount a student receives is determined by university policy and fund availability.

Teacher Education Assistance for College and Higher Education Grant (TEACH)

The TEACH program provides up to \$4,000 a year to students enrolled in an eligible education program and who agree to teach in a high-need field at a low-income school for at least four years within eight years of completing the program for which the grant was awarded. If these requirements are not met, the grant converts to a loan, interest is assessed retroactively, and the loan must be repaid.

Federal Work-Study Program

The Federal Work-Study Program provides part-time jobs for students with financial need and who are in good academic standing in an eligible program leading to a degree or certificate.

The amount a student may earn is determined by university policy and fund availability. Students earn an hourly wage based on the type of work, their skills, and their experience. Students may work a maximum of 25 hours a week while school is in session.

University departments and offices, as well as approved off-campus nonprofit agencies that perform services in the public interest, list available jobs with the University Career Center, 220 Hendricks Hall, and on the center's website. Funds are used to pay a portion of student wages; the employer pays the remainder.

Federal Perkins Loan

The Federal Perkins Loan Program ended September 30, 2017. No additional Perkins loans will be made available.

Repayment of an existing Federal Perkins Loan begins nine months after the student ceases to be enrolled at least half time. The minimum repayment is \$40 a month or \$120 a quarter. However, the actual amount of payments and the length of the repayment period depend on the size of the debt. Interest is charged during the repayment period at the rate of 5 percent a year on the unpaid balance. The university contracts with ECSI Corporation, a third party that will contact borrowers regarding repayment. The maximum repayment period is 10 years.

Repayment of a Federal Perkins Loan that is not delinquent or in default may be deferred if a borrower is enrolled at least half time in an eligible institution.

A borrower of a Federal Perkins Loan may be eligible for other deferments for periods up to three years. For information about deferments, write or call the Student Loan Office, Office of Business Affairs, 3237 University of Oregon, Eugene, Oregon 97403-0237; call 541-346-3171; or see the office's website.

Repayment of a Federal Perkins Loan is canceled upon the death or permanent total disability of the borrower. In addition, repayment of the loan may be canceled, in full or in part, for public service.

Information about cancellation provisions is available in the Office of Business Affairs and on its website. Additional information regarding the Perkins Loan can be found at <https://studentaid.ed.gov>.

Federal bankruptcy law generally prohibits student-loan borrowers from the routine discharge of their debts by declaring bankruptcy within seven years after the repayment period begins.

William D. Ford Federal Direct Student Loan Program

Federal Direct Subsidized Loan

Students must demonstrate need to qualify for a Federal Direct Subsidized Loan. The university determines the amount the student may borrow within federal limits: \$3,500 for the first academic year of undergraduate study (up to 44 credits); \$4,500 for the second academic year (45–89 credits); and \$5,500 an academic year for the remaining years of undergraduate study. Not all students are eligible for the maximums. The Federal Direct Subsidized Loan is for undergraduate students with financial need. The US Department of Education pays the interest (subsidizes) on a Direct Subsidized Loan while the student is enrolled, during a student's grace period, and during a period of deferment.

Student borrowers must be enrolled in good academic standing at least half time and have been accepted for admission to an eligible program leading to a degree or certificate. Once repayment begins, borrowers are charged a fixed interest rate that is set every July 1. The interest rate for the 2018–19 academic year is 5.045 percent with an origination fee of 1.66 percent (if first disbursed on or after October 1, 2017, and before October 1, 2018) or with an origination fee yet to be determined (if first disbursed on or after October 1, 2018, and before October 1, 2019).

If a student is a first-time borrower on or after July 1, 2013, there is a limit on the maximum period of time (measured in academic years) that he or she may receive Direct Subsidized Loans. This time limit does not apply to Direct Unsubsidized Loans or Direct Parent PLUS Loans. If this limit applies to a given student, the student may not receive Direct Subsidized Loans for more than 150 percent of the published length of the program (called the "maximum eligibility period"). The maximum eligibility period is typically based on the published length of the student's current program. For example, if a student is enrolled in a four-year bachelor's degree program, the maximum period for which the student may receive Direct Subsidized Loans is six years (150 percent of four years = six years).

Federal Direct Unsubsidized Loan

Direct Unsubsidized Loans are available to students who do not qualify, in whole or in part, for the Direct Subsidized Loan. The university determines the amount the student may borrow within federal limits:

\$5,500 for the first academic year of undergraduate study (up to 44 credits); \$6,500 for the second academic year (45–89 credits); and \$7,500 per year for the remaining years of undergraduate study. The amount of Direct Subsidized Loan eligibility is subtracted from the Direct Unsubsidized Loan maximum amounts listed. Not all students are eligible for the maximums.

Direct Unsubsidized Loans are available to undergraduate and graduate students. There is no requirement to demonstrate financial need. The student is responsible for paying the interest on a Direct Unsubsidized Loan during all periods. If the student chooses not to pay the interest while in school and during grace periods and deferment or forbearance periods, the interest will accrue (accumulate) and be capitalized (that is, your interest will be added to the principal amount of your loan).

A student's financial need and dependency status determines the amount of the loan offered. Independent students, as defined by answers on the FAFSA, may borrow up to an additional \$4,000 in their freshman and sophomore years and up to an additional \$5,000 in their junior and senior years.

The interest rate on undergraduate loans for the 2019–20 academic year is 5.045 percent with an origination fee of 1.066 percent (if first disbursed on or after October 1, 2017, and before October 1, 2018) or with an origination fee of 1.062 percent (if first disbursed on or after October 1, 2018, and before October 1, 2019). Interest that accrues during in-school, grace, and authorized deferment periods will be added to the principal when repayment begins. The interest rate for the Direct Unsubsidized Loan is fixed every July 1.

Graduate and law students may borrow up to \$20,500 a year depending on their financial need. Interest on this loan for graduate and law students for 2018–19 is 6.6 percent with an origination fee of 1.066 percent (if first disbursed on or after October 1, 2017, and before October 1, 2018) or with an origination fee of 1.062 percent (if first disbursed on or after October 1, 2018, and before October 1, 2019).

Additional Federal Direct Unsubsidized Loan

Dependent undergraduate students whose parents are denied access to the Federal Direct Parent Loan for Undergraduate Students (Parent PLUS) program may be eligible for additional Direct Unsubsidized Loan funds. Students with fewer than 90 credits may borrow a maximum of \$4,000 per award year in additional funds above the maximum Federal Direct Loan limits. Students who have earned 90 credits or more may borrow a maximum of an additional \$5,000 per award year. Not all applicants qualify for the maximums. The Federal Direct Unsubsidized Loan may be used to replace expected family contribution, but the total borrowing for combined Direct Subsidized Loans and Direct Unsubsidized Loans cannot exceed the cost of education.

Generally, the cumulative amount a student can borrow from all Federal Direct Loans is as follows:

- \$31,000 (only \$23,000 may be subsidized) as a dependent undergraduate
- \$57,500 as an independent undergraduate (only \$23,000 of this amount may be subsidized)
- \$138,500 as a graduate or professional student

Federal Direct Parent Loan for Undergraduate Students (Parent PLUS)

This program provides loans to parents of dependent undergraduate students. Parents may borrow up to an annual amount that is equal

to the cost of education minus any estimated financial assistance the student receives during the periods of enrollment. The borrower may use the amount of the Federal Direct PLUS to replace the expected family contribution for the loan period.

The Federal Direct PLUS is limited to parents who do not have an adverse credit history or who have obtained an endorser who does not have an adverse credit history. A direct loan servicer, contracted by the federal government, performs the required credit check. The interest on the Federal Direct PLUS is fixed every July 1. The interest rate for the 2018–19 academic year is 7 percent with an origination fee of 4.264 percent (if first disbursed on or after October 1, 2017, and before October 1, 2018) or with an origination fee of 4.248 percent (if first disbursed on or after October 1, 2018, and before October 1, 2019).

Parents interested in participating in the Federal Direct PLUS program may request the loan by visiting the US Department of Education website (<https://studentloans.gov>).

Federal PLUS Loan for Graduate and Professional Students (Graduate PLUS)

This program is offered to qualified students with or without financial need, but the student must have financial aid eligibility. Like other direct loans for students, the US Department of Education is the direct lender of the Graduate PLUS. Typically, repayment must begin within 60 days after the Graduate PLUS is disbursed. However, students who meet the requirements may obtain an in-school deferment from the US Department of Education. There is no grace period for this loan. Interest begins to accrue at the time the first disbursement is made at a fixed rate set every July 1. The interest rate for 2018–19 is 7.595 percent with an origination fee of 4.264 percent (if first disbursed on or after October 1, 2017, and before October 1, 2018) or with an origination fee of 4.248 percent (if first disbursed on or after October 1, 2018, and before October 1, 2019).

Repayment

Payment of all Direct Loans are handled through an assigned direct loan servicer. To locate the appropriate direct loan servicer, the student may sign in to the National Student Loan Data System (<https://www.nsls.ed.gov>).

Repayment of Federal Direct Loans (subsidized and unsubsidized) begins six months after termination of at least half-time enrollment. Repayment of Federal PLUS loans typically begins within 60 days of the last disbursement of the loan. A deferment may be requested after loan approval. Borrowers have the right to prepay their loans without penalty. Furthermore, they may choose from the following repayment plans:

- A standard repayment plan with a fixed payment amount (at least \$50 a month) over a fixed period of time, not to exceed 10 years
- A graduated repayment schedule in which payments are lower at first and then increase, usually every two years, over a period of as much as 10 years
- An extended repayment plan with a fixed or graduated annual repayment of at least \$50 a month over a period of up to 25 years, depending on the total amount owed
- The pay as you earn plan is designed for new borrowers (since October 1, 2017) with at least a partial financial hardship. Payment amounts change as the borrower's income changes, with a repayment period of as much as 20 years. Borrowers must update income and family size each year. Parent PLUS Loans are not eligible for this plan, unless it is part of a Direct Consolidation Loan

- The revised pay as you earn plan has similar conditions to the plan listed above, but there is no requirement to be a new borrower
- An income-based repayment plan designed to make repaying federal loans easier for students who intend to pursue jobs with lower salaries such as careers in public service. Monthly payments are capped at a percentage of the borrower's discretionary income, which is based on family size and income rather than total amount borrowed. Payments change as the borrower's income changes and are made over a period of up to 25 years. Borrowers must update income and family size each year
- An income-contingent repayment plan with varying annual repayment amounts based on the total amount owed and the annual income of the borrower (and that of the borrower's spouse, if a joint return is filed) paid over a period not to exceed 25 years. Parent PLUS Loans are not eligible for this plan. Borrowers must update income and family size each year
- An income-sensitive repayment plan in which monthly payments are based on annual income. Loan must be paid in full within 15 years

If the borrower does not select one of these repayment plans, the Department of Education assigns the standard repayment plan. Visit the website (<https://studentaid.ed.gov/sa>) for details on all repayment plans.

The borrower's repayment liability is discharged if the borrower becomes permanently and totally disabled or dies or if the student for whom a parent has borrowed dies. Federal Direct Student Loans are generally not dischargeable in bankruptcy.

Deferring Repayment

Repayment of a Federal Direct Student Loan that is not in default may be deferred for

- at least half-time enrollment in an eligible program at an eligible school
- an approved graduate fellowship program or rehabilitation training program for disabled individuals (except medical internship or residency program)
- unemployment (up to three years)
- economic hardship or serving in the Peace Corps (up to three years)
- active duty military service in connection with a war, military operation, or national emergency

During periods of approved deferment, a Federal Direct Subsidized Loan borrower does not need to make payments of principal, and the interest is paid by the federal government. For the Federal Direct Unsubsidized or PLUS borrower, principal repayment may be deferred, but interest continues to accrue and is capitalized or paid by the borrower during that time.

Forbearance

A direct loan borrower or endorser may receive forbearance from the federal government if the borrower or endorser is willing but unable to make scheduled loan payments. Forbearance is the temporary cessation of payments, an extension of time for making payments, or the temporary acceptance of smaller payments than previously scheduled. Forbearance may be granted for up to 12 months for reasons such as

- financial difficulties
- medical expenses

- change in employment
- serving in a medical or dental internship or residency program
- the total amount a borrower owes each month for all student loans is 20 percent or more than the borrower's monthly gross income (up to three years)
- serving in an AmeriCorps position for which the borrower received a national service award
- performing teaching service that would qualify the borrower for teacher loan forgiveness
- a member of the National Guard and has been activated by a governor, but not eligible for military deferment
- other reasons acceptable to your direct loan servicer

Deferments and forbearance are handled by the assigned direct loan servicer. To locate the appropriate direct loan servicer, the student may sign in to the National Student Loan Data System online (https://nslds.ed.gov/nslds/nslds_SA).

Public Service Loan Forgiveness

The Public Service Loan Forgiveness Program (PSLF) forgives the remaining balance on your direct loans after you have made 120 qualifying monthly payments under a qualifying repayment plan while working full-time for a qualified employer. More information about the PSLF program may be found on the US Department of Education website (<https://studentaid.ed.gov/sa/repay-loans/forgiveness-cancellation/public-service>).

Federal Direct Consolidation Loan

Loan consolidation is a way of lowering monthly payments by combining several federal loans into one loan at the time of repayment. Borrowers may consolidate any amount of eligible loans including those borrowed under the Federal Family Education Loan program, the Federal Perkins Loan program, and the Direct Loan Program. The interest rate is fixed at the time of consolidation based on the weighted average of the loans being consolidated. Repayment of Consolidation loans may extend to 30 years depending on the repayment plan selected and the amount borrowed. The result of a longer repayment term, however, is an increase in the total cost of the loan. More information about Direct Loan Consolidation can be found on the US Department of Education website. (<https://studentaid.ed.gov/sa/repay-loans/consolidation>)

Entrance and Exit Counseling

First-time Direct Subsidized, Unsubsidized, and Graduate PLUS Loan borrowers must participate in entrance counseling before a loan disbursement can be made.

Shortly before graduating from or terminating enrollment at the University of Oregon, borrowers must also participate in exit loan counseling.

Both entrance and exit counseling sessions are completed on the Federal Student Loan website (<https://studentloans.gov/myDirectLoan/index.action>).

Alternative Loans

Privately funded loans are not based on need and no federal formula is applied to determine eligibility. However, the amount borrowed cannot exceed the cost of education minus other financial aid. Interest rates

and repayment terms vary, but are generally less favorable than those provided through the federal direct lending program. Private loans are used to supplement the federal programs when the cost of education minus federal aid still leaves unmet need. Information is available in the Office of Student Financial Aid and Scholarships or on its website under *Alternative Student Loans*.

Debt Management and Default Reduction

The University of Oregon is committed to helping students achieve sound financial planning and debt management. Information about loans, repayment options, and debt management strategies is available in the Office of Student Financial Aid and Scholarships and on its website.

Scholarships

Scholarships Awarded by a Department or School

Undergraduate and graduate students who have selected a major field of study should consult the appropriate school or department about possible scholarships and application procedures and requirements.

Many departments offer assistantships and fellowships—which include an instructional fee waiver, a monthly salary, and health insurance benefits—to outstanding graduate students.

National ROTC Scholarships

The Army Reserve Officers Training Corps (ROTC) Scholarship Program sponsors two-, three-, and four-year scholarship options based on the time remaining to complete a degree. These scholarships include full tuition and fees or the option for room and board in place of tuition and fees. It also provides an additional book allowance of \$1,200 per year, and a monthly living allowance of \$420 per month. The University of Oregon also provides an additional subsidy for a portion of the housing cost to qualifying students. For more information, contact the Department of Military Science at 541-346-3102 or email mcmahond@uoregon.edu. High school seniors may also apply online (https://www.goarmy.com/rotc.html?iom=OP68-9021-ACNP-PS-XXX-GO-XXX-XX-XX-X-W64&&c3apidt=p27186155064&gclid=CjwKCAjwiZnnBRBQEiwAcWKfYvVd7NxlEPlvKryZEEuNxFZFNjSkF6VPjZKsCLATIYBoCrSUQAvD_BwE&gclidsrc=aw.ds) for a four-year Army ROTC National Scholarship or contact their school's career counselor.

National and Community Service Trust Act

This legislation created AmeriCorps, which gives citizens the opportunity to perform community service in the United States and, for that service, receive an education award. This award can be used to pay for postsecondary education or to repay qualified student loans. Information about AmeriCorps is available online.

Scholarships Awarded through the Office of Student Financial Aid and Scholarships

Stamps Scholarship

The Stamps Scholarship is awarded competitively to outstanding incoming domestic freshman students. Oregon resident Stamps Scholars receive UO resident tuition and fees with room and board for four years of undergraduate study. Out-of-state recipients receive nonresident tuition and fees. Approximately 10 students per year are awarded this merit-based scholarship by the Stamps Family Charitable Foundation in partnership with the University of Oregon. Recipients also benefit from as

much as \$12,000 in enrichment funds to be used over four years to help them pursue study abroad, unpaid internships, or other experiences. In addition, students who receive a Stamps Scholarship are automatically granted admission to the University of Oregon's Robert Donald Clark Honors College.

Eligibility Requirements

To apply and compete for this scholarship, a student must

- be an incoming domestic freshman
- have a minimum 3.85 cumulative high school grade point average on a 4.00 scale
- have a minimum 1300 on the SAT or 28 ACT composite score
- exemplify leadership, perseverance, scholarship, service, and innovation

Interested students may apply online. Students must apply for admission by November 1 and submit their Stamps application by November 15. Transcripts and test scores must be provided to the University of Oregon by November 15.

Your scholarship application will be evaluated along with the academic transcripts and test scores included in your UO Undergraduate Admissions Application.

The University of Oregon interviews as many as 36 semifinalists in on-campus interviews; finalists will also be interviewed by the Stamps Family Charitable Foundation. The Stamps Foundation will make the final selection of the recipients, who are notified by March 15.

Scholarship Renewal

Stamps Scholarships are available for up to 12 terms, renewed annually, provided recipients meet the following requirements:

- Enroll in and complete a minimum of 12 UO credits per term
- Maintain a 3.25 UO grade point average

See the financial aid website (http://financialaid.uoregon.edu/stamps_scholarship) for applications and filing deadlines.

Presidential Scholarship

In 1983, the university established the Presidential Scholarship Program to recognize and reward outstanding Oregon high school graduates. Presidential Scholarships awarded in 2019–20 will be \$9,000 a year for four years (12 terms).

Incoming resident freshman students must submit the Presidential Scholarship application on our website by February 1 in addition to applying for admission by January 15.

Selection is based on academic achievement and leadership. To retain the scholarships for four years, recipients are expected to maintain a 3.25 grade point average at the university.

Diversity Excellence Scholarship

The University of Oregon Diversity Excellence Scholarship recognizes undergraduate and graduate students who enhance the educational experience of all students by sharing diverse cultural experiences. These tuition-remission scholarships are an integral part of the university's effort to meet the educational-diversity needs of its students, and they complement other programs in the UO diversity plan.

Diversity Excellence Scholarships awarded to undergraduates in 2019–20 will be \$6,500; graduate student awards will be \$9,000. The amount of each award is determined by the UO Diversity Excellence Scholarship Steering Committee. Scholarships are renewable for up to 12 terms for entering freshmen, and are prorated for transfer, continuing, and graduate students. Recipients must meet specific scholarship renewal requirements to retain their scholarships.

Scholarship Criteria. To be considered for this scholarship, an applicant must be a currently enrolled UO student with at least a 3.00 GPA, or apply for admission and meet standard UO admission requirements and have a 3.00 high school GPA. Scholarship recipients are selected competitively by the UO Diversity Excellence Scholarship Selection Committee. Priority consideration is given to students who demonstrate the following:

1. commitment to diversity through documented history of community service, leadership, or other activities
2. educational background and performance as documented by official high school and/or college transcripts
3. financial aid need, as determined by the Free Application for Federal Student Aid or the Oregon Student Aid Application
4. ethnic minority status consistent with the UO Campus Diversity Action Plan
5. status as a first generation or nontraditional student as determined by federal guidelines
6. residence in the state of Oregon

Application. The application is electronic and the submission deadline for the Diversity Excellence Scholarship is February 1 for incoming freshman, graduate, law, and continuing students. The application deadline for transfer students is April 1. Applications are available within the UO Scholarship Dashboard on the Office of Student Financial Aid and Scholarships website.

General University Scholarships

This group of university scholarships is not attached to a particular department or school. Detailed information is available on the financial aid website. All of these scholarships require academic achievement (merit). Some of them require financial need. Scholarships administered by this office are governed by the University Scholarship Committee, whose members are drawn from the faculty, the staff, and the student body. This committee reviews and formulates policies and evaluates applicants' academic qualifications.

A single application form is used for all the scholarships in this group. The application portal is available on the financial aid website for returning students. Applicants must provide copies of academic transcripts from schools they have attended.

Prospective students entering from high school need only to apply for admission by the January 15 deadline to be considered for scholarships in this group. For students transferring from another college, the deadline to apply for admission is March 15 and the deadline to submit a scholarship application and supporting documents is April 1. Incoming graduate, law, and continuing UO students must apply by February 15.

When awarding financial assistance, the university does not discriminate on the basis of race, sex, religion, disability, age, national origin, veteran or marital status, or sexual orientation.

National Merit Scholarships

The University of Oregon participates with the National Merit Scholarship Corporation to award merit-based scholarships to incoming freshman students. Interested high school students should consult with their counselors and arrange to take the Preliminary Scholastic Assessment Test (PSAT) in their junior year. This test is usually offered during October.

UO Excellence Scholarship

The UO Excellence Scholarship for incoming freshman students in 2019–20 is awarded only to out-of-state scholars, with a \$60,000 payout over four years.

Scholarship Criteria

- out-of-state residency
- minimum 3.90 high school GPA on a 4.00 scale
- minimum score of 1450 on the SAT or 33 on the ACT

The SAT score is based on the critical reading and mathematics sections only, and is the highest combined score. The ACT score is the highest composite score. Students who fail to meet the above criteria may qualify instead for the Summit or Apex Scholarships.

Award Information. Out-of-state students receive \$15,000 per year for four years. The UO Excellence Scholarship may be combined with other scholarships, including the Presidential, Diversity Excellence, and General University Scholarships. The UO Excellence Scholarships may not be combined with the Summit Scholarship or the Apex Scholarship.

Application Procedures. Students who apply for admission by January 15 and meet the criteria are automatically awarded the Summit Scholarship. No separate application is required. Application materials, including test scores, must be received by the February 15 document deadline.

Electronic submission of scores is preferred. When taking the test, students should list the UO as one of the score recipients. The school code number for the SAT Reasoning Test is 4846; the code for the ACT is 3498.

Scholarship Renewal. Summit Scholarships are renewable for up to 12 academic terms (excluding summer session) within a five-year period. Renewal awards require a minimum 3.00 cumulative UO GPA and completion of 36 credits per year.

Summit Scholarship

The Summit Scholarship for incoming freshman students in 2019–20 is awarded to Oregon resident scholars with a \$24,000 payout over four years, and to out-of-state scholars with a \$40,000 payout over four years.

Scholarship Criteria

- minimum 3.80 high school GPA on a 4.00 scale
- minimum score of 1250 on the SAT or 26 on the ACT

The SAT score is based on the critical reading and mathematics sections only, and is the highest combined score. The ACT score is the highest composite score. Students who fail to meet the above criteria may qualify instead for the Apex Scholarship.

Award Information. Oregon residents receive \$6,000 per year for four years. Out-of-state students receive \$10,000 per year for four years.

The Summit Scholarship may be combined with other scholarships, including the Presidential, Diversity Excellence, and General University Scholarships. Summit Scholarships may not be combined with the UO Excellence Scholarship or the Apex Scholarship.

Application Procedures. Students who apply for admission by January 15 and meet the criteria are automatically awarded the Summit Scholarship. No separate application is required. Application materials, including test scores, must be received by the February 15 document deadline. Electronic submission of scores is preferred. When taking the test, students should list the University of Oregon as one of the score recipients. The school code number for the SAT Reasoning Test is 4846; the code for the ACT is 3498.

Students whose high school GPA or standardized test scores improve sufficiently to make them eligible for the UO Excellence Scholarship by the February 15 document deadline should have their latest transcripts and SAT or ACT scores sent to the UO Office of Admissions by that date. They will be notified of changes by April 1. New scholarship awards will not be made based on transcripts or test scores received after February 15.

Scholarship Renewal. Summit Scholarships are renewable for up to 12 academic terms (excluding summer session) within a five-year period. Renewal awards require a minimum 3.00 cumulative UO GPA and completion of 36 credits per year.

Apex Scholarship

The Apex Scholarship for incoming freshman in 2019–20 is awarded to Oregon resident scholars with a \$12,000 payout over four years, and to out-of-state scholars with \$30,000 over four years.

Scholarship Criteria

- minimum 3.60 high school GPA on a 4.00 scale
- minimum score of 1220 on the SAT or 25 on the ACT

The SAT score is based on the critical reading and mathematics sections only, and is the highest combined score. The ACT score is the highest composite score. Students whose GPA and test scores are higher than the above criteria may instead qualify for the Summit Scholarship.

Award Information. Oregon residents receive \$3,000 per year for four years. Out-of-state students receive \$7500 per year for four years. The Apex Scholarship may be combined with other scholarships, including the Presidential, Diversity Excellence, and General University Scholarships. Apex Scholarships may not be combined with the UO Excellence Scholarship or the Summit Scholarship.

Application Procedures. Students who apply for admission by January 15 and meet the criteria are automatically awarded the Apex Scholarship. No separate application is required. Application materials, including test scores, must be received by the February 15 document deadline. Electronic submission of scores is preferred. When taking the test, students should list the UO as one of the score recipients. The school code number for the SAT Reasoning Test is 4846; the code for the ACT is 3498.

Students whose high school GPA or standardized test scores improve sufficiently to make them eligible for the Summit Scholarship by the February 15 document deadline should have their latest transcripts and SAT or ACT scores sent to the UO Office of Admissions by that date. They will be notified of changes by April 1. New scholarship awards will

not be made based on transcripts or test scores received after February 15.

Scholarship Renewal. Apex Scholarships are renewable for up to 12 academic terms (excluding summer session) within a five-year period. Renewal awards require a minimum 3.00 cumulative UO GPA and completion of 36 credits per year.

Pathway Oregon

Pathway Oregon is the university's promise of full tuition and fees for Oregon residents who are academically qualified and eligible for the Federal Pell Grant. Eligible students will have their tuition and fees covered by a combination of federal, state, and university grants and scholarships for up to four years. Students also receive the academic and personal support that enable them to succeed and graduate from the UO within 12 terms.

To be automatically eligible for Pathway Oregon, students must

- be Oregon residents, have graduated from an Oregon high school in the last two years, and be admitted to the UO as first-time freshmen
- complete a UO admissions application by January 15
- establish Federal Pell Grant eligibility by filing the Free Application for Federal Student Aid (FAFSA) by the March 1 deadline (include the UO code **003223** as a college choice)
- earn a minimum 3.40 high school GPA

Students who earn less than a 3.40 high school GPA but meet all other program eligibility criteria will be considered for the program on a space- and funding-available basis.

Renewal Criteria

- Remain eligible for a Federal Pell Grant
- File the FAFSA by March 1
- Enroll for and maintain full-time attendance
- Make satisfactory academic progress

Academic and Career Planning

Advising

Office of Academic Advising

101 Oregon Hall
advising.uoregon.edu

The University of Oregon offers undergraduate students a choice of more than 2,000 courses. Out of these courses individualized programs emerge, reflecting each student's special interests, goals, and aspirations. Translating these goals and interests into courses, majors, and minors requires careful planning with an academic advisor. University of Oregon advisors collaborate with students to help them achieve their personal goals, academic potential, and professional success.

Faculty advisors provide to students with a declared major a framework in which planning and decision-making may be efficiently completed. Students are strongly urged to consult advisors regularly. The university considers advising an extension of teaching and regards it as a primary responsibility of faculty members, who schedule time each term specifically for advising.

The Office of Academic Advising supports new students in their transition to the university, as well as any student seeking guidance to achieve academic success. The office works closely with students in academic distress who may need particular assistance around navigating campus resources. See also Academic Advising in the Undergraduate Studies (p. 959) section of this catalog.

General Principles in Program Planning

1. To earn a degree in four years (12 terms), students should average 15 credits a term. In planning a term's studies, students should anticipate that each credit requires at least three hours a week for class meetings or homework
2. Each term's schedule should be planned to include the university bachelor's degree requirements and requirements for the major. Major requirements are listed in this catalog under the academic department headings. Students who have not selected a major should spend some time exploring possible majors
3. Students should read the course descriptions in this catalog and the notes in the class schedule to learn course pre- or corequisites
4. Many university major disciplines and courses require competence in mathematics. Mathematics should be started in the first year
5. A second language, whether required or elective, should also be started in the first year if possible. Students planning to study abroad on an international exchange program during the sophomore or junior year should achieve competence in a language early
6. Each student should prepare a four-year model program of courses and discuss the program with an advisor
7. New students might want to explore some special curricular programs such as Freshman Interest Groups and Academic Residential Communities, and should be investigated prior to or during orientation
8. Sound planning is necessary to design a program that combines courses demanding extensive reading, daily exercises, laboratory work, and lengthy papers
9. Planning might also include the use of university resources for improving skills in reading, computation, note-taking, test-taking, and writing.

Academic Majors, Minors, and Careers

University of Oregon undergraduate students must complete at least one academic major to graduate. A minor is another way to focus studies toward career and interest areas. Inquiries about minors should be directed to specific departments.

Willie and Donald Tykeson Hall

tykeson.uoregon.edu

Willie and Donald Tykeson Hall, the college and careers building, offers students an integrated academic and career model focusing around one of six central themes called *flight paths*. These thematic paths guide students in exploring and planning the academic and career paths that aligns with their values, skills, and interests. Students exploring options who are not yet ready to declare a major, who are premajors in a particular field, or who wish to declare a major should consult with advisors in Tykeson Hall. The advisors help plan programs that best suit each student's academic and career goals. Freshman students must declare their majors by the end of their second year; transfer students must declare their majors by the end of their first year.

Career Planning

University Career Center

Willie and Donald Tykeson Hall
career.uoregon.edu

The University Career Center, a unit of the Division of Student Life, exists to support the career readiness, preparation, and professional development of UO students. Students have an opportunity to learn about career options and paths, develop strategies to find and prepare for part-time jobs, internships, and full-time career opportunities, and meet potential employers. See also University Career Center in the Student Services (p. 987) section of this catalog.

Majors, Minors, Options

University of Oregon undergraduate students must complete an academic major to graduate; they may also complete additional majors, minors, or both. Options within majors or minors are additional ways of focusing academic interests, but they do not appear on academic transcripts. Other terms used for options include areas of concentration, emphasis, focus, or specialization; preparatory programs; primary and secondary areas or subjects; fields or subfields; programs of emphasis or study; and tracks. Technically, there are no minors in graduate degree and certificate programs. Graduate students also may pursue options within their major disciplines.

College of Arts and Sciences

Bruce Blonigen, Interim Dean

541-346-3902
114 Friendly Hall

The College of Arts and Sciences is the academic and intellectual hub of the University of Oregon, providing a core liberal arts curriculum to the vast majority of UO undergraduates—even those who will go on to earn a degree in one of the professional schools such as journalism or business.

The University of Oregon was founded in 1876 on a liberal arts curriculum, which has evolved over time to meet the needs of contemporary students. Owing to the breadth and depth of the curriculum provided by the College of Arts and Sciences, the University of Oregon is known as the premier liberal arts institution among the state's public universities.

The fundamental academic mission of the college is to foster a solid and broad general education, which includes the cultivation of quantitative, analytical, and communication skills; an understanding of social and intellectual history; an appreciation of literary and artistic expression; and habits of creative and critical thinking.

Building on its foundational undergraduate curriculum, the college offers 50 major degree programs in the humanities, social sciences, and natural sciences. Moreover, the College of Arts and Sciences is the heart of the university's research enterprise. The college has almost 900 faculty members, most of whom are engaged in active research programs and make original contributions to their respective fields of knowledge. Because of this, students have the opportunity to learn from leading researchers while receiving a liberal education that prepares them to be successful global citizens in the 21st century.

Liberal Education

Social, political, and economic change is accelerating at a phenomenal pace. Many careers exist today that did not exist 10 or even five years ago, and the US Department of Labor predicts that young people today will have had 10 to 14 jobs by the time they are 38 years old. Those best prepared for the future will be those who have developed a capacity for resourcefulness, judgment, analysis, leadership, clear communication, and an informed global perspective—in other words, the skills and knowledge that come from a liberal arts education.

Even students who plan to move into specialized postgraduate careers will benefit from an educational foundation that emphasizes how values, history, and context combine with creative thought and informed inquiry to determine the best way forward, in both professional and civic life. Thus a liberal arts education provides an essential framework for a lifetime of work and growth in a world where many professions are undergoing profound, sweeping transformations.

Academic Programs

The College of Arts and Sciences offers numerous disciplinary and interdisciplinary degree programs and majors, a varied selection of minors, and several certificates. These are described in detail in the pages that follow. As part of the requirements for graduation from the University of Oregon, every student undertakes in-depth study in an area of specialization that is the student's major. Many students

find it advantageous to complete a minor or certificate in an area of specialization that complements the major. Some minor programs offer a student whose major is in the College of Arts and Sciences the chance to gain expertise in subjects offered by a professional school.

Preparatory Programs

The college has preparatory programs for professional specializations. Information about these programs—those offered by the College of Arts and Sciences and those offered elsewhere in the university—is in the **Academic Resources** section of this catalog.

Undergraduate Research Opportunities

The University of Oregon is smaller than most public research universities because it does not have schools of medicine, agriculture, public health, engineering, or veterinary medicine. This means that it can offer a learning environment scaled for faculty-student interaction that is more like a private liberal arts college than a large research institution.

Undergraduate students are encouraged to participate in faculty research projects. Arrangements must be made with the individual faculty member and the department.

Opportunities are plentiful: last year, almost 800 undergraduates enrolled in research credit hours in the College of Arts and Sciences. In addition, more than 20 departments in the College of Arts and Sciences offer an honors program with an undergraduate research thesis requirement.

Advising

Students who are exploring options and not yet ready to declare a major, are premajors in a particular field, or wish to declare a major should consult with advisors in Willie and Donald Tykeson Hall. Advisors can help them plan programs that best suit their academic and career goals. Freshman students must declare their majors by the end of their second year and transfer students must declare their majors by the end of their first year.

Preparation for Kindergarten through Secondary School Teaching Careers

Students who complete a degree in a College of Arts and Sciences department are eligible to apply to the College of Education's fifth-year licensure programs in middle-secondary and elementary teaching. More information is available in the **College of Education** section of this catalog.

Courses

CAS 110. Humanities College Scholars Colloquium. 1 Credit.

Introduces fields in the humanities to freshman honors students. Faculty members discuss their research, the nature of their fields, and career opportunities. Repeatable twice for a maximum of 3 credits.

Pre- or coreq: acceptance into the Society of College Scholars program.

CAS 120. Science College Scholars Colloquium. 1 Credit.

Introduces fields in the sciences to freshman honors students. Faculty members discuss their research, the nature of their fields, and career opportunities. Repeatable twice for a maximum of 3 credits.

Pre- or coreq: acceptance into the Society of College Scholars program.

CAS 130. Social Science College Scholars Colloquium. 1 Credit.
Introduces fields in the social sciences to freshman honors students. Faculty members discuss their research, the nature of their fields, and career opportunities. Repeatable twice for a maximum of 3 credits. Pre- or coreq: acceptance into the Society of College Scholars program.

African Studies

Doris L. Payne, Program Director

541-346-5051
541-346-5041 fax
175 Prince Lucien Campbell Hall
5206 University of Oregon
Eugene, Oregon 97403-5206

The African Studies Program encourages teaching and scholarship on sub-Saharan Africa, North Africa, and the wider African diaspora. The program is a focal point for students and faculty members with expertise in African studies, encouraging course offerings related to Africa, promoting study abroad programs and internships, raising funds to expand African studies resources, and organizing campus and local community events pertaining to Africa. In addition, the program supports faculty and student research on Africa and facilitates dissemination of research through the lecture series.

Students may earn an undergraduate minor in African studies. A graduate specialization track in African studies is also available.

Overseas Opportunities

The university sponsors a summer Swahili program in Zanzibar, a journalism program in Ghana, and a summer international studies program in Dakar, Senegal. UO students may apply to study at the University of Ghana; the University of Cape Town or Stellenbosch University, South Africa; or the University Cheikh Anta Diop, Senegal, through the Council on International Educational Exchange. Students may also choose one of nineteen programs in thirteen African countries sponsored by the School for International Training—Botswana, Cameroon, Ethiopia, Ghana, Kenya, Madagascar, Mali, Morocco, Senegal, South Africa, Tanzania, Tunisia, and Uganda. Financial aid is available for all these programs. For more information, call the Office of International Affairs, 541-346-3207.

Students in all University of Oregon study-abroad programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. See International Affairs in the **Academic Resources** section of this catalog. Students may earn academic credit while gaining career-related work experience through internships in sub-Saharan Africa overseen by the IE₃ Global Internships program. Financial aid is available. Information may be requested from the Office of International Affairs.

African Language Study

The UO offers first- and second-year Modern Standard Arabic and Swahili. UO 5-credit Arabic and Swahili courses satisfy the university's two-year BA foreign-language requirement. For courses in Arabic, see the Religious Studies (p. 485) section of this catalog.

The University of Oregon also offers opportunities for self-study, with the assistance of native speakers, in Akan, Wolof, Bamana-Dyula, Hausa-Fulani, Shona, and Amharic. Information is available from the Yamada Language Center; call 541-346-4011.

Participating Faculty

Michael Allan, comparative literature

Oluwakemi "Kemi" Balogun, women's, gender, and sexuality studies

Doug Blandy, arts and administration

B. Mokaya Bosire, linguistics

Lindsay F. Braun, history

Yvonne A. Braun, women's, gender, and sexuality studies

Alfredo Burlando, economics

Jenifer P. Craig, dance

André Djiffack, Romance languages

Stephen Dueppen, anthropology

Jordache Ellapen, English

Hanan Elsherif, religious studies

Maria Fernanda Escallón, anthropology

Stephen R. Frost, anthropology

Daphne Gallagher, anthropology

Dennis C. Galvan, international studies

Ibrahim J. Gassama, law

Melissa Graboyes, honors college

Rita Honka, dance

Habib Iddrisu, music and dance

Leigh Johnson, geography

Leslie McLees, geography

Lanie Millar, Romance languages

Angela Montague, anthropology

Sylvester Senyo Ofori-Parku, journalism and communication

Doris L. Payne, linguistics

Kory Russel, landscape architecture

Ron Severson, management

H. Leslie Steeves, journalism and communication

Nelson Ting, anthropology

Peter A. Walker, geography

Janis C. Weeks, biology

Frances J. White, anthropology

David R. Woken, UO Libraries

Stephen R. Wooten, international studies

Undergraduate Studies

Minor in African Studies

Each student in the minor program is assigned a faculty advisor. Students who want to earn an undergraduate minor in African studies must satisfy the following requirements, comprising 28 graded credits. Current Africa-related courses that count toward the minor are listed on the program website (africa.uoregon.edu) under the African studies minor link.

Code	Title	Credits
Core Courses		
AFR 215	Introduction to African Studies	4
History of Africa		4
Select one of the following (or an approved alternative):		
HIST 325	Precolonial Africa	
HIST 326	Colonial and Postcolonial Africa	
ANTH 453	African Archaeology	
Contemporary African Issues		4
Select one of the following (or an approved alternative):		
AFR 199	Special Studies: [Topic] (Health and Disease in Africa)	
BI 309	Tropical Diseases in Africa	
ENVS 450	Political Ecology	
FLR 225	Voices of Africa	
FR 407	Seminar: [Topic] (Contemporary Africa)	
GEOG 209	Geography of the Middle East and North Africa	
GEOG 475	Advanced Geography of Non-European-American Regions: [Topic] (Africa—Politics, Development, and Environment)	
HIST 417	Society and Culture in Modern Africa: [Topic]	
INTL 260	Culture, Capitalism, and Globalization	
INTL 345	Africa Today: Issues and Concerns	
INTL 445	Development and Social Change in Sub-Saharan Africa	

SOC 450	Sociology of Developing Areas	
Culture, Ethnicity, and Identity in Africa		4
Select one of the following (or an approved alternative):		
DANC 185	African Dance	
DANC 199	Special Studies: [Topic] (African Drumming)	
FLR 416	African Folklore	
FR 490	20th-Century Literature: [Topic] (Postcolonial Africa or Mongo Beti)	
LING 407	Seminar: [Topic] (African Language Families)	
MUS 462	Popular Musics in the African Diaspora	
Electives		
Electives (see Electives list) ¹		12
Total Credits		28

- ¹ Electives must be approved by a faculty advisor and must be at the 300 or 400level, although as much as 8 credits of Swahili courses at any level may be applied. Recommended courses include any courses listed in the course list or electives list. Additional courses may be approved by the faculty advisor. For study abroad, courses will be evaluated for UO credit on a case-by-case basis through the standard Office of International Affairs procedures for assigning credit and course equivalency. Students consult with the faculty member who is sponsoring their study-abroad experience to prepare an agreement that must include the following:
- a list of readings relevant to the experience, which are to be completed prior to and during the experience
 - a reflective journal on the student's activities and cross-cultural experiences
 - a final paper integrating preparatory readings with the experience (approximately 4,500 words, plus references)

An African studies minor advisor must approve the credits earned in study-abroad or internship programs.

Electives

Code	Title	Credits
AFR 407	Seminar: [Topic] (Africa in Oregon)	1-5
ANTH 310	Exploring Other Cultures: [Topic] (Near Eastern and Egyptian Prehistory)	4
ANTH 342	Archaeology of Egypt and Near East	4
ANTH 410	Experimental Course: [Topic] (African Topics)	5
BI 309	Tropical Diseases in Africa	4
DAN 301	African Dance Aesthetics (Africa and the Diaspora)	4
DANC 399	Special Studies: [Topic] (African Drumming)	1-5
DAN 481	Repertory Dance Company: Rehearsal (Dance Africa)	1-12
ENG 399	Special Studies: [Topic] (African Literature)	5
ENVS 450	Political Ecology	4
FLR 416	African Folklore	4
FR 407	Seminar: [Topic] (African Topics)	1-6
FR 490	20th-Century Literature: [Topic] (The Absurd and the Fantastic; Postcolonial Africa)	4

GEOG 475	Advanced Geography of Non-European-American Regions: [Topic] (Africa: Politics, Development, and Environment)	4
HIST 325	Precolonial Africa	4
HIST 326	Colonial and Postcolonial Africa	4
HIST 417	Society and Culture in Modern Africa: [Topic]	4
HIST 419	African Regional Histories: [Topic]	4
INTL 345	Africa Today: Issues and Concerns	4
INTL 420	Global Community Development	4
INTL 421	Gender and International Development	4
INTL 445	Development and Social Change in Sub-Saharan Africa	4
J 410	Experimental Course: [Topic] (Media in Ghana)	4
LING 407	Seminar: [Topic] (African Language Families)	1-5
MUS 358	Music in World Cultures	4
MUS 451	Introduction to Ethnomusicology	4
MUS 452	Musical Instruments of the World	4
PS 399	Special Studies: [Topic] (Any courses with African topics)	1-5
SOC 313	Social Issues and Movements	4
SOC 450	Sociology of Developing Areas	4
SWAH 101	First Year Swahili	5
SWAH 102–103	First-Year Swahili	10
SWAH 201	Second-Year Swahili	5
SWAH 201–202	Second-Year Swahili	10
SWAH 301	Advanced Swahili	5
SWAH 302	Contemporary Swahili Literature ¹	5
SWAH 303	Language and Culture: Swahili Nation	5
WGS 410	Experimental Course: [Topic] (Gender and Global Social Justice)	1-4
WGS 432	Gender, Environment, and Development	4

¹ Repeatable.

Deviations from the requirements listed must be approved by an African studies advisor.

Restrictions

No more than 8 credits may be from courses with 25 to 49 percent Africa content. No more than 4 credits may be from performance courses. No more than 12 credits may be from a single department. 8 credits must be at the 400 level. No more than 4 credits may be taken pass/no pass. Students must consult with an African studies advisor to confirm that the curricular overlap between the student's major and the African studies minor maintains the principle of academic breadth.

Graduate Studies

Arranging a graduate degree program with a concentration in African studies is possible in a number of departments and programs in the College of Arts and Sciences and the School of Music and Dance. Anthropology, biology, dance, environmental studies, French (in the Romance languages department), folklore and public culture, geography,

history, international studies, linguistics, political science, and sociology have faculty members with expertise and strong interest in this area.

Students should consult with the affiliated faculty members regarding such arrangements.

Graduate Specialization

Students in a University of Oregon MA or PhD program may choose a graduate specialization in African studies. The student will be assigned an advisor within African studies and must satisfy the following requirements:

Code	Title	Credits
ANTH 650	African Studies Seminar	4
	Approved graduate course in African history	4
	Approved graduate course on issues in contemporary Africa	4
	Approved graduate course dealing with issues in African culture, ethnicity, and identity	4
Total Credits		16

American English Institute

Cheryl A. Ernst, Executive Director

541-346-3945

541-346-3917 fax

1787 Agate St.

5212 University of Oregon

Eugene, Oregon 97403-5212

aei@uoregon.edu

The American English Institute offers English language programs for adults who want to improve their English proficiency in order to perform effectively in an academic or professional setting:

- Intensive English Program
- Academic English for International Students Program
- Academic English for International Graduate Students Program
- Other innovative program offerings

Institute instructors are university faculty members with specialized training in linguistics, applied linguistics, or teaching English as a second language. Classes begin in September, January, March, and June.

Intensive English Program

The Intensive English Program (IEP) consists of a seven-level curriculum with electives. Students may enroll for the full 10-week term or one of two four-week sessions: 1) the first four weeks of the program or 2) the last four weeks of the program.

The curriculum is divided into integrated skills courses focusing on reading and writing, grammar, and speaking and listening. Students take the core courses and one or more elective courses for a total of 18 to 22 hours of instruction per week.

The elective courses focus on areas of special concern or interest to students, including targeted skill practice for academic vocabulary, reading fluency, pronunciation, and test preparation. A rotating selection of courses may include on subjects such as journalism, current events, English as a world language, the world of hip-hop, and English conversation.

Students in good academic standing may enroll, with approval from the institute, in one regular university course (mathematics, foreign languages, or music performance) at an additional cost. Students who have partially completed the program may enroll in other university courses, with advising and approval from the institute.

Students receive additional language and study support through the Tutoring Office, where trained and supervised tutors help students with course work, conversation, listening, reading, composition, and pronunciation.

In addition to academics, students may participate in a selection of extracurricular activities. These activities include a conversation partner program, culturally and socially relevant activities, and volunteer and community-service programs.

Student Services

The institute's services for students in the intensive and short-term programs include host families, advising, an extensive orientation program prior to the start of classes, coordinated interaction through tutoring, conversation partners, and planned activities in Eugene and around Oregon.

Admission Procedures

The institute's Intensive English Program is open to students who have successfully completed secondary school and are able to demonstrate sufficient financial support for study at the institute. To apply, submit the following materials:

1. An American English Institute application form
2. Original or certified copies of the most recent degree or diploma received
3. A personal (or guarantor's) bank statement showing the exact amount available for the period of study, or evidence of a scholarship
4. A nonrefundable application fee of \$110

Admission to the Intensive English Program does not imply admission to any other school or program at the University of Oregon. Inquiries about admission should be directed to members of the institute's admissions office staff at aei@uoregon.edu.

Academic English for International Students

This program is offered to matriculated students who have scored between 61 and 87 on the internet-based TOEFL, between 500 and 575 on the paper-based TOEFL, or below 7.0 on the International English Language Testing System (IELTS) examination, or who request additional training in English as a second language for academic work. Courses are offered in listening, speaking, reading and vocabulary, and writing. International first-year interest groups are available in fall and winter. A placement test is required before registering. These courses earn university credit and are taken at the same time as other university course work. Information about this program is available from the American English Institute main office, its advising office, the First-Year Programs office, and International Student and Scholar Services in the Office of International Affairs.

Academic English for International Graduate Students

Graduate-level English courses provide language support in academic writing and oral communication skills to international graduate students.

These include two levels of graduate and scholarly writing in which students develop and polish skills in academic discourse conventions, vocabulary choice, and the grammatical accuracy needed for a variety of graduate-level writing tasks. Other courses focus on advanced speaking and presentation skills, specifically fluency, pronunciation, pragmatics, and strategic competence needed for clear, effective communication in various academic contexts, including teaching as a graduate employee (GE). Testing is provided for the GE English language requirement. Information about this program is available from the American English Institute office, the UO Office of International Affairs, and the UO Graduate School.

Innovative Programming

The American English Institute offers customized on-campus, online, and hybrid courses, workshops, and webinars. Specialized programs, curriculum, and materials can also be designed upon request in academic or professional areas of interest such as English-language learning, teacher training, university preparation, English for specific purposes, and US language and culture. A minimum number of students is required to offer these specialized programs.

Faculty

Edward Adamson, instructor (academic vocabulary, writing and grammar). BA, 1997, Wisconsin, Madison; MEd, 2006, Minnesota, Twin Cities. (2011)

Agnieszka Alboszta, instructor (critical thinking, distance education). BA, 1993, Minnesota, Twin Cities; MA, 2000, California Institute of Integral Studies. (2003)

John Busch, instructor (English linguistics, reading and vocabulary). BA 1982, Minnesota, Twin Cities; MA, 2007, Oregon. (2013)

Thomas Delaney, instructor (Teaching English to speakers of other languages, testing and assessment, differences in language learning); Academic English for International Speakers coordinator. BA, 1994, Loyola Marymount; MA, 1998, Monterey Institute of International Studies; PhD, 2009, Auckland. (2006)

Angela Dornbusch, senior instructor; head academic advisor. BA, 1995, St. Olaf College; MA, 2006, San Francisco State. (2012)

Nancy C. Elliott, instructor (oral communication skills, English dialectology and sociolinguistics). BA, 1982, MA, 1986, Kansas; PhD, 2000, Indiana, Bloomington. (2010)

Robert K. Elliott, instructor (pronunciation and intonation, international GE training, distance education). BA, 1988, California, Los Angeles; MA, 1994, San Francisco State. (2007)

Alicia R. Going, instructor. BA, 1987, Seattle; MA, 1995, School for International Training. (2003)

Andy Halvorsen, senior instructor (teacher training, distance education). BA, 1996, Western Washington; MEd, 2003, Seattle; PhD, 2014, Illinois, Urbana-Champaign. (2013)

Monica Hatch, instructor (academic English for international students). BA, 1994, Georgia; MA, 2011, Georgia State. (2011)

Deborah Healey, instructor (computer-assisted language learning, teacher education, English language teaching). BA, 1974, Queen's (Ontario); MA, 1976, PhD, 1993, Oregon. (2009)

Char Heitman, senior instructor (teacher training, cross-cultural communication, oral skills and fluency). BA, 1988, Northern Iowa; MA, 1993, Iowa. (1997)

Laura G. Holland, senior instructor (intensive English-language teaching, teacher training, online distance education). BS, 1981, Wheelock College; MA, 1991, Columbia. (2010)

Britt Johnson, senior instructor (English as a second language reading, writing, grammar; curriculum; faculty community of practice). BA, 1992, Colorado. (2012)

Daria Kadrova, instructor (lower-level reading and writing). BA, 2008, MA, 2009, Kirovohrad State Pedagogical. (2013).

Jessica Lynch, instructor (intensive English instruction, academic English for international students, assessments). BA, 2006, Oregon; MA, 2008, New Mexico State. (2011)

Tonya Mildon, instructor (academic writing, academic oral communication, academic success). BA, 1990, Washington (Seattle); MA, 2000, Central Washington. (2011)

Jennifer Morris, senior instructor (intermediate and advanced academic writing; reading and grammar, curriculum development). BA, 1991, California, Santa Cruz; MA, 1996, Leicester. (2011)

Sueanne Parker, senior Instructor (grammar, critical reading, test preparation). BA, 2001, Western Washington; MA, 2005, Seattle Pacific. (2006)

Patricia Pashby, senior instructor (second-language teaching, teacher training, vocabulary acquisition); coordinator, international graduate teaching fellow program. BA, 1987, MA, 1990, San Francisco State; EdD, 2002, San Francisco. (2001)

Becki Quick, instructor (curriculum development, academic reading, community connections in learning). BA, 1994, Evergreen State College; MA, 2009, New School. (2011)

Lara M. Ravitch, instructor (curriculum design, assessment, content-based instruction). BA, 1998, Connecticut College; MA, 2002, Monterey Institute of International Studies. (2011)

Jennifer Rice, instructor (English as a second language oral-aural skills, curriculum and materials design, objectives-based course assessment). BS, 2000, Ashland; MA, 2002, Western Oregon. (2010)

Korey Rice, instructor (discussion skills assessment, curriculum development). BA, 1999, Ashland; MS, 2004, Shenandoah. (2004)

Robin Rogers, instructor (curriculum development, materials writing, assessment procedures). BS, 2001, George Fox; MA, 2006, Seattle Pacific. (2010)

Janine Sepulveda, instructor (reading, writing, grammar). BA, 1991, Oregon; MA, 1995, Monterey Institute of International Studies. (1995)

Beth Sheppard, instructor (speaking and listening instruction). BA, 2002, California, Berkeley; MA, 2008, Oregon. (2008)

Thomas Tasker, senior instructor (academic reading and writing, curriculum development). MA, 1992, Illinois, Chicago. (2013)

Ilsa Trummer, instructor (reading, writing, grammar, and oral communication skills). BA, 2008, MA, 2011, Oregon. (2011)

Jodi Weber, instructor (academic English for international students). BA, 1976, MA, 1991, Saint Michael's College. (2010)

Linda Wesley, instructor (intensive English instruction, distance education). BA, 1987, MA, 1997, Western Kentucky. (2013)

Misti Williamsen, instructor (academic reading and writing, curriculum development, listening and speaking instruction). BA, 2005, MA, 2010, Oregon. (2010)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Courses

AEIS 101. Introductory Academic Oral Communication. 4 Credits.

Focuses on strategies to improve aural-oral academic communication through discussions, seminars, dialogue, videos, and lectures. Sequence with AEIS 102.

Pre- or coreq: placement test.

AEIS 102. Advanced Academic Oral Communication. 4 Credits.

Focuses on strategies to improve aural-oral academic communication through discussions, seminars, dialogue, and presentations. Sequence with AEIS 101.

Pre- or coreq: placement test or AEIS 101 with a grade of C– or better.

AEIS 107. Reading Academic Discourse. 4 Credits.

Focuses on interactive reading of academic text, building reading strategies for better comprehension, speed, and confidence, and developing critical reading skills.

Prereq: placement test.

AEIS 108. Advanced Reading Academic Discourse. 4 Credits.

Focuses on interactive reading of academic text, reading strategies for better comprehension, speed, and confidence, and further development of critical, interpretive and evaluative reading. Sequence with AEIS 107 (optional).

Prereq: placement test or AEIS 107 with a grade of C– or better.

AEIS 110. Introductory Academic Writing. 4 Credits.

Introduces conventions of expository essay writing. Emphasizes clear, effective written communication and development of editing skills. Covers grammar in context. Sequence with AEIS 111, 112.

Prereq: placement test.

AEIS 111. Intermediate Academic Writing. 4 Credits.

Intermediate writing for nonnative speakers of English. Critical analysis of academic texts leading to summary, paraphrase, essay-examination responses, and expository essays. Sequence with AEIS 110, 112.

Prereq: placement test or C– or better or P in AEIS 110.

AEIS 112. Advanced Academic Writing. 4 Credits.

Advanced writing for nonnative speakers of English. Critical reading of academic texts for response in various academic modes: reporting research, critical analysis, and argumentation. Sequence with AEIS 110, 111.

Prereq: placement test or C– or better or P in AEIS 111.

AEIS 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

AEIS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

Anthropology

Frances J. White, Department Head

541-346-5278

541-346-0668 fax

308 Condon Hall

Anthropology, the study of humans, includes sociocultural anthropology, biological anthropology, and archaeology. Courses offered by the Department of Anthropology span the natural sciences, social sciences, and humanities and provide a broad understanding of human nature and society for students in other fields and for anthropology majors.

The broad perspective on human culture and biology that anthropology offers can enhance studies in many other fields, including history, psychology, international studies, environmental studies, ecology and evolution, geography, earth system science, literature, political science, folklore and public culture, language study, art history, and public policy and management.

Faculty

William S. Ayres, professor (Pacific islands and Southeast Asian archaeology, chiefdoms, archaeometry). BA, 1966, Wyoming; PhD, 1973, Tulane. (1976)

Scott A. Blumenthal, assistant professor, (paleoanthropology, biological anthropology, archaeology). BA, 2008, Illinois, Urbana-Champaign; PhD, 2015, City University of New York. (2018)

Alison K. Carter, assistant professor (archaeology). BA, 2001, Oberlin College; MS, 2007, PhD, 2013, Wisconsin, Madison. (2017)

L. Zachary DuBois, assistant professor (biocultural anthropology, transgender and LGBT health, biomarkers). BA, 2002, PhD, 2012, Massachusetts, Amherst. (2018)

Stephen Dueppen, associate professor (archaeology). BA, 1999, California, San Diego; MA, 2004, PhD, 2008, Michigan. (2012)

Jon M. Erlandson, Philip H. Knight Professor (New World archaeology, coastal adaptations, Pacific Coast of North America); director, Museum of Natural and Cultural History. BA, 1980, MA, 1983, PhD, 1988, California, Santa Barbara. (1990)

Maria Fernanda Escallón, assistant professor (sociocultural anthropology, cultural heritage). BA, 2003, MA, 2004, Los Andes; MA, 2009, PhD, 2016, Stanford. (2016)

Scott M. Fitzpatrick, professor; associate director, Museum of Natural and Cultural History. BA, 1994, Eastern Washington; MA, 1996, Montana; PhD, 2003, Oregon. (2012)

Stephen R. Frost, professor (human-primate evolution and paleontology, morphometrics, Africa). BA, 1994, California State, Long Beach; PhD, 2001, City University of New York, City College. (2004)

Daphne Gallagher, senior lecturer (anthropology). BA, 1999, Rice; MA, 2004, PhD, 2010, Michigan, Ann Arbor. (2018)

Lamia Karim, associate professor (cultural anthropology). BA, 1984, Brandeis; MA, 1993, Michigan; PhD, 2001 Rice. (2003)

Ana-Maurine Lara, assistant professor (Black feminist anthropology, queer anthropology, decolonial methodologies). BA, 1997, Harvard; PhD, 2014, Yale. (2015)

Gyoung-Ah Lee, associate professor (paleoethnobotany, archaeology, East Asia); director, graduate studies. BA, 1992, Seoul National; MSc, 1997, PhD, 2003, Toronto. (2007)

Leah Lowthorp, assistant professor (cultural anthropologist, folklorist, critical heritage). BA, 2003, California, Berkeley; MA, 2005, Pennsylvania; MA, 2007, Institut Européen des Hautes Etudes Internationales; PhD, 2013, Pennsylvania. (2018)

Madonna L. Moss, professor (zooarchaeology, indigenous resource rights, gender and archaeology). BA, 1976, William and Mary; MA, 1982, PhD, 1989, California, Santa Barbara. (1990)

Michelle Scalise Sugiyama, senior instructor (generation and transmission of culture, symbolic behavior in small-scale societies). BA, 1985, San Diego State; MA, 1988, PhD, 1987, California, Santa Barbara. (2015)

Philip W. Scher, professor (Caribbean, politics of culture, transnationalism); divisional dean, social sciences, College of Arts and Sciences. BA, 1987, Brown; MS, 1991, PhD, 1997, Pennsylvania. (2002)

Carol T. Silverman, professor (performance, Eastern Europe, gender). BA, 1972, City University of New York, City College; MA, 1974, PhD, 1979, Pennsylvania. (1980)

J. Josh Snodgrass, professor (human biology, human nutrition and energetics, skeletal biology); associate vice provost, undergraduate studies. BA, 1995, California, Santa Cruz; MA, 1998, Florida; PhD, 2004, Northwestern. (2005)

Lynn Stephen, professor (ethnicity and political economies, gender, U.S. Latinos and Latin America); Philip H. Knight Chair. BA, 1979, Carleton; PhD, 1987, Brandeis. (1998)

Kirstin Sterner, associate professor (molecular anthropology). BA, 2001, MA, 2005, PhD, 2009, New York. (2011)

Lawrence S. Sugiyama, professor (evolutionary psychology, behavioral ecology, biocultural anthropology). BA, 1985, MA, 1991, PhD, 1996, California, Santa Barbara. (1996)

Nelson Ting, associate professor (primate evolution, molecular anthropology); director, undergraduate studies. BA, 1999, Washington (St. Louis); MA, 2001, Missouri, Columbia; PhD, 2008, City University of New York. (2011)

Larry R. Ulibarri, instructor; department advisor. BA, 2002, Northern Colorado; MA, 2006, PhD, 2013, Colorado, Boulder. (2019)

Frances J. White, professor (evolution of primate behavior, Africa); department head. BA, 1980, MA, 1984, Cambridge; PhD 1986, State University of New York, Stony Brook. (2001)

Emeriti

C. Melvin Aikens, professor emeritus. BA, 1960, Utah; MA, 1962, PhD, 1966, Chicago. (1968)

Aletta Biersack, professor emerita. BA, 1965, MA, 1969, 1972, PhD, 1980, Michigan. (1982)

Don E. Dumond, professor emeritus. BA, 1949, New Mexico; MA, 1957, Mexico City College; PhD, 1962, Oregon. (1962)

John R. Lukacs, professor emeritus. AB, 1969, MA, 1970, Syracuse; PhD, 1977, Cornell. (1976)

Geraldine Moreno Black, professor emerita. BA, 1967, State University of New York, Buffalo; MA, 1970, Arizona; PhD, 1974, Florida. (1974)

Theresa O'Neill, associate professor emerita. BA, 1981, Notre Dame; MA, 1985, PhD, 1992, Harvard. (1998)

Paul E. Simonds, professor emeritus. BA, 1954, MA, 1959, PhD, 1963, California, Berkeley. (1962)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Andrew Boehm, Museum of Natural and Cultural History

Thomas J. Connolly, Museum of Natural and Cultural History

Ann Craig, Museum of Natural and Cultural History

Edward Davis, Museum of Natural and Cultural History

Pamela E. Endzweig, Museum of Natural and Cultural History

Kristina M. Gill, Museum of Natural and Cultural History

Samantha Hopkins, Museum of Natural and Cultural History

Dennis L. Jenkins, Museum of Natural and Cultural History

Elizabeth Kallenbach, Museum of Natural and Cultural History

Jamie Kennedy, Museum of Natural and Cultural History

Jeanne McLaughlin, Museum of Natural and Cultural History

Patrick O'Grady, Museum of Natural and Cultural History

Greg Nelson, Museum of Natural and Cultural History

Gregory Retallack, Museum of Natural and Cultural History

Chris Ruiz, Museum of Natural and Cultural History

- **Bachelor of Arts**
- **Bachelor of Science**
- **Minor**

Undergraduate Studies

Preparation

High school students planning a major in anthropology should have a sound background in English, biological science, and mathematics (preferably algebra). Study in a modern second language is desirable.

Students transferring with two years of college work should have introductory course work in the social sciences. Introductory biology and the equivalent of two years of college-level study in a second language are recommended.

Careers

A bachelor's degree in anthropology prepares the graduate for employment in areas where clear communication, analysis and synthesis, and respect for diversity are valued. Anthropology provides a suitable

background for positions with federal, state, and local agencies and prepares the student for citizenship in a multicultural world.

Students seeking work as professional anthropologists should plan for advanced degrees in anthropology. Graduates with master's or PhD degrees may find work in government, community colleges, or museums. For university teaching and research careers, a PhD degree is necessary.

Bachelor's Degree Requirements

The department offers course work leading to bachelor of arts (BA) and bachelor of science (BS) degrees. Major requirements are the same for each. Differences between the two degrees are explained under Requirements for Bachelor of Arts and Bachelor of Science (<http://catalog.uoregon.edu/bachelorrequirements/#babsrequirements>) in the **Bachelor's Degree Requirements** section of this catalog.

Bachelor of Arts Requirements

Code	Title	Credits
Core Requirements		12
ANTH 145	Principles of Archaeology	
ANTH 161	Introduction to Cultural Anthropology	
ANTH 270	Introduction to Biological Anthropology	
Breadth Requirements		12
One upper-division geographic area course in archaeology		
One course in cultural anthropology		
One courses in biological anthropology		
Four upper-division anthropology courses in one area of concentration ¹		16
Two upper-division anthropology electives		8
Total Credits		48

¹ Areas of concentration: cultural anthropology, biological anthropology, or archaeology.

Bachelor of Science Requirements

Code	Title	Credits
Core Requirements		12
ANTH 145	Principles of Archaeology	
ANTH 161	Introduction to Cultural Anthropology	
ANTH 270	Introduction to Biological Anthropology	
Breadth Requirements		12
One upper-division geographic area course in archaeology		
One course in cultural anthropology		
One courses in biological anthropology		
Four upper-division anthropology courses in one area of concentration ¹		16
Two upper-division anthropology electives		8
Total Credits		48

¹ Areas of concentration: cultural anthropology, biological anthropology, or archaeology.

Courses used to fulfill major requirements must be taken for letter grades and passed with a C– or better. To ensure a liberal education, anthropology majors are strongly encouraged to limit their anthropology credits to 52. Majors contemplating graduate work are advised to

complete two years of a second language. Statistics is desirable for those with interests in biological anthropology and archaeology.

Majors must meet with an anthropology advisor at least once a year.

Cultural Resource Management

The following courses are recommended for students who want a focus in cultural resource management:

Code	Title	Credits
ANTH 340	Fundamentals of Archaeology	4
ANTH 344	Oregon Archaeology	4
ANTH 408	Workshop: [Topic] (Archaeology Field School)	1-21
ANTH 411	Politics, Ethnicity, Nationalism	4
ANTH 419	Performance, Politics, and Folklore	4
ANTH 443	North American Archaeology	4
ANTH 449	Cultural Resource Management	4
AAAP 411	Introduction to Historic Preservation	3
AAAP 451	Historic Survey and Inventory Methodology	3

Honors

Approval for graduation with honors is granted to a student who

- Maintains at least a 3.75 GPA in anthropology and at least a 3.50 overall GPA **and** submits an acceptable honors thesis written under the guidance of a departmental faculty member, who serves as thesis advisor.

The honors thesis must be submitted to the thesis advisor *three weeks* prior to graduation.

Important forms are located on the website.

Minor Requirements

Code	Title	Credits
100- or 200-level anthropology course		4
300- or 400-level anthropology courses		12
400-level anthropology courses		4
Elective anthropology course at any level		4
Total Credits		24

The minor in anthropology complements a major in another discipline. Courses used to complete the minor must be chosen in consultation with an anthropology advisor. Of the 24 credits required in anthropology, 20 must be graded and passed with a C– or better.

Middle and Secondary School Teaching Careers

The College of Education offers a fifth-year program for middle-secondary teaching licensure in social studies. This program is described in the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Anthropology

An optional minor is included in this example. Please consult with an anthropology advisor concerning a plan that is best for you.

- **Master of Arts**
- **Master of Science**
- **Doctor of Philosophy**

Graduate Studies

There are no absolute requirements for admission to the master's degree program. A bachelor's degree in anthropology is helpful but not required. Admission is limited and preference is given to applicants with excellent academic records and Graduate Record Examinations (GRE) scores who have had at least a solid beginning in anthropology, who have had some second-language training, and who can demonstrate evidence of a sincere interest in the field. It typically takes two years to complete the program.

Three advanced degrees are offered in anthropology: the master of arts (MA), the master of science (MS), and the doctor of philosophy (PhD). These degrees entail work in the following subfields: archaeology, cultural anthropology, or biological anthropology. Graduate students must demonstrate competence in these subfields, typically through work at the master's level. A master's paper is required, but a thesis is not required. The MA requires competence in a second language. There is no language requirement for the MS, but the candidate for that degree must demonstrate proficiency in a skill such as statistics, computer science, or paleogeography, approved by the department faculty.

Graduate students become members of the Association of Anthropological Graduate Students and are represented in the Student Senate.

Master of Arts Degree Requirements

Code	Title	Credits
Graduate-level anthropology courses ¹		17
Select each of the following:		17
ANTH 615	Proseminar in Anthropology ³	
ANTH 681	Archaeology and Anthropology ³	
ANTH 680	Basic Graduate Physical Anthropology ²	
ANTH 688	Social Theory I ⁴	
ANTH 689	Social Theory II ⁴	
Other graduate-level courses		11
Total Credits		45

¹ Students spend the first year (and in some instances the first two years) establishing a broad foundation in anthropology with these courses, in which they must earn grades of B– or better.

² Basic Graduate Physical Anthropology (ANTH 680) is required for all majors.

³ It is preferable that majors take ANTH 615 and ANTH 681 in their first two years.

- 4 Social Theory I (ANTH 688) and Social Theory II (ANTH 689) are required for majors focusing on cultural anthropology; majors focusing on archaeology and biological anthropology must select one.

The MA requires competence in a second language.

Master of Science Degree Requirements

Code	Title	Credits

- ² Basic Graduate Physical Anthropology (ANTH 680) is required for all majors.
- ³ It is preferable that majors take ANTH 615 and ANTH 681 in their first two years.
- ⁴ Social Theory I (ANTH 688) and Social Theory II (ANTH 689) are required for majors focusing on cultural anthropology; majors focusing on archaeology and biological anthropology must select one.

There is no language requirement for the MS, but the candidate for that degree must demonstrate proficiency in a skill such as statistics, computer science, or paleogeography, approved by the department faculty.

There are no absolute requirements for admission to the master's degree program. A bachelor's degree in anthropology is helpful but not required. Admission is limited, and preference is given to applicants with excellent academic records and Graduate Record Examinations (GRE) scores who have had at least a solid beginning in anthropology, who have had some second-language training, and who can demonstrate evidence of a sincere interest in the field. It typically takes two years to complete the program.

PhD Degree Requirements

Admission to the doctoral program is contingent on the possession of a valid master's degree in anthropology from a recognized institution or on the completion of three of the master's core courses. Those who enter with a master's degree in another discipline take master's core courses early in the program.

Formal requirements of time and credit are secondary, but no candidate is recommended for the degree until the minimum Graduate School requirements for credits, residence, and study have been satisfied.

The department requires competence in two modern second languages, one language and one skill, or two skills (including those earned for an MA or MS) approved by the department's faculty. The student's

progress is measured by performance in the core courses and other course work; two comprehensive examinations covering two special fields of concentration in anthropology; a formal dissertation prospectus; and, finally, a doctoral dissertation. The dissertation should be based on original research, which ordinarily involves fieldwork or laboratory work, and should be written in a professional and publishable style appropriate to the subfield of specialization.

For information about general requirements, see the [Graduate School](#) (p. 945) section of this catalog. More information about programs in anthropology may be obtained from the department.

Museum of Natural and Cultural History

The Museum of Natural and Cultural History and its research division, the Oregon State Museum of Anthropology, provide opportunities for students to gain research experience through field projects and museum experience through the natural history museum's public programs. The rich resources of the state museum's collections are available to anthropology students, faculty members, and other qualified researchers. The Museum of Natural and Cultural History is described in the [Academic Resources](#) section of this catalog; the Oregon State Museum of Anthropology is described under [Research Centers and Institutes](#) (p. 955).

Courses

ANTH 114. Anthropology of Pirates and Piracy. 4 Credits.

Examines the political and economic origins and legacies of piracy through 500 years of history in the Americas, Europe, and Africa.

ANTH 119. Anthropology and Aliens. 4 Credits.

Examines how anthropology and speculative fiction have mutually constituted each other historically as each explores culture and society, and what makes us human.

ANTH 145. Principles of Archaeology. 4 Credits.

Introduction to archaeology methods and interpretation.

ANTH 150. World Archaeology. 4 Credits.

Introduction to prehistoric societies and cultural change through the examination of archaeological case studies from around the world. Taught once or more per academic year.

ANTH 161. Introduction to Cultural Anthropology. 4 Credits.

A first look into the work of cultural anthropology and an introduction to the cultural diversity of the world.

ANTH 162. Introduction to Medical Anthropology. 4 Credits.

An introduction to medical anthropology focusing on health, illness and healing from a cross-cultural perspective.

ANTH 163. Origins of Storytelling. 4 Credits.

Application of evolutionary thinking to the origins and function of literature.

ANTH 165. Sexuality and Culture. 4 Credits.

Examines sexuality through the historical, cultural, economic, and political factors that contribute to the construction of sexual identities, relationships, and institutions.

ANTH 170. Introduction to Human Origins. 4 Credits.

Homo sapiens as a living organism; biological evolution and genetics; fossil hominids.

ANTH 171. Introduction to Monkeys and Apes. 4 Credits.

Evolutionary biology of the primates: the fossil record and ecology in the age of mammals, primate anatomy, locomotor feeding adaptations, taxonomic relations, and primate ethology.

ANTH 173. Evolution of Human Sexuality. 4 Credits.

Includes basic genetics, physiology, and behavior. Evolution of sex, of the sexes, and of the role of sex in mammal, primate, and human behavior.

ANTH 175. Evolutionary Medicine. 4 Credits.

Focuses on the application of evolutionary thinking to the study of human health and disease.

ANTH 176. Introduction to Forensic Anthropology. 4 Credits.

Introduction to human skeletal analysis and its application in a legal context, using biological and anthropological approaches to the recovery and identification of human remains.

ANTH 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

ANTH 198. Laboratory Projects: [Topic]. 1-2 Credits.

Repeatable.

ANTH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ANTH 220. Introduction to Nutritional Anthropology. 4 Credits.

Human nutrition from a biocultural anthropological perspective, including the relationship of food consumption patterns to evolution, contemporary issues relating to malnutrition, and diseases of nutrition.

ANTH 223. Anthropology of Chocolate. 4 Credits.

This course explores the impact and meaning that chocolate has had on cultures around the world and on the human body.

ANTH 224M. Introduction to Anthropology of the African Diaspora. 4 Credits.

Introduction to theoretical questions and methodological concerns framing an anthropology of the African diaspora. Multilisted with ES 224M.

ANTH 225. Evolution of Play. 4 Credits.

Explores a range of human play behaviors as adaptations that evolved in a hunting-and-gathering context, functioning to develop physical, cognitive, and social capacities needed in adulthood.

ANTH 243. Island Archaeology. 4 Credits.

Provides an in-depth understanding about the prehistory of various island regions in a comparative perspective as seen in the material culture and how islands help archaeologists decipher patterns of changing human behavior over time, including migration processes, settlement patterns, environmental interactions, and exchange systems.

ANTH 248. Archaeology of Wild Foods. 4 Credits.

Examines how diet and early cooking affected human evolution, harvest-processing of wild Pacific Northwest foods, pre-Neolithic cooking technologies.

ANTH 250. Introduction to Middle East Studies. 4 Credits.

Explores national, familial, religious, and gendered identities in the Middle East as well as colonial histories, historical memory, politics, globalization, and world view.

ANTH 260. Domestic Animals. 4 Credits.

Explores human relationships with domestic animals, examining the domestication process and the effects of animal domestication on human society.

ANTH 270. Introduction to Biological Anthropology. 4 Credits.

Examines the biological aspects of the human species from comparative, ecological, and evolutionary perspectives. Explores theoretical and methodological issues in biological anthropology.

ANTH 274. Animals and People. 4 Credits.

Explores contemporary and historical examples of human-animal interactions around the globe from a cross-cultural perspective. We analyze the influences of culture and biology on these interactions, explore perspectives, and engage in hypothesis testing.

ANTH 278. Science, Race, and Society. 4 Credits.

Understanding past scientific attitudes on racial variation helps place modern concepts of human diversity and racial segregation in a broader anthropological and scientific context.

ANTH 280. Introduction to Language and Culture. 1-4 Credits.

Relationship and methodology of language and culture.

ANTH 284. Warfare in Human Evolution. 4 Credits.

Reviews current theories regarding when/why warfare emerged in human prehistory, examining evidence from animal behavior, cognitive psychology, and the fossil, archaeological, and ethnographic records.

ANTH 298. Temporary Group-Satisfying Course. 4 Credits.**ANTH 310. Exploring Other Cultures: [Topic]. 4 Credits.**

How anthropologists study and describe human cultures. Content varies; draws on fieldwork, famous ethnographies, specific ethnographic areas and their problems, and comparative study of selected cultures. Repeatable when topic changes.

ANTH 311. Anthropology of Globalization. 4 Credits.

Introduces students to a wide range of issues related to economic, cultural, and ideological aspects of globalization.

Prereq: ANTH 161.

ANTH 314. Gender in Cross-Cultural Perspective. 4 Credits.

Cross-cultural exploration of women's power in relation to political, economic, social, and cultural roles. Case studies from Africa, America, Asia, Europe, and the Middle East.

ANTH 315. Gender, Folklore, Inequality. 4 Credits.

Cross-cultural exploration of the expressive and artistic realm of women's lives. Topics include life-cycle rituals, religion, healing, verbal arts, crafts, and music.

ANTH 320. Native North Americans. 4 Credits.

Interpretive approach to accomplishments, diversity, and survival of precontact, postcontact, and present-day American Indian peoples. Impact of Euro-American stereotypes on politics and identity.

Prereq: ANTH 161.

ANTH 322. Anthropology of the United States. 4 Credits.

Explores the culture and the political economy of the contemporary United States, with a particular focus on race, class, and gender relations.

Pre or coreq: ANTH 161.

ANTH 326. Caribbean Societies. 4 Credits.

Explores the legacy of processes that formed Caribbean culture—migration, slavery, and trade—in religious, popular, and scholarly contexts.

ANTH 328. New Guinea. 4 Credits.

A look at the lifeways of New Guinea people; focuses on personhood, gender, exchange, Christianity, and development.

ANTH 329. Immigration and Farmworkers Political Culture. 4 Credits.

Mexican farmworkers in the United States, their history and living and working conditions explored within the political culture of immigration. Introductory social science course recommended.

ANTH 330. Hunters and Gatherers. 4 Credits.

Survey of contemporary hunter-gatherer societies. Foraging, decision-making, exchange, prestige, marriage, gender roles, parenting, history, and demography in an ecological and evolutionary perspective.

ANTH 331. Cultures of India and South Asia. 4 Credits.

Survey of contemporary South Asia's religious and cultural diversity, issues of ethnic identity, gender construction, social conflict, and politics of poverty.

ANTH 332. Human Attraction and Mating Strategies. 4 Credits.

Evolutionary theory, experimental and real-world data illuminate what we find attractive in others, variation in who we are attracted to, and why.

ANTH 340. Fundamentals of Archaeology. 4 Credits.

Methods modern archaeology uses to reconstruct the past, including background research, field methods, laboratory analyses, and interpreting data.

Prereq: ANTH 145 or ANTH 150.

ANTH 341. Food Origins. 4 Credits.

Biological, ecological, and social dimensions of plant-animal domestication and the environmental impact of agriculture in the Late Pleistocene-Holocene epochs.

ANTH 342. Archaeology of Egypt and Near East. 4 Credits.

The archaeology of ancient Egypt and the Near East.

ANTH 343. Pacific Islands Archaeology. 4 Credits.

Archaeology and prehistoric cultural development of Pacific island peoples from earliest settlement through early Western contact. Emphasizes Southeast Asian cultural foundations and ecological adaptations.

Prereq: ANTH 145 or 150.

ANTH 344. Oregon Archaeology. 4 Credits.

Native American cultural history of Oregon based on archaeological evidence. Environmental and ecological factors that condition human adaptations and contemporary cultural resource protection.

ANTH 345. Archaeology of East Asia. 4 Credits.

Explores the evolution of diverse cultures and ethnic identities in East Asia during prehistoric and early historical times.

ANTH 346. Archaeology of Southeast Asia. 4 Credits.

Explores the evolution of the diverse cultures of Southeast Asia during the prehistoric and early historic periods.

ANTH 347. Archaeology of Ancient Cities. 4 Credits.

The archaeology of ancient cities from around the world.

ANTH 349. Origins of Art. 4 Credits.

Examines prehistoric and recent hunter-gatherer art to understand the role that art behavior played in ancestral human life.

ANTH 361. Human Evolution. 4 Credits.

Fossil evidence of human evolution; Homo sapiens' place among the primates; variability of populations of fossil hominids.

Prereq: ANTH 170 or ANTH 270.

ANTH 362. Human Biological Variation. 4 Credits.

Genetic and biological structure of human populations; population dynamics and causes of diversity; analysis of genetically differentiated human populations and their geographic distribution.

Prereq: one from ANTH 270, BI 213, or BI 283H.

ANTH 365. Food and Culture. 4 Credits.

Anthropological approach to the role of nutrients in human development (individual and group); cultural determinants and differences among populations; world food policy; applied nutritional anthropology.

ANTH 366. Human Osteology Laboratory. 4 Credits.

Human and nonhuman primate osteology and osteometry; fundamentals of dissection and primate anatomy.

Prereq: one from ANTH 170, 270, BI 212, or HPHY 321.

ANTH 369. Human Growth and Development. 4 Credits.

Examines key issues in human and nonhuman primate growth and development; addresses genetic, social and ecological determinants of variation in growth.

ANTH 373. Psychoactive Substances in Ancient Societies. 4 Credits.

Global review of psychoactive substances in past human societies, including the paraphernalia, iconography, and residues of drugs found in the archaeological record.

Prereq: ANTH 145 or ANTH 150.

ANTH 375. Primates in Ecological Communities. 4 Credits.

How do primates interact with other species at evolutionary and ecological scales? What factors influence differences and similarities in primate communities?

Prereq: ANTH 170 or 270.

ANTH 376. Genomics and Anthropology. 4 Credits.

Explores how genomic data are used to address anthropological questions concerning human and nonhuman primate biological variation, health, and evolution.

Prereq: one course from ANTH 175, 270, BI 211, 282H.

ANTH 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ANTH 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ANTH 401. Research: [Topic]. 1-21 Credits.

Repeatable.

ANTH 403. Thesis. 1-12 Credits.

Repeatable.

ANTH 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

ANTH 406. Special Problems: [Topic]. 1-21 Credits.

Repeatable.

ANTH 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ANTH 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

ANTH 409. Practicum: [Topic]. 1-21 Credits.

Repeatable.

ANTH 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ANTH 411. Politics, Ethnicity, Nationalism. 4 Credits.

Explores relationship between ethnicity, politics, and nationalism from historical and anthropological perspectives; addresses the way nationalism and ethnic identity construct and reproduce each other.

Prereq: junior standing in a social science.

ANTH 413. Culture and Psychology. 4 Credits.

Bridges anthropology and psychology to explore the relationship between the individual and culture; includes such topics as emotion, personality, mental illness, and sexuality.

ANTH 414. Activist Anthropology. 4 Credits.

Explores how anthropologists link research with advocacy, public policy processes, activism, and public outreach.

ANTH 415. Human Life History. 4 Credits.

Explores evolution of key life history traits in comparative primatological, paleo-anthropological, behavioral ecology, and evolutionary psychology perspectives.

ANTH 417. Field Methods in Cultural Anthropology. 4 Credits.

Techniques of participant observation, community definition and extension, nondirective interviewing, and establishing rapport. Provides theoretical perspectives and emphasizes investigator's ethical responsibilities.

Prereq: 8 credits of upper-division cultural anthropology.

ANTH 419. Performance, Politics, and Folklore. 4 Credits.

Aesthetic, political, economic, and social dimensions of cultural performances examined in museums, heritage displays, folklore festivals, community celebrations, and tourist destinations.

Pre- or coreq: 8 credits in cultural anthropology.

ANTH 420. Culture, Illness, and Healing. 4 Credits.

Cultural foundations of illness and healing. Attempts to analyze illness experiences, looks at therapies cross-culturally, and examines the nature of healing.

Prereq: ANTH 161.

ANTH 424. Feminist Methods in Anthropology. 4 Credits.

Seminar in feminist research design and methods in three subfields of anthropology: biological, sociocultural, archaeological. Examines case studies illustrating research ethics, collaboration, and activism.

Prereq: 12 credits in ANTH or WGS courses.

ANTH 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with J 427M/527M. Sequence with ANTH 428M/528M Latino Roots II.

ANTH 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with J 428M/528M. Sequence with ANTH 427M/527M.

Prereq: ANTH 427M.

ANTH 429. Jewish Folklore and Ethnology. 4 Credits.

Traditional expressive culture of East European Jews; includes narrative, proverbs, jokes, folk beliefs, rituals, holidays, food, customs, music, gender, and immigrant folklore in the United States.

ANTH 430. Balkan Society and Folklore. 4 Credits.

Explores ethnic groups of the Balkans with attention to the roles of folklore, nationalism, rural-urban relationships, gender, music, and folk arts.

ANTH 431. Plants and People. 4 Credits.

Survey of issues in and research methods for understanding the cultural roles and uses of plants in past and present human societies.

ANTH 434. Native South Americans. 4 Credits.

Contact period and contemporary ethnography of native peoples; ecological adaptation, socioeconomic organization, and culture change.

Prereq: ANTH 161.

ANTH 438. Race and Gender in Latin America. 4 Credits.

Examines intersecting systems of race, gender, ethnicity, and nationalism through 600 years of Latin American history, focusing on five countries in three regions.

ANTH 441. Recent Cultural Theory. 4 Credits.

Survey of various cultural frameworks: Durkheimian, Marxian, feminist, transnationalism, Orientalism.

Prereq: 8 credits in social science.

ANTH 442. Northwest Coast Archaeology. 4 Credits.

Archaeological and prehistoric cultural development of peoples indigenous to the Northwest Coast of North America, from Alaska to northern California, from earliest settlement through Western contact.

Prereq: ANTH 145 or 150.

ANTH 443. North American Archaeology. 4 Credits.

Survey of interdisciplinary research applied to prehistoric cultures and environments in North America.

Prereq: ANTH 145 or 150.

ANTH 444. Seacoast and Prehistory. 4 Credits.

Global review of the significance of coastal settlement and adaptations by humans in the ancient past.

Prereq: ANTH 145 or 150.

ANTH 446. Practical Archaeobotany. 4 Credits.

Investigates interactions between human-plant populations in the past; laboratory training of analyzing plant fossils in archaeological contexts.

ANTH 448. Gender and Archaeology. 4 Credits.

Discussion of gender as an emerging focus of archaeological theory, method, and interpretation. Examination of case studies from around the world during prehistory.

Prereq: ANTH 145 or 150.

ANTH 449. Cultural Resource Management. 4 Credits.

Objectives, legal background, operational problems, ethical and scholarly considerations in the management of prehistoric and historic cultural resources.

Prereq: ANTH 145 or 150.

ANTH 450. The Anthropology Museum. 4 Credits.

Social, historical, ethical, and practical dimensions of the curation and exhibition of anthropological collections in museum contexts.

ANTH 453. African Archaeology. 4 Credits.

The archaeology of humans in Africa with an emphasis on the past 15,000 years.

ANTH 456. Peopling of the Americas. 4 Credits.

Reviews anthropological methods of the Americas including biological, genetic, archaeological, and paleoenvironmental evidence.

Prereq: ANTH 145 or ANTH 150.

ANTH 459. Advanced Evolutionary Medicine. 4 Credits.

Explores current research in the field of evolutionary medicine.

Prereq: one from ANTH 175, ANTH 270, ANTH 468, BI 131, BI 380; ANTH 175 strongly suggested.

ANTH 462. Primate Evolution. 4 Credits.

The fossil record and theoretical implications of the Cenozoic primates with special reference to their various adaptations: locomotion, special senses, dentition.

Prereq: ANTH 270.

ANTH 463. Primate Behavior. 4 Credits.

Ecology and ethology of free-ranging primates. Classification, distribution, and ecological relationships of living primates; social structure and social organizations.

Prereq: ANTH 171 or 270.

ANTH 466. Primate Feeding and Nutrition. 4 Credits.

Evaluates primate feeding and foraging behavior, diet, and nutrition. Explores anatomical, physiological, and behavioral solutions to feeding challenges, both ecological and evolutionary.
Prereq: ANTH 171 or 270.

ANTH 467. Paleoecology and Human Evolution. 4 Credits.

Relationship between ecology and comparative morphology as a basis for theories of hominid phylogeny; analysis of methods of paleoecological inference; current theories of hominid origins.
Prereq: ANTH 270.

ANTH 468. Evolutionary Theory. 4 Credits.

Provides a theoretical framework in evolutionary biology with which to explore human evolutionary history and aspects of modern human biology.

ANTH 470. Statistical Analysis of Biological Anthropology. 4 Credits.

The important methods in biometry (biological statistics) and their inherent assumptions, limitations, interpretations, and common uses (and misuses) as relevant to biological anthropology.
Prereq: MATH 243, 425, or equivalent.

ANTH 471. Zooarchaeology: [Topic]. 4 Credits.

Analysis and interpretation of bone and shell animal remains from archaeological sites. Repeatable once for a maximum of 8 credits when the topic changes.
Prereq: ANTH 145 or ANTH 150.

ANTH 472. Primate Conservation Biology. 4 Credits.

Evaluates the conservation status of the order Primates. Explores biological-ecological issues and social-cultural influences on primate biodiversity, distribution, and abundance.
Prereq: ANTH 171 or 270.

ANTH 473. Advanced Forensic Anthropology. 4 Credits.

Teaches theory and analysis of human remains for medico-legal professionals, including estimating biological parameters from skeletons and outdoor crime scene processing and testimony.
Prereq: ANTH 176 with a grade of B– or better or ANTH 366 with a C– or better.

ANTH 474. Human Skeletal Pathology. 4 Credits.

Methods and techniques of paleopathology, the disease process, and how hard tissues are affected by them. Pivotal anthropological issues in which paleoanthropology plays a key role.
Prereq: ANTH 270.

ANTH 479. Taphonomy: Bones, Bugs, and Burials. 4 Credits.

Application of taphonomic studies in the fields of paleontology, archaeology, and forensic-medicolegal anthropology.
Prereq: one from ANTH 170, ANTH 176, ANTH 270, ANTH 366, BI 212, or equivalent.

ANTH 481. Principles of Evolutionary Psychology. 4 Credits.

Investigates how understanding of our evolutionary history is used to further understanding of the human mind.
Prereq: ANTH 170 or 270.

ANTH 487. Bioanthropology Methods. 4 Credits.

Laboratory-based introduction to research methods in biological anthropology, with an emphasis on research among living human populations.
Prereq: ANTH 270.

ANTH 488. Foundations of Social Theory. 4 Credits.

Important early social theorists (Marx, Engels, Freud, Durkheim, Weber) and the historical conditions in which the study of society emerged in Western thought.

ANTH 493. Anthropology and Popular Culture. 4 Credits.

Popular culture offers insights into the conditions of the reproduction of social relations through the analysis of film, sport, television, advertising, folklore, fashion, and festivals.

ANTH 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ANTH 503. Thesis. 1-16 Credits.

Repeatable.

ANTH 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ANTH 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

ANTH 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ANTH 511. Politics, Ethnicity, Nationalism. 4 Credits.

Explores relationship between ethnicity, politics, and nationalism from historical and anthropological perspectives; addresses the way nationalism and ethnic identity construct and reproduce each other.

ANTH 513. Culture and Psychology. 4 Credits.

Bridges anthropology and psychology to explore the relationship between the individual and culture; includes such topics as emotion, personality, mental illness, and sexuality.

ANTH 514. Activist Anthropology. 4 Credits.

Explores how anthropologists link research with advocacy, public policy processes, activism, and public outreach.

ANTH 515. Human Life History. 4 Credits.

Explores evolution of key life history traits in comparative primatological, paleo-anthropological, behavioral ecology, and evolutionary psychology perspectives.

ANTH 517. Field Methods in Cultural Anthropology. 4 Credits.

Techniques of participant observation, community definition and extension, nondirective interviewing, and establishing rapport. Provides theoretical perspectives and emphasizes investigator's ethical responsibilities.

ANTH 519. Performance, Politics, and Folklore. 4 Credits.

Aesthetic, political, economic, and social dimensions of cultural performances examined in museums, heritage displays, folklore festivals, community celebrations, and tourist destinations.

ANTH 520. Culture, Illness, and Healing. 4 Credits.

Cultural foundations of illness and healing. Attempts to analyze illness experiences, looks at therapies cross-culturally, and examines the nature of healing.

ANTH 524. Feminist Methods in Anthropology. 4 Credits.

Seminar in feminist research design and methods in three subfields of anthropology: biological, sociocultural, archaeological. Examines case studies illustrating research ethics, collaboration, and activism.

ANTH 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with J 427M/527M. Sequence with ANTH 428M/528M Latino Roots II.

ANTH 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with J 428M/528M. Sequence with ANTH 427M/527M.
Prereq: ANTH 527M.

ANTH 529. Jewish Folklore and Ethnology. 4 Credits.

Traditional expressive culture of East European Jews; includes narrative, proverbs, jokes, folk beliefs, rituals, holidays, food, customs, music, gender, and immigrant folklore in the United States.

ANTH 530. Balkan Society and Folklore. 4 Credits.

Explores ethnic groups of the Balkans with attention to the roles of folklore, nationalism, rural-urban relationships, gender, music, and folk arts.

ANTH 531. Plants and People. 4 Credits.

Survey of issues in and research methods for understanding the cultural roles and uses of plants in past and present human societies.

ANTH 534. Native South Americans. 4 Credits.

Contact period and contemporary ethnography of native peoples; ecological adaptation, socioeconomic organization, and culture change.

ANTH 538. Race and Gender in Latin America. 4 Credits.

Examines intersecting systems of race, gender, ethnicity, and nationalism through 600 years of Latin American history, focusing on five countries in three regions.

ANTH 541. Recent Cultural Theory. 4 Credits.

Survey of various cultural frameworks: Durkheimian, Marxian, feminist, transnationalism, Orientalism.
Prereq: 8 credits in social science.

ANTH 542. Northwest Coast Archaeology. 4 Credits.

Archaeological and prehistoric cultural development of peoples indigenous to the Northwest Coast of North America, from Alaska to northern California, from earliest settlement through Western contact.

ANTH 543. North American Archaeology. 4 Credits.

Survey of interdisciplinary research applied to prehistoric cultures and environments in North America.

ANTH 544. Seacoast and Prehistory. 4 Credits.

Global review of the significance of coastal settlement and adaptations by humans in the ancient past.

ANTH 546. Practical Archaeobotany. 4 Credits.

Investigates interactions between human-plant populations in the past; laboratory training of analyzing plant fossils in archaeological contexts.

ANTH 548. Gender and Archaeology. 4 Credits.

Discussion of gender as an emerging focus of archaeological theory, method, and interpretation. Examination of case studies from around the world during prehistory.

ANTH 549. Cultural Resource Management. 4 Credits.

Objectives, legal background, operational problems, ethical and scholarly considerations in the management of prehistoric and historic cultural resources.

ANTH 550. The Anthropology Museum. 4 Credits.

Social, historical, ethical, and practical dimensions of the curation and exhibition of anthropological collections in museum contexts.

ANTH 553. African Archaeology. 4 Credits.

The archaeology of humans in Africa with an emphasis on the past 15,000 years.

ANTH 559. Advanced Evolutionary Medicine. 4 Credits.

Explores current research in the field of evolutionary medicine.

ANTH 562. Primate Evolution. 4 Credits.

The fossil record and theoretical implications of the Cenozoic primates with special reference to their various adaptations: locomotion, special senses, dentition.

ANTH 563. Primate Behavior. 4 Credits.

Ecology and ethology of free-ranging primates. Classification, distribution, and ecological relationships of living primates; social structure and social organizations.

ANTH 566. Primate Feeding and Nutrition. 4 Credits.

Evaluates primate feeding and foraging behavior, diet, and nutrition. Explores anatomical, physiological, and behavioral solutions to feeding challenges, both ecological and evolutionary.

ANTH 567. Paleoeecology and Human Evolution. 4 Credits.

Relationship between ecology and comparative morphology as a basis for theories of hominid phylogeny; analysis of methods of paleoecological inference; current theories of hominid origins.

ANTH 568. Evolutionary Theory. 4 Credits.

Provides a theoretical framework in evolutionary biology with which to explore human evolutionary history and aspects of modern human biology.

ANTH 570. Statistical Analysis of Biological Anthropology. 4 Credits.

The important methods in biometry (biological statistics) and their inherent assumptions, limitations, interpretations, and common uses (and misuses) as relevant to biological anthropology.
Prereq: MATH 243, 425, or equivalent.

ANTH 571. Zooarchaeology: [Topic]. 4 Credits.

Analysis and interpretation of bone and shell animal remains from archaeological sites. Repeatable once for a maximum of 8 credits when the topic changes.

ANTH 572. Primate Conservation Biology. 4 Credits.

Evaluates the conservation status of the order Primates. Explores biological-ecological issues and social-cultural influences on primate biodiversity, distribution, and abundance.

ANTH 573. Advanced Forensic Anthropology. 4 Credits.

Teaches theory and analysis of human remains for medico-legal professionals, including estimating biological parameters from skeletons and outdoor crime scene processing and testimony.

ANTH 574. Human Skeletal Pathology. 4 Credits.

Methods and techniques of paleopathology, the disease process, and how hard tissues are affected by them. Pivotal anthropological issues in which paleoanthropology plays a key role.

ANTH 579. Taphonomy: Bones, Bugs, and Burials. 4 Credits.

Application of taphonomic studies in the fields of paleontology, archaeology, and forensic-medicolegal anthropology.

ANTH 581. Principles of Evolutionary Psychology. 4 Credits.

Investigates how understanding of our evolutionary history is used to further understanding of the human mind.

ANTH 587. Bioanthropology Methods. 4 Credits.

Laboratory-based introduction to research methods in biological anthropology, with an emphasis on research among living human populations.

ANTH 588. Foundations of Social Theory. 4 Credits.

Important early social theorists (Marx, Engels, Freud, Durkheim, Weber) and the historical conditions in which the study of society emerged in Western thought.

ANTH 593. Anthropology and Popular Culture. 4 Credits.

Popular culture offers insights into the conditions of the reproduction of social relations through the analysis of film, sport, television, advertising, folklore, fashion, and festivals.

ANTH 601. Research: [Topic]. 1-16 Credits.

Repeatable.

ANTH 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

ANTH 603. Dissertation. 1-16 Credits.

Repeatable.

ANTH 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

ANTH 606. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

ANTH 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ANTH 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

ANTH 609. Practicum: [Topic]. 1-16 Credits.

Repeatable.

ANTH 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ANTH 611. Ethnographic Research: Epistemology, Methods, Ethics. 4 Credits.

Various techniques in ethnographic research. Examines the relationships between methods, theory, and ethics.

ANTH 615. Proseminar in Anthropology. 2 Credits.

Presents the department's structure, program, and faculty; introduces research, writing, and funding resources.

ANTH 650. African Studies Seminar. 4 Credits.

Introduction to the ways researchers study Africa-related topics by surveying the types of data, analytical methods, and research questions asked in different subjects, from the natural sciences to the humanities.

ANTH 680. Basic Graduate Physical Anthropology. 5 Credits.

Introduction to major subfields of physical anthropology; geochronology, primate classification, paleoanthropology, paleoanthropology, human biology and diversity, processes of evolution, and primate ethology.

ANTH 681. Archaeology and Anthropology. 5 Credits.

Use by archaeologists of concepts drawn from anthropology; modifications and additions made necessary by the nature of archaeological data.

ANTH 685. Professional Writing. 2-4 Credits.

Covers the basics of professional writing for grant proposals, journal articles, and papers presented at professional meetings. Requires short proposal, longer proposal or article, and workshop participation.

ANTH 688. Social Theory I. 5 Credits.

Social theory survey organized around keywords: colonialism-postcolonialism, meaning, materiality-materialism, local-national-global, structure-agency-history, power, and difference.

ANTH 689. Social Theory II. 5 Credits.

Social theory survey organized around keywords: colonialism-postcolonialism, meaning, materiality-materialism, local-national-global, structure-agency-history, power, and difference.

Susanna Soojung Lim, honors college

Jenny Lin, history of art and architecture

HyeRyoung Ok, journalism and communication (Korean media)

Eileen M. Otis, sociology (China)

Eric W. Pederson, linguistics (South Asia)

Roxann Prazniak, honors college (China)

Eric Priest, law (China)

Biswarup "Bish" Sen, journalism and communications (South Asia)

Xiaobo Su, geography (China)

Ying Tan, art (China)

Mark T. Unno, religious studies (East Asian religions)

Arafaat Valiani, history (South Asia)

Bharat Venkat, anthropology (South Asia)

Tuong Vu, political science (East and Southeast Asia)

Akiko Walley, history of art and architecture (Japan)

Glynne Walley, East Asian languages and literatures (Japan)

Yugen Wang, East Asian languages and literatures (China)

Anita M. Weiss, international studies (South Asia)

Yizhao Yang, planning, public policy and management (China)

Kyu Ho Youm, journalism and communication

- **Bachelor of Arts**
- **Minor in East Asian Studies**
- **Minor in South Asian Studies**
- **Minor in Southeast Asian Studies**

Undergraduate Studies

The Asian Studies Program's interdisciplinary program leads to a bachelor of arts (BA) degree in Asian studies.

Students may focus their studies on Japan, China, Korea, or, with outside language study, a special interdisciplinary major in Southeast Asian or South Asian studies. Students may enhance majors in other departments with a minor in East Asian studies, South Asian studies, or Southeast Asian studies.

Students who major in Asian studies often complement their course work with a year or more of residence in Asia or a double major to combine a profession with their area of expertise. Job possibilities are increasing in such fields as business, journalism, government, and education. Many students go on to graduate studies.

The curriculum includes courses in anthropology, art history, dance, ethnic studies, film, geography, history, international studies, linguistics,

political science, religious studies, and Chinese, Japanese, and Korean language and literature. The program is administered by the Asian studies committee, which is composed of faculty members with Asian specializations.

Declaring a Major

To be accepted into the Asian studies major, a student must request acceptance as a major in the Asian studies office before attaining senior status. Depending on interests and career objectives, students are encouraged to discuss with their advisors or the program director the advisability of pursuing a second major in a supporting discipline or preprofessional program.

Major Requirements

The major in Asian studies offers

- strong training in at least one Asian language (Chinese, Japanese, or Korean)
- knowledge of the histories and cultures of the societies in which that language is used
- a sense of how academic disciplines contribute to interdisciplinary study
- a knowledge of transnational Asia beyond the primary language and civilization focus listed above

Bachelor of Arts Degree Requirements

Students must complete 48 credits as specified below. As many as 8 of these credits may be taken pass/no pass; at least 40 of the 48 credits must be chosen at the 300 level or above. All other courses used to satisfy major requirements must be taken for letter grades and passed with grades of C– or better. Students should consult their advisors in planning programs of study.

Code	Title	Credits
Seminar		
ASIA 350	What Is Asia: Theoretical Debates	4
Subregional Interdisciplinary Focus ¹		
Six courses in the chosen subregion, if available; two courses must be in history, two in the social sciences, and two in the humanities; may include as many as 15 credits of upper-division Asian language courses related to the chosen subregion		24
Discipline or Thematic Focus		
Three courses in one discipline or theme ²		12
Regional Breadth		
Course in Asian studies outside chosen subregion; may include lower-division language courses of a second Asian language		4
Language Requirement		
Two years of Asian language related to the chosen subregion ³		

- ¹ Subregions: China, Japan, Korea, Southeast Asia, South Asia
- ² Disciplines or themes include but are not limited to film, food, literature, religion, pop culture, linguistics, or art. Discipline and thematic courses may be double-dipped from Interdisciplinary courses, but the major must include a minimum of 48 credits. Courses selected for the thematic area do not need to be taken within the declared subregional focus area. Courses selected for the thematic area cannot be language-based; linguistic and literature courses are acceptable.
- ³ Chinese and Japanese are taught through the fifth year in the Department of East Asian Languages and Literatures. Languages must be taken for letter grades and passed with grades of C– or better. Under special circumstances, students may demonstrate an equivalent competence by examination or by work in advanced language courses.

Minor Requirements

Students should consult with the program director to determine whether a course has a full or partial focus on East Asia, South Asia, or Southeast Asia. A list of preapproved courses for each minor is available in the Asian studies office. Students should acquaint themselves with the selection of experimental courses offered each term and may pursue directed readings with East Asian, South Asian, or Southeast Asian specialists. First- and second-year language courses cannot be used to satisfy requirements for the minor.

Minor in East Asian Studies

Code	Title	Credits
Courses from at least two departments focused on East Asia		20
ASIA 350	What Is Asia: Theoretical Debates	4
Two years of study in relevant Asian language or equivalent level of proficiency		
Total Credits		24

At least 12 of the 24 credits must be upper division.

Minor in South Asian Studies

Code	Title	Credits
Courses in South Asia history		4
Course in South Asian history, religion, or philosophy		4
Course in contemporary South Asian issues		4
Course on South Asian media or culture		4
Courses with full or partial South Asia focus		8
Total Credits		24

At least 12 of the 24 credits must be upper division. Students must consult with one of the South Asia faculty members when determining courses to take.

In addition, students must either demonstrate first-year proficiency in any South Asian vernacular language or complete a ten-week term of study or internship in South Asia, under the supervision of a member of the UO South Asia faculty.

Minor in Southeast Asian Studies

Code	Title	Credits
Courses focused on Southeast Asia ¹		20
Course with partial focus on Southeast Asia		4

¹ At least 12 credits must be upper division.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. This degree plan would grant a BA in Asian studies with a focus on Japan.

This degree plan is for general planning purposes only and, due to the interdisciplinary nature of the major, it is imperative that students speak with advisors to determine which courses would best match their personal, professional, and academic goals.

- **Master of Arts: Area Studies Track**
- **Master of Arts: Disciplinary Track**
- **Second Master's Degree**
- **Graduate Specialization**

Graduate Studies

The university offers an interdisciplinary program in Asian studies with an emphasis on East Asia, Southeast Asia, or South Asia leading to the master of arts (MA) degree. The MS degree program is inactive.

The curriculum includes courses in anthropology, art history, Chinese language and literature, geography, history, international studies, Japanese language and literature, linguistics, political science, and religious studies. The program is administered by the Asian studies committee, which is composed of faculty members with Asian specializations.

Prior to registration, the Asian studies committee assigns each student an advisor, who helps the student develop an individualized program. At the end of the first year, the student should form a graduate thesis committee of two to three faculty members to provide guidance through the second year of study and thesis preparation. Graduate students should meet with their advisors at least once a term.

Application for Admission

An applicant for admission to the master's program must hold a bachelor's degree from an accredited four-year university. It is expected that applicants have a minimum of two years of language study and some undergraduate preparation in courses relating to Asia. Students lacking adequate Asian language or disciplinary training must take appropriate preparatory courses, for which no graduate credit is earned.

Required materials for admission and financial aid are as follows:

1. University of Oregon application form and application fee
2. Transcripts of all college or university course work, including the final transcripts for any degree received
3. Three letters of recommendation
4. Statement of objectives
5. Writing sample
6. Test score for Graduate Record Examinations (GRE) and either Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores. International applicants must submit a TOEFL score of at least 575 (paper-based test) or 88 (Internet-based test) or an IELTS score of at least 7, unless they

have received a bachelor's degree from a college or university in an English-speaking country, such as Australia, Canada (excluding Quebec), Ireland, New Zealand, or the United Kingdom

7. Supplementary Application and Financial Statement for International Students must be submitted to the UO Office of Admissions by international applicants
8. Application for Graduate Award, if applying for graduate employment (e.g., a graduate teaching fellowship)

The application deadline is January 5 for admission the following fall term. Application information and materials are available online and from the Asian studies office.

Master's Degree Requirements

Students pursuing an MA in Asian studies must complete 48 credits of graduate study, including at least 44 in Asia-related courses, and a final project. Graduate credit for language study may only be earned for work beyond the second-year level.

600-Level Courses. The Graduate School requires that at least 9 credits in courses numbered 600–699 must be taken in residence.

Graded Courses. 24 of the total credits required must be earned at the University of Oregon for a letter grade. A minimum of 36 credits of course work and a minimum of 9 credits of Thesis (ASIA 503) is required. Credit for the thesis is given pass/no pass. In the final term, master's students must register for at least 3 credits, at least 1 of which must be in Thesis (ASIA 503).

Final Project Options.

Two Seminar Papers Option. Students choosing this option submit two Asia-related papers written for graduate seminars or colloquiums and pass an examination based on the submitted papers in their final term. The examination committee will include two members of the Asian studies faculty proposed by the student and approved by the director.

Thesis Option. Students choosing this option are required to take a minimum of 9 credits of Thesis (ASIA 503) as part of the 48 credits required for the degree. Credit for the thesis is given a grade of pass/no pass at the completion of the thesis. Students form a two-member thesis committee in their second or third term. Thesis writers are expected to defend their theses in the second fall term. In the final term, master's students must register for at least 3 credits, at least 1 of which must be in Thesis (ASIA 503).

In some circumstances, and in consultation with advisors, students may petition the director to extend the defense date of their thesis or seminar paper for up to but no more than two academic terms.

Continuous Enrollment and On-Leave Status. Master's students are expected to maintain continuous enrollment for a minimum of 3 credits each term until all degree requirements have been completed, unless on-leave status has been approved.

Minimum GPA. Graduate students must maintain at least a 3.00 grade point average (GPA) in all graduate courses taken with a graded option.

Time Limit. All requirements for the master's degree must be completed within a seven-year time period.

Master of Arts: Area Studies Track (Using the Two Seminar Papers Option as an Example)

Code	Title	Credits
ASIA 611	Perspectives on Asian Studies: [Topic]	1
ASIA 612	Theory and Methodology in Asian Studies: [Topic]	3
Seminars or colloquia		8
Two courses in architecture, art history, literature, music, religious studies		8
Two courses in anthropology, economics, geography, international studies, political science		8
Two history courses		8
Two courses in a region other than the primary language and civilization focus ¹		8
ASIA 605	Reading and Conference: [Topic] (only if needed to complete credit requirement)	4
Total Credits		48

- ¹ Perspectives on Asian Studies: [Topic] (ASIA 611), Theory and Methodology in Asian Studies: [Topic] (ASIA 612), and interdisciplinary courses may be used to satisfy this cross-regional awareness requirement.

Master of Arts: Disciplinary Track (Using the Thesis Option as an Example)

Code	Title	Credits
Courses within the primary region of focus, drawn from two or more departments		16
Courses in primary discipline with at least one theory or methods course chosen in consultation with an advisor or the program director		12
Courses in region other than primary focus ¹		8
ASIA 503	Thesis	9
Additional course work		3
Total Credits		48

- ¹ Perspectives on Asian Studies: [Topic] (ASIA 611) and Theory and Methodology in Asian Studies: [Topic] (ASIA 612) may be counted toward this cross-regional focus.

Academic courses are to be mutually agreed upon by an academic advisor and the program director. A list of Asia-related courses approved for inclusion in the Asian studies graduate curriculum is available from the program coordinator.

Students should also review the Graduate School's regulations for information on the university's general master of arts degree requirements.

Second Master's Degree

Students enrolled in graduate programs offered by other departments may earn a second master's degree in Asian studies. Besides satisfying the degree requirements set by the other departments, such students must complete the following:

Code	Title	Credits
Approved Asia-related graduate courses		32
ASIA 611	Perspectives on Asian Studies: [Topic]	1
ASIA 612	Theory and Methodology in Asian Studies: [Topic]	3
Demonstrate the language competence required for the MA degree in Asian studies		
Final project (two Asia-related seminar papers or a thesis) ¹		
Total Credits		36

¹ Applies the methodology of the student's discipline to an Asian subject.

The requirements for both the Asian studies and the departmental degree programs must be completed at the same time. A student completing this option is granted two master's degrees, one in Asian studies and another in the departmental discipline.

Graduate Specialization in Asian Studies

The 16-credit graduate specialization in Asian studies is open to all UO graduate students except for MA students in the Asian Studies Program. This specialization enhances student education and future marketability in careers with nongovernmental or international organizations, the media, government service, education, or the academe.

Overview

In collaboration with faculty members, students achieve mastery in Asian studies by

- analyzing and critiquing primary and secondary sources related to Asia
- developing multiple disciplinary perspectives, sources, methods, and modes of analyses used in the study of Asia
- identifying major themes in Asian history, particularly historical continuities and critical junctures
- developing an advanced understanding of Asia's physical and political geography
- studying major topical issues relevant to modern Asia, which may include economic development, tropical diseases, environmental change, and globalization
- honing skills to critically analyze modern debates about Asia

Specialization Requirements

Code	Title	Credits
Core Seminars		
ASIA 611	Perspectives on Asian Studies: [Topic]	1
ASIA 612	Theory and Methodology in Asian Studies: [Topic]	3
Breadth Requirement		
Three 4-credit courses ¹		12
Total Credits		16

¹ Must include more than one academic discipline and more than one Asian country. One course must be outside the student's focal academic division (e.g., humanities, social science). No more than two of the three courses may be substantially focused on the same Asian country.

To apply for the graduate specialization, fill out the Graduate School form (<https://gradschool.uoregon.edu/sites/gradschool2.uoregon.edu/files/Specialization%20Declaration.pdf>).

The Graduate School has general information (<http://gradschool.uoregon.edu/academic-programs/#specializations>) about graduate specializations campus-wide.

Courses

ASIA 111. Great Books on Modern Asia. 4 Credits.

Students learn about Asia and how knowledge about Asia is produced by reading and discussing four great books written by different authors in various writing genres and perspectives.

ASIA 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable when topic changes.
Prereq: freshman or new student.

ASIA 350. What Is Asia: Theoretical Debates. 4 Credits.

An interdisciplinary seminar designed to introduce students to current theoretical debates about Asia, modernization, and area studies.

ASIA 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ASIA 401. Research: [Topic]. 1-16 Credits.

Repeatable.

ASIA 403. Thesis. 1-12 Credits.

Repeatable.
Prereq: major honor's student.

ASIA 405. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

ASIA 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ASIA 409. Practicum: [Topic]. 1-16 Credits.

Closely supervised participation in the activities of public or private organizations, institutes, and community service agencies.

ASIA 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ASIA 425. Asian Foodways. 4 Credits.

Explores socio-cultural, political-economic and historical dimensions of food in China, Japan, Korea, Southeast Asia and India, including modernization, transnationalism, globalization. Offered alternate years.

ASIA 480. Chinese Economy: Transition, Development, Globalization. 4 Credits.

Comprehensive introduction to the Chinese economy: market transition; macroeconomic conditions and policies; key sectors such as industry, banking, finance, energy, export, technology, agriculture; globalization. Offered alternate years.

ASIA 503. Thesis. 1-9 Credits.

Repeatable.

ASIA 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ASIA 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ASIA 525. Asian Foodways. 4 Credits.

Explores socio-cultural, political-economic and historical dimensions of food in China, Japan, Korea, Southeast Asia and India, including modernization, transnationalism, globalization. Offered alternate years.

ASIA 580. Chinese Economy: Transition, Development, Globalization. 4 Credits.

Comprehensive introduction to the Chinese economy: market transition; macroeconomic conditions and policies; key sectors such as industry, banking, finance, energy, export, technology, agriculture; globalization. Offered alternate years.

ASIA 601. Research: [Topic]. 1-16 Credits.

Repeatable.

ASIA 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

ASIA 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ASIA 609. Practicum: [Topic]. 1-16 Credits.

Closely supervised participation in the activities of public or private organizations, institutes, and community service agencies.

ASIA 611. Perspectives on Asian Studies: [Topic]. 1 Credit.

Explores the diverse perspectives that define Asian studies. Samples conflicts, controversies, and areas of consensus that characterize the field.

ASIA 612. Theory and Methodology in Asian Studies: [Topic]. 3 Credits.

Selected Asian studies issues. Repeatable once when topic changes for maximum of 6 credits.

Biology

Bruce A. Bowerman, Department Head

541-346-4502
77 Klamath Hall
1210 University of Oregon
Eugene, Oregon 97403-1210

Biologists investigate a broad spectrum of questions about living organisms and life processes—the physical and chemical bases of life, how organisms and their component parts are structured, how they function, how they interact with their environment, and how they have evolved.

Departmental teaching and research emphases in cellular and molecular biology, developmental biology, ecology and evolution, human biology, marine biology, neuroscience and behavior, and bioinformatics offer students opportunities to learn and work with scientists who are making important contributions to knowledge in these areas.

Faculty

Yashar Ahmadian, assistant professor (theoretical neuroscience). BSc, 2001, Sharif University of Technology; MA, 2003, Columbia, PhD, 2007, Columbia. (2014)

Matthew F. Barber, assistant professor (evolutionary genetics, host-microbe interactions, and biochemistry). BA, 2006, Colgate; PhD, 2012, Stanford. (2016)

Nicola C. Barber, instructor (molecular biology, science education). BA, 2006, Colgate; PhD, 2011, California, Berkeley. (2016)

Alice Barkan, professor (molecular genetics). BS, 1978, Massachusetts Institute of Technology; PhD, 1983, Wisconsin, Madison. (1991)

Brendan J. M. Bohannon, Alec and Kay Keith Professor (microbial ecology and evolution). BS, 1991, Humboldt State; PhD, 1997, Michigan State. (2006)

Bruce A. Bowerman, professor (developmental genetics, regulation of the cytoskeleton in *C. elegans*). BA, 1981, Kansas State; PhD, 1989, California, San Francisco. (1992)

William E. Bradshaw, professor (evolutionary genetics, population biology, evolutionary physiology). BA, 1964, Princeton; MS, 1965, PhD, 1969, Michigan. (1971)

Scott D. Bridgham, professor (ecosystem ecology, plant community dynamics). BA, 1980, BA, 1982, Maine; MS, 1986, Minnesota; PhD, 1991, Duke. (2002)

Mark C. Carrier, senior instructor (developmental biology and physiology). BS, BA, 1987, Massachusetts; MS, 1998, California, Berkeley. (2000)

Amy A. Connolly, instructor (genetics, cell biology, cell division). BS, 2008, Kansas; PhD, 2014, Oregon. (2018)

William A. Cresko, professor (evolutionary developmental genetics). BA, 1992, Pennsylvania; PhD, 2000, Clark. (2005)

Chris Q. Doe, professor (development of the nervous system, neural stem cells, asymmetric cell division). BA, 1981, New College, Sarasota; PhD, 1987, Stanford. (1998)

Judith S. Eisen, professor (development and function of the nervous system). BS, 1973, MS, 1977, Utah State; PhD, 1982, Brandeis. (1985)

Richard B. Emlet, professor (evolution and development of marine invertebrates). BS, 1977, Duke; PhD, 1985, Washington (Seattle). (1992)

Aaron W. E. Galloway, assistant professor (marine trophic ecology, fatty acids). BA, 1999, Evergreen State College; MS, 2004, Central Washington; PhD, 2013, Washington (Seattle). (2015)

David M. Garcia, assistant professor (molecular biology and epigenetics, prions that regulate RNA). BS, 2004, California, Santa Cruz; PhD, 2012, Massachusetts Institute of Technology. (2018)

Jessica L. Green, professor (applied theoretical ecology). BS, 1992, University of California, Los Angeles; MS, 1994, PhD, 2001, University of California, Berkeley. (2007)

Daniel T. Grimes, visiting assistant professor (developmental biology, zebrafish genetics, human disease models). MBiochem, 2008, DPhil, 2013, Oxford. (2019)

Karen J. Guillemin, professor (bacterial pathogenesis, bacterial-host interactions in development); Philip H. Knight Chair. BA, 1991, Harvard-Radcliffe; PhD, 1998, Stanford. (2001)

Lauren M. Hallett, assistant professor (plant community ecology, restoration ecology). BS, 2008, Yale; MSc, 2010, Western Australia; PhD, 2015, California, Berkeley. (2017)

Victoria Herman, associate professor (development and function of nervous system in *Drosophila*). BA, 1989, Harvard-Radcliffe; PhD, 1998, Massachusetts Institute of Technology. (2003)

Janet Hodder, senior lecturer (ecology of marine birds and mammals, science education). BS, 1977, Liverpool; PhD, 1986, Oregon. (1986)

- Cristin L. Hulslander, senior instructor (behavioral ecology). BA, 1992, Bryn Mawr; PhD, 2003, Clark. (2003)
- Santiago Jaramillo, assistant professor (neuronal circuits underlying behavioral flexibility). BS, 1998, Universidad Pontificia Bolivariana; MS, 2002, New Mexico; PhD, 2007, National University of Ireland. (2013)
- Eric A. Johnson, associate professor (*Drosophila* genetics, genomics and cellular physiology). BA, 1990, Grinnell; PhD, 1996, Iowa. (2001)
- Clifford Keller, instructor (neuroethology, electroreception, auditory system). BA, 1977, Washington (Seattle); MSc, 1981, Minnesota, Twin Cities; PhD, 1989, California, San Diego. (2018)
- Alan J. Kelly, senior instructor (molecular and transmission genetics, microbiology). BS, 1981, California, Irvine; PhD, 1994, Oregon. (1994)
- Andrew D. Kern, associate professor (population genetics, computational biology). ScB, 1999, Brown; PhD, 2005, California, Davis. (2017)
- Diana E. Libuda, assistant professor (molecular genetics, DNA repair, chromosome dynamics during meiosis). BS, 2003, California, Los Angeles; PhD, 2008, Harvard. (2014)
- Shawn R. Lockery, professor (invertebrate neurobiology and neural networks). BA, 1981, Yale; PhD, 1989, California, San Diego. (1993)
- V. Pateson Lombardi, senior instructor with title of research assistant professor (human biology, medical physiology); director, undergraduate advising. BA, 1977, MAT, 1979, North Carolina, Chapel Hill; PhD, 1984, Oregon. (1984)
- Stilianos Louca, visiting assistant professor (microbial ecology and evolution, bioinformatics, mathematical modeling). BSc, 2010, Diplom, 2012, Friedrich Schiller; PhD, 2016, British Columbia. (2019)
- Svetlana Maslakova, associate professor (evolution, development and systematics of marine invertebrates). BA, 1998, MS, 1999, Moscow State; PhD, 2005, George Washington. (2008)
- Luca Mazzucato, assistant professor (neural basis sensory perception, neurostatistical analysis). MSci, 2002, Padua; PhD, 2005, Scuola Internazionale Superiore di Studi Avanzati. (2017)
- David A. McCormick, professor (cellular mechanisms of cortical function); Presidential Chair. BA, BS, 1979, Purdue; PhD, 1983, Stanford. (2017)
- Krista McGuire, associate professor (microbial ecology). BS, 2000, Muhlenberg College; PhD, 2007, Michigan, Ann Arbor. (2017)
- Jeffrey N. McKnight, assistant professor (chromatin remodeling, chromatin structure, transcription regulation). BS, 2006, Bucknell; PhD, 2012, Johns Hopkins. (2016)
- Adam C. Miller, assistant professor (neural circuit formation and function). BS, 2001, PhD, 2008, Oregon. (2016)
- Cristopher M. Niell, associate professor (development and function of neural circuits for visual processing). BS, 1995, PhD, 2004, Stanford. (2011)
- Laurel E. Pfeifer-Meister, instructor (ecology, climate change, biodiversity). BA, BS, 2000, Westmont College; PhD, 2008, Oregon. (2016)
- Patrick C. Phillips, professor (evolution, genetics, complex traits). BA, 1986, Reed; PhD, 1991, Chicago. (2000)
- Tobias J. Policha, instructor (plant community ecology, pollination, tropical orchid conservation). BS, 2007, MS, 2011, PhD, 2014, Oregon. (2017)
- John H. Postlethwait, professor (molecular genetic regulation and evolution of development and vertebrate genome evolution). BS, 1966, Purdue; PhD, 1970, Case Western Reserve. (1971)
- Jana Prikryl, senior instructor (molecular genetics). BS, 1999, Colorado, Boulder; PhD, 2009, Oregon. (2010).
- Peter L. Ralph, assistant professor (evolution and population genetics, data analysis, stochastic processes). AB, 2002, PhD, 2009, California, Berkeley. (2016)
- Debbie Schlenoff, senior instructor (animal behavior and evolution, conservation biology). BS, 1979, State University of New York, Binghamton; PhD, 1983, Massachusetts, Amherst. (2001)
- Eric Selker, professor (epigenetic mechanisms). BA, 1975, Reed; PhD, 1980, Stanford. (1985)
- Alan Shanks, professor (marine and intertidal ecology, larval biology, zooplankton). BA, 1977, California, Santa Cruz; PhD, 1985, California, San Diego. (1993)
- Nadia D. Singh, associate professor (evolutionary genetics, genomics). BA, 1999, Harvard; PhD, 2006, Stanford. (2016)
- Kryn Stankunas, associate professor (chromatin and regulators as dynamic sources of epigenetic information during heart development). BS, 1997, British Columbia; PhD, 2003, Stanford. (2009)
- Jeffrey Stone, instructor (botany, plant pathology). BA, 1976, Antioch; PhD, 1986, Oregon. (2005)
- Matthew A. Streisfeld, associate professor (adaptation in natural plant populations). BS, 1998, Emory; PhD, 2005, California, San Diego. (2009).
- Kelly Sutherland, associate professor (marine biology). BS, 1999, Tufts; MSc, 2004, South Alabama; PhD, 2009, Massachusetts Institute of Technology. (2011)
- Emily L. Sylwestrak, visiting assistant professor (neural circuits of behavior, motivation, synaptic physiology). BS, 2006, Illinois Urbana-Champaign; PhD, 2011, California, San Diego. (2019)
- Terry Takahashi, professor (analysis of neural circuitry). BS, 1975, California, Irvine; PhD, 1981, State University of New York, Downstate Medical Center. (1988)
- Nathan J. Tublitz, professor (peptidergic regulation of behavior in insects and cephalopod mollusks). BA, 1975, Reed; PhD, 1984, Washington (Seattle). (1986)
- Eleanor Vandegrift, senior instructor (science education); associate director, science literacy program. BA, 1997, Earlham College; MS, 2002, Oregon State. (2012).
- George R. von Dassow, assistant professor (cell biology of development). PhD, 2000, Washington (Seattle). (2014)

Philip E. Washbourne, associate professor (molecular neurobiology, synapse formation). BS, 1995, Imperial College; PhD, 2000, Padua. (2004)

Monte Westerfield, professor (molecular genetics of nervous system development). AB, 1973, Princeton; PhD, 1977, Duke. (1981)

Peter B. Wetherwax, senior instructor with title of research assistant professor (pollination ecology, tropical ecology, science education). BA, 1980, California, Los Angeles; MA, 1985, Humboldt State; PhD, 1993, Oregon State. (1991)

A. Michelle Wood, professor (microbial ecology and evolution, biological oceanography). BA, 1973, Corpus Christi; PhD, 1980, Georgia. (1990)

Craig M. Young, professor (marine ecology, deep-sea biology, invertebrate embryology); director, Oregon Institute of Marine Biology. BS, 1975, MS, 1978, Brigham Young. PhD, 1982, Alberta. (2002)

Anne Zemper, assistant professor (intestinal stem cell biology, adult homeostasis disease states). BA, 2003, Concordia; PhD, 2010, Oregon Health and Science. (2014)

Steven S. Rumrill, courtesy research associate (estuarine ecology and management, larval biology of marine invertebrates). BA, 1981, MS, 1983, California, Santa Cruz; PhD, 1987, Alberta. (1991)

Carl A. Stiefbold, courtesy senior instructor (science laboratory education). BS, 1971, Portland State. (1987)

David H. Wagner, courtesy associate professor (plant taxonomy, ecology, evolution of bryophytes and pteridophytes). BA, 1968, Puget Sound; MS, 1974, PhD, 1976, Washington State. (1976)

Emeriti

Andrew S. Bajer, professor emeritus. PhD, 1950, DSc, 1956, Cracow. (1964)

Howard T. Bonnett Jr., professor emeritus. BA, 1958, Amherst; PhD, 1964, Harvard. (1965)

Roderick A. Capaldi, professor emeritus. BS, 1967, London; PhD, 1970, York. (1973)

George C. Carroll, professor emeritus. BA, 1962, Swarthmore; PhD, 1966, Texas. (1967)

John S. Conery, professor emeritus. BA, 1976, California, San Diego; PhD, 1983, California, Irvine. (1983)

Alan Dickman, professor emeritus. BA, 1976, California, Santa Cruz; PhD, 1984, Oregon. (1986)

Charles B. Kimmel, professor emeritus. BA, 1962, Swarthmore; PhD, 1966, Johns Hopkins. (1969)

William Roberts, professor emeritus. BA, 1970, Harvard; PhD, 1979, California, San Diego. (1989)

Bitty A. Roy, professor emerita. BS, 1982, Evergreen State; MS, 1985, Southern Illinois; PhD 1992, Claremont Graduate School. (2001)

Paul P. Rudy, professor emeritus. BA, 1955, MA, 1959, PhD, 1966, California, Davis. (1968)

Eric Schabtach, senior instructor emeritus. BS, 1963, McGill. (1969)

Lynda P. Shapiro, professor emerita. BA, 1960, MS, 1963, Arkansas; PhD, 1974, Duke. (1990)

George F. Sprague Jr., professor emeritus. BS, 1969, North Carolina State; PhD, 1977, Yale. (1981)

Karen U. Sprague, professor emerita. BA, 1964, Bryn Mawr; PhD, 1970, Yale. (1977)

Franklin W. Stahl, professor emeritus. AB, 1951, Harvard; PhD, 1956, Rochester. (1959)

Nora B. Terwilliger, professor emerita. BS, 1963, Vermont; MS, 1965, Wisconsin, Madison; PhD, 1981, Oregon. (1972)

Daniel Udovic, professor emeritus. BA, 1970, Texas; PhD, 1973, Cornell. (1973)

Janis C. Weeks, professor emerita. BS, 1975, Massachusetts Institute of Technology; PhD, 1980, California, San Diego. (1989)

Norman K. Wessells, professor emeritus; provost emeritus, academic affairs. BS, 1954, PhD, 1960, Yale. (1988)

James A. Weston, professor emeritus. BA, 1958, Cornell; PhD, 1963, Yale. (1970)

Herbert P. Wisner, senior instructor emeritus. BA, 1949, MA, 1950, Syracuse. (1966)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts: Biology**
- **Bachelor of Arts: Marine Biology**
- **Bachelor of Science: Biology**
- **Bachelor of Science: Marine Biology**

Undergraduate Studies

Students may enter the program with a high school education or transfer from a college or university. The curriculum includes courses for majors in biology, marine biology, and related disciplines; preprofessional courses; and courses that serve as important elements in a liberal education for students in other majors. Course work for the biology major provides an exceptional foundation for students who plan to pursue graduate programs in biomedicine and research, and jobs in health services, private industry, and education.

Biology and General Science Advising Center

541-346-4525
65 Klamath Hall
bioadv@uoregon.edu
biology.uoregon.edu/advising

In the Biology and General Science Advising Center, students can meet with members of the biology advising staff for help in planning an individualized program of study.

The center provides multiple resources and services including advising for biology students and those interested in biomedicine and research; contacts for local, national, and international internships; and evaluation of biology-specific transfer equivalencies. Transfer students should

consult the university's website (<http://registrar.uoregon.edu/transfer-students>) for approximate transfer evaluations and should confirm with each individual department advisor when questions arise.

Nonmajors

Courses for nonmajors offered at the 100 level are intended for students with little or no college background in biology, chemistry, or mathematics. Topics vary from year to year, but all focus on the biological basis of animal behavior, cancer, ecology, evolution, genetics, and human physiology.

Students who are contemplating a major in biology or a related science are advised to begin their biology course work with one of the lower-division sequences: General Biology sequence—General Biology I: Cells (BI 211), General Biology II: Organisms (BI 212), General Biology III: Populations (BI 213), General Biology IV: Mechanisms (BI 214)—or Honors Biology sequence—Honors Biology I: Cells, Biochemistry and Physiology (BI 281H), Honors Biology II: Genetics and Molecular Biology (BI 282H), Honors Biology III: Evolution, Diversity and Ecology (BI 283H). Both sequences include rigorous laboratories and have mathematics and chemistry prerequisites.

Majors

Preparation

Modern biology is a quantitative interdisciplinary science. Students planning to specialize in biology should include in their high school preparation as much mathematics, chemistry, and physics as possible. International baccalaureate and advanced placement course work and testing are encouraged.

Transfer Students

Students who intend to transfer as majors from a community college or four-year institution should carefully plan the course work they take before transferring. Students who transfer after one year of college should have completed a year of college-level mathematics and general chemistry with laboratories. Satisfactory completion of a yearlong biology major's introductory sequence that includes laboratories and features strong components of genetics, evolution, and physiology, most often enables transfer students to earn credit for three of four courses in the General Biology sequence. If this is the case, to complete the 200-level, lower-division biology requirement, students must successfully complete (P or C– or better) General Biology IV: Mechanisms (BI 214). In addition to these biology courses, transfer students can complete major requirements by taking a year of general chemistry with laboratories, two terms of organic chemistry, mathematics through two terms of calculus, and a year of general physics for science majors. Students who plan on applying to graduate programs in medicine or allied health are encouraged to take a full year of organic chemistry and physics, with laboratories, to satisfy graduate program admissions requirements. Organic chemistry course work completed at a community or junior college may not be used to satisfy upper-division credit requirements at the University of Oregon unless an American Chemical Society exam is passed.

Lower-Division Biology Sequences

The standard, four-course sequence includes General Biology I: Cells (BI 211), General Biology II: Organisms (BI 212), General Biology III: Populations (BI 213), and General Biology IV: Mechanisms (BI 214).

The three-course honors sequence for those with a strong background in mathematics and chemistry includes Honors Biology I: Cells,

Biochemistry and Physiology (BI 281H), Honors Biology II: Genetics and Molecular Biology (BI 282H), and Honors Biology III: Evolution, Diversity and Ecology (BI 283H).

Either sequence is appropriate for students with interests in any area of biology. Students should consult the department website or visit the Biology and General Science Advising Center to seek advice on which sequence is most appropriate for them, and for the most up-to-date information.

Careers

The biology major prepares students for many outstanding fields. Biology professions have been ranked among the top ten jobs in the United States for more than 20 years.

Many graduates have gone on to top US and international schools in medicine, dentistry, pharmacy, veterinary medicine, optometry, physical therapy, nursing, and teacher education. Others have pursued PhD and MS degrees in molecular biology, neuroscience, ecology and evolution, and marine biology, or have found employment with government agencies, private industry, or nonprofit organizations. Selected job listings are available online at uocareer.uoregon.edu, in the Biology and General Science Advising Center, and in the University Career Center, 220 Hendricks Hall.

Biology majors are encouraged to become involved in a variety of learning experiences beyond their college course work. More than two-thirds of our students are actively involved in research, and many assist with tutoring or teaching laboratories. Local, national, and international internships are available for those interested in a wide variety of specialty areas. Sample international programs established by the biology faculty in collaboration with Global Education Oregon, the UO's overseas program, include neotropical ecology in Ecuador, tropical marine biology in Panama, and tropical diseases and service learning placements in Ghana.

Major Requirements

A major in biology or marine biology leads to a bachelor of science (BS) or a bachelor of arts (BA) degree. More than 95 percent of biology and marine biology majors seek the bachelor of science (BS) degree. The BA requires completion of the foreign-language requirement, while those with double majors or those emphasizing languages may choose to pursue a bachelor of arts (BA) degree.

- ⁴ Students must complete a minimum of 44 upper-division biology credits. For a complete list of approved courses and other details about upper-division requirements, see the online requirements for the biology major (<https://biology.uoregon.edu/undergraduate-program/requirements>).
- ⁵ Visit the Biology and General Science Advising Center for a list of approved courses.

Students are urged to contact specific institutions to confirm admission requirements.

Please contact the Biology and General Science Advising Center at biology.uoregon.edu/advising or call 541-346-4525 for additional limitations and allowances.

Emphasis Areas for the Biology Major

Fulfilling the requirements for an undergraduate degree in biology provides a solid, general foundation in the discipline. Some biology majors choose to concentrate their upper-division course work in one of five emphasis areas:

- ecology and evolution
- human biology
- marine biology
- molecular, cellular, and developmental biology
- neuroscience and behavior

The requirements listed for each emphasis may be fulfilled as the student completes the upper-division course work for the biology major. Though not required, emphasis areas are designed to guide students, based on their specific interests, through upper-division course work. Upon graduation, students who complete the requirements for an emphasis area receive a written recognition from the department.

Visit biology.uoregon.edu/undergraduate-program/requirements for the current requirements for each emphasis area, or contact the Biology and General Science Advising Center at 541-346-4525 for more information.

- ³ Courses at the Oregon Institute of Marine Biology (OIMB) are offered summer session, fall, and spring terms. See oimb.uoregon.edu for details of OIMB courses.
- ⁴ Visit the Biology and General Science Advising Center for a list of approved courses.

Students are required to spend three terms completing upper-division course work (taking at least 12 credits per term) at the Oregon Institute of Marine Biology. A program plan for the marine biology major is available in the Biology and General Science Advising Center or on the OIMB website.

Animal Use in Teaching Laboratories

Students should be aware that the biology and marine biology majors require courses in which a variety of organisms, including vertebrate animals, are used in laboratory dissections and experiments.

Prospective majors who are concerned about this should discuss it with their advisors before beginning either program. Students are encouraged to review the syllabuses for laboratory courses before enrolling. Syllabuses are available on the department's website.

Department and university policies require that the use of live vertebrate animals be minimized in teaching laboratories and be approved by the curriculum committee of the Department of Biology and by the Institutional Animal Care and Use Committee of the University of Oregon. Students who have ethical objections to animal use in a course that requires it should consult the instructor of record before enrolling.

Recommended Program

Students are encouraged to periodically consult their degree guide and transfer evaluation reports, academic transcripts, and other information available on DuckWeb (<https://duckweb.uoregon.edu>). Students should consult with advisors in the Biology and General Science Advising Center at least once a year for help with determining a program of study.

Freshman majors typically take general chemistry and mathematics during their first year.

Upper-division biology electives and General Physics (PHYS 201), General Physics (PHYS 202), General Physics (PHYS 203) are typically taken after successful completion of an introductory biology sequence.

By the end of the sophomore year, each student should have met with a biology advisor to develop a program that satisfies both the interests of the student and the major requirements.

Courses that are taken to meet major requirements must be passed with grades of P or C– or better. Students should choose the pass/no pass (P/N) option sparingly or not at all. Some biomedical graduate programs do not allow transfer credit from courses taken pass/no pass.

Students meet the general-education group requirement in science by fulfilling the requirements for a major in biology. Transfer students should consult their advisors when selecting courses to meet the group requirements in arts and letters and social science. For more information, see the **Bachelor's Degree Requirements** section of this catalog.

Oregon Institute of Marine Biology

Located in Charleston on Coos Bay, the Oregon Institute of Marine Biology (OIMB), in conjunction with the biology department, offers an undergraduate marine biology major and a coordinated program of study for undergraduates in biology, general science, and environmental science or environmental studies. During fall and spring terms and the summer session, 300- and 400-level courses take advantage of the institute's unique coastal setting. Typical offerings include the following:

Code	Title	Credits
BI 214	General Biology IV: Mechanisms	4
BI 322	Cell Biology	4
BI 390	Animal Behavior	4
BI 451	Invertebrate Zoology	8
BI 454	Estuarine Biology	5
BI 455	Marine Birds and Mammals	1-6
BI 457	Marine Biology: [Topic] (Biology of Fishes, Comparative Embryology and Larval Biology, Marine Conservation Biology, Molecular Biology for Marine Sciences, Subtidal and Deep Sea Ecology)	4-5
BI 458	Biological Oceanography	5
BI 474	Marine Ecology	1-8

A seminar series, Seminar: [Topic] (BI 407), features weekly invited speakers who are active researchers in the marine sciences. Undergraduate research is encouraged.

The summer program offers additional 400-level courses emphasizing field studies and includes a variety of eight- and two-week courses as well as weekend workshops. Information and applications are available from the Biology and General Science Advising Center, from the director of the institute, or from the OIMB website. See also the **Research Centers and Institutes** section of this catalog.

Malheur Field Station

The University of Oregon is a member of the Malheur Field Station consortium. Located in southeastern Oregon in the heart of the Great Basin desert, the field station provides an excellent opportunity for students to study terrestrial and aquatic systems. Credits earned in courses at the field station may be transferred to the university and are included in the total credits required for a University of Oregon degree. Courses that have been preapproved by the department may be counted for the biology major. Detailed course information and applications may be obtained from the field station website.

Second Bachelor's Degree

Students may obtain a second bachelor's degree in biology after earning a bachelor's degree in another field. These students are admitted as postbaccalaureate nongraduates, but not students in the Graduate School. For the second degree, all departmental and university requirements must be met. For more information, see Second Bachelor's Degree in the **Bachelor's Degree Requirements** section of this catalog.

Preprofessional Students

Preprofessional health science students who want to major in biology need to plan carefully to complete major requirements and meet entrance requirements of professional schools. These students should consult a biology advisor as well as the UO health professions advisors (<http://healthprofessions.uoregon.edu>). See Preparatory Programs in the **Academic Resources** section of this catalog for more information about these requirements.

Although Organic Chemistry Lecture (CH 336), Organic Chemistry Laboratory (CH 337), Organic Chemistry Laboratory (CH 338) and Introductory Physics Laboratory (PHYS 204), Introductory Physics Laboratory (PHYS 205), Introductory Physics Laboratory (PHYS 206) are not required for the biology major, they are required for programs at most professional schools including biomedicine at Oregon Health and Science University in Portland.

Honors Program in Biology

The honors program requires substantial laboratory or field research supervised by a faculty member. Biology majors who satisfy the following requirements are eligible to graduate with honors:

1. Registration for the honors program through the Biology and General Science Advising Center, which includes obtaining an acceptance signature from the faculty research advisor, *before* beginning research
2. Completion of all requirements for the major in biology
3. Attainment of a minimum 3.30 GPA in all upper-division biology courses (including 300- and 400-level approved courses outside the department; see a biology advisor for a list)
4. Completion of a minimum of 6 credits in Research: [Topic] (BI 401) under the supervision of a single faculty advisor
5. Completion of a minimum of three terms of intensive research (summer session counts as a term); at least four terms and summer research experience are strongly encouraged
6. Enrollment in Thesis (BI 403) for all three terms of senior year, for a total of 4 credits; these credits may be applied toward the 44 required upper-division biology credits
7. Completion of a thesis, with the following requirements:
 - a. Oversight by a thesis committee comprising two faculty members —a primary advisor and one faculty member on the Biology Undergraduate Affairs Committee
 - b. A final version of the thesis must be provided to the committee one week prior to the thesis defense
 - c. Both committee members must sign the thesis within one week of the thesis defense, and a final signed copy must be submitted to the Biology Advising Office
8. Defense of the thesis in a public forum in which the thesis committee is in attendance, taking place prior to the end of the term in which the student is graduating. The thesis defense is open to the public, and

other students as well as faculty and staff members are encouraged to attend

The chair of the Biology Undergraduate Affairs Committee (currently Peter Wetherwax) will notify students during their senior year with the name of the committee member who will serve as their second thesis committee member. Students should contact both committee members via email sometime during the term before the defense to start working on a range of possible dates. For more information, contact the committee chair.

Honors Program in Marine Biology

To graduate with honors in marine biology, students must meet the following requirements:

1. Completion of all the requirements for the major in marine biology
2. A minimum cumulative GPA of 3.30 for all upper-division biology courses required for the major
3. Biology courses used to satisfy the marine biology degree requirements must be taken for letter grades
4. Registration for the honors program before research begins. This requires approval of the honors thesis topic by the faculty sponsor and the selection of a second member of the marine biology faculty to serve on the thesis approval committee
5. A minimum of 6 credits of research over at least three terms of research. One of these terms can be accomplished on the main campus while the thesis is being written. That term may, however, require periodic visits to the Oregon Institute of Marine Biology (OIMB)
6. Completion of a thesis, based on laboratory and/or field research that is approved by the OIMB faculty advisor and one other member of the OIMB faculty. Included at the front of the thesis should be a title page and the thesis defense committee approval. A final copy of the thesis is to be submitted to the OIMB library
7. A public defense of the thesis at OIMB

Students in residence on the main campus while enrolled in the marine biology honors program should consider enrolling in Thesis (BI 403). Contact the instructor of record for information on this course.

Special Opportunities for Biology Undergraduates

Majors may participate in research; attend department research seminars; work as a biology undergraduate laboratory assistant, biology tutor for undergraduates, or peer advisor; spend a term at the Oregon Institute of Marine Biology; or participate in related activities.

Biology undergraduate lab assistants assist faculty instructors or graduate employees in charge of the laboratory or discussion sections associated with courses. Biology tutors for undergraduates hold regularly scheduled tutorials in the Biology Peer Center. Students interested in becoming either or both must complete an application available in the department office.

The Biology Undergraduate Lab Assistant (BULA) Program provides students with opportunities to gain teaching experience while deepening their knowledge of a particular field. Participants enroll in and receive credit for BI 402 Supervised College Teaching, which may be applied to the biology major upper-division credit requirements. Students who are

considering a career in education are especially encouraged to consider this option.

Credit may be earned for conducting research under the supervision of a faculty member by enrolling in Research: [Topic] (BI 401). For more information, visit the Biology and General Science Advising Center in 65 Klamath Hall.

Students are invited to attend institute seminars that feature visiting and local scientists.

Peer advising is another way for students to become involved in the department. After an application process, selected students are trained during the spring term before the year they plan to work in the advising center.

Biology majors have the opportunity to attend the Oregon Institute of Marine Biology (<http://oimb.uoregon.edu>) (OIMB), the university's marine biology institute. Students who major in marine biology spend at least three terms at the institute. Those majoring in biology with a marine biology emphasis spend at least one term at OIMB. To ensure balanced and diverse programs of study, biology majors are encouraged to enroll in course work that may include summer workshops at the marine station in Charleston. Interested students should plan to attend during their junior or senior years.

Students are encouraged to express ideas and offer suggestions about curriculum and student relations to the chair of the department's curriculum committee, the director of undergraduate advising, the chair of the department's undergraduate affairs committee, or the head of the department.

Students are asked to evaluate their biology courses and instructors near the end of each term. This information is available to instructors after the end of the term and placed on file for possible use in promotion and tenure deliberations. Student answers to summary questions are available in electronic format in Knight Library and in the Office of Academic Advising.

The Biology Teacher Recognition Award highlights efforts to improve biology education through student feedback. Initiated by student nominations, the award recognizes faculty members and teaching assistants who excel in one or more aspects of teaching effectiveness.

Minor in Biology

Code	Title	Credits
Lower-Division Biology Courses		12-15
Select three of the following:		
BI 211	General Biology I: Cells	
BI 212	General Biology II: Organisms	
BI 213	General Biology III: Populations	
BI 214	General Biology IV: Mechanisms	
Or all three of the following:		
BI 281H	Honors Biology I: Cells, Biochemistry and Physiology	
BI 282H	Honors Biology II: Genetics and Molecular Biology	
BI 283H	Honors Biology III: Evolution, Diversity and Ecology	

Upper-Division Biology Courses ¹	16
Total Credits	28-31

¹ No more than 4 credits from BI 401–409.

Students interested in a minor in biology should develop a plan for the minor in consultation with an advisor in the Biology and General Science Advising Center. Students completing the minor in biology must provide the biology advisor with an electronic submission of a transcript or transfer evaluation that shows any transfer courses that may be applied to the minor.

At least 16 credits of biology applied to the minor must be taken at the University of Oregon.

Course work must be completed with grades of P or C– or better.

Kindergarten through Secondary Teaching Careers

Students who complete the bachelor's degree with a biology major are eligible to apply for the College of Education's fifth-year licensure program in middle-secondary teaching or the fifth-year licensure program to become an elementary teacher. More information is available from the department's K–12 education advisor, Peter Wetherwax; see also the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

¹ Marine biology course lists for Areas I, II, and III may be found online (<https://oimb.uoregon.edu/academics/marine-biology-major/requirements-for-the-marine-biology-major/>).

Graduate Studies

The department offers graduate work leading to the degrees of master of arts (MA), master of science (MS), and doctor of philosophy (PhD). The department's primary emphasis for graduate study is the PhD program.

Applications are reviewed by members of the following programs:

1. Molecular biology
2. Neuroscience
3. Ecology and evolution
4. Marine biology

Interdisciplinary opportunities are available among the programs in biology as well as between biology and other departments, e.g., chemistry, computer science, human physiology, physics, and psychology.

Financial support for graduate students may be available through training grants, research grants, and teaching assistantships.

Detailed information about the graduate program, faculty research interests, and facilities is available at the biology department website.

Master's Degree

Master's degrees earned on the UO campus generally emphasize ecology and evolution and can involve research on terrestrial, aquatic, or marine organisms.

Candidates for the master's degree complete 45 credits of course work and the completion of a research project that is presented as a thesis.

Two years are typically required for completion of the master's degree. More information is available on the biology department website (<https://biology.uoregon.edu/graduate-studies/>).

A two-year master's degree with a focus in marine biology is offered at the Oregon Institute of Marine Biology. Master's degree students enrolled in the program at the institute must be admitted to the thesis master's option. This program provides training for a variety of careers in aquatic

or marine biology and can serve as preparation for advancement to a PhD program.

The Department of Biology offers a master's degree in biology with a focus in bioinformatics that is designed to meet the needs of industry, the medical field, and academic or government institutions in the new genomic era. Students receive practical training in all aspects of acquiring and analyzing next-generation sequencing. The program is typically completed in 18 months and includes course work on the Eugene campus followed by a nine-month internship with one of many companies around the country. Detailed program and application information can be found on the Applied Bioinformatics and Genomics Master's Program website (<http://bioinformatics.uoregon.edu>).

Students may be able to accelerate completion of a master's degree program by completing graduate courses while still in the undergraduate program. For information, see Reservation of Graduate Credit (p. 950) in the **Graduate School** section of this catalog.

Doctoral Degree

During the first year, students take courses in their area of interest and participate in a laboratory rotation program. The rotations provide direct exposure to research activities in three laboratories and are therefore invaluable in choosing a laboratory in which to carry out dissertation research. After the first year in the program, students devote nearly all their efforts to research. These activities culminate in the public defense of a dissertation.

Admission

Information on applying to the graduate program may be obtained from the department's website or from the department office. Requirements for admission to the graduate program include the following:

1. A completed online application
2. Three letters of recommendation
3. Transcripts of all college work
4. TOEFL score of 600 (paper-based test) or 105 (Internet-based test) or better for international students. A score of 7.5 on the IELTS will also meet the English language test requirement.

Applications and support materials are submitted electronically.

Application Deadline

Applications must be received by the department by December 1, when the graduate admissions committee begins reviewing applications.

Institute of Ecology and Evolution

The Institute of Ecology and Evolution brings together teams of scientists from biology, environmental studies, geography, earth sciences, mathematics, anthropology, landscape architecture, and computer science. Labs address fundamental questions of ecology and evolution from molecules to ecosystems using a combination of field work, laboratory experiments, genomics, and computational approaches. Weekly seminars, journal clubs, and workshops serve to promote interdisciplinary training and community among trainees and faculty and staff members. For more information, see the **Research Centers and Institutes** section of this catalog.

Institute of Molecular Biology

The Institute of Molecular Biology is an interdisciplinary research community dedicated to investigating biological questions at the

molecular level, bringing together scientists from the biology, chemistry, and physics departments and providing them with state-of-the-art, shared facilities. Graduate students are admitted into academic departments and subsequently receive their degrees through those departments. They may, however, choose any faculty member as a dissertation advisor. For more information, see the **Research Centers and Institutes** section of this catalog.

Institute of Neuroscience

The Institute of Neuroscience comprises scientists from biology, psychology, and mathematics departments with research interests in cellular, developmental, systems, theoretical, and cognitive neuroscience. A coordinated graduate-degree program of instruction and research is available to students through the participating departments. For more information, see the **Research Centers and Institutes** section of this catalog.

Developmental Biology Training Program

The Developmental Biology Program prepares the next generation of developmental biologists. Its varied and collaborative efforts range from molecular and cellular mechanisms of development to developmental neuroscience, evolution and development, developmental networks and genomics, organogenesis, disease modeling, and regenerative biology. Labs use model organisms including yeast, *Neurospora*, nematode worms, fruit flies, zebrafish, and mice. Individualized research training toward a PhD degree within one of 21 laboratories is the core of the program. Participating labs include the Institute of Molecular Biology, Institute of Neuroscience, Institute of Ecology and Evolution, and Oregon Institute of Marine Biology. Requirements include core graduate-level developmental biology courses combined with quantitative biology and other supplementary courses tailored to each student's specific interests. For more information, visit the website. (<https://devbio.uoregon.edu>)

Oregon Institute of Marine Biology

The Oregon Institute of Marine Biology offers a full program of study and research for graduate students. Graduate courses are offered mainly during summer session, fall, and spring terms, and research is conducted year round. The marine biology graduate program focuses on research in biological oceanography, trophic ecology, invertebrate zoology, larval ecology and evolution, the biology of intertidal organisms, deep-sea biology, and marine ecology. See also the **Research Centers and Institutes** (p. 955) section of this catalog.

Environmental Studies

The Environmental Studies Program offers interdisciplinary graduate study leading to a master of arts (MA) or master of science (MS) in environmental studies and an interdisciplinary doctor of philosophy (PhD) degree in environmental sciences, studies, and policy. Students choose courses offered in appropriate disciplines to design a program that meets individual goals. Students may choose to have biology as a focal area. Applications are submitted through the Environmental Studies Program. More information is available in the **Environmental Studies** section of this catalog.

Courses

BI 100. Temporary Group-Satisfying Course. 4 Credits.

BI 121. Introduction to Human Physiology. 4 Credits.

Study of body functions with emphasis on organs and systems. Cell function, genetics, nutrition, exercise; function of the gut, heart, vessels, glands, lungs, nerves, and muscles with practical applications. Lecture, laboratories.

BI 122. Introduction to Human Genetics. 4 Credits.

Basic concepts of genetics as they relate to humans. Blood groups, transplantation and immune reaction, prenatal effects, the biology of twinning, selection in humans, and sociological implications. Lectures, discussions.

BI 123. Biology of Cancer. 4 Credits.

Comparison of cancer cells with normal cells; causes of cancer, including viral and environmental factors; biological basis of therapy. Lectures, laboratories.

BI 130. Introduction to Ecology. 4 Credits.

The concept of an ecosystem; organismal energetics; biogeochemical cycles; succession; population growth; species interactions, species diversity; implications for human ecosystems. Lectures, discussions.

BI 132. Introduction to Animal Behavior. 4 Credits.

Animal behavior, its evolutionary origins, and its neural mechanisms. Readings and films illustrate the adaptive nature of orientation, navigation, communication, and social behavior. Lectures, discussions.

BI 140. Science, Policy, and Biology. 4 Credits.

Explores the biology behind important topical issues such as stem cells, cloning, and genetically modified organisms. How policy decisions affect research in these areas. Lectures, discussions.

BI 150. The Ocean Planet. 4 Credits.

The diversity of marine life is introduced in the context of appreciating nature and using science in the solution of environmental problems. Lectures, discussions.

BI 160. From Brains to Artificial Intelligence. 4 Credits.

Basic concepts on how brains and artificial systems process information. Analysis of the similarities, differences, and complementarity between these systems.

BI 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

BI 198. Laboratory Projects: [Topic]. 1-2 Credits.

Repeatable.

BI 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

BI 211. General Biology I: Cells. 4 Credits.

How cells carry out functions of living organisms; genetic basis of inheritance; how genes and proteins work. Lectures, laboratories-discussions.

Prereq: C- or better or P in CH 111 or CH 113 or CH 114 or CH 221 or CH 224H.

BI 212. General Biology II: Organisms. 4 Credits.

How cells develop and interact within complex organisms. Comparative anatomy and physiology of plants and animals. Lectures, laboratories-discussions.

Prereq: C- or better or P in BI 211.

BI 213. General Biology III: Populations. 4 Credits.

How organisms interact with their environments and with each other; ecology, evolution, and behavior. Lectures, laboratories-discussions. Prereq: C- or better or P in BI 211.

BI 214. General Biology IV: Mechanisms. 4 Credits.

Protein structure and function; metabolism; DNA structure, replication, mutation, and repair; gene mapping and complementation; and gene regulation. Lectures, laboratories. Prereq: C- or better or P in BI 212 and CH 223 or CH 226H.

BI 281H. Honors Biology I: Cells, Biochemistry and Physiology. 5 Credits.

Focuses on the cellular structures and chemical reactions that allow cells to grow, to transform energy, and to communicate. Lectures, laboratories. Sequence with BI 282H, BI 283H. Prereq: MATH 111 or equivalent with B- or better or minimum AP/IB mathematics score of 4/5, and CH 221, CH 222, CH 223 or CH 224H, CH 225H, CH 226H with B- or better in all courses.

BI 282H. Honors Biology II: Genetics and Molecular Biology. 5 Credits.

How living organisms store, replicate, and transmit their genetic information, and how this information directs the activities of the cell and organism. Lectures, laboratories. Sequence with BI 281H, BI 283H. Prereq: BI 281H with C- or better or P.

BI 283H. Honors Biology III: Evolution, Diversity and Ecology. 5 Credits.

The genetic basis and ecological context of evolutionary change leading to an examination of the generation and major patterns of biodiversity. Lectures, laboratories, field trips. Sequence with BI 281H, BI 282H. Prereq: BI 282H with grade of C- or better or P

BI 306. Pollination Biology. 4 Credits.

Ecology and evolution of pollination biology: coevolution, mutualism, animal foraging behavior, plant breeding systems, biodiversity, and conservation issues associated with endangered species and introduced species. Lectures, laboratories, field trips. Prereq: BI 213 or BI 283H.

BI 307. Forest Biology. 4 Credits.

Structure and function of forested ecosystems emphasizing the Pacific Northwest. Interactions among trees, microorganisms, and animals; disturbance and recovery; forest management. Lectures, laboratories, field trips. Prereq: BI 213 or BI 283H.

BI 309. Tropical Diseases in Africa. 4 Credits.

Biological and medical aspects of major infectious and parasitic diseases in Africa, including HIV/AIDS and malaria; socioeconomic issues in public health; case studies. Lectures, discussions. Prereq: BI 212 or BI 282H.

BI 320. Molecular Genetics. 4 Credits.

Molecular mechanisms regulating control of gene expression. Topics include chromosome structure, transcription and processing of RNA, control of transcription, translational control, and genetic rearrangement. Lectures, discussions. Prereq: BI 214 or BI 282H.

BI 322. Cell Biology. 4 Credits.

Eukaryotic cell nuclear structure and exchange, protein trafficking, endocytosis, chaperones, cytoskeletal functions, intercellular junctions, extracellular materials, signaling, cell division mechanics and controls, aging and death. Lectures, discussions. Prereq: BI 214 or BI 282H; CH 331 recommended.

BI 328. Developmental Biology. 4 Credits.

Topics include genetic regulation, nucleocytoplasmic interactions, organogenesis, morphogenesis, pattern formation, cell differentiation, and neoplasia. Lectures, laboratories. Prereq: BI 214 or BI 282H.

BI 330. Microbiology. 3 Credits.

Biology of bacteria: photosynthetic, heterotrophic, and others. Cell structure and function, metabolism including anaerobic and O₂-producing photosynthesis, nitrogen fixation, species interactions, and role in major geochemical cycles. Lectures. Prereq: BI 214 or BI 282H.

BI 331. Microbiology Laboratory. 3 Credits.

Microbial diversity through laboratory projects involving enrichments, culture isolations, and partial characterizations. Two scheduled laboratories and one scheduled lecture per week; additional unscheduled time required. Laboratories. Prereq: BI 214 or BI 282H; pre- or coreq: BI 330.

BI 353. Sensory Physiology. 4 Credits.

Introduction to physiology of the senses: cellular physiology of peripheral receptors through the computational mechanisms that are ultimately related to perception. Lectures, discussions. Prereq: BI 214 or BI 282H.

BI 356. Animal Physiology. 5 Credits.

Neurophysiology, endocrinology, muscle contraction, and homeostatic mechanisms of circulation, respiration, metabolism, ionic regulation, and excretion in mammals; comparison with those in other animals. Lectures, laboratories. Prereq: BI 214 or BI 281H.

BI 357. Marine Biology. 4 Credits.

Ecology and physiology of marine plants and animals. Comparisons of various marine habitats. Human influences on marine systems. Lectures, laboratories, field trips. Prereq: BI 213 or BI 283H. Not open to students who have credit for BI 458 or BI 474.

BI 358. Investigations in Medical Physiology. 4 Credits.

Human physiology with research and clinical medicine applications. Nervous system, addiction medicine, endocrinology, immunology, cardiology, digestion, nutrition, reproduction, infertility, pediatrics, and ophthalmology. Lectures, discussions, primary literature research. Human anatomy and physiology background preferred. Prereq: one from BI 214, BI 283H, HPHY 324.

BI 359. Plant Biology. 4 Credits.

A detailed introduction of the unique features of the biology of land plants, including ecology, physiology, developmental genetics, and evolutionary biology. Lectures, discussions. Prereq: BI 211; BI 212; BI 213 or BI 281H; BI 282H; BI 283H.

BI 360. Neurobiology. 4 Credits.

Function of the nervous system from the single neuron to complex neural networks. Topics range from molecular and cellular neurobiological mechanisms to systems and behavioral analyses. Lectures, discussions. Prereq: BI 214 or BI 282H.

BI 370. Ecology. 5 Credits.

Relationship of organisms to their environment in space and time. Factors controlling the distribution and abundance of organisms, introductions to community systems, and ecosystems. Required fieldwork. Lectures, laboratories, field trips. Prereq: BI 213 or BI 283H. Calculus or statistics recommended.

BI 372. Field Biology. 4 Credits.

Students learn to identify the plants and animals of Oregon, their adaptations and ecology. Lectures, laboratories, field trips. Offered alternate years. Junior or Senior standing preferred.

BI 374. Conservation Biology. 4 Credits.

Global patterns of biological diversity; major threats to biodiversity; application of ecology, evolution, genetics, and other areas to protect and maintain biodiversity. Lectures, discussions.

Prereq: BI 213 or BI 283H.

BI 380. Evolution. 4 Credits.

Origin and maintenance of genetic variability. Historical and geographic patterns of variation. Application of population genetics to understanding evolutionary processes; modes of speciation. Lectures, discussions.

Prereq: college algebra and BI 213 or BI 283H.

BI 390. Animal Behavior. 4 Credits.

How and why animals behave, and how animal behavior is studied. Mechanisms of behavior, behavioral ecology, and sociobiology. Lectures, discussions.

Prereq: BI 213 or BI 283H.

BI 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

Prereq: BI 212 and BI 213 and BI 214 or BI 283H.

BI 401. Research: [Topic]. 1-16 Credits.

Repeatable.

BI 402. Supervised College Teaching. 1-6 Credits.

Repeatable for maximum of 9 credits.

BI 403. Thesis. 1-12 Credits.

Repeatable.

BI 405. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

BI 406. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

BI 407. Seminar: [Topic]. 1-2 Credits.

Repeatable.

BI 408. Laboratory Projects: [Topic]. 1-16 Credits.

Special laboratory training in research methods. A fee may be charged for supplies and materials that become the property of the student.

BI 409. Practicum: [Topic]. 1-12 Credits.

Repeatable.

BI 410. Experimental Course: [Topic]. 1-16 Credits.

Repeatable.

Prereq: BI 212 and BI 213 and BI 214 or BI 283H.

BI 421. Advanced Molecular Genetics Research Laboratory. 5 Credits.

Intensive multipart research project using fungus *Neurospora*; includes mutagenesis, genetic selection-screening, complementation testing, mapping, DNA purification, restriction analysis, polymerase chain reaction, Southern blotting. Five credits for BI 421, 4 credits for BI 521.

Prereq: BI 320

BI 422. Protein Toxins in Cell Biology. 4 Credits.

Mechanisms used by protein toxins to kill other organisms and how they have been used as molecular scalpels to dissect pathways in cell and neurobiology. Lectures, discussions.

Prereq: BI 322, BI 356, or BI 360.

BI 423. Human Molecular Genetics. 4 Credits.

Advanced topics in genetics that relate to human development and disease. The human genome, sex determination, X chromosome inactivation, chromosomal abnormalities, trinucleotide repeat expansions, cancer. Lectures, discussions.

Prereq: BI 320.

BI 424. Advanced Molecular Genetics. 4 Credits.

Structure and function of chromosomes with emphasis on unsolved genetic problems such as genomic imprinting, position effects, and gene silencing. Lectures, discussions.

Prereq: BI 320.

BI 425. Advanced Molecular Biology Research Laboratory. 4 Credits.

Provides an intensive, structured research experience that incorporates molecular biology, genetics, and genomic methodologies. Lectures, laboratories.

Prereq: one from BI 320, BI 322, BI 328.

BI 426. Genetics of Cancer. 4 Credits.

Genetic regulation of cancer. Topics include oncogenes and tumor suppressor genes, signal transduction pathways, genetic animal models, and rationale treatment design. Lectures, discussions.

Prereq: BI 214 or BI 282H; one course from BI 320, BI 322.

BI 427. Molecular Genetics of Human Disease. 4 Credits.

Advanced discussions of heritable diseases from single-gene mutations such as cystic fibrosis to complex multigenetic diseases such as autism and schizophrenia. Lectures, discussions.

Prereq: BI 320.

BI 428. Developmental Genetics. 4 Credits.

Genetic regulation of development, including investigations of molecular mechanisms and studies of developmental mutants. Topics include molecular biology of eukaryotic chromosomes, genetic mosaics, and models of gene regulation. Lectures, discussions.

Prereq: BI 320, BI 328.

BI 432. Mycology. 5 Credits.

Physiology, ecology, structure, and classification of fungi; emphasis on structural and physiological adaptations to saprophytic, parasitic, and symbiotic modes of existence. Lectures, laboratories.

Prereq: BI 213 or BI 283H.

BI 433. Bacterial-Host Interactions. 4 Credits.

Examines spectrum of interactions between bacteria and animals, from pathogenesis to symbiosis, focusing on the molecular and cellular bases of these interactions. Lectures, discussions.

Prereq: BI 320 or BI 322 or BI 330.

BI 442. Systematic Botany. 5 Credits.

Principles of plant classification with emphasis on flowering plants, introduction to taxonomic theory and methods of biosystematics, collection and identification procedures, recognition of common families in native flora. Lectures, laboratories, field trips.

Prereq: BI 213 or BI 283H.

BI 448. Field Botany. 4 Credits.

Intensive study of the regional flora; ecology and native uses; sight recognition of prominent species; field characteristics of principal plant families; identification using dichotomous keys. Lectures, field trips.

Offered summer session only.

Prereq: BI 213 or BI 283H.

BI 451. Invertebrate Zoology. 1-8 Credits.

Representative invertebrate groups with emphasis on marine forms; morphology, systematics, life history, and ecology. Lectures, laboratories, field trips. Offered at Oregon Institute of Marine Biology.

Prereq: BI 213 or BI 283H.

BI 452. Insect Biology. 4 Credits.

Anatomy, physiology, systematics, and behavior of insects. Insect societies. Lectures, laboratories, field trips. Offered summer session only.

Prereq: BI 213 or BI 283H.

BI 454. Estuarine Biology. 5 Credits.

The biological and physical factors regulating abundance, distribution, production, and biodiversity within estuaries. Includes field trips to marshes, tidal flats and exploration of estuarine habitats. Offered at Oregon Institute of Marine Biology.

Prereq: BI 213 or BI 283H.

BI 455. Marine Birds and Mammals. 1-6 Credits.

Principles of morphology, physiology, evolution, life history, and systematics as demonstrated through study of birds and mammals of the Oregon coast. Comparison of the fauna from the open sea to coastal waters. Lectures, laboratory, field trips. Offered at Oregon Institute of Marine Biology.

Prereq: BI 213 or BI 283H.

BI 457. Marine Biology: [Topic]. 1-8 Credits.

Content varies. Topics include comparative embryology, environmental issues, biology of fishes, and other subjects related to marine biology.

Lectures, laboratories, field trips. Repeatable when topic changes.

Offered at Oregon Institute of Marine Biology.

Prereq: BI 212 & BI 213 or BI 283H.

BI 458. Biological Oceanography. 5 Credits.

Examines patterns of biological productivity and controlling physical and chemical mechanisms in the various environments of the world's oceans. Lectures, laboratories, field trips. Offered at Oregon Institute of Marine Biology.

Prereq: BI 213 or BI 283H.

BI 461. Systems Neuroscience. 4 Credits.

Principles of organization of nervous systems with emphasis on vertebrate brain and spinal cord. Functional implications of synaptic organization and pattern of projections, and comparative aspects.

Lectures, discussions.

Prereq: BI 353 or BI 360 or equivalent.

BI 463. Cellular Neuroscience. 4 Credits.

Physiology of excitation, conduction, and synaptic transmission. Lectures, discussions.

Prereq: BI 360.

BI 464. Biological Clocks. 4 Credits.

Biological time keeping at ecological, evolutionary, behavioral, physiological, neurological, and molecular levels, with emphasis on daily and seasonal rhythmicity. Senior standing in Biology or Psychology required. Lectures, discussions.

Prereq: BI 320 or BI 322.

BI 466. Developmental Neurobiology. 4 Credits.

Mechanisms underlying development of the nervous system. The genesis of nerve cells; differentiation of neurons; synaptogenesis and neuronal specificity; plasticity, regeneration, and degeneration of nervous tissue.

Lectures, discussions.

Prereq: BI 320, BI 328.

BI 468. Amphibians and Reptiles of Oregon. 4 Credits.

Field identification and understanding of ecology, biogeography, and evolution of the common herpetofauna of four major physiographic regions of Oregon. Conservation biology issues addressed. Lectures, field trips. Offered summer session only.

Prereq: one year of college biology or BI 213 or BI 283H.

BI 471. Population Ecology. 4 Credits.

Theoretical, experimental and applied aspects of growth, structure, and regulation of natural populations; population estimation; demographic analysis; life-history theory. Lectures, discussions.

Prereq: MATH 247 or MATH 252; BI 370.

BI 472. Community Ecology. 4 Credits.

Quantitative and conceptual approaches to the study of biological communities. Biodiversity measurement. Effect of climate and climate change on ecosystem structure and function. Lectures, discussions.

Prereq: BI 370.

BI 474. Marine Ecology. 1-8 Credits.

Factors that influence the distribution, abundance, and diversity of marine organisms. Field emphasis on local intertidal and shallow-water communities. Offered at Oregon Institute of Marine Biology.

Prereq: BI 213 or BI 283H.

BI 476. Terrestrial Ecosystem Ecology. 4 Credits.

Flux of nutrients, carbon, water, and energy in the environment; interactions and consequences for organisms. Scale ranges from microbial to global. Lectures, discussions.

Prereq: BI 370.

BI 484. Molecular Evolution. 4 Credits.

General description of patterns of molecular variation within and between species, underlying mechanisms, and methods of analysis.

Prereq: BI 320 or BI 380.

BI 485. Techniques in Computational Neuroscience. 4 Credits.

Introduction to numerical techniques for modeling the nervous system from single neurons to neural networks. Lectures, laboratories.

Prereq: BI 360 or BI 461; MATH 247 or MATH 252 or higher.

BI 486. Population Genetics. 4 Credits.

Analysis of the genetic mechanisms of evolutionary change. Study of artificial and natural selection, mutation, migration, population structure, and genetic drift. Lectures.

Prereq: BI 380; MATH 247 or MATH 252.

BI 488. Evolutionary Processes. 4 Credits.

Critical discussion of the ecological and evolutionary genetic processes associated with adaptation in natural populations; draws from topics in population, quantitative, and molecular genetics, molecular evolution, and statistics.

Prereq: BI 380.

BI 493. Genomic Approaches and Analysis. 4 Credits.

Introduction to experimental methods and analytical techniques for studying biological questions on a genome-wide scale. Lectures, discussions.

Prereq: BI 320.

BI 503. Thesis. 1-16 Credits.

Repeatable.

BI 507. Seminar: [Topic]. 1-2 Credits.

Repeatable.

BI 508. Laboratory Projects: [Topic]. 1-16 Credits.

Special laboratory training in research methods. A fee may be charged for supplies and materials that become the property of the student.

BI 510. Experimental Course: [Topic]. 1-16 Credits.

Repeatable.

BI 521. Advanced Molecular Genetics Research Laboratory. 4 Credits.

Intensive multipart research project using fungus *Neurospora*; includes mutagenesis, genetic selection-screening, complementation testing, mapping, DNA purification, restriction analysis, polymerase chain reaction, Southern blotting. Five credits for BI 421, 4 credits for BI 521.

BI 522. Protein Toxins in Cell Biology. 4 Credits.

Mechanisms used by protein toxins to kill other organisms and how they have been used as molecular scalpels to dissect pathways in cell and neurobiology. Lectures, discussions.

BI 523. Human Molecular Genetics. 4 Credits.

Advanced topics in genetics that relate to human development and disease. The human genome, sex determination, X chromosome inactivation, chromosomal abnormalities, trinucleotide repeat expansions, cancer. Lectures, discussions.

BI 524. Advanced Molecular Genetics. 4 Credits.

Structure and function of chromosomes with emphasis on unsolved genetic problems such as genomic imprinting, position effects, and gene silencing. Lectures, discussions.

BI 525. Advanced Molecular Biology Research Laboratory. 4 Credits.

Provides an intensive, structured research experience that incorporates molecular biology, genetics, and genomic methodologies. Lectures, laboratories.

BI 526. Genetics of Cancer. 4 Credits.

Genetic regulation of cancer. Topics include oncogenes and tumor suppressor genes, signal transduction pathways, genetic animal models, and rationale treatment design. Lectures, discussions.

BI 527. Molecular Genetics of Human Disease. 4 Credits.

Advanced discussions of heritable diseases from single-gene mutations such as cystic fibrosis to complex multigenetic diseases such as autism and schizophrenia. Lectures, discussions.

BI 528. Developmental Genetics. 4 Credits.

Genetic regulation of development, including investigations of molecular mechanisms and studies of developmental mutants. Topics include molecular biology of eukaryotic chromosomes, genetic mosaics, and models of gene regulation. Lectures, discussions.

BI 532. Mycology. 5 Credits.

Physiology, ecology, structure, and classification of fungi; emphasis on structural and physiological adaptations to saprophytic, parasitic, and symbiotic modes of existence. Lectures, laboratories.

BI 533. Bacterial-Host Interactions. 4 Credits.

Examines spectrum of interactions between bacteria and animals, from pathogenesis to symbiosis, focusing on the molecular and cellular bases of these interactions. Lectures, discussions.

BI 542. Systematic Botany. 5 Credits.

Principles of plant classification with emphasis on flowering plants, introduction to taxonomic theory and methods of biosystematics, collection and identification procedures, recognition of common families in native flora. Lectures, laboratories, field trips.

BI 548. Field Botany. 4 Credits.

Intensive study of the regional flora; ecology and native uses; sight recognition of prominent species; field characteristics of principal plant families; identification using dichotomous keys. Lectures, field trips. Offered summer session only.

BI 551. Invertebrate Zoology. 1-8 Credits.

Representative invertebrate groups with emphasis on marine forms; morphology, systematics, life history, and ecology. Lectures, laboratories, field trips. Offered at Oregon Institute of Marine Biology.

BI 552. Insect Biology. 4 Credits.

Anatomy, physiology, systematics, and behavior of insects. Insect societies. Lectures, laboratories, field trips. Offered summer session only.

BI 554. Estuarine Biology. 5 Credits.

The biological and physical factors regulating abundance, distribution, production, and biodiversity within estuaries. Includes field trips to marshes, tidal flats and exploration of estuarine habitats. Offered at Oregon Institute of Marine Biology.

BI 555. Marine Birds and Mammals. 1-6 Credits.

Principles of morphology, physiology, evolution, life history, and systematics as demonstrated through study of birds and mammals of the Oregon coast. Comparison of the fauna from the open sea to coastal waters. Lectures, laboratory, field trips. Offered at Oregon Institute of Marine Biology.

BI 557. Marine Biology: [Topic]. 1-8 Credits.

Content varies. Topics include comparative embryology, environmental issues, biology of fishes, and other subjects related to marine biology. Lectures, laboratories, field trips. Repeatable when topic changes. Offered at Oregon Institute of Marine Biology.

BI 558. Biological Oceanography. 5 Credits.

Examines patterns of biological productivity and controlling physical and chemical mechanisms in the various environments of the world's oceans. Lectures, laboratories, field trips. Offered at Oregon Institute of Marine Biology.

BI 561. Systems Neuroscience. 4 Credits.

Principles of organization of nervous systems with emphasis on vertebrate brain and spinal cord. Functional implications of synaptic organization and pattern of projections, and comparative aspects. Lectures, discussions.

BI 563. Cellular Neuroscience. 4 Credits.

Physiology of excitation, conduction, and synaptic transmission. Lectures, discussions.

BI 564. Biological Clocks. 4 Credits.

Biological time keeping at ecological, evolutionary, behavioral, physiological, neurological, and molecular levels, with emphasis on daily and seasonal rhythmicity. Lectures, discussions.

BI 566. Developmental Neurobiology. 4 Credits.

Mechanisms underlying development of the nervous system. The genesis of nerve cells; differentiation of neurons; synaptogenesis and neuronal specificity; plasticity, regeneration, and degeneration of nervous tissue. Lectures, discussions.

BI 568. Amphibians and Reptiles of Oregon. 4 Credits.

Field identification and understanding of ecology, biogeography, and evolution of the common herpetofauna of four major physiographic regions of Oregon. Conservation biology issues addressed. Lectures, field trips. Offered summer session only.

BI 571. Population Ecology. 4 Credits.

Theoretical, experimental and applied aspects of growth, structure, and regulation of natural populations; population estimation; demographic analysis; life-history theory. Lectures, discussions.

BI 572. Community Ecology. 4 Credits.

Quantitative and conceptual approaches to the study of biological communities. Biodiversity measurement. Effect of climate and climate change on ecosystem structure and function. Lectures, discussions.

BI 574. Marine Ecology. 1-8 Credits.

Factors that influence the distribution, abundance, and diversity of marine organisms. Field emphasis on local intertidal and shallow-water communities. Offered at Oregon Institute of Marine Biology.

BI 576. Terrestrial Ecosystem Ecology. 4 Credits.

Flux of nutrients, carbon, water, and energy in the environment; interactions and consequences for organisms. Scale ranges from microbial to global. Lectures, discussions.

BI 584. Molecular Evolution. 4 Credits.

General description of patterns of molecular variation within and between species, underlying mechanisms, and methods of analysis.

BI 585. Techniques in Computational Neuroscience. 4 Credits.

Introduction to numerical techniques for modeling the nervous system from single neurons to neural networks. Lectures, laboratories.

BI 586. Population Genetics. 4 Credits.

Analysis of the genetic mechanisms of evolutionary change. Study of artificial and natural selection, mutation, migration, population structure, and genetic drift. Lectures.

BI 588. Evolutionary Processes. 4 Credits.

Critical discussion of the ecological and evolutionary genetic processes associated with adaptation in natural populations; draws from topics in population, quantitative, and molecular genetics, molecular evolution, and statistics.

BI 593. Genomic Approaches and Analysis. 4 Credits.

Introduction to experimental methods and analytical techniques for studying biological questions on a genome-wide scale. Lectures, discussions.

BI 601. Research: [Topic]. 1-16 Credits.

Repeatable.

BI 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

BI 603. Dissertation. 1-16 Credits.

Repeatable.

BI 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

BI 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

BI 607. Seminar: [Topic]. 1-3 Credits.

Topics may include neurobiology, developmental biology, ecology colloquium, genetics, molecular biology, and neuroscience. Repeatable.

BI 608. Special Topics: [Topic]. 1-5 Credits.

Lecture course devoted to advanced topics that reflect instructor's research interests. Repeatable.

BI 609. Practicum: [Topic]. 1-3 Credits.

Repeatable.

BI 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

BI 620. Molecular Genetics. 4 Credits.

Use of modern genetic techniques to analyze gene function. Illustrates the use of model organisms including yeast, worms, flies, and mice. Covers forward genetics (function-driven gene discovery) and reverse genetics.

BI 621. Computational Methods in Genomic Analysis. 4 Credits.

An introduction to Unix shell, Python, and R programming skills for analysis of biological data sets, specifically focusing on high-throughput sequencing data. Series with BI 622, BI 623, BI 624.

BI 622. Genomics Techniques. 4 Credits.

Students will be introduced to various genomics laboratory techniques, as well as trained in oral and written scientific communication. Series with BI 621, BI 623, BI 624.

BI 623. Advanced Topics in Genomics Analysis. 4 Credits.

Exposure to a variety of topics in genomics analysis including phylogenetics, transcriptome assembly, transcript quantification, and microbial community analysis. Series with BI 621, BI 622, BI 624.

BI 624. Genomics Research Lab. 4 Credits.

Group research on high-throughput sequencing data. Series with BI 621, BI 622, BI 623.

Chemistry and Biochemistry

David R. Tyler, Department Head

541-346-4603

541-346-4643 fax

91 Klamath Hall

The Department of Chemistry and Biochemistry offers bachelor of arts and bachelor of science degrees with majors in chemistry or biochemistry. The department enjoys a strong national reputation.

The curriculum in chemistry provides broad knowledge of the field as a part of the liberal education offered by the College of Arts and Sciences. Chemistry course work is a sound foundation for students interested in advanced work in chemistry or related sciences, particularly such fields as biochemistry, geochemistry, materials science, and molecular biology.

Faculty

Shannon W. Boettcher, associate professor (inorganic, materials science). BA, 2003, Oregon; PhD, 2008, California, Santa Barbara. (2010)

Carl Brozek, assistant professor (physical inorganic, materials science). SB, 2010, Chicago; PhD, 2015, Massachusetts Institute of Technology. (2018)

Jeffrey A. Cina, professor (physical). BS, 1979, Wisconsin, Madison; PhD, 1985, California, Berkeley. (1995)

Amanda Cook, assistant professor (organic, inorganic materials science). BS, 2010, California State, Fullerton; PhD, 2015, Michigan, Ann Arbor. (2018)

Victoria J. De Rose, professor (bioinorganic). BA, 1983, Chicago; PhD, 1990, California, Berkeley. (2006)

Kenneth M. Doxsee, professor (organic, materials science). BS, 1978, MS, 1979, Stanford; PhD, 1983, California Institute of Technology. (1989)

Deborah B. Exton, senior instructor. BS, 1987, Metropolitan State College of Denver; PhD, 1992, Denver. (1993)

Marina G. Guenza, professor (physical). Laurea, 1985, Università degli Studi di Genova; PhD, 1989, degree granted by consortium of universities of Torino, Genova, and Pavia. (1998)

Julie A. Haack, senior instructor. BS, 1986, Oregon; PhD, 1991, Utah. (2000)

Michael M. Haley, Richard M. and Patricia H. Noyes Professor in Chemistry (organic, materials science). BA, 1987, PhD, 1991, Rice. (1993)

Scott Hansen, assistant professor (biochemistry, molecular biology and biophysics). BS, 2004, California, Davis; PhD, 2012, California, San Francisco. (2017)

Michael Harms, associate professor (biochemistry, molecular biology and biophysics). BS, 2004, Oregon State; PhD, 2008, Johns Hopkins. (2013)

Diane K. Hawley, professor (biochemistry). BA, 1976, Kansas; PhD, 1982, Harvard. (1986)

Christopher Hendon, assistant professor (computational materials). BSc, 2011, Monash; PhD, 2015, Bath. (2018)

James E. Hutchison, professor (organic, materials science); Lokey-Harrington Chair in the Department of Chemistry. BS, 1986, Oregon; PhD, 1991, Stanford. (1994)

Ramesh Jasti, associate professor (organic, inorganic, supramolecular). BS, 1998, North Carolina, Chapel Hill; PhD., 2006, California, Irvine. (2014)

Darren W. Johnson, Bradshaw and Holzapfel Research Professor in Transformational Science and Mathematics (organic). BS, 1996, Texas, Austin; PhD, 2000, California, Berkeley. (2003)

David C. Johnson, professor (inorganic, materials science); Rosaria P. Haugland Foundation Chair in Pure and Applied Chemistry. BA, 1978, Rutgers; MS, 1980, PhD, 1983, Cornell. (1986)

Michael E. Kellman, professor (physical). BS, 1971, California, Berkeley; PhD, 1977, Chicago. (1989)

Michael Koscho, senior instructor (organic). BS, 1993, Purdue; PhD, 1999, Illinois, Urbana-Champaign. (2006)

Mark Lonergan, professor (physical, materials science); director, Materials Science Institute. BS, 1990, Oregon; PhD, 1994, Northwestern. (1996)

Andrew H. Marcus, professor (physical, materials science). BA, 1987, California, San Diego; PhD, 1993, Stanford. (1996)

George V. Nazin, associate professor (physical). MS, 1999, Moscow Institute of Physics and Technology; PhD, 2007, California, Irvine. (2010)

Brad J. Nolen, associate professor (biochemistry). BA, 1997, Missouri State; PhD, 2003, California, San Diego. (2008)

Catherine J. Page, associate professor (inorganic, materials science). BA, 1980, Oberlin; PhD, 1984, Cornell. (1986)

Michael D. Pluth, associate professor (organic). BS, 2004, Oregon; PhD, 2008, California, Berkeley. (2011)

Kenneth E. Prehoda, professor (biochemistry). BA, 1991, California State, Sacramento; PhD, 1997, Wisconsin, Madison. (2001)

James Prell, assistant professor (physical). BA, 2005, Washington (St. Louis); PhD, 2011, California, Berkeley. (2014)

Geraldine L. Richmond, professor (physical, materials science); Presidential Chair. BS, 1975, Kansas State; PhD, 1980, California, Berkeley. (1985)

Tom H. Stevens, Philip H. Knight Professor (biochemistry). BA, 1974, MS, 1976, San Francisco State; PhD, 1980, California Institute of Technology. (1982)

David R. "Randy" Sullivan, senior instructor. BS, 1982, MS, 1989, North Texas. (2001)

David R. Tyler, Charles J. and M. Monteith Jacobs Professor in Chemistry (inorganic, materials science). BS, 1975, Purdue; PhD, 1979, California Institute of Technology. (1985)

Julia Widom, assistant professor (physical, biochemistry). BA, 2009, Northwestern; PhD, 2013, Oregon. (2018)

Cathy Wong, assistant professor (physical). BSc, 2004, McMaster; PhD, 2011, Toronto. (2015)

Emeriti

Bruce P. Branchaud, professor emeritus. BS, 1976, Massachusetts; MA, 1981, Dartmouth College; PhD, 1981, Harvard. (1983)

Frederick W. Dahlquist, professor emeritus. BA, 1964, Wabash; PhD, 1969, California Institute of Technology. (1971)

Thomas R. Dyke, professor emeritus. BA, 1966, Wooster; PhD, 1972, Harvard. (1974)

O. Hayes Griffith, professor emeritus. AB, 1960, California, Riverside; PhD, 1964, California Institute of Technology. (1965)

John F. W. Keana, professor emeritus. BA, 1961, Kalamazoo; PhD, 1965, Stanford. (1965)

James W. Long, senior instructor emeritus. BS, 1965, Washington (Seattle); PhD, 1969, California, Berkeley. (1978)

Robert M. Mazo, professor emeritus. AB, 1952, Harvard; MS, 1953, PhD, 1955, Yale. (1962)

Peter H. von Hippel, professor emeritus. BS, 1952, MS, 1953, PhD, 1955, Massachusetts Institute of Technology. (1967)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Biochemistry Minor

Undergraduate Studies

One strength of the program is the opportunity undergraduates have to participate in the activities of a dynamic research group that considers problems extending well beyond textbook instruction. Major and nonmajor students alike can enjoy this experience of scientific inquiry. One to two years of preparatory course work typically precede the research experience. The department enrolls twenty to thirty undergraduate students each term in CH 401 Research: [Topic].

Preparation

The high school preparation of a prospective chemistry major should include chemistry, physics, and a minimum of three years of mathematics. Those interested in biochemistry would also profit from biology courses in high school.

Two-year college students planning to transfer to the university to major in chemistry should prepare by taking courses equivalent to those outlined for the freshman and sophomore years.

The department offers two general-chemistry sequences, both of which lead to organic chemistry, the second-year sequence in chemistry.

Code	Title	Credits
General Chemistry Sequence Options		
CH 221 & CH 222 & CH 223	General Chemistry I and General Chemistry II and General Chemistry III	12
CH 224H & CH 225H & CH 226H	Advanced General Chemistry I and Advanced General Chemistry II and Advanced General Chemistry III	12

Each sequence covers the fundamentals of chemistry but uses a different approach and a textbook tailored to suit a student's background in high school chemistry and mathematics.

Careers

Career opportunities for chemists are available in education, government, and industry (see the annual October issue of *Chemical and Engineering News*). A bachelor's degree in chemistry provides a good background for advanced study in such fields as

- atmospheric science
- biochemistry
- biology
- environmental sciences
- forensic science
- geochemistry
- geological sciences
- pharmacy
- pharmacology
- physiology
- materials science
- medicine
- medicinal chemistry
- metallurgy
- molecular biology

- neuroscience
- oceanography

Chemists also find jobs in science writing, public relations, personnel, plant production, sales, management, safety management, market research, patent law, and financial analysis. The alumni newsletter, *Chemistry News*, has examples of careers UO majors have chosen. Follow the links on the department's website.

Chemistry Major

The program described below is the recommended curriculum for chemistry majors. It includes courses in chemistry and related fields. Courses taken to satisfy major requirements must be passed with grades of C– or better. Variations in courses and order may be worked out in consultation with an advisor. Advisors can also provide lists of substitute courses and courses that are recommended but not required.

Students are encouraged to participate in CH 401 Research: [Topic].

Biochemistry Major

Many undergraduate students who are interested in advanced study using molecular approaches to biological problems (e.g., biochemistry, molecular biology, neurochemistry, physical biochemistry, or perhaps medical research) may want to include courses in biologically based subjects. For these students, the Department of Chemistry offers a biochemistry major.

Courses taken to satisfy major requirements must be passed with grades of C– or better. Variations in courses and order may be worked out in consultation with an advisor.

Students who plan to attend graduate school should include research in their advanced work. If chemical research is included as part of the advanced work, at least 6 credits of CH 401 Research: [Topic] must be completed. Students who plan to apply to medical schools should investigate the need for a physics laboratory course that is not included in this curriculum.

Honors Program

The criteria used for the selection of students who graduate with departmental honors in chemistry or biochemistry are as follows:

1. Grade point average (GPA) of at least 3.50 in all graded courses
2. Suitable accomplishment in undergraduate chemical or related research. Specifically, the student must pursue a research problem for one academic year or longer and be recommended as worthy of honors by the faculty supervisor. Positive accomplishment and publishable results are expected but not required
3. Endorsement for a major with honors by a member of the university faculty
4. Completion of all course requirements for the BS degree in chemistry (waivers or substitutions allowed with approval)

- mathematics
- physics

Kindergarten through Secondary Teaching Careers

Students who complete the BA or BS degree with a major in chemistry or biochemistry are eligible to apply for the College of Education's fifth-year licensure program in middle-secondary teaching or the fifth-year licensure program to become an elementary teacher. More information is available from the department's K-12 education advisors, Catherine Page and Julie Haack; see also the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- **Chemistry**
- **Biochemistry**

Chemistry Minor

A minor in chemistry may be designed from course work in general chemistry, including the laboratory sequence, and at least four additional upper-division courses. University requirements for the minor include a total of 24 credits in chemistry, 15 of which must be in upper-division courses and 12 of which must be completed at the University of Oregon. All courses for the minor must be completed with grades of C- or better. Credits earned in CH 407 Seminar: [Topic], CH 405 Reading and Conference: [Topic], and CH 409 Special Laboratory Problems may not be applied as required course work for the minor.

Biochemistry Minor

Code	Title	Credits
Lower Division		
General chemistry sequence		12
General chemistry laboratories		6
Upper Division		
CH 331 & CH 335	Organic Chemistry I and Organic Chemistry II	8
CH 461 & CH 462	Biochemistry and Biochemistry	8
CH 463 or CH 467	Biochemistry Biochemistry Laboratory	4
Total Credits		38

Other courses may be submitted for consideration and approval by the department. At least 12 credits for the biochemistry minor must be completed at the University of Oregon. All courses applied to the minor must be completed with grades of C- or better. Credits earned in CH 407 Seminar: [Topic], CH 405 Reading and Conference: [Topic], and CH 409 Special Laboratory Problems may not be applied to required course work for the biochemistry minor.

Academic Minors for Chemistry Majors

A carefully chosen minor can complement and enhance undergraduate study in chemistry. Following is a selection of academic minors that chemistry majors might want to consider:

- biology
- business administration
- computer and information science
- economics
- environmental studies
- geological sciences
- human physiology

Bachelor of Arts in Chemistry

Course	Title	Credits	Milestones	CH 221 or CH 224H	General Chemistry I or Advanced General Chemistry I	Students have two options for beginning the chemistry major: those who are ready to begin calculus should start with CH 224H; those who are ready to begin MATH 112 should begin with CH 221; those without adequate preparation may begin with CH 111 and will be able to begin the core chemistry sequence and MATH 112 winter term. If the latter, you may have to take summer chemistry courses to finish the degree in four years.	4	
First Year								
Fall								
MATH 112 or MATH 251	Elementary Functions or Calculus I		If the student's mathematics placement test score does not place them in MATH 251, the student should begin with the course they are placed in, then take one math class each term until they finish all required math courses. Students are strongly encouraged to begin CH 221 with MATH 112. Students in MATH 111 are encouraged to begin in CH 111. Course must be graded and passed with a B- or better for eligibility to take BI 281H.	4				
				CH 227 or CH 237	General Chemistry Laboratory or Advanced General Chemistry Laboratory		2	
							Credits	14
Winter								
WR 121	College Composition I			WR 123 or WR 122	College Composition III or College Composition II		4	

CH 222 or CH 225H	General Chemistry II or Advanced General Chemistry II	Meet with an advisor to prepare a four- year plan	4
CH 228 or CH 226H	General Chemistry Laboratory or Advanced General Chemistry III		2
MATH 251 or MATH 252	Calculus I or Calculus II	Take one mathematics course each term until all required math courses are completed	4
Credits			14
Spring			
CH 223 or CH 226H	General Chemistry III or Advanced General Chemistry III	Meet with an advisor if interested in undergraduate research. All majors take the American Chemical Society Exam at the end of the academic year. Course must be graded and passed with a B- or better for eligibility to take BI 281H.	4
CH 229 or CH 239	General Chemistry Laboratory or Advanced General Chemistry Laboratory		2

Graduate Studies

Graduate work in chemistry is a research-oriented PhD program with options in

- biochemistry and molecular biology
- biophysics

- bioorganic and medicinal chemistry
- environmental chemistry
- inorganic and organometallic chemistry
- materials chemistry
- optics and spectroscopy
- organic synthesis
- polymer chemistry
- physical chemistry
- solid-state chemistry
- statistical mechanics of liquids and complex fluids
- surfaces and interfaces
- theoretical chemical physics

Master of science (MS) and master of arts (MA) degrees are also offered.

A strength of the University of Oregon program is its interdisciplinary approach to research and teaching. Many important advances in chemistry occur at the junctions of classically defined divisions of science. Collaborative interaction between these divisions is fostered through interdisciplinary research institutes. Chemical scientists may be interested in the Institute of Molecular Biology, the Institute of Theoretical Science, the Materials Science Institute, the Oregon Center for Optics, and the programs in cell biology and in molecular synthesis, structure, and dynamics.

First-year students are offered financial assistance through graduate employee (GE) opportunities. Research assistantships are typically available for students with advanced standing. These research appointments are funded through grants to the university by federal agencies and private (industrial) sources for support of the basic research programs in the department. Students are selected for these positions based on their interest in a particular research area and by mutual agreement of the student and the faculty member directing the work.

An illustrated publication, *University of Oregon Doctoral Program in Chemistry*, may be requested from the department. The booklet presents information about the program, facilities, financial support, faculty members and their individual research interests, housing, and the local environment. People who request the booklet also receive information about admission and application forms for admission and GE opportunities.

Biochemistry, Molecular Biology, Cell Biology

One of the most active areas of research is the study of the molecular bases of cell function, including synthesis of macromolecules, regulation of gene expression, development, cell movement, and the structure and function of biological membranes. Research in these areas has been fostered by close collaboration among biologists, chemists, and physicists. The interdisciplinary nature of these programs has been greatly strengthened by the Institute of Molecular Biology and the program in cell biology. Eight members of the chemistry department are affiliated with these programs. Entering graduate students are in an excellent position to take advantage of the molecular-oriented avenues to study biological problems.

Biophysical Chemistry

Biophysical chemistry provides close collaboration and educational interaction among faculty members and students. Research groups that are developing and applying physical methods work closely with

molecular and cellular biologists, neurobiologists, biochemists, and synthetic organic chemists. Most of the research programs in biophysical chemistry are interdisciplinary.

Another area of general interest is the nature of the excited electronic states of biopolymer components. This includes the use of the optical properties of biopolymers, such as their circular dichroism, as a probe of their conformational state; the relationship of excited state conformation changes to their resonance Raman spectra; and a fundamental interest in the nature of excited states.

Materials Science

The discipline of materials science seeks to understand the structures, properties, and structure-property relationships of condensed phase materials. It is by nature interdisciplinary, combining expertise from the fields of chemistry, physics, geology, and molecular biology. Most areas of chemistry can make an important contribution to materials science in the synthesis and characterization of various materials. Here the word materials generally means bulk crystalline solids but also includes low-dimensional materials such as thin solid films or nanoscopic "wires" as well as amorphous solids and some aspects of liquids. Much of the excitement of the research in this area derives from the discovery and the improved understanding of new materials that have potential technological applications.

The Materials Science Institute was created to foster collaboration among the materials-oriented research groups at the University of Oregon. Members of the institute are active in the study of the structure, reactivity, and thermodynamics of materials in addition to the characterization of their electronic, magnetic, and optical properties. The chemistry and physics departments, dominant members of the institute, offer courses and seminars on the chemistry and physics of materials to foster the educational and research aspects of materials science. The list of active research topics includes the application of novel synthetic strategies toward the preparation of metastable phases (including the use of thin-film superlattice composites, sol-gel synthesis, self-assembly, and electron beam lithography), ultra-high vacuum surface science, laser-induced dynamics at surfaces, nonlinear optics of interfaces, characterization of electronic materials and devices, studies on the properties of amorphous and glassy materials, quantum size effects and fundamental limits of microelectronic devices, scanning force and scanning tunneling microscopy of modified surfaces and biological molecules, and electron transport across protein assemblies and biotechnological materials. Sharing of facilities and expertise among the various research groups is an important and valued aspect of the Materials Science Institute. Collaboration between institute members and industrial and national research laboratories is also an important dimension of the program. See also Materials Science Institute in the **Research Institutes and Centers** section of this catalog.

Organic, Bioorganic, Inorganic, Organometallic, and Materials Chemistry

The synthesis of new chemical substances and the study of their fundamental chemical and physical properties is at the heart of organic, bioorganic, organometallic, inorganic, and materials chemistry. Research and teaching in these traditionally distinct subareas is unified through a single, cohesive organic-inorganic area in the chemistry department.

Undergraduate students, graduate students, and postdoctoral researchers in organic-inorganic chemistry enjoy an especially broad education emphasizing the fundamental aspects of chemical synthesis, structural characterization, and mechanisms of chemical reactions

and processes. Formal course work is organized around these interdisciplinary themes. Many research projects are interdisciplinary.

Weekly organic-inorganic seminars cover recent advances in organic, organometallic, inorganic, and materials research. Of foremost importance is the contiguous location of research laboratories. This proximity results in an open and active atmosphere that encourages spontaneous discussions of day-to-day research activities and problems, providing a chemical education unsurpassed by any textbook or formal course.

Organic-inorganic researchers have direct access to state-of-the-art instrumentation in the shared organic-inorganic instrumentation facility adjoining the research laboratories. Most faculty members in this area have varied research interests and expertise. Collaboration with researchers working in physics, materials science, biochemistry, and medicinal chemistry enhances the program.

Physical Chemistry

Physical chemistry focuses on understanding the physical basis of chemical phenomena. This goal is pursued through the concerted efforts of experimentalists and theorists. While experimentalists design and carry out laboratory investigations of chemical systems, theorists conceive and develop theoretical tools to explain and predict system properties. Ultimately, physical chemistry is about understanding the mysteries of chemical phenomena at a deep, fundamental level. The discipline draws from and contributes to many areas of chemistry, physics, biology, materials science, engineering, and mathematics.

At the University of Oregon, research in physical chemistry focuses on a variety of topics.

Experimental spectroscopy includes pulsed laser techniques to probe the molecular structure at wet interfaces; the development of new optical techniques to study the motions of intracellular species and macromolecules in liquids; and novel ultrafast, nonlinear spectroscopic methods to study the dynamics of excited states in molecules.

On the theoretical front, topics of interest include dynamics of highly excited molecules using quantum and semiclassical techniques, the development of a formal description of wave-packet interferometry, elucidation of molecular structure through theoretical studies of electronic potential energy surfaces, and theoretical statistical mechanics and simulation.

Much work at Oregon combines frontier experimental and theoretical approaches in tandem on particular topics. Theoretical and experimental studies in statistical mechanics concentrate on soft condensed matter and complex fluids. Another focus is quantum control using coherent and ultrafast laser pulses, pursued along both experimental and theoretical lines.

The physics of chemical systems at interfaces includes spectroscopic studies of organic, inorganic, and biomolecules at surfaces and interfaces as well as electrochemical and electrical investigations of charge transfer at molecular or nanoparticle-based semiconducting interfaces.

The research on semiconductor interfaces aims at identifying and controlling novel systems that enhance or mimic the behavior of conventional semiconductor interfaces.

Industrial Internships for Master's Degrees in Chemistry

These internships, sponsored by the Materials Science Institute, are described in the Research Centers and Institutes (p. 955) section of this catalog. Information and application materials are available through the institute.

Courses

CH 111. Introduction to Chemical Principles. 4 Credits.

Introduction to modern chemistry with emphasis on problem-solving skills and critical thinking. Fundamental mathematical techniques and skills are incorporated to illustrate the quantitative aspects of chemistry.

Prereq: Satisfactory placement test score for MATH 111; Coreq: MATH 111.

CH 113. The Chemistry of Sustainability. 4 Credits.

Illustrates how chemistry provides innovative materials, processes, and consumer products that support sustainable solutions related to energy utilization, global warming and pollution prevention.

Prereq: MATH 101 or higher; high school chemistry.

CH 114. Green Product Design. 4 Credits.

Illustrates how green chemistry, product design, advertising, and sustainable business practices are used to design greener consumer products and accelerate their adoption in the market.

CH 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

CH 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

CH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CH 221. General Chemistry I. 4 Credits.

First term of the three-term university chemistry sequence: components of matter, quantitative relationships, atomic structure, thermochemistry, and major classes of chemical reactions of the elements. Lectures. Students cannot receive credit for both CH 221 and CH 224H.

Prereq: C- or better in MATH 111. Co-req: MATH 112. Concurrent CH 227 or CH 237 recommended.

CH 222. General Chemistry II. 4 Credits.

Second term of the three-term university chemistry sequence: molecular structure, chemical bonding, gases and kinetic molecular theory, intermolecular forces, solutions and kinetics. Lectures. Students cannot receive credit for both CH 222 and CH 225H.

Prereq: CH 221 or CH 224H; MATH 111 with grades of C- or better. coreq: MATH 112. Concurrent CH 228 or CH 238 recommended.

CH 223. General Chemistry III. 4 Credits.

Third term of the three-term university chemistry sequence: thermodynamics, equilibrium, electrochemistry, nuclear chemistry. Lectures. Students cannot receive credit for both CH 223 and CH 226H.

Prereq: CH 222 or CH 225H; MATH 112 with grades of C- or better. Concurrent CH 229 or CH 239 recommended.

CH 224H. Advanced General Chemistry I. 4 Credits.

First-year university chemistry for students with excellent backgrounds in high school chemistry, physics, and mathematics. Chemical structure, reactions, stoichiometry, thermochemistry, and an introduction to quantum chemistry. Students cannot receive credit for both CH 221 and CH 224H.

Prereq: high school chemistry; MATH 112 with a grade of C-. coreq: one from MATH 241, MATH 246, MATH 251, MATH 261. Concurrent with CH 237 recommended.

CH 225H. Advanced General Chemistry II. 4 Credits.

First-year university chemistry for students with excellent backgrounds in high school chemistry, physics, and mathematics. Chemical bonding, states of matter, solutions, kinetics, and nuclear chemistry. Students cannot receive credit for both CH 222 and CH 225H.

Prereq: CH 221 or CH 224H; one from MATH 241, MATH 246, MATH 251, MATH 261 with grades of C- or better. coreq: one from MATH 242, MATH 247, MATH 252, MATH 262. Concurrent CH 238 recommended.

CH 226H. Advanced General Chemistry III. 4 Credits.

First-year university chemistry for students with excellent backgrounds in high school chemistry, physics, and mathematics. Chemical equilibrium, acid-base chemistry, thermodynamics, and electrochemistry. Students cannot receive credit for both CH 223 and CH 226H.

Prereq: CH 222 or CH 225H; one from MATH 242, MATH 247, MATH 252, MATH 262 with grades of C- or better. coreq: one from MATH 243, MATH 247, MATH 253, MATH 263. Concurrent CH 239 recommended.

CH 227. General Chemistry Laboratory. 2 Credits.

First term of the three-term laboratory sequence: basic laboratory skills, quantitative relationships, qualitative analysis, calorimetry.

Prereq: MATH 111. Co-req: MATH 112. Pre- or coreq: CH 221 or 224H.

CH 228. General Chemistry Laboratory. 2 Credits.

Second term of the three-term laboratory sequence: graphical analysis, spectroscopy, spectrophotometry, gas laws, chromatography, kinetics.

Prereq: CH 227 or CH 237; MATH 111 with grades of C- or better. coreq: CH 222 or 225H; MATH 112.

CH 229. General Chemistry Laboratory. 2 Credits.

Third term of the three-term laboratory sequence: synthesis, equilibrium, acids and bases, volumetric analyses, electrochemistry, nuclear chemistry.

Prereq: CH 228 or CH 238; MATH 112 with grades of C- or better. coreq: CH 223 or CH 226H.

CH 237. Advanced General Chemistry Laboratory. 2 Credits.

First-year university laboratory course for students with a strong high school laboratory experience. Projects in analytical and inorganic chemistry emphasize the use of quantitative glassware, gravimetric and volumetric analysis, acid-base and precipitation reactions.

Prereq: MATH 112 with a grade of C- or better. coreq: CH 221 or CH 224H.

CH 238. Advanced General Chemistry Laboratory. 2 Credits.

Projects in inorganic and biochemistry with a focus on absorption spectroscopy, synthesis of coordination compounds, and measuring initial rates of reaction.

Prereq: CH 227 or CH 237; one from MATH 241, MATH 246, MATH 251, MATH 261 with grades of C- or better. coreq: CH 222 or CH 225H.

CH 239. Advanced General Chemistry Laboratory. 2 Credits.

Projects in biochemistry and inorganic chemistry involving enzymology, mechanisms of reactions, kinetics, and visible absorption spectroscopy.

Prereq: CH 228 or CH 238; one from MATH 242, MATH 247, MATH 252, MATH 262 with grades of C- or better. coreq: CH 223 or CH 226H.

CH 331. Organic Chemistry I. 4 Credits.

Structure, properties, and bonding of organic molecules.
Prereq: CH 223 or 226H. Concurrent CH 337 recommended.

CH 335. Organic Chemistry II. 4 Credits.

Reactions and mechanisms of organic chemistry.
Prereq: CH 331 or 341. Concurrent CH 338 recommended.

CH 336. Organic Chemistry III. 4 Credits.

Organic chemistry of biomolecules with a focus on chemical aspects.
Prereq: CH 335 or 342. Concurrent CH 339 recommended.

CH 337. Organic Chemistry Laboratory. 3 Credits.

Principles and techniques of laboratory practice in organic chemistry.
Prereq: CH 229 or 239; pre- or coreq: CH 331.

CH 338. Organic Chemistry Laboratory. 3 Credits.

Principles and techniques of laboratory practice in organic chemistry.
Prereq: CH 331 or 341, 337; pre- or coreq: CH 335.

CH 341. Majors Track Organic Chemistry I. 4 Credits.

Structure, properties, and bonding of organic molecules. Provides a rigorous foundation appropriate for chemistry and biochemistry majors as they become chemical practitioners. Sequence with CH 342, 343.
Prereq: CH 223 or CH 226H. Concurrent CH 337 recommended.

CH 342. Majors Track Organic Chemistry II. 4 Credits.

Focuses on mechanisms and reactions of common organic functional groups. Sequence with CH 341, 343.
Prereq: CH 331 (with grade of B- or better) or CH 341. Concurrent CH 348 recommended.

CH 343. Majors Track Organic Chemistry III. 4 Credits.

Incorporates topics from the recent chemistry literature. Sequence with CH 341, 342.
Prereq: CH 335 (with grade of B- or better) or CH 342. Concurrent CH 349 recommended.

CH 348. Organic Chemistry Laboratory for Majors. 4 Credits.

Problem solving in the organic chemistry laboratory. Sequence with CH 337, 349.
Prereq: CH 337; CH 331 or 341; coreq: CH 342.

CH 349. Organic Chemistry Lab for Majors. 4 Credits.

Organic chemistry laboratory projects. Two-dimensional nuclear magnetic resonance techniques. Sequence with CH 337, 348.
Prereq: CH 348; coreq: CH 343.

CH 360. Physiological Biochemistry. 4 Credits.

For preprofessional health science students. Topics include protein structure and function, enzyme mechanisms, central metabolism and bioenergetics, integration and regulation of metabolism by hormone action. Students cannot receive credit for both CH 360 and 462.
Prereq: CH 336 or 343; BI 214 or 282H recommended.

CH 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CH 401. Research: [Topic]. 1-21 Credits.

Repeatable. Introduction to methods of chemical investigation. For advanced undergraduates by arrangement with individual faculty members.

CH 403. Thesis. 1-12 Credits.

Repeatable. Open to students eligible to work for a bachelor's degree with honors in chemistry or biochemistry.
Prereq: Honors majors.

CH 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

CH 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

CH 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Biochemistry seminar for undergraduates who have completed or are enrolled in CH 461, 462, 463. No graduate credit.

CH 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

CH 409. Special Laboratory Problems. 1-21 Credits.

Repeatable. Nonresearch-oriented laboratory instruction and off-campus research and laboratory experience.

CH 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CH 411. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to chemical thermodynamics.
Prereq: two years of college chemistry (except for physics majors), PHYS 201, 202, 203; MATH 253; MATH 256, 281, 282 strongly recommended.

CH 412. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to statistical mechanics and rate processes.
Prereq: two years of college chemistry (except for physics majors); CH 411; PHYS 201, 202, 203; MATH 253; MATH 256, 281, 282 strongly recommended.

CH 413. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to quantum chemistry.
Prereq: two years of college chemistry (except for physics majors), PHYS 201, 202, 203; MATH 253; MATH 256, 281, 282 strongly recommended.

CH 417. Physical Chemistry Laboratory. 4 Credits.

Experiments in thermodynamics, modern electronic measurements, computer modeling, and data reduction.
Pre or coreq: CH 411.

CH 418. Physical Chemistry Laboratory. 4 Credits.

Experiments in statistical mechanics, chemical kinetics, plasma chemistry, and mass spectrometry.
Prerequisite CH 417; Pre or coreq: CH 412.

CH 419. Physical Chemistry Laboratory. 4 Credits.

Experiments molecular spectroscopy, quantum chemistry, and laser-excited chemical and physical processes to illustrate theoretical principles.
Prereq: CH 417; pre or coreq: CH 413.

CH 420. Physical Organic Chemistry I. 4 Credits.

Modern physical organic chemistry including chemical bonding, acid-base chemistry, thermochemistry, noncovalent interactions, and introduction to computational chemistry. Sequence with CH 421/521.
Prereq: CH 336.

CH 421. Physical Organic Chemistry II. 4 Credits.

Modern physical organic chemistry including tools to study reaction mechanisms, kinetic analysis, isotope effects, and qualitative molecular orbital theory. Sequence with CH 420/520.
Prereq: CH 420/520.

CH 429. Instrumental Analysis. 5 Credits.

Use of instrumental methods for quantitative determinations of unknown chemical samples.
Prereq: CH 417.

CH 431. Inorganic Chemistry. 4 Credits.

Introduction to group theory for molecular symmetry; syntheses, structures, reactions, and reaction mechanisms of coordination complexes and organometallic complexes.

CH 432. Inorganic Chemistry. 4 Credits.

Bioinorganic chemistry: metals in biological systems; coordination chemistry, reactions, spectroscopy, metalloclusters, and synthetic modeling.

Prereq: CH 431 recommended.

CH 433. Inorganic Chemistry. 4 Credits.

Solid-state inorganic chemistry: solid-state structure and its determination; the electrical, magnetic, and mechanical properties of materials and their physical description.

Prereq: CH 431 recommended.

CH 441. Quantum Chemistry. 4 Credits.

The principles of time-independent quantum mechanics and their application to model atomic and molecular systems.

Prereq: CH 413 or equivalent.

CH 442. Quantum Chemistry and Spectroscopy. 4 Credits.

Molecular structure theory, perturbation theory, time-dependent quantum mechanics, theory of spectra, selection rules.

Prereq: CH 441 or equivalent.

CH 443. Quantum Chemistry and Spectroscopy. 4 Credits.

Experimental spectra of atomic and molecular systems and surfaces.

Prereq: CH 442 or equivalent.

CH 444. Chemical Thermodynamics. 4 Credits.

The laws of thermodynamics and their applications, including those to nonideal chemical systems.

Prereq: CH 413 or equivalent.

CH 445. Statistical Mechanics. 4 Credits.

Molecular basis of thermodynamics. Applications to the calculation of the properties of noninteracting and weakly interacting systems.

Prereq: CH 413 or equivalent.

CH 446. Chemical Kinetics: [Topic]. 4 Credits.

Repeatable. Description and interpretation of the time evolution of chemical systems.

Prereq: CH 413 or equivalent.

CH 447. Computational Chemistry. 4 Credits.

Introduction to modern computational methods used to understand the properties of molecules.

Prereq: CH 411, 412; or PHYS 353.

CH 451. Advanced Organic-Inorganic Chemistry. 4 Credits.

Principles of organic-inorganic reaction dynamics; kinetics and mechanisms, linear free-energy relationships, isotope effects, substitution reactions, dynamic behavior of reactive intermediates, electron transfer chemistry.

Prereq: CH 336 or equivalent.

CH 452. Advanced Organic Chemistry—Stereochemistry and Reactions. 4 Credits.

Principles and applications of stereochemistry; reagents and reactions, with mechanisms, used in contemporary organic synthesis; examples taken from the current literature.

CH 454. Advanced Electrochemistry. 4 Credits.

Advanced topics in electrochemistry including fundamental concepts (thermodynamics, kinetics, transport) and applications (analytical techniques, electrolysis, batteries).

Prereq: CH 411.

CH 461. Biochemistry. 4 Credits.

Structure and function of macromolecules. Exposure to calculus and physical chemistry recommended.

Prereq: CH 336 or 343.

CH 462. Biochemistry. 4 Credits.

Metabolism and metabolic control processes. Energy and sensory transduction mechanisms.

Prereq: CH 461.

CH 463. Biochemistry. 4 Credits.

Mechanisms and regulation of nucleic acid and protein biosynthesis. Other current topics in biochemical genetics.

Prereq: CH 461/561; or CH 360 with a grade of B- or better.

CH 464. RNA Biochemistry. 4 Credits.

Introduction to the diverse field of RNA biochemistry.

Prereq: CH 463.

CH 465. Physical Biochemistry. 4 Credits.

Physical chemical properties of biological macromolecules; forces and interactions to establish and maintain macromolecular conformations; physical bases of spectroscopic, hydrodynamic, and rapid-reaction investigative techniques. Offered alternate years.

Prereq: CH 461.

CH 466. Structural Biochemistry. 4 Credits.

Protein and nucleic acid structures and energetics. Structure determination by x-ray crystallography and nuclear magnetic resonance. Computational methods for structural analysis. Offered alternate years.

Prereq: CH 461.

CH 467. Biochemistry Laboratory. 4 Credits.

Methods of modern molecular biology and protein purification.

Co-req: CH 461

CH 503. Thesis. 1-16 Credits.

Repeatable.

CH 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Biochemistry seminar for undergraduates who have completed or are enrolled in CH 461, 462, 463. No graduate credit.

CH 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

CH 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CH 511. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to chemical thermodynamics.

CH 512. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to statistical mechanics and rate processes.

CH 513. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to quantum chemistry.

CH 517. Physical Chemistry Laboratory. 4 Credits.

Experiments in thermodynamics, modern electronic measurements, computer modeling, and data reduction.

Pre- or coreq: CH 411/511.

CH 518. Physical Chemistry Laboratory. 4 Credits.

Experiments in statistical mechanics, chemical kinetics, plasma chemistry, and mass spectrometry.

Pre or coreq: CH 412/512.

CH 519. Physical Chemistry Laboratory. 4 Credits.

Experiments in molecular spectroscopy, quantum chemistry, and laser-excited chemical and physical processes to illustrate theoretical principles.

Pre or coreq: CH 413/513.

CH 520. Physical Organic Chemistry I. 4 Credits.

Modern physical organic chemistry including chemical bonding, acid-base chemistry, thermochemistry, noncovalent interactions, and introduction to computational chemistry. Sequence with CH 421/521.

CH 521. Physical Organic Chemistry II. 4 Credits.

Modern physical organic chemistry including tools to study reaction mechanisms, kinetic analysis, isotope effects, and qualitative molecular orbital theory. Sequence with CH 420/520.

Prereq: CH 420/520.

CH 531. Inorganic Chemistry. 4 Credits.

Introduction to group theory for molecular symmetry; syntheses, structures, reactions, and reaction mechanisms of coordination complexes and organometallic complexes.

CH 532. Inorganic Chemistry. 4 Credits.

Bioinorganic chemistry: metals in biological systems; coordination chemistry, reactions, spectroscopy, metalloclusters, and synthetic modeling.

Prereq: CH 531 recommended.

CH 533. Inorganic Chemistry. 4 Credits.

Solid-state inorganic chemistry: solid-state structure and its determination; the electrical, magnetic, and mechanical properties of materials and their physical description.

Prereq: CH 531 recommended.

CH 541. Quantum Chemistry. 4 Credits.

The principles of time-independent quantum mechanics and their application to model atomic and molecular systems.

Prereq: CH 4/513 or equivalent.

CH 542. Quantum Chemistry and Spectroscopy. 4 Credits.

Molecular structure theory, perturbation theory, time-dependent quantum mechanics, theory of spectra, selection rules.

Prereq: CH 4/541 or equivalent.

CH 543. Quantum Chemistry and Spectroscopy. 4 Credits.

Experimental spectra of atomic and molecular systems and surfaces.

Prereq: CH 4/542 or equivalent.

CH 544. Chemical Thermodynamics. 4 Credits.

The laws of thermodynamics and their applications, including those to nonideal chemical systems.

Prereq: CH 4/513 or equivalent.

CH 545. Statistical Mechanics. 4 Credits.

Molecular basis of thermodynamics. Applications to the calculation of the properties of noninteracting and weakly interacting systems.

Prereq: CH 413/513 or equivalent.

CH 546. Chemical Kinetics: [Topic]. 4 Credits.

Repeatable. Description and interpretation of the time evolution of chemical systems.

Prereq: CH 4/513 or equivalent.

CH 547. Computational Chemistry. 4 Credits.

Introduction to modern computational methods used to understand the properties of molecules.

CH 551. Advanced Organic-Inorganic Chemistry. 4 Credits.

Principles of organic-inorganic reaction dynamics; kinetics and mechanisms, linear free-energy relationships, isotope effects, substitution reactions, dynamic behavior of reactive intermediates, electron transfer chemistry.

Prereq: CH 336 or equivalent.

CH 552. Advanced Organic Chemistry—Stereochemistry and Reactions. 4 Credits.

Principles and applications of stereochemistry; reagents and reactions, with mechanisms, used in contemporary organic synthesis; examples taken from the current literature.

CH 554. Advanced Electrochemistry. 4 Credits.

Advanced topics in electrochemistry including fundamental concepts (thermodynamics, kinetics, transport) and applications (analytical techniques, electrolysis, batteries).

CH 561. Biochemistry. 4 Credits.

Structure and function of macromolecules.

CH 562. Biochemistry. 4 Credits.

Metabolism and metabolic control processes. Energy and sensory transduction mechanisms.

Prereq: CH 461/561.

CH 563. Biochemistry. 4 Credits.

Mechanisms and regulation of nucleic acid and protein biosynthesis.

Other current topics in biochemical genetics.

Prereq: CH 461/561.

CH 564. RNA Biochemistry. 4 Credits.

Introduction to the diverse field of RNA biochemistry.

CH 565. Physical Biochemistry. 4 Credits.

Physical chemical properties of biological macromolecules; forces and interactions to establish and maintain macromolecular conformations; physical bases of spectroscopic, hydrodynamic, and rapid-reaction investigative techniques. Offered alternate years.

CH 566. Structural Biochemistry. 4 Credits.

Protein and nucleic acid structures and energetics. Structure determination by x-ray crystallography and nuclear magnetic resonance. Computational methods for structural analysis. Offered alternate years.

Prereq: CH 561.

CH 567. Biochemistry Laboratory. 4 Credits.

Methods of modern molecular biology and protein purification.

CH 601. Research: [Topic]. 1-16 Credits.

Repeatable.

CH 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

CH 603. Dissertation. 1-16 Credits.

Repeatable.

CH 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

CH 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

CH 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Seminars offered in biochemistry, chemical physics, materials science, molecular biology, neuroscience, organic-inorganic chemistry, and physical chemistry.

CH 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

CH 609. Terminal Project. 1-16 Credits.

Repeatable.

CH 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CH 613. Organic Chemistry: [Topic]. 1-4 Credits.

Repeatable. Topics include bioorganic and bioinorganic chemistry, computational chemistry, green chemistry, medicinal chemistry, natural products, organometallic chemistry, polymers, catalysis, molecular motors, and spectroscopic methods for structure determination.

Repeatable when topic changes.

CH 623. Organic-Inorganic Chemistry Journal Club. 1 Credit.

Repeatable. Preparation and delivery of colloquium-style lectures in organic-inorganic chemistry based on papers from the literature.

Repeatable for maximum of 12 credits.

CH 624. Physical Chemistry Journal Club. 1 Credit.

Repeatable. Preparation and delivery of colloquium-style lectures in physical chemistry based on papers from the literature. Repeatable for maximum of 12 credits.

CH 662. Advanced Biochemistry. 4 Credits.

Detailed consideration of enzyme mechanisms, macromolecular structure, protein-nucleic acid interactions, and selected aspects of biological synthesis.

CH 667. Polymers: Synthesis, Characterization, Processing. 4 Credits.

Methods of polymer synthesis and characterization; kinetics and mechanisms of the principal polymerization reactions. Introduction to mechanical properties and fabrication techniques.

CH 668. Physical Chemistry of Polymers and Coatings. 4 Credits.

Statistical and thermodynamic models for the equilibrium configuration, conformation, structure, mechanical properties, and phase transitions of polymer solutions, dense melts, liquid crystals.

CH 669. Polymer Synthesis and Characterization Laboratory. 4 Credits.

Preparation and physical characterization of polymers; emphasis on polymers of commercial interest.

CH 670. Industrial Polymer Projects Laboratory. 4 Credits.

Polymer industry-focused projects with emphasis on formulation and optimization of adhesives, coatings, thermoplastics, thermosets, drug delivery systems, biopolymers, personal care products.

Prereq: CH 667, CH 668, CH 669.

CH 677M. Semiconductor Device Physics. 4 Credits.

Introduction to the theory behind semiconductors. Elementary theory of inorganic solids; electronic structures and transport properties. Basic theory of devices including diodes, transistors, mosfets, and optoelectronic devices. Offered only in summer. Sequence with PHYS 678M, PHYS 679M. Multilisted with PHYS 677M.

CH 678M. Semiconductor Processing and Characterization Technology. 4 Credits.

Introduction to the techniques required to make semiconductors and test their properties. Solid-state and surface chemistry of inorganic semiconductors as it pertains to microelectronic devices. Offered only in summer. Multilisted with PHYS 678M.

Prereq: CH 677M.

CH 679M. Device Processing and Characterization Laboratory. 4 Credits.

Students use theory and techniques learned to design, fabricate, and test a device that performs a specific function, with an emphasis on wafer processing and device realization. Offered only in summer. Sequence with CH 677M, CH 678M. Multilisted with PHYS 679M.

Prereq: CH 678M.

CH 680. Electronics and Vacuum Systems. 4 Credits.

Introduction to modern electronic components, circuits, basic vacuum theory, vacuum failure modes, measurement systems, and troubleshooting.

CH 681. Introduction to Electron Microscopy. 4 Credits.

Introduction to theory and best practices for applying scanning electron (SEM) and transmission electron microscopy (TEM) in materials science.

CH 682. Electron Microprobe Analysis. 4 Credits.

Introduction to the theory and operation of instrumentation for electron microprobe analysis (EPMA) in materials science and geochemistry.

CH 683. Surface Analysis. 4 Credits.

Introduction to theory and best practices for surface analysis techniques (XPS and ToF-SIMS), with focus on applications for materials science.

CH 685. Advanced Transmission Electron Microscopy. 4 Credits.

Advanced theory and practices for using transmission electron microscopy, as applied to materials science.

Prereq: CH 681.

CH 686. Advanced Scanning Electron Microscopy. 4 Credits.

Advanced theory and practices for using focused ion beam and scanning electron microscopy in research and nanofabrication.

Prereq: CH 681.

CH 687. Advanced Surface Analysis. 4 Credits.

Advanced theory and practices for surface analysis spectroscopy, as applied to materials science.

Prereq: CH 683.

Cinema Studies

Priscilla Peña Ovalle, Department Head

541-346-8104

541-346-8144 fax

201 McKenzie Hall

6223 University of Oregon

Eugene, Oregon 97403-6223

cinema@uoregon.edu

The cinema studies major blends a film- and media-focused liberal arts education with creative work in digital filmmaking. Because cinema is inherently multidisciplinary, courses for the major span the College of Arts and Sciences, the College of Design, and the School of Journalism and Communication and include a diverse array of courses in the history, theory, critical analysis, aesthetics, and production of cinema. As a result, majors approach cinema—including film, television, and new media—from a variety of disciplinary perspectives.

The bachelor of arts in cinema studies provides its graduates with a sound foundation for entering their chosen professions or continuing their education in graduate school. It also gives them the critical and analytic skills to adapt to the changes that are likely to occur in their professions throughout their lifetimes.

Students in the major are encouraged to study overseas in programs that immerse them in different cultures and languages, including the

department's own summer program in Dublin, Ireland, at the National Film School of Ireland, housed in the Dún Laoghaire Institute of Art, Design, and Technology. Students are also encouraged to work with the department's academic and career advisor to seek internships in their chosen areas of potential career interest and expertise.

Faculty

Peter Allilunas, associate professor (cinema studies). BA, 2006, Oregon; MA, 2008, Texas, Austin; PhD, 2013, Michigan. (2014)

Michael G. Aronson, associate professor (cinema studies). BA, 1994, Pennsylvania; MA, 1997, PhD, 2002, Pittsburgh. (2003)

Michael Bray, instructor (digital arts, cinema). BA, 1997, Illinois, Urbana-Champaign; MFA, 2008, Oregon. (2008)

Sangita Gopal, associate professor (cinema studies). BA, 1990, Calcutta; MA, 1995, PhD, 2000, Rochester. (2004)

Erin Hanna, assistant professor (cinema studies). BA, 2004, MA 2007 York (Toronto); PhD, 2014, Michigan. (2014)

Masami Kawai, instructor (cinema studies). BA, 2003, Hampshire College; MFA, 2013, California, Los Angeles. (2014)

Dong Hoon Kim, associate professor (cinema studies). BA, 1998, Yonsei; MA, 2002, PhD, 2008, Southern California. (2011)

Kevin May, instructor (cinema studies); multimedia assistant. BA, 2006, MEd, 2010, Oregon (2016)

HyeRyoung Ok, instructor (cinema studies). BA, 1996, MA, 2000, Seoul National; MA, 2002, New York; PhD, 2008, Southern California. (2011)

Priscilla Peña Ovalle, associate professor (cinema studies, ethnic studies). BS, 1998, Emerson College; MA, 2001, California, Los Angeles; PhD, 2006, Southern California. (2006)

Sergio Rigoletto, associate professor (cinema studies, Italian). Laurea, 2002, Catania; MA, 2004, Birkbeck, London; PhD, 2010, Reading. (2012)

Andre Sirois, instructor (cinema studies); multimedia supervisor. BA, 2002, Central Connecticut State; MA, 2005, Maine; PhD, 2011, Oregon. (2012)

Daniel Gómez Steinhart, assistant professor (cinema studies). BA, 2000, Wesleyan; MA, 2006, PhD, 2013, California, Los Angeles. (2014)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating Faculty

Michael Allan, comparative literature

Gabriela Martinez, journalism and communication

Janet Wasko, journalism and communication

Affiliated Faculty

Kenneth S. Calhoon, comparative literature

Richard Herskowitz, art

Daniel L. Miller, journalism and communication

Kate Mondloch, history of art and architecture

Elizabeth M. Peterson, library

Stephen Rust, English

Biswarup "Bish" Sen, journalism and communication

Rick Silva, art

Undergraduate Studies

The bachelor of arts in cinema studies consists of 56 credits divided among four categories: fundamentals, production, core courses, and electives. The major includes the option of graduating with honors. A bachelor of science degree is not offered.

Courses in the major must be taken for a letter grade, and students must earn a grade of mid-C or better for credit toward the major. At least 28 credits must be taken in residence at the University of Oregon.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Fundamentals Courses ¹		
J 201	Media and Society	4
CINE 260M	Media Aesthetics	4
Select two of the following:		8
CINE 265	History of the Motion Picture I	
CINE 266	History of the Motion Picture II	
CINE 267	History of the Motion Picture III	
Production Courses		
Select one of the following Production A courses: ²		4
J 208	Introduction to Documentary Production	
ARTD 256	Introduction to Production	
CINE 270	Introduction to Narrative Cinema Production	
For a list of courses that satisfy Production B requirements (one is required), review the term course lists at cinema.uoregon.edu/term-course-lists .		4
Core Courses ³		
For a list of courses that satisfy core requirements, review the course lists at cinema.uoregon.edu/term-course-lists . A total of six core courses, at least one from each category, is required.		24
Electives ⁴		
For a list of courses that satisfy elective requirements, review the course lists at cinema.uoregon.edu/term-course-lists . Two electives are required and may include additional fundamentals, production, and/or core courses.		8
Total Credits		56

¹ Fundamentals courses (16 credits) introduce majors to three central approaches to cinema studies: historical, social-institutional, and aesthetic. These must be completed before entry into production courses.

- Students must complete Media and Society (J 201), Media Aesthetics (CINE 260M), and two of the three courses in the history sequence, History of the Motion Picture I (CINE 265), History of the Motion Picture II (CINE 266), and History of the Motion Picture III (CINE 267)], which may be taken in any order. Completion of all fundamentals courses is required before taking any production courses.

² Production courses (8 credits: 4 from Production A and 4 from Production B) give majors a chance to learn the essentials of media production.

- After completing the fundamentals requirements, students may enroll in a Production A course [Introduction to Production (ARTD 256), Introduction to Narrative Cinema Production (CINE 270), or Introduction to Documentary Production (J 208)].
- After successful completion of a Production A course, students are eligible to register for Production B courses (various topics in production; please see term course list (<http://cinema.uoregon.edu/term-course-lists>) for offerings).

³ Core courses (24 credits) strengthen students' understanding of cinema as a dynamic, multicultural, and transnational phenomenon. Please see term course list (<http://cinema.uoregon.edu/term-course-lists>) for offerings.

- Students must complete six core courses, with at least one from each subcategory: Core A (cinema industries); Core B (theory and criticism); and Core C (national, regional, and transnational cinema).
- For students who declared the cinema studies major in fall 2013 or later: two courses in the core with the CINE subject code (8 credits out of the required 24) are required.

⁴ Electives (8 credits) allow students to broaden their exposure to cinema and media studies. These courses are not focused exclusively on cinema but instead study it in relation to other modes of inquiry, including (but not limited to) Asian studies, comparative literature, ethnic studies, folklore and public culture, philosophy, journalism, literary studies, music, Romance languages, and women's, gender, and sexuality studies.

A wide variety of elective courses from a range of departments and programs are available. Additional fundamentals, production, and core courses may also count as elective courses.

Honors

The department provides qualified undergraduate majors with options for participating in the honors program. Students arriving in the 2018–19 academic year or earlier may receive program honors at graduation if they have a final cumulative grade point average (GPA) of at least 3.75 in cinema studies course work. Beginning in 2019–20, incoming students must meet this GPA and, in addition, complete a scholarly or screenwriting project that originates from a cinema studies course and is then expanded in a faculty-led project development seminar. An honors college thesis also fulfills program honors requirements.

For more information, contact the student services assistant director, Veratta Pegram-Floyd, at cintheadvising@uoregon.edu.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Certificate in Film Studies

The certificate in film studies requires 36 credits in courses chosen from three groups:

1. Fundamental requirements
2. Core requirements
3. General electives or additional core courses

Code	Title	Credits
Fundamental Requirements		
CINE 260M	Media Aesthetics	4
Select two of the following:		
CINE 265	History of the Motion Picture I	
CINE 266	History of the Motion Picture II	
CINE 267	History of the Motion Picture III	
Core Requirements ¹		
Four core courses that strengthen students' understanding of cinema as a dynamic, multicultural, and transnational phenomenon.		16

General Electives or Additional Core Courses

Two elective courses that broaden students' exposure to cinema and media studies. These courses do not focus exclusively on cinema but study it in relation to other subjects of inquiry, including (but not limited to) Asian studies, comparative literature, ethnic studies, folklore, philosophy, journalism, literary studies, music, Romance languages, and women's, gender, and sexuality studies. A wide variety of elective courses from a range of departments and programs are available.

8

Total Credits 36

¹ At least one of the four courses must have the CINE subject code.

Students must earn a grade of mid-C or better in required courses to count toward the certificate. Cinema studies majors are not eligible for the certificate.

Please visit the department's online term lists for the most effective options (<https://cinema.uoregon.edu/certificate>).

Courses**CINE 110M. Introduction to Film and Media. 4 Credits.**

Introduction to film and media studies and various methods of critical analysis. Multilisted with ENG 110M.

CINE 111. How to Watch TV. 4 Credits.

Introduction to the critical analysis of television narrative, aesthetics, and reception.

CINE 151M. Introduction to Korean Cinema. 4 Credits.

Surveys Korean national cinema, from the earliest days of the medium to the present. Multilisted with KRN 151M.

CINE 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

CINE 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CINE 230. Remix Cultures. 4 Credits.

Study of issues surrounding media production and consumption in relation to intellectual property laws in modern society. Open to all majors.

CINE 260M. Media Aesthetics. 4 Credits.

Introduction to the analysis of form and style in cinema and related media, focusing on narrative, mise-en-scène, cinematography, editing, and sound. Multilisted with ENG 260M.

CINE 265. History of the Motion Picture I. 4 Credits.

Studies the technological, artistic, and cultural histories of motion pictures in various national contexts, from precinema through the silent era. Series with CINE 266, CINE 267.

CINE 266. History of the Motion Picture II. 4 Credits.

Studies the technological, artistic, and cultural histories of motion pictures in various national contexts, from the transition to sound through the early 1960s. Series with CINE 265, CINE 267.

CINE 267. History of the Motion Picture III. 4 Credits.

Studies the technological, artistic, and cultural histories of motion pictures in various national contexts, from the 1960s through the present. Series with CINE 265, CINE 266.

CINE 268. United States Television History. 4 Credits.

Analyzes the history of US television, from its roots in radio broadcasting to the latest developments in digital television.

CINE 270. Introduction to Narrative Cinema Production. 4 Credits.

Focuses on basic theory and practice of digital video for narrative production.

Prereq: J 201; CINE 260M or ENG 260M; two from CINE 265, 266, 267.

CINE 320. Beginning Screenwriting. 4 Credits.

Introduction to the basics of writing for the screen. Provides students with an organized strategy for writing a feature film.

Prereq: J 201; CINE 260M or ENG 260M; One from ARTD 256, CINE 270, J 208; and two from CINE 265, 266, 267.

CINE 330. Film Festivals. 4 Credits.

Surveys histories of film festivals in relation to their forms, functions, operations, marketing, curatorial missions, and social impacts.

Prereq: one from J 201, ENG 260, ENG 265, ENG 266, ENG 267.

CINE 335. Exhibition and Audiences. 4 Credits.

Explores the exhibition and reception of film and other media by audiences in various contexts.

CINE 340. Production Studies. 4 Credits.

Introduction to the development of production practices and the lived realities of film and television production workers.

CINE 345. Stars. 4 Credits.

An examination of how and why stars and celebrities are produced and marketed by entertainment industries.

CINE 350. Queer European Cinema. 4 Credits.

Examines questions of gender and sexuality within the transnational and national contexts of Europe, including its diverse cinematic landscapes, traditions, and star imagery.

CINE 360. Film Theory. 4 Credits.

Introduction to theoretical debates about film as a medium of artistic expression in a transhistorical and global framework.

CINE 362M. Contemporary Korean Film. 4 Credits.

Introduction to contemporary South Korean film. Explores changes in film culture, practice, and industry in relation to social changes since the early 1990s. Offered alternate years. Multilisted with KRN 362M.

CINE 365. Digital Cinema. 4 Credits.

Examines the impact of digital media technologies on diverse dimensions of cinematic experience encompassing the production, delivery, and reception.

CINE 370. Narrative Production II. 4 Credits.

Focuses on the creative choices and intermediate skills of narrative production.

Prereq: CINE 260M or ENG 260M; two from ENG 265, 266, 267; one from ARTD 256, CINE 270, J 208.

CINE 381M. Film, Media, and Culture. 4 Credits.

Study of film and media as aesthetic objects shaped by a broad range of identity categories, reflecting communities identified by class, gender, race, ethnicity, and sexuality. Multilisted with ENG 381M.

CINE 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

CINE 401. Research: [Topic]. 1-12 Credits.

Repeatable.

CINE 404. Internship: [Topic]. 1-12 Credits.

Repeatable for a maximum of 12 credits; only 4 credits may count toward the cinema studies major.

CINE 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable for a maximum of 12 credits; only 4 credits may count toward the cinema studies major.

CINE 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

CINE 408. Workshop: [Topic]. 1-12 Credits.

Repeatable when topic changes.

Prereq: J 201; CINE 260M or ENG 260M; One from ARTD 256, CINE 270, J 208; and two from CINE 265, 266, 267.

CINE 410. Experimental Course. 1-5 Credits.

Repeatable.

CINE 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with J 411M.

Prereq: J 201 with a grade of mid-C or better.

CINE 415. Cinema Careers. 2 Credits.

Explores the values and strengths of cinema-oriented jobs in the humanities, industry, and otherwise. Resume, cover letter, portfolio, and interview assignments hone oral and written communication skills.

CINE 420. Advanced Screenwriting. 4 Credits.

Provides advanced screenwriting students with an organized strategy for writing a feature film screenplay. Sequence with CINE 320.

Prereq: CINE 320 with grade of B– or better.

CINE 425. Cinema Production: [Topic]. 4 Credits.

Exploration of intermediate to advanced techniques used in cinema production—from music videos to digital sound recording to 16-millimeter film. Topics include Directing, Digital Single-Lens Reflex Camera Production, Music Video Production. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: ENG 260, J 201; two from ENG 265, 266, 267; one from ARTD 256, CINE 270, J 208.

CINE 426. Art of Directing: [Topic]. 4 Credits.

Explores different approaches to directing by investigating a filmmaker's use of narrative and aesthetic tools. Students will learn to work with actors, visualize stories, and build narratives through exercises based on particular directing techniques.

Prereq: J 201; CINE 260M or ENG 260M; One from ARTD 256, CINE 270, J 208; and two from CINE 265, 266, 267.

CINE 440. National and Regional Cinema: [Topic]. 4 Credits.

Explores cinematic traditions, artistic styles and industrial practices in specific national and regional contexts as well as cinema's global development. Also examines issues of transnationalism, globalization, and diaspora.

CINE 470. Postwar Cinema : [Topic]. 4 Credits.

Examines how war has impacted film cultures across the globe and the relation between film industries and war. Develops analytical skills within an historical and national context. Repeatable twice for a maximum of 12 credits when the topic changes.

CINE 486M. New Media and Digital Culture: [Topic]. 4 Credits.

Study of emerging media forms and techniques, such as digital cinema, video games, viral videos, and interactive media. Offered alternate years. Repeatable twice for a maximum of 12 credits. Multilisted with ENG 486M.

CINE 490. Directors and Genres: [Topic]. 4 Credits.

Aesthetic, historical, and theoretical analysis of films, video, and television. Repeatable twice for a maximum of 12 credits when the topic changes.

CINE 508. Workshop: [Topic]. 1-12 Credits.

Repeatable.

CINE 510. Experimental Course. 1-5 Credits.

Repeatable.

CINE 511M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with J 511M.

CINE 540. National and Regional Cinema: [Topic]. 4 Credits.**CINE 586M. New Media and Digital Culture: [Topic]. 4 Credits.**

Study of emerging media forms and techniques, such as digital cinema, video games, viral videos, and interactive media. Offered alternate years. Repeatable twice for a maximum of 12 credits. Multilisted with ENG 586M.

CINE 590. Directors and Genres: [Topic]. 4 Credits.

Aesthetic, historical, and theoretical analysis of films, video, and television. Repeatable twice for a maximum of 12 credits when the topic changes.

Classics

Mary Jaeger, Department Head

541-346-4068

1267 University of Oregon

Eugene, Oregon 97403-1267

classics@uoregon.edu

The field of classics embraces Greek and Roman culture from the prehistoric to the medieval periods. The department offers bachelor of arts and master of arts degrees in classics, and minors in classical civilization, Greek, and Latin.

One of the undergraduate's primary aims in studying classics at the university is to learn Greek or Latin (or both) well enough to read the ancient authors in their original languages.

Students may also study the archaeology of the ancient Mediterranean world. Through the study of classical archaeology, students acquire a broad understanding of Greek and Roman sites and material culture. Although grounded in the study of Greek and Roman buildings, tools, and objects, the courses stress the cross-cultural influences and interactions that informed how people produced, used, and valued these materials as well.

Through the study of classical literature in the original language and in English translation, and through the study of other areas encompassed by the classics, such as ancient history, philosophy, art history, mythology, and rhetoric, a student gains an understanding of the culture and ideals of the classical world and their influence on the languages and institutions of Western civilization.

Members of the classics faculty have a broad range of research and teaching specialties, including Greek poetry and prose, Roman poetry and prose, ancient philosophy and science, and classical archaeology, and foster close interdisciplinary ties with the faculty of several departments, including anthropology, art history, English, history, and philosophy.

Students who intend to major in classics should begin the study of one or both of the classical languages as early as possible in their undergraduate careers.

Careers

A bachelor's degree in classics prepares students for entry into graduate programs in classics, linguistics, comparative literature, ancient history, and archaeology, eventually leading to careers in college teaching, fieldwork, or the editorial professions.

Many prestigious professional schools look upon broad and thorough schooling in the humanities with greater favor than upon narrow preprofessional undergraduate training. Accordingly, students graduating from classics departments throughout the country have had notable success in schools of law, medicine, and business.

Faculty

P. Lowell Bowditch, professor (Latin literature, comparative literature, literary theory). BA, 1984, California, Berkeley; MA, 1989, PhD, 1992, Brown. (1993)

Cristina Calhoon, senior instructor (Latin literature, women in antiquity, Romans and barbarians). Laurea, 1978, Torino; MA, 1983, PhD, 1994, California, Irvine. (1988)

David Chamberlain, instructor (Greek literature, Latin literature). BA, 1989, Oxford; MA, 1991, PhD, 1997, California, Berkeley. (1997)

Kevin D. Dicus, assistant professor (classical archaeology, Latin literature) BA, 1992, MA, 2002, Arizona; PhD, 2012, Michigan, Ann Arbor. (2015)

Christopher Eckerman, associate professor (Greek literature, lyric poetry, social history). BA, 2000, California, Davis; MA, 2002, PhD, 2007, California, Los Angeles. (2008)

Mary K. Jaeger, professor (Latin literature, historiography, food in antiquity). BA, 1982, Gustavus Adolphus; MA, 1984, PhD, 1990, California, Berkeley. (1990)

Steven Shankman, professor. See **English**

Malcolm Wilson, professor (ancient philosophy, history of science). BA, 1985, Western Ontario; MA, 1986, Toronto; PhD, 1993, California, Berkeley. (1990)

Emeritus

Jeffrey M. Hurwit, professor emeritus. See **History of Art and Architecture**

John Nicols, professor emeritus. See **History**.

Undergraduate Studies

Major Requirements

The department offers a bachelor of arts (BA) degree. Students may choose to focus on Latin language and literature (Latin concentration), Greek language and literature (Greek concentration), or a combination of Greek and Latin. Students may also study the literature and culture of the ancient civilizations through courses that use secondary sources and translated texts (classical civilization concentration), or they may focus on classical archaeology and material culture.

Courses used to satisfy major requirements must be taken for letter grades and passed with grades of mid-C or better.

At least four upper-division courses (normally 16 credits) must be taken at the University of Oregon.

ANTH 342	Archaeology of Egypt and Near East	
ANTH 471	Zoarchaeology: [Topic]	
Other anthropology courses approved by advisor		
Total Credits		63

¹ Complete the introductory language courses with grades of mid-C or better or demonstrate proficiency at the introductory level.

² Language courses must be completed with grades of mid-C or better.

Honors

The honors program in classics provides an opportunity for a student to focus on an area of concentration in a written thesis. The requirements for a bachelor's degree with honors in classics are as follows:

1. Satisfaction of the requirements for the major
2. A grade point average (GPA) of 3.50 or better in courses taken to meet the requirements of both the major and the university
3. A senior thesis of substantial quality, approved by the thesis director and at least one member of the program committee

Minor Requirements

Minor in Greek

Code	Title	Credits
Upper-division Greek (GRK) courses ¹		16
Upper-division Greek (GRK) or related courses in classics (CLAS), history (HIST), Latin (LAT), art history (ARH), English (ENG), philosophy (PHIL), religious studies (REL)		8
Total Credits		24

¹ Four credits of first-year Greek may be applied to this total.

Students must have a grade point average of 2.50 or better in courses applied to the minor. At least four courses (typically 16 credits) must be taken at the University of Oregon.

Minor in Latin

Code	Title	Credits
Upper-division Latin (LAT) courses ¹		16
Upper-division Latin (LAT) or related courses in classics (CLAS), history (HIST), Greek (GRK), art history (ARH), English (ENG), philosophy (PHIL), religious studies (REL)		8
Total Credits		24

¹ Four credits of first-year Latin may be applied to this total.

Students must have a grade point average of 2.50 or better in courses applied to the minor. At least four courses (typically 16 credits) must be taken at the University of Oregon.

Minor in Classical Civilization

Code	Title	Credits
Lower- or upper-division courses from approved list		8
Upper-division courses from approved list		16
Total Credits		24

Students must have a grade point average of 2.50 or better in courses applied to the minor. At least four courses (typically 16 credits) must be taken at the University of Oregon.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- Greek Concentration (p.)
- Latin Concentration
- Greek and Latin Concentration
- Classical Civilization Concentration
- Classical Archaeology Concentration

- **Master of Arts in Classics: Languages and Literatures**
- **Master of Arts in Classics: Classical Archaeology and Material Culture**

Graduate Studies

The Department of Classics currently offers the master of arts (MA) in classics with a focus on ancient languages and literatures. Students may focus their course work on Greek, Latin, or Greek and Latin. In addition, the department offers a master of arts degree with a focus on classical archaeology and material culture.

Programs of study are arranged in consultation with two advisors, at least one of whom is a member of the Department of Classics, and comprise graduate courses selected from art history (subject code ARH), classics (CLAS), English (ENG), Latin (LAT), Greek (GRK), history (HIST), philosophy (PHIL), and religious studies (REL).

Admission

Procedures for admission to do graduate work in classics include the following:

1. A completed Graduate Admission Application
2. Transcripts of all college work
3. Three letters of recommendation
4. Scores on the verbal and quantitative sections of the Graduate Record Examinations (GRE)
5. Test of English as a Foreign Language (TOEFL) scores are required for international students
6. A sample of written work and a statement of academic purpose

Several graduate teaching fellowships are available each year for entering graduate students. Applicants seeking such fellowships must send an application postmarked by January 31.

Master of Arts in Classics: Languages and Literatures

Select one of the following: ²		9
GRK 503	Thesis	
LAT 503	Thesis	

CLAS 503	Thesis	
Option 2		
Two-part comprehensive examination: translation and essay ³		
Option 3		
At least two 40- to 50-page essays ⁴		
Total Credits		59

- ¹ Equivalent courses taken as an undergraduate may fulfill this requirement.
- ² The credits may be counted toward the 45-credit minimum. Satisfactory completion of the thesis includes an oral defense.
- ³ The candidate must, in consultation with his or her advisors, define a reading list for the translation part of the examination.
- ⁴ The candidate develops, expands, and revises work written for graduate author courses or seminars.

Additional Requirements

- Complete the general MA requirements stipulated by the Graduate School
- Pass with a grade of mid-B or better five courses in Greek and/or Latin authors
- Pass a translation examination in one modern language, usually French or German. This requirement may be fulfilled with a standardized examination offered by the university or by the successful translation of a significant scholarly text

Additional information may be obtained from the classics department and is included with the letter of admission.

Total Credits		59

- ¹ Choose from Archaeology and Anthropology (ANTH 681), Professional Writing (ANTH 685), Archaeology and Anthropology (ANTH 681), Social Theory I (ANTH 688), Social Theory II (ANTH 689), Graduate Studies in Art History (ARH 611), Seminar: [Topic] (CLAS 607), Practicum: [Topic] (CLAS 609), Historical Methods and Writings (HIST 612).

- ² Choose from Seminar: [Topic] (ARH 507) (when on relevant topics), (ARH 524).
- ³ Choose from Field Methods in Cultural Anthropology (ANTH 517), Practical Archaeobotany (ANTH 546).
- ⁴ The credits may be counted toward the 45-credit minimum. Satisfactory completion of the thesis includes an oral defense.
- ⁵ The candidate must, in consultation with his or her advisors, define a reading list for the translation part of the examination.

Additional Requirements

- Complete the general MA requirements stipulated by the Graduate School
- Pass with a grade of mid-B or better five courses in Greek and/or Latin authors

Classics Courses

CLAS 110. Classical Mythology. 4 Credits.

Introduction to the world of Greek and Roman mythology with an emphasis on the issues of personal and social identity.

CLAS 188. Introduction to Classical Archaeology. 4 Credits.

Introduction to the archaeology and material culture of the Ancient Greeks and Romans.

CLAS 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CLAS 201. Greek Life and Culture. 4 Credits.

Introduces students to the literature, history, and art of ancient Greece. Students develop an appreciation for Greek culture and its similarities to and differences from American culture.

CLAS 202. Roman Life and Culture. 4 Credits.

Examines Roman civilization from the founding of Rome in the 8th century BC to the victory of Constantine and his religion early in the 4th century AD.

CLAS 301. Greek and Roman Epic. 4 Credits.

Analysis of the heroic tradition and epic themes in the Homeric poems, the works of Hesiod, and the Aeneid. Emphasis on literary criticism and intellectual history.

CLAS 302. Greek and Roman Tragedy. 4 Credits.

Examination of Aeschylus, Sophocles, Euripides, and perhaps Seneca from the viewpoint of literary criticism and intellectual history.

CLAS 303. Classical Greek Philosophers. 4 Credits.

Introduction to the philosophies of Plato and/or Aristotle from the viewpoint of Greek intellectual history.

CLAS 310. Early China, Ancient Greece. 4 Credits.

Examines the relationship between knowledge and wisdom in literature produced by two different ancient civilizations, Greece and China, from c. 1000 BCE to 86 CE. Offered alternate years.

CLAS 311. Death and Rebirth in Greece and India. 4 Credits.

Explores Greco-Roman and Indian conceptions of the soul and beliefs concerning the afterlife, particularly those of reincarnation and soul transmigration. Offered alternate years.

CLAS 314. Gender and Sexuality in Antiquity. 4 Credits.

Introduction to construction of the categories of norms of Western sexuality through study of Greek and Roman attitudes toward gender roles, homo- and heterosexuality, the family, and privacy.

CLAS 330. Greek and Roman Archaeology: [Topic]. 4 Credits.

A course of variable content focusing on issues and methods of Mediterranean archaeology from the Bronze Age to Late Antiquity. Repeatable twice for a maximum of 12 credits when the topic changes.

CLAS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CLAS 401. Research: [Topic]. 1-21 Credits.

Repeatable.

CLAS 403. Thesis. 1-12 Credits.

Repeatable.

CLAS 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

CLAS 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

CLAS 408. Colloquium: [Topic]. 1-21 Credits.

Repeatable.

CLAS 409. Supervised Tutoring. 1-21 Credits.

Repeatable.

CLAS 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CLAS 503. Thesis. 1-16 Credits.

Repeatable.

Prereq: second-year proficiency in Greek or Latin.

CLAS 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

CLAS 508. Colloquium: [Topic]. 1-21 Credits.

Repeatable.

CLAS 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CLAS 601. Research: [Topic]. 1-16 Credits.

Repeatable.

CLAS 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

CLAS 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

CLAS 606. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

CLAS 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

CLAS 608. Colloquium: [Topic]. 1-16 Credits.

Repeatable.

CLAS 609. Practicum: [Topic]. 1-16 Credits.

Repeatable.

CLAS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CLAS 611. Introduction to Philological Methods. 4 Credits.

Introduces graduate students to methodological approaches for the study of antiquity, employing faculty expertise in literary criticism, ancient art, historiography, epigraphy, ancient philosophy, and paleography.

Greek Courses

GRK 101. First-Year Greek. 5 Credits.

Fundamentals of the Attic Greek language; readings in Attic Greek and in koine.

GRK 102. First-Year Greek. 5 Credits.

Fundamentals of the Attic Greek language; readings in Attic Greek and in koine.

Prereq: GRK 101 or equivalent.

GRK 103. First-Year Greek. 5 Credits.

Fundamentals of the Attic Greek language; readings in Attic Greek and in koine.

Prereq: GRK 102 or equivalent.

GRK 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

GRK 301. Authors: [Topic]. 4 Credits.

Second-year Greek: selections from major Greek authors, either Plato or Lysias, with focus on reading and syntax. Repeatable when reading material changes.

GRK 302. Authors: [Topic]. 4 Credits.

Second-year Greek: selections from Euripides, with focus on reading and syntax. Repeatable when reading material changes.

GRK 303. Authors: [Topic]. 4 Credits.

Second-year Greek: selections from Homer or Hesiod, with focus on reading and syntax. Repeatable when reading material changes.

GRK 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

GRK 401. Research: [Topic]. 1-21 Credits.

Repeatable.

GRK 403. Thesis. 1-12 Credits.

Repeatable.

GRK 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

GRK 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GRK 408. Colloquium: [Topic]. 1-21 Credits.

Repeatable.

GRK 409. Practicum: [Topic]. 1-21 Credits.

Repeatable.

GRK 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

GRK 411. Authors: [Topic]. 4 Credits.

Repeatable. Each term devoted to a different author or literary genre: Euripides, Sophocles, Aeschylus, Plato, Aristotle, Demosthenes, Herodotus, Aristophanes, lyric poetry, comedy, pastoral. Repeatable when topic changes.

GRK 503. Thesis. 1-16 Credits.

Repeatable.

GRK 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GRK 508. Colloquium: [Topic]. 1-21 Credits.

Repeatable.

GRK 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

GRK 511. Authors: [Topic]. 4 Credits.

Repeatable. Each term devoted to a different author or literary genre: Euripides, Sophocles, Aeschylus, Plato, Aristotle, Demosthenes, Herodotus, Aristophanes, lyric poetry, comedy, pastoral. Repeatable when topic changes.

GRK 601. Research: [Topic]. 1-16 Credits.

Repeatable.

GRK 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

GRK 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

GRK 606. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

GRK 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GRK 608. Colloquium: [Topic]. 1-16 Credits.

Repeatable.

Latin Courses

LAT 101. First-Year Latin. 5 Credits.

Fundamentals of Latin grammar; selected readings from classical and medieval authors.

LAT 102. First-Year Latin. 5 Credits.

Fundamentals of Latin grammar; selected readings from classical and medieval authors.

Prereq: LAT 101 or equivalent.

LAT 103. First-Year Latin. 5 Credits.

Fundamentals of Latin grammar; selected readings from classical and medieval authors.

Prereq: LAT 102 or equivalent.

LAT 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LAT 301. Authors: [Topic]. 4 Credits.

Second-year Latin: selections from Caesar, with focus on reading and syntax. Repeatable when reading material changes.

LAT 302. Authors: [Topic]. 4 Credits.

Second-year Latin: selections from Virgil's Aeneid, with focus on reading and syntax. Repeatable when reading material changes.

LAT 303. Authors: [Topic]. 4 Credits.

Second-year Latin: selections from major Roman authors with focus on reading and syntax. Recent authors are Cicero, Terence, Tibullus. Repeatable when reading material changes.

LAT 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LAT 401. Research: [Topic]. 1-21 Credits.

Repeatable.

LAT 403. Thesis. 1-12 Credits.

Comparative Literature

Leah Middlebrook, Department Head

541-346-0934

313 Villard Hall

5242 University of Oregon

Eugene, Oregon 97403-5242

complit@uoregon.edu

The University of Oregon offers major programs in comparative literature leading to the bachelor of arts (BA), master of arts (MA), and doctor of philosophy (PhD) degrees. In addition, comparative literature offers a minor program.

Inherently interdisciplinary, comparative literature begins with the insistence that any artifact of culture—be it a canvas, a poem, a film, a novel, or a work of media—requires active attention and engagement. At the same time, where the national literatures designate their subjects by language or nation, comparative literature allows a pluralistic approach that bridges linguistic and cultural boundaries. Closely allied with critical theory and with literary and cinema studies as well as with cultural studies, comparative literature nonetheless can be defined neither in terms of a specific methodology nor a specific canon of texts. What defines comparative literature is its open-ended spirit of inquiry. Students of comparative literature create their subject matter by determining the meaning and method of their comparative approach.

Oregon's graduate program, established in 1962, has an international reputation. It is the home of the principal journal in the field, *Comparative Literature*, and is closely involved with the leading national organization, the American Comparative Literature Association.

The department maintains an active schedule of lecture series, seminars, and workshops. In addition, comparative literature is the home of the Nomad Mentorship Program and *Nomad*, the journal of undergraduate criticism. Library holdings, which are strong in all areas of research in literature, include an outstanding collection of journals, many of which come to the library in exchange for *Comparative Literature*.

Faculty

Michael Allan, associate professor (Arabic and Francophone literature, postcolonial studies, cinema). BA, 2000, Brown; PhD, 2008, California, Berkeley. (2008)

Corinne Bayerl, senior instructor (16th- to early 18th-century French and German literature, philosophy, and religion; gender studies; early modern translation practices). MA, 1996, Ludwig-Maximilians-Universität München, PhD, 2014, Chicago. (2012)

Steven T. Brown, professor (Japanese film, comparative film, popular culture). BA, 1987, Illinois, Urbana-Champaign; MA, 1988, PhD, 1993, Stanford. (1993)

Katherine "Katy" Brundan, senior instructor (18th- and 19th-century English and European literature, novel, media and popular culture). BA 1992, MA, 1996, Cambridge; PhD, 2006, Oregon (2013)

Kenneth S. Calhoon, professor (18th- and 19th-century German and European literature and thought, psychoanalysis, cinema). BA, 1979, Louisville; MA, 1981, PhD, 1984, California, Irvine. (1987)

Roy Chan, associate professor. See **East Asian Languages and Literatures**.

Katya E. Hokanson, associate professor (Russian literature, travel literature, cultural studies). BA, 1984, Williams; MA, 1988, PhD, 1994, Stanford. (1995)

Dawn Marlan, senior lecturer (history of the novel, gender studies, cinema). BA, 1989, Bennington; MA, 1992, PhD, 2000, Chicago. (2004)

Leah Middlebrook, associate professor (16th-century Spanish and French lyric, court culture, theories of the subject). BA, 1989, Columbia; MA, 1991, PhD, 1998, California, Berkeley. (2002)

Jenifer Presto, associate professor (Russian literature, poetry, modernism). AB, 1985, Smith; MA, 1988, Middlebury; MA, 1989, PhD, 1996, Wisconsin, Madison. (2003)

Tze-Yin Teo, assistant professor (comparative, global, and transnational modernism; translation studies; literary theory). BA, 2009, National University of Singapore; PhD, 2015, Emory. (2015)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Susan C. Anderson, German and Scandinavian

Monique Balbuena, honors college

Mayra Bottaro, Romance languages

P. Lowell Bowditch, classics

Cory Browning, Romance languages

Anita Chari, political science

Joyce Cheng, history of art and architecture

James R. Crosswhite, English

Dianne M. Dugaw, English

Cecilia Enjuto Rangel, Romance languages

Pedro García-Caro, Romance languages

D. Gantt Gurley, German and Scandinavian

Michael Hames-García, ethnic studies

Lamia Karim, anthropology

Martin Klebes, German and Scandinavian

Colin Koopman, Philosophy

David Leiwei Li, English

Jeffrey S. Librett, German and Scandinavian

Massimo Lollini, Romance languages

Karen McPherson, Romance languages

Lanie Millar, Romance languages

Fabienne Moore, Romance languages

Dorothee Ostmeier, German and Scandinavian

Paul W. Peppis, English

F. Regina Psaki, Romance languages

Forest Pyle, English

Judith Raiskin, women's and gender studies

Sergio Rigoletto, Romance languages

Daniel Rosenberg, honors college

Gordon M. Sayre, English

Steven Shankman, English

Carol Silverman, anthropology

Beata Stawarska, philosophy

Michael Stern, German and Scandinavian

Analisa Taylor, Romance languages

Alejandro Vallega, philosophy

Daniela Vallega-Neu, philosophy

David J. Vazquez, English

Yugen Wang, East Asian languages and literatures

Elizabeth A. Wheeler, English

Daniel N. Wojcik, English

Rocio Zambrana, philosophy

- Bachelor of Arts
- Minor

Undergraduate Studies

The undergraduate program offers a unique major that cuts across disciplines, teaches critical skills, and provides an intellectually challenging curriculum while preparing students for possible careers in the media, law, government, business, or teaching. Students with a good background in one or more languages other than English find that the program gives them the opportunity to study literature and related cultural productions, including canonical and emerging writings, in a variety of historical and theoretical perspectives.

The program combines maximum flexibility with a rigorous grounding in the basics of literary theory and cultural studies. Based on their interests, majors choose one of two emphases: language and culture or disciplines in dialogue. In the first, students develop proficiency in two national-linguistic traditions. In the second, students explore links between a single national-linguistic tradition and a nonliterary field. Both emphases are ideally suited to students considering either a double-major or a major and a minor: they can combine their multiple interests into a single program of study.

A carefully designed core curriculum takes students through the basics of comparative literature as a discipline. Course work culminates with Capstone Seminar (COLT 415). Many comparative literature students use this seminar to develop a BA honors thesis project (see Honors in Comparative Literature below).

Emphases within the Major

Because there are many different ways of thinking about literature from a comparative perspective, two emphases within the major are offered. One emphasis, language and culture, features comparative study across different national-linguistic traditions. This emphasis is recommended for students who want to study abroad, attend graduate school in comparative literature, or want to gain an in-depth understanding of one or more foreign cultures. A second emphasis, disciplines in dialogue, allows students to combine literary study with work in a nonliterary

discipline. This emphasis offers an alternative for students considering a double major in literature and a nonliterary field. It is also well-suited to students who want to combine literary study with creative writing, performance, or the visual arts.

Language and Culture Emphasis

Students in this emphasis designate two national-linguistic traditions (e.g., Spanish and German; English and Japanese; French and Russian). In addition, the language chosen to fulfill the foreign language requirement should coincide with one of these national-linguistic traditions.

Disciplines in Dialogue Emphasis

Students in this emphasis designate one national-linguistic tradition and one other disciplinary focus (e.g., creative writing, philosophy, cinema studies, psychology, art history). Courses taken in this disciplinary focus may be spread out across several subject codes, with the approval of the director of undergraduate studies. Students are strongly advised to complete their foreign language requirement in a language relevant either to their national-linguistic tradition or to their disciplinary focus.

Bachelor of Arts Degree Requirements

The comparative study of culture entails the acquisition of reading competence in at least one language other than English. Comparative literature majors must complete at least one year of upper-division training in a language other than English. For students working in French, German, Italian, or Spanish, a third year entails the study of literature. Appropriate courses include, for example, French Survey: Medieval and Renaissance (FR 317), Monarchy, Liberty, Revolution (FR 318), French Survey: 19th and 20th Centuries (FR 319) or Introduction to German Culture and Society (GER 340), Introduction to German Culture and Society (GER 341) as well as any 400-level literature course taught in the language in question. For students working in Chinese, Greek, Hebrew, Latin, Japanese, Russian, or Swedish, the third year will typically entail further training in grammar and oral production. Appropriate courses include, for example, Third-Year Chinese (CHN 301), Third-Year Chinese (CHN 302), Third-Year Chinese (CHN 303), the Judaic studies sequence taught in Hebrew, Biblical Narrative (HBRW 311), Biblical Poetry (HBRW 312), Postbiblical Literature (HBRW 313), or Third-Year Russian (RUSS 316), Third-Year Russian (RUSS 317), Third-Year Russian (RUSS 318). With the approval of the director of undergraduate studies, courses taken abroad may be used to fulfill this requirement.

In addition to completing the foreign language requirement, majors must take eight required courses in comparative literature, four upper-division courses in their primary national-linguistic tradition, and three upper-division courses in their secondary focus field (either a second national-linguistic tradition or a nonliterary discipline).

All course work required for the comparative literature major and minor must be passed with grades of mid-C or better.

Code	Title	Credits
Foreign Language Requirement ¹		
Option for French, German, Italian, or Spanish work		
Examples of courses: ²		
FR 317–319	French Survey	
GER 340–341	Introduction to German Culture and Society	
400-level literature courses taught in language of focus		

Option for Chinese, Greek, Hebrew, Latin, Japanese, Russian, or Swedish work

Examples of courses: ³	
CHN 301–303	Third-Year Chinese
HBRW 311–313	Biblical Literature
RUSS 316–318	Third-Year Russian

Core Courses		
Two lower-division COLT electives		8
300-level COLT elective		4
COLT 301	Approaches to Comparative Literature	4
Select one of the following:		4
COLT 302	Theories of Poetry	
COLT 303	Theories of the Novel	
COLT 304	Theories of Drama	
COLT 305	Cultural Studies	4
400-level COLT elective		4
COLT 415	Capstone Seminar	4
Focus Fields Courses		
Four upper-division courses in primary national-linguistic tradition		16
Three upper-division courses in a secondary national-linguistic tradition (language and culture) or a nonliterary discipline (disciplines in dialogue)		12
Total Credits		60

- With the approval of the director of undergraduate studies, courses taken abroad may be used to fulfill this requirement.
- The third year entails the study of literature.
- The third year will typically entail further training in grammar and oral production.

Honors in Comparative Literature

Comparative literature students may petition to enter the honors track during spring of their junior year. Admission to the honors track is based on the recommendation of a comparative literature faculty member or a participating faculty member. Completion of the honors track requires the successful completion of a bachelor of arts honors thesis and an additional 400-level elective. During the Capstone Seminar (COLT 415), typically taken during fall of senior year, honors students develop and present a thesis prospectus. The thesis must be comparative in nature, and should entail work in both of the student's focus fields. If the prospectus is approved by both the seminar leader and the student's thesis advisor, then the student enrolls in Thesis (COLT 403) during winter of senior year. The thesis is completed under the supervision of the thesis advisor, and must be submitted to both the advisor and a second reader by the fifth week of spring term. The thesis must then be approved by the advisor and second faculty member after a formal presentation. Both thesis advisor and second reader should be chosen from the comparative literature faculty or participating faculty.

Minor Requirements

The comparative literature minor offers an opportunity for students to pursue an interest in world literature and film without advanced language study.

Code	Title	Credits
COLT 301	Approaches to Comparative Literature	4
Four COLT courses (at least two upper-division courses)		16
Two upper-division literature or film courses in same subject area ¹		
Total Credits		20

¹ Courses may be taught within the Department of Comparative Literature or in other departments and may be taken abroad or away from the University of Oregon

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

• **Doctor of Philosophy**

Graduate Studies

The graduate program in comparative literature is founded on the conviction that literary traditions are best understood when contextualized across national and cultural boundaries. To thrive professionally, every scholar in the discipline must be closely trained in a primary national literature, proficient in at least three languages, and attuned to the importance of philology, bibliography, and linguistic training. At the same time, a commitment to comparative study requires a firm grasp of translation among languages and media and the history of reading practices, as well as aesthetic and cultural theory.

Students are admitted to the graduate program with the expectation that they will work toward the PhD degree. At present the Department of Comparative Literature does not offer a terminal master's degree. Instead, students become eligible for the MA on passing their PhD qualifying exams.

Admission

A complete application for admission includes the application form, a transcript of college- and graduate-level work, three letters of recommendation, a statement of purpose, and a 10- to 20-page sample in English of critical writing about literature. Graduate Record Examination scores are not required but are highly recommended. The application deadline is January 15 for entrance the following fall term. Application information and forms can be obtained from the department website.

Candidates for admission typically have an undergraduate major in one literature and competence in two of the following languages that are taught at the University of Oregon: Arabic, Chinese, French, German, Greek (classical), Hebrew (biblical), Italian, Japanese, Korean, Latin, Portuguese, Russian, Spanish, and Swedish. Under special circumstances, arrangements may be made with the director of graduate studies to study other literatures.

Overview of Requirements

Within their first three years of graduate study, students must complete the language requirement, six foundation courses, at least five courses in the primary field, and at least four courses in the secondary field. In addition, students select at least three elective courses in consultation with their faculty advisors; these courses may be tangential to their main research interests or distributed according to those interests. The foundation courses include Graduate Studies in Translation (COLT 613), Graduate Studies in Comparative Literature (COLT 614), Graduate Studies in Comparative Literature (COLT 615), Transmedial Aesthetics (COLT 616), and at least two other graduate-level COLT courses. Courses applied to the degree must be passed with a grade of B+ or better, and students must maintain a grade point average of at least 3.50 in all graduate-level courses in order to remain in good standing in the program.

After completing all course work and language requirements, students are eligible to take their written and oral PhD qualifying examinations.

Following successful completion of the exams, students submit a prospectus and meet with their committees for the prospectus conversation. A satisfactory prospectus conversation is required for advancement to candidacy. The approximate time from completion of course work to advancement is one year. Typically, the dissertation is completed within two years of advancing to candidacy.

Foundation Courses

The graduate program provides a solid foundation in theoretical and historical methods integral to comparative literature and relevant to working across national literary traditions, historical periods, theoretical paradigms, and media. Through these courses, students are expected to acquire a comprehensive understanding of scholarly method, encountering not only contemporary texts and theorists but also the history of the field, including the central controversies, crucial debates, and cultural contexts that have shaped its development. The student must complete six graduate-level foundation courses; these courses are Graduate Studies in Translation (COLT 613), Graduate Studies in Comparative Literature (COLT 614), Graduate Studies in Comparative Literature (COLT 615), Transmedial Aesthetics (COLT 616), and two others selected from among the COLT graduate course offerings.

Primary Field

The majority of comparative literature graduates are hired to teach in national literature departments and not in interdisciplinary programs. For this reason it is crucial that students develop a primary research field that is based either in a single national literature (e.g., Japanese literature) or in a single linguistic-cultural tradition that crosses national boundaries (e.g., Latin American literature). Depending on the relative breadth of a student's prior training, the primary field may be further delimited according to a period (e.g., postwar Japan) or a genre (e.g., German drama) or even an artistic movement (e.g., French postmodernism).

The student must complete five graduate-level courses in the primary field; at least three of the courses should share the same department subject code.

Secondary Field

This field complements the research within the primary field, either by providing counterpoint or a needed context. There are three ways to define one's secondary field. Most commonly, it represents a second national literature (e.g., Spanish literature) or a linguistic-cultural tradition that crosses national boundaries (e.g., Latin American literature). In addition, where two or more national-linguistic traditions share a common literary history—for example, within a given region or artistic movement—the secondary field may be defined in comparative terms (e.g., the Continental Renaissance, Caribbean literature, or East Asian film). Finally, the secondary field can eschew literary categories altogether in order to represent an alternative disciplinary focus (e.g., religious studies).

At least four graduate-level courses must be taken in the secondary field. Three of them should share the same department subject code. At the discretion of the director of graduate studies, the three courses with shared subject code may be spread out over the secondary, foundation, and elective fields.

Electives

Three of the program's required 18 graduate-level courses are electives and should be chosen in consultation with an advisor. The electives may cover a wide range of interests or may be carefully distributed among the three research fields to fill gaps or achieve greater depth. Some students

may wish to devote their electives to a fourth field of research (e.g., a third national literature). Students hoping to pursue this option are urged to meet with the director of graduate studies as soon as possible.

Language Requirement

Work in at least three languages is expected at all phases of the program, from course work to the dissertation. The language requirement addresses this expectation by ensuring both linguistic proficiency and a minimum level of graduate course work in all three languages. Students are required to complete graduate-level work in their languages. The following guidelines apply: (1) at least two graduate courses must be taken in each language to meet this requirement and should ideally be taught by a specialist in the target language; (2) the seminar paper for each course should demonstrate competency dealing with the target language and should be suitable for publication in the national literature field. The seminar paper for each of the two non-English languages must be submitted to the department at the end of the course for approval. The language requirement must be satisfied by the end of the third year.

Timetable from Entrance to Examinations

Advisors

During their first two terms of study (fall and winter), students are advised by the director of graduate studies. By Monday of week two of the third term, each student formally identifies an interim advisor—a faculty member who agrees to mentor the student through the completion of the first-year conversation and the first two terms of the second year.

By Monday of week two of the spring term of the second year, the student will have chosen his or her advisor of record. This advisor, who will be competent in the student's primary research interests, will mentor the student through the second-year review and the third year of study.

First Year

First-Year Statement

By Friday of week four of spring term, first-year students, in consultation with their interim advisors, submit a two- to three-page statement of purpose. It should identify and justify the primary and secondary fields the student intends to pursue—the general fields of study that form the backbone of a scholar's research profile. It should also clarify the relationship between the students' research languages and research fields, and indicate what linguistic study is necessary to complete the proposed course of study.

First-Year Conversation

In week six or seven of spring term, the first-year student, his or her interim advisor, the director of graduate studies, and one other comparative literature faculty member meet for a conversation about the first-year statement. They evaluate the student's progress to date, including course work and language examinations, discuss the intended fields, and offer guidance for the remaining two years leading to the qualifying examination. With their approval of the statement and the student's general plan, as well as successful completion of all first-year course work with a GPA of 3.50, the student may proceed to the second year. A brief memo written by the student that summarizes the conversation is due to the department by Wednesday of week eight.

Second Year

Third-Year Article

During the second year, as part of preparation for publication in the field, students are required to begin expanding a seminar paper into an article

for submission to a journal. Workshops are held to prepare students to write an article and select an appropriate publication venue. This process is meant to provide step-by-step guidance in publishing before the student advances to candidacy.

Second-Year Review

By Monday of week two in spring term of the second year, a student will have chosen the advisor of record. In consultation with that advisor, the student must write a careful self-review of his or her progress to date. The review should revisit both the first-year statement and the report of the first-year conversation. In particular, any recommendations made by the first-year conversation committee should be assessed: how were these recommendations pursued and with what result? The designation of the three research fields should also be addressed, along with any shifts in focus that have proved necessary or desirable. The review should explain what course work remains to be completed, and, where appropriate, should outline a plan for the completion of that work. Any problems in performance or concerns about timely progress should also be addressed. The second-year review must be approved by the advisor of record and submitted by Monday of week eight of spring term. The graduate committee reviews these reports, and small revisions and clarifications may be required before they approve the document. With approval of the review and completion of all second-year course work with a GPA of 3.50, the student may proceed to the third year.

Third Year

Third-Year Article

During the first term of the third year, the student will finalize the third-year article in consultation with an advisor in preparation for submitting it for peer review. By Friday of week ten of fall term of the third year, the student will submit this article to the department along with a cover letter addressed to an appropriate journal.

Completion of Course Work and Language Requirement

The program is designed so that students may complete all course work and language requirements by the end of their third year. By Friday of week nine of spring term of the third year, students submit the course work and language requirement completion form for approval by the director of graduate studies and the graduate committee.

PhD Degree Requirements

Code	Title	Credits
Foundation Courses		
Six foundation courses: the four listed below and two other graduate COLT courses.		
COLT 613	Graduate Studies in Translation	4-5
COLT 614–615	Graduate Studies in Comparative Literature	10
COLT 616	Transmedial Aesthetics	5
Primary Field Courses		
At least five graduate courses ¹		
Secondary Field Courses		
At least four graduate courses ²		
Electives		
At least three graduate courses ³		

¹ At least three of the courses should share the same departmental subject code.

² Three courses should share the same departmental subject code. At the discretion of the director of graduate studies, the three courses with shared subject code may be spread out over the secondary, foundation, and elective fields.

³ Choose electives in consultation with an advisor.

Additional Requirements

- Successfully passing the PhD qualifying exams
- Writing dissertation prospectus
- Dissertation

Examination Committee

By the beginning of spring term of the third year, each student selects an examination committee consisting of the advisor of record and two additional faculty members. Of these three, one represents the student's primary field of research (commonly the advisor of record), another represents the secondary field, and a third member is designated the committee chair. The third member also serves as chief mentor for the student's foundation field, advising him or her on the reading list inclusions from that field. All members must sign an agreement form to participate in the exam committee, and all must approve the exam statement and reading list. By Monday of week two in spring term of the third year, students must submit their examination committee membership to the department. Students who have chosen an additional fourth field of research may choose to be tested in that field as well. The logistics of this option should be pursued with the director of graduate studies as early in the process as possible. The examination committee membership must be approved by the director of graduate studies.

Examination Statement and Reading List

In consultation with the exam committee members, each student determines his or her examination fields. These fields correspond to the primary, secondary, and foundation research fields, but are usually narrower and more specialized in scope. Students then devise a reading list covering each field. Each list should include approximately fifteen to twenty primary items (an item is an author and a work or works that represent the author's perspective as a whole). Each field list should also include a separate sublist of pertinent critical-secondary works. Exam committee members can provide assistance in choosing the works on this list.

Students must also compose a six- to eight-page statement that defines the student's core interests, defends the examination fields, clarifies the scope of the reading list, and offers some indication of the future dissertation project and career aspirations for which this reading list provides the necessary comprehensive background and preparation. After being approved by all the examiners, the exam statement and reading list are submitted to the department by the end of week nine in spring term of the third year. Prior to final approval, the exam statement and reading list are reviewed by the graduate committee, which may have additional recommendations and queries. Occasionally, these recommendations may be substantive enough to require additions to or deletions from the list and a resubmission process. Changes to the statement and list may be made no later than four weeks prior to the first written exam and must be approved by both the director of graduate studies and the examination committee members.

When the graduate committee and director of graduate studies have approved the Course Work and Language Requirements Completion

Form and the exam statement and reading list, the student may proceed with the examination process.

Overview of Fourth Year

The fourth year is dedicated to completing the doctoral examinations and writing the dissertation prospectus. Typically, students prepare for the exams over the summer and early fall, sit for the written and oral exams by the end of fall term, and complete the prospectus by the middle of spring term. The prospectus conversation must be held by the beginning of week 10 of spring term in the fourth year, so that students may advance to candidacy in a timely manner at the end of spring term.

Written Examination

In this phase, students compose three essays over three 24-hour periods spread out over three weeks (weeks five, six, and seven of fall term in the fourth year). The first essay covers the primary field, with questions submitted by the examiner representing that field; the second covers the secondary field in the same manner; the third essay is comparative, addressing texts from both the primary and secondary fields, with questions submitted by all three examiners. For the primary and secondary field exams, students choose between two questions; for the comparative exam, they choose one of three questions. No exam will cover the foundation field. Instead, the examiners will explore the full gamut of the student's reading list with questions designed to ascertain the student's mastery of his or her methods as applied to the primary and secondary fields.

The three examiners all grade and comment on the comparative essay and read the field exams. The two field exams are graded separately and commented upon by the responsible examiners, except in the case of a failing grade. In this circumstance, the student's essay is graded by the other two examiners, as well. If two out of three examiners fail an essay, the student may retake the exam in that area in the following term. The exam may be retaken no more than once. If more than one of the student's essays fails, or if the student fails a retake exam, he or she does not proceed to candidacy, but may be eligible for a terminal master's degree. Grades for these exams are high pass, pass, or no pass. Students learn their exam results in week nine of fall term—that is, two weeks after completion of the final essay.

Oral Examination

The oral examination is scheduled during week 10 or 11 of fall term; it is proctored by the exam committee chair and is usually two hours in length. The committee and the student revisit the written examinations, discussing areas of strength and weakness. In addition, the examiners may explore the student's expertise more deeply by asking questions about reading list materials not covered during the written exams.

While no grade is assigned for performance on the oral exam, the committee may determine recommendations and even requirements for future study, including retaking the oral examination. Recommendations are communicated in person to the student at the conclusion of the exam and in writing to the director of graduate studies as part of the committee chair's report on the exam. If substantive requirements or concerns have been articulated, the director of graduate studies will determine any official course of action to be taken.

For students who have failed one or more parts of the written exam, no oral examination will be held; instead, the time designated for the oral exam will be dedicated to a meeting with the student, the exam committee, and the director of graduate studies. Participants review the

exam performance, discuss a possible retake exam, and/or review the advisability of a terminal master's degree.

Prospectus and Doctoral Candidacy

By Friday of week five of winter term in the fourth year, the student must designate a dissertation committee, including the dissertation chair and outside reader. The director of graduate studies must approve this committee. For details concerning faculty eligibility, students should refer to the Graduate School's Dissertation Committee Policy at gradschool.uoregon.edu/committee-policy.

Committee members should be consulted during the process of writing the dissertation prospectus. A first draft of the prospectus should be submitted to the members of the dissertation committee by Friday of week 10 of winter term. A completed draft of the prospectus, approved by all four committee members, must be submitted by Friday of week five of spring term in the fourth year. After final approval from the director of graduate studies, the prospectus conversation is scheduled between weeks seven and nine of spring term.

A prospectus is not a first dissertation chapter; it is a snapshot of the dissertation project as envisioned by the student, prior to the completion of the bulk of his or her research. The prospectus is typically 10 to 15 pages in length. It should include a clear, concise examination of the problem to be studied, along with a compelling sense of the larger issues at stake in the project, both for the immediate topic and for the field at large. In addition, the prospectus should provide a clear vision of the project's trajectory: a narrative account of the dissertation's structure, an outline of chapters, and a justification for the particular authors and texts to be examined. A substantial research bibliography should be appended.

Prospectus Conversation

The prospectus conversation is scheduled between weeks seven and nine of spring term in the fourth year. This conversation, which includes the members of the dissertation committee, is facilitated by the committee chair and helps to develop the student's plans for the dissertation. Areas of strength and weakness in the project are discussed, and specific recommendations about structure, bibliography, and method are presented. After successful completion of this conversation, and with approval of the director of graduate studies and the graduate committee, the student advances to candidacy.

Dissertation

The dissertation, which is defended in a final oral presentation, is typically completed within two years of advancement to candidacy. Dissertations in a discipline such as comparative literature can hardly be said to follow exact specifications, but as a general principle any such project should involve at least two authors, works, and national literatures, and an explicit methodological orientation.

Courses

COLT 101. Introduction to Comparative Literature. 4 Credits.

Introduction to the comparative study of literature. Emphasis on literary genre, world literature, historical period.

COLT 102. Introduction to Comparative Literature. 4 Credits.

Introduction to the comparative study of literature. Emphasis on world literature in its social and political contexts.

COLT 103. Introduction to Comparative Literature. 4 Credits.

Study of visual culture from around the world.

COLT 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

COLT 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

COLT 211. Comparative World Literature. 4 Credits.

Explores literature from a global standpoint. Examines movement of literary forms (e.g., genres, motifs, rhetorical modes) from one culture, region, historical epoch to the next.

COLT 212. Comparative World Cinema. 4 Credits.

Introduces the principles of comparative analysis, exploring the aesthetic, ideological, and socio-economic exchanges between national cinematic traditions. Themes vary by instructor. Recent themes include Melodrama, Zombies, Queer Cinema.

COLT 231. Literature and Society. 4 Credits.

Introduction to the interdisciplinary study of literature in relation to society and politics. Draws on perspectives from political science, law, sociology, and related fields.

COLT 232. Literature and Film. 4 Credits.

Introduction to the interdisciplinary study of literature and film. Draws on perspectives from cinema studies, media aesthetics, and related fields.

COLT 301. Approaches to Comparative Literature. 4 Credits.

Introduction to theory and methods in comparative literature, with some attention to the history and problems of the discipline.

COLT 302. Theories of Poetry. 4 Credits.

Introduction to the study of poetry and poetic form from a world perspective. Offered alternate years.

COLT 303. Theories of the Novel. 4 Credits.

Introduction to the study of narrative and the novel from a world perspective. Offered alternate years.

COLT 304. Theories of Drama. 4 Credits.

Introduction to the study of drama and performance from a world perspective. Offered alternate years.

COLT 305. Cultural Studies. 4 Credits.

Introduction to the interdisciplinary study of cultural discourses and practices.

COLT 360. Gender and Identity in Literature. 4 Credits.

Introduction to the study of gender in literature, from Asia to Europe to the Americas, and from the classics to the late 20th century.

COLT 370. Comparative Comics. 4 Credits.

Examines genre of narrative from a comparative and global standpoint, reviewing the impact of comics and other visual media on questions of national, regional, and ethnic identity. Offered alternate years.

COLT 380. Comparative Media: [Topic]. 4 Credits.

Critical analysis of a range of media from a transnational and/or intercultural perspective. Taught as a hybrid course blending face-to-face and online learning. Recent topics include Tokyo Cyberpunk, Asian Horror, Listening to Cinema. Repeatable thrice for a maximum of 16 credits.

COLT 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

COLT 401. Research: [Topic]. 1-21 Credits.

Repeatable.

COLT 403. Thesis. 1-12 Credits.

Repeatable.

COLT 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

COLT 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

COLT 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

COLT 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

COLT 415. Capstone Seminar. 4 Credits.

Senior seminar for all comparative literature students includes development and presentation of an original research project.

COLT 440. Studies in Genre: [Topic]. 4 Credits.

Analysis of specific literary genres, modes, or both (e.g., lyric poetry, comedy, allegory). Repeatable when topic changes. Offered every two to three years.

COLT 450. Comparative Studies in Cinema: [Topic]. 4 Credits.

Advanced consideration of the aesthetic (including literary) and cultural contexts of world film. Repeatable twice when topic changes for maximum of 12 credits.

COLT 460. Major Theorists: [Topic]. 4 Credits.

Concentrates on the work of a single literary or cultural theorist (e.g., Walter Benjamin, Jacques Derrida, Gayatri Spivak). Repeatable twice for a maximum of 12 credits when topic changes. Offered every two to three years.

COLT 462. Cultural Intersections: [Topic]. 4 Credits.

Studies designated issues between literatures and societies remote from one another, e.g., "minor" and "major" cultures, Asia and the West. Repeatable twice when topic changes for maximum of 12 credits.

COLT 470. Studies in Identity: [Topic]. 4 Credits.

Advanced study of gender, ethnicity, and other identity formations in literature. Repeatable when topic changes. Offered every two to three years.

COLT 490. Literature and Philosophy: [Topic]. 4 Credits.

Establishes a dialogue between philosophy and literature—as disciplines, as historical constructions, as value systems. Repeatable twice when topic changes for maximum of 12 credits.

COLT 503. Thesis. 1-16 Credits.

Repeatable.

COLT 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

COLT 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

COLT 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

COLT 540. Studies in Genre: [Topic]. 4 Credits.

Analysis of specific literary genres, modes, or both (e.g., lyric poetry, comedy, allegory). Repeatable when topic changes. Offered every two to three years.

COLT 550. Comparative Studies in Cinema: [Topic]. 4 Credits.

Advanced consideration of the aesthetic (including literary) and cultural contexts of world film. Repeatable twice when topic changes for maximum of 12 credits.

COLT 560. Major Theorists: [Topic]. 4 Credits.

Concentrates on the work of a single literary or cultural theorist (e.g., Walter Benjamin, Jacques Derrida, Gayatri Spivak). Repeatable twice for a maximum of 12 credits when topic changes. Offered every two to three years.

COLT 562. Cultural Intersections: [Topic]. 4 Credits.

Studies designated issues between literatures and societies remote from one another, e.g., "minor" and "major" cultures, Asia and the West. Repeatable twice when topic changes for maximum of 15 credits.

COLT 570. Studies in Identity: [Topic]. 4 Credits.

Advanced study of gender, ethnicity, and other identity formations in literature. Repeatable when topic changes. Offered every two to three years.

COLT 590. Philosophical Problems and Literary Contexts: [Topic]. 4-5 Credits.

Establishes a dialogue between philosophy and literature—as disciplines, as historical constructions, as value systems. Repeatable twice when topic changes for maximum of 15 credits.

COLT 601. Research: [Topic]. 1-16 Credits.

Repeatable.

COLT 603. Dissertation. 1-16 Credits.

Repeatable.

COLT 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

COLT 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

COLT 608. Colloquium: [Topic]. 1-16 Credits.

Repeatable.

COLT 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

COLT 613. Graduate Studies in Translation. 4-5 Credits.

Approaches to literary translation in its theoretical, practical and pedagogical dimensions.

COLT 614. Graduate Studies in Comparative Literature. 5 Credits.

Overview of the state of the discipline. Treats historical and theoretical developments in literary studies including philology and cultural studies; reconsiders the place of comparative literature in a global, pluralistic curriculum.

COLT 615. Graduate Studies in Comparative Literature. 5 Credits.

Survey of contemporary literary theory.

COLT 616. Transmedial Aesthetics. 5 Credits.

Approaches to the analysis of film, photography, video, and new media. Emphasis on intersections between comparison and media theory.

Computer and Information Science

Joseph Sventek, Department Head

541-346-4408

120 Deschutes Hall

1202 University of Oregon

Eugene OR 97403-1202

Computer science, the study of computation, offers students the challenge and excitement of a dynamically evolving science whose

discoveries and applications affect every aspect of modern life.

Computer science is a rich intellectual field where practitioners apply a computational approach to address a wide variety of interesting and challenging problems. Computer scientists are engaged in research in core areas of theoretical computer science, computer systems design, algorithms, and programming languages, as well as more application-oriented areas such as databases, networking, and informatics.

The Department of Computer and Information Science (CIS) is committed to a strong research program and a rewarding educational experience for undergraduate and graduate students.

The department offers instruction and opportunities for research in the following areas:

- artificial intelligence
- assistive technology
- computational science
- computer security
- data science
- high-performance computing
- human-computer interaction
- internet of things
- machine learning
- networking and systems
- parallel and distributed computing
- programming languages and compilers
- scientific visualization
- smart and connected communities
- software engineering
- theoretical computer science
- universal access

The department offers bachelor's, master's and doctoral degrees; in addition, two undergraduate minors and a selection of service courses are offered for students who want introductory exposure to computers and computer applications. The computer science programs at the university are continually evolving as the discipline matures and as students' needs change.

Facilities

The Department of Computer and Information Science is housed in Deschutes Hall, which holds faculty and graduate student offices and extensive laboratory space for research and instruction.

Undergraduate majors may use campus computing labs staffed by CIS undergraduate tutors and lab assistants. Undergraduate majors taking upper-division courses and graduate students share a collaborative computing lab for the exclusive use of CIS students. Graduate and undergraduate students engaged in active research also have access to the computing facilities of the associated research lab.

The cognitive modeling and eye-tracking laboratory features multiple Eyegaze eye trackers and a Tobii eye tracker, used to collect and analyze the eye movements people make during human-computer interactions, and to develop eye-controlled user interfaces for people with disabilities. The lab also features a VR Sonic SoundSim Cube spatialized audio server used to explore three-dimensional sound perception.

Research in high-performance computing and computational science is supported by resources shared among the department, the Computational Science Institute, and the Neuroinformatics Center. In addition, the University of Oregon, through a Major Research Instrumentation Program grant from the National Science Foundation, has created a large-scale computational and storage resource to support multidisciplinary scientific research. The Applied Computational Instrument for Scientific Synthesis (ACISS) is a heterogeneous platform managed as a cloud system for computational science, informatics, and data science.

The Advanced Integration and Mining Laboratory fosters research on finding useful patterns from the mountain of data on biology, health, medicine, neuroscience, physiology, and social networks and on integrating data from structurally and semantically heterogeneous resources such as databases, online social networks, and the World Wide Web.

The Oregon Network Research Group Laboratory features an array of high-end servers, experimental test beds, and mass storages for developing and testing of new network protocols, conducting large-scale network measurement and data analysis.

The Network and Security Research Laboratory features hardware and software facilities devoted to experimentation, simulation, and analysis of various computer networking techniques (such as Internet routing, software-defined networking, online social networking, and Internet of things), malicious network attacks (such as distributed denial-of-service attacks, traffic route hijacking, Internet worms, botnets, Sybil attacks), and cyberdefense technologies (such as firewalls, antiphishing solutions, distributed denial-of-service defense, IP spoofing prevention, Internet routing security, Internet privacy protection, and Internet of things security and privacy).

The Ubiquitous Computing Laboratory uses a mix of custom-designed and commercial hardware to study the application of assistive software to everyday living. Researchers are particularly interested in the design of software for those with impairments that limit their use of commercial, off-the-shelf software.

The Research Group on Computing and Data-Understanding at Extreme Scale (CDUX) pursues problems in scientific visualization, high-performance computing, scientific computing, and computer graphics, and especially focuses on problems where these areas intersect. The group performs research for the Department of Energy, the National Science Foundation, and private companies, delivered in widely used software tools such as the VisIt visualization tool, and helps develop new tools, like VTK-m, a library for many-core visualization and analysis.

The High-Performance Computing Laboratory conducts research in several areas, including static analysis of software for building performance models and detecting security vulnerabilities, source-to-source approaches for semantics-preserving (e.g., performance optimization) and semantics-modifying (e.g., security-vulnerability fixes, automatic differentiation) transformations. The lab also performs research in modeling run-time characteristics of software, and developing and employing numerical optimization techniques for maximizing multiple run-time objectives (performance, energy efficiency, resilience).

Software engineering is applied to two emerging areas: data science and the Internet of Things. The Flare Project is exploring new tools for data scientists. The project involves working with data science frameworks (e.g., Jupyter) and the interactive development environments (with humans in the loop) that support those frameworks. The Foundry Project

is exploring software frameworks to support the Internet of Things with a specific emphasis on reworking distributed algorithms that were devised in an era when cyber-security was less of a threat.

In addition, the university is a member of Internet2, a high-speed network connecting major research institutions.

Careers

The undergraduate program is designed to prepare students for professional careers or graduate study. The field of computer science, which has become increasingly interdisciplinary over the past decade, offers a rich array of opportunities in fields as disparate as medicine, manufacturing, and the media as well as the computer industry.

Graduates come away with confidence that they can specify, design, and build large software systems; analyze the effectiveness of computing techniques for a specific problem; and work effectively in problem-solving teams. The master of arts (MA) and master of science (MS) degree programs prepare students for higher-level positions in the areas described above as well as for teaching positions in community colleges. The PhD degree program trains students as scientists for advanced research in specialized areas of computer science and for teaching in universities.

Faculty

Zena M. Ariola, professor (programming languages, lambda calculus, logic). BS, 1980, Pisa; PhD, 1992, Harvard. (1992)

Hank Childs, associate professor (scientific visualization, high-performance computing, computer graphics). BS, 1999, PhD, 2006, California, Davis. (2013)

Dejing Dou, professor (artificial intelligence, information integration, data mining). BE, 1996, Tsinghua; MS, 2000, PhD, 2004, Yale. (2004)

Ramakrishnan Durairajan, assistant professor (computer networking, networked systems). BS, 2010, College of Engineering, Guindy; MS, 2014, PhD, 2017, Wisconsin, Madison. (2017)

Stuart Faulk, instructor. BA 1973, Cornell; PhD, 1989, North Carolina, Chapel Hill. (1989)

Stephen F. Fickas, professor (software engineering, formal modeling of distributed systems, digital humanities). BS, 1971, Oregon State; MS, 1973, Massachusetts; PhD, 1983, California, Irvine. (1983)

Kathleen Freeman Hennessy, senior instructor; director of undergraduate studies. BS, 1982, Bucknell; PhD, 1993, Oregon. (2011)

Michael Hennessy, senior instructor. BS, 1982, MS, 1984, Oregon. (1984)

Anthony J. Hornof, professor (human-computer interaction, assistive technology, cognitive modeling). BA, 1988, Columbia; MS, 1996, PhD, 1999, Michigan. (1999)

Lei Jiao, assistant professor (networking and distributed computing, performance modeling and evaluation, algorithm design and application). BS, 2007, MS, 2010, Northwestern Polytechnical; PhD, 2014, Göttingen. (2016)

Jun Li, professor (computer and network security, network architectures and protocols, distributed systems). BS, 1992, Peking; ME, 1995,

Chinese Academy of Sciences; MS, 1998, PhD, 2002, California, Los Angeles. (2002)

Daniel Lowd, associate professor (machine learning, data mining, artificial intelligence). BS, 2003, Harvey Mudd College; MS, 2005, PhD, 2010, Washington (Seattle). (2009)

Allen D. Malony, professor (parallel processing, performance evaluation, neuroinformatics). BS, 1980, MS, 1982, California, Los Angeles; PhD, 1990, Illinois, Urbana-Champaign. (1991)

Boyana Norris, associate professor (high-performance computing, source-code analysis and transformation, performance engineering). BS, 1995, Wake Forest; PhD, 2000, Illinois, Urbana-Champaign. (2013)

Reza Rejaie, professor (computer networks, social computing, network measurement). BS, 1991, Sharif University of Technology; MS, 1996, PhD 1999, Southern California. (2002)

Joseph Sventek, professor (complex event processing, Internet of Things). BS, 1973, Rochester; PhD, 1979, California, Berkeley. (2014)

Dave Wilkins, instructor. BA, 1965, Whitman College; MS, 1971, Oregon (2010)

Eric D. Wills, senior instructor. BS, 2000, MS, 2002, PhD, 2008, Oregon. (2010)

Christopher B. Wilson, associate professor (computational complexity, models of computation). BS, 1978, Oregon; MS, 1980, PhD, 1984, Toronto. (1984)

Michal Young, associate professor (software engineering, software test and analysis). BA, 1983, Oregon; MS, 1985, PhD, 1989, California, Irvine. (1997)

Emeriti

Sarah A. Douglas, professor emerita. AB, 1966, California, Berkeley; MS, 1979, PhD, 1983, Stanford. (1983)

Arthur M. Farley, professor emeritus. BS, 1968, Rensselaer Polytechnic Institute; PhD, 1974, Carnegie-Mellon. (1974)

Virginia M. Lo, associate professor emerita. BA, 1969, Michigan; MS, 1977, Pennsylvania State; PhD, 1983, Illinois, Urbana-Champaign. (1984)

Eugene M. Luks, professor emeritus. BS, 1960, City University of New York, City College; PhD, 1966, Massachusetts Institute of Technology. (1983)

Andrzej Proskurowski, professor emeritus. MS, 1967, Warsaw Technical; PhD, 1974, Royal Institute of Technology, Stockholm. (1975)

Kent A. Stevens, professor emeritus. BS, 1969, MS, 1971, California, Los Angeles; PhD, 1979, Massachusetts Institute of Technology. (1982)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Heidi Kaufman, English

Amy K. Lobben, geography

Marc Schlossberg, planning, public policy and management

McKay M. Sohlberg, special education and clinical sciences

Sanjay Srivastava, psychology

Jeffrey Stolet, music

Don M. Tucker, psychology

- **Bachelor of Arts**
- **Bachelor of Science**
- **Computer and Information Science Minor**
- **Computer Information Technology Minor**

Undergraduate Studies

The Department of Computer and Information Science offers a major and a minor in computer and information science, a major in mathematics and computer science, and a minor in computer information technology.

The computer and information science major is intended for students who want to study computers and computation with strong mathematical and scientific foundations. The mathematics and computer science major emphasizes formal and abstract problem solving complemented by computational methods and computer technologies. This program, administered jointly with the Department of Mathematics, is described in the **Mathematics and Computer Science** section of this catalog. Both of these majors lead to the bachelor of arts (BA) or bachelor of science (BS) degrees.

Students majoring in computer and information science may choose to focus their studies in one of several areas of specialization, or tracks, which build on the standard CIS core requirements. Each track specifies a set of coordinated choices for fulfilling upper-division computer science and other elective requirements. Students interested in specializing in a track should contact their advisor as early as possible. Current computer science tracks include foundations, software development, computer networks, database and informatics, multimedia, business information systems, computational science, and security.

Preparation

High school students who plan to major in computer and information science should pursue a strong academic program, including substantial work in mathematics, the sciences, and writing. Courses in algebra, geometry, trigonometry, and more advanced topics should be included. Courses in computer programming or computer technology are useful but not required. Upon arrival at the university, students should consult with a CIS advisor to determine the entry-level course best suited to the student's background.

Transfer and Second Baccalaureate Students

Transfer and second baccalaureate students should consult the online Interactive Transfer Catalog as well as a CIS advisor to determine whether computer science, mathematics, and science courses they have taken fulfill the major requirements. Completing only general-university requirements prior to transferring to the University of Oregon will not be sufficient preparation to complete a CIS degree in two years.

Students attending community college in Oregon are encouraged to obtain the associate of arts Oregon transfer degree or the associate of science Oregon transfer degree in computer science before entering the University of Oregon. While earning this degree, community college

transfer students should take discrete mathematics and computer science. In addition, calculus and laboratory science are recommended.

Bachelor of Arts Degree Requirements

To earn a BA in computer and information science, majors must complete the requirements for a BS in addition to demonstrating proficiency in a second language. Computer and information science majors must complete at least 60 credits of CIS courses, of which 24 must be earned in residence at the University of Oregon. In addition, majors must complete 28 credits in mathematics, 12 credits in the sciences, and 4 credits of technical or business writing. The specific requirements for the CIS major fall into five categories: core courses, track and elective courses, mathematics, writing, and science.

Computer Science I (CIS 210), Computer Science II (CIS 211), Computer Science III (CIS 212), Elements of Discrete Mathematics I (MATH 231), and Elements of Discrete Mathematics II (MATH 232) must be passed with grades of B– or better before students can take the upper-division core courses. Courses required for the major must be taken for a letter grade; upper-division electives in CIS courses numbered 410 or higher (12 credits) must also be taken for a letter grade. Upper-division courses must be passed with a grade of C– or better.

Code	Title	Credits
Core Courses: Lower Division		
CIS 210–212	Computer Science I-III	12
MATH 231–232	Elements of Discrete Mathematics I-II	8
Core Courses: Upper Division		
CIS 313	Intermediate Data Structures	4
CIS 314	Computer Organization	4
CIS 315	Intermediate Algorithms	4
CIS 330	C/C++ and Unix	4
CIS 415	Operating Systems	4
CIS 422	Software Methodology I	4
CIS 425	Principles of Programming Languages	4
Core Courses: Mathematics		
Select one of the following:		8
MATH 251–252	Calculus I-II	
MATH 261–262	Calculus with Theory I-II	
MATH 246–247	Calculus for the Biological Sciences I-II	
Select two of the following:		8
MATH 347	Fundamentals of Number Theory I	
or MATH 35:Elementary Numerical Analysis II		
or MATH 39:Fundamentals of Abstract Algebra I		
MATH 253	Calculus III	
or MATH 263:Calculus with Theory III		
MATH 341	Elementary Linear Algebra	
MATH 343	Statistical Models and Methods	
or MATH 425:Statistical Methods I		
Core Courses: Science		
Select 12 credits from the following: ¹		12
Biology ²		
CH 111	Introduction to Chemical Principles	

or CH 113 The Chemistry of Sustainability
 or CH 221 General Chemistry I
 or CH 224H Advanced General Chemistry I

BI 211,213 General Biology I,III
 or BI 211–212 General Biology I-II

Chemistry ²

CH 221–223 General Chemistry
 or CH 224H-Honors General Chemistry 226H

Earth Sciences

GEOL 201 Dynamic Planet Earth
 GEOL 202 Earth's Surface and Environment
 GEOL 203 History of Life

Geography

GEOG 141 The Natural Environment

Select two of the following:

GEOG 321 Climatology
 GEOG 322 Geomorphology
 GEOG 323 Biogeography

Physics ^{2,3}

PHYS 201–203 General Physics
 or PHYS 25:Foundations of Physics I 253

Psychology

PSY 201 Mind and Brain
 PSY 202 Mind and Society

Select one of the following:

PSY 304 Biopsychology
 PSY 348 Music and the Brain

Core Course: Writing

WR 320 Scientific and Technical Writing 4
 or WR 321 Business Communications

Electives: Upper Division

Upper-division CIS courses in student's chosen track (track information below) 12

Upper-division CIS courses in student's chosen track, honors thesis, capstone project, or other upper-division courses ^{4,5} 8

Upper-division mathematics or theoretical computer science course ⁶ 4

Total Credits 104

¹ To support interdisciplinary study, students on any track are encouraged to complete a minor (typically 24–32 credits) or major in a computing-related field. Students who complete a minor (other than computer information technology or mathematics) or another major (including mathematics) in a computing-related field may, with the approval of the Undergraduate Education Committee, replace the CIS laboratory science requirement with the completed minor or major.

² Students are encouraged to complete the accompanying lab courses.

³ Physics is recommended for networks track students.

⁴ If Experimental Course: [Topic] (CIS 410) courses are applied, they must have different topic subtitles to satisfy this requirement.

⁵ A maximum of 8 credits in courses numbered 399–409. Courses numbered 400–499 may be taken for a maximum of 4 credits when used to satisfy this requirement. Special Studies: [Topic] (CIS 399), Seminar: [Topic] (CIS 407), and Experimental Course: [Topic] (CIS 410) courses must have different topic subtitles to satisfy this requirement.

⁶ The mathematics elective is selected from upper-division mathematics courses with a prerequisite of Calculus II (MATH 252) or higher, or from theoretical computer science courses. A list of theoretical computer science courses is available in the computer science office or the department website.

Bachelor of Science Degree Requirements

To earn a BS in computer and information science, majors must complete at least 60 credits of CIS courses, of which 24 must be earned in residence at the University of Oregon. In addition, majors must complete 28 credits in mathematics, 12 credits in the sciences, and 4 credits of technical or business writing. The specific requirements for the CIS major fall into five categories: core courses, track and elective courses, mathematics, writing, and science.

Computer Science I (CIS 210), Computer Science II (CIS 211), Computer Science III (CIS 212), Elements of Discrete Mathematics I (MATH 231), and Elements of Discrete Mathematics II (MATH 232) must be passed with a grade of B– or better before students can take the upper-division core courses. Courses required for the major must be taken for a letter grade; upper-division electives in CIS courses numbered 410 or higher (12 credits) must also be taken for a letter grade. Upper-division courses must be passed with a grade of C– or better.

Upper-division CIS courses in student's chosen track, honors thesis, capstone project, or other upper-division courses ^{4,5} 8

Upper-division mathematics or theoretical computer science course ⁶ 4

Total Credits 104

- ¹ To support interdisciplinary study, students on any track are encouraged to complete a minor (typically 24–32 credits) or major in a computing-related field. Students who complete a minor (other than computer information technology or mathematics) or another major (including mathematics) in a computing-related field may, with the approval of the Undergraduate Education Committee, replace the CIS laboratory science requirement with the completed minor or major.
- ² Students are encouraged to complete the accompanying lab courses.
- ³ Physics is recommended for networks track students.
- ⁴ If Experimental Course: [Topic] (CIS 410) courses are applied, they must have different topic subtitles to satisfy this requirement.
- ⁵ A maximum of 8 credits in courses numbered 399–409. Courses numbered 400–499 may be taken for a maximum of 4 credits when used to satisfy this requirement. Special Studies: [Topic] (CIS 399), Seminar: [Topic] (CIS 407), and Experimental Course: [Topic] (CIS 410) courses must have different topic subtitles to satisfy this requirement.
- ⁶ The mathematics elective is selected from upper-division mathematics courses with a prerequisite of Calculus II (MATH 252) or higher, or from theoretical computer science courses. A list of theoretical computer science courses is available in the computer science office or the department website.

Upper-Division Electives

In addition to the core CIS, mathematics, science, and writing courses, computer and information science majors must complete 20 credits of upper-division computer science and 4 credits of upper-division mathematics or theoretical computer science. Students complete at least 12 of their upper-division CIS credits with courses from their selected track; the 8 remaining upper-division credits may be additional track courses, an honors thesis, capstone project, or upper-division electives.

A maximum of 8 credits in CIS courses, numbered 399–409, may be applied to the upper-division electives requirement. Courses numbered 400–409 may be taken for a maximum of 4 credits when used to satisfy this requirement. (Courses numbered 399, 407, or 410 may be repeated with different course subtitles.) Special Studies: [Topic] (CIS 399) and Experimental Course: [Topic] (CIS 410) courses used as upper-division electives must have a prerequisite of CIS 313 and have regular weekly class meetings and homework assignments.

The mathematics elective is selected from upper-division mathematics courses with a prerequisite of MATH 252 or higher, or from theoretical computer science courses. A list of courses is available in the computer science office or the department website.

Tracks

Tracks highlight areas of specialization within the department and guide student elective choices. Each track has an approved list of CIS courses, available from the computer science office or the department website. Tracks may also include recommended science or mathematics courses or a recommended minor in another field.

Foundations Track

The foundations track is the most general track, allowing a student to choose a set of electives tailored to his or her interests and intended choice of career.

Software Development Track

The software development track prepares students for careers in software engineering, software project management, software quality assurance, and other areas involving the creation of software. Course work focuses on solving problems related to the cost of development as well as the quality of the software delivered in complex software projects.

Computer Networks Track

The computer networks track prepares students for careers as network systems administrators, network protocol developer-programmers, or network security specialists in a wide range of environments, including educational institutions, business enterprises, and government agencies, as well as for advanced graduate studies and research in the field of computer networks. Course work encompasses most aspects of network theory and practice.

Database and Informatics Track

The database and informatics track prepares students for careers in database application programming, database design, doctoral work in business administration, and graduate work in informatics and database theory. Course work includes data structures, data architecture, and data mining.

Business Information Systems Track

Graduates in the business information systems track are qualified to work as analysts, managers, developers, or consultants, and to enter leadership-development programs. Completion of this track, combined with professional work experience and economics courses, prepares students to enter the Lundquist College of Business MBA program at the University of Oregon, and MBA programs at other universities.

Computational Science Track

The computational science track prepares students to apply computational and mathematical techniques to the analysis and management of biological data. Course work in this track combines depth in applied and formal aspects of computer science with rigorous training in biology.

Security Track

The security track provides a foundation in topics and concepts relating to the security of computer systems and networks. It prepares students to work as security analysts and provides a highly desirable skill set for all employers, ranging from software engineers to administrators, in both the private and government sectors. It also provides a foundation for further graduate study and research in security. Course work encompasses a strong understanding of computer systems and networks and their security, and can be tailored to a more theoretical or more applied focus.

Preparation for the Major

Students who take Computer Science I (CIS 210) are expected to have completed Elementary Functions (MATH 112) or the equivalent and to have prior programming experience from a high school course, through employment, or in a course such as Introduction to Programming and Problem Solving (CIS 122). Students who are unsure about their level of programming preparation should meet with a CIS advisor.

Sequence of Courses for Students with Programming Experience and Mathematical Background

First Year		Credits
MATH 231–232	Elements of Discrete Mathematics I-II	8
CIS 210–212	Computer Science I-III	12
Total Credits:		20

Sequence of Courses for Students without Programming Experience and Mathematical Background

First Year		Credits
Fall		
MATH 112	Elementary Functions	4
Select one of the following: ¹		4
CIS 105	Explorations in Computing	4
CIS 122	Introduction to Programming and Problem Solving	4
CIS 111	Introduction to Web Programming	4
Winter		
MATH 231–232	Elements of Discrete Mathematics I-II ²	8
CIS 210–212	Computer Science I-III ²	12
Total Credits:		28

¹ Taken either in first term or first year. Students are encouraged to take more than one course. CIS 122 strongly recommended.

² Taken in either second term or second year.

Major Progress Review and Major in Good Standing

Each major must meet with a computer science advisor and file the Major Progress Review form while taking Intermediate Data Structures (CIS 313) or Computer Organization (CIS 314). Mathematics and CIS core courses and at least 12 credits of CIS upper division elective courses numbered 410 or higher must be taken for letter grades and passed with grades of C– or better. Other courses used to satisfy the major requirements may be taken for letter grades or pass/no pass. Grades of C– or better or P must be earned in these courses. At least 12 of the CIS upper-division credits applied to the degree must be taken in residence at the university. A student who receives two grades below C– in the upper-division core, or three grades below C– in any CIS upper-division courses, will be removed from the major.

Mathematics and Computer Science

The Department of Computer and Information Science and the Department of Mathematics jointly offer an undergraduate major in mathematics and computer science, leading to a bachelor of arts or a bachelor of science degree. This program is described in the Mathematics and Computer Science section of this catalog. This major prepares students for a wide range of careers in the high tech industry, for advanced graduate study, and for careers as middle school and high school teachers.

Honors Program

Students with a GPA of 3.50 or higher in computer and information science and a cumulative GPA of 3.50 or higher are encouraged to apply to the department honors program after completing Intermediate Data Structures (CIS 313), Computer Organization (CIS 314), Intermediate Algorithms (CIS 315), and C/C++ and Unix (CIS 330). The application form is available in the department office. To graduate with departmental honors, a student must write a thesis under the supervision of a faculty member.

Internships

Practical work experience in the software industry is seen as a valuable complement to academic course work. The department works with students to place them in internship positions in the summer and throughout the academic year. Students may also use the services of the University Career Center and other agencies to identify internship opportunities. Majors may receive academic credit for internships. To earn upper-division elective credit for an internship, the work experience must be at a technical level beyond Intermediate Data Structures (CIS 313) and be sponsored by a CIS faculty member. A contract signed by the faculty sponsor, internship supervisor, and the student must be filed with the department before the internship begins.

Research

Faculty members in the computer and information science department receive grants from government, industry, and private sources to conduct research in their areas of expertise. Undergraduate majors are encouraged to take part in the various research groups in the department. Most students begin approaching faculty members for such opportunities while taking the 300-level courses. Research can be used to fulfill upper-division electives, as part of an honors thesis, or in some cases as a paid internship.

Awards and Honor Societies

The Erwin and Gertrude Juilfs Scholarship in Computer and Information Science, in honor of Erwin and Gertrude Juilfs, is awarded to one or more students who show exceptional promise for achievement as evidenced by grade point average, originality of research, or other creative activities.

The Geoffery Eric Wright Outstanding Junior Award, in honor of CIS student Geoffery Wright, is a scholarship for students displaying high-quality academic performance, commitment to learning, and a promise of further outstanding achievement in computer and information science and its applications.

The J. Donald Hubbard Scholarship in Computer and Information Science, in honor of J. Donald Hubbard, recognizes an undergraduate or graduate student who shows outstanding promise in the fields of computer-human interaction, computer graphics, or multimedia.

The Phillip Seeley Scholarship in Computer and Information Science has been established as a permanent endowment to provide a source of income supporting a scholarship for outstanding undergraduate CIS students. This scholarship is based on overall quality of academic work, commitment to learning, and potential for further academic achievement. Preference is given to resident Oregon students with financial need, as determined by the UO Office of Student Financial Aid and Scholarships.

Students with outstanding academic accomplishments may be invited to become members of Upsilon Pi Epsilon, the international honor society in computer science.

Minor Requirements

Computer and Information Science Minor

The minor in computer and information science introduces the theories and techniques of computer science and develops programming skills that are applicable to the student's major. It is a strong complement to a major in any of the sciences and in related fields such as multimedia arts. Students from all majors have found their career opportunities enhanced through the CIS minor.

Before enrolling in upper-division courses, students planning a minor in computer and information science must file an application form with the department. Each student should consult with a CIS faculty advisor to plan the minor program.

Courses applied to the CIS minor must be completed with grades of C– or better.

Code	Title	Credits
Lower-Division Courses		
CIS 210–212	Computer Science I-III	12
MATH 231–232	Elements of Discrete Mathematics I-II	8
Upper-Division Courses		
CIS 313	Intermediate Data Structures	4
Electives ¹		8
Total Credits		32

¹ Classes number CIS 399-409 with departmental permission only

Computer Information Technology Minor

The minor in computer information technology (CIT) prepares students to work with evolving technologies for work environments that require development and management of web applications, databases, computer networks, open-source platforms, and cloud computing. It provides practical experience in understanding the tools and technologies of the computing field. It goes well with majors in the professional schools such as business and journalism and is an excellent match with almost any major on campus.

Before enrolling in CIT upper-division courses, students planning a minor in computer information technology must file an application form with the department. Each student should consult with an assigned CIT faculty advisor to plan the minor program.

Lower-division courses must be completed with grades of B– or better. Upper-division courses must be taken in sequence and are offered only once a year. Upper-division courses must be completed with grades of C– or better.

Code	Title	Credits
Lower-Division Courses		
Option 1:		12
CIS 110	Fluency with Information Technology	
CIS 111	Introduction to Web Programming	
CIT 281	Web Applications Development I	

Option 2:

CIS 111	Introduction to Web Programming	
CIS 115	Multimedia Web Programming	
CIT 281	Web Applications Development I	
Upper-Division Courses		
CIT 381	Database Systems	4
CIT 382	Web Applications Development II	4
CIT 383	Networking Fundamentals	4
Total Credits		24

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them. Additional information may be found at the department website (<https://cs.uoregon.edu>).

- Master of Arts
- Master of Science
- Doctor of Philosophy

Graduate Studies

The department offers programs leading to the master of arts (MA), master of science (MS), and doctor of philosophy (PhD).

Master's Degree Program

Admission

Admission to the master's degree program in computer and information science is competitive. It is based on prior academic performance, Graduate Record Examinations (GRE) scores, and computer science background. Minimum requirements for admission with graduate master's status are as follows:

1. Documented knowledge of
 - a. Principles of computer organization and operating systems
 - b. Programming languages
 - c. Program development and analysis
 - d. Data structures and algorithm analysis
2. GRE scores on the general test. The computer science test is optional.

3. A score of at least 100 on the Internet-based option of the Test of English as a Foreign Language (TOEFL iBT) or a score of 7.0 on the International English Language Testing System (IELTS) for applicants who have no justification for a waiver. Applicants may be required to study one or more terms at the university's American English Institute or elsewhere before taking any graduate work in the department. International applicants for teaching assistantships who score at least 26 on the speaking section of the TOEFL iBT will not have to take the Speaking Proficiency English Assessment Kit (SPEAK) test upon arrival at the university.
4. Three letters of recommendation, a statement of purpose, and unofficial transcripts (via online application). Note that official transcripts are sent to the UO Office of Admissions.

Grades from previous course work should indicate the ability to maintain at least a 3.00 grade point average in graduate-level courses.

Application materials should be submitted by December 15 for admission, via GradWeb (<http://gradweb.uoregon.edu>), for the following fall term.

Admission to the master's degree program requires the substantive equivalent of an undergraduate degree in computer science. A second bachelor's degree program can be used to gain the required level of computer science background. Students without this background may be admitted conditionally and required to complete remedial course work before achieving unconditional standing in the program.

Master of Arts Degree Requirements

Code	Title	Credits
Core Courses		
CIS 621	Algorithms and Complexity	4
CIS 624	Structure of Programming Languages	4
CIS 630	Distributed Systems	4
Cluster Courses		
Required course ¹		4
Two depth courses from cluster ¹		8
Electives		
Select 30 credits from the following:		30
CIS 601 & CIS 605	Research: [Topic] and Reading and Conference: [Topic] ²	
CIS 503	Thesis (plus 4 credits from CIS 601–608 for either course selected) ³	
or CIS 609	Final Project	
CIS 510 or CIS 610	Experimental Course: [Topic] ⁴	
CIS 601–CIS 608	Experimental Course: [Topic] ⁵	
Twelve credits in courses outside department in area closely related to professional goals ⁶		
Departmental courses numbered 500 or higher		
Total Credits		54

- 1 A list of clusters is available in the department office.
- 2 Up to 8 credits.
- 3 Up to 12 credits.
- 4 Must receive approval from the graduate education committee.
- 5 Up to 8 credits for master's students who do not complete a thesis or final project.

⁶ Courses must be approved by the student's academic advisor; options include courses in linguistics, mathematics, physics, and psychology.

The number of graded elective credits must be at least 18 (with no thesis) or at least 8 (with a thesis). Thesis credits must not exceed 12; combined thesis and research credits must not exceed 16.

Master of Science Degree Requirements

Code	Title	Credits
Core Courses		
CIS 621	Algorithms and Complexity	4
CIS 624	Structure of Programming Languages	4
CIS 630	Distributed Systems	4
Cluster Courses		
Required course ¹		4

Electives		
Select 30 credits from the following:		30
CIS 601 & CIS 605	Research: [Topic] and Reading and Conference: [Topic] ²	
CIS 503	Thesis (plus 4 credits from CIS 601–608 for either course selected) ³	
or CIS 609	Final Project	
CIS 510 or CIS 610	Experimental Course: [Topic] ⁴ Experimental Course: [Topic]	
CIS 601–CIS 608 ⁵		
Twelve credits in courses outside department in area closely related to professional goals ⁶		
Departmental courses numbered 500 or higher		
Total Credits		54

¹ A list of clusters is available in the department office.

² Up to 8 credits.

³ Up to 12 credits.

⁴ Must receive approval from the graduate education committee.

⁵ Up to 8 credits for master's students who do not complete a thesis or final project.

⁶ Courses must be approved by the student's academic advisor; options include courses in linguistics, mathematics, physics, and psychology.

The number of graded elective credits must be at least 18 (with no thesis) or at least 8 (with a thesis). Thesis credits must not exceed 12; combined thesis and research credits must not exceed 16.

Grade Requirements

The 24 credits in the required courses and the cluster courses must be passed with grades of B– or better. As many as 12 of the 30 elective credits may be taken pass/no pass (P/N); graded elective courses must be passed with grades of C or better. A 3.00 GPA must be maintained for courses taken in the program.

Master's Thesis

The research option requires a written thesis and 9 to 12 credits in Thesis (CIS 503). Thesis research is supervised by a faculty advisor; this advisor and other faculty members constitute the thesis committee. The master's

thesis is expected to be scholarly and to demonstrate mastery of the practices of computer science. This option is recommended for students who plan subsequent PhD research.

Master's Project

The project option requires a minimum of 9 credits, and as many as 12, in Final Project Final Project (CIS 609).

Under the supervision of a faculty member, the project may entail a group effort involving several master's degree students.

Accelerated Master's Degree Program

This program is open to students who earn a BS or BA degree in computer and information science at the University of Oregon and who want to enter the master's degree program.

If a UO undergraduate takes one or two 400-level electives that also are offered as 500-level courses, the student can petition the department to have 4 or 8 credits deducted from the total number of elective credits required for the master's degree. The student must earn an A– or better in the 400-level course and have an overall GPA of 3.50 in upper-division CIS courses to participate in this accelerated master's program. Note that all admission procedures, as outlined in the Master's Degree Program (p. 167) section, are also applicable. Applications are available in the department office.

Awards and Honor Societies

The Erwin and Gertrude Juilfs Scholarship in Computer and Information Science, in honor of Erwin and Gertrude Juilfs, is awarded to one or more students who show exceptional promise for achievement as evidenced by grade point average, originality of research, or other creative activities.

The J. Donald Hubbard Scholarship in Computer and Information Science, in honor of J. Donald Hubbard, recognizes an undergraduate or graduate student who shows outstanding promise in the fields of computer-human interaction, computer graphics, or multimedia.

The Gurdeep Pall Scholarship in Computer and Information Science, in honor of Gurdeep Pall, is awarded to a student based on the overall quality of their academic work, their commitment to learning, and their potential for further academic achievement.

Students with outstanding academic accomplishments may be invited to become members of Upsilon Pi Epsilon, the international honor society in computer science.

Doctoral Degree Program

The doctor of philosophy in computer and information science is, above all, a high-quality degree that is not conferred simply for the successful completion of a specified number of courses or years of study. It is a degree reserved for students who demonstrate a comprehensive understanding of computer science and an ability to do creative research. Each PhD student produces a significant piece of original research, presented in a written dissertation and defended in an oral examination.

The PhD program is structured to facilitate the process of learning how to do research. Students begin by taking required courses to build a foundation of knowledge that is essential for advanced research. Early in the program the student gains research experience by undertaking a directed research project under the close supervision of a faculty member and the scrutiny of a faculty committee. In the later stages of the program, students take fewer courses and spend most of their

time exploring their dissertation area to learn how to identify and solve open problems. The final steps are to propose an independent research project, do the research, and write and defend a dissertation.

Admission

Application materials should be submitted by December 15 for the following fall term. Materials include everything required for admission to the master's program as well as a discussion of the anticipated research area.

Students who enter the UO with a master's degree may petition the Graduate Education Committee for credit toward the course requirements listed below, indicating how their prior graduate work corresponds to these courses. See the graduate coordinator for the petition.

PhD Degree Requirements

Code	Title	Credits
Core Courses ¹		
CIS 621	Algorithms and Complexity	4
CIS 624	Structure of Programming Languages	4
CIS 630	Distributed Systems	4
Cluster Courses		
Required course ²		4
Two depth courses from cluster ²		8
Electives		
Twelve credits of 500-level courses (including 510 courses) ³		12
Twelve credits of 600-level courses ³		12
Total Credits		48

¹ Courses must be taken by the end of the student's second year.

² Selected from a list of approved clusters. This list is updated each year to reflect experimental and other courses offered that year.

³ For graduate-level courses taken in other UO departments, a petition to the Graduate Education Committee is required.

PhD candidates who enter the program without a master's degree in computer science must take 48 credits in graduate course work including the core and cluster courses required for the MS program. Doctoral students must earn a minimum grade of B– and an overall GPA of 3.50 in the six courses they use to satisfy the core and cluster requirements.

Minimum Annual Enrollment

PhD students are expected to enroll in at least 6 credits of 600-level course work each year until their advancement to candidacy. Research: [Topic] (CIS 601), Dissertation (CIS 603), and Reading and Conference: [Topic] (CIS 605) do not satisfy this requirement. After candidacy, PhD students are encouraged to continue participation in 600-level courses

Directed Research Project

Complete a directed research project, which is supervised by a faculty member and evaluated by a faculty committee. The research project comprises the following:

1. The definition and expected results of the project in the form of a Directed Research Project Contract
2. Delivery of the materials constituting the results of the project and oral presentation of the results
3. A private oral examination by the committee members

Status Change

PhD candidates are admitted conditionally. Successful completion of the directed research project leads to a change in the student's doctoral status from conditional to unconditional.

Dissertation Advisory Committee

After successfully completing the directed research project, PhD students form a Dissertation Advisory Committee chaired by their research advisor. The main role of the committee is to advise the student between completion of the research project and mounting the dissertation defense. The committee takes primary responsibility for evaluating student progress. In addition, it approves the plan for the area examination, which in turn is approved by the graduate education committee. See the graduate coordinator for further instructions.

Area Examination

The student chooses an area of research and works closely with an advisor to learn the area in depth by surveying the current research and learning research methods, significant achievements, and how to pose and solve problems. The student gradually assumes a more independent role and prepares for the area examination, which tests depth of knowledge in the research area. The examination contains the following:

1. A survey of the area in the form of a position paper and an annotated bibliography
2. A public presentation of the position paper
3. A private oral examination by committee members

Advancement to Candidacy

After the area examination, the committee decides whether the student is ready for independent research work; if so, the student is advanced to candidacy.

Dissertation and Defense

Identify a significant unsolved research problem and submit a written dissertation proposal to the dissertation committee. The dissertation committee, comprising three department members and one member from an outside department, is approved by the graduate education committee. In addition to these four, the dissertation committee often includes a fifth examiner. This outside examiner should be a leading researcher in the candidate's field who is not at the University of Oregon. The outside member should be selected a year before the candidate's dissertation defense, and no later than six months before.

The student submits a written dissertation proposal to the committee for approval, and the proposal is then submitted to the graduate education committee. The proposal presents the research problems to be tackled, related research, methodology, anticipated results, and work plan. The committee may request an oral presentation, similar to the area exam, which allows the student to explain and answer question about the proposed research. The student then carries out the research.

The final stage is writing a dissertation and defending it in a public forum by presenting the research and answering questions about the methods and results. The dissertation committee may accept the dissertation, request small changes, or require the student to make substantial changes and schedule another defense

Graduate School Requirements

PhD students must meet the requirements set by the Graduate School as listed in that section of this catalog

Research Areas

It is important that a PhD student be able to work effectively with at least one dissertation advisor. Hence the student should identify, at an early stage, one or more areas of research to pursue. The student should also find a faculty member with similar interests to supervise the dissertation.

Computer and Information Science Courses

CIS 105. Explorations in Computing. 4 Credits.

Overview of basic ideas and areas of computer science: includes algorithms, hardware, machine organization, programming languages, networks, artificial intelligence, and associated ethical issues.
Prereq: MATH 101 or equivalent.

CIS 110. Fluency with Information Technology. 4 Credits.

Introduction to information technology (IT), the study of computer-based information systems. Basics of the Internet and World Wide Web. Students create websites using XHTML and CSS.

CIS 111. Introduction to Web Programming. 4 Credits.

Project-based approach to learning computer programming by building interactive web pages using JavaScript and XHTML. Programming concepts including structured and object-oriented program design. CIS 110 recommended preparation.
Prereq: MATH 101 or equivalent.

CIS 115. Multimedia Web Programming. 4 Credits.

Intermediate web programming with an emphasis on HTML5 multimedia: two-dimensional graphics, image processing, animation, video, user interaction, geolocation. Continuing JavaScript, DOM, Ajax, and JSON use, programming fundamentals, and debugging techniques.
Prereq: CIS 111.

CIS 122. Introduction to Programming and Problem Solving. 4 Credits.

Computational problem solving, algorithm design, data structures, and programming using a multi-paradigm programming language. Introduces techniques for program design, testing, and debugging.
Prereq: MATH 101 or equivalent.

CIS 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

CIS 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

CIS 199. Special Studies in Computer Science: [Topic]. 1-5 Credits.

Repeatable.

CIS 210. Computer Science I. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence.
Prereq: MATH 112. Prior programming experience strongly encouraged.

CIS 211. Computer Science II. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence.
Prereq: CIS 210.

CIS 212. Computer Science III. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence.
Prereq: CIS 211.

CIS 313. Intermediate Data Structures. 4 Credits.

Design and analysis of data structures as means of engineering efficient software; attention to data abstraction and encapsulation. Lists, trees, heaps, stacks, queues, dictionaries, priority queues.
Prereq: CIS 210, CIS 211, CIS 212, MATH 231, MATH 232 with grades of B- or better.

CIS 314. Computer Organization. 4 Credits.

Introduction to computer organization and instruction-set architecture--digital logic design, binary arithmetic, design of central processing unit and memory, machine-level programming.
Prereq: CIS 210, CIS 211, CIS 212, MATH 231 with grades of B- or better.

CIS 315. Intermediate Algorithms. 4 Credits.

Algorithm design, worst-case and average-behavior analysis, correctness, computational complexity.
Prereq: CIS 313.

CIS 322. Introduction to Software Engineering. 4 Credits.

A project-intensive introduction to software engineering intended to build skills, knowledge, and habits of mind that prepare students for 400-level computer science courses, internships, and other software.
Prereq: CIS 210, CIS 211, CIS 212 with grades of B- or better.

CIS 330. C/C++ and Unix. 4 Credits.

Practical software design and programming activities in a C/C++ and Unix environment, with emphasis on the details of C/C++ and good programming style and practices.
Prereq: CIS 314.

CIS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

CIS 401. Research: [Topic]. 1-21 Credits.

Repeatable.
Prereq: CIS 313

CIS 403. Thesis. 1-12 Credits.

Repeatable.
Prereq: CIS 313

CIS 404. Internship; [Topic]. 1-4 Credits.

Repeatable.
Prereq: CIS 313.

CIS 405. Reading and Conference: [Topic]. 1-12 Credits.

Repeatable.
Prereq: CIS 313

CIS 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.
Prereq: CIS 313

CIS 407. Seminar: [Topic]. 1-5 Credits.

Repeatable when the topic changes. Opportunity to study in greater depth specific topics arising out of other courses.
Prereq: CIS 313

CIS 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.
Prereq: CIS 313

CIS 409. Practicum: [Topic]. 1-2 Credits.

The student assists other students who are enrolled in introductory programming classes. For each four hours of scheduled weekly consulting, the student is awarded 1 credit. Repeatable for maximum of 4 credits.

Prereq: CIS 313

CIS 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

CIS 413. Advanced Data Structures. 4 Credits.

Complex structures, storage management, sorting and searching, hashing, storage of texts, and information compression.

Prereq: CIS 315.

CIS 415. Operating Systems. 4 Credits.

Principles of operating system design. Process and memory management, concurrency, scheduling, input-output and file systems, security.

Prereq: CIS 313, CIS 330.

CIS 420. Automata Theory. 4 Credits.

Provides a mathematical basis for computability and complexity. Models of computation, formal languages, Turing machines, solvability. Nondeterminism and complexity classes.

Prereq: CIS 315.

CIS 422. Software Methodology I. 4 Credits.

Technical and nontechnical aspects of software development, including specification, planning, design, development, management and maintenance of software projects. Student teams complete projects.

Prereq: CIS 313.

CIS 423. Software Methodology II. 4 Credits.

Application of concepts and methodologies covered in CIS 422/522. Student teams complete a large system design and programming project. Final system specification, test plan, user documentation, and system walk throughs.

Prereq: CIS 422 with a B- or better.

CIS 425. Principles of Programming Languages. 4 Credits.

Syntax and semantics. Scope rules, environments, stores, denoted and expressed values, procedures, and parameters. Definitional interpreters. Types, overloading, parametric polymorphism, and inheritance. Varieties of abstraction.

Prereq: CIS 315.

CIS 427. Introduction to Logic. 4 Credits.

Basic notions of logic: propositional logic, first-order logic, Hilbert systems, sequent calculus, natural deduction. Soundness, completeness, undecidability. Current research in logic frameworks, automated deduction, Curry-Howard isomorphism.

Prereq: CIS 315; CIS 425 recommended pre or co-req.

CIS 431. Introduction to Parallel Computing. 4 Credits.

Parallel architecture, theory, algorithms, and programming with emphasis on parallel programming, focusing on models, languages, libraries, and runtime systems.

Prereq: CIS 330.

CIS 432. Introduction to Networks. 4 Credits.

Principles of computer network design. Link technologies, packet switching, routing, inter-networking, reliability. Internet protocols. Programming assignments focus on protocol design.

Prereq: CIS 330. CIS 415 recommended.

CIS 433. Computer and Network Security. 4 Credits.

Security for various aspects of computers and networks. Elementary cryptography, program security, trusted operating systems, network security, privacy, and legal and ethical issues.

Prereq: CIS 415.

CIS 441. Introduction to Computer Graphics. 4 Credits.

Introduction to the hardware, geometrical transforms, interaction techniques, and shape representation schemes that are important in interactive computer graphics. Programming assignments using contemporary graphics hardware and software systems.

Prereq: CIS 330.

CIS 443. User Interfaces. 4 Credits.

Introduction to user interface software engineering. Emphasis on theory of interface design, understanding the behavior of the user, and implementing programs on advanced systems.

Prereq: CIS 313.

CIS 445. Modeling and Simulation. 4 Credits.

Theoretical foundations and practical problems for the modeling and computer simulation of discrete and continuous systems. Simulation languages, empirical validation, applications in computer science.

Prereq: CIS 315, 330.

CIS 451. Database Processing. 4 Credits.

Fundamental concepts of DBMS. Data modeling, relational models and normal forms. File organization and index structures. SQL, embedded SQL, and concurrency control.

Prereq: CIS 313, 314.

CIS 452. Database Issues. 4 Credits.

Covers central database issues such as access methods, security, tuning, and concurrency control. Examines alternative database models.

Prereq: CIS 451.

CIS 453. Data Mining. 4 Credits.

Databases, machine learning, artificial intelligence, statistics, and data visualization. Examines data warehouses, data preprocessing, association and classification rule mining, and cluster analysis.

Prereq: CIS 451/551.

CIS 461. Introduction to Compilers. 4 Credits.

Lexical analysis, parsing, attribution, code generation.

Prereq: CIS 314, 425. CIS 420 strongly recommended.

CIS 471. Introduction to Artificial Intelligence. 4 Credits.

Basic themes, issues, and techniques of artificial intelligence, including agent architecture, knowledge representation and reasoning, problem solving and planning, game playing, and learning.

Prereq: CIS 315.

CIS 472. Machine Learning. 4 Credits.

A broad introduction to machine learning and its established algorithms. Topics include concept learning, decision trees, neural network.

Prereq: CIS 315.

CIS 473. Probabilistic Methods for Artificial Intelligence. 4 Credits.

Fundamental techniques for representing problems as probability distributions, performing inference, and learning from data. Topics include Bayesian and Markov networks, variable elimination, loopy belief propagation, and parameter.

Prereq: CIS 315.

CIS 503. Thesis. 1-16 Credits.

Repeatable.

CIS 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Opportunity to study in greater depth specific topics arising out of other courses.

CIS 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

CIS 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CIS 513. Advanced Data Structures. 4 Credits.

Complex structures, storage management, sorting and searching, hashing, storage of texts, and information compression.

CIS 520. Automata Theory. 4 Credits.

Provides a mathematical basis for computability and complexity. Models of computation, formal languages, Turing machines, solvability. Nondeterminism and complexity classes.

CIS 522. Software Methodology I. 4 Credits.

Technical and nontechnical aspects of software development, including specification, planning, design, development, management and maintenance of software projects. Student teams complete projects.

CIS 523. Software Methodology II. 4 Credits.

Student teams complete a large system design and programming project. Final system specifications, test plan, user documentation, and system walk-through.
Prereq: CIS 522

CIS 527. Introduction to Logic. 4 Credits.

Basic notions of logic: propositional logic, first-order logic, Hilbert systems, sequent calculus, natural deduction. Soundness, completeness, undecidability. Current research in logic frameworks, automated deduction, Curry-Howard isomorphism.

CIS 531. Introduction to Parallel Computing. 4 Credits.

Parallel architecture, theory, algorithms, and programming with emphasis on parallel programming, focusing on models, languages, libraries, and runtime systems.

CIS 532. Introduction to Networks. 4 Credits.

Principles of computer network design. Link technologies, packet switching, routing, inter-networking, reliability. Internet protocols. Programming assignments focus on protocol design.

CIS 533. Computer and Network Security. 4 Credits.

Security for various aspects of computers and networks. Elementary cryptography, program security, trusted operating systems, network security, privacy, and legal and ethical issues.

CIS 541. Introduction to Computer Graphics. 4 Credits.

Introduction to the hardware, geometrical transforms, interaction techniques, and shape representation schemes that are important in interactive computer graphics. Programming assignments using contemporary graphics hardware and software systems.

CIS 543. User Interfaces. 4 Credits.

Introduction to user interface software engineering. Emphasis on theory of interface design, understanding the behavior of the user, and implementing programs on advanced systems.

CIS 545. Modeling and Simulation. 4 Credits.

Theoretical foundations and practical problems for the modeling and computer simulation of discrete and continuous systems. Simulation languages, empirical validation, applications in computer science.

CIS 551. Database Processing. 4 Credits.

Fundamental concepts of DBMS. Data modeling, relational models and normal forms. File organization and index structures. SQL, embedded SQL, and concurrency control.

CIS 552. Database Issues. 4 Credits.

Covers central database issues such as access methods, security, tuning, and concurrency control. Examines alternative database models.
Prereq: CIS 4/551.

CIS 553. Data Mining. 4 Credits.

Databases, machine learning, artificial intelligence, statistics, and data visualization. Examines data warehouses, data preprocessing, association and classification rule mining, and cluster analysis.
Prereq: CIS 451/551.

CIS 561. Introduction to Compilers. 4 Credits.

Lexical analysis, parsing, attribution, code generation.
Prereq: CIS 314 or equivalent, 624. CIS 420/520 strongly recommended.

CIS 571. Introduction to Artificial Intelligence. 4 Credits.

Basic themes, issues, and techniques of artificial intelligence, including agent architecture, knowledge representation and reasoning, problem solving and planning, game playing, and learning.

CIS 572. Machine Learning. 4 Credits.

A broad introduction to machine learning and its established algorithms. Topics include concept learning, decision trees, neural network.

CIS 573. Probabilistic Methods for Artificial Intelligence. 4 Credits.

Fundamental techniques for representing problems as probability distributions, performing inference, and learning from data. Topics include Bayesian and Markov networks, variable elimination, loopy belief propagation, and parameter.

CIS 601. Research: [Topic]. 1-16 Credits.

Repeatable.

CIS 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

CIS 603. Dissertation. 1-16 Credits.

Repeatable.

CIS 604. Internship: [Topic]. 1-4 Credits.

Repeatable.

CIS 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

CIS 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

CIS 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Research topics are presented.

CIS 608. Colloquium: [Topic]. 1 Credit.

Repeatable.

CIS 609. Final Project. 1-16 Credits.

Repeatable. Final project for master's degree without thesis.

CIS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CIS 621. Algorithms and Complexity. 4 Credits.

Design and analysis of algorithms, strategies for efficient algorithms, introduction to complexity theory including NP-completeness.
Prereq: CIS 420/520 strongly recommended.

CIS 624. Structure of Programming Languages. 4 Credits.

Introduction to axiomatic, operational, and denotational semantics. Environments, stores, and continuations. Type theory, subtypes, polymorphism, and inheritance. Functional and logic programming.

CIS 630. Distributed Systems. 4 Credits.

Principles of distributed computer systems: interprocess communication, distributed file systems, distributed timing and synchronization, distributed programming, transactions, process scheduling, distributed shared memory.

Prereq: CIS 415 or equivalent, CIS 429/529.

CIS 631. Parallel Processing. 4 Credits.

Advanced topics in parallel processing including massively parallel computer architecture, supercomputers, parallelizing compiler technology, performance evaluation, parallel programming languages, parallel applications.

Prereq: CIS 529, CIS 531.

CIS 632. Computer Networks. 4 Credits.

Advanced issues in computer networks, focusing on research to extend the services offered by the Internet.

Prereq: CIS 432/532.

CIS 633. Advanced Network Security. 4 Credits.

Classic and state-of-the-art research topics in network security; threats and attacks, defense algorithms and mechanisms, measurement and evaluation of both security problems and solutions. Offered alternate years.

Prereq: CIS 533.

CIS 640. Writing in Computer Research. 2 Credits.

Students learn to provide and accept constructive criticism of writing samples in a workshop format.

CIS 650. Software Engineering. 4 Credits.

Examines recent models and tools in software engineering including modifications to the traditional software life-cycle model, development environments, and speculative view of the future role of artificial intelligence.

CIS 670. Data Science. 4 Credits.

Data science is the development of methods to study large and complex data sets. Methods that scale to very large data sets are of particular interest. This course introduces state-of-art data science methods focused on processing very large data sets of real-world data.

Prereq: CIS 451/CIS 551 Database Processing

Computer Information Technology Courses**CIT 281. Web Applications Development I. 4 Credits.**

Fundamentals of web application development using open-source software tools and technologies (Unix, Git), client-side frameworks, server-side programming (Node.js, PHP), model-view-controller pattern, data storage and APIs, cloud hosting.

Prereq: CIS 111 with a B- or higher.

CIT 381. Database Systems. 4 Credits.

Introduction to database systems, emphasis on database design and access. Database concepts, data modeling, SQL, connecting database to web.

Prereq: B- or better in CIT 281, and CIS 110 or 115.

CIT 382. Web Applications Development II. 4 Credits.

Server- and client-side technologies and their interaction for database-driven web applications: application frameworks, single-page applications, cloud platforms, and open-source software stacks—MEAN (MongoDB, ExpressJS, AngularJS, Node.js) versus LAMP (Linux, Apache, MySQL, PHP).

Prereq: CIT 381.

CIT 383. Networking Fundamentals. 4 Credits.

Fundamentals of data communication and networks. Network management and security.

Prereq: CIT 382.

CIT 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable.

Garrett K. Hongo, College of Arts and Sciences Distinguished Professor (poetry). BA, 1973, Pomona; MFA, 1980, California, Irvine. (1989)

Mat Johnson, professor.

Karen Thompson Walker, assistant professor (fiction). BA, 2002, California, Los Angeles; MFA, 2006, Columbia. (2017)

Emeritus

Richard M. Lyons, professor emeritus. BA, 1957, Brooklyn; MFA, 1962, Iowa. (1969)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Studies

The Creative Writing Program offers two formal courses of study for University of Oregon undergraduates:

Minor in Creative Writing

The creative writing minor offers courses in which students study matters of craft by reading and writing creative works, develop critical thinking and interpretive skills, hone their ability to articulate complex ideas with subtlety and clarity, and gain instruction in the mechanics of writing.

Students must take courses for letter grades. Course work required for the minor must be passed with grades of B– or better.

Of the 24 required credits, a maximum of 8 credits at the 200 or 300 level may be transferred. All courses at the 400 level must be taken in residence at the University of Oregon.

Code	Title	Credits
Select two from one of the following groups:		
Group 1		
CRWR 225	Kidd Tutorial I ¹	8
CRWR 235	Kidd Tutorial II: Poetry ¹ or CRWR 244 Kidd Tutorial II: Fiction	
Group 2		
CRWR 230	Introduction to Poetry Writing	8
CRWR 240	Introduction to Fiction Writing	
Select two of the following:		
CRWR 330	Intermediate Poetry Writing ²	8
CRWR 335	Kidd Tutorial III: Poetry ¹ or CRWR 344 Kidd Tutorial III: Fiction	
CRWR 336	Intermediate Creative Writing: Literary Nonfiction ²	8
CRWR 340	Intermediate Fiction Writing ²	
Select two of the following:		
CRWR 407	Seminar: [Topic]	8
CRWR 413	Literature for Poets ²	
CRWR 414	Literature for Fiction Writers ²	
CRWR 435	Advanced Poetry Writing ²	
CRWR 445	Advanced Fiction Writing ²	
Total Credits		24

¹ Nontransferable. Kidd Tutorial courses are by application only.

² Repeatable for credit.

Questions regarding the minor should be addressed to the program director. Students must apply for the minor through the program's office well in advance of graduation for transcript evaluation. In order to be eligible for the minor, students must complete all degree requirements and a major in another academic department.

Kidd Tutorial Program

Implemented through the generosity of the Walter P. Kidd family, this yearlong tutorial offers the chance to study writing and literary craft using literary models. The program, which requires a three-term commitment from participants, accommodates a highly flexible and individualized study of fiction, poetry, and literary nonfiction writing. Each section matches one graduate employee—a poet or fiction writer—with as many as 10 students and is overseen by the director of the Kidd Tutorial Program. Participants earn 12 credits in Kidd Tutorial I (CRWR 225), Kidd Tutorial II: Poetry (CRWR 235), Kidd Tutorial III: Poetry (CRWR 335) or Kidd Tutorial I (CRWR 225), Kidd Tutorial II: Fiction (CRWR 245), Kidd Tutorial III: Fiction (CRWR 345). Information about application procedures is available on the program's website.

Graduate Studies

Master of Fine Arts Degree

Admission Requirements

1. Bachelor's degree
2. Other materials submitted for admission giving evidence that the applicant will be able to complete the prescribed course of study satisfactorily

Admission Procedures

Apply online from the Creative Writing Program's website; the application fee may be paid by credit card (nonrefundable). The online application requires the following:

- Personal statement (PDF upload)
- Sample of the applicant's writing (PDF upload)
- Transcripts (PDF upload)
- Contact information for as many as four people (three are required) who agree to offer a recommendation

Arrange to have official copies of transcripts sent from institutions where a degree was earned to the UO Office of Admissions.

Application materials must be submitted online by January 15 for admission to the program the following fall term. Admission is made for fall term only. Find information and application instructions on the program's website.

Master of Fine Arts Degree Requirements

The candidate must complete the graduate work during six consecutive terms in residence at the university. The candidate must pass a written examination on a reading list of works of fiction or poetry.

Code	Title	Credits
CRWR 605	Writing and Conference: [Topic]	9
CRWR 607	Seminar: [Topic] (MFA Seminar)	18
CRWR 609	Terminal Creative Project: [Topic]	9
CRWR 635	MFA Poetry Workshop	36
or CRWR 645	MFA Fiction Workshop	
Total Credits		72

Courses

CRWR 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CRWR 225. Kidd Tutorial I. 4 Credits.

Introduction to an intensive, yearlong sequence devoted to the study and practice of poetry, fiction, and nonfiction.

CRWR 230. Introduction to Poetry Writing. 4 Credits.

Introduction to forms and techniques of writing poetry.

CRWR 235. Kidd Tutorial II: Poetry. 4 Credits.

Second in a yearlong sequence devoted to the study and practice of poetry, fiction, and creative nonfiction, including the development of an individual line of inquiry project.

Prereq: CRWR 225 with a grade of B- or above.

CRWR 240. Introduction to Fiction Writing. 4 Credits.

Introduction to forms and techniques of writing fiction.

CRWR 245. Kidd Tutorial II: Fiction. 4 Credits.

Second in a yearlong sequence devoted to the study and practice of poetry, fiction, and creative nonfiction, including the development of an individual line of inquiry project.

Prereq: CRWR 225 with a grade of B- or better.

CRWR 330. Intermediate Poetry Writing. 4 Credits.

Intermediate-level study of poetry writing. Repeatable twice for a maximum of 12 credits.

Prereq: one from CRWR 230, CRWR 235 with a grade of B- or better.

CRWR 335. Kidd Tutorial III: Poetry. 4 Credits.

Third in a yearlong sequence, culminating in a Kidd Tutorial student anthology, a portfolio of poetry, and the completion of an individual line of inquiry project.

Prereq: CRWR 235 with a Grade of B- or better.

CRWR 336. Intermediate Creative Writing: Literary Nonfiction. 4 Credits.

Intermediate-level study of literary nonfiction writing. Repeatable twice for a maximum of 12 credits.

Prereq: one from CRWR 240, CRWR 244, CRWR 245 with a grade of B- or better.

CRWR 340. Intermediate Fiction Writing. 4 Credits.

Intermediate-level study of fiction writing. Repeatable when topic changes. Repeatable twice for a maximum of 12 credits.

Prereq: one from CRWR 240, CRWR 244, CRWR 245 with a grade of B- or better.

CRWR 345. Kidd Tutorial III: Fiction. 4 Credits.

Third in a yearlong sequence, culminating in a Kidd Tutorial student anthology, a portfolio of original fiction, and the completion of an individual line of inquiry project.

Prereq: CRWR 245 with a Grade of B- or better.

CRWR 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CRWR 405. Writing and Conference: [Topic]. 1-21 Credits.

Repeatable.

CRWR 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

CRWR 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CRWR 413. Literature for Poets. 4 Credits.

Advanced discourse on issues and principles related to the craft of poetry. Repeatable twice for a maximum of 12 credits.

Prereq: one from CRWR 330, CRWR 335 with a grade of B- or better.

Students majoring in English, journalism, or comparative literature may also enroll with instructor approval.

CRWR 414. Literature for Fiction Writers. 4 Credits.

Advanced discourse on issues and principles related to the craft of fiction. Repeatable twice for a maximum of 12 credits.

Prereq: One from CRWR 336, CRWR 340, CRWR 345 with a grade of B- or better. Students majoring in English, journalism, or comparative literature may also enroll with instructor approval.

CRWR 435. Advanced Poetry Writing. 4 Credits.

Advanced workshop in the writing of poetry. Repeatable twice for a maximum of 12 credits.

Prereq: One from CRWR 330, CRWR 335 with a grade of B- or better.

CRWR 445. Advanced Fiction Writing. 4 Credits.

Advanced workshop in the writing of fiction. Repeatable twice for a maximum of 12 credits.

Prereq: One from CRWR 336, CRWR 340, CRWR 345 with a grade of B- or better.

CRWR 503. Thesis. 1-16 Credits.

Repeatable.

CRWR 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

CRWR 601. Research: [Topic]. 1-16 Credits.

Repeatable.

CRWR 605. Writing and Conference: [Topic]. 1-16 Credits.

Repeatable.

CRWR 607. Seminar: [Topic]. 1-5 Credits.

Selected seminars offered each year. Repeatable when topic changes.

CRWR 608. Special Topics: [Topic]. 1-5 Credits.

Repeatable.

CRWR 609. Terminal Creative Project: [Topic]. 1-16 Credits.

Repeatable.

CRWR 610. Experimental Course [Topic]. 1-5 Credits.

Repeatable when topic changes.

CRWR 635. MFA Poetry Workshop. 6 Credits.

Concentration on student writing in a workshop setting. Open only to students admitted to creative writing master of fine arts program in poetry. Repeatable five times for a maximum of 36 credits.

CRWR 645. MFA Fiction Workshop. 6 Credits.

Concentration on student writing in a workshop setting. Open only to students admitted to creative writing master of fine arts program in fiction. Repeatable five times for a maximum of 36 credits.

Faculty

Ilya N. Bindeman, professor (stable isotope geochemistry, volcanology). BS, 1988, Moscow; PhD, 1998, Chicago. (2004)

Edward B. Davis, associate professor (vertebrate paleontology). BS, 1999, Tennessee, Knoxville; PhD, 2005, California, Berkeley. (2013)

Rebecca J. Dorsey, professor (sedimentology, basin analysis). BS, 1983, Vermont; MA, 1986, PhD, 1989, Princeton. (1997)

Josef Dufek, professor (volcanology). BS, 2000, Chicago; MS, 2004, PhD, 2006, Washington (Seattle). (2017)

Thomas Giachetti, assistant professor (volcanology). MS, 2006, PhD, 2010, Université Blaise Pascal, Clermont-Ferrand. (2015)

Emilie Hooft Toomey, associate professor (marine geophysics). BSc, 1990, Trinity College, Toronto; PhD, 1997, Massachusetts Institute of Technology and Woods Hole Oceanographic Institution. (1999)

Samantha Hopkins, associate professor (paleontology). See **Robert Donald Clark Honors College**.

Eugene D. Humphreys, professor (seismology, regional tectonics). BS, 1974, MS, 1978, California, Riverside; PhD, 1985, California Institute of Technology. (1985)

Qusheng Jin, associate professor (biogeoscience). BS, 1994, Nanjing; MS, 1997, Chinese Academy of Sciences; PhD, 2003, Illinois, Urbana-Champaign. (2005)

A. Dana Johnston, professor (experimental petrology, geochemistry). BS, 1976, Bates; MS, 1978, PhD, 1983, Minnesota. (1986)

Leif A. Karlstrom, assistant professor (volcanology, geomorphology, fluid mechanics). BS, 2006, Oregon; PhD, 2011, California, Berkeley. (2011)

Diego Melgar, assistant professor (earthquake seismology, tsunamis, geodetic imaging). BEng., 2009, Universidad Nacional Autonoma de Mexico; MS, 2010, PhD, 2014, Scripps College. (2017)

Marli B. Miller, senior instructor (structural geology). BA, 1982, Colorado College; MS, 1987, PhD, 1992, Washington (Seattle). (1997)

Matthew Polizzotto, associate professor (soil and environmental hydrogeochemistry). BS, BA, 2001, Rochester; PhD, 2007, Stanford. (2016)

Mark H. Reed, professor (mineral deposits, aqueous geochemistry). BA, 1971, Carleton; MS, 1974, PhD, 1977, California, Berkeley. (1979)

Alan W. Rempel, professor (geomechanics and applied mathematics). BSc, 1991, MSc, 1995, British Columbia; PhD, 2001, Cambridge. (2004)

Gregory J. Retallack, professor (paleobotany, paleosols). BA, 1973, Macquarie; PhD, 1978, New England University, Australia. (1981)

Joshua J. Roering, professor (surface processes, geomorphology). BS, 1994, MS, 1995, Stanford; PhD, 2000, California, Berkeley. (2000)

Valerie Sahakian, assistant professor (tectonics, ground seismology, marine geophysics). BS, 2009, Rhode Island; MS, 2010, PhD, 2015, Scripps College. (2018)

David A. Sutherland, associate professor (physical oceanography). BA, 2001, North Carolina, Wilmington; PhD, 2008, Massachusetts Institute of Technology and Woods Hole Oceanographic Institution. (2011)

Amanda M. Thomas, associate professor (earthquake seismology and fault mechanics). BS, 2007, Georgia Institute of Technology; PhD, 2012, California, Berkeley. (2015)

Douglas R. Toomey, professor (seismology, tectonics, midocean ridges). BS, 1981, Pennsylvania State; PhD, 1987, Massachusetts Institute of Technology and Woods Hole Oceanographic Institution. (1990)

Paul J. Wallace, professor (igneous petrology, volcanology, geochemistry). BS, 1986, George Washington University; PhD, 1991, California, Berkeley. (2001)

James M. Watkins, associate professor (experimental petrology, geochemistry, volcanology). BS, 2005, Wisconsin, Eau Claire; PhD, 2010, California, Berkeley. (2012)

Ray J. Weldon, professor (neotectonics, structural and quaternary geology). BA, 1977, Pomona; PhD, 1986, California Institute of Technology. (1987)

Research Staff

Dennis K. Fletcher, research assistant. BS, 1996, Oregon. (2006)

Leland O'Driscoll, seismic field technician. PhD, 2012, Oregon (2015)

Sara Meyer, field technician. BS, 2010, California, Santa Cruz; IT specialist certification, 2015, Alaska, Fairbanks. (2017)

James Palandri, research associate. PhD, 2000, Oregon. (2001)

Lucy Walsh, research assistant. MS, 2012, Oregon. (2017)

Emeriti

M. Allan Kays, professor emeritus. BA, 1956, Southern Illinois; MA, 1958, PhD, 1960, Washington (St. Louis). (1961)

Alexander R. McBirney, professor emeritus. BS, 1946, United States Military Academy, West Point; PhD, 1961, California, Berkeley. (1965)

William N. Orr, professor emeritus. BS, 1961, Oklahoma; MA, 1963, California, Riverside and Los Angeles; PhD, 1967, Michigan State. (1967)

Jack M. Rice, professor emeritus. AB, 1970, Dartmouth College; MS, 1972, PhD, 1975, Washington (Seattle). (1977)

Norman M. Savage, professor emeritus. BSc, 1959, Bristol; PhD, 1968, Sydney. (1971)

Harve S. Waff, professor emeritus. BS, 1962, William and Mary; MS, 1966, PhD, 1970, Oregon. (1978)

Daniel Weill, professor emeritus. BA, 1956, Cornell; MS, 1958, Illinois; PhD, 1962, California, Berkeley. (2002)

Undergraduate Studies

The undergraduate program in the Department of Earth Sciences provides an understanding of the materials that constitute the earth and the processes that have shaped the earth from deep in its interior to the surface environment—geology. Geology applies all the basic sciences—biology, chemistry, mathematics, and physics—to understanding earth processes in the historical context of geologic time. It is a science that explores problems by combining field investigations with laboratory experiments and theoretical studies.

Geology also addresses many natural hazards—earthquakes, flooding, and volcanic eruptions—that affect humans. It addresses the impact of humans on the earth's surface environment, where we pollute rivers and ground water, cause rapid erosion and landslides, or attempt to re-engineer rivers and shorelines.

Preparation

High school students planning to major in geological sciences should include in their high school program as much mathematics and science (physics, chemistry, biology, or earth science) as possible.

Students who transfer to the department after two years of college work elsewhere should have completed a year of general chemistry, a year of general physics, and two quarters or a semester of calculus. A year of general geology with laboratory is recommended.

Careers

Students with a degree in earth sciences are qualified for employment in a broad range of careers: geotechnical and environmental consultants; K–12 school teachers (with an additional teaching certificate); laboratory technicians; professional geologists, geophysicists, or geochemists; and positions in the petroleum and mining industries or in state and federal agencies such as the United States Geological Survey or the Environmental Protection Agency. The current climate for employment in the earth sciences is good. Geoscience jobs require skills in critical thinking and problem solving, quantitative analysis, oral and written communication, and team work. The Department of Earth Sciences curriculum emphasizes these skills.

Geological Sciences Curriculum

The Department of Earth Sciences offers a bachelor of science (BS) or a bachelor of arts (BA) degree with a major in earth sciences.

Major Tracks

Earth science is an unusually broad subject. It addresses everything from the chemical processes that make rocks and minerals to the physics behind plate tectonics and the travel of earthquake waves through the planet. It explores the history of the evolution of life revealed in fossils, and it probes the earth processes that affect how humans can survive on the surface of the planet. To address this breadth, the department offers four curricular tracks for a major in earth sciences: geology, geophysics, environmental geoscience, and paleontology.

All of the tracks require a common core of general chemistry, calculus, general geology, and physics, except that paleontology- and environmental geoscience-track students may take two terms of biology in place of two terms of physics. Beyond the core, each track requires certain additional courses and a selection of electives.

Undergraduate Research

As many as 4 credits of research can be counted toward electives in any of the tracks. To receive such credit, students must

- submit a short letter, approved by the faculty research advisor and addressed to the head undergraduate advisor in earth sciences, stating the nature of the research and asserting that there is faculty supervision
- submit a final written report to the faculty advisor describing the results of the research

Students may earn credit in this category by registering for any of the following:

Code	Title	Credits
GEOL 401	Research: [Topic]	1-21
GEOL 406	Field Studies: [Topic]	1-6
GEOL 408	Laboratory Projects: [Topic]	1-6

Students who complete an honors thesis may not apply this option toward elective credits.

Grade Options and Standards

Undergraduate majors must take for letter grades (the pass/no pass option is not acceptable) all the courses required in their degree program. Required courses must be completed with grades of C– or better. Exceptions for honors students are noted under Honors in Earth Sciences.

Bachelor of Arts: Geology Track

Honors in Earth Sciences

Application for graduation with honors in earth sciences must be made no later than spring term of the student’s junior year. To be eligible for graduation with honors, a student must

- maintain a grade point average (GPA) of 3.50 or better in geological sciences courses or a 3.00 or better in all science courses

- submit and orally present an acceptable honors thesis written under the supervision of a department faculty member and evaluated by a committee consisting of three faculty members including the supervisor. The thesis should be presented no later than three weeks before final examinations during the term the student plans to graduate

Honors students may register for 3 credits of Research: [Topic] (GEOL 401) the term before they intend to graduate, and 3 credits of Thesis (GEOL 403) the term of graduation. These credits may be applied toward electives.

Minor Requirements

Code	Title	Credits
GEOL 101	Exploring Planet Earth	12
& GEOL 102	and Exploring Earth’s Environment	
& GEOL 103	and Exploring Earth History	
or GEOL 201	Dynamic Planet Earth	
& GEOL 202	and Earth’s Surface and Environment	
& GEOL 203	and History of Life	
Choose from the following courses: ¹		15
GEOL 213	Geology of National Parks	
GEOL 300-499-499		
Total Credits		27

¹ 15 credits of earth sciences courses (exclusive of independent study courses) must be earned with course numbers greater than GEOL 299 (GEOL 213 is acceptable, however). No more than 8 credits may be applied to the minor from the following list: Geology of National Parks (GEOL 213), The Fossil Record (GEOL 304), Dinosaurs (GEOL 305), Volcanoes and Earthquakes (GEOL 306), Oceanography (GEOL 307), Geology of Oregon and the Pacific Northwest (GEOL 308), Earth Resources and the Environment (GEOL 310).

Undergraduate minors must take all required courses for letter grades and complete them with grades of C– or better.

Group Requirements

Fourteen earth sciences courses satisfy university science group requirements. See the Group Requirements section of this catalog under **Registration and Academic Policies**.

Kindergarten through Secondary Teaching Careers

Students who complete a degree with a major in earth sciences are eligible to apply to the College of Education’s fifth-year licensure program in middle-secondary teaching or the fifth-year licensure program in elementary teaching. More information is available in the College of Education (p. 734) section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- **Geology Track** (p.)
- **Geophysics Track** (p.)

- Environmental Geoscience Track (p.)
- Paleontology Track (p.)

Graduate Studies

The Department of Earth Sciences offers programs of graduate study leading to master of science (MS), master of arts (MA), and doctor of philosophy (PhD) degrees with opportunity for research in a wide variety of specialty fields. Course work is designed to meet individual needs, and students may pursue independent research in geobiology, geochemistry, geodesy, geomechanics, geomorphology, geophysics, mineralogy, petrology, volcanology, paleontology, stratigraphy, sedimentary petrology, structural geology, and ore deposit geology. The master's degree program requires two years or more for completion.

Admission to the graduate program is competitive and based on academic records, scores on the Graduate Record Examinations (GRE), and letters of recommendation. Nonnative speakers of English must also submit scores for the Test of English as a Foreign Language (TOEFL) and the Test of Spoken English (TSE). Applications are welcome from students who are interested in using their background in related fields, such as physics, chemistry, and biology, to solve geologic or geophysical problems.

Graduate students are advised by a guidance committee consisting of three faculty members. This committee meets with each student shortly after he or she arrives on campus and as often thereafter as necessary for planning purposes.

Requirements

Basic university requirements for graduate degrees are described in the Graduate School (p. 945) section of this catalog. The department sets additional examination, course work, seminar, and thesis requirements. Applicants should read the *Guide to Graduate Study* on the department website (<http://earthsciences.uoregon.edu/graduate-program>) or write to the Department of Earth Sciences for details.

Programs

Graduate study in earth sciences is offered in five broad areas:

1. volcanology-petrology-geochemistry
2. stratigraphy–surface processes
3. paleontology-paleopedology-geobiology

Volcanology-Petrology-Geochemistry

The department has excellent analytical and other research facilities for studies in these subdisciplines, and the volcanic and metamorphic terrane of the Northwest offers unsurpassed opportunities for field studies. Active research programs are diverse and include studies of eruption dynamics, magma volatile inventories, and magma rheology; experimental studies of igneous phase equilibria and trace element partitioning; calculations of multicomponent equilibria in aqueous systems and volcanic gases; and studies of igneous protogenesis.

Stratigraphy–Surface Processes

The stratigraphic record of tectonically active sedimentary basins indicates the dynamic interactions among basin subsidence, sediment input from eroding sources, evolution of depositional systems, and active faulting and folding that govern these processes. Research in this area combines field-based stratigraphic, sedimentologic, and geomorphic analysis with provenance studies and concepts derived from theoretical models to decipher the complex structural and climatic controls on the filling histories of active basins.

Surface processes regulate how tectonics and climate affect landscape evolution. Field observations, numerical simulations, topographic analyses, and experimental facilities are used to study sediment transport processes over a range of spatial and temporal scales. Projects incorporate links between active tectonics and structural geology, biology, geomechanics, and surface processes to address problems such as landsliding and hill-slope evolution, biological contributions to soil creep and landscape lowering, and the geomorphic implications of seismic-induced landsliding.

Paleontology-Paleopedology-Geobiology

Studies of fossil soils, plants, and vertebrates aim to reconstruct life on land and its role in global change. Global changes of interest include Neogene paleoclimate and paleoenvironment of ape and human evolution in East Africa, environmental effects of terminal Cretaceous impact and dinosaur extinction in Montana, consequences of mass extinction and methane clathrate degassing at the Permian-Triassic boundary, and the effect of early land plants and forests on weathering and atmospheric composition during the early Paleozoic.

Geobiology focuses on the interaction of microorganisms with the geologic environment and the ways life forms affect geological processes, such as weathering and mineralization.

Structural Geology–Geophysics

Graduate work in the structural geology–geophysics area involves the study of the earth's dynamic processes.

Seismic imaging techniques using regional arrays provide tools for understanding regional tectonics. Studies of upper-mantle and lithospheric structure beneath the Rocky Mountains and in the Pacific Northwest subduction zone are providing essential constraints, unavailable from surface geology, for detailed dynamical models of plate-lithospheric deformation.

Structural geology focuses on applying modern field and analytical techniques to solving problems in Cenozoic tectonics and active faulting. Detailed field mapping, trench logging, and geomorphic analysis are combined with seismic array data, land- and space-based geodetic data,

and theoretical modeling to address problems including Oregon's Basin and Range province and coastal deformation, active tectonics of the San Andreas Fault system, and seismic risk along the Pacific margin of the United States and southeast and central Asia.

Geophysical experiments conducted at sea investigate the nature of sea-floor spreading including the segregation, transport, and storage of melt; the rifting of oceanic lithosphere; and the spatial and temporal connectivity between magmatic, tectonic, and hydrothermal processes.

Mineral Deposits

Current research on ore deposits includes studies of porphyry copper deposits, epithermal veins, and active geothermal systems. These projects combine field mapping, petrography, and chemical analyses with theoretical chemical modeling of processes of ore fluid generation, alteration, and mineralization.

Related Research Activities

The Condon Collection of Fossils at the Museum of Natural and Cultural History maintains strong ties to the Department of Earth Sciences. Two geology professors are curators of the collection, and paleontology undergraduate and graduate students are often employed as assistants. The Condon Collection contains 60,000 specimens, including invertebrate and vertebrate fossils, paleobotanical remains, and an extensive collection of modern animals that are available to interested researchers for study.

Research Facilities

Students may use a variety of analytical facilities and equipment including a three-component broadband (0.03–50Hz) seismic array, an electron microprobe, a scanning electron microscope with image analysis, x-ray diffraction, FTIR spectroscopy, stable isotope mass spectroscopy, and a geobiology laboratory.

An experimental petrology laboratory covers a range of crustal temperatures and pressures and includes equipment for doing experiments in controlled atmospheres. Two piston-cylinder apparatus with pressure-temperature capability to 35 kilobars and 1,500° C may be used to study crystalline, partially molten, and molten silicates under mantlelike conditions.

Computers are used for much of the research in the department including acquisition and processing of seismic and gravity data and numerical modeling of geophysical processes and geochemical reactions. A geochemistry laboratory is equipped with sophisticated computer programs for thermodynamic calculations of gas-liquid-solid equilibria and reaction processes important in metamorphic, volcanic gas, hydrothermal, and diagenetic systems. The Internet can be accessed through the UONet fiber-optic link. A student computer facility, equipped with PC and Macintosh computers and laser printers, is also connected to the networks.

The sedimentological and paleontological laboratories have, in addition to standard laboratory equipment, an electronic particle-size analyzer, an x-radiography unit, photomicroscopes, a Leitz Aristophot unit, a fully maintained catalog of foraminifera, an acid room, and a conodont-processing laboratory.

Financial Aid for Graduate Students

Most of the department's graduate students are fully supported through teaching and research assistantships. More information about financial assistance and department policies for awarding and

renewing teaching and research fellowships may be obtained by reading the *Guide to Graduate Study* on the department website (<http://earthsciences.uoregon.edu/graduate-program>) or by writing to the department.

Courses

GEOL 101. Exploring Planet Earth. 4 Credits.

Plate tectonics, mantle flow, and magmatism. Volcanoes, earthquakes, mountain building, generation of Earth's crust; rocks and minerals; Earth's internal structure. Comparison with other planets. Laboratory, lecture.

GEOL 102. Exploring Earth's Environment. 4 Credits.

Landforms, surface processes, and interactions between humans and the environment. Weathering, erosion, sedimentation, ground water, streams, glaciers, deserts, oceans, and coastlines; geologic hazards. Laboratory, lecture. Roering.

GEOL 103. Exploring Earth History. 4 Credits.

History of the Earth. Geologic time, sedimentary environments; oceans, mountains, and climate through time; stratigraphic history of North America; evolution of plants and animals. Laboratory, lecture.

GEOL 110. People, Rocks, and Fire. 4 Credits.

Investigation of topics in geology, ecology, and anthropology relevant to contemporary global energy debates; current energy policy issues investigated through term projects.

GEOL 137. Mountains and Glaciers. 4 Credits.

Survey of the geological processes that both create and destroy mountain ranges around the world, and an introduction to geological science.

GEOL 156M. Scientific Revolutions. 4 Credits.

Surveys several major revolutions in our views of the natural and technological world, focusing on scientific concepts and methodological aspects. For nonscience majors. Multilisted with PHYS 156M.

GEOL 198. Laboratory Projects: [Topic]. 1-5 Credits.

Repeatable.

GEOL 199. Special Studies: [Topic]. 1-6 Credits.

Repeatable. Studies of geologic topics combine background lectures with guided field trips to areas of geologic interest.

GEOL 201. Dynamic Planet Earth. 4 Credits.

Processes that cause earthquakes, volcanism, mountain building, and plate tectonics. Includes Earth's origin and internal structure, rocks and minerals, gravity and magnetism. Weekly lectures, two-hour laboratory. Series with GEOL 202, GEOL 203.

GEOL 202. Earth's Surface and Environment. 4 Credits.

Earth materials, the rock record, human interactions with surface environment. Sedimentary rocks and environments, chemical and physical weathering, mineral and energy resources, hydrogeology, ground-water contamination, surface processes, human impacts. Weekly lectures, two-hour laboratory. Series with GEOL 201, GEOL 203.

GEOL 203. History of Life. 4 Credits.

Origin, history, and physical evolution of the Earth; geologic time scales, development of the global stratigraphic section. Weekly lectures, two-hour laboratory. Series with GEOL 201, GEOL 202.

GEOL 213. Geology of National Parks. 4 Credits.

Examines selected geologic features in United States national parks and the processes that form them. Focuses on parks in the western states.

GEOL 304. The Fossil Record. 4 Credits.

Origin of life in Precambrian; evolution of plants and invertebrate animals; evolution of early chordates, fish, amphibians, reptiles, dinosaurs, birds, and mammals; speciation and extinction. Intended for junior and senior nonmajors but also open to geological sciences majors.

GEOL 305. Dinosaurs. 4 Credits.

Overview of the past and present biodiversity of vertebrate animals, including ourselves, dinosaurs, and what ruled the ocean when dinosaurs roamed the land.

GEOL 306. Volcanoes and Earthquakes. 4 Credits.

Mechanisms that cause earthquakes and volcanoes, relation to plate tectonics, associated hazards, examples in Oregon and the western United States.

GEOL 307. Oceanography. 4 Credits.

Characteristics and physical, chemical, and biological processes of the world's oceans. Includes sections on origin of the oceans, plate tectonics, and human use and misuse of oceans.

GEOL 308. Geology of Oregon and the Pacific Northwest. 4 Credits.

The region's geologic and tectonic history and the plate tectonic processes responsible for its evolution.

GEOL 310. Earth Resources and the Environment. 4 Credits.

Geology of energy, mineral, and water resources and environmental issues related to their use. Topics include fossil fuels, metals, nuclear waste disposal, and water pollution.

GEOL 311. Earth Materials. 5 Credits.

Chemical and mineralogical composition of rocks, sediment, and soil. Properties of common minerals; origin of rocks; microscopic study of rock textures; environmental issues.

Prereq: GEOL 101, 102 or 201, 202; coreq CH 221 or 224.

GEOL 315. Earth Physics. 4 Credits.

Physics of basic Earth processes; application of physics to plate tectonics and lithospheric deformation. Topics include forces, deformation, gravity, and seismology. Taught once or more per academic year.

Prereq: MATH 252, PHYS 201.

GEOL 316. Introduction to Hydrogeology. 4 Credits.

Examines the role of water in geologic and environmental processes. Topics include the water cycle, groundwater flow, and contaminant transport.

Pre- or coreq: MATH 252, PHYS 201.

GEOL 318. Introduction to Field Methods. 3 Credits.

Introduction to geologic mapping and related field skills, rock descriptions, cross sections, and structures. Lectures, laboratories, mandatory field trips.

Prereq: GEOL 101–103 or GEOL 201–203.

GEOL 331. Mineralogy. 5 Credits.

Crystal chemistry, systematic study of rock-forming silicate, and selected other minerals, mineral optics, and x-ray diffraction. Lab work with hand samples and petrographic microscopes.

Prereq: GEOL 201, 202 or GEOL 101, 102; coreq: CH 221 or 224.

GEOL 332. Introduction to Petrology. 5 Credits.

Origin and classification of igneous, metamorphic, and sedimentary rocks. Microscopic study of rocks in thin section.

Prereq: GEOL 331.

GEOL 334. Sedimentology and Stratigraphy. 4 Credits.

Sedimentary processes; characteristic properties of sedimentary rocks and their use in interpreting depositional environments; principles of lithostratigraphy and sequence stratigraphy.

Prereq: GEOL 101–103 or GEOL 201–203; pre- or coreq: GEOL 311 or 332.

GEOL 350. Structural Geology. 3 Credits.

Description, analysis, and origin of geologic structures including faults, folds, and tectonites. Focus on kinematic and dynamic analysis of deformation of earth materials.

Prereq: GEOL 318; GEOL 311 or 332.

GEOL 351. Structural Geology Problems. 1 Credit.

Exercises in solving structural geology problems using orthographic and stereographic projection techniques. Problems emphasize calculating stress and strain from structural markers.

Coreq: GEOL 350.

GEOL 352. Structural Geology Laboratory and Field. 1 Credit.

Collection and interpretation of field and map data for structural analysis. Includes field trips, map and cross-section generation, and some computer-based exercises.

Coreq: GEOL 350.

GEOL 353. Geologic Hazards. 4 Credits.

Examines geologic hazards, including both the physical processes that cause them and society's attempt to mitigate them.

Prereq: GEOL 101 or 201.

GEOL 363. Computational Tools for Earth Sciences. 4 Credits.

Introduction to computational tools vital to the work of Earth scientists, including data management and analysis, algorithms, basic programming, computational environments, and visualization.

Prereq: MATH 251.

GEOL 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

GEOL 401. Research: [Topic]. 1-21 Credits.

Repeatable.

GEOL 403. Thesis. 1-6 Credits.

Repeatable thrice for maximum of 6 credits.

Prereq: earth sciences honors or senior thesis students only.

GEOL 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

GEOL 406. Field Studies: [Topic]. 1-6 Credits.

Repeatable.

GEOL 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GEOL 408. Laboratory Projects: [Topic]. 1-6 Credits.

Repeatable.

GEOL 409. Practicum: [Topic]. 1-6 Credits.

Repeatable.

GEOL 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

GEOL 414. Igneous and Metamorphic Petrology. 4 Credits.

Advanced principles of igneous and metamorphic petrogenesis. Gibbs phase rule, phase diagrams, mineral thermodynamics; magma geochemistry and rheology; metamorphic facies, geothermometry and geobarometry. Johnston.

Prereq: GEOL 332; CH 223 or 226H.

GEOL 415. Field Geophysics. 4 Credits.

Introduction to geophysical methods for subsurface investigation, useful for exploration, geotechnical engineering, and characterization of subsurface groundwater and environmental conditions.

Prereq: MATH 112 or PHYS 201.

GEOL 418. Earth and Environmental Data Analysis. 4 Credits.

Tools-based instruction in data analysis for earth and environmental scientists. Topics include descriptive statistics, visualization, uncertainty analysis, hypothesis testing, regression, time series, and directional data.

Prereq: MATH 246 or 251.

GEOL 420. Geocommunication. 3 Credits.

Scientific writing and presentations for the geological sciences. Focus on writing scientific papers and proposals, preparing oral and visual presentations.

GEOL 425. Geology of Ore Deposits. 5 Credits.

Porphyry copper-molybdenum, epithermal, massive sulfides in volcanic rocks, and base and precious metals in sedimentary rocks. Geologic setting, alteration and ore mineral assemblages, and geochemistry of ore formation.

Prereq: CH 223; GEOL 332.

GEOL 433. Paleobotany. 4 Credits.

Evolution and ecology of plants and microbes from the origin of life to global warming. Laboratory exercises and field trip to collect plant fossils.

Pre- or coreq: GEOL 103 or 203.

GEOL 434. Vertebrate Paleontology. 4 Credits.

Evolution of vertebrates, including ourselves, based on fossil evidence. Physical and other evolutionary constraints are addressed, and lab exercises provide practical experience.

Prereq: GEOL 103 or 203.

GEOL 435. Paleopedology. 4 Credits.

Soil formation; mapping and naming fossil soils; features of soils in hand specimens and petrographic thin sections; interpretations of ancient environments from features of fossil soils.

Prereq: GEOL 311 or 332.

GEOL 438. Geobiology. 4 Credits.

Studies how microorganisms interact with geological environments at scales from enzymes to global element cycles.

GEOL 440. Sedimentary Basin Analysis. 4 Credits.

Evolution of sedimentary basins, emphasizing tectonic controls on basin formation and filling. Interpretation of subsidence mechanisms and sedimentary processes through analysis of the stratigraphic record.

Prereq: GEOL 334, GEOL 350.

GEOL 441. Hillslope Geomorphology. 4 Credits.

Hillslope processes and landforms; includes hillslope hydrology, overland flow erosion, weathering and soil formation, soil creep, landslides and related hazards, glacial and periglacial processes, effects of land-use practices and fire, and landscape evolution.

GEOL 451. Hydrogeology. 4 Credits.

Study of the origin, motion, and physical and chemical properties of ground water. Emphasizes quantitative analysis of flow and interaction with geologic materials.

Prereq: CH 222 or CH 225H; GEOL 316.

GEOL 452. Neotectonics and Quaternary Geology. 4 Credits.

Interpretation of active structures from deformed quaternary sediments and surfaces using case histories. Field project uses air photos and field techniques. Repeatable once for maximum of 8 credits.

Prereq: GEOL 334, GEOL 350.

GEOL 453. Tectonics. 3 Credits.

Tectonic processes and examples. Global kinematics of plates and the forces that drive them. Continental deformation in compressional, shear, and extensional settings.

Prereq: GEOL 350 and calculus.

GEOL 454. Fluid Dynamics. 4 Credits.

Introduction to the continuum theory of fluid dynamics, focusing on the Navier-Stokes equations of motion including common simplified limits and extensions. Applications are drawn from Earth and Planetary Science, Biology, and Physics.

Prereq: PHYS 252, MATH 252.

GEOL 455. Mechanical Earth. 4 Credits.

Introduction to continuum mechanics. Includes stress and strain, friction, elasticity, viscous fluids, constitutive laws, equations of motion, and deformation of the Earth.

Prereq: GEOL 315, PHYS 202, or equivalent; MATH 256.

GEOL 462. Environmental Geomechanics. 4 Credits.

Application of fluid and solid mechanics to understanding processes in the earth and environmental sciences. Offered alternate years.

Prereq: GEOL 455.

GEOL 463. Computational Earth Science. 4 Credits.

Practical techniques for scientific computing. Topics include root finding, curve fitting, interpolation, integration and differentiation, optimization, differential equations.

Prereq: MATH 253; GEOL 363 or equivalent.

GEOL 466. Geodynamics. 4 Credits.

Introduction to the process of the earth's physical workings. Includes rheology, bending of lithosphere, viscous flow, and heat transport.

Prereq: MATH 256 or equivalent; GEOL 455.

GEOL 467. Fault Mechanics. 4 Credits.

The physics of faulting throughout the earthquake cycle. Topics include fault friction, seismic rupture, earthquake triggering, and other fault zone processes. Offered alternate years.

Prereq: GEOL 315, MATH 253.

GEOL 468. Introduction to Seismology. 4 Credits.

Introduction to observational, theoretical, and computational seismology. Includes review of earth structure, source representation, ray theory, and seismic wave phenomena.

Prereq: MATH 256, GEOL 455.

GEOL 471. Thermodynamic Geochemistry. 4 Credits.

Introduction to geologic application of classical chemical thermodynamics. Gibbs free energy and its temperature, pressure, and composition derivatives; fugacity, activity, and chemical potential. Solutions, ideal and nonideal.

Prereq: GEOL 311 or 332, CH 223, MATH 253.

GEOL 472. Aqueous-Mineral-Gas Equilibria. 4 Credits.

Aqueous chemistry applied to natural waters (geothermal, diagenetic, continental brines). Equilibrium calculations applied to aqueous-mineral-gas systems.

Prereq: CH 223; MATH 252.

GEOL 473. Isotope Geochemistry. 4 Credits.

Introduction to nuclear physics and isotope systematics; techniques of isotope analysis; applications of stable and radioactive isotopes in geochronology and as tracers of geological processes.

GEOL 503. Thesis. 1-16 Credits.

Repeatable.

GEOL 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GEOL 508. Laboratory Projects: [Topic]. 1-6 Credits.

Repeatable.

GEOL 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

GEOL 514. Igneous and Metamorphic Petrology. 4 Credits.

Advanced principles of igneous and metamorphic petrogenesis. Gibbs phase rule, phase diagrams, mineral thermodynamics; magma geochemistry and rheology; metamorphic facies, geothermometry and geobarometry. Johnston.

GEOL 515. Field Geophysics. 4 Credits.

Introduction to geophysical methods for subsurface investigation, useful for exploration, geotechnical engineering, and characterization of subsurface groundwater and environmental conditions.

GEOL 518. Earth and Environmental Data Analysis. 4 Credits.

Tools-based instruction in data analysis for earth and environmental scientists. Topics include descriptive statistics, visualization, uncertainty analysis, hypothesis testing, regression, time series, and directional data. Prereq: MATH 246 or 251.

GEOL 520. Geocommunication. 3 Credits.

Scientific writing and presentations for the geological sciences. Focus on writing scientific papers and proposals, preparing oral and visual presentations.

GEOL 525. Geology of Ore Deposits. 5 Credits.

Porphyry copper-molybdenum, epithermal, massive sulfides in volcanic rocks, and base and precious metals in sedimentary rocks. Geologic setting, alteration and ore mineral assemblages, and geochemistry of ore formation.

GEOL 533. Paleobotany. 4 Credits.

Evolution and ecology of plants and microbes from the origin of life to global warming. Laboratory exercises and field trip to collect plant fossils.

GEOL 534. Vertebrate Paleontology. 4 Credits.

Evolution of vertebrates, including ourselves, based on fossil evidence. Physical and other evolutionary constraints are addressed, and lab exercises provide practical experience.

GEOL 535. Paleopedology. 4 Credits.

Soil formation; mapping and naming fossil soils; features of soils in hand specimens and petrographic thin sections; interpretations of ancient environments from features of fossil soils.

GEOL 538. Geobiology. 4 Credits.

Studies how microorganisms interact with geological environments at scales from enzymes to global element cycles.

GEOL 540. Sedimentary Basin Analysis. 4 Credits.

Evolution of sedimentary basins, emphasizing tectonic controls on basin formation and filling. Interpretation of subsidence mechanisms and sedimentary processes through analysis of the stratigraphic record.

GEOL 541. Hillslope Geomorphology. 4 Credits.

Hillslope processes and landforms; includes hillslope hydrology, overland flow erosion, weathering and soil formation, soil creep, landslides and related hazards, glacial and periglacial processes, effects of land-use practices and fire, and landscape evolution.

GEOL 551. Hydrogeology. 4 Credits.

Study of the origin, motion, and physical and chemical properties of ground water. Emphasizes quantitative analysis of flow and interaction with geologic materials.

GEOL 552. Neotectonics and Quaternary Geology. 4 Credits.

Interpretation of active structures from deformed quaternary sediments and surfaces using case histories. Field project uses air photos and field techniques. Repeatable once for maximum of 8 credits.

GEOL 553. Tectonics. 3 Credits.

Tectonic processes and examples. Global kinematics of plates and the forces that drive them. Continental deformation in compressional, shear, and extensional settings.

GEOL 554. Fluid Dynamics. 4 Credits.

Introduction to the continuum theory of fluid dynamics, focusing on the Navier-Stokes equations of motion including common simplified limits and extensions. Applications are drawn from Earth and Planetary Science, Biology, and Physics.

GEOL 555. Mechanical Earth. 4 Credits.

Introduction to continuum mechanics. Includes stress and strain, friction, elasticity, viscous fluids, constitutive laws, equations of motion, and deformation of the earth.

GEOL 562. Environmental Geomechanics. 4 Credits.

Application of fluid and solid mechanics to understanding processes in the earth and environmental sciences. Offered alternate years.

GEOL 563. Computational Earth Science. 4 Credits.

Practical techniques for scientific computing. Topics include root finding, curve fitting, interpolation, integration and differentiation, optimization, differential equations.

GEOL 566. Geodynamics. 4 Credits.

Introduction to the process of the earth's physical workings. Includes rheology, bending of lithosphere, viscous flow, and heat transport.

GEOL 567. Fault Mechanics. 4 Credits.

The physics of faulting throughout the earthquake cycle. Topics include fault friction, seismic rupture, earthquake triggering, and other fault zone processes. Offered alternate years.

GEOL 568. Introduction to Seismology. 4 Credits.

Introduction to observational, theoretical, and computational seismology. Includes review of earth structure, source representation, ray theory, and seismic wave phenomena.

GEOL 571. Thermodynamic Geochemistry. 4 Credits.

Introduction to geologic application of classical chemical thermodynamics. Gibbs free energy and its temperature, pressure, and composition derivatives; fugacity, activity, and chemical potential. Solutions, ideal and nonideal.

GEOL 572. Aqueous-Mineral-Gas Equilibria. 4 Credits.

Aqueous chemistry applied to natural waters (geothermal, diagenetic, continental brines). Equilibrium calculations applied to aqueous-mineral-gas systems.

Prereq: CH 223; MATH 252.

GEOL 573. Isotope Geochemistry. 4 Credits.

Introduction to nuclear physics and isotope systematics; techniques of isotope analysis; applications of stable and radioactive isotopes in geochronology and as tracers of geological processes.

GEOL 601. Research: [Topic]. 1-16 Credits.

Repeatable.

GEOL 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

GEOL 603. Dissertation. 1-16 Credits.

Repeatable.

GEOL 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

GEOL 606. Field Studies: [Topic]. 1-6 Credits.

Repeatable. Geologic fieldwork principally in connection with graduate thesis or dissertation. Emphasis on individual problems.

GEOL 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GEOL 608. Laboratory Projects: [Topic]. 1-3 Credits.

Repeatable.

GEOL 609. Practicum: [Topic]. 1-3 Credits.

Repeatable.

GEOL 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

GEOL 620. Advanced Igneous Petrology. 3 Credits.

Igneous rocks of the ocean basins, continental margins, and stable continental interior including basalts, calcalkaline series, and granites.

Content varies according to research interests.

Prereq: GEOL 414/514, 471/571 or equivalent.

GEOL 692. Volcanology. 3 Credits.

Products and processes of volcanism, origin of magmas, eruptive mechanisms, and relation of volcanism to orogeny and tectonic processes.

East Asian Languages and Literatures

Rachel DiNitto, Department Head

541-346-4012

541-346-0260 fax

301 Friendly Hall

1248 University of Oregon

Eugene, Oregon 97403-1248

The Department of East Asian Languages and Literatures presents a wide range of courses in several programs, from introductory courses in the languages and literatures of East Asia (Chinese, Japanese, and Korean) to advanced graduate-level study of linguistics and literature. Undergraduate degrees include a bachelor of arts (BA) degree in Chinese or Japanese and minors in Chinese, Japanese, or Korean. The department also offers master's (MA) and doctoral (PhD) degrees in East Asian languages and literatures. At all levels, students may choose to focus on either language or literature, though all degree programs require course work from both areas.

The department typically supports dozens of students in graduate-level study while 100 undergraduate BA majors graduate each year. Faculty members are strongly committed to promoting a rich immersion in Chinese, Japanese, and Korean, and undergraduates and graduate students alike are encouraged to study abroad and conduct research throughout East Asia.

Preparation

The department recommends the following preparation for study leading to an undergraduate major in Chinese, Japanese, or Korean:

1. As much work as possible in the student's major language, focusing on oral and written communication and reading comprehension

2. Knowledge of the history, culture, and geography of the area in which that language is spoken
3. Course work in literary analysis and cultural studies

Careers

Students with an undergraduate degree in Chinese, Japanese, or Korean are well prepared for graduate-level study in the humanities, social sciences, and professions (e.g., law or business). They are also suited to a range of jobs in many different sectors, including business, education, and journalism as well as government agencies and nonprofit organizations. Recent graduates have found jobs in all of these areas.

Faculty

Lucien Brown, associate professor (Korean linguistics, second-language acquisition, socio-pragmatics). BA, 1997, East Anglia; MA, 2004, PhD, 2008, London. (2011)

Roy Chan, associate professor (modern Chinese and Russian literature). BA, 2002, Washington (Seattle); PhD, 2009, California, Berkeley. (2013)

Weijun Chen, senior instructor (Chinese). BA, 1997, Anhui; MA, 2000, Nanjing. (2008)

Rachel DiNitto, professor (modern Japanese literature, cultural studies). BA, 1988, Pennsylvania; MA, 1996, PhD, 2000, Washington (Seattle). (2015)

Maram Epstein, professor (Ming-Qing vernacular fiction). BA, 1983, MA, 1987, PhD, 1992, Princeton. (1994)

Alisa D. Freedman, professor (modern Japanese literature and film). BA, 1991, Wesleyan; MA, 1995, PhD, 2002, Chicago. (2005)

Yukari Furikado-Koranda, senior instructor (Japanese). BA, 2002, Kobe College; MA, 2010, Oregon. (2010)

Miku Fukasaku, instructor (Japanese). BA, 2006, Tokyo Woman's Christian University; MA, 2016, Carthage College. (2016)

Denise Gigliotti, senior instructor (Chinese). BA, 1995, National Taiwan; MA, 1998, California, Los Angeles. (2002)

Alison Groppe, associate professor (Chinese culture). BA, 1989, Wellesley College; MA, 1995, PhD, 2006, Harvard. (2008)

Reiko Hashimoto, senior instructor (Japanese). BA, 1982, Chukyo; MA, 1992, Minnesota State, Mankato; PhD, 2000, Indiana, Bloomington. (2000)

Luke Habberstad, assistant professor (early Chinese literature). BA, 2003, Yale; MA, 2007, PhD, 2014, California, Berkeley. (2014)

Kaori Idemaru, associate professor (linguistics). BA, 1990, Osaka; MA, 1992, Northern Iowa; PhD, 2005, Oregon. (2008)

Rika Ikei, senior instructor (Japanese). BA, 1992, Kyoto University of Foreign Studies; MA, 1998, West Chester. (2003)

Zhuo Jing-Schmidt, professor (Chinese linguistics). BA, 1992, MA, 1995, Peking; MA, 1997, California, Los Angeles; PhD, 2005, Cologne. (2010)

Eun Young Lee, instructor (Korean). BE, 1995, Kangnam; MA, 2013, Oregon. (2013)

Fengjun Mao, senior instructor (Chinese). BA, 2000, MA, 2003, East China Normal. (2008).

Naoko Nakadate, senior instructor (Japanese). BA, 1988, Tokyo University of Foreign Studies; MA, 1992, Oregon. (1993)

Yoko O'Brien, senior instructor (Japanese). BA, 1996, Washington State; MA, 2000, Oregon. (2007)

Thomas Glynne Walley, associate professor (early modern Japanese literature). BA, 1996, Brigham Young; MA, 2001, Washington (St. Louis); PhD, 2009, Harvard. (2012)

Yugen Wang, associate professor (classical Chinese poetry and poetics). BA, 1992, Anhui Normal; MA, 1995, Peking; PhD, 2005, Harvard. (2005)

Jean Yuanpeng Wu, senior instructor (Chinese). BA, 1982, China University of Geosciences; MA, 1990, West Virginia; PhD, 1998, Michigan State. (1996)

Emeriti

Stephen W. Durrant, professor emeritus. BA, 1968, Brigham Young; PhD, 1975, Washington (Seattle). (1990)

Michael B. Fishlen, associate professor emeritus. BA, 1965, Knox College; MA, 1968, PhD, 1973, Indiana; JD, 1987, Oregon. (1970)

Angela Jung-Palandri, professor emerita. BA, 1946, Catholic University, Peking; MA, 1949, MLS, 1954, PhD, 1955, Washington (Seattle). (1962)

Stephen W. Kohl, associate professor emeritus. BA, 1967, PhD, 1974, Washington (Seattle). (1972)

Wendy Larson, professor emerita. BA, 1974, Oregon; MA, 1978, PhD, 1984, California, Berkley. (1985)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts in Chinese: Cultural-Intensive Option**

Undergraduate Studies

The Department of East Asian Languages and Literatures offers undergraduate major programs in Chinese and Japanese languages and literatures. Each program enables students to achieve proficiency in reading, writing, and speaking the language and to acquire a fundamental knowledge of the literature and culture of the country. The Department also offers undergraduate minors in Chinese, Japanese, and Korean.

Preparation

Students considering a major in Chinese or Japanese should decide their major as early as possible so that they can satisfy the requirements in four years of undergraduate study. Background in languages,

literature, or history at the high school or community college level is good preparation for the student majoring in Chinese or Japanese.

Careers

A major in Chinese or Japanese prepares a student for graduate study in the humanities, social sciences, and professional schools and also for careers in business, teaching, law, journalism, and government agencies. Career options for people with knowledge of Chinese, Japanese, or Korean are steadily increasing.

Chinese Flagship Program

This program is a language option for students who wish to achieve advanced levels of proficiency in Chinese.

Code	Title	Credits
CHN 420/520	Intermediate Language Strategies	4
CHN 421/521	Intermediate Language Strategies	4
CHN 422/522	Intermediate Language Strategies	4
CHN 439/539	Chinese Academic Writing	4
CHN 445/545	Advanced Chinese: [Topic]	4
CHN 480/580	Chinese Linguistics	4

Flagship courses as well as content courses taught in Chinese in other departments expose students to the language and content of a broad range of disciplines, including business, journalism, social sciences, sciences, and the humanities. These courses prepare students to pursue a wide variety of careers in Chinese-speaking environments. Students do not need to be Chinese majors to enroll in Chinese Flagship courses or the program. Those interested in either Flagship-level courses or formally enrolling in the program should visit chineseflagship.uoregon.edu.

Japanese Global Scholars Program

Specifically designed for advanced Japanese speakers committed to linguistic, cultural, and intellectual advancement. The program, open to majors and nonmajors, offers courses on academic topics conducted in Japanese, helping students to become proficient both in the subject areas and the language. For more information, visit the website (<https://casls.uoregon.edu/legacy-projects/student-programs/japanese-global-scholars>).

Major Requirements

Prospective majors must meet with an East Asian languages and literatures faculty advisor when declaring the major, each spring to obtain the advisor's signature before fall term registration, and two terms before graduation.

Any course for which a grade lower than C– is received does not count toward the major.

Prospective majors who place above the first term of the third year of a language (Third-Year Chinese (CHN 301) or Third-Year Japanese (JPN 301)) must draft an individualized program in conjunction with a department advisor.

Bachelor of Arts in Chinese: Culture-Intensive Option

At least five of the required courses must be completed within the Department of East Asian Languages and Literatures.

Code	Title	Credits
CHN 301	Third-Year Chinese	5
CHN 302	Third-Year Chinese	5
CHN 303	Third-Year Chinese	5
CHN 495	Senior Capstone in Chinese Culture: [Topic] ²	4
Select three of the following, with two in upper division.		12
These four courses must be taken in residence on the UO campus from the Department of East Asian Languages and Literatures.		
CHN 150	Introduction to Chinese Narrative	
CHN 151	Introduction to Chinese Film	
CHN 152	Introduction to Chinese Popular Culture	
CHN 305	History of Chinese Literature	
CHN 306	History of Chinese Literature	
CHN 307	History of Chinese Literature	
CHN 308	Literature of Modern Taiwan	
Four upper-division courses ¹		16
Total Credits		47

¹ Courses must be in Chinese language, culture, literature, linguistics, film, or other advisor-approved areas taken from this or other departments. Of these, at least three must be from the Department of East Asian Languages and Literatures, with two having the CHN subject code. A third non-Chinese course chosen from within the department may also count toward the culture-intensive option.

² Students may substitute a 400- or 500-level Chinese culture course for Senior Capstone in Chinese Culture: [Topic] (CHN 495) with advisor approval.

Bachelor of Arts in Chinese: Language-Intensive Option

At least five of the required courses must be completed within the Department of East Asian Languages and Literatures.

Code	Title	Credits
CHN 301	Third-Year Chinese	5
CHN 302	Third-Year Chinese	5
CHN 303	Third-Year Chinese	5
Select three of the following:		12

JPN 412	Fourth-Year Spoken Japanese	
JPN 413	Fourth-Year Spoken Japanese	
JPN 414	Fourth-Year Reading and Writing Japanese	
JPN 415	Fourth-Year Reading and Writing Japanese	
JPN 416	Fourth-Year Reading and Writing Japanese	
JPN 434	Advanced Readings in Japanese Literature	
JPN 435	Advanced Readings in Japanese Literature	
JPN 436	Advanced Readings in Japanese Literature	

JPN 437	Classical Japanese Literary Language	
Select two of the following:		8
JPN 305	Introduction to Japanese Literature	
JPN 306	Introduction to Japanese Literature	
JPN 307	Introduction to Japanese Literature	
JPN 315	Introduction to Japanese Linguistics	
Four upper-division courses ¹		16
Total Credits		47

¹ Courses must be in Japanese culture, literature, linguistics, film, or other advisor-approved areas taken from this or other departments. Of these, at least three must be from the Department of East Asian Languages and Literatures, with two having the JPN subject code. A third non-JPN course chosen from within the department may also count toward the culture-intensive option.

Bachelor of Arts in Japanese: Language-Intensive Option

At least five of the required courses must be completed within the Department of East Asian Languages and Literatures.

Code	Title	Credits
JPN 301	Third-Year Japanese	5
JPN 302	Third-Year Japanese	5
JPN 303	Third-Year Japanese	5
Select two of the following:		8
JPN 305	Introduction to Japanese Literature	
JPN 306	Introduction to Japanese Literature	
JPN 307	Introduction to Japanese Literature	
JPN 315	Introduction to Japanese Linguistics	
JPN 411	Fourth-Year Spoken Japanese	4
JPN 412	Fourth-Year Spoken Japanese	4
JPN 414	Fourth-Year Reading and Writing Japanese	4
JPN 415	Fourth-Year Reading and Writing Japanese	4
JPN 413	Fourth-Year Spoken Japanese	4
or JPN 416	Fourth-Year Reading and Writing Japanese	4
Upper-division course ¹		4
Total Credits		47

¹ Courses must be in Japanese literature, linguistics, film or culture (which may include a maximum of 8 credits in courses taught outside the Department of East Asian Languages and Literatures). Courses outside the department require advisor approval.

Bachelor of Arts in Japanese: Linguistics-Intensive Option

At least five of the required courses must be completed in the Department of East Asian Languages and Literatures.

Code	Title	Credits
JPN 301	Third-Year Japanese	5
JPN 302	Third-Year Japanese	5
JPN 303	Third-Year Japanese	5
Select two of the following:		8
JPN 411	Fourth-Year Spoken Japanese	

JPN 412	Fourth-Year Spoken Japanese	
JPN 413	Fourth-Year Spoken Japanese	
JPN 414	Fourth-Year Reading and Writing Japanese	
JPN 415	Fourth-Year Reading and Writing Japanese	
JPN 416	Fourth-Year Reading and Writing Japanese	
JPN 434	Advanced Readings in Japanese Literature	
JPN 435	Advanced Readings in Japanese Literature	
JPN 436	Advanced Readings in Japanese Literature	
JPN 437	Classical Japanese Literary Language	
Select three of the following:		12
EALL 209	Language and Society in East Asia	
JPN 315	Introduction to Japanese Linguistics	
LING 301	Introduction to Linguistics Analysis	
EALL 440	Japanese and Korean Phonetics	
EALL 441	Japanese and Korean Syntax	
Three upper-division courses ¹		12
Total Credits		47

¹ At least two courses must be EALL linguistics courses. All of them require advisor approval.

Honors

Graduation with departmental honors is approved for students who

1. Earn a cumulative GPA of 3.50 or better in all UO work
2. Earn a cumulative GPA of 3.75 or better in major course work
3. Complete, under the supervision of a faculty member, a senior thesis to be evaluated by the thesis director and one other faculty member in the department

Students must enroll for at least 6 pass/no pass (P/N) credits in Thesis (CHN 403) or Thesis (JPN 403) in addition to meeting the standard major requirements. Transfer work and P/N credits are not included in determining the GPA.

Honors Thesis in Chinese

With the support of an advisor, students may write a thesis on a Chinese topic. Thesis topics must be approved at least one term before the thesis is submitted for honors credit.

Thesis Written in English. To count toward a Chinese degree, the thesis must be on a Chinese cultural topic with a suggested length of forty pages.

Thesis Written in Chinese. With an advisor's approval, language-track majors may opt to write a thesis in Chinese with a suggested length of 12,500 characters. Students in the Chinese Flagship Program who are culture majors may petition to have a Chinese-language thesis count toward honors in the department. The thesis must be on a topic that reflects an aspect of Chinese culture.

Honors Thesis in Japanese

With the support of an advisor, students may write a thesis on a Japanese topic. Thesis topics must be approved at least one term before the thesis is submitted for honors credit.

Thesis Written in English. To count toward a Japanese degree, the thesis must be on a Japanese cultural topic with a suggested length of forty pages.

Thesis Written in Japanese. With an advisor's approval, majors may opt to write a thesis in Japanese with a suggested length of 12,500 characters.

Minor in Chinese

The Chinese minor requires a minimum of six upper-division courses (24 graded credits), which must consist of at least three language courses, two courses in literature, linguistics, and/or culture, and a sixth course with a CHN or EALL subject code. At least three of the six courses must be taken in residence on the University of Oregon campus from the Department of East Asian Languages and Literatures.

Code	Title	Credits
Modern Chinese language—a minimum of three courses, at third-year level or higher, chosen from the following:		
CHN 301	Third-Year Chinese	
CHN 302	Third-Year Chinese	
CHN 303	Third-Year Chinese	
CHN 411	Fourth-Year Chinese	
CHN 412	Fourth-Year Chinese	
CHN 413	Modern Chinese Texts: [Topic]	
Culture, literature, film, linguistics—a minimum of two courses chosen from the following		
CHN 305	History of Chinese Literature	
CHN 306	History of Chinese Literature	
CHN 307	History of Chinese Literature	
CHN 308	Literature of Modern Taiwan	
CHN 480	Chinese Linguistics	

Upper-division language courses must be taken at the University of Oregon or through an Oregon University System program in China. Lower-division courses must be passed with grades of C– or better or P; upper-division courses must be passed with grades of C– or better.

Minor in Japanese

The Japanese minor requires a minimum of 6 upper-division courses (a minimum of 24 graded credits), which must consist of at least 3 language courses, 2 courses in literature, linguistics, and/or culture, and a sixth course that has any JPN or EALL subject code. At least three of the six courses must be taken in residence on the University of Oregon campus from the Department of East Asian Languages and Literatures.

Code	Title	Credits
Modern Japanese language—a minimum of three courses, at third-year level or higher, chosen from the following:		
JPN 301	Third-Year Japanese	
JPN 302	Third-Year Japanese	
JPN 303	Third-Year Japanese	
JPN 411	Fourth-Year Spoken Japanese	
JPN 412	Fourth-Year Spoken Japanese	
JPN 413	Fourth-Year Spoken Japanese	
Culture, literature, film, linguistics—a minimum of two courses chosen from the following		

JPN 305	Introduction to Japanese Literature
JPN 306	Introduction to Japanese Literature
JPN 307	Introduction to Japanese Literature
JPN 315	Introduction to Japanese Linguistics

Upper-division language courses must be taken at the University of Oregon or through an Oregon University System program in Japan. Lower-division courses must be passed with grades of C– or better or P; upper-division courses must be passed with grades of C– or better.

Minor in Korean

The Korean minor requires a minimum of six upper-division courses (24 graded credits), which must consist of at least three language courses, two courses in literature, linguistics, and/or culture, and a sixth course with a KRN or EALL subject code. At least three of the six courses must be taken in residence on the University of Oregon campus from the Department of East Asian Languages and Literatures.

Code	Title	Credits
Korean language—a minimum of three courses, at third-year level or higher, chosen from the following:		
KRN 301	Third Year Korean	5
KRN 302	Third-Year Korean	5
KRN 303	Third-Year Korean	5
KRN 411	Fourth-Year Korean	4
KRN 412	Fourth-Year Korean	4
KRN 413	Fourth-Year Korean	4
Culture, literature, film, linguistics—a minimum of two courses chosen from the following:		
KRN 309	Languages and Cultural Formation in Korea	4
KRN 315	Introduction to Korean Linguistics	4
KRN 361	Korean Popular Culture and Transnationalism	4

Upper-division language courses must be taken at the University of Oregon or through an Oregon University System program in Korea. Lower-division courses must be passed with grades of C– or better or P; upper-division courses must be passed with grades of C– or better.

East Asian Studies Minor

See the **Asian Studies** section of this catalog for a description of the minor in East Asian studies.

Overseas Study

The University of Oregon has four overseas study programs in China and Japan. Students in University of Oregon study abroad programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. See International Affairs in the **Academic Resources** section of this catalog. Students are strongly advised to talk with their major advisor before they study abroad to plan their courses of study and make sure the courses they take in China and Japan will count toward major requirements.

Kindergarten through Secondary Teaching Careers

Students who complete the BA degree with a major in Chinese or Japanese are eligible to apply for the College of Education's fifth-year

licensure program in middle-secondary teaching or the fifth-year licensure program to become an elementary teacher. More information is available from the College of Education.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Graduate Studies

The Department of East Asian Languages and Literatures offers programs of study leading to the degrees of master of arts (MA) and doctor of philosophy (PhD) in East Asian languages and literatures. Students may choose to specialize in Chinese, Japanese, or Korean studies.

In addition to departmental requirements, graduate students must fulfill the general requirements of the Graduate School listed in that section of this catalog.

The Chinese, Japanese, and Korean studies programs, which prepare students to work in a variety of professional and academic fields, provide intensive training in linguistic and textual analysis and an extensive exposure to literary theory, film studies, and comparative and cultural studies. The department encourages students to develop their specialization in East Asian literatures and films in broader, more comparative, and more interdisciplinary and transnational perspectives than has been the case in traditional programs. The faculty's research and teaching interests cover the major fields, genres, and chronological divisions of Chinese and Japanese literature and film. They encourage creative connections and challenges to conventional disciplinary boundaries by exploring the relationships between literature-cinema and such areas as history, law, linguistics, politics, religion, philosophy, sociology, theater and the performing arts, and women's, gender, and sexuality studies.

Comparative Literature

Several members of the department's faculty participate in the Comparative Literature Program. For more information, see the **Comparative Literature** section of this catalog.

Linguistics

The departmental Chinese, Japanese and Korean linguists work closely with the Department of Linguistics in research, teaching, and program development in theoretical and applied linguistics. Interested students are encouraged to work closely with a departmental advisor to pursue a

specialization or field in East Asian linguistics and/or East Asian second-language acquisition.

In addition, several members of the department's faculty are affiliated with other UO graduate programs, including the graduate specialization in translation studies, graduate certificate in new media and culture, graduate certificate in women's and gender studies, and cinema studies.

Complete details and answers to specific questions about graduate programs in the Department of East Asian Languages and Literatures are available from the department's graduate secretary.

Admission

An applicant for admission to the MA program should have completed an undergraduate major in Chinese, Japanese, or Korean language, literature, or linguistics, or have equivalent experience.

An applicant for admission to the PhD program should have completed an MA degree in Chinese, Japanese, or Korean language and literature, linguistics, or have equivalent experience.

Application Procedure

Graduate program applications are submitted via an online process found at the department's web site. In the course of completing the application, students are required to upload the following:

- Statement of Purpose.** The 750-word statement of purpose should address the applicant's specific academic preparation or experience, all areas of research interest, career goals, and reason for attending the University of Oregon. In addition, PhD applicants should include potential research questions
- Writing Sample.** The writing sample must come from a course that shows up on the transcript. International students must submit a sample in English and may submit an additional sample in Chinese or Japanese
- Transcripts.** Unofficial copies of undergraduate and/or graduate transcripts should be uploaded from all institutions attended. In addition, official transcripts from these institutions should be sent to the University of Oregon, Office of Admissions, 1217 University of Oregon, Eugene, OR 97403-1217
- Letters of Recommendation.** Three persons familiar with the applicant's academic experience and ability to carry out independent research must be identified. The online application requests contact information (name, position, institution, telephone number, and e-mail address) from each of these people. Upon submission of the online application, each person will be notified via e-mail and provided with instructions on how to upload their recommendations
- Graduate Record Examination (GRE) scores.** The GRE test is required for all applicants. Applicants should take the test in time for the official results to arrive to the university prior to January 1. The online application is self-reporting, however official GRE scores need to be sent to the University of Oregon (institution code 4846) and the Department of East Asian Languages and Literatures (department code 2601)

Applications are due by January 1. New students are typically admitted to the program for fall term.

Graduate Employee Fellowships

A number of graduate employee fellowships (GEs) are available each year for new graduate students in the department. Students must apply to

the department by January 1 for admission and appointment the following fall term. During each term of the appointment, graduate employees must register for and complete at least 9 credits of course work that can be applied to the degree program.

First-year GEs must attend an orientation and training workshop, which is held the week before fall term begins.

Master of Arts in East Asian Languages and Literatures, Chinese Studies: Option One

This is the usual option for students seeking the MA degree in East Asian languages and literatures with a specialization in Chinese studies. It prepares students for study at the doctoral level.

Code	Title	Credits
CHN 523	Issues in Early Chinese Literature	4
CHN 524	Issues in Medieval Chinese Literature	4
CHN 525	Issues in Modern Chinese Literature	4
EALL 611	Critical Approaches	2
Five seminars on Chinese subject matter (at least three with the CHN subject code)		20
Two graduate courses in linguistics, literary theory, or another literature (advisor approved); as appropriate, these courses may count toward the five Chinese seminars		
One course in language pedagogy, Asian history, or another field relevant to student's career objectives (advisor approved); as appropriate, may count as one of the five Chinese seminars ¹		
CHN 503	Thesis ²	9
Total Credits		43

¹ Reading and Conference: [Topic] (CHN 605) may be counted toward the fourteen required courses, with advisor approval.

² Students who elect to write a thesis must register for this course.

Students must pass a comprehensive written examination at the end of study or write a master of arts thesis.

Master of Arts in East Asian Languages and Literatures, Chinese Studies: Option Two

A master's student may, in consultation with the student's advisor, apply for early entry to the PhD program. Such applications are typically made spring term but, in any event, after at least two terms at the university. Applications must include transcripts, three recommendations, and a statement of the student's prospective course of study. Students who elect this option are awarded the master's degree upon completion of the course work for the PhD degree. Students must pass a comprehensive oral examination that covers the student's primary areas of study.

Code	Title	Credits
CHN 523	Issues in Early Chinese Literature	4
CHN 524	Issues in Medieval Chinese Literature	4
CHN 525	Issues in Modern Chinese Literature	4
EALL 611	Critical Approaches	2
Five seminars on Chinese subject matter (at least three with the CHN subject code)		20

Two graduate courses in linguistics, literary theory, or another literature (advisor approved); as appropriate, may count toward the five Chinese seminars

One course in language pedagogy, Asian history, or another field relevant to student's career objectives (advisor approved); as appropriate, may count as one of the five Chinese seminars¹

Total Credits 34

¹ Reading and Conference: [Topic] (CHN 605) may be counted toward the twelve required courses, with advisor approval.

Master of Arts in East Asian Languages and Literatures, Japanese Studies

The student takes 12 related to the field of Japanese studies:

Code	Title	Credits
Six courses in Japanese studies		24
Two courses in methodology-theory		8
Two East Asian-related courses, which may be taught outside of the department		8
Select one of the following:		4
JPN 537	Classical Japanese Literary Language	
JPN 534	Advanced Readings in Japanese Literature	
Course in the Japanese Global Scholars Program ¹		4
Total Credits		48

¹ For nonnative speakers of Japanese; native speakers of Japanese take an additional course in Japanese studies in place of this requirement.

In addition to the completion of the required courses, students must pass a comprehensive examination at the end of study or complete a master of arts thesis. The examination and degree-granting process differs for terminal MA students and for students who apply for continued study in the university's PhD program (see below).

Terminal MA Students in Japanese Studies

Those students who are not planning to go on to the PhD must successfully pass a **two-part written examination** based on the following reading list:

1. Approximately 20 works of Japanese literature and/or Japanese film, which should provide comprehensive coverage of major periods, writers, and genres of Japanese literature and/or film. The student's advisor will provide a model reading list.
2. Approximately 10 works of general theory and criticism, based on the student's specialized area, which can be outside the area of Japanese studies.
3. Approximately 10 works in a specialized area of the student's own choosing.

The first part of the exam shall include questions pertaining to broad issues in the field of Japanese literature and film deriving from section one of the student's reading list. The second part of the exam, to be administered a week later, shall cover more specialized questions deriving from sections two and three of the student's reading list. The

student shall have forty-eight hours for each part to produce the final typed, double-spaced exams of approximately ten to twelve pages each.

The faculty committee administering the examination shall determine whether the student has successfully fulfilled the requirements for the MA degree, and shall confer one of the following grades: *distinction*, *clear pass*, *marginal pass*, or *failure*. Should the advisor determine that the candidate has not been successful, he or she may recommend that the student be given one additional opportunity to pass the exam during the next academic term.

Consulting the advisor, the student can complete an MA thesis instead of passing a comprehensive examination at the end of study. Students who elect to write a thesis must register for 9 credits of Thesis (JPN 503). As in the case of students who take comprehensive examinations, the faculty committee shall determine whether the student has successfully fulfilled the requirements of the MA degree, and shall confer one of the following grades: *distinction*, *clear pass*, *marginal pass*, or *failure*. Should the committee determine that the candidate has not been successful, its members may recommend that the student be given additional time to revise the thesis or to pass the exam during the next academic term.

Master of Arts in East Asian Languages and Literatures, Korean Studies

The MA degree in East Asian Languages and Literatures with a specialization in Korean literature, film, and culture requires successful completion of a minimum of 12 graduate-level courses (at least 4 credits each). These courses must be chosen in consultation with the student's advisor.

Code	Title	Credits
Three courses in the Korean sector		12
Four Korea-related courses, which may be taught outside the department		16
Five advisor-approved electives with the subject code EALL		20
Total Credits		48

In addition to completion of the required courses, students must pass a comprehensive examination at the end of study or write and defend a MA thesis.

Option 1: MA Comprehensive Exam

Students who choose to take a comprehensive exam must successfully pass a two-part written examination based on the following reading list:

1. Approximately 20 works of Korean literature and/or film, which should provide comprehensive coverage of major periods, writers, and genres of Korean literature and/or film. The student's advisor will provide a model reading list.
2. Approximately 10 works of general theory and criticism, based on the student's specialized area, which can be outside of the area of Korean studies.
3. Approximately 10 works of a specialized area of the student's own choosing.

The first part of the exam shall include questions pertaining to broad issues in the field of Korean literature and/or film deriving from section one of the students' reading list. The second part of the exam, to be administered a week later, shall cover more specialized questions deriving from sections two and three of the student's reading list. The

student shall have 48 hours for each part to produce the final typed, double-spaced exams of approximately 10 to 12 pages each.

Option 2: MA Thesis

Students who elect to write a thesis must register for 9 credits of Thesis (KRN 503).

Two terms before graduation, the student meets with the advisor during the first week of the term to set up a two-member committee and a schedule for submitting thesis or project drafts (e.g., the first week of winter term if planning to graduate spring term).

At least six weeks before the date of the thesis or project defense, the student submits a draft to the main advisor for approval. The advisor is expected to return comments within two weeks. Then, a continuing dialogue ensues between the student and advisor until the manuscript is considered complete. If approval is not obtained at this point, there is no guarantee that the student will be able to graduate that term.

The student submits a clean copy of the thesis or project to the advisor and committee members either two weeks before defense or four weeks before the filing date for an approved thesis as published by the Graduate School.

Master of Arts in East Asian Languages and Literatures, Linguistics and Language Pedagogy

This MA program offers a complete East Asian linguistics and pedagogy program, covering Chinese, Japanese, and Korean. Students may elect to specialize in Chinese, Japanese, or Korean linguistics and pedagogy.

Code	Title	Credits
EALL 611	Critical Approaches	2
Core Courses (Chinese Focus)		
Choose four from the following:		16
CHN 580	Chinese Linguistics	
CHN 581	Pedagogical Grammar of Chinese	
EALL 540	Japanese and Korean Phonetics	
EALL 542	Second-Language Acquisition	
EALL 543	Chinese, Japanese, and Korean Pedagogy	
EALL 680	Linguistics Research and Bibliography	
Core Courses (Japanese Focus)		
Choose four from the following:		16
EALL 540	Japanese and Korean Phonetics	
EALL 541	Japanese and Korean Syntax	
EALL 542	Second-Language Acquisition	
EALL 543	Chinese, Japanese, and Korean Pedagogy	
EALL 680	Linguistics Research and Bibliography	
One course in Japanese pedagogical grammar		
Core Courses (Korean Focus)		
Choose four from the following:		16
EALL 540	Japanese and Korean Phonetics	
EALL 541	Japanese and Korean Syntax	
EALL 542	Second-Language Acquisition	
EALL 543	Chinese, Japanese, and Korean Pedagogy	
EALL 680	Linguistics Research and Bibliography	
One course in Korean pedagogical grammar		

Linguistics Electives

Choose at least four of the following:		16
CHN 582	History of the Chinese Language	
CHN 507	Seminar: [Topic] (Figurative Language)	
EALL 586		
EALL 507	Seminar: [Topic] (Sociophonetics)	
EALL 507	Seminar: [Topic] (Phonetics and Second-Language Acquisition)	

Open Electives

Four advisor-approved courses in linguistics, literature, and languages with an EALL subject code	16
---	----

¹ Must be taken by all graduate students during first term.

Additional Requirements

Nonnative speakers are required to complete a course (or receive credit by examination) in the language in which they specialize at the fourth-year level. For Japanese, this would be a Global Scholars course.

The Graduate School requires all MA students to take a total of 9 credits in 600-level courses.

MA Comprehensive Exam, MA Project, or MA Thesis (4–9 credits).

Students are required to either pass an MA comprehensive exam or successfully complete an MA project or thesis.

MA Students Seeking Entry to the PhD Program

If the student also decides to seek admission into the PhD program, the MA examination administered shall include the oral component.

An oral examination shall take place no later than the seventh week of the term in which a request for the degree has been made. It shall consist of a one- to two-hour interview with the faculty committee, which is required to be formed by the student and the advisor before the student takes the comprehensive exam, and shall include evaluation of the following:

- the student's skills in critical thinking, reading, listening, and writing
- the student's ability to formulate a pedagogical approach to topics appropriate to the student's career goals
- a discussion of career options and prospects

The committee shall determine whether the candidate has successfully fulfilled the requirements for the MA degree, and shall confer one of the following grades: *distinction*, *clear pass*, *marginal pass*, or *failure*. This determination is independent of the student's candidacy to the PhD program. As in the case of terminal MA students, should the committee determine that the candidate has not been successful, it may recommend that the student be given one additional opportunity to pass the exam during the next academic term.

Master's degree candidates must also fulfill the requirements of the UO Graduate School.

Doctor of Philosophy Degree Program

The PhD program in East Asian languages and literatures is designed to provide students with a high level of competence in their area of specialization and a familiarity with applicable methodologies and theories. The program has four components:

- course work
- comprehensive examination
- prospectus for the dissertation
- the dissertation itself

Specific courses and projects used to fulfill requirements must be approved by the student’s advisor, who works with the other faculty members to develop the student’s program.

Timeline for Completion of the PhD Program

Course work—two years

Comprehensive examination and approval of prospectus or qualifying paper—one year

Dissertation writing and defense—two years

Additional Course Work

Depending on the student’s background when admitted to the PhD program, additional course work may be required.

PhD in East Asian Languages and Literatures, Chinese Studies

The PhD degree in East Asian languages and literatures with a specialization in Chinese studies requires completion of a minimum of six 4-credit graduate-level courses beyond those required for the MA degree. Depending on the student’s background or preparation at the time of admission to the PhD program, the number of required courses may be nine or twelve. Courses must be chosen in consultation with the student’s advisor.

Code	Title	Credits
Six courses in Chinese literature, linguistics, or film		
CHN 523	Issues in Early Chinese Literature ¹	4
CHN 524	Issues in Medieval Chinese Literature ¹	4
CHN 525	Issues in Modern Chinese Literature ¹	4

Select one of the following:

Demonstrate the ability to use a second foreign language substantively in research or pass a translation examination in the language

Demonstrate advanced knowledge of a particular methodology or theory by taking three graduate-level courses, including one course in CHN 605 for which the student writes a paper applying the methodology to Chinese literature

Complete three courses in a secondary literature

¹ Or equivalents—unless the student has already taken these courses.

PhD in East Asian Languages and Literatures, Japanese Studies

The PhD with a specialization in Japanese studies requires students to successfully complete nine graduate courses beyond the number required for the MA degree. These courses must be chosen in consultation with the student’s advisor. Appropriate courses in related fields (e.g., Japanese history, religion) may be substituted with the advisor’s approval.

Code	Title	Credits
Four courses in Japanese studies		
Two courses in methodology-theory, preferably in Japanese studies ¹		
Japanese linguistics or teaching methodology course		
Two courses chosen in consultation with advisor ¹		

¹ At least one of the two must be in EALL

PhD in East Asian Languages and Literatures, Linguistics

The PhD with a specialization in East Asian linguistics is designed to build a high level of competence in linguistics research in Chinese, Japanese, or Korean. The program has four components:

- Course work
- Comprehensive exam
- Qualifying paper
- Dissertation

A total of nine graduate courses beyond those at the MA level is required. Courses must be chosen in consultation with a doctoral advisor.

Code	Title	Credits
Choose three or more core courses in East Asian linguistics:		
CHN 580	Chinese Linguistics	
EALL 540	Japanese and Korean Phonetics	
EALL 541	Japanese and Korean Syntax	
EALL 680	Linguistics Research and Bibliography	
Choose three or more electives in East Asian linguistics:		
CHN 581	Pedagogical Grammar of Chinese	
CHN 582	History of the Chinese Language	
EALL 543	Chinese, Japanese, and Korean Pedagogy	
KRN 510	Experimental Course: [Topic]	
EALL 542	Second-Language Acquisition	
EALL 586		
CHN 603	Dissertation	
JPN 603	Dissertation	

Other electives may be taken in linguistics, language teaching specialization, or psychology in consultation with an advisor.

Students in the PhD track must successfully complete a comprehensive examination and prospectus defense (culture students) or qualifying paper (linguistics students) to advance to candidacy (all but dissertation) status. By the end of their second year in the program (at the very latest), each student should identify a committee of three faculty members who will oversee their training for the comprehensive examination. Since each person’s needs and interests may be different, students are expected to work closely with their primary advisor at all stages of the process.

Comprehensive Examination

The goal of the comprehensive examination is to ensure that students have received training broad enough to qualify as a teacher beyond the narrow research focus of their dissertation. The comprehensive examination is composed of a written and an oral component.

In conjunction with their primary advisor, students choose three fields, a major field and two minor fields, each to be advised by a faculty member in that area. Cultural fields may be determined by genre, time period, or methodology; linguistic fields may be determined by theoretical orientation, language orientation, and methodology. In conjunction with their advisors, students develop a reading list of twenty to forty items for each field. For culture students, these items may include both primary and secondary texts; the composition of each reading list will be tailored to the individual student's needs. It is expected that reading lists will develop organically from graduate seminars and readings and conferences.

For each field, the student will submit a comprehensive examination paper. The papers may be developed from a term paper written for a seminar or written for the sake of the examination, as determined by the advisor. These comprehensive examination papers should demonstrate the student's broad knowledge of a field. Ideally, for the major field, this paper will be the basis for a dissertation chapter. In some instances, students may be asked to develop a syllabus rather than write a research paper.

Advisors have two weeks to read and approve each comprehensive examination paper. After the three comprehensive examination papers have been approved by the field examiner and the primary advisor, the student schedules an oral examination. The oral examination (one to two hours in duration) is an opportunity for the three examiners to engage the student in an in-depth conversation about the items on the reading lists. The goal of the oral examination is to ensure that students have enough familiarity with both the critical and primary works in the field to teach at the postsecondary level. The oral examination is not open to the public.

Both parts of the comprehensive examination should be completed by the end of the student's third year in the program. It is at the discretion of the committee to determine if students should have a second opportunity to sit for an oral examination if the first attempt is not successful. At the discretion of the committee, those students whose performance is deemed unsatisfactory may be granted a terminal MA.

Prospectus (Culture Track)

Before scheduling the prospectus defense, students need to notify the graduate secretary of the membership of their dissertation committee (three faculty members from the department and one from another department). The prospectus defense is the first meeting of the entire dissertation committee to provide feedback on the dissertation research project. The prospectus, a document of twenty to thirty pages, should introduce the research question, the methodology, and a basic outline of the dissertation; a bibliography is required. Once the advisors approve a draft of the dissertation prospectus, certifying that in their opinion the project is well-conceived and viable, the student schedules a meeting of the entire committee. A defense is an opportunity for the committee to ask questions and provide advice and direction for the research project. The prospectus defense is public.

In order to leave enough time for the dissertation research and writing, the prospectus defense should take place during the third year of study and no later than the winter term of the fourth year. Students who are unable to complete a viable prospectus by spring of their fourth year in the program will be granted a terminal MA.

Qualifying Paper (Linguistics Track)

As the equivalent of the prospectus defense for culture track students, linguistics students are expected to produce an original publishable

paper, of substantial length and quality, in a subfield of linguistics. This qualifying paper should demonstrate the student's ability to carry out an empirical study and write an analytical research paper. The unmodified MA thesis cannot serve this purpose.

A committee consisting of the advisor and a second faculty member familiar with the subfield will referee the qualifying paper. The student may be asked to revise the qualifying paper before it is accepted as satisfactory work. Upon documented completion of the paper, the student needs to identify a dissertation committee (three faculty members from the department and one from another department) and notify the graduate secretary. The student then confirms the dissertation topic and presents a prospectus constituting a short abstract detailing their research topic. This should be done within one term of completing the qualifying paper. After the prospectus has been approved, the student will advance to candidacy.

To leave enough time for the dissertation research and writing, the qualifying paper and prospectus should be completed during the third year of study and no later than the winter term of the fourth year. Students who are unable to complete a viable qualifying paper by spring of their fourth year in the program will be granted a terminal MA.

Program Goals

The comprehensive examination is distinct from the dissertation prospectus or qualifying paper. The comprehensive examination papers and oral examination involve general preparation and give the student an opportunity to show broad knowledge of a field. The prospectus defense for culture-track students is more narrowly focused on the dissertation project and demonstrates the student's ability to identify and define a research project. Similarly, the qualifying paper for linguistics students is focused on the student's main research area and demonstrates the ability to undertake a research project. The comprehensive examination and prospectus defense or qualifying paper enable students to demonstrate that they can be successful as teachers and researchers. Students will advance to ABD (all but dissertation) status after the successful completion of both the comprehensive examination and the prospectus defense or qualifying paper, in addition to the completion of all required course work.

Dissertation

A dissertation committee is formed at least one month before the prospectus is presented for review and approval. This committee advises the student on writing the dissertation and approves the completed dissertation.

Students who have taken an MA comprehensive exam in Japanese studies do not need to take a PhD comprehensive exam. However, they need to defend their dissertation prospectus within one academic term after the completion of doctoral course work.

Chinese Courses

CHN 101. First-Year Chinese. 5 Credits.

Provides thorough grounding in listening comprehension, speaking, reading, and writing. Emphasis on aural-oral skills. For students with no background in Mandarin Chinese.

CHN 102. First-Year Chinese. 5 Credits.

Provides thorough grounding in listening comprehension, speaking, reading, and writing. Emphasis on aural-oral skills. For students with no background in Mandarin Chinese.

Prereq: CHN 101 or equivalent.

CHN 103. First-Year Chinese. 5 Credits.

Provides thorough grounding in listening comprehension, speaking, reading, and writing. Emphasis on aural-oral skills. For students with no background in Mandarin Chinese.

Prereq: CHN 102 or equivalent.

CHN 105. Accelerated First-Year Chinese I. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of listening comprehension, speaking, reading, and writing. Sequence with CHN 106.

Prereq: CHN 101 with grade of A- or higher.

CHN 106. Accelerated First-Year Chinese II. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of grounding in listening comprehension, speaking, reading, and writing. Sequence with CHN 105.

Prereq: CHN 102 with a grade of A or higher or CHN 105 with a grade of A or higher.

CHN 110. Introduction to Chinese Narrative. 4 Credits.

Introduction to specific features of Chinese narrative. Readings may span traditional to contemporary literature. Focuses on analysis of characterization, symbolism, causality, and formal issues. Taught in English.

CHN 151. Introduction to Chinese Film. 4 Credits.

Introduction to the cinemas of China, Taiwan, and Hong Kong, featuring films by directors Zhang Yimou, Chen Kaige, John Woo, Wong Kar-Wei, and Ang Lee. No background in Chinese necessary; English subtitles.

CHN 152. Introduction to Chinese Popular Culture. 4 Credits.

Introduction to popular Chinese cultures in China, Hong Kong, Taiwan, and the United States. Discussion focuses on nationalism, globalization, identity, and gender. No background in Chinese necessary; taught in English.

CHN 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

CHN 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

CHN 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CHN 201. Second-Year Chinese. 5 Credits.

Training in aural-oral skills designed to build listening comprehension and fluency. Development of proficiency in written Chinese.

Prereq: CHN 103 or equivalent.

CHN 202. Second-Year Chinese. 5 Credits.

Training in aural-oral skills designed to build listening comprehension and fluency. Development of proficiency in written Chinese.

Prereq: CHN 201 or equivalent.

CHN 203. Second-Year Chinese. 5 Credits.

Training in aural-oral skills designed to build listening comprehension and fluency. Development of proficiency in written Chinese.

Prereq: CHN 202 or equivalent.

CHN 204. Accelerated Second-Year Chinese I. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of grounding in listening comprehension, speaking, reading, and writing. Sequence with CHN 205, CHN 206.

Prereq: CHN 103 with a grade of A or higher or CHN 106 with a grade of B+ or higher.

CHN 205. Accelerated Second-Year Chinese II. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of grounding in listening comprehension, speaking, reading, and writing. Sequence with CHN 204, CHN 206.

Prereq: CHN 201 with a grade of A or higher or CHN 204 with a grade of B+ or higher.

CHN 206. Accelerated Second-Year Chinese III. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of grounding in listening comprehension, speaking, reading, and writing. Sequence with CHN 204, CHN 205.

Prereq: CHN 202 with a grade of A or higher or CHN 205 with a grade of B+ or higher.

CHN 301. Third-Year Chinese. 5 Credits.

Continued training in listening, speaking, reading, and writing.

Prereq: CHN 203 or equivalent.

CHN 302. Third-Year Chinese. 5 Credits.

Continued training in listening, speaking, reading, and writing.

Prereq: CHN 301 or equivalent.

CHN 303. Third-Year Chinese. 5 Credits.

Continued training in listening, speaking, reading, and writing.

Prereq: CHN 302 or equivalent.

CHN 305. History of Chinese Literature. 4 Credits.

Survey ranging from early Confucian and Daoist classics through Tang and Song poetry, short fiction and novels, the 1919 May Fourth Movement writers, and into the contemporary period. Readings in English.

Prereq: WR 121 or equivalent.

CHN 306. History of Chinese Literature. 4 Credits.

Survey ranging from early Confucian and Daoist classics through Tang and Song poetry, short fiction and novels, the 1919 May Fourth Movement writers, and into the contemporary period. Readings in English.

Prereq: WR 121 or equivalent.

CHN 307. History of Chinese Literature. 4 Credits.

Survey ranging from early Confucian and Daoist classics through Tang and Song poetry, short fiction and novels, the 1919 May Fourth Movement writers, and into the contemporary period. Readings in English.

Prereq: WR 121 or equivalent.

CHN 308. Literature of Modern Taiwan. 4 Credits.

Surveys the literature of Taiwan from the postwar era to the present. Discussion focuses on national identity, gender, class, modernization, and globalization. Taught in English.

Prereq: WR 121 or equivalent.

CHN 350. Gender and Sexuality in Traditional Chinese Literature. 4 Credits.

Examines the changing constructions of gender and sexuality in premodern China. Topics include arranged marriage and concubinage, attitudes toward the body and transgender identities. No background in Chinese necessary; readings in English.

Prereq: WR 121 or equivalent.

CHN 351. Gender and Sexuality in Modern Chinese Literature. 4 Credits.

Primary and secondary works about women, sexuality, and changing gender roles in republican, socialist, and post-Mao China. Readings in English.

Prereq: WR 121 or equivalent.

CHN 380. Self and Society in Traditional Chinese Literature. 4 Credits.

Examines the role of the self in premodern Chinese society through reading some of the most important works in traditional Chinese literature. Taught in Chinese.

Prereq: Proficiency in modern Chinese as confirmed by instructor.

CHN 399. Special Studies: [Topic]. 1-5 Credits.

Topic varies from term to term. Repeatable for maximum of 12 credits.

CHN 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

CHN 401. Research: [Topic]. 1-21 Credits.

Repeatable.

CHN 403. Thesis. 1-6 Credits.

Repeatable for maximum of 6 credits.

CHN 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

CHN 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

CHN 407. Seminar: [Topic]. 1-4 Credits.

Studies and projects in Chinese literature, linguistics, or pedagogy. Sources are in Chinese, English, or both. Repeatable when topic changes.

CHN 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

CHN 409. Supervised Tutoring. 1-4 Credits.

Repeatable for maximum of 18 credits.

CHN 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CHN 411. Fourth-Year Chinese. 4 Credits.

Study of contemporary Chinese using written and spoken forms.

Prereq: CHN 303 or equivalent.

CHN 412. Fourth-Year Chinese. 4 Credits.

Study of contemporary Chinese using written and spoken forms.

Prereq: CHN 411.

CHN 413. Modern Chinese Texts: [Topic]. 4 Credits.

Readings and discussion in Chinese of Chinese modern literary and cultural texts. Topics change yearly. Repeatable once when topic changes, for maximum of 8 credits.

CHN 420. Intermediate Language Strategies. 4 Credits.

Focuses on topics in one of these areas: social sciences, sciences, and humanities. Sequence with CHN 421, 422.

Prereq: CHN 303 or third-year Chinese language proficiency.

CHN 421. Intermediate Language Strategies. 4 Credits.

Focuses on topics in one of these areas: social sciences, sciences, and humanities. Sequence with CHN 420, 422.

Prereq: CHN 303 or third-year Chinese language proficiency.

CHN 422. Intermediate Language Strategies. 4 Credits.

Focuses on topics in one of these areas: social sciences, sciences, and humanities. Sequence with CHN 420, 421.

Prereq: CHN 303 or third-year Chinese language proficiency.

CHN 423. Issues in Early Chinese Literature. 4 Credits.

Explores scholarship on and questions raised about early Chinese literary forms; examines the notions of history and narrative.

CHN 424. Issues in Medieval Chinese Literature. 4 Credits.

Explores scholarship on and questions raised about Chinese poetry and its characteristics.

CHN 425. Issues in Modern Chinese Literature. 4 Credits.

Explores scholarship on and questions raised about modern Chinese literature and culture; includes realism, modernism, gender, and literary form.

CHN 436. Literary Chinese. 4 Credits.

Readings in various styles and genres of classical Chinese literature; stress on major works of different periods. Preparation for research.

CHN 437. Literary Chinese. 4 Credits.

Readings in various styles and genres of classical Chinese literature; stress on major works of different periods. Preparation for research.

CHN 439. Chinese Academic Writing. 4 Credits.

Expansion of skills in formal written Chinese to communicate with native speakers about thoughts and professional knowledge. Repeatable thrice for a maximum of 16 credits when topic changes.

Prereq: CHN 420.

CHN 445. Advanced Chinese: [Topic]. 4 Credits.

Repeatable. Focuses on group and individual language study on a specific topic, such as cultural geography of China, religious studies, or business.

Prereq: CHN 422/522.

CHN 452. Chinese Film and Theory. 4 Credits.

Examines Chinese film and film theory. Focuses on Chinese film in cultural debate and in the international film arena.

CHN 480. Chinese Linguistics. 4 Credits.

Introduces students to various linguistic levels of Chinese; covers basic concepts and methodologies of linguistic analysis, including the relationship between language structure, culture, and cognition.

CHN 481. Pedagogical Grammar of Chinese. 4 Credits.

Introduces students to theoretically grounded pedagogical approaches to Chinese as a foreign language. Topics include theoretical models, tones, characters, morphology, syntactic construction, and discourse pragmatics.

CHN 482. History of the Chinese Language. 4 Credits.

Introduction to the various stages of the historical development of the Chinese language family. Offered alternate years.

CHN 495. Senior Capstone in Chinese Culture: [Topic]. 4 Credits.

Senior capstone course for CHN Culture-Intensive majors that focuses on a topic in Chinese culture taught within the faculty instructor's research expertise. Taught in a seminar style. Extensive reading, analysis, and research culminate in the production of an original 12-15 page research paper.

Prereq: WR 121 or equivalent.

CHN 500M. . 1-5 Credits.**CHN 503. Thesis. 1-6 Credits.**

Repeatable.

CHN 507. Seminar: [Topic]. 1-4 Credits.

Studies and projects in Chinese literature, linguistics, or pedagogy. Sources are in Chinese, English, or both. Repeatable when topic changes.

CHN 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

CHN 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CHN 511. Fourth-Year Chinese. 4 Credits.

Repeatable. Study of contemporary Chinese using written and spoken forms.

Prereq: CHN 303 or equivalent.

CHN 512. Fourth-Year Chinese. 4 Credits.

Repeatable. Study of contemporary Chinese using written and spoken forms.

Prereq: CHN 4/511.

CHN 513. Modern Chinese Texts: [Topic]. 4 Credits.

Readings and discussion in Chinese of Chinese modern literary and cultural texts. Topics change yearly. Repeatable once when topic changes, for maximum of 8 credits.

CHN 520. Intermediate Language Strategies. 4 Credits.

Focuses on group and individual language study that is typically correlated with a specific content course concerning China or other Chinese-speaking areas. Sequence with CHN 521, 522.

CHN 521. Intermediate Language Strategies. 4 Credits.

Focuses on group and individual language study that is typically correlated with a specific content course concerning China or other Chinese-speaking areas. Sequence with CHN 520, 522.

CHN 522. Intermediate Language Strategies. 4 Credits.

Focuses on group and individual language study that is typically correlated with a specific content course concerning China or other Chinese-speaking areas. Sequence with CHN 520, 522.

CHN 523. Issues in Early Chinese Literature. 4 Credits.

Explores scholarship on and questions raised about early Chinese literary forms; examines the notions of history and narrative.

CHN 524. Issues in Medieval Chinese Literature. 4 Credits.

Explores scholarship on and questions raised about Chinese poetry and its characteristics.

CHN 525. Issues in Modern Chinese Literature. 4 Credits.

Explores scholarship on and questions raised about modern Chinese literature and culture; includes realism, modernism, gender, and literary form.

CHN 536. Literary Chinese. 4 Credits.

Readings in various styles and genres of classical Chinese literature; stress on major works of different periods. Preparation for research.

CHN 537. Literary Chinese. 4 Credits.

Readings in various styles and genres of classical Chinese literature; stress on major works of different periods. Preparation for research.

CHN 539. Chinese Academic Writing. 4 Credits.

Expansion of skills in formal written Chinese to communicate with native speakers about thoughts and professional knowledge. Repeatable thrice for a maximum of 16 credits when topic changes.

Prereq: CHN 520.

CHN 545. Advanced Chinese: [Topic]. 4 Credits.

Repeatable. Focuses on group and individual language study on a specific topic, such as cultural geography of China, religious studies, or business.

CHN 552. Chinese Film and Theory. 4 Credits.

Examines Chinese film and film theory. Focuses on Chinese film in cultural debate and in the international film arena.

CHN 580. Chinese Linguistics. 4 Credits.

Introduces students to various linguistic levels of Chinese; covers basic concepts and methodologies of linguistic analysis, including the relationship between language structure, culture, and cognition.

CHN 581. Pedagogical Grammar of Chinese. 4 Credits.

Introduces students to theoretically grounded pedagogical approaches to Chinese as a foreign language. Topics include theoretical models, tones, characters, morphology, syntactic construction, and discourse pragmatics.

CHN 582. History of the Chinese Language. 4 Credits.

Introduction to the various stages of the historical development of the Chinese language family. Offered alternate years.

CHN 601. Research: [Topic]. 1-10 Credits.

Repeatable.

CHN 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

CHN 603. Dissertation. 1-16 Credits.

Repeatable.

CHN 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable as student projects warrant.

CHN 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

CHN 607. Seminar: [Topic]. 1-6 Credits.

Studies and projects in Chinese literature, linguistics, or pedagogy. Sources in Chinese, English, or both. Repeatable when topic changes.

CHN 609. Practicum: [Topic]. 1-4 Credits.

Repeatable for maximum of 18 credits.

East Asian Languages and Literatures Courses

EALL 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

EALL 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

EALL 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

EALL 209. Language and Society in East Asia. 4 Credits.

Introduction to language and society in East Asia. Topics include the structure of Chinese, Japanese, and Korean; politeness; intercultural communication; writing; minority and immigrant communities. Taught in English.

EALL 210. China: A Cultural Odyssey. 4 Credits.

Introduction to the distinctive features of China's linguistic, literary, artistic, and religio-philosophical heritage. Includes guest lectures, films.

EALL 211. Japan: A Cultural Odyssey. 4 Credits.

Introduction to distinctive features of Japan's linguistic, literary, artistic, and religio-philosophical heritage. Includes guest lectures, films.

EALL 360. East Asian Cinema. 4 Credits.

Examination of East Asian cinema in the context of the immense political and cultural transformations in Asia over the past century.

EALL 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

EALL 401. Research: [Topic]. 1-21 Credits.

Repeatable.

EALL 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

EALL 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

EALL 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

EALL 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

EALL 409. Supervised Tutoring. 1-3 Credits.

Repeatable.

EALL 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

EALL 440. Japanese and Korean Phonetics. 4 Credits.

The articulatory and acoustic analyses of Japanese and Korean sound systems.

Prereq: JPN 103 or KRN 103.

EALL 441. Japanese and Korean Syntax. 4 Credits.

Compares and contrasts syntactic characteristics of Japanese and Korean. Series with EALL 440/540, EALL 443/543. Offered alternate years.

Prereq: JPN 103, KRN 103, or equivalent.

EALL 442. Second-Language Acquisition. 4 Credits.

Analyzes how important theories and concepts in second-language acquisition apply specifically to the learning of Chinese, Japanese, and Korean.

EALL 443. Chinese, Japanese, and Korean Pedagogy. 4 Credits.

Advanced language pedagogy; includes investigation of issues pertinent to the teaching of East Asian languages.

Prereq: CHN 303, JPN 303, or KRN 303.

EALL 460. Teaching East Asian Languages and Literatures at College Level. 2 Credits.

Training in Chinese and Japanese language instruction through lectures, observations, and teaching practicums. Repeatable thrice for maximum of 8 credits.

EALL 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

EALL 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

EALL 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

EALL 540. Japanese and Korean Phonetics. 4 Credits.

The articulatory and acoustic analyses of Japanese and Korean sound systems.

EALL 541. Japanese and Korean Syntax. 4 Credits.

Compares and contrasts syntactic characteristics of Japanese and Korean. Series with EALL 440/540, EALL 443/543. Offered alternate years.

EALL 542. Second-Language Acquisition. 4 Credits.

Analyzes how important theories and concepts in second-language acquisition apply specifically to the learning of Chinese, Japanese, and Korean.

EALL 543. Chinese, Japanese, and Korean Pedagogy. 4 Credits.

Advanced language pedagogy; includes investigation of issues pertinent to the teaching of East Asian languages.

EALL 560. Teaching East Asian Languages and Literatures at College Level. 2 Credits.

Training in Chinese and Japanese language instruction through lectures, observations, and teaching practicums. Repeatable thrice for maximum of 8 credits.

EALL 601. Research: [Topic]. 1-10 Credits.

Repeatable.

EALL 603. Dissertation. 1-16 Credits.

Repeatable.

EALL 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

EALL 607. Seminar: [Topic]. 1-6 Credits.

Repeatable.

EALL 608. Workshop: [Topic]. 1-4 Credits.

Repeatable three times when topic changes for maximum of 12 credits.

EALL 609. Practicum: [Topic]. 1-4 Credits.

Repeatable for maximum of 18 credits.

EALL 611. Critical Approaches. 2 Credits.

Introduces recent research and methodologies in the fields of Chinese, Japanese and Korean traditional and modern literary, cultural, film, and linguistic studies.

EALL 680. Linguistics Research and Bibliography. 5 Credits.

Provides critical training in quantitative and qualitative methods and bibliography research in linguistics and language pedagogy.

Japanese Courses

JPN 101. First-Year Japanese. 5 Credits.

Provides thorough grounding in listening, speaking, reading, and writing Japanese. Special stress on aural-oral skills. For beginners or by placement.

JPN 102. First-Year Japanese. 5 Credits.

Provides thorough grounding in listening, speaking, reading, and writing Japanese. Special stress on aural-oral skills. For beginners or by placement.

Prereq: JPN 101 or equivalent.

JPN 103. First-Year Japanese. 5 Credits.

Provides thorough grounding in listening, speaking, reading, and writing Japanese. Special stress on aural-oral skills. For beginners or by placement.

Prereq: JPN 102 or equivalent.

JPN 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

JPN 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

JPN 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

JPN 201. Second-Year Japanese. 5 Credits.

Additional training in oral-aural skills designed to build listening comprehension and fluency. Development of basic proficiency in reading and writing Japanese.

Prereq: JPN 103 or equivalent.

JPN 202. Second-Year Japanese. 5 Credits.

Additional training in oral-aural skills designed to build listening comprehension and fluency. Development of basic proficiency in reading and writing Japanese.

Prereq: JPN 201 or equivalent.

JPN 203. Second-Year Japanese. 5 Credits.

Additional training in oral-aural skills designed to build listening comprehension and fluency. Development of basic proficiency in reading and writing Japanese.

Prereq: JPN 202 or equivalent.

JPN 250. Manga Millennium. 4 Credits.

Surveys the 1,000-year history of visual-verbal narratives—comics—in Japan, ranging from medieval picture to modern manga.

JPN 301. Third-Year Japanese. 5 Credits.

Provides a solid foundation in listening, speaking, reading, and writing. Prepares students for advanced study.

Prereq: JPN 203 or equivalent.

JPN 302. Third-Year Japanese. 5 Credits.

Provides a solid foundation in listening, speaking, reading, and writing. Prepares students for advanced study.

Prereq: JPN 301 or equivalent.

JPN 303. Third-Year Japanese. 5 Credits.

Provides a solid foundation in listening, speaking, reading, and writing. Prepares students for advanced study.

Prereq: JPN 302 or equivalent.

JPN 305. Introduction to Japanese Literature. 4 Credits.

Historical survey of Japanese literature from the 8th century to the present. Analysis and appreciation of major works, genres, and authors such as "The Tale of Genji," Haiku, Kawabata, and Mishima. Readings in English.

Prereq: WR 121 or equivalent.

JPN 306. Introduction to Japanese Literature. 4 Credits.

Historical survey of Japanese literature from the 8th century to the present. Analysis and appreciation of major works, genres, and authors such as "The Tale of Genji," Haiku, Kawabata, and Mishima. Readings in English.

Prereq: WR 121 or equivalent.

JPN 307. Introduction to Japanese Literature. 4 Credits.

Historical survey of Japanese literature from the 8th century to the present. Analysis and appreciation of major works, genres, and authors such as "The Tale of Genji," Haiku, Kawabata, and Mishima. Readings in English.

Prereq: WR 121 or equivalent.

JPN 315. Introduction to Japanese Linguistics. 4 Credits.

Survey of general characteristics of the Japanese language in the aspects of sound structure, vocabulary, writing system, meaning, and sentence constructions. Offered alternate years.

Prereq: JPN 103.

JPN 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable for maximum of 12 credits.

JPN 401. Research: [Topic]. 1-4 Credits.

Repeatable for maximum of 12 credits.

JPN 403. Thesis. 1-6 Credits.

Repeatable for maximum of 6 credits.

JPN 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

JPN 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

JPN 407. Seminar: [Topic]. 1-4 Credits.

Studies and projects in Japanese literature or linguistics. Sources are in Japanese, English, or both. Repeatable when topic changes.

JPN 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

JPN 409. Supervised Tutoring. 1-4 Credits.

Repeatable for maximum of 18 credits.

JPN 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

JPN 411. Fourth-Year Spoken Japanese. 4 Credits.

Development of speaking and listening skills related to concrete and abstract topics. Emphasis on sociolinguistic skills.

Prereq: JPN 303 or equivalent.

JPN 412. Fourth-Year Spoken Japanese. 4 Credits.

Development of speaking and listening skills related to concrete and abstract topics. Emphasis on sociolinguistic skills.

Prereq: JPN 411.

JPN 413. Fourth-Year Spoken Japanese. 4 Credits.

Development of speaking and listening skills related to concrete and abstract topics. Emphasis on sociolinguistic skills.

Prereq: JPN 412.

JPN 414. Fourth-Year Reading and Writing Japanese. 4 Credits.

Development of reading skills, vocabulary, and knowledge of kanji. Writing exercises include message writing, letter writing, and short essays.

Prereq: JPN 303 or equivalent.

JPN 415. Fourth-Year Reading and Writing Japanese. 4 Credits.

Development of reading skills, vocabulary, and knowledge of kanji. Writing exercises include message writing, letter writing, and short essays.

Prereq: JPN 414.

JPN 416. Fourth-Year Reading and Writing Japanese. 4 Credits.

Development of reading skills, vocabulary, and knowledge of kanji. Writing exercises include message writing, letter writing, and short essays.

Prereq: JPN 415.

JPN 425. Modern Japanese Literature: [Topic]. 4 Credits.

Investigates topics relevant to Japanese literary studies in a comparative context. Recent topics include youth culture, postwar literature, digital-age stories. Repeatable twice when topic changes for maximum of 12 credits.

JPN 434. Advanced Readings in Japanese Literature. 4 Credits.

Reading modern Japanese literature in Japanese. Students acquire proficiency in reading, writing, and translation as well as knowledge of literature.

Prereq: JPN 416.

JPN 435. Advanced Readings in Japanese Literature. 4 Credits.
Reading modern Japanese literature in Japanese. Students acquire proficiency in reading, writing, and translation as well as knowledge of literature.
Prereq: JPN 434.

JPN 436. Advanced Readings in Japanese Literature. 4 Credits.
Reading modern Japanese literature in Japanese. Students acquire proficiency in reading, writing, and translation as well as knowledge of literature.
Prereq: JPN 435.

JPN 437. Classical Japanese Literary Language. 4 Credits.
Introduction to the basic principles and forms of classical Japanese literary language--style, syntax, and textuality. Selected readings of texts in classical Japanese from Nara through Edo periods.
Prereq: JPN 303.

JPN 455. Japanese Business Culture and Language. 4 Credits.
Provides extensive training in communication skills in all formats (oral and visual) in a business setting. The goal is a successful interview of local Japanese business people conducted in Japanese.
Prereq: JPN 303 or equivalent.

JPN 471. The Japanese Cinema. 4 Credits.
Major filmmakers and works are introduced. Comparative analysis of Japanese cinema as narrative form and artists' efforts to grapple with the Japanese experience of modernity. Readings, films, and discussions in English.

JPN 480. Early Modern Comics. 4 Credits.
Focuses on comic books in 18th and 19th century Japan and their place in the "floating world" of popular culture.

JPN 490. Translation and Japanese Literature. 4 Credits.
Explores the theory and practice of translation as it relates to Japanese literature. Students produce their own translations and critique existing translations.
Prereq: JPN 412 or 416 or JPN 303.

JPN 503. Thesis. 1-6 Credits.
Repeatable.

JPN 507. Seminar: [Topic]. 1-4 Credits.
Studies and projects in Japanese literature or linguistics. Sources are in Japanese, English, or both. Repeatable when topic changes.

JPN 508. Workshop: [Topic]. 1-21 Credits.
Repeatable.

JPN 510. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

JPN 511. Fourth-Year Spoken Japanese. 4 Credits.
Development of speaking and listening skills related to concrete and abstract topics. Emphasis on sociolinguistic skills.
Prereq: JPN 303 or equivalent.

JPN 512. Fourth-Year Spoken Japanese. 4 Credits.
Development of speaking and listening skills related to concrete and abstract topics. Emphasis on sociolinguistic skills.
Prereq: JPN 411/511.

JPN 513. Fourth-Year Spoken Japanese. 4 Credits.
Development of speaking and listening skills related to concrete and abstract topics. Emphasis on sociolinguistic skills.
Prereq: JPN 412/512.

JPN 514. Fourth-Year Reading and Writing Japanese. 4 Credits.
Development of reading skills, vocabulary, and knowledge of kanji. Writing exercises include message writing, letter writing, and short essays.
Prereq: JPN 303 or equivalent.

JPN 515. Fourth-Year Reading and Writing Japanese. 4 Credits.
Development of reading skills, vocabulary, and knowledge of kanji. Writing exercises include message writing, letter writing, and short essays.
Prereq: JPN 414/514.

JPN 516. Fourth-Year Reading and Writing Japanese. 4 Credits.
Development of reading skills, vocabulary, and knowledge of kanji. Writing exercises include message writing, letter writing, and short essays.
Prereq: JPN 415/515.

JPN 525. Modern Japanese Literature: [Topic]. 4 Credits.
Investigates topics relevant to Japanese literary studies in a comparative context. Recent topics include suicide and literature East and West, nations and resistance, atomic bomb literature. Repeatable twice when topic changes for maximum of 12 credits.

JPN 534. Advanced Readings in Japanese Literature. 4 Credits.
Reading modern Japanese literature in Japanese. Students acquire proficiency in reading, writing, and translation as well as knowledge of literature.
Prereq: JPN 416/516.

JPN 535. Advanced Readings in Japanese Literature. 4 Credits.
Reading modern Japanese literature in Japanese. Students acquire proficiency in reading, writing, and translation as well as knowledge of literature.
Prereq: JPN 434/534.

JPN 536. Advanced Readings in Japanese Literature. 4 Credits.
Reading modern Japanese literature in Japanese. Students acquire proficiency in reading, writing, and translation as well as knowledge of literature.
Prereq: JPN 435/535.

JPN 537. Classical Japanese Literary Language. 4 Credits.
Introduction to the basic principles and forms of classical Japanese literary language--style, syntax, and textuality. Selected readings of texts in classical Japanese from Nara through Edo periods.
Prereq: JPN 303 or equivalent.

JPN 571. The Japanese Cinema. 4 Credits.
Major filmmakers and works are introduced. Comparative analysis of Japanese cinema as narrative form and artists' efforts to grapple with the Japanese experience of modernity. Readings, films, and discussions in English.

JPN 580. Early Modern Comics. 4 Credits.
Focuses on comic books in 18th and 19th century Japan and their place in the "floating world" of popular culture.

JPN 590. Translation and Japanese Literature. 4 Credits.
Explores the theory and practice of translation as it relates to Japanese literature. Students produce their own translations and critique existing translations.
JPN 512 or 516

JPN 601. Research: [Topic]. 1-10 Credits.
Repeatable.

JPN 602. Supervised College Teaching. 1-16 Credits.
Repeatable.

JPN 603. Dissertation. 1-16 Credits.

Repeatable.

JPN 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable as approved by the faculty.

JPN 607. Seminar: [Topic]. 1-6 Credits.

Studies and projects in Japanese literature, linguistics, or pedagogy. Sources in Japanese, English, or both. Repeatable when topic changes.

JPN 609. Practicum: [Topic]. 1-4 Credits.

Repeatable for maximum of 18 credits.

JPN 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

Korean Courses

KRN 101. First-Year Korean. 5 Credits.

Introduction to basic Korean grammar, syllabary, conversation, and characters. Offered annually with KRN 201, 202, 203.

KRN 102. First-Year Korean. 5 Credits.

Introduction to basic Korean grammar, syllabary, conversation, and characters.

Prereq: KRN 101.

KRN 103. First-Year Korean. 5 Credits.

Introduction to basic Korean grammar, syllabary, conversation, and characters.

Prereq: KRN 102.

KRN 151M. Introduction to Korean Cinema. 4 Credits.

Surveys Korean national cinema, from the earliest days of the medium to the present. Multilisted with CINE 151M.

KRN 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

KRN 201. Second-Year Korean. 5 Credits.

Continued development of skills in speaking, reading, and writing Korean. Introduction of additional characters. Offered annually with KRN 101, 102, 103.

Prereq: KRN 103 or equivalent.

KRN 202. Second-Year Korean. 5 Credits.

Continued development of skills in speaking, reading, and writing Korean. Introduction of additional characters.

Prereq: KRN 201.

KRN 203. Second-Year Korean. 5 Credits.

Continued development of skills in speaking, reading, and writing Korean. Introduction of additional characters.

Prereq: KRN 202.

KRN 301. Third Year Korean. 5 Credits.

Develops advanced language skills in Korean with focus on literary and cultural texts, writing, and oral skills. Sequence with KRN 302, 303.

Prereq: KRN 203

KRN 302. Third-Year Korean. 5 Credits.

Develops advanced language skills in Korean with focus on literary and cultural texts, writing, and oral skills. Sequence with KRN 301, 303.

Prereq: KRN 301.

KRN 303. Third-Year Korean. 5 Credits.

Develops advanced language skills in Korean with focus on literary and cultural texts, writing, and oral skills. Sequence with KRN 301, 302.

Prereq: KRN 302.

KRN 309. Languages and Cultural Formation in Korea. 4 Credits.

Examines the roles that languages and literacies played in the formation of Korean culture from a socio-historical linguistic perspective.

KRN 315. Introduction to Korean Linguistics. 4 Credits.

Surveys general characteristics of the Korean language and places them in their cultural and historical context.

Prereq: KRN 103.

KRN 361. Korean Popular Culture and Transnationalism. 4 Credits.

Explores contemporary South Korean popular culture in a global frame and key issues in cultural transnationalization.

KRN 362M. Contemporary Korean Film. 4 Credits.

Introduction to contemporary South Korean film. Explores changes in film culture, practice, and industry in relation to social changes since the early 1990s. Offered alternate years. Multilisted with CINE 362M.

KRN 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

KRN 403. Thesis. 1-6 Credits.

Repeatable for a maximum of 6 credits.

KRN 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

KRN 411. Fourth-Year Korean. 4 Credits.

Development of advanced language skills and cultural sensitivity. Sequence with KRN 412, 413.

Prereq: KRN 303.

KRN 412. Fourth-Year Korean. 4 Credits.

Development of advanced language skills and cultural sensitivity. Sequence with KRN 411, 413.

Prereq: KRN 411.

KRN 413. Fourth-Year Korean. 4 Credits.

Development of advanced language skills and cultural sensitivity. Sequence with KRN 411, 412.

Prereq: KRN 412.

KRN 503. Thesis. 1-6 Credits.

Repeatable.

KRN 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

KRN 511. Fourth-Year Korean. 4 Credits.

Development of advanced language skills and cultural sensitivity. Sequence with KRN 512, 513.

KRN 512. Fourth-Year Korean. 4 Credits.

Development of advanced language skills and cultural sensitivity. Sequence with KRN 511, 513.

Prereq: KRN 511.

KRN 513. Fourth-Year Korean. 4 Credits.

Development of advanced language skills and cultural sensitivity. Sequence with KRN 511, 512.

Prereq: KRN 512.

KRN 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

KRN 609. Practicum: [Topic]. 1-4 Credits.

Repeatable for maximum of 18 credits.

Economics

Jeremy Piger, Department Head

541-346-8845

435 Prince Lucien Campbell Hall

Economics addresses the problem of using scarce resources to satisfy society's unlimited wants. The discipline is divided into two general areas—microeconomics and macroeconomics. Microeconomics explores questions about the way society allocates resources; it applies to public policy in such areas as urban, industrial organization, and labor economics. Macroeconomics considers such questions as the causes of inflation and unemployment; it applies to such areas as monetary policy, development and international economics.

Faculty

Bruce A. Blonigen, Philip H. Knight Professor (international trade, industrial organization, applied econometrics); dean for faculty and operations, College of Arts and Sciences. BA, 1988, Gustavus Adolphus; MA, 1992, PhD, 1995, California, Davis. (1995)

Alfredo Burlando, associate professor (development, labor economics, industrial organization). BA, 2003, MA, 2003, California, Davis; PhD, 2010, Boston. (2010)

Trudy Ann Cameron, professor (applied microeconomics, applied econometrics); Raymond F. Mikesell Chair in Environmental and Resource Economics. BA, 1977, British Columbia; PhD, 1982, Princeton. (2001)

Shankha Chakraborty, professor (growth and development, macroeconomics). BS, 1992, Presidency; MA, 1994, Delhi School of Economics; PhD, 1999, California, Los Angeles. (1999)

Mark Colas, assistant professor (public economics and urban economics). BA, 2009, California, Davis; MS, 2013, PhD, 2017, Wisconsin, Madison. (2017)

Anca D. Cristea, associate professor (international economics, industrial organization, applied econometrics). BA, 2003, Babes-Bolyai; MA, 2005, Clemson; PhD, 2010, Purdue, West Lafayette. (2010)

Jonathan M. V. Davis, assistant professor (applied microeconomics, labor economics). BA, 2009, PhD, 2016, Chicago. (2018)

Timothy A. Duy, assistant professor with title of professor of practice (macroeconomics, monetary policy, international finance); director, Oregon Economic Forum. BA, 1991, Puget Sound; MS, PhD, 1998, Oregon. (2002)

Christopher J. Ellis, professor (applied economic theory, public economics, political economy). BA, 1978, Essex; MA, 1979, PhD, 1983, Warwick. (1983)

David Evans, assistant professor (macroeconomics, computational economics, public finance). BS, 2008, Stanford; PhD, 2015, New York. (2015)

George W. Evans, professor (econometrics, macroeconomics); John Hamacher Chair in Economics. BA, 1972, Oxford; BA, 1974, MA, 1976, PhD, 1980, California, Berkeley. (1994)

Benjamin Hansen, W. E. Miner Professor in Economics (labor economics, public economics, econometrics); associate professor. BA, 2004, Brigham Young; MA, 2005, PhD, 2009, California, Santa Barbara. (2010)

William T. Harbaugh, professor (public economics, behavioral economics, neuroeconomics). BS, 1983, MS, 1986, Montana State; PhD, 1995, Wisconsin, Madison. (1995)

Van Kolpin, professor (microeconomic theory, game theory, social choice theory). BA, 1982, Coe; MS, 1983, MA, 1984, PhD, 1986, Iowa. (1986)

Michael Kuhn, assistant professor (behavioral economics, labor, public finance). BA, 2009, California, Los Angeles; PhD, 2014, California, San Diego. (2014)

Grant R. McDermott, assistant professor (environmental and natural resource economics, applied econometrics, uncertainty and Bayesian learning), BS, 2004, Cape Town; MS, 2011, PhD, 2015, Norwegian School of Economics. (2017)

Bruce McGough, professor (macroeconomics). BA, 1991, Reed; MS, 1993, PhD, 2000, Oregon. (2012)

Keaton Miller, assistant professor (industrial organization, health economics, applied econometrics). BS, 2008, Wisconsin, Madison; PhD, 2015, Minnesota, Twin Cities. (2015)

Jeremy M. Piger, professor (macroeconomics, econometrics). BA, 1996, Seattle Pacific; MA, 1998, PhD, 2000, Washington (Seattle). (2006)

Edward A. Rubin, assistant professor (environmental and energy, development economics, econometrics and data science). BS, 2007, MS, 2013, Nebraska, Lincoln; MS, 2015, PhD, 2018, California, Berkeley. (2018)

Mark A. Thoma, professor (econometrics, macroeconomics). BA, 1980, California State, Chico; PhD, 1985, Washington State. (1987)

Michael B. Urbancic, senior instructor (behavioral economics, experimental economics, economic history). BA, BA, BS, 2002, Arizona; MA, 2007, PhD, 2012, California, Berkeley. (2012)

Anne van den Nouweland, professor (game theory, microeconomic theory). BA, 1984, MA, 1989, Nijmegen; PhD, 1993, Tilburg. (1996)

Glen R. Waddell, professor (applied econometrics, industrial organization, labor economics). BS, 1995, Trent; MS, 1996, Miami; PhD, 2000, Purdue. (2001)

Wesley W. Wilson, professor (applied econometrics, industrial organization, transportation economics). BS, BA, 1980, North Dakota; MA, 1984, PhD, 1986, Washington State. (1989)

Woan Foong Wong, assistant professor (international economics, international trade). BA, 2009, Oberlin; MS, 2013, PhD, 2017, Wisconsin, Madison. (2017)

Jiabin Wu, assistant professor (experimental economics, behavior economics, political economy). BA, 2008, Hong Kong; MS, 2010, PhD, 2014, Wisconsin, Madison. (2014)

Eric Y. Zou, assistant professor (environmental economics, health economics). BS, 2012, East China Normal; MS, 2013, PhD, 2018, Illinois, Urbana-Champaign. (2018)

Emeriti

Henry N. Goldstein, professor emeritus. BA, 1950, North Carolina, Chapel Hill; MS, 1953, PhD, 1967, Johns Hopkins. (1967)

Jo Anna Gray, professor emerita. BA, 1971, Rockford; AM, 1973, PhD, 1976, Chicago. (1989)

Stephen E. Haynes, professor emeritus. BA, 1968, PhD, 1976, California, Santa Barbara. (1978)

Peter J. Lambert, professor emeritus. PhD, 1971, Oxford. (2002)

Joe A. Stone, professor emeritus. BA, 1970, Texas, El Paso; MA, 1974, PhD, 1977, Michigan State. (1979)

W. Ed Whitelaw, professor emeritus. BA, 1963, Montana; PhD, 1968, Massachusetts Institute of Technology. (1967)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts**
- **Bachelor of Science**
- **Minor**

Undergraduate Studies

The Department of Economics offers an undergraduate major leading to a bachelor's degree. Undergraduate courses in economics provide broad knowledge of the field as a part of the program of liberal education offered by the College of Arts and Sciences. They also lay a solid foundation in economics to students interested in professional graduate training in economics or in careers in business, law, government, or journalism.

For more detailed information, students are encouraged to visit the department website.

Preparation

Suggested preparation for freshman students is four years of high school mathematics. Prospective majors are strongly urged to satisfy part of their science group requirement with an introductory calculus sequence and the combination of mathematics and computer and information science required for the bachelor of science degree, to be taken in the freshman or sophomore year. Suggested preparation for second-year college transfer students is

1. the equivalents of EC 201 Introduction to Economic Analysis: Microeconomics and EC 202 Introduction to Economic Analysis: Macroeconomics and
2. the equivalents of MATH 251 Calculus I, MATH 252 Calculus II—or MATH 241 Calculus for Business and Social Science I, MATH 242 Calculus for Business and Social Science II for students not intending to pursue graduate training in economics—as well as MATH 243 Introduction to Methods of Probability and Statistics.

Career and Advising Services

The Career and Advising Services office in the Department of Economics provides academic planning and career development support for economics majors and minors. This includes advice about courses, minors, and concentrations, as well as assistance with résumés, job and internship search, and interviewing preparation. Career opportunities in economics include technical roles (actuarial, data analyst, financial analyst, researcher, consulting) as well as less technical roles (management, sales, human resources). Common employers include

banks, financial institutions, government agencies, corporations, small businesses, and nonprofit organizations.

Online Economics Courses

Code	Title	Credits
EC 201	Introduction to Economic Analysis: Microeconomics	4
EC 202	Introduction to Economic Analysis: Macroeconomics	4
EC 313	Intermediate Macroeconomic Theory	4
EC 320	Introduction to Econometrics	4
EC 380	International Economic Issues	4
EC 421	Introduction to Econometrics	4

These courses are self-paced; the examinations are administered in the Social Sciences Instructional Laboratory for on-campus students and online for off-campus students. The courses, which must be completed within a standard ten-week term, are open to enrolled and community-education students and to high school students who want accredited university course work.

Careers

Career opportunities in economics are found in federal, state, and local government agencies; private industry; various nonprofit organizations; and journalism. A bachelor's degree in economics provides an excellent background for graduate admission in law, business, and public policy. Students with superior undergraduate academic records frequently go on to graduate work in economics, which leads to careers in higher education, economic research organizations in government, and private industry.

For more information, visit Bill Sherman (<http://economics.uoregon.edu/profile/wsherman>), director of career and advising services, in 475 Prince Lucien Campbell Hall.

Bachelor of Arts Degree Requirements

Code	Title	Credits
EC 201 & EC 202	Introduction to Economic Analysis: Microeconomics and Introduction to Economic Analysis: Macroeconomics ¹	8
MATH 241–242	Calculus for Business and Social Science I-II ¹	8
or MATH 251–252	Calculus I-II	
or MATH 261–262	Calculus with Theory I-II	
MATH 243	Introduction to Methods of Probability and Statistics ¹	4
EC 311 & EC 313	Intermediate Microeconomic Theory and Intermediate Macroeconomic Theory ^{2,3,4}	8
EC 320 & EC 421	Introduction to Econometrics and Introduction to Econometrics ^{2,3}	8
or EC 423–424	Econometrics	
Economics courses numbered 300 or above ^{3,5}		28

- ¹ Should be completed by the end of the sophomore year.
- ² Should be completed by the end of the junior year.
- ³ At least 28 of the 44 required upper-division credits required for the major (i.e., EC 311 Intermediate Microeconomic Theory, EC 313 Intermediate Macroeconomic Theory, EC 320 Introduction to Econometrics, EC 421 Introduction to Econometrics, and the 28 required field course credits) must be taken at the University of Oregon
- ⁴ Students cannot receive credit for both EC 311 and FIN 311.
- ⁵ At least 20 credits in courses numbered 400 or above. No more than 8 of the 28 credits may be in courses numbered 401, 404, 405, 407, or 408; no more than 2 credits in course numbered 407 may count toward the 8 of the 28 credits.

Grades of C– or better in courses taken to satisfy major requirements.

Bachelor of Science Degree Requirements

Code	Title	Credits
EC 201 & EC 202	Introduction to Economic Analysis: Microeconomics and Introduction to Economic Analysis: Macroeconomics ¹	8
MATH 241–242 or MATH 251– 252 or MATH 261– 262	Calculus for Business and Social Science I-II ¹	8
MATH 243	Introduction to Methods of Probability and Statistics ¹	4
EC 311 & EC 313	Intermediate Microeconomic Theory and Intermediate Macroeconomic Theory ^{2,3,4}	8
EC 320 & EC 421 or EC 423– 424	Introduction to Econometrics and Introduction to Econometrics ^{2,3} Econometrics	8
Economics courses numbered 300 or above ^{3,5}		28

- ¹ Should be completed by the end of the sophomore year.
- ² Should be completed by the end of the junior year.
- ³ At least 28 of the 44 required upper-division credits required for the major (i.e., EC 311 Intermediate Microeconomic Theory, EC 313 Intermediate Macroeconomic Theory, EC 320 Introduction to Econometrics, EC 421 Introduction to Econometrics, and the 28 required field course credits) must be taken at the University of Oregon
- ⁴ Students cannot receive credit for both EC 311 and FIN 311.
- ⁵ At least 20 credits in courses numbered 400 or above. No more than 8 of the 28 credits may be in courses numbered 401, 404, 405, 407, or 408; no more than 2 credits in course numbered 407 may count toward the 8 of the 28 credits.

Grades of C– or better in courses taken to satisfy major requirements.

Courses Offered Pass/No Pass Only

Code	Title	Credits
EC 401	Research: [Topic]	1-21
EC 404	Internship	1-4
EC 405	Reading and Conference: [Topic]	1-21
EC 408	Workshop: [Topic]	1-21

EC 320 Introduction to Econometrics (or EC 423 Econometrics) is a prerequisite for almost all 400-level courses. EC 311 Intermediate Microeconomic Theory and sometimes EC 313 Intermediate Macroeconomic Theory are as well. Because MATH 242 Calculus for Business and Social Science II and MATH 243 Introduction to Methods of Probability and Statistics are prerequisites for EC 320 Introduction to Econometrics, it is important for students to take those courses early. See the course listings for details on prerequisites.

Advanced Options

Students interested in pursuing graduate work in economics, or who otherwise wish to pursue a more advanced track, may make any or all of the substitutions displayed to the standard requirements for the major.

Code	Title	Credits
EC 201 & EC 202	Introduction to Economic Analysis: Microeconomics and Introduction to Economic Analysis: Macroeconomics ¹	8
MATH 251–252 or MATH 261– 262	Calculus I-II ²	8
EC 423–424	Econometrics ^{1,3}	8
EC 411 & EC 413	Advanced Microeconomic Theory and Advanced Macroeconomic Theory ^{4,5}	8
Economics courses numbered 300 or above ^{3,4}		28
Any upper-division mathematics course in statistics in place of MATH 243		4

- ¹ Should be completed by the end of the sophomore year.
- ² In place of Calculus for Business and Social Science I-II (MATH 241–242).
- ³ In place of Introduction to Methods of Probability and Statistics (MATH 243), Introduction to Econometrics (EC 320), and Introduction to Econometrics (EC 421). Econometrics (EC 425) is recommended but not required. These can also count as 400-level field courses if one has already taken Introduction to Econometrics (EC 320) and Introduction to Econometrics (EC 421).
- ⁴ Take either course or both courses in place of Intermediate Microeconomic Theory (EC 311) and Intermediate Macroeconomic Theory (EC 313). If Intermediate Microeconomic Theory (EC 311) and/or Intermediate Macroeconomic Theory (EC 313) have already been taken, these 400-level courses may be used as field courses. Should be completed by the end of the junior year.
- ⁵ At least 28 of the 44 required upper-division credits required for the major must be taken at the University of Oregon.

Departmental Honors

Qualified students may apply to graduate with honors in economics. Two requirements must be met:

1. Completion of upper-division economics courses with at least a 3.50 grade point average
2. Completion of a research paper, written under the guidance of a faculty member, for 4 credits in EC 401 Research: [Topic]. A copy of the completed paper, approved by the faculty advisor, must be presented to the department by Friday of the week before final examinations during the term the student plans to graduate

Students interested in honors also should consider taking EC 418 Economic Analysis of Community Issues I and EC 419 Economic Analysis of Community Issues II. Instructor approval is required for EC 418–419. Students who intend to satisfy these requirements should notify the director of undergraduate studies early in the term in which they intend to graduate.

Professional Concentrations

Given the breadth of a degree in economics, students have the opportunity to choose one or more professional concentrations that are consistent with their career goals. Suggested course work for seven professional concentrations is described below. Sample programs for each concentration, descriptions of career possibilities, and recommendations for additional preparation are available in the Academic Support Office or with any economics advisor.

Please note, these concentrations represent suggested guides to a potential path through the economics major. Students need not “declare” a concentration, and a chosen concentration will not appear on any transcripts or graduation material. They are intended to be useful in helping select courses that will most likely match student interests.

Business Economics—Banking and Finance

1. Complete major requirements including

Code	Title	Credits
EC 370	Money and Banking	4
or EC 470	Monetary Policy	
or EC 471	Monetary Theory	
EC 360	Issues in Industrial Organization	4
or EC 460	Theories of Industrial Organization	
or EC 484	Multinational Corporations	
EC 380	International Economic Issues	4
or EC 480	International Finance	
or EC 481	International Trade	
or EC 482	Economics of Globalization	

2. Complete a minor or approved equivalent in business administration

Business Economics—Management, Marketing, and Accounting

1. Complete major requirements including

Code	Title	Credits
EC 350	Labor Market Issues	4
or EC 450	Labor Economics	
EC 430	Urban and Regional Economics	4
or EC 432	Economy of the Pacific Northwest	
or EC 440	Public Economics	
EC 360	Issues in Industrial Organization	4

- or EC 460 Theories of Industrial Organization
- or EC 484 Multinational Corporations

2. Complete a minor or approved equivalent in business administration

Economics and Public Policy and Administration

1. Complete major requirements including

Code	Title	Credits
EC 340	Issues in Public Economics	4
or EC 440	Public Economics	
EC 430	Urban and Regional Economics	4
or EC 432	Economy of the Pacific Northwest	
or EC 462	Economics of Transportation	
EC 360	Issues in Industrial Organization	4
or EC 441	Public Economics: Taxation	
or EC 460	Theories of Industrial Organization	
or EC 484	Multinational Corporations	
EC 350	Labor Market Issues	4
or EC 450	Labor Economics	
2. Complete a minor or equivalent in political science or planning, public policy and management

Environmental Economics

1. Complete major requirements including

Code	Title	Credits
EC 333	Resource and Environmental Economic Issues	4
EC 340	Issues in Public Economics	4
or EC 440	Public Economics	
EC 434	Environmental Economics	4
or EC 435	Natural Resource Economics	
2. Complete the environmental studies minor or an approved equivalent

Graduate Preparation in Economics and Mathematical Economics

1. Complete major requirements including

Code	Title	Credits
EC 411	Advanced Microeconomic Theory	4
or EC 413	Advanced Macroeconomic Theory	
MATH 251–252	Calculus I-II	8
or MATH 261–262	Calculus with Theory I-II	
EC 423 & EC 424	Econometrics and Econometrics	8
EC 427	Games and Decisions	4
or EC 428	Behavioral and Experimental Economics	
2. Complete a minor in mathematics

International and Development Economics

1. Complete major requirements including

Code	Title	Credits
EC 480 & EC 481	International Finance and International Trade	8

EC 390	Problems and Issues in the Developing Economies	4
or EC 490	Economic Growth and Development	
or EC 491	Issues in Economic Growth and Development	
EC 360	Issues in Industrial Organization	4
or EC 460	Theories of Industrial Organization	
or EC 484	Multinational Corporations	
EC 370	Money and Banking	4
or EC 470	Monetary Policy	
or EC 471	Monetary Theory	
or EC 482	Economics of Globalization	

2. Complete a minor or the equivalent in business administration, political science, history, international studies, or an area studies program

Law and Economics and Political Economy

1. Complete major requirements including

Code	Title	Credits
EC 340	Issues in Public Economics	4
or EC 440	Public Economics	
EC 350	Labor Market Issues	4
or EC 450	Labor Economics	
EC 360	Issues in Industrial Organization	4
or EC 460	Theories of Industrial Organization	
or EC 484	Multinational Corporations	
EC 441	Public Economics: Taxation	4
or EC 448	Political Economy	
EC 427	Games and Decisions	4

2. Complete a minor or equivalent in political science

Economics Minor

Code	Title	Credits
EC 201	Introduction to Economic Analysis: Microeconomics	4
EC 202	Introduction to Economic Analysis: Macroeconomics	4
EC 311	Intermediate Microeconomic Theory	4
EC 313	Intermediate Macroeconomic Theory	4
Two additional upper-division 4-credit courses in economics		8
Total Credits		24

Two of the four upper-division 4-credit courses must be taken from the UO economics department. Minor requirements cannot be satisfied with EC 401 Research: [Topic], EC 404 Internship, EC 405 Reading and Conference: [Topic], EC 407 Seminar: [Topic], or EC 408 Workshop: [Topic]. Courses applied to the economics minor must be completed with grades of C- or better.

Kindergarten through Secondary Teaching Careers

Students who complete a degree in economics are eligible to apply to the College of Education's fifth-year licensure program in middle-secondary teaching or the fifth-year licensure program in elementary teaching.

More information is available in the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Economics

Course	Title	Credits	Milestones
First Year			
Fall			
MATH 111	College Algebra	4	Initial math placement determined by testing
WR 121	College Composition I	4

- **Master of Arts**
- **Master of Science**
- **Doctor of Philosophy**

Graduate Studies

The Department of Economics offers graduate work leading to the degrees of master of arts (MA), master of science (MS), and doctor of philosophy (PhD). Graduate fields include macroeconomics; applied econometrics; game theory; economic growth and development; industrial organization; and international, labor, public, environmental, and behavioral-experimental economics. A detailed description of degree requirements may be obtained from the department website.

General information about graduate work at the University of Oregon is available in the **Graduate School** section of this catalog.

Applicants for admission must submit the following to the department:

1. Scores on the general test of the Graduate Record Examinations (GRE), sent by the testing center
2. Three letters of recommendation
3. Complete transcripts of previous work sent by the issuing institutions
4. A brief statement of purpose or personal statement
5. Curriculum vitae or résumé

At minimum, applicants should have substantial knowledge of intermediate economic theory and of mathematics equivalent to:

Code	Title	Credits
EC 311	Intermediate Microeconomic Theory	4
EC 313	Intermediate Macroeconomic Theory	4
MATH 251	Calculus I	4
MATH 252	Calculus II	4
MATH 253	Calculus III	4
MATH 281	Several-Variable Calculus I	4
MATH 341	Elementary Linear Algebra	4
MATH 243	Introduction to Methods of Probability and Statistics	4
or MATH 425	Statistical Methods I	

Strong grades in economics and mathematics courses, in addition to scholarly potential, will be valued by the admissions committee.

Applicants whose native language is not English must also submit their scores on the Test of English as a Foreign Language Internet-Based Test or the International English Language Testing System examination. Applicants to the master's program may waive this requirement if they received a bachelor's degree from an accredited institution in the United States, Australia, Canada (excluding Quebec), Ireland, New Zealand, or the United Kingdom.

Master's Degree

The Department of Economics offers an intensive one-academic-year master's degree. Students gain applied skills in microeconomics, macroeconomics, and econometrics while specializing through elective courses. The program prepares students for consulting, applied research, and data science careers in private industry and government. The program also offers outstanding preparation for students interested in pursuing a PhD in economics.

The master's degree program consists of the following departmental requirements in addition to university and Graduate School requirements for the master of arts (MA) or the master of science (MS) degree. Each master's degree candidate chooses either the course work or the research option.

Credit Requirements

The course work option requires a minimum of 48 graduate credits. The research option requires a minimum of 45 graduate credits if the candidate writes a research paper or a minimum of 51 graduate credits if the candidate writes a thesis.

Master of Arts Degree Requirements

Code	Title	Credits
Core Courses		
EC 523–525	Econometrics ¹	12
EC 511	Advanced Microeconomic Theory ¹	4
EC 513	Advanced Macroeconomic Theory ¹	4

Elective Economics Courses ²

Option 1: Course work

Seven elective courses taken at the 500 level.

Option 2: Research

Five elective courses taken at the 500 level. ³

- ¹ To be completed by the end of the first full academic year.
- ² Excluding EC 503 Thesis. PhD students who transfer to the master's program and who have completed the micro- and macroeconomics core courses (EC 607 Seminar: [Topic]) may apply those courses to master's degree requirements.
- ³ No more than 5 credits in EC 601 Research: [Topic] may be applied to the 45-credit minimum for the research paper and no more than 9 credits in EC 503 Thesis may be applied to the 51-credit minimum for the thesis.

Master of Science Degree Requirements

Code	Title	Credits
Core Courses		
EC 523–525	Econometrics ¹	12
EC 511	Advanced Microeconomic Theory ¹	4
EC 513	Advanced Macroeconomic Theory ¹	4

Elective Economics Courses ²

Option 1: Course work

Seven elective courses taken at the 500 level.

Option 2: Research

Five elective courses taken at the 500 level. ³

- ¹ To be completed by the end of the first full academic year.
- ² Excluding EC 503 Thesis. PhD students who transfer to the master's program and who have completed the micro- and macroeconomics core courses (EC 607 Seminar: [Topic]) may apply those courses to master's degree requirements.
- ³ No more than 5 credits in EC 601 Research: [Topic] may be applied to the 45-credit minimum for the research paper and no more than 9 credits in EC 503 Thesis may be applied to the 51-credit minimum for the thesis.

The thesis or research paper, on a topic from the area of economics in which a 500-level field course was taken, must be approved by two department faculty members. The candidate's committee must have approved a prospectus for the thesis or research paper before the term in which the thesis or research paper is approved.

Courses taken to satisfy master's degree requirements (except EC 503 Thesis, EC 601 Research: [Topic], and EC 605 Reading and Conference: [Topic]) must be taken for letter grades and completed with at least a 3.00 cumulative grade point average. A GPA below the level of 3.00 at any time during a graduate student's studies or the accumulation of

more than 5 credits of N or F grades, regardless of GPA, is considered unsatisfactory and may lead to termination from the program.

Unless on-leave status has been approved, a student must attend the university continuously until all program requirements have been completed. The student must register for 3 graduate credits each term, excluding summer sessions, to be continuously enrolled. A minimum of 30 credits toward the master's degree must be taken in residence over a period of at least two terms.

Substitutions and Waivers

Substitutions of alternative courses or courses taken elsewhere require the joint approval of the master's program committee and the department head before they can be counted toward the credit minimum. Any other waivers or exceptions to departmental requirements require the approval of the department faculty.

Time Limits

Students who choose the course work option must complete all the master's degree requirements within three years. Students who choose the research option must complete all the master's degree requirements within five years.

The master's degree typically requires five to six terms of full-time work. A few well-qualified students have satisfied requirements for the degree in four terms.

Doctor of Philosophy Degree Requirements

A PhD in economics prepares students to teach at liberal arts and research universities; to work in state, federal, and international organizations; and to conduct research or work as a consultant for private industry. Graduate students seeking the PhD degree in economics at the University of Oregon must complete the following departmental requirements as well as all university requirements. Except for EC 601 Research: [Topic], EC 603 Dissertation, EC 605 Reading and Conference: [Topic], and EC 609 Practicum: [Topic], economics courses must be taken for letter grades.

Code	Title	Credits
	Microeconomic theory (three terms) ¹	
	Macroeconomics theory (three terms) ¹	
	Econometrics (three terms) ¹	
EC 607	Seminar: [Topic] (two-term sequences) ²	1-5
EC 601	Research: [Topic] ³	6
EC 607	Seminar: [Topic] (five courses) ⁴	1-5
EC 603	Dissertation ⁴	18

- 1 Students who complete these courses with a GPA of 2.90 or higher will be invited to take the qualifying examination in microeconomic and macroeconomic theory when it is offered in early summer. Records of students whose GPA is lower than 2.90 are evaluated to determine eligibility for the qualifying examination. Students who fail the qualifying examination may be asked to retake it early the following September. Students who pass the qualifying examination but have a GPA less than 3.00 in econometrics must take a competency examination in econometrics, which is administered the Thursday before the first week of fall classes. Students who fail the competency examination must retake each econometrics course in which they received a grade of less than B and pass it with a grade of B or better. Students must file an approved program of study by December 15 following the qualifying examination.
- 2 Sequences in two fields of economics must be completed with a 3.00 GPA or better. Credit for Research: [Topic] (EC 601), Dissertation (EC 603), Reading and Conference: [Topic] (EC 605), or Practicum: [Topic] (EC 609) cannot be counted toward the field requirement.
- 3 By winter term of the third year, a research paper for at least 6 credits must be completed in one of the fields and approved by two members of the faculty with specialties in that field
- 4 Must be taken outside the two fields of economics previously chosen and completed with a 3.00 GPA or better. Credit for Research: [Topic] (EC 601), Dissertation (EC 603), Reading and Conference: [Topic] (EC 605), or Practicum: [Topic] (EC 609) cannot be counted toward the field requirement. Advancement to candidacy may be requested after the student has completed the above requirements and orally defended a prospectus for the dissertation, which must include a minimum of 6 credits in Research: [Topic] (EC 601). Students must be enrolled for at least 3 credits during the term of advancement.
- 5 The dissertation must be a significant contribution to the field and must be completed in conjunction with at least 18 credits of Dissertation (EC 603). A formal, public defense must take place on the UO campus at a date set by the committee chair and approved by the Graduate School.

Time Limits

The seven-year time limit for completion of PhD degree requirements begins with the first term of admission—either conditional or unconditional—as a doctoral student at the university. The required year of residency on the Eugene campus, passing of comprehensive examinations for advancement to candidacy, and completion of the doctoral dissertation must all be accomplished within this seven-year limit.

Courses other than those described above and courses taken elsewhere may not be substituted without approval of the PhD program committee and the department head. In no instance can the qualifying examination be waived.

Students in the PhD program may apply to be awarded a master's degree upon completion of the master's program requirements and the approval of the master's program advisor.

Detailed information is given on the department's website.

Support Services

College of Arts and Sciences Data Services Laboratory

Garron Hale, Director

541-346-1335
451 McKenzie Hall

The College of Arts and Sciences Data Services Laboratory specializes in data acquisition, access to online data, and the archiving of local data. The laboratory's membership in the Interuniversity Consortium for Political and Social Research entitles the university community to order data from the largest data archive in the world. Data available to consortium members include the panel study of income dynamics, international financial statistics, census data, national crime statistics, and current population surveys. The laboratory also participates in the National Center for Health Statistics' electronic data dissemination program. The laboratory stores data from the panel study of income dynamics, international financial statistics, World Development Indicators, Global Insight, and the Organization for Economic Cooperation and Development. Users can easily obtain data at their desks by using file transfer protocol (FTP).

Laboratory services include using the Internet to locate data, ordering data, subsidizing data purchases, creating subsets of those data, and offering users advice on data structures. The laboratory also archives data sets generated by campus researchers.

Social Science Instructional Laboratory

Garron Hale, Director

541-346-2547
442 and 445 McKenzie Hall

The Social Science Instructional Laboratory is an advanced microcomputer laboratory that facilitates teaching with technology. Staff members assist social science instructors with educational technology applications, computer classroom laboratories, distance education course design, and course testing software. Staff members teach students computer applications, offer consulting services, provide students with access to real-world data, and provide research assistance to social science graduate students. Any UO student may use the laboratory when it is not in use by a class.

The facility consists of a twenty-six-station laboratory, a thirty-six-station laboratory, and an eight-station advanced lab. All three have state-of-the-art computers with fast processors and ample RAM and storage in a campus-networked environment. The two larger classroom laboratories are equipped with an instructor station, teaching software, a wheelchair-accessible station, a scanner, and a computer projector system. Printing capabilities include color laser printers and a large-format plotter. The classroom laboratories have a large selection of statistical software and software for geographic information systems, web editing, graphics, and specific class needs.

The Social Science Instructional Laboratory houses the instructional geographic information systems (GIS) laboratory, in which students can use the powerful ArcInfo software to create maps and conduct spatial analyses.

Courses

EC 101. Contemporary Economic Issues. 4 Credits.

Examines contemporary public policy using economic principles. Topics may include balanced budgets and tax reform, unemployment, health care, poverty and income redistribution, environmental policy, and international trade policy.

EC 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

EC 201. Introduction to Economic Analysis: Microeconomics. 4 Credits.

Examines how consumers, firms, and governments make decisions when facing scarce resources and how those decisions affect market outcomes, such as prices and output. MATH 111 recommended.

EC 202. Introduction to Economic Analysis: Macroeconomics. 4 Credits.

Examines the aggregate activity of a market economy, the problems that arise, such as inflation and unemployment, and how the government can use macroeconomic policy to address these problems. EC 201 recommended.

EC 311. Intermediate Microeconomic Theory. 4 Credits.

Consumer and firm behavior, market structures. General equilibrium theory, welfare economics, collective choice, rules for evaluating economic policy. Students cannot receive credit for both EC 311 and FIN 311.

Prereq: EC 201, MATH 111.

EC 313. Intermediate Macroeconomic Theory. 4 Credits.

Determination of aggregate income, employment, and unemployment; evaluation of macroeconomic policies.

Prereq: EC 202, MATH 111; EC 311 strongly recommended.

EC 320. Introduction to Econometrics. 4 Credits.

Application of classical statistical techniques of estimation, hypothesis testing, and regression to economic models. Includes laboratory section in Social Science Instructional Laboratory.

Prereq: MATH 242, 243.

EC 327. Introduction to Game Theory. 4 Credits.

Introductory course in game theory. Develops game-theoretic methods of rational decision making and equilibriums, using many in-class active games. Ellis.

Prereq: one from EC 101, 201.

EC 330. Urban and Regional Economic Problems. 4 Credits.

Topics may include urban and metropolitan growth, land use, race and poverty, education systems, slums and urban renewal, transportation, crime, and pollution and environmental quality.

Prereq: EC 201.

EC 333. Resource and Environmental Economic Issues. 4 Credits.

Economic analysis of replenishable and nonreplenishable natural resources; environmental issues and policies.

Prereq: EC 201.

EC 340. Issues in Public Economics. 4 Credits.

Principles and problems of government financing. Expenditures, revenues, debt, and financial administration. Production by government versus production by the private sector. Tax measures to control externalities.

Prereq: EC 201.

EC 350. Labor Market Issues. 4 Credits.

Topics may include the changing structure of employment, the minimum wage, the dual labor market hypothesis, collective bargaining, discrimination, and health and safety regulation.

Prereq: EC 201.

EC 360. Issues in Industrial Organization. 4 Credits.

Topics may include analysis of market power, trends in industrial structure, the role of advertising, pricing policies and inflation, impact of social regulation (e.g., OSHA, EPA), and international comparisons.

Prereq: EC 201.

EC 370. Money and Banking. 4 Credits.

Operations of commercial banks, the Federal Reserve System, and the Treasury that affect the United States monetary system.

Prereq: EC 202.

EC 380. International Economic Issues. 4 Credits.

Exchange across international boundaries, theory of comparative advantage, balance of payments and adjustments, international financial movements, exchange rates and international financial institutions, trade restrictions and policy.

Prereq: EC 201.

EC 390. Problems and Issues in the Developing Economies. 4 Credits.

Topics may include the role of central planning, capital formation, population growth, agriculture, health and education, interaction between economic and cultural change, and the "North-South debate."

Prereq: EC 201.

EC 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

EC 401. Research: [Topic]. 1-21 Credits.

Repeatable.

EC 404. Internship. 1-4 Credits.

Repeatable for maximum of 4 credits.

EC 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

EC 407. Seminar: [Topic]. 1-5 Credits.

Repeatable only when the topic changes. Yearly offerings vary depending on interests and needs of students and on availability of faculty members.

EC 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

EC 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable only when the topic changes.

Prereq: EC 311; EC 313; one from EC 320, EC 423.

EC 411. Advanced Microeconomic Theory. 4 Credits.

Advanced theory of consumer and firm behavior, market structures.

Prereq: one from MATH 253, MATH 263.

EC 413. Advanced Macroeconomic Theory. 4 Credits.

Advanced theory about the determination of aggregate income, employment, unemployment; evaluation of macroeconomic policies.

Prereq: one from MATH 253, MATH 263.

EC 418. Economic Analysis of Community Issues I. 2 Credits.

Hands-on experience applying economic analysis and econometrics to problems that face local community nonprofits and government agencies.

Prereq: EC 311, EC 313; one from EC 320, EC 423.

EC 419. Economic Analysis of Community Issues II. 4 Credits.

Hands-on experience applying economic analysis and econometrics to problems that face local community nonprofits and government agencies.

Prereq: EC 311,320.

EC 421. Introduction to Econometrics. 4 Credits.

Application of classical statistical techniques of estimation, hypothesis testing, and regression to economic models.

Prereq: one from EC 320, EC 423.

EC 422. Economic Forecasting. 4 Credits.

Basic techniques of economic forecasting that are typically used in a business environment.

Prereq: one from EC 320, EC 423; coreq: one from EC 421, EC 424.

EC 423. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Prereq: MATH 281, 341; MATH 282 and 461 strongly recommended.

EC 424. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Prereq: one from EC 423, EC 523.

EC 425. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Prereq: one from EC 424, EC 524.

EC 427. Games and Decisions. 4 Credits.

Game-theoretic methods of decision-making. Topics may include extensive-form games, noncredible threats, subgame perfect equilibrium, strategic-form games, undominated strategies, Nash equilibrium, coalitional games, and the core.

Prereq: EC 311; one from EC 320, EC 423.

EC 428. Behavioral and Experimental Economics. 4 Credits.

Investigates the "rational choice" model and behavioral alternatives, using laboratory experiments. Topics may include altruism, auctions, bargaining, behavioral finance, hyperbolic discounting, and decision-making under uncertainty.

Prereq: EC 311; one from EC 320, EC 423.

EC 430. Urban and Regional Economics. 4 Credits.

Location theory; urbanization and metropolitan growth; regional analysis; intraurban rent, location and land use, size distribution of urban areas; welfare economics, political economy, and urban problems.

Prereq: EC 311; one from EC 320, EC 423.

EC 432. Economy of the Pacific Northwest. 4 Credits.

Locational factors influencing development of the region's major industries; recent changes in income and population; problems and governmental policies in the areas of taxation, environment, and planning.

Prereq: EC 311; one from EC 320, EC 423.

EC 434. Environmental Economics. 4 Credits.

Introduction to the field that includes theoretical environmental policy, issues in environmental regulation, and empirical techniques used by practitioners.

Prereq: EC 311; one from EC 320, EC 423.

EC 435. Natural Resource Economics. 4 Credits.

Applications of economic theory and empirical methods to natural resources problems: ecosystems and renewable resources (land, water, fisheries, forests); exhaustible resources (energy, minerals).

Prereq: EC 311, EC 320.

EC 440. Public Economics. 4 Credits.

Theory of public goods and their optimal provision. Collective choice versus private choice and implications for resource allocation and efficiency.

Prereq: EC 311; one from EC 320, EC 423.

EC 441. Public Economics: Taxation. 4 Credits.

Theory of taxation, analysis of tax policy, and theory of government debt and budget deficits.

Prereq: EC 311; one from EC 320, EC 423.

EC 443. Health Economics. 4 Credits.

Includes moral hazard and adverse selection; incentives faced by health care providers through reimbursement, managed care, and malpractice; rationale for government intervention in the health care sector.

Prereq: EC 311; one from EC 320, EC 423.

EC 448. Political Economy. 4 Credits.

Covers the economic problems that arise when the government is a self-interested actor in the economy. We study political agency, voting, the economic origins of political institutions and the size and number of nations.

Prereq: EC 311, EC 313, EC 320.

EC 450. Labor Economics. 4 Credits.

Supply and demand for labor, wage determination under various market structures, minimum wage and worker exploitation, human capital investments, labor market signaling and sorting, discrimination, uncertainty, and job matching.

Prereq: EC 311; one from EC 320, EC 423.

EC 451. Issues in Labor Economics. 4 Credits.

Topics may include the determination of wages, employment, and unemployment; globalization and immigration; income inequality; internal labor markets; the role of unions; human capital, education, and schools.

Prereq: EC 311; one from EC 320, EC 423.

EC 460. Theories of Industrial Organization. 4 Credits.

Theories, quantitative measures, and institutional descriptions of the structure, conduct, and results that characterize American industry. Emphasis is on the determinants and consequences of market power.

Prereq: EC 311; one from EC 320, EC 423.

EC 461. Industrial Organization and Public Policy. 4 Credits.

Major policy instruments that have been developed to cope with social problems created by market power. The two principal instruments are antitrust and income policies.

Prereq: EC 311; one from EC 320, EC 423.

EC 462. Economics of Transportation. 4 Credits.

Examines economic transportation issues and models, including regulation, demand-cost modeling, productivity analysis, random utility and choice modeling, and spatial economics.

Prereq: EC 311; one from EC 320, EC 423.

EC 470. Monetary Policy. 4 Credits.

Federal Reserve System strategies and methods of monetary and credit control. Effects of federal policies on prices, output, and employment.

Prereq: EC 313; one from EC 320, EC 423.

EC 471. Monetary Theory. 4 Credits.

Money creation, deficit finance, and taxation in monetary economies.

Topics may include the government budget constraint, causes and consequences of inflation, Richardian equivalence, and seigniorage.

Prereq: EC 311, 313; one from EC 320, EC 423.

EC 480. International Finance. 4 Credits.

Foreign exchange markets, interaction between spot and forward markets, speculation and interest arbitrage, balance-of-payments accounting, measures of deficits and surpluses, "open-economy" macroeconomic issues.

Prereq: EC 311, 313; one from EC 320, EC 423.

EC 481. International Trade. 4 Credits.

Theories of international trade, direction of trade flows, determination of prices and volumes in international trade, tariffs, quotas, customs unions, free versus restricted trade.

Prereq: EC 311; one from EC 320, EC 423.

EC 482. Economics of Globalization. 4 Credits.

Applications of economic theories and empirical methods to globalization issues: market integration of goods and factors, international labor and environmental standards, economic growth and income inequality, financial stability, global governance.

Prereq: EC 311, EC 320.

EC 484. Multinational Corporations. 4 Credits.

Economist's perspective of multinational corporations. Explores the policies governments use to influence corporate behavior and patterns of investment; taxation as a tool for implementing public policy.

Prereq: EC 311; one from EC 320, EC 423.

EC 490. Economic Growth and Development. 4 Credits.

Experience of developed countries and theories of development. Analysis of specific development programs, role of agriculture, sources of investment, techniques and strategies of investment planning.

Prereq: EC 311, 313; one from EC 320, EC 423.

EC 491. Issues in Economic Growth and Development. 4 Credits.

Economic issues in developing countries, including use of central planning or markets, capital formation, agriculture, population growth, health and education systems, and the "North-South debate."

Prereq: EC 311, 313; one from EC 320, EC 423.

EC 493. The Evolution of Economic Ideas. 4 Credits.

Economic thought from the ancient world to the 20th century. Major schools of economic thought and their relationship to other social ideas of their times.

Prereq: EC 311, 313; one from EC 320, EC 423.

EC 503. Thesis. 1-16 Credits.

Repeatable.

EC 507. Seminar: [Topic]. 1-5 Credits.

Repeatable only when the topic changes. Yearly offerings vary depending on interests and needs of students and on availability of faculty members.

EC 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

EC 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable only when the topic changes.

EC 511. Advanced Microeconomic Theory. 4 Credits.

Advanced theory of consumer and firm behavior, market structures.

EC 513. Advanced Macroeconomic Theory. 4 Credits.

Advanced theory about the determination of aggregate income, employment, unemployment; evaluation of macroeconomic policies.

EC 522. Economic Forecasting. 4 Credits.

Basic techniques of economic forecasting that are typically used in a business environment.

EC 523. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Prereq: MATH 281, 341; MATH 282 and 461 strongly recommended.

EC 524. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Prereq: EC 423/523.

EC 525. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Prereq: EC 424/524.

EC 527. Games and Decisions. 4 Credits.

Game-theoretic methods of decision-making. Topics may include extensive-form games, noncredible threats, subgame perfect equilibrium, strategic-form games, undominated strategies, Nash equilibrium, coalitional games, and the core.

EC 528. Behavioral and Experimental Economics. 4 Credits.

Investigates the "rational choice" model and behavioral alternatives, using laboratory experiments. Topics may include altruism, auctions, bargaining, behavioral finance, hyperbolic discounting, and decision-making under uncertainty.

EC 530. Urban and Regional Economics. 4 Credits.

Location theory; urbanization and metropolitan growth; regional analysis; intraurban rent, location and land use, size distribution of urban areas; welfare economics, political economy, and urban problems.

EC 532. Economy of the Pacific Northwest. 4 Credits.

Locational factors influencing development of the region's major industries; recent changes in income and population; problems and governmental policies in the areas of taxation, environment, and planning.

EC 534. Environmental Economics. 4 Credits.

Introduction to the field that includes theoretical environmental policy, issues in environmental regulation, and empirical techniques used by practitioners.

EC 535. Natural Resource Economics. 4 Credits.

Applications of economic theory and empirical methods to natural resources problems: ecosystems and renewable resources (land, water, fisheries, forests); exhaustible resources (energy, minerals).

EC 540. Public Economics. 4 Credits.

Theory of public goods and their optimal provision. Collective choice versus private choice and implications for resource allocation and efficiency.

Prereq: EC 311.

EC 541. Public Economics: Taxation. 4 Credits.

Theory of taxation, analysis of tax policy, and theory of government debt and budget deficits.

EC 543. Health Economics. 4 Credits.

Includes moral hazard and adverse selection; incentives faced by health-care providers through reimbursement, managed care, and malpractice; rationale for government intervention in the health-care sector.

EC 548. Political Economy. 4 Credits.

Covers the economic problems that arise when the government is a self-interested actor in the economy. We study political agency, voting, the economic origins of political institutions and the size and number of nations.

EC 550. Labor Economics. 4 Credits.

Supply and demand for labor, wage determination under various market structures, minimum wage and worker exploitation, human capital investments, labor market signaling and sorting, discrimination, uncertainty, and job matching.

EC 551. Issues in Labor Economics. 4 Credits.

Topics may include the determination of wages, employment, and unemployment; globalization and immigration; income inequality; internal labor markets; the role of unions; human capital, education, and schools.

EC 560. Theories of Industrial Organization. 4 Credits.

Theories, quantitative measures, and institutional descriptions of the structure, conduct, and results that characterize American industry. Emphasis is on the determinants and consequences of market power.

EC 561. Industrial Organization and Public Policy. 4 Credits.

Major policy instruments that have been developed to cope with social problems created by market power. The two principal instruments are antitrust and income policies.

EC 562. Economics of Transportation. 4 Credits.

Examines economic transportation issues and models, including regulation, demand-cost modeling, productivity analysis, random utility and choice modeling, and spatial economics.

EC 570. Monetary Policy. 4 Credits.

Federal Reserve System strategies and methods of monetary and credit control. Effects of federal policies on prices, output, and employment.

EC 571. Monetary Theory. 4 Credits.

Money creation, deficit finance, and taxation in monetary economies. Topics may include the government budget constraint, causes and consequences of inflation, Richardian equivalence, and seigniorage.

EC 580. International Finance. 4 Credits.

Foreign exchange markets, interaction between spot and forward markets, speculation and interest arbitrage, balance-of-payments accounting, measures of deficits and surpluses, "open-economy" macroeconomic issues.

EC 581. International Trade. 4 Credits.

Theories of international trade, direction of trade flows, determination of prices and volumes in international trade, tariffs, quotas, customs unions, free versus restricted trade.

EC 582. Economics of Globalization. 4 Credits.

Applications of economic theories and empirical methods to globalization issues: market integration of goods and factors, international labor and environmental standards, economic growth and income inequality, financial stability, global governance.

EC 584. Multinational Corporations. 4 Credits.

Economist's perspective of multinational corporations. Explores the policies governments use to influence corporate behavior and patterns of investment; taxation as a tool for implementing public policy.

EC 590. Economic Growth and Development. 4 Credits.

Experience of developed countries and theories of development. Analysis of specific development programs, role of agriculture, sources of investment, techniques and strategies of investment planning.

EC 591. Issues in Economic Growth and Development. 4 Credits.

Economic issues in developing countries, including use of central planning or markets, capital formation, agriculture, population growth, health and education systems, and the "North-South debate."

EC 593. The Evolution of Economic Ideas. 4 Credits.

Economic thought from the ancient world to the 20th century. Major schools of economic thought and their relationship to other social ideas of their times.

EC 601. Research: [Topic]. 1-16 Credits.

Repeatable.

EC 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

EC 603. Dissertation. 1-16 Credits.

Repeatable.

EC 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

EC 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics are Econometrics, Game Theory, Labor Economics, and Public Finance.

EC 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

EC 609. Practicum: [Topic]. 1-16 Credits.

Repeatable. Graduate teaching fellows may earn 3 credits a term; available to other graduate students with department head's consent.

English

David J. Vazquez, Department Head

1286 University of Oregon

Eugene, Oregon 97403-1286

With nearly 50 full-time faculty members, the Department of English offers students a broad foundation in traditional British, American, and Anglophone literary studies, as well as intensive course work in interdisciplinary studies, emerging media, and current critical methodologies. Its lower-division courses provide training in writing and introduce the student to literature as a humanistic discipline. Its upper-division courses emphasize the humanistic values that emerge from studying literature and allied disciplines analytically and in depth.

Careers

The study of English opens doors to many careers. All fields of endeavor place high value on the ability to read intelligently and to write clearly. The English major may lead most directly to careers in education, journalism, or communications; it is also highly regarded as undergraduate training for law, government, social work, community service, and business. Indeed, the ability to handle the language

with clarity and cogency is the skill most frequently cited by business professionals as desirable. A major in English, with judiciously selected electives, prepares students not only to find that essential first job but also to possess the breadth of outlook and depth of perspective that become increasingly important in subsequent phases of their careers. A student preparing for graduate study in English should construct an appropriate course of undergraduate study in consultation with a faculty advisor.

Expository Writing

The English department offers required and elective courses in expository writing for all university students to help them improve their ability to write clearly and effectively. Students must fulfill the university writing requirement of two composition courses or be cleared according to established waiver and exemption policies. The requirement is College Composition I (WR 121) and either College Composition II (WR 122) or College Composition III (WR 123), or their approved equivalents. Students should complete the writing requirement—with course work, by exemption, or by waiver examination—early in their studies.

Exemptions

Scores of 37 or better on the new College Board SAT Reading and Writing tests waive the need to take College Composition I (WR 121). No credit is given for this waiver. A score of 710 or better on the old SAT Critical Reading test (650 prior to 1995) or 32 or better on the ACT English test will also waive WR 121 (without credit). A score of 3, 4, or 5 on the Advanced Placement (AP) Language and Composition Examination produces credit for WR 121.

Waiver Examinations

Waiver examinations for College Composition I (WR 121) and College Composition II (WR 122) are offered during the first week of classes, fall through spring terms, at the UO Testing Office, 238 University Health, Counseling, and Testing Center Building; call 541-346-3230. Visit the Testing Office website (<http://testing.uoregon.edu/PlacementTesting/WritingPlacement/WritingWaiverExam/tabid/79/Default.aspx>) to sign up for an examination. No credit is awarded for waiver examinations, and students may not take waiver examinations for both courses in the same term. The essay exams are graded pass/no pass by three members of the Department of English composition committee. Students who do not pass may not retake the examination and should register for the appropriate writing course as soon as possible. Students who pass the exam have an "exemption by exam" notation for either College Composition I (WR 121) or College Composition II (WR 122) placed on their degree audit. Waiver exams are not returned to students, nor are they used as a teaching device. Additional help and special tutoring are available to students through the University Teaching and Learning Center.

Placement

Students for whom English is the native language are placed in their first writing course based on their SAT or ACT verbal scores. Students whose scores fall below 26 on the new SAT Reading and Writing tests, below 480 on the old SAT Verbal, or below 19 on the ACT are eligible for concurrent enrollment in Writing Tutorial (WR 195) with College Composition I (WR 121).

Nonnative Speakers

Students for whom English is not the native or primary language are placed in their first writing course on the basis of a placement

test. These may include Introductory Academic Writing (AEIS 110), Intermediate Academic Writing (AEIS 111), and Advanced Academic Writing (AEIS 112) (taught in the Department of Linguistics). Placement tests are administered before registration. Nonnative speakers should inquire at the American English Institute, 107 Pacific Hall, for placement test dates.

Transfer Students

Transfer students in doubt about the equivalency of courses taken elsewhere should bring transcripts and catalog descriptions to the composition office, Department of English, for evaluation.

Faculty

Faith Barter, assistant professor (19th-century African American literature). AB, 2001, Dartmouth College; JD, 2007, American; MA, 2012, PhD, 2016, Vanderbilt. (2018)

Martha J. Bayless, professor (medieval literature). BA, 1980, Bryn Mawr; MA, 1984, PhD, 1990, Cambridge. (1989)

Carolyn Bergquist, senior lecturer (Renaissance literature; rhetoric and composition); director, Composition Program. BA, 1994, California State, Stanislaus; MA, 1996, PhD, 2003, Oregon. (2003)

Elizabeth A. Bohls, professor (18th-century literature). BA, 1979, Mount Holyoke College; PhD, 1989, Stanford. (1998)

Tina Boscha, senior instructor (composition). BA, 1995, Calvin College; MFA, 2003, Oregon. (2003)

Lara Bovilsky, associate professor (Renaissance literature and culture; graduate professionalism). BA, 1995, Brown; MA, 1998, PhD, 2001, Duke. (2008)

Kirby Brown, associate professor (Native and ethnic American literatures). BA, 1997, Texas, Austin; MA, 2005, Texas, San Antonio. (2011)

Kristy Bryant-Berg, instructor (composition). BA, 2002, Colorado, Boulder; MA, 2004, Oregon; PhD, 2009, Oregon. (2014)

Anna Carroll, instructor (composition). BA, 2007, MA, 2010, West Florida; PhD, 2015, Oregon. (2018)

Ulrick Casimir, instructor (composition). BA, 1995, North Carolina State; MFA, 2000, North Carolina; MA, 2005, PhD, 2008, Oregon. (2018)

Stephanie Clark, associate professor (medieval literature). BA, 2002, Texas, Dallas; MA, 2004, PhD, 2011, Illinois, Urbana-Champaign. (2011)

Kara Clevinger, senior instructor.

Michael Copperman, senior instructor (composition). BA, 2002, Stanford; MFA, 2006, Oregon. (2006)

José Cortez, assistant professor (rhetoric and composition). BA, 2009, MA, 2011, Eastern Washington; PhD, 2017, Arizona. (2018)

James R. Crosswhite, professor (rhetoric, writing, critical theory). BA, 1975, California, Santa Cruz; MA, 1979, PhD, 1987, California, San Diego. (1989)

Dianne M. Dugaw, professor (17th- and 18th-century literature, British and American folklore). BA, 1971, Portland; MA, 1976, PhD, 1982, California, Los Angeles. (1990)

Rachel Eccleston, instructor (composition). BA, 2007, Texas, Austin; PhD, 2017, Oregon. (2018)

Tara S. Fickle, assistant professor (Asian American literature, multiethnic literature). BA, 2006, Wesleyan; MA, 2010, PhD 2014, California. Los Angeles. (2014)

Karen J. Ford, professor (poetry and poetics, modern poetry, American literature). BA, 1978, California State, Sacramento; MA, 1981, California, Davis; PhD, 1989, Illinois, Urbana-Champaign. (1992)

Lisa Freinkel, associate professor (Renaissance literature, contemplative studies). BA, 1987, Harvard; MA, 1989, PhD, 1993, California, Berkeley. (1995)

John T. Gage, professor (rhetoric, writing, modern poetry). BA, 1969, MA, 1971, PhD, 1976, California, Berkeley. (1980)

Brian Gazaille, instructor (composition). BA, 2009, Arizona; PhD, 2016, Oregon. (2016)

Miriam Gershow, senior instructor (composition); associate director, composition. BS, 1992, Michigan, Ann Arbor; MFA, 2002, Oregon. (2004)

Warren Ginsberg, Philip H. Knight Professor (medieval literature). MA, 1971, State University of New York, Stony Brook; PhD, 1975, Yale. (2000)

Helen Huang, instructor (composition). BA, 2002, National Chengchi; MA, 2007, National Taiwan; PhD, 2018, Oregon. (2018)

Michael Jarvis, instructor (composition). BA, 2008, North Carolina, Chapel Hill; MA, 2012, PhD, 2018, California, Riverside. (2018)

Heidi N. Kaufman, Sherl K. Coleman and Margaret E. Guitteau Teaching Professor in the Humanities; associate professor (19th-century British literature); associate department head. BA, 1991, Drew; MA, 1994, Boston; PhD, 2011, New Hampshire. (2013)

Katherine Kelp-Stebbins, assistant professor (comic studies). BA, 2003, Wesleyan; MA, 2009, PhD, 2014, California, Santa Barbara. (2018)

Anna Kovalchuk, instructor (composition). BA, 2007, California, San Diego; PhD, Oregon, 2017. (2018)

C. Anne Laskaya, associate professor (medieval literature, women writers, rhetoric). BA, 1976, Lawrence; BMus, Lawrence Conservatory of Music; MA, 1978, PhD, 1989, Rochester. (1983)

Stephanie LeMenager, Barbara and Carlisle Moore Distinguished Professor in English and American Literature (environmental literature). BA, 1991, Stanford; MA, 1994, PhD, 1999, Harvard. (2013)

David Leiwei Li, President's Distinguished Professor in the Humanities (Asian American literature and culture). BA, 1982, Shanghai Foreign Languages Institute; MA, 1986, Indiana University of Pennsylvania; PhD, 1991, Texas, Austin. (1999)

Quinn Miller, associate professor (film and media studies). BA, 2003, Chicago; MA, 2005, PhD, 2010, Northwestern. (2012)

Kate Myers, senior instructor (composition). BA, 2002, Goshen College; MA, 2006, North Florida; PhD, 2016, Oregon. (2016)

Brendan O'Kelly, instructor (composition). BA, 2002, MA, 2004, Colorado, Boulder; PhD, 2016, California, Los Angeles. (2015)

Paul W. Peppis, professor (modern British literature); director, Oregon Humanities Center. BA, 1984, Williams; MA, 1987, PhD, 1993, Chicago. (1995)

Ana Peters, instructor (composition). BA, 1992, MA, 1994, Minnesota State; MFA, 1996, Vermont College. (2018)

Forest Pyle, professor (romanticism, literary theory). BA, 1980, MA, 1983, PhD, 1988, Texas, Austin. (1988)

Mark Quigley, associate professor (Irish literature, 20th-century literature). BA, 1992, Stanford; MA, 1997, PhD, 2003, California, Los Angeles. (2006)

Nick Recktenwald, instructor (composition). BA, 2008, North Carolina, Asheville; MA, 2014, Oregon. (2016)

William Rossi, professor (19th-century American literature); director of undergraduate studies. BA, 1972, MA, 1979, Missouri; PhD, 1986, Minnesota. (1989)

Stephen Rust, senior instructor (composition). BS, 1999, Idaho State; MA, 2006, Oregon State; PhD, 2011, Oregon. (2015)

Benjamin D. Saunders, professor (Renaissance literature, comics studies). BA, 1991, East Anglia; MPhil, 1992, Cambridge; PhD, 2000, Duke. (2000)

Gordon M. Sayre, professor (early American literature, 18th-century literature, folklore). BA, 1988, Brown; PhD, 1993, State University of New York, Buffalo. (1993)

Steven Shankman, professor (18th-century literature, the classical tradition, comparative literature). BA, 1969, Texas, Austin; BA, 1971, MA, 1976, Cambridge; PhD, 1977, Stanford. (1984)

Emily Simnitt, senior instructor (composition). BA, 1995, Brigham Young; MA, 2005, Idaho State. (2015)

Courtney Thorsson, associate professor (African American literature, 19th- and 20th-century American literature, food studies). BA, 2000, Virginia; MA, 2004, MPhil, 2006, PhD, 2009, Columbia. (2009)

Avinnash Tiwari, instructor (composition). BA, 2010, Pennsylvania; MA, 2013, Oregon. (2016)

Corbett Upton, senior instructor (Central American poetry); associate director, undergraduate studies. BA, 2001, Arizona State; MA, 2006, PhD, 2010, Oregon. (2010)

David J. Vazquez, associate professor (Latino literature, 20th-century literature, ethnic studies). BA, 1988, South Florida; MA, 1998, PhD, 2004, California, Santa Barbara. (2003)

Eleanor Wakefield, instructor (composition). BA, 2007, Gonzaga; MA, 2011, PhD, 2017, Oregon, 2017. (2018)

Mark Whalan, professor (modern and 20th-century literature); Robert D. and Eve D. Horn Chair in English and American Literature. BA, 1995, Warwick; MA, 1996, Durham; PhD, 2002, Exeter. (2011)

Elizabeth A. Wheeler, associate professor (post-1945 literature, cultural studies, disability studies). BA, 1982, Bowdoin; MA, 1988, City University of New York; PhD, 1996, California, Berkeley. (1996)

Jenée Wilde, instructor (composition). BA, 1994, Boise State; MFA, 2003, Goddard College; PhD, 2015, Oregon (2016)

Daniel N. Wojcik, professor (folklore, popular culture). BA, 1978, California, Santa Barbara; MA, 1986, PhD, 1992, California, Los Angeles. (1991)

Henry B. Wonham, professor (19th- and 20th-century American literature). BA, 1983, Princeton; PhD, 1991, Virginia. (1995)

Mary E. Wood, professor (19th-century American literature, gender studies). BA, 1978, Yale; MA, 1980, PhD, 1987, Stanford. (1987)

Robert Zandstra, instructor (composition). BA, 2009, Calvin College; MA, 2012, PhD, 2017, Oregon. (2018)

Emeriti

James L. Boren, professor emeritus. BA, 1965, San Francisco State; MA, 1967, PhD, 1970, Iowa. (1970)

William Cadbury, professor emeritus. BA, 1956, Harvard; MS, 1957, PhD, 1961, Wisconsin, Madison. (1961)

Suzanne Clark, professor emerita. BA, 1961, MA, 1965, Oregon; PhD, 1980, California, Irvine. (1990)

James W. Earl, professor emeritus. BA, 1967, Bucknell; PhD, 1971, Cornell. (1987)

Marilyn Farwell, professor emerita. BA, 1963, MacMurray; MA, 1966, PhD, 1971, Illinois. (1971)

Thelma Greenfield, professor emerita. BA, 1944, MA, 1947, Oregon; PhD, 1952, Wisconsin, Madison. (1963)

Robert Grudin, professor emeritus. BA, 1960, Harvard; MA, 1963, PhD, 1969, California, Berkeley. (1971)

Ruth F. Jackson, senior instructor emerita. BA, 1929, MA, 1933, Oregon. (1955)

Kathleen Rowe Karlyn, professor emerita. BA, 1969, Connecticut; MLA, 1973, Johns Hopkins; PhD, 1992, Oregon. (1994)

Linda Kintz, professor emerita. BA, 1967, Texas Tech; MA, 1969, Southern Methodist; PhD, 1982, Oregon. (1988)

Julia Lesage, professor emerita. MA, 1962, PhD, 1972, Indiana. (1988)

Glen A. Love, professor emeritus. BA, 1954, MA, 1959, PhD, 1964, Washington (Seattle). (1965)

William Rockett, associate professor emeritus. BA, 1961, MA, 1963, Oklahoma; PhD, 1969, Wisconsin, Madison. (1966)

George Rowe, professor emeritus; editor, *Comparative Literature*. BA, 1969, Brandeis; MA, 1971, PhD, 1973, Johns Hopkins. (1985)

Sharon R. Sherman, professor emerita. PhB, 1965, Wayne State; MA, 1971, California, Los Angeles; PhD, 1978, Indiana. (1976)

Richard L. Stein, professor emeritus. BA, 1965, Amherst; AM, 1966, PhD, 1970, California, Berkeley. (1976)

Richard C. Stevenson, professor emeritus. AB, 1961, AM, 1963, PhD, 1969, Harvard. (1968)

Nathaniel Teich, professor emeritus. BS, 1960, Carnegie-Mellon; MA, 1962, Columbia; PhD, 1970, California, Riverside. (1969)

Louise Westling, professor emerita. BA, 1964, Randolph-Macon Woman's; MA, 1965, Iowa; PhD, 1974, Oregon. (1985)

George Wickes, professor emeritus. BA, 1944, Toronto; MA, 1949, Columbia; PhD, 1954, California, Berkeley. (1970)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

David A. Frank, honors college

Michael Hames-García, ethnic studies

Mat Johnson, creative writing

Sharon Luk, ethnic studies

Sarah Wald, environmental studies

- Bachelor of Arts
- Minor in English
- Minor in Comics and Cartoon Studies
- Minor in Disability Studies
- Minor in Writing, Public Speaking, and Critical Reasoning

Undergraduate Studies

The Department of English expects its majors to acquire knowledge of English and American literature. In addition, it expects them to gain a sense of history and a reading knowledge of at least one second language. Majors should construct their programs in consultation with an advisor. The major requirements for the degree of bachelor of arts (BA) in the Department of English are listed below.

Course work required for the English major, both lower division and upper division, must be passed with grades of mid-C or better. Majors must complete the university second-language requirement for the BA degree. At least 28 of the required 36 upper-division credits must be taken at the University of Oregon.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Lower-Division Courses		16
ENG 205	Genre: [Topic] (two courses with differing topics)	
Two lower-division elective courses ¹		
Foundation Courses ²		12
ENG 301		
ENG 302	Foundations of the English Major: Theory	
ENG 303	Foundations of the English Major: Text	
Writing Requirement ³		4

Upper-Division Courses ⁴	32
Literature course, pre-1500	
Literature course, 1500–1789	
Literature course, 1789 to the present	
Literary theory or rhetoric course	
Media, folklore, or culture course	
Gender, ability, queer studies, or sexuality course	
Empire, race, or ethnicity course	
Additional upper-division course work in literature, media, folklore, or writing ⁵	
Total Credits	64

- ¹ May include only one of the following: Introduction to Literature: Fiction (ENG 104), Introduction to Literature: Drama (ENG 105), Introduction to Literature: Poetry (ENG 106), and may include no courses with a WR subject code.
- ² Completion of at least one Genre: [Topic] (ENG 205) topics course is a prerequisite for enrolling in ENG 301 or 302; completion of either ENG 301 or 302 is prerequisite for enrolling in ENG 303.
- ³ May be fulfilled using (a) an upper-division elective, (b) The Art of the Sentence (ENG 420), or (c) any upper-division WR course.
- ⁴ One course may satisfy a maximum of two upper-division area requirements at once, as indicated on the current advising supplement.
- ⁵ No more than 8 credits of Research: [Topic] (ENG 401), Thesis (ENG 403), Reading and Conference: [Topic] (ENG 405), or Writing and Conference: [Topic] (CRWR 405). Upper-division CRWR courses may also be used to fulfill this requirement.

Honors Program in English

The program provides qualified undergraduate majors with special options for fulfilling departmental requirements. Honors students interested in the intensive study of literature in small discussion seminars independently explore a special topic of their own choosing, under the guidance of a faculty member. Typically, students spend a major portion of the senior year writing their honors thesis.

Requirements

1. Completion of all English department requirements
2. Minimum of two terms of Seminar: [Topic] (ENG 407) (Capstone).
3. Two terms of Thesis (ENG 403), a directed program of study or creative writing under the guidance of an appropriate advisor.
4. Senior thesis—either a critical essay of thirty-five to fifty pages or a substantial piece of creative writing. The thesis must be approved by the advisor and a second reader (typically both faculty members in English) after an oral defense.

Admission and Supervision

Applicants must have a cumulative GPA of 3.70 in their English courses and completed at least two upper-division English courses and, if possible, all lower-division major requirements. Admission is based on the applicant's academic record, a brief description of the applicant's proposed project, and the recommendation of two faculty members in the department.

Beginning with the 2014–15 academic year, Clark Honors College English majors who have been accepted into the English honors program and who complete the requirements for both the Clark Honors College

thesis and the English honors program may submit an English honors thesis, awarded a pass or pass with distinction, to fulfill the thesis requirement for both English department honors and the Clark Honors College thesis. Failing theses cannot earn English department honors or be used to satisfy the Clark Honors College thesis.

To apply for admission to the honors program, contact Paul Peppis, the program director and associate department head.

Minor in English

The English minor requires 24 credits of approved course work selected from the documents titled *University of Oregon English Major Requirements* and *Advising Supplement*, which are updated each year. Both documents are available in the English department office. Only courses with the ENG subject code and writing courses numbered WR 320, WR 321, or WR 423 may be used for the minor. Introduction to Literature (ENG 104, ENG 105, ENG 106) and transfer equivalents may not be used to satisfy minor requirements. A maximum of 8 credits may be taken in lower-division courses, and all upper-division courses must be taken in residence at the University of Oregon. Course work must be taken for letter grades and passed with grades of mid-C or better.

Minor in Comics and Cartoon Studies

This interdisciplinary minor in comics and cartoon studies presents students with an international, historical, and critical perspective on the art of comics, from editorial cartoons to comic books to graphic novels. In taking courses for this minor, students will be required to think beyond accustomed disciplinary boundaries and to analyze and experiment with the interaction of visual and linguistic systems of meaning.

To qualify for the minor, students must take 24 credits of approved courses, including one required course, Introduction to Comic Studies (ENG 280). The remaining courses may be selected from the range of comics-related courses offered through the Departments of Art, Comparative Literature, East Asian Languages and Literatures, English, Ethnic Studies, History of Art and Architecture, and Romance Languages, the Arts and Administration Program, and the School of Journalism and Communication. For details regarding these courses, students should consult the list of offerings available in the Department of English office or online at comics.uoregon.edu.

No more than 12 credits may be taken in lower-division courses, and course work must be passed with grades of mid-C or better.

Minor in Disability Studies

disability.uoregon.edu

Elizabeth Wheeler, Director

541-346-3929

238 Prince Lucien Campbell Hall

ewheeler@uoregon.edu

The minor in disability studies prepares students for a growing range of careers through study of disability and deaf cultures, politics, and histories in fields such as international development, health, design, sign language interpreting, education, and nonprofit management. The interdisciplinary program of study ranges across the university, and many courses fulfill university general-education, multicultural, and second-language requirements.

Course work required for the minor must be passed with grades of mid-C or better. At least 12 of the required 24 credits must be taken at the University of Oregon; at least 12 must be upper-division credits.

Code	Title	Credits
ENG 240 or WGS 221	Introduction to Disability Studies Bodies and Power	4
Choose three from the following list of courses on social models: ¹		12
ANTH 162	Introduction to Medical Anthropology	
ASL 201–203	Second-Year American Sign Language	
ASL 301	American Deaf Culture	
CDS 201	Communication Disorders in Society and Media	
ENG 386	Bodies in Comics	
HIST 491	Medicine and Society in Premodern Japan	
INTL 340	Global Health and Development	
PHIL 335	Medical Ethics	
PPPM 202	Healthy Communities	
PSY 366	Culture and Mental Health	
SPED 412	Foundations of Disability II	
Choose one from the following list of courses on career paths: ¹		4
ANTH 413	Culture and Psychology	
ARCH 440	Human Context of Design	
ASL 101–103	First-Year American Sign Language	
IARC 204	Understanding Contemporary Interiors	
INTL 463	Population Displacement and Global Health	
PPPM 460	Health Policy	
Field work ²		4
Total Credits		24

¹ Visit disability.uoregon.edu for a full list of options.

² Fieldwork gives students direct contact with disability and deaf communities, and ranges from self-designed internships to such options as adaptive skiing, community theater, and consultation with international advocates.

Minor in Writing, Public Speaking, and Critical Reasoning

The minor in writing, public speaking, and critical reasoning prepares undergraduates for active and effective participation in the complex, diverse, and ever-changing communicative situations they will face after graduation.

Code	Title	Credits
Select two courses in writing from the following: ¹		8
WR 123	College Composition III	
WR 320	Scientific and Technical Writing	
WR 321	Business Communications	
ENG 413	Theories of Literacy	
ENG 420	The Art of the Sentence	
WR 423	Advanced Composition	

Select two courses in rhetoric from the following (at least one of which must be ENG 200 or ENG 330): ¹		8
ENG 200	Public Speaking as a Liberal Art ² or ENG 330 Oral Controversy and Advocacy	
ENG 491		
ENG 492	History of Rhetoric and Composition	
ENG 493	Modern Rhetorical Criticism	
Select two courses in reasoning from the following: ¹		8
PHIL 103	Critical Reasoning	
PHIL 325	Logic, Inquiry, and Argumentation	
ENG 335	Inventing Arguments	
Total Credits		24

¹ Reasoning, Speaking, Writing (ENG 494), Internship: [Topic] (ENG 404) or Independent Writing Project (WR 198) may be taken to satisfy one course requirement.

² If not already taken.

Kindergarten through Secondary Teaching Careers

Students who complete a degree in English are eligible to apply to the College of Education's fifth-year licensure program in middle-secondary teaching or the fifth-year licensure program in elementary teaching. More information is available from the department's education advisors, Elizabeth Wheeler and Mary Wood; see also the College of Education (p. 734) section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in English

- Master of Arts
- Doctor of Philosophy

Graduate Studies

The Department of English offers graduate study in English and American literature, film studies, folklore, critical theory, rhetoric and composition, and cultural studies. It offers the master of arts (MA) and doctor of philosophy (PhD) degrees in English. Detailed descriptions of these programs and instructions about how to apply to the English graduate program are available on the department's website.

Master of Arts Degree

The Department of English offers an MA for students who want to study beyond the BA but who do not plan to complete a PhD. Students whose goal is a doctorate should apply for admission to the department's doctoral program (described below). Students who complete the MA program at the University of Oregon and want to enter the PhD program must reapply to the department for admission into that program.

The number of seats in the MA program is limited, and admission is competitive.

Admission Requirements

1. An undergraduate grade point average (GPA) of at least 3.50 or, if the student has 12 or more credits of graduate work in English, a graduate GPA of 3.50 or better
2. The submission of scores on the verbal and analytical writing sections of the general test of the Graduate Record Examinations (GRE).
3. For nonnative speakers: a minimum score of 600 on the paper-based Test of English as a Foreign Language (TOEFL) or a minimum score of 100 on the Internet-based test

Admission Procedures

Information on applying to the graduate program may be obtained from the department website or from the department office. Application materials are submitted electronically at https://gradweb.uoregon.edu/online_app/application/guidelines2.htm. The following information is part of the application process and must be submitted electronically:

- Degree transcripts (unofficial copies are acceptable)
- Contact information (names, e-mail addresses) for three people willing to write letters of recommendation
- A personal statement (500-word maximum) of background and objectives in pursuing the course of study
- A writing sample that demonstrates the applicant's ability in literary, film, folklore, or cultural studies (5,000-word maximum, including bibliography and notes)

In addition to the transcripts uploaded to the online application, official copies of transcripts should be mailed to the Office of Admissions, 1217 University of Oregon, Eugene, Oregon 97403-1286.

Information about graduate employee (GE) opportunities may be found on the department website.

The application deadline for admission is January 15. Candidates are admitted only for fall term.

The completed file is reviewed by the department's graduate admissions committee, which notifies the applicant of its decision. All admissions are conditional.

Master of Arts Degree Requirements

Code	Title	Credits
ENG 690	Introduction to Graduate Studies in English	5
Select one of the following:		
	Pre-1500 course	
	1500-1660 course	
	1660-1800 course	

Select one of the following:

19th-century course

20th-century course

Rhetoric or advanced theory course

Nine formal 600-level seminars

A master's thesis may be substituted for one elective seminar with the prior approval of the director of graduate studies in consultation with the faculty thesis advisor. The MA thesis is a substantial scholarly essay researched and written over two terms during the second year of study.

Graduate course work should be completed at the 600 level. Exceptions to this policy must be made in advance by the director of graduate studies in consultation with the individual faculty advisor.

A minimum cumulative GPA of 3.50 in all graduate course work at the UO is required for completion of the MA degree. At least nine courses must be taken in residence at the University of Oregon.

Students who have completed 12 graduate-level English courses (nine taken at the university), attained reading knowledge of one foreign language, and maintained a cumulative GPA of 3.30 or better may apply for the MA degree with a specialty in English or American literature.

Language Requirement

Completion of the degree requires reading competence in one foreign language. Reading competence may be demonstrated by a B+ average in the yearlong Old English sequence; a grade of mid-B or better in the last term of a second-year language course or an approved 300-, 400-, or 600-level literature course with readings in the target language; scoring at required levels on the College Level Examination Program (CLEP) test; or passing the Toronto Medieval Latin examination at the master's level.

Interdisciplinary MA

See the description of the Interdisciplinary Studies: Individualized Program (IS:IP) in the **Graduate School** section of this catalog.

Doctor of Philosophy Degree

Students who want to pursue a PhD at the University of Oregon should apply directly to the doctoral program. Students in the doctoral program who have not earned an MA prior to being admitted may receive the MA at the appropriate stage of their course of study, typically at the end of the second year (subject to the fulfillment of department and university MA requirements listed in the **Graduate School** section of this catalog).

The number of places in the PhD program is limited, and admission is competitive.

Admission Requirements

1. A bachelor of arts (BA) or a master of arts (MA) in English or a related field, with at least a 3.50 graduate grade point average (GPA)
2. The submission of scores on the verbal and analytical writing sections of the general test of the Graduate Record Examinations (GRE); the score on the subject test for literature in English is optional
3. For nonnative speakers: a minimum score of 600 on the paper-based Test of English as a Foreign Language (TOEFL) or a minimum score of 100 on the Internet-based version

Admission procedures are the same as for MA degrees. The application deadline is December 15; candidates are admitted only for fall term.

Residency Requirements

The Graduate School requires at least three years of full-time work beyond the bachelor's degree for the doctorate with at least one year spent in continuous residence on the Eugene campus. The Graduate School requires three consecutive terms (fall, winter, spring) with a minimum of 9 graduate credits of formal course work per term for the PhD year of residency; graduate employees (GEs) must also enroll for a minimum of 9 graduate credits each term they hold a GE appointment.

Doctor of Philosophy Degree Requirements

Code	Title	Credits
ENG 614	Introduction to Literary and Cultural Theory	5
ENG 690	Introduction to Graduate Studies in English	5

Select two of the following: ¹

Pre-1500 course

1500-1660 course

1660-1800 course

Select two of the following: ¹

19th century course

20th century course

Rhetoric or advanced theory course

Twelve seminars ²

¹ Film and folklore courses are included under the appropriate time period.

² The seminars, constituting the individual plan of study, may be distributed among any areas, and the plan must be approved by the student's graduate faculty advisor and the director of graduate studies before the second year of study.

Graduate course work should be completed at the 600 level. Exceptions to this policy must be made in advance by the director of graduate studies in consultation with the individual faculty advisor.

A cumulative GPA of 3.50 or better in all graduate work at the UO is the minimum requirement for satisfactory progress toward the PhD.

Second Language

The graduate language requirement for the doctoral degree is reading competence in two non-English languages or high proficiency in one. Reading competence may be demonstrated in each of two foreign languages as specified under the language requirement for the MA degree. High proficiency may be demonstrated by a grade of A- or better in an approved 400-, 500-, or 600-level literature course, with readings in the target language; scoring at the required levels on the College Level Examination Program (CLEP) test; or passing the Toronto Medieval Latin examination at the PhD level.

Students may petition the graduate committee to test in languages that don't fit the above criteria.

Teaching

Doctoral candidates must have experience as classroom teachers in the department before they receive the degree.

Structured Emphasis

Students may define their individual plan of study according to one of seven structured emphasis options: ethnic literary studies, film studies, folklore, literature and the environment, medieval studies, poetry and poetics, or rhetoric and composition. Each emphasis has a focused set of courses and a special section.

Breadth Examination

Doctoral candidates must take the PhD breadth examination at the beginning of the third year of study, or, if they enter with 6 or more transfer credits, at the beginning of the second year of study. The student and the student's advisor select two examination fields chosen for proximity to and/or importance for the separate, primary research field and project. These fields may provide broad familiarity with readings, texts, or methods that will inform dissertation research, and may also develop areas of relevant professional or teaching competence. They may include historical fields adjacent to the primary research field; genres; or areas of critical theory. The examination includes written (take-home) and oral components based on reading lists generated by the student in consultation with faculty examiners and approved by the Graduate Committee. A student must pass the breadth examination in order to take the PhD major field examination, administered the following year. Students who fail either written portion of the breadth examination do not take the oral portion until they have retaken and passed the failed written part; retakes will occur at the end of that term, postponing the PhD major field examination to the following term.

Major Field Examination

After students in the PhD program have completed their course work, they must take a two-and-a-half-hour major field examination. Typically taken fall term following completion of all course work and the language requirement, the major field examination provides each student with the opportunity to present and defend a short paper on a topic related to the dissertation. The examination also allows the student to demonstrate expertise in his or her field of specialization. It is divided into two parts:

1. A discussion of a relatively broad field of study that provides a context for the topic or problem examined in part two
2. A prepared presentation by the student on a topic or problem of the student's choice that is related to the dissertation, followed by a discussion of that topic

The topic and areas covered by the major field examination are defined, in the form of a project description and reading list, by the student in consultation with an advisor or advisors and must be approved by the English department graduate committee. As a supplement to the major field examination, a student may choose to complete a one- to two-hour written examination on part two. The major field examination may be retaken only once.

PhD Dissertation

After completing all other degree requirements, the candidate should consult with a faculty advisor willing to work in the area of the student's interest and submit a dissertation prospectus for approval by the student's dissertation committee. Once the prospectus is approved by the committee and the director of graduate studies, the student is advanced to candidacy. A three-year period for completion of the dissertation begins when the Graduate School approves the advancement to candidacy.

The dissertation may be a work of literary, film, folklore, or linguistic scholarship or, with the approval of the committee, a collection of three substantial essays exhibiting internal coherence though not necessarily treating a single subject. The candidate gives an oral presentation or defense of the dissertation when it is completed and found acceptable by the committee.

Certificate in Writing, Public Speaking, and Critical Reasoning

The English department's certificate in writing, public speaking, and critical reasoning is available to all University of Oregon undergraduates in any minor.

A certificate in writing, public speaking, and critical reasoning requires 36 credits as follows:

Code	Title	Credits
Select three courses in writing (at least one at the 400 level):		12
ENG 413	Theories of Literacy	
ENG 420	The Art of the Sentence	
WR 123	College Composition III	
WR 320	Scientific and Technical Writing	
WR 321	Business Communications	
WR 423	Advanced Composition	
Select three courses in rhetoric (at least one of which must be ENG 200 or ENG 330):		12
ENG 200	Public Speaking as a Liberal Art	
	or ENG 330 Oral Controversy and Advocacy	
ENG 491		
ENG 492	History of Rhetoric and Composition	
ENG 493	Modern Rhetorical Criticism	
Select two courses in reasoning:		8
ENG 335	Inventing Arguments	
PHIL 103	Critical Reasoning	
PHIL 325	Logic, Inquiry, and Argumentation	
One capstone course:		4
ENG 494	Reasoning, Speaking, Writing ¹	
Total Credits		36

¹ (ENG 491) may serve as the capstone course in years when Reasoning, Speaking, Writing (ENG 494) is not taught.

English Courses

ENG 104. Introduction to Literature: Fiction. 4 Credits.

Works representing the principal literary genres.

ENG 105. Introduction to Literature: Drama. 4 Credits.

Works representing the principal literary genres.

ENG 106. Introduction to Literature: Poetry. 4 Credits.

Works representing the principal literary genres.

ENG 107. World Literature. 4 Credits.

Reading and analysis of selected works in a global survey of ancient literatures, 2500 BCE–1500 CE.

ENG 108. World Literature. 4 Credits.

Reading and analysis of selected works in a global survey of the early modern period to the industrial revolution, 1500 CE–1789 CE.

ENG 109. World Literature. 4 Credits.

Reading and analysis of selected works in a global survey from the industrial revolution onward, 1789 CE–present.

ENG 110M. Introduction to Film and Media. 4 Credits.

Introduction to film and media studies and various methods of critical analysis. Multilisted with CINE 110M.

ENG 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ENG 200. Public Speaking as a Liberal Art. 4 Credits.

Study and practice of public speaking as grounded in the five rhetorical canons of invention, arrangement, style, delivery, and memory. Prereq: WR 122 or equivalent.

ENG 200M. Temporary Multilisted Course. 4 Credits.**ENG 205. Genre: [Topic]. 4 Credits.**

Traces the historical development and transformations of key genres for the study of English and American literature and culture, including canonical and popular literary as well as media forms. Repeatable once for a maximum of 8 credits when topic changes.

ENG 207. Shakespeare. 4 Credits.

The major plays in chronological order with emphasis on the early and middle plays through "Hamlet."

ENG 208. Shakespeare. 4 Credits.

The major plays in chronological order with emphasis on the later plays beginning with "Twelfth Night."

ENG 209. The Craft of the Sentence. 4 Credits.

Study of basic sentence mechanics, grammatical terminology, and the conventions of punctuation. Includes some historical background on the development of English grammar. Students cannot receive credit for both ENG 209 and LING 494.

ENG 225. Age of King Arthur. 4 Credits.

Introduction to the literature of the Middle Ages set against the backdrop of medieval culture.

ENG 230. Introduction to Environmental Literature. 4 Credits.

Introduction to literature that examines the human place in the natural world. Consideration of how writers understand environmental crises and scientific ideas of their generation.

ENG 240. Introduction to Disability Studies. 4 Credits.

Introduces students to central concepts and essential texts in disability studies and applies them to literary and cultural texts, with a focus on racial diversity and learning directly from writers and scholars who experience a wide spectrum of bodymind variabilities.

ENG 241. Introduction to African American Literature. 4 Credits.

African American literature and culture in relevant intellectual, social, and historical contexts.

ENG 242. Introduction to Asian American Literature. 4 Credits.

Asian American literature and culture in relevant intellectual, social, and historical contexts.

ENG 243. Introduction to Chicano and Latino Literature. 4 Credits.

Chicano and Latino literature and culture in relevant intellectual, social, and historical contexts.

ENG 244. Introduction to Native American Literature. 4 Credits.

Native American literature and culture in relevant intellectual, social, and historical contexts.

ENG 245. Introduction to Ethnic American Literature: [Topic]. 4 Credits.

American ethnic literature and culture in relevant intellectual, social, and historical contexts. Repeatable once when topic changes for a maximum of 8 credits.

ENG 250. Literature and Digital Culture. 4 Credits.

This course will focus on the intersection of digital culture and literary studies. Students will learn how to use digital tools to study literature. Simultaneously, they will use literary analysis approaches to study contemporary digital culture.

ENG 260M. Media Aesthetics. 4 Credits.

Introduction to the analysis of form and style in cinema and related media, focusing on narrative, mise-en-scène, cinematography, editing, and sound. Multilisted with CINE 260M.

ENG 280. Introduction to Comic Studies. 4 Credits.

Introduction to the art of comics and the methodologies of comics studies.

ENG 300. Introduction to Literary Criticism. 4 Credits.

Various techniques and approaches to literary criticism (e.g., historical, feminist, formalist, deconstructionist, Freudian, Marxist, semiotic) and their applications.

Prereq: sophomore standing.

ENG 303. Foundations of the English Major: Text. 4 Credits.

Chronological study of literary and media works in English, beginnings to the present, emphasizing analytic reading and writing skills. Series with ENG 304, ENG 305.

Prereq: ENG 301 or ENG 302.

ENG 304. English Major Foundations: Context. 4 Credits.

Chronological study of literary and media works in English, from beginnings to the present, emphasizing their cultural and historical contexts. Sequence with ENG 303, ENG 305.

Prereq: ENG 205, ENG 303

ENG 305. English Major Foundations: Theory. 1-4 Credits.

Chronological study of literary and media works in English, beginnings to the present, emphasizing analytic reading and writing skills. Sequence with ENG 303, ENG 304.

Prereq: ENG 205

ENG 313. Teen and Children's Literature. 4 Credits.

Books for young readers, their social implications and historical context, from the 19th century to the present. This is a service learning course, which explores the interplay between the classroom experience and the co-requisite internship volunteering with youth at K-12 schools and nonprofit agencies.

Prereq: sophomore standing.

ENG 316. Women Writers' Forms: [Topic]. 4 Credits.

Women's writing in a particular genre or form (prose, fiction, drama, poetry, autobiography, folksong) examined in the context of current feminist literary theories. Repeatable when topic changes.

Prereq: sophomore standing.

ENG 321. English Novel. 4 Credits.

Rise of the novel from Defoe to Austen.

ENG 322. English Novel. 4 Credits.

Rise of the novel from Scott to Hardy.

ENG 323. English Novel. 4 Credits.

Rise in the novel from Conrad to the present.

ENG 325. Literature of the Northwest. 4 Credits.

Survey of significant Pacific Northwest literature as set against the principles of literary regionalism. Offered alternate years.

Prereq: Sophomore standing.

ENG 330. Oral Controversy and Advocacy. 4 Credits.

In-depth study of the habits of research, reasoning, selection, and presentation necessary for ethical and effective oral advocacy on contested topics. Not open to freshmen.

Prereq: WR 122 or equivalent.

ENG 335. Inventing Arguments. 4 Credits.

Analysis and use of patterns of reasoning derived from the disciplines of rhetoric, informal logic, cognitive science, and the theory of argumentation.

Prereq: WR 122 or WR 123.

ENG 340. Jewish Writers. 4 Credits.

Forms and varieties of fiction, poetry, and drama by Jewish writers from the 19th century to the present.

ENG 360. African American Writers. 4 Credits.

Examines the origins and development of African American literature and culture in relevant intellectual, social, and historical contexts.

Prereq: sophomore standing.

ENG 361. Native American Writers. 4 Credits.

Examines the origins and development of Native American literature and culture in relevant intellectual, social, and historical contexts. Course will be taught once or more per academic year.

Prereq: Sophomore standing.

ENG 362. Asian American Writers. 4 Credits.

Examines the origins and development of Asian American literature and culture in relevant intellectual, social, and historical contexts. Course will be taught once or more per academic year.

Prereq: Sophomore standing.

ENG 363. Chicano and Latino Writers. 4 Credits.

Examines the origins and development of Chicano and Latino literature and culture in relevant intellectual, social, and historical contexts. Course will be taught once or more per academic year.

Prereq: Sophomore standing.

ENG 364. Comparative Ethnic American Literatures. 4 Credits.

Comparative examination of major issues in African, Asian, Chicano, and Native American literatures and cultures in relevant contexts. Course will be taught once or more per academic year.

Prereq: Sophomore standing.

ENG 380. Film, Media, and History. 4 Credits.

Study of the history of institutions and industries that shape production and reception of film and media.

ENG 381M. Film, Media, and Culture. 4 Credits.

Study of film and media as aesthetic objects shaped by a broad range of identity categories, reflecting communities identified by class, gender, race, ethnicity, and sexuality. Multilisted with CINE 381M.

ENG 385. Graphic Narratives and Cultural Theory. 4 Credits.

Survey of 20th- and 21st- century graphic novels in the context of cultural theory. Sophomore standing required. Offered alternate years.

ENG 386. Bodies in Comics. 4 Credits.

Examines questions and representations of bodily identity in comics through the lenses of disability studies and gender theory.

ENG 391. American Novel. 4 Credits.

Development of the American novel from its beginnings to 1900.

ENG 392. American Novel. 4 Credits.

Development of the American novel from 1900 to present.

ENG 394. 20th-Century Literature. 4 Credits.

Modern literature from American, British, and European cultures, 1890 to 1945. Significant works of poetry, fiction, drama, and nonfiction in relation to intellectual and historical developments.

ENG 395. 20th-Century Literature. 4 Credits.

Modern literature from American, British, and European cultures, 1945 to present. Significant works of poetry, fiction, drama, and nonfiction in relation to intellectual and historical developments.

ENG 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

Prereq: sophomore standing.

ENG 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ENG 401. Research: [Topic]. 1-21 Credits.

Repeatable.

Prereq: junior standing.

ENG 403. Thesis. 1-12 Credits.

Repeatable.

Prereq: junior standing.

ENG 404. Internship: [Topic]. 1-6 Credits.

On- or off-campus internship in a variety of writing or literacy-related settings in connection with designated courses. Repeatable.

Prereq: junior standing.

ENG 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

Prereq: junior standing.

ENG 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Selected seminars offered each year.

ENG 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

Prereq: junior standing.

ENG 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Selected topics offered each year.

Prereq: junior standing.

ENG 413. Theories of Literacy. 4 Credits.

Approaches to literacy through literary theory, rhetoric and cultural studies. Examines issues involved with school and community literacy. Pre- or coreq: ENG 404 Internship: Community Literacy; junior standing.

ENG 419. Contemporary Literary Theory. 4 Credits.

Developments in critical thinking after the New Criticism.

Prereq: Junior standing.

ENG 420. The Art of the Sentence. 4 Credits.

Analysis of English grammar and style in literary and academic contexts. Offered alternate years.

Prereq: junior standing.

ENG 423. The Age of Beowulf. 4 Credits.

A reading of Anglo-Saxon literature and culture as the intersection of Germanic, Celtic, and Christian traditions. Readings include Irish epic, Welsh romance, Norse mythology, and Icelandic saga.

Prereq: Junior standing.

ENG 425. Medieval Romance. 4 Credits.

Study of selected romances in the context of European intellectual and social history. May include elementary linguistic introduction to Middle English.

Prereq: Junior standing.

ENG 427. Chaucer. 4 Credits.

Close textual study of selected Canterbury Tales in Middle English; instruction in the grammar and pronunciation of Chaucer's language.

Prereq: Junior standing.

ENG 428. Old English I. 4 Credits.

Introduction to Old English language. Sequence with ENG 429, 430.

Prereq: Junior standing.

ENG 429. Old English II: [Topic]. 4 Credits.

Study of Old English prose or poetry in the original language. Sequence with ENG 428, 430. Repeatable twice when topic changes.

Prereq: ENG 428.

ENG 430. Old English III: [Topic]. 4 Credits.

Study of Beowulf or works by other major Old English authors in the original language. Sequence with ENG 428, 429. Repeatable twice when topic changes.

Prereq: ENG 429

ENG 434. Spenser. 4 Credits.

Examines the works of Edmund Spenser.

Prereq: Junior standing.

ENG 436. Advanced Shakespeare. 4 Credits.

Detailed study of selected plays, poetry, or both.

Prereq: Junior standing.

ENG 442. Milton. 4 Credits.

"Paradise Lost," "Paradise Regained," and "Samson Agonistes."

Prereq: Junior standing.

ENG 448. Restoration and 18th-Century Literature. 4 Credits.

Johnson and his circle; classic to romantic; relations between England and the Enlightenment in France.

ENG 452. 19th-Century British Fiction: [Topic]. 4 Credits.

Close study of selected novels. Repeatable once when topic changes for maximum of 8 credits.

ENG 454. English Romantic Writers. 4 Credits.

Romantic thought and expression. The first generation including Blake, Coleridge, Dorothy and William Wordsworth.

Prereq: Junior standing.

ENG 455. English Romantic Writers. 4 Credits.

Romantic thought and expression. The second generation including Byron, Keats, Mary and Percy Shelley. Junior standing required.

ENG 457. Victorian Literature and Culture: [Topic]. 4 Credits.

Exploration of major works, figures, controversies, social and cultural issues. Readings in Victorian fiction, poetry, drama, and nonfictional prose; study of examples of the visual arts and popular culture.

Repeatable when topic changes for maximum of 8 credits.

Prereq: Junior standing.

ENG 461. American Literature to 1800. 4 Credits.

Readings in American poetry, nonfiction prose, drama, and fiction.

Prereq: Junior standing.

ENG 462. American Literature, 1800-1900. 4 Credits.

Readings primarily in American poetry, nonfiction prose, drama, and fiction.

Prereq: Junior standing.

ENG 467. American Literature, 1900-Present. 4 Credits.

Readings in American poetry, nonfiction prose, drama, and fiction.

Prereq: Junior standing.

ENG 468. Ethnic Literature: [Topic]. 4 Credits.

Advanced study of one or more authors or literary genres related to ethnic literature including African, Native, Asian, or Chicano American.

Repeatable twice when topic changes for a maximum of 12 credits.

Prereq: junior standing.

ENG 469. Literature and the Environment: [Topic]. 4 Credits.

In-depth study of various topics related to literature and the environment including Bioart/Bioethics, Biosemiotics, Critical Animal Studies, Food Culture, Ideas of Wilderness, Rhetoric of Nature Writing, Virtual Ecologies. Repeatable thrice when topic changes for maximum of 16 credits.

Prereq: Junior standing.

ENG 470. Technologies and Texts Capstone. 4 Credits.

This course examines the way humanities disciplines use digital technologies to forge a new role in the public sphere, exploring how digital and print cultures (re)shape forms of cultural expression and knowledge production. Students will create their own digital projects in this course.

Prereq: ENG 250 with a grade of C.

ENG 479. Major Authors: [Topic]. 4 Credits.

In-depth study of one to three major authors from medieval through modern periods. Repeatable.

Prereq: Junior standing.

ENG 480. Modern American Superhero. 4 Credits.

Examination of the path of the American comic book superhero and an exploration of the ways in which that journey reflects large processes of social change.

ENG 485. Television Studies. 4 Credits.

Study of television's institutional contents and representational practices, including such television genres as serials, news, and reality TV. Offered alternate years.

ENG 486M. New Media and Digital Culture: [Topic]. 4 Credits.

Study of emerging media forms and techniques, such as digital cinema, video games, viral videos, and interactive media. Offered alternate years. Repeatable twice for a maximum for 12 credits. Multilisted with CINE 486M.

ENG 488. Race and Representation in Film: [Topic]. 4 Credits.

Screening, interpretation, and analysis of films from developing non-European cultures and by people of color. Mechanisms of racism in dominant U.S. media. Repeatable twice for a maximum of 12 credits.

Prereq: Junior standing.

ENG 492. History of Rhetoric and Composition. 4 Credits.

History of rhetoric as related to the theory and practice of writing, relations between rhetoric and poetics, and rhetorical criticism through the 19th century.

Prereq: Junior standing.

ENG 493. Modern Rhetorical Criticism. 4 Credits.

Theoretical topics addressed by 20th-century rhetorical critics. Varieties of rhetorical interpretation, from neo-Aristotelian to reader-response, postmodernist views of metaphor.

Prereq: Junior standing.

ENG 494. Reasoning, Speaking, Writing. 4 Credits.

Application of advanced study in argumentation theory, particularly procedural standards of rationality developed in recent argumentation studies, to selected public policy controversies.

ENG 496. Feminist Film Criticism: [Topic]. 4 Credits.

Critical analysis of film and television texts from a feminist perspective. Repeatable when topic changes.

Prereq: Junior standing.

ENG 503. Thesis. 1-16 Credits.

Repeatable.

ENG 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Selected seminars offered each year.

ENG 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

ENG 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Selected topics offered each year.

ENG 513. Theories of Literacy. 4 Credits.

Approaches to literacy through literary theory, rhetoric and cultural studies. Examines issues involved with school and community literacy. Pre- or coreq: ENG 604.

ENG 519. Contemporary Literary Theory. 4 Credits.

Developments in critical thinking after the New Criticism.

ENG 520. The Art of the Sentence. 4 Credits.

Analysis of English grammar and style in literary and academic contexts. Offered alternate years.

ENG 528. Old English I. 4 Credits.

Introduction to Old English language. Sequence with ENG 529, 530.

ENG 529. Old English II: [Topic]. 4 Credits.

Study of Old English prose or poetry in the original language. Sequence with ENG 528, 530. Repeatable twice when topic changes.

Prereq: ENG 4/528.

ENG 530. Old English III: [Topic]. 4 Credits.

Study of Beowulf or works by other major Old English authors in the original language. Sequence with ENG 528, 529. Repeatable twice when topic changes.

Prereq: ENG 4/529.

ENG 534. Spenser. 4 Credits.

Examines the works of Edmund Spenser.

ENG 536. Advanced Shakespeare. 4 Credits.

Detailed study of selected plays, poetry, or both.

ENG 542. Milton. 4 Credits.

"Paradise Lost," "Paradise Regained," and "Samson Agonistes."

ENG 548. Restoration and 18th-Century Literature. 4 Credits.

Johnson and his circle; classic to romantic; relations between England and the Enlightenment in France.

ENG 552. 19th-Century British Fiction: [Topic]. 4 Credits.

Close study of selected novels. Repeatable once when topic changes for maximum of 8 credits.

ENG 554. English Romantic Writers. 4 Credits.

Romantic thought and expression. The first generation including Blake, Coleridge, Dorothy and William Wordsworth.

ENG 555. English Romantic Writers. 4 Credits.

Romantic thought and expression. The second generation including Byron, Keats, Mary and Percy Shelley.

ENG 557. Victorian Literature and Culture: [Topic]. 4 Credits.

Exploration of major works, figures, controversies, social and cultural issues. Readings in Victorian fiction, poetry, drama, and nonfictional prose; study of examples of the visual arts and popular culture. Repeatable when topic changes for maximum of 8 credits.

ENG 561. American Literature to 1800. 4 Credits.

Readings in American poetry, nonfiction prose, drama, and fiction.

ENG 562. American Literature, 1800-1900. 4 Credits.

Readings primarily in American poetry, nonfiction prose, drama, and fiction.

ENG 567. American Literature, 1900-Present. 4 Credits.

Readings in American poetry, nonfiction prose, drama, and fiction.

ENG 568. Ethnic Literature: [Topic]. 4 Credits.

Advanced study of one or more authors or literary genres related to ethnic literature including African, Native, Asian, or Chicano American. Repeatable twice when topic changes for a maximum of 12 credits.

ENG 569. Literature and the Environment: [Topic]. 4 Credits.

In-depth study of various topics related to literature and the environment including Bioart/Bioethics, Biosemiotics, Critical Animal Studies, Food Culture, Ideas of Wilderness, Rhetoric of Nature Writing, Virtual Ecologies. Repeatable thrice when topic changes for maximum of 16 credits.

ENG 570. Technologies and Texts Capstone. 4 Credits.

This course examines the way humanities disciplines use digital technologies to forge a new role in the public sphere, exploring how digital and print cultures (re)shape forms of cultural expression and knowledge production. Students will create their own digital projects in this course.

ENG 579. Major Authors. 4 Credits.

In depth study of one to three major authors from medieval through modern periods. Repeatable.

ENG 580. Modern American Superhero. 4 Credits.

Examination of the path of the American comic book superhero and an exploration of the ways in which that journey reflects large processes of social change.

ENG 585. Television Studies. 4 Credits.

Study of television's institutional contents and representational practices, including such television genres as serials, news, and reality TV. Offered alternate years.

ENG 586M. New Media and Digital Culture: [Topic]. 4 Credits.

Study of emerging media forms and techniques, such as digital cinema, video games, viral videos, and interactive media. Offered alternate years. Repeatable twice for a maximum for 12 credits. Multilisted with CINE 586M.

ENG 588. Race and Representation in Film: [Topic]. 4 Credits.

Screening, interpretation, and analysis of films from developing non-European cultures and by people of color. Mechanisms of racism in dominant U.S. media. Repeatable twice for a maximum of 12 credits.

ENG 592. History of Rhetoric and Composition. 4 Credits.

History of rhetoric as related to the theory and practice of writing, relations between rhetoric and poetics, and rhetorical criticism through the 19th century.

ENG 593. Modern Rhetorical Criticism. 4 Credits.

Theoretical topics addressed by 20th-century rhetorical critics. Varieties of rhetorical interpretation, from neo-Aristotelian to reader-response, postmodernist views of metaphor.

ENG 596. Feminist Film Criticism: [Topic]. 4 Credits.
Critical analysis of film and television texts from a feminist perspective. Repeatable when topic changes.

ENG 601. Research: [Topic]. 1-16 Credits.
Repeatable.

ENG 602. Supervised College Teaching. 1-5 Credits.
Repeatable.

ENG 603. Dissertation. 1-21 Credits.
Repeatable.

ENG 604. Internship: [Topic]. 1-6 Credits.
Repeatable. On- or off-campus internship in a variety of writing or literacy-related settings.

ENG 605. Reading and Conference: [Topic]. 1-16 Credits.
Repeatable.

ENG 607. Seminar: [Topic]. 1-5 Credits.
Repeatable. Selected seminars offered each year.

ENG 608. Workshop: [Topic]. 1-16 Credits.
Repeatable.

ENG 609. Terminal Project. 1-16 Credits.

ENG 610. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

ENG 611. Composition Graduate Teaching Fellow Seminar I. 1-3 Credits.
Issues in pedagogy related to the university's writing requirement.

ENG 612. Composition Graduate Teaching Fellow Seminar II. 1-3 Credits.
Discussions designed to increase the effectiveness of first-year graduate teaching fellows as teachers of courses that fulfill the university's writing requirement.

ENG 613. Graduate Teaching Fellow Composition Apprenticeship. 1-3 Credits.
Supervised practical experience in all aspects of teaching WR 121, 122. Prereq: ENG 611 or equivalent.

ENG 614. Introduction to Literary and Cultural Theory. 5 Credits.
Introduces students to a number of the most important and influential developments in 20th-century literary and cultural theory. Graduate seminar.

ENG 615. Advanced Studies in Literary Theory: [Topic]. 5 Credits.
Intensive study of one to three major theorists or a significant theoretical problem. Repeatable.

ENG 620. Medieval Literature: [Topic]. 5 Credits.
Recent offerings include Chaucer's *Troilus and Criseyde*, *Humor and Vulgarity in Medieval Literature*. Repeatable.

ENG 630. Renaissance Literature: [Topic]. 5 Credits.
Recent offerings include *Hamlet*, *Jacobean Potboilers*, *Renaissance Irrationalities*. Repeatable.

ENG 645. 18th-Century Literature: [Topic]. 5 Credits.
Intensive study of one to three major authors or selected topics from the 18th century. Recent offerings include *Enlightenment and Revolution*. Repeatable.

ENG 650. 19th-Century Literature: [Topic]. 5 Credits.
Recent topics include *Scottish Fiction and Cultural Nationalism*, *Heroine and the English Novel*. Repeatable.

ENG 660. American Literature: [Topic]. 5 Credits.
Recent offerings include *African American Women Writers*, *Evolutionary Theories and Narrative*, *Sentimental Novel*, *V. Deloria and Native American Cultural Values*. Repeatable.

ENG 670. Modern Literature: [Topic]. 5 Credits.
Recent offerings include *H. James*, *Modernist Politics*, *Environmental Humanities*, *Postmodernism*. Repeatable.

ENG 690. Introduction to Graduate Studies in English. 5 Credits.
Examination of selected professional, methodological, and theoretical issues.

ENG 691. Composition Theory: [Topic]. 5 Credits.
Intensive study of topics related to rhetorical theory and the teaching of writing. Repeatable.

ENG 695. Film Studies: [Topic]. 5 Credits.
Intensive study of selected topics related to film studies and literature. Recent topics include *Introduction to Film Theory*; *Feminism*, *Comedy*, and the *Carnavalesque*; *Melodrama*. Repeatable.

Writing Courses

WR 121. College Composition I. 4 Credits.
Written reasoning as discovery and inquiry. Frequent essays explore relationship of thesis to structure and audience. Strong focus on the process of revising. Regular work on editing. Prereq: SAT Reading and Writing scores both below 37, or SAT verbal score below 710 if taken before March 2016, or ACT verbal score below 32, or equivalent.

WR 122. College Composition II. 4 Credits.
Written reasoning as a process of argument. Developing and supporting theses in response to complex questions. Attention to critical reading in academic setting. Continuing focus on revising and editing. Prereq: WR 121 or equivalent.

WR 123. College Composition III. 4 Credits.
Written reasoning in the context of research. Practice in writing documented essays based on the use of sources. Continuing focus on revising and editing. Prereq: WR 121 or equivalent.

WR 195. Writing Tutorial. 1 Credit.
Provides students concurrently enrolled in WR 121 with one-on-one tutoring. Enrollment priority based on entrance exam (SAT or ACT) scores. Repeatable once. Coreq: WR 121.

WR 198. Independent Writing Project. 1-3 Credits.
Repeatable. Supervised writing projects in nonfiction prose. Prereq: WR 122 or equivalent.

WR 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

WR 312. Principles of Tutoring Writing. 4 Credits.
The practice and ethics of tutoring writing in the context of writing in various academic disciplines. Theories of teaching, tutoring techniques, and assessment of writing.

WR 320. Scientific and Technical Writing. 4 Credits.
Emphasis on form, function, and style of scientific, professional, and technical writing; weekly writing assignments include proposals, reports, definitions, instructions, summaries. Use of documentation in publication. Prereq: completion of university writing requirement; junior standing.

WR 321. Business Communications. 4 Credits.

Practice in writing and analyzing internal and external messages common to business, industry, and professions. Suggested for business and management students.

Prereq: completion of university writing requirement; junior standing.

WR 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

Prereq: sophomore standing.

WR 408. Independent Writing Projects. 1-3 Credits.

Supervised writing projects in nonfiction prose. Repeatable.

WR 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

Prereq: Junior standing.

WR 423. Advanced Composition. 4 Credits.

Emphasis on critical thinking skills and rhetorical strategies for advanced written reasoning in different academic disciplines.

Prereq: Completion of University Writing Requirement; junior standing.

WR 508. Independent Writing Projects. 1-3 Credits.

Supervised writing projects in nonfiction prose. Repeatable.

Environmental Studies

Mark Carey, Program Director

541-346-5000

541-346-5954 fax

144 Columbia Hall

5223 University of Oregon

Eugene, Oregon 97403-5223

Environmental studies crosses the boundaries of traditional disciplines in the natural sciences, social sciences, humanities, management, policy, design, and law. It challenges faculty members and students to look at the relationship between humans and their environment from new perspectives. The Environmental Studies Program is dedicated to gaining greater understanding of the natural world from an ecological perspective; devising policies and behaviors that address contemporary environmental problems; and promoting a rethinking of basic cultural premises, ways of structuring knowledge, and the root metaphors of contemporary society.

Faculty

Core faculty members listed in the faculty list have dedicated responsibilities in the program. Participating faculty members have demonstrated professional interests in environmental studies by researching environmental issues, teaching courses that meet program requirements, or participating in a variety of program activities on a voluntary basis. They are all available to advise students who are interested in environmental studies. More information about the faculty is available on the program website.

Resources

The program's resource center has a limited collection of books related to environmental topics. University of Oregon students and members of the faculty and staff may borrow items for up to two weeks.

Faculty

Brendan J. M. Bohannon, associate professor (microbial ecology). See **Biology**.

Peg Boulay, senior instructor (environmental monitoring, wildlife conservation, outreach and education); codirector, environmental leadership. BS, 1989, Furman; MS, 1992, Florida. (2009)

Scott D. Bridgham, professor (ecosystem ecology, climate change). See **Biology**.

Trudy Ann Cameron, Raymond F. Mikesell Professor of Environmental and Resource Economics (environmental economics). See **Economics**.

Mark Carey, professor (glaciers, climate change, natural disasters). See **Robert Donald Clark Honors College**.

Matthew Dennis, professor (colonial and early national America, American cultural and environmental history, American Indian history). See **History**.

Lauren Hallett, assistant professor (plant community and restoration ecology). See **Biology**.

Stephanie LeMenager, Barbara and Carlisle Moore Distinguished Professor in English and American Literature. See **English**.

Kathryn A. Lynch, senior instructor (environmental leadership, tropical conservation, environmental education); codirector, environmental leadership. BS, 1992, California, Davis; MA, 1995, PhD, 2001, Florida. (2005)

Kathy Lynn, research assistant (Tribal Climate Change Project).

Richard D. Margerum, associate professor (collaborative environmental management, conflict management in multistakeholder processes). See **Planning, Public Policy and Management**.

Galen Martin, senior instructor (sustainable agriculture, food systems).

Patricia F. McDowell, professor (river management and restoration); director, graduate studies. See **Geography**.

Ronald B. Mitchell, professor (environmental politics, international relations). See **Political Science**.

Erin Moore, associate professor (life-cycle environmental impacts). See **Architecture**.

Nicolae Morar, assistant professor (applied ethics, recent continental philosophy, philosophy of biology). See **Philosophy**.

Barbara Muraca, assistant professor (human-nature relationships, ecosystem services valuation, sustainability theory). See **Philosophy**.

Kari Norgaard, professor (environmental justice, climate-change denial). See **Sociology**.

Alexandra Rempel, assistant professor (environmental design, passive heating and cooling). MArch, 2009, Oregon; PhD, 1996, Massachusetts Institute of Technology. (2011)

Joshua J. Roering, associate professor (geomorphology, landscape evolution modeling). See **Earth Sciences**.

Kory Russel, acting assistant professor (sustainable design; water, public health, and environment). See **Landscape Architecture**.

Emily Scott, assistant professor (art and the public sphere, critical approaches to the built environment, visual cultures of nature). See **History of Art and Architecture**.

Lucas Silva, assistant professor (terrestrial ecology, biogeochemistry, biogeography). BA, 2005, Brasilia; MS, 2007, Miami; PhD, 2011, Guelph. (2016)

David Sutherland, assistant professor (ice-ocean interaction, coastal and estuarine oceanography). See **Earth Sciences**.

Sarah Wald, associate professor (race and ethnic studies, environmental humanities).

Peter A. Walker, professor (environmental politics, political ecology). See **Geography**.

Marsha Weisiger, Rocky and Julie Dixon Chair of U.S. Western History; associate professor (environmental, Native American, American West). See **History**.

Stephen Wooten, associate professor (international and food studies). See **International Studies**.

Richard York, associate professor (assessing anthropogenic driving forces of global environmental change). See **Sociology**.

Emeritus

Alan Dickman, professor emeritus. See **Biology**.

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Minor in Environmental Studies**

Undergraduate Studies

The program offers undergraduate instruction through two majors, leading to a bachelor of arts (BA) or a bachelor of science (BS) degree. A minor in environmental studies is also offered.

Both majors provide a broad, solid, interdisciplinary perspective on the relationship between humans and nature. Their goals are to develop awareness of environmental issues and to develop an understanding of the nature and scope of the forces underlying environmental problems, the various approaches used to bring environmental problems to the public's attention, and the methods and approaches used to solve these problems.

Majors gain an appreciation of the interdisciplinary nature of environmental studies, and they master content and skills associated with a number of different disciplines.

Majors and minors have considerable latitude in designing a course of study that combines theory and practice, invites active participation, and fits specific interests, needs, and aptitudes. The majors, which provide a well-rounded basic education, prepare students for entry-level positions in business, government, nongovernmental and nonprofit organizations, and for a variety of graduate and professional degree programs. Students are encouraged to take advantage of career planning services offered by the University Career Center.

The environmental studies major focuses on social sciences, policy studies, the humanities, and sustainable design. It is designed for students who are interested in such areas as environmental policy,

planning, ethics or philosophy, ecocriticism, ecofeminism, environmental justice, sustainable development, international environmental issues, or social theory and the environment.

The environmental science major is designed for students who want to focus on scientific careers in conservation biology, climate science, pollution prevention and abatement, or ecosystem protection, restoration, and management.

Students should plan their programs early in their undergraduate careers with the aid of an environmental studies academic advisor. Majors are urged to consider completing a second major or a minor in a related field. The program offers drop-in student advising in the main office.

Up-to-date information, major requirements sheets, and tip sheets are available in the program office and on the website.

Major Requirements

The environmental studies curriculum is designed to provide a solid foundation in the sciences, social sciences, and humanities; to build on these foundations in advanced course work in a variety of disciplines; to develop the skills necessary to study human-environment interactions; and to encourage participation in experiential learning activities that help students prepare for active participation in the work force and in local and global communities. Students should have a strong foundation in written and verbal skills.

Courses applied to the major, except environmental studies courses numbered 401 through 409, must be taken for letter grades and passed with grades of C– or better. As many as four upper-division courses may be used to fulfill requirements of another major. At least 24 credits must be taken at the University of Oregon.

Bachelor of Arts in Environmental Studies

Upper-division credit may be earned through course work or through a combination of course work and an honors thesis. Major requirements sheets containing detailed information about specific courses that meet the major requirements are available on the program website (<http://envs.uoregon.edu/undergrad/envsfocus>), in the program office, or from an environmental studies advisor.

Code	Title	Credits
Lower-Division Core Courses		
ENVS 201	Introduction to Environmental Studies: Social Sciences	4
ENVS 202	Introduction to Environmental Studies: Natural Sciences	4
ENVS 203	Introduction to Environmental Studies: Humanities	4
Lower-Division Mathematics and Science Courses		
MATH 111	College Algebra ¹	4
	Approved statistics course	4
	Approved introductory sequence in natural science	12
	Course from different natural science sequence or from the list of approved science courses	4
Upper-Division Natural Science Courses		
	Two upper-division natural science courses from the major requirements sheet	8
Upper-Division Social Science, Policy, Humanities, and Design Courses		

Social science core course	4
Policy core course	4
Humanities core course	4
Design core course	4
Six additional courses: three from one of the above areas; three from another	24
Environmental Issues Course	
ENVS 411 Environmental Issues: [Topic]	4
or ENVS 425 Environmental Education Theory and Practice	
or ENVS 427 Environmental and Ecological Monitoring	
Practical Learning Experience	
Choose from one of several approved practical learning experience options. These include internships, participation in the Environmental Leadership Program, research experiences with UO faculty members, honors thesis, courses at field stations, study-abroad opportunities, or IE3 internships.	4
Total Credits	92

¹ Recommended course; however, a university-level mathematics course that counts toward the bachelor of science mathematics requirement fulfills the requirement.

Bachelor of Science in Environmental Studies

Options for Majors

Environmental Leadership Program

Through the Environmental Leadership Program, students team up with local businesses, nonprofit organizations, and government agencies to work on environmental projects. Students learn professional research, writing, and presentation skills as they develop a network of professional relationships in the region. Participants make a two- or three-term

commitment, for which they earn 8–12 upper-division credits. These credits satisfy upper-division requirements for the environmental studies and environmental science majors.

Internships

By offering academic credit for environmentally focused work experience, the internship program allows students to connect their academic studies with practical applications. Internship positions must involve significant work with an environmental focus. Potential internship sponsors include public interest nonprofits, government agencies, and private corporations. Students are expected to be self-motivated and arrange their own positions in their areas of particular interest. However, if a student needs assistance finding an appropriate position program, the internship coordinator can help identify potential opportunities. Students may take 18 credits of Field Studies: [Topic] (ENVS 196), Internship: [Topic] (ENVS 404), or both. To fulfill the practical learning experience requirement, students take 4 credits (which translates to 120 hours) of internship service.

Honors

Students who want to graduate with honors in environmental science or environmental studies must have a 3.30 overall grade point average (GPA) and a 3.50 GPA in courses required for the major. Honors candidates must also complete a research-based thesis or creative project under the direction of a faculty advisor. Students preparing to graduate with honors should notify their advisor no later than the first term of their senior year.

Honors students who are not enrolled in the Clark Honors College must earn 8 credits of Research: [Topic] (ENVS 401), Thesis (ENVS 403), or both in environmental studies or another appropriate department. These credits must be distributed over at least two terms. Environmental science majors may substitute these credits for one upper-division natural science elective, environmental studies majors for one upper-division social science or humanities elective. This can also count for the practical learning experience requirement.

Environmental Studies Minor

The interdisciplinary minor in environmental studies includes three lower-division courses and five upper-division elective courses for a minimum of 32 credits. Courses applied to the minor must be taken for letter grades and passed with grades of C– or better. At least 16 of the 40 credits must be taken at the University of Oregon. No more than 8 upper-division credits from the major may be applied to minor requirements. With the advisor's consent, an environmental issues course and a practical learning experience may be substituted for one of the elective courses. Students may also submit a petition to their advisor to substitute one upper-division course for one of the required lower-division courses.

Kindergarten through Secondary Teaching Careers

Students who complete a bachelor's degree with a major in environmental studies or environmental science are eligible to apply for the College of Education's fifth-year licensure program in middle-secondary teaching or the fifth-year licensure program to become an elementary teacher. More information is available from the department's undergraduate advisor; see also the College of Education (p. 734) section in this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- Master of Arts
- Master of Science
- Doctor of Philosophy

Graduate Studies

The Environmental Studies Program offers graduate study leading to the degrees of master of arts (MA) or master of science (MS) in environmental studies, and an interdisciplinary doctor of philosophy (PhD) degree in environmental sciences, studies, and policy.

Students choose courses offered in appropriate disciplines to design a course plan based on individual goals and backgrounds.

Some financial support for graduate students in the Environmental Studies Program is available through graduate teaching fellowships.

Support generally consists of a stipend, health insurance, and a tuition waiver.

Application instructions and materials are available on the program's website.

Application Deadline

Applicants for admission to the master's program must submit all necessary materials online by January 15. New students are accepted for fall term only.

Master of Arts Degree in Environmental Studies

The master of arts degree requires demonstrated proficiency in a second language.

Code	Title	Credits
	Environmental studies graduate core sequence ¹	9
	Concentration area course work ²	24
	Electives	12
	Thesis or terminal project ³	12
Total Credits		57

- ¹ First year.
- ² Graduate-level courses related to environmental studies in each of two 12-credit concentration areas.
- ³ Public defense or presentation required.

Master of Science Degree in Environmental Studies

Code	Title	Credits

Total Credits		57

- ¹ First year.
- ² Graduate-level courses related to environmental studies in each of two 12-credit concentration areas.
- ³ Public defense or presentation required.

Concurrent Master's Degrees Programs

Environmental studies students may obtain concurrent degrees in other disciplines. Applicants must apply separately to each program. For more information, contact the program office.

Doctor of Philosophy Degree in Environmental Sciences, Studies, and Policy

The interdisciplinary PhD degree is offered by the Environmental Studies Program under the umbrella of the Joint-Campus Graduate Program in Environmental Sciences, Studies, and Policy, established by Oregon State University, Portland State University, and the University of Oregon.

The environmental sciences, studies, and policy program takes four or more years of study after earning the master's degree.

Admissions Procedure

Admission to the PhD program must be granted by the Environmental Studies Program and approved by the focal department—another University of Oregon academic unit, chosen by the applicant, that offers a PhD degree. Applications are reviewed independently by the admissions committee in the Environmental Studies Program and in the focal department. Both committees must approve the application before the applicant can be accepted into the program. The online application must be completed and submitted by December 1 for the following fall admission.

Doctor of Philosophy Degree Requirements

Code	Title	Credits
	Focal department course work ¹	NaN
	Environmental studies course work ²	32
	Focal department assessment of competence ³	
	Interdisciplinary assessment of competence ³	
ENVS 603	Dissertation	18

¹ Completion of graduate course work as established by the focal department, which includes basic graduate-level proficiency in research methods appropriate to the designated focal discipline.

² Courses taken in departments or programs outside the focal department. First-year students participate in a sequence of courses required of all incoming environmental studies graduate students.

³ The term "assessment of competence" is used in lieu of "comprehensive examination" in recognition of the different ways in which departments engage in such assessments.

PhD students must satisfy breadth and concentration requirements established by the Environmental Studies Program and the focal department. Working with an advisory committee, each student customizes a plan of action for completion of the degree.

Requirements may vary depending on the chosen focal department. In addition to the course work, candidates are required to complete and defend a written dissertation and receive approval of the dissertation by a committee chosen in accordance with Graduate School regulations. The committee must have at least five members. The chair and two additional members must be from the focal department. At least three members of the committee must be participants in the Environmental Studies Program.

Graduate Courses

Graduate students typically choose courses that contribute to their individual environmental focus from the Departments of Anthropology; Architecture; Biology; Chemistry and Biochemistry; Earth Sciences; Economics; English; Geography; History; Landscape Architecture; Philosophy; Physics; Planning, Public Policy and Management; Political Science; Psychology; and Sociology; from the International Studies Program; from the School of Law; and others. Consult the individual department listings in this catalog for course descriptions.

Courses

ENVS 196. Field Studies: [Topic]. 1-5 Credits.
Repeatable.

ENVS 198. Laboratory Projects: [Topic]. 1-2 Credits.
Repeatable.

ENVS 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

ENVS 201. Introduction to Environmental Studies: Social Sciences. 4 Credits.

Contributions of the social sciences to analysis of environmental problems. Topics include human population, the relationship between social institutions and environmental problems, and appropriate political, policy, and economic processes.

ENVS 202. Introduction to Environmental Studies: Natural Sciences. 4 Credits.

Contributions of the natural sciences to analysis of environmental problems. Topics include biological processes, ecological principles, chemical cycling, ecosystem characteristics, and natural system vulnerability and recovery.

ENVS 203. Introduction to Environmental Studies: Humanities. 4 Credits.

Contributions of the humanities and arts to understandings of the environment. Emphasis on diverse ways of thinking, writing, creating, and engaging in environmental discourse.

ENVS 225. Introduction to Food Studies. 4 Credits.

An exploration of the field of "food studies" and examination of the role of food in historical and contemporary life in the US and around the world.

ENVS 298. Temporary Group-Satisfying Course. 4 Credits.

ENVS 335. Allocating Scarce Environmental Resources. 4 Credits.

Considerations for the design of environmental and natural resources policies and regulations: balancing society's preferences and the costs of environmental protection and resource conservation.

Prereq: MATH 105 or higher.

ENVS 345. Environmental Ethics. 4 Credits.

Key concepts and various moral views surveyed; includes anthropocentrism, individualism, ecocentrism, deep ecology, and ecofeminism. Exploration includes case studies and theory.

ENVS 350. Ecological Footprint of Energy Generation. 4 Credits.

Detailed study of the ecological consequences of all forms of energy generation including fossil fuels and alternative energy sources. Open to environmental science, environmental studies, and planning, public policy and management majors only.

Prereq: ENVS 201, MATH 112.

ENVS 375. Oregon Seminar. 4 Credits.

Students broaden and deepen their understanding of the materials presented in three linked courses: BI 372 Field Biology, GEOL 308 Geology of Oregon and the Pacific Northwest, and HIST 473 American Environmental History: [Topic]. Offered alternate years.

Prereq: junior or senior standing.

ENVS 399. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

ENVS 400M. Temporary Multilisted Course. 1-5 Credits.
Repeatable.

ENVS 401. Research: [Topic]. 1-12 Credits.
Repeatable.

ENVS 403. Thesis. 1-8 Credits.
Repeatable.

ENVS 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

Prereq: Instructor's approval.

ENVS 405. Reading and Conference: [Topic]. 1-18 Credits.

Repeatable.

ENVS 406. Field Studies: [Topic]. 1-12 Credits.

Repeatable.

ENVS 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ENVS 408. Workshop: [Topic]. 1-8 Credits.

Repeatable.

ENVS 409. Practicum: [Topic]. 1-12 Credits.

Repeatable.

ENVS 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ENVS 411. Environmental Issues: [Topic]. 4 Credits.

In depth examination of a particular environmental topic such as global warming, ecosystem restoration, energy alternatives, geothermal development, public lands management, or environmental literature.

Repeatable twice when topic changes for maximum of 12 credits.

Prereq: junior or senior standing.

ENVS 425. Environmental Education Theory and Practice. 4 Credits.

Learning theories, environmental literacy, and the planning, implementation, and evaluation of environmental education programs. Development of teaching materials in collaboration with a community partner for group project.

Prereq: instructor's approval.

ENVS 427. Environmental and Ecological Monitoring. 4 Credits.

Theory, design, and practice of monitoring sampling mapping, field techniques, data collection, management, analysis and presentation methods, local case studies.

ENVS 429. Environmental Leadership: [Topic]. 1-4 Credits.

Partnering with governmental agencies, nonprofit organizations, public schools and local businesses, students develop service learning projects.

Repeatable when topic changes.

Prereq: instructor's approval.

ENVS 435. Environmental Justice. 4 Credits.

Environmental justice and its impact on current decisions. Focus on civil rights law, perception of risk, and relation of sustainability and equity.

Prereq: ENVS 201.

ENVS 450. Political Ecology. 4 Credits.

Examines how social relations and economic, social, and cultural control of natural resources shape human interactions with the environment.

Theory and case studies.

Prereq: ENVS 201.

ENVS 455. Sustainability. 4 Credits.

Examines the evolution of the concept of sustainability and its complex and sometimes problematic uses among scholars, policymakers, environmentalists, and businesses.

Pre- or coreq: ENVS 201; junior or senior standing.

ENVS 465. Wetland Ecology and Management. 4 Credits.

Examines management, law, and policies related to wetlands in an ecological framework; includes wetland type definitions, classification, distribution, formation and development, and restoration.

Prereq: BI 307 or BI 370 or GEOG 360.

ENVS 467. Sustainable Agriculture. 4 Credits.

Examines sustainability issues in agricultural production and current food systems. Focuses on environmental aspects of seed, water, soil, energy, and pest management.

Prereq: ENVS 201 or 202.

ENVS 477. Soil Science. 4 Credits.

Chemical and physical characteristics and classification of soils, field soil identification, soil degradation.

Prereq: CH 111 or 221 or 224H.

ENVS 493M. Passive Cooling. 4 Credits.

Conceptual and quantitative investigations of passive cooling design and performance, including precedents, shading, natural ventilation, evaporative cooling, use of thermal mass, radiant cooling assisted by cold night skies, and control scheduling, supported by field investigations and introductory energy modeling. Multilisted with ARCH 493M.

Prereq: ARCH 491.

ENVS 494M. Passive Heating. 4 Credits.

Conceptual and quantitative investigations of passive solar heating design and performance, including precedents, solar resource evaluation, glazing selection and orientation, thermal mass materials and positioning, movable insulation, and control scheduling, supported by solar site surveys and modeling in EnergyPlus. Multilisted with ARCH 494M.

Prereq: ARCH 491 or Instructor Approval

ENVS 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ENVS 503. Thesis. 1-16 Credits.

Repeatable.

ENVS 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ENVS 508. Workshop: [Topic]. 1-8 Credits.

Repeatable.

ENVS 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ENVS 511. Environmental Issues: [Topic]. 4 Credits.

In-depth examination of a particular environmental topic such as global warming, ecosystem restoration, energy alternatives, geothermal development, public lands management, or environmental literature.

Repeatable twice when topic changes for maximum of 12 credits.

ENVS 525. Environmental Education Theory and Practice. 4 Credits.

Learning theories, environmental literacy, and the planning, implementation, and evaluation of environmental education programs.

Development of teaching materials in collaboration with a community partner for group project.

ENVS 535. Environmental Justice. 4 Credits.

Environmental justice and its impact on current decisions. Focus on civil rights law, perception of risk, and relation of sustainability and equity.

ENVS 550. Political Ecology. 4 Credits.

Examines how social relations and economic, social, and cultural control of natural resources shape human interactions with the environment.

Theory and case studies.

ENVS 555. Sustainability. 4 Credits.

Examines the evolution of the concept of sustainability and its complex and sometimes problematic uses among scholars, policymakers, environmentalists, and businesses.

ENVS 565. Wetland Ecology and Management. 4 Credits.

Examines management, law, and policies related to wetlands in an ecological framework; includes wetland type definitions, classification, distribution, formation and development, and restoration.

ENVS 567. Sustainable Agriculture. 4 Credits.

Examines sustainability issues in agricultural production and current food systems. Focuses on environmental aspects of seed, water, soil, energy, and pest management.

ENVS 577. Soil Science. 4 Credits.

Chemical and physical characteristics and classification of soils, field soil identification, soil degradation.

ENVS 593M. Passive Cooling. 4 Credits.

Conceptual and quantitative investigations of passive cooling design and performance, including precedents, shading, natural ventilation, evaporative cooling, use of thermal mass, radiant cooling assisted by cold night skies, and control scheduling, supported by field investigations and introductory energy modeling. Multilisted with ARCH 593M. Prereq: ARCH 591.

ENVS 594M. Passive Heating. 4 Credits.

Conceptual and quantitative investigations of passive solar heating design and performance, including precedents, solar resource evaluation, glazing selection and orientation, thermal mass materials and positioning, movable insulation, and control scheduling, supported by solar site surveys and modeling in EnergyPlus. Multilisted with ARCH 594M. Prereq: ARCH 591 or Instructor Approval

ENVS 601. Research: [Topic]. 1-16 Credits.

Repeatable.

ENVS 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

ENVS 603. Dissertation. 1-16 Credits.

Repeatable.

ENVS 604. Internship: [Topic]. 1-5 Credits.

Repeatable for maximum of 10 credits.

ENVS 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

ENVS 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

ENVS 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ENVS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

ENVS 609. Terminal Project. 1-16 Credits.

Repeatable.

ENVS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. A recent topic is Interdisciplinary Capstone Project.

ENVS 631. Environmental Studies Theory and Practice. 4 Credits.

Introduction to various disciplinary perspectives that contribute to environmental studies, including their research methods, vocabularies, and core concepts.

ENVS 632. Environmental Studies Research Methodology. 2 Credits.

Identifying a clear and concise research problem, developing methodology to address that problem, and the process of developing a thorough knowledge of relevant literature.

ENVS 633. Environmental Studies Thesis Development. 3 Credits.

Interdisciplinary readings in environmental studies focused on topics chosen by each student in consultation with instructor. Preparation for presentations at the Joint Campus Conference.

Indigenous, Race, and Ethnic Studies

Laura Pulido, Department Head

541-346-0900
541-346-0904 fax
104 Alder Building
5268 University of Oregon
Eugene, Oregon 97403-5268

Ethnic studies examines the construction and context of race and ethnicity in the United States, highlighting the histories, experiences, and movements of people of color in the Americas. As an element of American identity that cuts across disciplinary categories, race and ethnicity require a mode of study that draws on the humanities and the social sciences as well as interdisciplinary sources such as cultural studies.

Ethnic studies scholars investigate race and racism, historical and contemporary manifestations of white supremacy and domination, analyzing how such systems of domination have created, and continue to create, social injustice. While the social construction of race in the United States is at the center of traditional ethnic studies, it is impossible to discuss racial dynamics without also paying significant attention to issues of gender, class, and sexuality, in addition to studies of indigenous communities, immigration, transnational migration, and the diasporic formations resulting from the slave trade, indentured labor, colonialism, postcolonialism, imperialism, and globalization.

Ethnic studies courses that satisfy university general-education requirements are listed under Group Requirements and Multicultural Requirement in the **Bachelor's Degree Requirements** section of this catalog.

Faculty

Charise L. Cheney, associate professor (African American popular and political cultures; Black nationalist ideologies and practices; gender and sexuality). BSJ, 1993, Northwestern; PhD, 1999, Illinois, Urbana-Champaign. (2009)

Lynn H. Fujiwara, associate professor (women of color, Asian American studies, labor). BA, 1990, California, San Diego; MA, 1993, PhD, 1999, California, Santa Cruz. (2000)

Michael Hames-García, professor (policing and mass incarceration; literary and cultural studies; politics of identity). BA, 1993, Willamette; PhD, 1998, Cornell. (2005)

Brian Klopotek, associate professor (federal recognition of Indian tribes, Native American education, environmentalism). BA, 1994, Yale; PhD, 2004, Minnesota, Twin Cities. (2003)

Sharon Luk, associate professor (racism and racial capitalism, ethnic ontologies, epistemology). BA, 2001, Brown; MA, 2008, PhD, 2012, Southern California. (2014)

Ernesto J. Martínez, associate professor (comparative ethnic studies, queer studies, feminist theory). BA, 1998, Stanford; MA, 2003, PhD, 2005, Cornell. (2006)

Laura Pulido, professor (critical human geography, environmental justice, Chicano studies). BA, 1984, California State, Fresno; MA, 1987, Wisconsin, Madison; PhD, 1991, California, Los Angeles. (2016)

Alaí Reyes-Santos, associate professor (Caribbean studies, African diaspora studies, migration). BA, 2001, Puerto Rico, Mayaguez; PhD, 2007, California, San Diego. (2008)

Stephanie "Lani" Teves, associate professor (indigenous politics, native and women of color, contemporary native Hawaiian identity and politics). BA, 2002, MA, 2005, Hawaii, Manoa; PhD, 2012, Michigan, Ann Arbor. (2014)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Arts
- Bachelor of Science
- Minor

Undergraduate Studies

Students may earn a major or minor in ethnic studies. A secondary goal of the program is to encourage student awareness of the ethnic and culture-based dimensions and applications of other major fields. Students of literature, social sciences, education, urban planning, art history, humanities, and international studies—to name only a few—find that related ethnic studies courses can enrich their academic programs.

Upper-division courses with related subject matter offered in other departments may be included in an ethnic studies major or minor program by arrangement with a course's instructor and the department head.

Specific details and course approvals must be obtained from the Department of Ethnic Studies.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Lower Division		
ES 101	Introduction to Ethnic Studies	4
Select one of the following:		4
ES 250	Introduction to African American Studies	
ES 252	Introduction to Asian American Studies	
ES 254	Introduction to Chicano and Latino Studies	
ES 256	Introduction to Native American Studies	
ES 258	Introduction to Pacific Islander Studies	
Additional 100- or 200-level course		4
Upper Division		
ES 301	Theoretical Perspectives in Ethnic Studies	4
Two 400-level courses		8
Six additional 300- or 400-level courses		24
Total Credits		48

Bachelor of Science Degree Requirements

Code	Title	Credits
Lower Division		
ES 101	Introduction to Ethnic Studies	4
Select one of the following:		4
ES 250	Introduction to African American Studies	
ES 252	Introduction to Asian American Studies	
ES 254	Introduction to Chicano and Latino Studies	
ES 256	Introduction to Native American Studies	
ES 258	Introduction to Pacific Islander Studies	
Additional 100- or 200-level course		4
Upper Division		
ES 301	Theoretical Perspectives in Ethnic Studies	4
Two 400-level courses		8
Six additional 300- or 400-level courses		24
Total Credits		48

Majors must construct their programs in consultation with an ethnic studies advisor. At least 24 of the required upper-division credits must be taken in residence at the University of Oregon. Courses applied to the major must be taken for letter grades and passed with grades of mid-C or better. Majors must maintain a grade point average of at least 2.00 in courses applied to the major. Students majoring in ethnic studies may apply credits in Research: [Topic] (ES 401) and Reading and Conference: [Topic] (ES 405) toward their degree only if completed with letter grades of mid-C or better. Practicum: [Topic] (ES 409) may be applied toward the major on a graded or pass/no pass basis.

Minor in Ethnic Studies

Code	Title	Credits
Lower Division		
ES 101	Introduction to Ethnic Studies	4
Two 200-level courses with ES subject code		8
Upper Division		
Four approved courses, including two with ES subject code		16
Total Credits		28

Upper-division courses must be taken in residence at the University of Oregon. The minor program must be planned in consultation with an ethnic studies advisor at least two terms before graduation. Courses applied to the minor must be taken for letter grades and passed with grades of mid-C or better. Students minoring in ethnic studies may apply credits in Research: [Topic] (ES 401) and Reading and Conference: [Topic] (ES 405) only if completed with letter grades of mid-C or better. Credits in Practicum: [Topic] (ES 409) may be applied toward the minor on a graded or pass/no pass basis.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Courses

ES 100. Temporary Group-Satisfying Course. 4 Credits.

ES 101. Introduction to Ethnic Studies. 4 Credits.

Multidisciplinary study focuses on Americans of African, Asian, Latino, and Native American descent. Topics include group identity, language in society and culture, forms of resistance, migration, and social oppression.

ES 196. Field Studies: [Topic]. 1-5 Credits.

Repeatable.

Prereq: approval of program administrators.

ES 198. Colloquium: [Topic]. 1-2 Credits.

Repeatable.

ES 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ES 200M. Temporary Multilisted Course. 4 Credits.

ES 224M. Introduction to Anthropology of the African Diaspora. 4 Credits.

Introduction to theoretical questions and methodological concerns framing an anthropology of the African Diaspora. Multilisted with ANTH 224M.

ES 250. Introduction to African American Studies. 4 Credits.

Focuses on historical, cultural, and social issues in African America and surveys scholarship in African American studies.

ES 252. Introduction to Asian American Studies. 4 Credits.

Focuses on historical, cultural, and social issues in Asian America and surveys scholarship in Asian American studies.

ES 254. Introduction to Chicano and Latino Studies. 4 Credits.

Focuses on historical, social, and cultural issues in Chicano and Latino communities and surveys scholarship in Chicano and Latino studies.

ES 256. Introduction to Native American Studies. 4 Credits.

Focuses on historical, social, and cultural issues in Native America and surveys scholarship in Native American studies.

ES 258. Introduction to Pacific Islander Studies. 4 Credits.

Focuses on historical, social, and cultural issues in Pacific Islander communities and surveys scholarship in Pacific Island Studies.

ES 301. Theoretical Perspectives in Ethnic Studies. 4 Credits.

Introduction to contemporary theoretical frameworks in the discipline of ethnic studies. Offered fall term only.

Prereq: ES 101; one from ES 250, 252, 254, or 256.

ES 310. Race and Popular Culture: [Topic]. 4 Credits.

Examines the interface between race and popular culture, surveying the historical development, political significance, and social influence of popular culture in the United States. Repeatable four times for a maximum of 20 credits when topic changes. Offered alternate years.

ES 330. Women of Color: Issues and Concerns. 4 Credits.

Contemporary social issues and feminism among women of color in the United States.

Prereq: ES 101 recommended.

ES 345M. Music, Politics, and Race. 4 Credits.

Examines a variety of musical forms and their relationship to histories of racial and social justice, inequality, and political movements. Offered alternate years. Multilisted with MUS 345M.

ES 350. Native Americans and the Environment. 4 Credits.

Critical issues in Native American environmentalism.

ES 352. Social Equity and Criminal Justice. 4 Credits.

Critical issues related to police, prisons, criminal justice, and racial and gender inequalities.

ES 354. Environmental Racism. 4 Credits.

Explores environmental justice as both a field of scholarship and organizing framework that links power, justice, and inequality to environmental issues. Special attention is given to the specific forms of racism which produce environmental injustice.

ES 356. Race and Social Movements. 4 Credits.

Examines the historical significance of self-asserted racial distinctions and explores the ideological diversity of ethno-racial identities produced in tandem with 20th century U.S. social justice movements.

ES 370. Race, Ethnicity, and Cinema: [Topic]. 4 Credits.

Examines the history and politics of race, ethnicity, and indigenesness in relation to film, including questions of production, distribution, and reception in the United States. Repeatable four times for a maximum of 20 credits when topic changes. Offered alternate years.

ES 380. Race, Migration, and Rights. 4 Credits.

Examines historical and contemporary politics in race, immigration, and migration.

ES 385. Critical Whiteness Studies: [Topic]. 4 Credits.

This course explores the social construction of race by investigating and historicizing "whiteness" as a racial category in the U.S.

Prereq: ES 101 or one 200 level ES course

ES 399. Special Studies: [Topic]. 1-5 Credits.

Recent topics include Caribbean Migrations; Asian American Women; Critical Whiteness Studies; Native Americans and Film; Asian Diasporas; Race and Resistance in United States History.

ES 401. Research: [Topic]. 1-21 Credits.

Repeatable.

Prereq: majors or minors only.

ES 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ES 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

Prereq: majors or minors only.

ES 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ES 409. Practicum: [Topic]. 1-21 Credits.

Repeatable.

Prereq: majors or minors only.

ES 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ES 440. Race, Literature, and Culture: [Topic]. 4 Credits.

Examines race, literature, and culture from an interdisciplinary perspective. Repeatable four times for a maximum of 20 credits when topic changes. Offered alternate years.

ES 442. Caribbean Literature and Politics. 4 Credits.

Discusses how Caribbean diaspora literature employs themes of colonialism, sexuality, racism, migration, state violence, nationalism, and identity.

ES 450. Race and Incarceration. 4 Credits.

Introduces several key questions necessary for understanding the crisis of prisons and incarceration in the United States, with an emphasis on race, gender, and class.

ES 452. Race and Ethnicity and the Law: [Topic]. 4 Credits.

Addresses issues of social justice and the participation of Asian Americans, African Americans, Chicanos and Latinos, and Native Americans in the legal system. Repeatable when topic changes.

ES 456. History of Native American Education. 4 Credits.

Examines the historical conflict between traditional culture and knowledge transmission among Native Americans and the assimilationist educational system and practices of Euro-American culture. Offered alternative years.

ES 460. Race, Culture, Empire: [Topic]. 4 Credits.

Examines how racial discourses have informed United States domestic and foreign policy, with special attention on cultural representations of U.S. colonialism and imperialism. Repeatable four times for a maximum of 20 credits when topic changes. Offered alternate years.

ES 498. Interdisciplinary Research Methods. 4 Credits.

Prepares majors for independent research in ethnic studies. Examines interdisciplinary methods for research on race and ethnicity. Offered winter term only.

Prereq: completion of required courses for ethnic studies major, except ES 499; majors or minors only.

ES 499. Ethnic Studies Proseminar. 4 Credits.

Capstone seminar. Focuses on concluding work and experience in ethnic studies through independent research, preparation and presentation of research paper. Offered spring term only.

Prereq: ES 498; majors only.

ES 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ES 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ES 540. Race, Literature, and Culture: [Topic]. 4 Credits.

Examines race, literature, and culture from an interdisciplinary perspective. Repeatable four times for a maximum of 20 credits when topic changes. Offered alternate years.

ES 542. Caribbean Literature and Politics. 4 Credits.

Discusses how Caribbean diaspora literature employs themes of colonialism, sexuality, racism, migration, state violence, nationalism, and identity.

ES 550. Race and Incarceration. 4 Credits.

Introduces several key questions necessary for understanding the crisis of prisons and incarceration in the United States, with an emphasis on race, gender, and class.

ES 552. Race and Ethnicity and the Law: [Topic]. 4 Credits.

Addresses issues of social justice and the participation of Asian Americans, African Americans, Chicanos and Latinos, and Native Americans in the legal system. Repeatable when topic changes.

ES 556. History of Native American Education. 4 Credits.

Examines the historical conflict between traditional culture and knowledge transmission among Native Americans and the assimilationist educational system and practices of Euro-American culture. Offered alternative years.

ES 560. Race, Culture, Empire: [Topic]. 4 Credits.

Examines how racial discourses have informed United States domestic and foreign policy, with special attention on cultural representations of U.S. colonialism and imperialism. Repeatable four times for a maximum of 20 credits when topic changes. Offered alternate years.

ES 605. Reading and Conference: [Topic]. 1-9 Credits.

Repeatable.

ES 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ES 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ES 614. Colloquium: Professional Development. 2 Credits.

Professional development, teaching skills, and mentorship for first year Ethnic Studies PhD students. Repeatable twice for a total of three credits.

ES 615. Theoretical Foundations in Ethnic Studies. 5 Credits.

Introduction to the theoretical foundations and debates in Ethnic Studies scholarship.

ES 616. Interdisciplinary Research Methods in Ethnic Studies. 5 Credits.

Introduction to interdisciplinary methodologies in the various fields of ethnic studies, with an eye towards developing interdisciplinary competence and students applying it to their own work.

ES 617. Genealogies of Ethnic Studies. 5 Credits.

Examines the emergence and evolution of the discipline of Ethnic Studies, including major intellectual shifts in the field, particularly as they relate to changes in the social science and humanities; and the state of the discipline today.

ES 620. Race, Space, and Power: [Topic]. 5 Credits.

This course questions the variety of ways that social constructions of race and space are inextricable from one another and constitute, as much as they are constituted by, modern power relations. Repeatable once for a maximum of 10 credits.

ES 621. Cultural Production: [Topic]. 5 Credits.

Graduate introduction to the theories and methods utilized within Cultural Studies scholarship with attention to race, gender, nation, sexuality and indigeneity. Repeatable twice for a maximum of 15 credits.

ES 622. Resistance and Dissent: [Topic]. 5 Credits.

Surveys historical and contemporary methods people of color have used to subvert and challenge white power and privilege in the United States. Repeatable twice for a maximum of 15 credits.

ES 623. Race, Gender and Sexuality Studies: [Topic]. 5 Credits.

This course closely examines the ways in which race is deeply intertwined with gender and sexuality in the production of racial, gender, and sexual violence since the inception of European settler colonialism in the Americas.

European Studies

Nathalie Hester, Program Director

175 Prince Lucien Campbell Hall
5206 University of Oregon
Eugene, Oregon 97403-5206

European studies offers an interdisciplinary minor for undergraduates in any major or professional school discipline. The program is designed for students who seek to enhance work in the major with a broad and comparative knowledge of Europe. The minor designates a student's special expertise in the subject as having acquired a knowledge of Europe beyond that of a single discipline or that concentrated on one country or part of Europe.

The program combines a small number of required core courses that address cross-national topics over a broad sweep of time. Elective courses, chosen by the student with the advice of a member of the European Studies Committee, ensure some diversity beyond the field of the student's major.

Undergraduate Studies

Minor in European Studies

The College of Arts and Sciences administers an undergraduate minor in European studies, overseen by the program committee.

To earn a minor, a student must complete 24 credits in addition to a paper or project on a European topic and two to three years of a European language other than English, as described below. Of the 24 credits of core and elective courses, a minimum of 16 credits must be upper division. Courses taken to fulfill the language requirement may not be used to fulfill the 24-credit requirement.

The courses that satisfy the minor are distributed as follows: two core courses, four elective courses, and two to three years of a European foreign language. Core and elective courses applied to the minor must be taken for letter grades and passed with grades of C– or better.

Code	Title	Credits
Core Courses ¹		
GEOG 202	Geography of Europe	4
HIST 420	The Idea of Europe ²	4
	or RL 407 Seminar: [Topic]	
Electives ¹		
Two humanities courses ³		8
Two social science courses ³		8
Foreign Language Requirement		

Two to three years of a European foreign language ⁴	
Total Credits	24

- ¹ At least three of the six courses taken to satisfy core and elective course requirements must be taken outside the student's major. With the advisor's approval, exceptions can be made for double majors and for certain interdisciplinary majors, especially international studies and humanities.
- ² Sixteen of the 24 credits of core and elective courses must be at the upper-division level.
- ³ Courses preapproved are listed on the program website. Substitutions may be made only with the approval of the student's advisor. At least 4 credits of the humanities electives must be at the 400 level, and at least 4 credits of the social sciences electives must be at the 400 level.
- ⁴ For BA students, at least three years of college study of a European language other than English is required. For BS students majoring in science, studying for a bachelor of architecture, or majoring in subjects outside the social sciences and humanities, two years of college-level study of a European language other than English is required.

Students seeking to qualify for a minor should, as early as possible, consult the program director, who will assign the student an advisor. Developing the plan for elective courses with the advisor's help ensures that the courses selected satisfy the minor requirements.

No later than two terms before graduation, the student must notify the advisor of intent to graduate for verification of European studies course work and transcript evaluation. The student must also indicate the European studies minor on the application for graduation. Students must complete major requirements for an undergraduate degree in another department or school of the university.

Significant Paper or Project

A research paper on a topic appropriate to the student's interests is the final requirement. For students majoring in disciplines such as music, theater, or the fine arts, a project that draws on these crafts may be substituted for the research paper. The paper or project requirement may be satisfied by work done in the student's major, such as a seminar paper, as long as the content of the paper or project is focused primarily on Europe. The requirement may also be satisfied by a paper done for any of the courses listed below. Students who want to satisfy the requirement in this way must notify the instructor of their intention at the outset of the term so that the instructor can evaluate the paper with this intent in mind. The requirement may also be satisfied by a research paper done under the supervision of a professor in any field for 3 graded credits, such as a paper for Thesis (403). The instructor's agreement to supervise must be obtained in advance, and the 403 subject code may be either in that instructor's department or Thesis (EURO 403).

Courses

EURO 399. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

EURO 403. Thesis. 1-9 Credits.
Repeatable.

EURO 405. Reading and Conference: [Topic]. 1-6 Credits.
Repeatable.

EURO 407. Seminar: [Topic]. 1-6 Credits.
Repeatable.

EURO 410. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

EURO 415. European Union History. 4 Credits.
History, institutions, and policy landmarks of European integration since the end of World War II. Introduction to documents and research on history of European communities.

EURO 515. European Union History. 4 Credits.
History, institutions, and policy landmarks of European integration since the end of World War II. Introduction to documents and research on history of European communities.

Folklore and Public Culture

Doug Blandy, Program Director
541-346-3397
109 Hendricks Hall

The interdisciplinary Folklore and Public Culture Program offers perspectives on ethnic, regional, occupational, gender, and other traditional identities of individuals in specific societies and cultures. Students in the program study the extent to which traditions enrich and express the dynamics of human behavior throughout the world. Folklore and public culture courses examine the historical, cultural, social, political, and economic dimensions of such expressive forms as mythology, legend, folktale, art, music, dance, culinary practices, religion, ritual, and ceremony. Theoretical analyses, research methods, and fieldwork techniques are integral parts of the curriculum.

The Folklore and Public Culture Program offers bachelor of arts, master of arts, and master of science degrees in folklore and public culture. An undergraduate minor is also available. Folklore and public culture courses cover an extensive range of interdisciplinary topics: cultural heritage, ethnicity, subcultures, popular culture, performance, gender, film, religion, public folklore, and issues of diversity and globalization. Folklore and public culture graduates work in public and private agencies as educators, archivists, editors, arts and humanities consultants, museum curators, and festival planners.

Folklore Archive

The Randall V. Mills Archive of Northwest Folklore is a research repository available to folklore scholars and students. It houses raw field data, student and faculty research projects, and audio-visual materials including more than 7,000 slides. Located in 453 Prince Lucien Campbell Hall, the archive is open to the public.

Faculty

Martha J. Bayless, professor (Britain, Welsh, Old and Middle English medieval literature and culture). See **English**.

Doug Blandy, professor (art and community service, art and special populations). See **Planning, Public Policy and Management**.

Dianne M. Dugaw, professor (Britain, ballads and folk song, 18th-century literature). See **English**.

D. Gantt Gurley, associate professor (Scandinavian literature and folklore, Jewish literature and folklore, Old Norse literature). See **German and Scandinavian**.

Habib Iddrisu, assistant professor (Africa, dance, performance). See **Dance**.

Leah Lowthorp, assistant professor (folklore and gender, fieldwork methods and theory, social justice). See **Anthropology**.

Dorothee Ostmeier, professor (18th- and 20th-century literature, culture, philosophy). See **German and Scandinavian**.

Riki H. Saltzman, instructor (public folklore, foodways, ethnicity-identity); executive director, Oregon Folklife Network.

Gordon M. Sayre, professor (early American literature, 18th-century literature, folklore). See **English**.

Philip W. Scher, professor (Caribbean, politics of culture, transnationalism). See **Anthropology**.

Carol T. Silverman, professor (performance, Eastern Europe, gender). See **Anthropology**.

Daniel N. Wojcik, professor (alternative religions, subcultures, vernacular arts). See **English**.

Juan Eduardo Wolf, assistant professor (ethnomusicology, folklore, Latin American studies). See **Music**.

- **Bachelor of Arts**
- **Minor**

Undergraduate Studies

Students studying folklore and public culture at the UO receive comprehensive training in scholarly approaches and methods for researching, documenting, and presenting traditional arts and cultural practices within the United States and abroad. Students majoring in folklore and public culture must earn a minimum of 48 credits, of which 32 must be upper division, and 20 of the 48 must be Folklore (FLR) credits.

Bachelor of Arts in Folklore and Public Culture

Code	Title	Credits

Students may substitute courses to fulfill requirements with the approval of their major advisor. Programs from other departments or programs offering folklore-related courses include anthropology, arts and administration, classics, dance, English, ethnic studies, German and Scandinavian, historic preservation, humanities, international studies, journalism and communication, Judaic studies, music, religious studies, Romance languages, theater arts, and women's, gender, and sexuality studies.

Residency Requirement

Twenty-eight credits of upper-division course work for the major must be completed at the University of Oregon.

Advising

Majors should construct their programs in consultation with an advisor from the core folklore and public culture faculty. At least two terms before graduation, students who want to apply for a folklore and public culture degree should consult the program director to obtain authorization and course work approval.

Minimum Grade

Course work required for the folklore and public culture major, both lower division and upper division, must be passed with grades of C– or better. No more than 8 pass/no pass credits may be applied to the major.

Foreign Language Requirement

Majors must complete the university foreign-language requirement for the BA degree.

Minor in Folklore and Public Culture

Courses

The minor requires the completion of 24 credits. Introduction to Folklore (FLR 250) is required of all minors. Remaining courses are selected from the list of courses on the program website. Students may substitute courses from other departments to fulfill this requirement with the approval of their minor advisor. Programs from other departments and programs offering folklore-related courses include anthropology, arts and administration, classics, dance, English, ethnic studies, German and Scandinavian, historic preservation, humanities, international studies,

journalism and communication, Judaic studies, music, religious studies, Romance languages, theater arts, and women's and gender studies.

Residency Requirement

Sixteen credits of course work for the minor must be completed at the University of Oregon.

Advising

Minors should construct their programs in consultation with an advisor from the core folklore and public culture faculty. At least two terms before graduation, students who want to apply for a folklore and public culture minor should consult the program director to obtain authorization and course work approval.

Minimum Grade

Course work required for the folklore and public culture minor, both lower division and upper division, must be passed with grades of C– or better. No more than 4 pass/no pass credits may be applied to the minor.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- **Master of Arts: General Folklore**
- **Master of Arts: Public Folklore**
- **Master of Science: General Folklore**
- **Master of Science: Public Folklore**

Graduate Studies

The master of arts (MA) or master of science (MS) degree in folklore and public culture is interdisciplinary. In consultation with an advising committee, students take designated courses from faculty members in anthropology, arts and administration, English, folklore and public culture, German, Scandinavian, and music in addition to elective courses that strengthen their areas of expertise. A public folklore track is available to students preparing for careers in the public sector. A thesis or terminal project is required for completion of the degree. Students working toward an MA degree must demonstrate competence in a second language.

The Department of English's PhD program offers a structured emphasis in folklore. For more information, see the **English** section of this catalog.

Admission Requirements

1. An undergraduate GPA of at least 3.30 (B+)
2. A minimum score of 153 on the verbal section of the general test of the Graduate Record Examinations (GRE), and a score of 4 or better on the analytical writing section (GRE-AW)

- For nonnative speakers: a minimum score of 575 on the paper-based Test of English as a Foreign Language (TOEFL) or a minimum score of 88 on the Internet-based test

Application procedures are listed on the program website.

Language Requirement for the MA Degree

The master of arts degree requires the satisfactory completion of a second-year level of proficiency in a second language, as required for the B.A. degree (see Bachelor's Degree Requirements (p. 23) in the catalog for details). Competency may be demonstrated by either a standardized test or with adequate undergraduate course work. Language competence must be demonstrated within the overall seven-year limit for completion of a master's degree.

Master of Arts: General Folklore Track (63 credits)

Additional Courses

Consult the program's website or members of its faculty each term for special offerings that fulfill degree requirements. Visit the program website for a list of additional approved courses.

Other undergraduate and graduate courses with related subject matter may be applied to folklore and public culture certificate programs by arrangement with the instructors and the folklore and public culture director. For a list of these courses, visit the program website.

Courses

FLR 198. Workshop: [Topic]. 1-2 Credits.
Repeatable.

FLR 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

FLR 225. Voices of Africa. 4 Credits.
Novels, music, dance, dress, paintings, films, and cartoons serve as a primary sources from which to learn about the diversity and vivacity of contemporary African peoples.

FLR 235. Folklore and the Supernatural. 4 Credits.
Introduces the study of beliefs about the supernatural by examining diverse approaches to the description and analysis of belief traditions and religious culture.

FLR 236. Magic in the Middle Ages. 4 Credits.
Examines how medieval culture defined magic and how the exploration of magic led to the beginnings of science. Analyzes the practices of medieval western Europe, particularly Britain.

FLR 245. Folklore and the Pacific Northwest. 4 Credits.
A survey exploring cultural expression of customary, verbal, and material folklore found in the Pacific Northwest, with a consideration of ethnic and geographical variation.

FLR 250. Introduction to Folklore. 4 Credits.
The process and genres of traditional (i.e., folk) patterning; the relations between these forms of expression and other arts, especially English and American literature.

FLR 255. Folklore and United States Popular Culture. 4 Credits.
Explores the relationship between folklore and popular culture, with special emphasis on the analysis of legends, myths, icons, stereotypes, heroes, celebrities, rituals, and celebrations.

FLR 320. Car Cultures. 4 Credits.
Examines car customizing and tuning as forms of vernacular art; studies the environmental impacts of automobiles, the history of the industry, and the peculiarities of drivers' behavior. Offered alternate years.

FLR 350. Folklore and the Bible. 4 Credits.
Studies readings of the Judeo-Christian Bible in connection with mythological and traditional contexts and meanings from ancient times to the present. Offered alternate years.

FLR 365. Folklore Research Methods. 4 Credits.
Archival and library research skills augmented with fieldwork skills including observation, participation, documentation, interviewing, transcription, and presentation of findings.

FLR 370. Folklore and Sexuality. 4 Credits.
Examines intersections of folklore and sexuality as entry points for discussing social issues of sexual and gender identity, intolerance, and resistance. Offered alternate years.

FLR 399. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

FLR 400M. Temporary Multilisted Course. 1-5 Credits.
Repeatable.

FLR 401. Research: [Topic]. 1-6 Credits.
Repeatable.

FLR 403. Thesis. 1-6 Credits.
Repeatable.

FLR 404. Internship: [Topic]. 1-8 Credits.
Repeatable.

FLR 405. Reading and Conference: [Topic]. 1-6 Credits.
Repeatable.

FLR 406. Field Studies: [Topic]. 1-6 Credits.
Repeatable.

FLR 407. Seminar: [Topic]. 1-5 Credits.
Repeatable.

FLR 408. Workshop: [Topic]. 1-5 Credits.
Repeatable.

FLR 409. Practicum: [Topic]. 1-6 Credits.
Repeatable.

FLR 410. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

FLR 411. Folklore and Religion. 4 Credits.

Explores the role of folklore in people's religious lives with particular emphasis on narrative, beliefs, rituals, celebrations, pilgrimage, and ecstatic states.

FLR 413. Folk Art and Material Culture. 4 Credits.

Survey of the research by folklorists on contemporary folk art, material culture, and the aesthetic impulse in everyday life.

FLR 414. Mythology and Modern Fantasy Fiction. 4 Credits.

Examines the folklore and literary sources that inspired writers such as J. R. R. Tolkien, Neil Gaiman, and George R. R. Martin and gave rise to modern fantasy fiction. Offered only in summer.

FLR 415. Folklore and Foodways. 4 Credits.

Examines food traditions from a folkloristic perspective, looking at issues such as identity, performance, community, creativity, and innovation.

Prereq: junior standing. Offered every second or third year.

FLR 416. African Folklore. 4 Credits.

Examines folklore forms across the African continent to analyze themes of history, identity, aesthetics, gender, class, politics, and globalization.

Offered alternate years.

Prereq: junior standing.

FLR 418. Folklore and Gender. 4 Credits.

Examines intersections of folklore and gender and the resulting issues of creativity, social dynamics, feminism, identity politics, and negotiations of power. Offered alternate years.

Prereq: junior standing.

FLR 450. Folklore in the Public Sector. 4 Credits.

Investigates the history of the field of public folklore as well as training students in contemporary practices including fieldwork methods, grant writing, and project development.

FLR 483. Folklore and Mythology of the British Isles. 4 Credits.

Basic folk traditions in the British Isles (e.g., ballads, folktales, legends, myths) and their treatment in the written literature of major British authors.

FLR 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

FLR 503. Thesis. 1-12 Credits.

FLR 604. Internship: [Topic]. 1-6 Credits.

Repeatable.

FLR 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

FLR 606. Field Studies: [Topic]. 1-6 Credits.

Repeatable.

FLR 607. Seminar: [Topic]. 1-6 Credits.

Repeatable.

FLR 608. Workshop: [Topic]. 1-6 Credits.

Repeatable.

FLR 609. Terminal Project. 1-9 Credits.

Repeatable.

FLR 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

FLR 681. History and Theory of Folklore Research. 5 Credits.

Examines nature of scholarly inquiry, research questions, and techniques. Historic orientation with emphasis on ideological development of folkloristics from its beginnings to the present.

FLR 684. Folklore Fieldwork Seminar. 5 Credits.

Students conceptualize and execute a fieldwork project while developing practical skills in proposal writing, observation, interviewing, analysis, documentation, and presentation.

General Science

Jana Prikryl, Program Director

541-346-3288

65C Klamath Hall

The general science curriculum allows students to design academic programs that satisfy the requirements for a bachelor of science degree and provide more breadth than traditional science programs. Many exciting areas of scientific inquiry, such as bioinformatics, neuroscience, environmental science, and biophysical science, require broad science

backgrounds and encompass several disciplines. Students planning technical careers in one of these areas or careers in the health sciences, in science education, or in a science-related business or social service might be best served by a well-designed multidisciplinary science program.

One strength of the General Science Program is its flexibility. To exploit that strength, students need to design their programs carefully, consulting frequently with the general science director. Course sequences that meet requirements for professional schools and training programs should be selected in consultation with the program director or university advisors that specialize in the specific area (for example the Health Professions Program advisors). Students should seek assistance in program planning when they identify or change career goals, because successful application to professional schools and training programs may require completion of additional courses beyond those required for the general science major.

Examples of cross-disciplinary fields, and the subject-matter areas that might be combined in designing a program, are given below:

- **Animal behavior and ethology**—anthropology, biology, psychology
- **Biophysical sciences**—biology, chemistry, human physiology, physics
- **Cognitive sciences**—computer and information science, mathematics, psychology
- **Environmental sciences**—biology, chemistry, earth sciences, geography, physics
- **Neurosciences**—biology, chemistry, psychology

General science majors are encouraged to consult with the program director during their junior year to ensure that their remaining course work is structured to meet all the requirements for the major. Students should notify the General Science Program office of their intention to graduate at least one term before the proposed graduation date.

Preparation

High school students planning to major in general science should take as much mathematics as possible, including two years of algebra and trigonometry. They should also take science courses in their areas of interest. Students planning to transfer into the General Science Program after two years at a community college or at another college or university should complete courses equivalent to the lower-division requirements listed in this catalog and as many of the university's general-education requirements for a bachelor's degree as possible. Acceptance of transfer courses and credits is determined by evaluators in the Office of Admissions in consultation with departmental advisors.

Upon admission, transfer students should consult with the general science director in the program office.

Careers

Through the General Science Program, prehealth science students preparing for careers in medicine, dentistry, or related fields can meet professional school admission requirements. General science, when combined with a minor or a second major, can work well for students planning careers in science-related business, public relations, and human services.

- **Bachelor of Arts**
- **Bachelor of Science**

Undergraduate Studies

Bachelor of Arts Degree Requirements

Code	Title	Credits
Lower Division ¹		44-56
MATH 251–252	Calculus I-II	
or MATH 241–247	Calculus for the Biological Sciences I-II	
Select three sequences or three-course combinations from the following; two sequences must include labs:		
Anthropology		
ANTH 270	Introduction to Biological Anthropology	
Select two of the following:		
ANTH 171	Introduction to Monkeys and Apes	
ANTH 173	Evolution of Human Sexuality	
ANTH 361	Human Evolution	
ANTH 362	Human Biological Variation	
Biology		
BI 211–214	General Biology I-IV (choose three)	
or BI 281H–283H	Honors Biology I-III	
Chemistry		
Select one of the following:		
CH 221–223	General Chemistry	
& CH 227–229	and General Chemistry Laboratory	
CH 224H–226H	Honors General Chemistry and Advanced General Chemistry	
& CH 237–239	Laboratory	
Computer and Information Science		
CIS 210–212	Computer Science I-III	
Geography		
GEOG 141	The Natural Environment	
Select two of the following:		
GEOG 181	Our Digital Earth	
GEOG 321	Climatology	
GEOG 322	Geomorphology	
GEOG 323	Biogeography	
GEOG 361	Global Environmental Change	
Earth Sciences		
GEOL 201	Dynamic Planet Earth	
GEOL 202	Earth's Surface and Environment	
GEOL 203	History of Life	
Physics		
Select one of the following:		
PHYS 201–203	General Physics	
& PHYS 204–206	and Introductory Physics Laboratory	
PHYS 251–253	Foundations of Physics I	
& PHYS 290	and Foundations of Physics Laboratory	
Upper Division		32

32 credits of approved upper-division science courses (for a complete list of approved courses see the General Science Program website gensci.uoregon.edu/general-science-checksheet)²

Total Credits 76-88

- ¹ All students must demonstrate a proficiency in mathematics by passing Calculus II. In addition, all students must take three course sequences (or three course combinations in the case of ANTH and GEOG) from the list above, two of which must include laboratories. The labs might be imbedded in the class (as with BI, CIS, and GEOL), or taken as separate courses (as with CH and PHYS). All courses must be completed with grades of C– or P (pass) or better. Courses graded N (no pass) or F may be repeated for credit.
- ² Two areas of emphasis from two different departments are required. Each emphasis consists of 12 graded upper-division credits from a single department. At least 24 of the 32 credits must be taken for letter grades and at least 24 must be taken at the University of Oregon. Four of the 32 credits may be Research (401), Thesis (403), or Supervised College Teaching (402). Other courses numbered 400–409 may not be included unless approved in advance by the general science advisor. Upper-division courses used for another major may not be used to satisfy upper-division general science requirements. All courses must be completed with grades of P or C– or better.

--------------------------------	---	--

Upper Division 32

32 credits of approved upper-division science courses (for a complete list of approved courses see the General Science Program website gensci.uoregon.edu/general-science-checksheet)²

Total Credits 76-88

- ¹ All students must demonstrate a proficiency in mathematics by passing Calculus II. In addition, all students must take three course sequences (or three course combinations in the case of ANTH and GEOG) from the list above, two of which must include laboratories. The labs might be imbedded in the class (as with BI, CIS, and GEOL), or taken as separate courses (as with CH and PHYS). All courses must be completed with grades of C– or P (pass) or better. Courses graded N (no pass) or F may be repeated for credit.
- ² Two areas of emphasis from two different departments are required. Each emphasis consists of 12 graded upper-division credits from a single department. At least 24 of the 32 credits must be taken for letter grades and at least 24 must be taken at the University of Oregon. Four of the 32 credits may be Research (401), Thesis (403), or Supervised College Teaching (402). Other courses numbered 400–409 may not be included unless approved in advance by the general science advisor. Upper-division courses used for another major may not be used to satisfy upper-division general science requirements. All courses must be completed with grades of P or C– or better.

General science courses must be completed with grades of C– or P (pass) or better. Courses graded N (no pass) or F may be repeated for credit, in accordance with university policy.

The upper-division requirements are for students who declared the general science major fall 2000 or later. Students who declared the major before fall 2000 follow the requirements that were in effect when they declared the major. Upper-division credits used to satisfy minimum requirements of another major may not be used to satisfy upper-division requirements in general science. At least 24 upper-division science

credits must be completed at the University of Oregon to meet the general science residency requirement.

Upper-division courses may be selected from the general science website (<http://gensci.uoregon.edu>).

Honors Program

Students preparing to graduate with honors in general science should notify the program director no later than the first term of the senior year.

Honors in general science centers on a thesis, which is the culmination of research conducted under the direction of a faculty advisor. The advisor does not need to be a member of the general science committee.

To graduate with honors, students must have at least a 3.50 overall grade point average and a GPA of 3.50 or better in the sciences. In addition, they must complete 9 credits of Research (401) or Thesis (403) or both in the appropriate department. These credits must be distributed over at least two terms and cannot be used to fulfill emphasis-area requirements.

Upon approval of the thesis by the advisor and the program director, honors in general sciences are awarded.

For guidelines and calendar, see a general science program director.

Program Planning

Information about program planning and detailed sample programs are available in the General Science Program office. Prehealth science students who choose the general science major should design their programs to meet the admission requirements of the professional school of their choice. See also Preparatory Programs in the **Academic Resources** section of this catalog.

Kindergarten through Secondary Teaching Careers

An academic major in general science can provide a strong background for certain teacher-education licensure programs. Students interested in teaching general science in middle school and junior high school should be aware that the integrated science endorsement requires broader preparation than the minimum requirements for the general science major. The College of Education offers a fifth-year program for middle-secondary teaching licensure in science. See the College of Education (p. 734) section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Science in General Science with Education Focus

Course	Title	Credits	Milestones
First Year			
Fall			
CH 111	Introduction to Chemical Principles	4	Ideal for solid preparation for CH 221

MATH 111	College Algebra	4	Students should plan to start the degree with MATH courses; mathematics placement test determines which MATH course one should take first
WR 121	College Composition I	4	
General-education course		4	
Credits		16	
Winter			
MATH 112	Elementary Functions	4	
WR 122	College Composition II	4	
	or WR 123 or College Composition III		
BI 211	General Biology I: Cells	4	Biology sequence fulfills the life science sequence with laboratory

General Social Science

Reuben Zahler, Program Director

541-346-5907
362 McKenzie Hall

The General Social Science Program provides students the flexibility to design a major that combines courses from several departments across campus. The program offers students a variety of options depending on their interests. For the career-minded student, it provides career training combined with the analytical skills of a liberal arts education. For the intellectually curious student, it offers the study of particular themes across several social science disciplines. For the student having difficulty choosing a major, general social science offers a curriculum across several departments.

Undergraduate Studies

The program has four concentrations or tracks. Each concentration has its own set of core courses and then provides a number of elective courses from various departments. Major requirements for each of the four concentrations may be found on the program website.

Applied Economics, Business, and Society

This track combines technical training in business with the analytical training of the liberal arts. It draws heavily from courses in the business college and the economics department to offer specific business skills while exploring how business functions in society, on the national level, and in the global context. This concentration is designed specifically for students who plan to work in business or to pursue a master of business administration degree.

Crime, Law, and Society

This track provides broad exposure to problems that confront society on the causes and consequences of, and policies on, crime, offering preparation for students with an interest in criminology, law practice, law enforcement, or social services.

Globalization, Environment, and Policy

This track focuses on broad social-political and environmental issues at the regional, national, and global levels, as well as the policy planning required to meet these issues within an interdisciplinary context. The globalization concentration provides training for students planning to work in green industry, government, NGOs, and environmental organizations. In addition, the track prepares students to earn graduate degrees in planning, public management, policy studies, or other applied social sciences with a global emphasis.

Social Studies Teaching

This track prepares students with the course requirements for admission to the graduate teacher licensure program at the University of Oregon—UO Teach. This concentration does not, in and of itself, lead to a teaching license; rather, it provides a well-defined content so that students are prepared to enroll in a graduate program to become licensed to teach social studies at the middle or high school level.

General social science majors are encouraged to consult with their advisors at least once a year to ensure their remaining course work is structured to meet all the requirements for the major. Students should

notify the General Social Science Program office of their intention to graduate at least one term before the proposed graduation date.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Geography

Daniel Gavin, Department Head

541-346-4555
 541-346-2067 fax
 107 Condon Hall
 1251 University of Oregon
 Eugene, Oregon 97403-1251
 uogeog@uoregon.edu

Students who major in geography develop skills in understanding the complex social, economic, political, and environmental processes that shape places around the world. The Department of Geography offers courses that span a broad array of subjects, such as food systems, tourism, the role of borders, climate change, river systems, and invasive

species. The geographic perspective provides a critical look at social, environmental, and policy issues relevant in today's world. Students may also develop skills in geographic information systems (GIS), cartography, and spatial analysis that provide them with in-demand tools to apply in their postgraduate career.

Geography provides for varied perspectives about places to help students develop into critical thinkers, efficient communicators, and problem-solvers. Geography can often enhance other fields, including spatial data science and technology, history, public policy and management, earth sciences, political science, sociology, and environmental studies. For more information, visit <https://geography.uoregon.edu/>.

InfoGraphics Lab

James E. Meacham, Executive Director

163 Condon Hall
541-346-5788
infographics.uoregon.edu

The InfoGraphics Lab is a mapping and geospatial technologies facility located in the Department of Geography (<http://geography.uoregon.edu>). The laboratory works on a variety of supported projects with faculty members, researchers, and government agencies. The application of cartographic design and geographic information science is its focus. It supports research, instruction, and public service activities at the university. Graduate and undergraduate students may be employed on lab projects.

Faculty

Patrick J. Bartlein, professor (climatology, paleoclimatology, data analysis and visualization). BA, 1972, MS, 1975, PhD, 1978, Wisconsin, Madison. (1982)

Daniel P. Buck, associate professor (political economy, food geographies, East Asia). BA, 1987, California State, Chico; MA, 1996, PhD, 2002, California, Berkeley. (2008)

Shaul E. Cohen, associate professor (political, environmental, cultural; Middle East). BA, 1983, Clark; MA, 1987, PhD, 1991, Chicago. (1996)

Carolyn Fish, assistant professor (geographic information system science, cartography). BS, 2008, Pennsylvania State; MS, 2010, Michigan State; PhD, 2018, Pennsylvania State. (2018)

Mark Fonstad, associate professor (geomorphology, remote sensing, hydrology). BA, 1995, Wisconsin, Madison; MA, 1997, Ohio; PhD, 2000, Arizona State. (2011)

Daniel G. Gavin, professor (biogeography, paleoecology, climate change). BA, 1992, Dartmouth College; MS, 1997, PhD, 2000, Washington (Seattle). (2006)

Donald G. Holtgrieve, instructor (environmental planning, resource management, watershed issues). BA, 1963, San Diego State; MA, 1970, California State; PhD, 1972, Oregon. (2002)

Leigh Johnson, assistant professor (political ecology, development, economic geography). BA, 2003, Columbia; PhD, 2011, California, Berkeley. (2016)

Nicholas P. Kohler, instructor (geographic information systems, cartography, human-environmental relations). BA, 1989, Princeton; MA, 1997, PhD, 2005, Oregon. (2006)

Amy K. Lobben, professor (geographic information system science, behavioral geography, data visualization). BA, 1991, MA, 1996, Georgia State; PhD, 1999, Michigan State. (2004)

Hui "Henry" Luan, assistant professor (geographic information system science, spatial statistics). BS, 2009, MS, 2011, Wuhan; PhD, 2016, Waterloo. (2018)

W. Andrew Marcus, professor (hydrology, fluvial geomorphology, remote sensing); BS, 1978, Stanford; MA, 1983, Arizona State; PhD, 1987, Colorado. (2001)

Patricia F. McDowell, professor (geomorphology, river management and restoration, Quaternary environments). BA, 1971, MA, 1977, Illinois Institute of Technology; PhD, 1980, Wisconsin, Madison. (1982)

Leslie McLees, instructor (urban geography, urban agriculture, Africa); undergraduate advisor. BS, 1999, Washington State; MA, 2004, Hawaii, PhD, 2012, Oregon. (2014)

James E. Meacham, senior research associate (geographic information systems, cartography, atlas design and production); executive director, InfoGraphics Lab. BS, 1984, MA, 1992, Oregon. (1992)

Joanna Merson, research assistant (cartography, data-visualization, GIS). BSc, 2009, Victoria; MA, 2013, Arizona State. (2017)

Alexander B. Murphy, professor (political and cultural geography, Europe, law and geography); James F. and Shirley K. Rippey Chair in Liberal Arts and Sciences. BA, 1977, Yale; JD, 1981, Columbia; PhD, 1987, Chicago. (1987)

Laura Pulido, professor (critical ethnic studies, environmental justice, Chicano studies). See **Ethnic Studies**.

Lucas Silva, assistant professor (terrestrial ecology, biogeochemistry, biogeography). See **Environmental Studies**.

Alethea Y. Steingisser, research assistant (cartography and graphic design, geographic information systems); cartographic project manager, InfoGraphics Lab. BS, 2002, California State, Northridge; MS, 2006, Oregon. (2006)

Xiaobo Su, associate professor (cultural politics, tourism and urban conservation, China). BArch, 2000, Southeast University (Nanjing); MSc, 2003, Sun Yat-sen University; PhD, 2007, National University of Singapore. (2007)

Peter A. Walker, professor (cultural and political ecology, US West, Africa). BA, 1986, California, Berkeley; MS, 1990, Harvard; PhD, 1997, California, Berkeley. (1997)

Emeriti

Stanton A. Cook, professor emeritus. AB, 1951, Harvard; PhD, 1960, California, Berkeley. (1960)

Carl L. Johannessen, professor emeritus. BA, 1950, MA, 1953, PhD, 1959, California, Berkeley. (1959)

Alvin W. Urquhart, professor emeritus. AB, 1953, MA, 1958, PhD, 1962, California, Berkeley. (1960)

Ronald Wixman, professor emeritus. BA, 1968, Hunter; MA, 1972, Columbia; PhD, 1978, Chicago. (1975)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts in Geography**
- **Bachelor of Science in Geography**
- **Bachelor of Arts in Spatial Data Science and Technology**
- **Bachelor of Science in Spatial Data Science and Technology**
- **Minor in Geography**

Undergraduate Studies

The Department of Geography offers bachelor of arts and bachelor of science degrees with majors in geography and spatial data science and technology. Undergraduate students in the geography major develop an awareness of the natural and cultural landscapes of several regions of the world and investigate the processes that form them; students in the spatial data science and technology major develop skills in data sciences and geospatial technologies. Lower-division courses are open to any student at the university. For students transferring to the university in their third year, preparation in introductory college geography courses is desirable.

Geography

An undergraduate major in geography follows a broadly based general degree program. Both bachelor of arts (BA) and bachelor of science (BS) degrees are offered in the department. To achieve depth in a particular subfield of geography, electives are chosen from one of six specializations:

1. environment, economy, and sustainability
2. geographic education
3. water science and policy
4. culture, politics, and place
5. environmental systems
6. geographic information system science

Although a degree in geography is a liberal arts degree, many graduates have found related vocational opportunities in government or private employment, principally in planning, environmental research, cartography, or geographic information system science.

Bachelor of Arts in Geography: Degree Requirements

Code	Title	Credits
Fundamentals: Introductory Core		
GEOG 141	The Natural Environment	4
GEOG 142	Human Geography	4
GEOG 181	Our Digital Earth	4
Fundamentals: Advanced Core		
GEOG 391	Social Science Inquiry and Research	4
Select one of the following: 4		
GEOG 201	World Regional Geography	
GEOG 202	Geography of Europe	
GEOG 204	Geography of Russia and Neighbors	
GEOG 205	Geography of Pacific Asia	

GEOG 208	Geography of the United States and Canada
GEOG 209	Geography of the Middle East and North Africa
GEOG 214	Geography of Latin America
GEOG 281	The World and Big Data
GEOG 471	North American Historical Landscapes
GEOG 475	Advanced Geography of Non-European-American Regions: [Topic]

Breadth Requirements: Geographic Information System Science 4

Select one of the following:

GEOG 481	GIScience I
GEOG 482	GIScience II
GEOG 485	Remote Sensing I
GEOG 486	Remote Sensing II
GEOG 490	GIScience: [Topic]
GEOG 491	Advanced Geographic Information Systems
GEOG 493	Advanced Cartography
GEOG 494	Spatial Analysis
GEOG 495	Geographic Data Analysis
GEOG 496	Location-Aware Systems
GEOG 497	Qualitative Methods in Geography
GEOG 498	Geospatial Project Design

Breadth Requirements: Biophysical Geography 4

Select one of the following:

GEOG 321	Climatology
GEOG 322	Geomorphology
GEOG 323	Biogeography
GEOG 360	Watershed Science and Policy
GEOG 361	Global Environmental Change
GEOG 421	Advanced Climatology: [Topic]
GEOG 423	Advanced Biogeography: [Topic]
GEOG 425	Hydrology and Water Resources
GEOG 427	Fluvial Geomorphology
GEOG 430	Long-Term Environmental Change
GEOG 433	Fire and Natural Disturbances
ENVS 477	Soil Science ¹

Breadth Requirements: Human Geography 4

Select one of the following:

GEOG 341	Population and Environment
GEOG 342	Geography of Globalization
GEOG 343	Society, Culture, and Place
ASIA 425	Asian Foodways ¹
GEOG 441	Political Geography
GEOG 442	Urban Geography
GEOG 444	Cultural Geography

ASIA 480	Chinese Economy: Transition, Development, Globalization ¹	4

At least eight geography courses must be taken for a letter grade. A grade of C– or better or P (pass) is required in each course, and a GPA of 2.25 or better is required in courses used to satisfy major requirements.

Geography majors seeking a BA degree must demonstrate proficiency in a second language by passing the third term of a second-year university language course with a grade of C– or better or by examination indicating an equivalent level of proficiency.

Geography majors seeking a BS degree must complete a mathematics sequence that satisfies the university's mathematics requirement for a BS degree. Mathematics courses must be passed with a grade of at least C– or P. The optimal courses for the university's mathematics requirement depend on one's track and focus; consult with an advisor.

Students considering graduate school should complete both the mathematics and language requirements.

Spatial Data Science and Technology

The spatial data science and technology major requires a minimum of 48 credits, drawing on courses in geography and computer information science. The major requires four compulsory courses (16 credits) that provide foundational skills, concepts, and critical thinking abilities. An additional eight elective courses (32 credits) are required. Upon declaring the major, students meet with the geography undergraduate advisor to tailor a series of elective courses best suited to individual student needs and employment aspirations. At least nine courses used for the major must be taken for a letter grade. A grade of C– or better and a GPA of 2.25 or better is required in courses applied to the major.

For more information, e-mail the undergraduate advisor, Leslie McLees, at geogadvr@uoregon.edu, or schedule an advising appointment at <https://geography.uoregon.edu/undergrad/advising/>.

Bachelor of Arts in Spatial Data Science and Technology: Degree Requirements

Core courses provide foundational skills, concepts, and critical thinking abilities. Some of the introductory courses, such as GIScience I (GEOG 481), are prerequisites for more advanced courses. Students are not required to complete these before moving to elective courses (except where prerequisites are required).

Electives. Rather than adopting a series of specializations, the electives component will remain flexible. Upon declaring the major, students should meet with the undergraduate advisor to work out a series of courses that best fit student needs and employment aspirations. A full list of elective courses can be found on the major page (<https://geography.uoregon.edu/sdst>) on the department website.

Code	Title	Credits

Honors Programs

The Department of Geography offers an honors option for its majors. More information is available on the department website (<https://geography.uoregon.edu/undergrad/honors>) or by contacting the undergraduate advisor, geogadvr@uoregon.edu.

Minor in Geography

Requirements

Code	Title	Credits
Upper-division GIScience course		4
Upper-division biophysical geography course		4
Upper-division human geography course		4
Three geography courses		12
Total Credits		24

At least 16 credits must be taken for a letter grade and 12 credits must be upper division. Grades of C– or better or P must be earned in all geography courses applied to the minor.

Second Majors

Geography majors may also complete a second major in any field of the student’s choice. Two of the most common are environmental studies or environmental science—an excellent combination with geography because they offer grounding in the physical and human systems within which environmental issues are situated in a larger global context. For details about adding a second major, visit the department’s website.

Internships in Geography

Internships are unpaid off-campus work experiences. Students receive one credit for each three hours of participation as an intern; internships may be extended to a second term with prior departmental approval. Interns apply geographic concepts in the service of government, private industry, or nongovernmental organizations. Internships are initiated by students or may come at the suggestion of a faculty member or the request of an employer. Past interns have worked in the Eugene Planning and Development Department, the US Department of Agriculture Forest Service, Lane County Soil Conservation District, and many other organizations and agencies.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Geography

Course	Title	Credits	Milestones
First Year			
Fall			
GEOG 142	Human Geography	4	Multicultural course in international cultures

- **Master of Arts**
- **Master of Science**
- **Doctor of Philosophy**

Graduate Studies

Graduate work leading to the master of arts (MA), master of science (MS), and doctor of philosophy (PhD) degrees is offered.

The department's graduate programs emphasize the natural environment; the interactions of environment and society; culture, politics, and space; geographic information system science; and geographic education. The master's and PhD programs closely follow the research interests of the geography faculty. Students follow an individualized program that includes courses and seminars in related disciplines.

Although the department requires knowledge of the fundamentals of geography, it welcomes students whose undergraduate work has been in other disciplines and who can apply their training to geographic problems.

Admission

The Department of Geography only accepts applications for admission fall term. Application materials should arrive by January 15 to be considered the following fall term. The department notifies applicants of the admission decision around April 1. Graduate teaching fellowships typically are awarded once a year, in April.

The department's website has online application materials and information about the application process.

Applicants must submit scores from the Graduate Record Examinations general test. There is no minimum requirement for GRE scores.

International students whose native language is not English must submit results from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination from within five years of the application date. The Department of Geography requires a minimum score of 575 (paper-based) or 88 (Internet-based) for the TOEFL. The minimum overall band score on the academic module of the IELTS is 7.0. For more information about the TOEFL and IELTS examination, visit their respective websites.

For more information about the geography department graduate application process, visit geography.uoregon.edu/graduate/admissions.

General Requirements

In both the master's and the doctoral programs, students are expected to develop a broad background in the discipline of geography, in-depth knowledge in an area of emphasis, and the ability to conduct and report independent research, including the use of appropriate geographic techniques. The area of emphasis may combine more than one traditional subfield of geography. The PhD requires development of more in-depth knowledge in the area of emphasis and a substantial independent research project resulting in a dissertation.

Area of Emphasis	Course Topics
The Natural Environment	<ul style="list-style-type: none"> Advanced biogeography Advanced climatology Advanced geomorphology Hydrology and water resources Fluvial geomorphology Long-term environmental change Climatological aspects of global change Fire and natural disturbances
Environment and Society	<ul style="list-style-type: none"> Environmental alteration Geography, law, and the environment Environment and development Gender and environment International water policy North American historical landscapes Political ecology
Culture, Politics, and Place	<ul style="list-style-type: none"> Political geography Urban geography Global migration Cultural geography Tourism and development
Geographic Information System Science	<ul style="list-style-type: none"> Geographic information system science Remote sensing Advanced geographic information systems Advanced cartography Geographic data analysis
Geographic Education	<ul style="list-style-type: none"> Research in geographic education Preparing to teach Advanced Placement human geography Geospatial technology for educators Geography education assessment

The department also offers course work and faculty expertise in the American West, Europe (both West and East), the Middle East, Latin America, Asia, and Africa.

Master's Degree Program

The master's degree in geography (MA or MS) emphasizes broad understanding of physical and human geography and basic geographic techniques. Students develop specialized research skills during work on the thesis.

The master of arts degree requires second-year university-level proficiency in a second language. Competency may be demonstrated

by a standardized test or with adequate undergraduate course work. Competency in a foreign language or a computer language may be used to meet the departmental language requirement for the master of science degree.

The master's degree option in geographic education is designed for teachers who have K–12 teaching licensure or are working toward their initial or continuing licensure. Most graduate students who take the geographic education option also have several years of teaching experience.

A committee of two geography faculty members supervises the research and writing of a master's thesis that shows evidence of original research and writing.

Master of Arts in Geography

Code	Title	Credits
Core Courses ¹		
GEOG 595	Geographic Data Analysis	4
or GEOG 597	Qualitative Methods in Geography	
GEOG 608	Workshop: [Topic] (Thesis Writing) ²	2-16
GEOG 611–612 & GEOG 613	Theory and Practice of Geography I-II and Research Design ³	12
Breadth Requirement		
Three upper-division courses, with one in each area of emphasis (physical geography, human geography, geographic information system science)		12
Total Credits		30-44

¹ Core courses or their equivalents must be completed either during the program or prior to entering.

² Must take course for 1 credit every winter and spring term the student is in residence.

³ Must be taken during the first year the graduate student is in residence.

Total Credits		11-19

- ¹ At least 3 credits must be taken during the term the degree is granted. Every master's thesis must be presented at a public lecture.

Doctoral Degree Program

The PhD program requires competent understanding of one of the systematic fields of geography and a broad understanding of geographic topics that enables the student to address and synthesize problems that cross the various fields of geography. While this program is designed to suit each individual's background and interests, prospective candidates should pay attention to the systematic specialization and regional interests of the department's faculty members before applying for admission.

The candidate may use Research: [Topic] (GEOG 601) and Reading and Conference: [Topic] (GEOG 605) to follow specific interests with individual members of the faculty. The PhD program, planned with faculty committee approval, is measured by achievement of the stated goals rather than by any specific number of credits.

PhD Requirements

Code	Title	Credits
Core Courses ¹		
GEOG 595	Geographic Data Analysis	4
GEOG 608	Workshop: [Topic] (Thesis Writing) ²	2-16
GEOG 611–612 & GEOG 613	Theory and Practice of Geography I-II and Research Design ³	12
Breadth Requirement		
	One additional upper-division course in an area of emphasis not in student's focal area	4
Methods Courses		
	Doctoral students must take two methods courses, one quantitative and one qualitative	8
Total Credits		30-44

- ¹ Core courses or their equivalents must be completed either during the program or prior to entering.

- ² Must take course for 1 credit every winter and spring term the student is in residence.
- ³ Must be taken during the first year the graduate student is in residence.

Code	Title	Credits
Additional Doctoral Required Courses		
GEOG 607	Seminar: [Topic]	1-5
GEOG 607	Seminar: [Topic]	1-5
GEOG 603	Dissertation ¹	1-16

- ¹ At least 3 credits must be taken during the term the degree is granted. Every doctoral dissertation must be presented at a public lecture.

In addition, PhD students must complete a foreign language, programming, or skills requirement that entails completion of the foreign language or programming requirement for the master's degree in addition to one of the following:

1. Advanced knowledge of the foreign language used for the master's requirement as demonstrated by successful completion of a third-year, university-level course sequence in that language that deals with composition and conversation, or passing an approved test of third-year language skills (such as the New York University School of Professional Studies Foreign Language Proficiency Exam)
2. proficiency in a second foreign language at the level required for the master's degree
3. computer programming skills at the level required for the master's degree
4. completion of a research skills package typically consisting of four to five courses that cover a body of related methods and techniques useful in geographic research

PhD students must also complete a preparation in fields of specialization requirement that entails completion of courses and seminars recommended by the advisor or committee members.

After completing the appropriate course work, graduate seminars, and language or technical skills requirement, advancement to candidacy is achieved by passing a comprehensive written examination. The comprehensive exam is an opportunity to demonstrate that the student

- can articulate core areas of expertise and situate the student's overall research agenda in relation to these areas of expertise
- understands and can defend major theoretical and methodological issues in these core research and teaching areas
- has a sense of where those theories and methods stand in relation to major themes in contemporary and interdisciplinary scholarship

PhD students develop their own questions. These questions should focus on the three areas of expertise as identified in consultation between the student and advisor. At least three questions should be developed for each of the three areas. The committee may ask for more than three. At this point, the committee selects four examination questions. The committee may constrain, expand, or otherwise edit any of the student-written questions. The student has two weeks to write the responses (four to five pages to each question). Approximately one to three weeks after turning in the written responses, the student defends the responses orally. Please see the geography department's *Graduate Program Handbook* for additional details.

Within nine months of completing the comprehensive examination, the student must present a dissertation proposal for approval by the student's dissertation committee. The completed dissertation, the capstone of the doctoral program, presents the results of substantive and original research on a significant geographic problem. It is defended in a public oral presentation.

Courses

GEOG 141. The Natural Environment. 4 Credits.

The earth's physical landscapes, vegetation patterns, weather, and climate; emphasis on the dynamic interactions among climate, landforms, vegetation, and soils.

GEOG 142. Human Geography. 4 Credits.

The spatial organization of humans and their activities on Earth's surface. Cultural, political, and economic influences shaping places and their interconnections.

GEOG 181. Our Digital Earth. 4 Credits.

Exploring the emergence of geospatial data and technologies that are pervasive in our everyday lives and how they are shaping society.

GEOG 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

GEOG 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

GEOG 201. World Regional Geography. 4 Credits.

Introduction to the world's cultural regions. Study of the cultural and environmental factors that make different parts of the world distinct.

GEOG 202. Geography of Europe. 4 Credits.

Physical and cultural processes that have shaped the rural and urban landscapes of Europe.

GEOG 204. Geography of Russia and Neighbors. 4 Credits.

Natural regions, major population groups, and the economic development of the former Union of Soviet Socialist Republics.

GEOG 205. Geography of Pacific Asia. 4 Credits.

Physical, cultural, and economic processes that have shaped the rural and urban landscapes of Pacific Asia.

GEOG 208. Geography of the United States and Canada. 4 Credits.

Historical and geographical analysis of the physical and human geography of the U.S. and Canada. Topics include physical regions, settlement patterns, economic development, and urbanization. Offered alternate years.

GEOG 209. Geography of the Middle East and North Africa. 4 Credits.

Physical and cultural processes that have shaped the rural and urban landscapes of the Middle East and North Africa.

GEOG 214. Geography of Latin America. 4 Credits.

Physical, cultural, and economic processes that have shaped the rural and urban character of Latin America.

GEOG 281. The World and Big Data. 4 Credits.

Explores technical foundations and social and economic applications of big data along the "5V" dimensions of volume, variety, velocity, veracity, and visualization.

GEOG 285. Mapping With Drones. 4 Credits.

Understanding and applying the technologies, theories, and skills needed to acquire and convert drone photography into mapping applications.

GEOG 321. Climatology. 4 Credits.

Energy and moisture in the atmosphere, atmospheric circulation, controls of regional and microclimates, applied climatology, climatic variations, past and future climates.

Prereq: GEOG 141.

GEOG 322. Geomorphology. 4 Credits.

Landforming processes with emphasis on mass movements, rivers, eolian, glacial, and coastal processes. Special fee.

Prereq: GEOG 141 or GEOL 102 or 202.

GEOG 323. Biogeography. 4 Credits.

Relation of plants and animals to the environment, distribution of individual species, historical changes in plant distribution.

Prereq: one from GEOG 141, GEOL 103, 203, BI 370.

GEOG 341. Population and Environment. 4 Credits.

Patterns of population growth over history and place, current policies and programs, and impacts and trends in United States and international contexts. Includes method and theory.

GEOG 342. Geography of Globalization. 4 Credits.

Historical and geographical dimensions of globalization; emphasizes economic and social factors. Topics include multinationals, trade agreements, sustainability, global inequalities, and racial and gender divisions of labor.

GEOG 343. Society, Culture, and Place. 4 Credits.

Examines ways in which geographical context reflects and shapes cultural and social processes. Importance of place and territory in human affairs.

GEOG 360. Watershed Science and Policy. 4 Credits.

Physical and biological processes of watersheds; problems of land use, water quality, riparian zones, aquatic ecology; scientific basis of watershed management and policy. Special fee.

Prereq: GEOG 141, or GEOL 102 or 202, or BI 130 or 213.

GEOG 361. Global Environmental Change. 4 Credits.

Natural and human-induced environmental changes and their impact on different environmental systems. Not available to those who have taken GEOG 143.

Prereq: GEOG 141.

GEOG 391. Social Science Inquiry and Research. 4 Credits.

Understanding scientific inquiry, the scientific method and learning to critique social science research. Readings and discussion focus on the questions, methods, conclusions and outcomes of research.

GEOG 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

GEOG 401. Research: [Topic]. 1-21 Credits.

Repeatable.

GEOG 403. Thesis. 1-12 Credits.

Repeatable.

GEOG 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

GEOG 406. Field Studies: [Topic]. 1-6 Credits.

Repeatable.

GEOG 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GEOG 408. Workshop: [Topic]. 1-16 Credits.

Repeatable.

GEOG 409. Practicum: [Topic]. 1-21 Credits.

Repeatable.

GEOG 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable. Topics are listed in the class schedule each term.

GEOG 419. Professional Geographer. 2 Credits.

Explores the geographical perspective on world cultures and global issues, and prepares students how to articulate a spatial perspective and effectively communicate geographic training and skills to broader audiences.

GEOG 421. Advanced Climatology: [Topic]. 4 Credits.

Topics in climatology, including physical climatology, dynamic and synoptic climatology, and paleoclimatology. Repeatable when topic changes.

Prereq: GEOG 321.

GEOG 423. Advanced Biogeography: [Topic]. 4 Credits.

Selected topics in biogeography including relation of plants and animals to their environment, historical changes in plant distribution, and palynological analysis. Special fee. Repeatable when topic changes.

Prereq: GEOG 323.

GEOG 425. Hydrology and Water Resources. 4 Credits.

Emphasis on surface water including precipitation, evapotranspiration, surface runoff, and stream flow. Understanding and analysis of processes. Management for water supply and quality. Special fee.

Prereq: GEOG 321 or 322; MATH 111.

GEOG 427. Fluvial Geomorphology. 4 Credits.

Hydraulics and hydrology of stream channels; channel morphology and processes; drainage network development; fluvial deposits and landforms; field and analytical methods. Required field trips. Special fee.

Prereq: MATH 112; one from GEOG 322, GEOG 425, GEOL 334.

GEOG 430. Long-Term Environmental Change. 4 Credits.

Evolution of the physical landscape during the Quaternary period. Elements of paleoclimatology, paleoecology, and geomorphology. Required field trips. Special fee.

Prereq: GEOG 321, 322, or 323.

GEOG 433. Fire and Natural Disturbances. 4 Credits.

Wildfire and other landscape disturbance processes, historical and current patterns of fire, use and management of fire. Offered alternate years.

Prereq: BI 307 or GEOG 323 or BI 370.

GEOG 441. Political Geography. 4 Credits.

Spatial perspectives on global political patterns and processes. Relationship of political territories to resources, ethnic patterns, and ideological communities. Impact of political arrangements on landscapes.

Prereq: Junior standing.

GEOG 442. Urban Geography. 4 Credits.

Urbanization throughout the world, the structure of urban settlements; cities as regional centers, physical places, and homes for people; geographic problems in major urban environments.

Prereq: Junior standing.

GEOG 444. Cultural Geography. 4 Credits.

Patterns of culture as a force in human affairs. Dynamics of identity, place, and power. The creation of culture at different scales.

GEOG 445. Culture, Ethnicity, and Nationalism. 4 Credits.

Relationship of ethnic groups and nationality to landscapes, perception, and cultural geographic phenomena. Distribution of ethnic and national groups. Junior standing required.

GEOG 448. Tourism and Development. 4 Credits.

Tourism-related concepts and practices associated with tourism planning, development, marketing, and impacts in different geographic contexts.

GEOG 461. Environmental Alteration. 4 Credits.

Human alterations of the earth's major ecosystems. Consequences of human activity at different times and places with respect to soils, atmosphere, vegetation, landforms, and water.

Prereq: Junior standing.

GEOG 463. Geography, Law, and the Environment. 4 Credits.

Values underlying American legal approaches to environmental issues; the role of laws in reflecting and shaping human understanding and use of the environment. Special fee.

Prereq: Junior standing.

GEOG 465. Environment and Development. 4 Credits.

Critical analysis of development concepts. Economic activity and environmental impacts. Sustainable development. Development projects and landscapes in the industrializing world.

Prereq: Junior standing.

GEOG 467. International Water Policy. 4 Credits.

Examines problems in water policy and governance in a global context. Draws on interdisciplinary perspectives, compares case studies, and analyzes institutions.

GEOG 468. Contemporary Food Systems. 4 Credits.

Explores contemporary food systems at local, national, and global scales. Emphasis on the political economy and sociocultural dynamics linking agriculture, food industries, and consumption.

GEOG 471. North American Historical Landscapes. 4 Credits.

Examines the origin and evolution of cultural landscapes in North America through historical and contemporary sources, and draws upon the local region for student projects.

Prereq: Junior standing.

GEOG 475. Advanced Geography of Non-European-American Regions: [Topic]. 4 Credits.

Repeatable. Examination of the settlement patterns, regional economies, political organization, and character of the landscapes of selected major regions of the non-European and American world. Repeatable when region changes.

GEOG 481. GIScience I. 4 Credits.

Introduction to geographic information science, geographic information systems (GIS), the current population survey (CPS), remote sensing, and cartography. Sequence with GEOG 482/582, 491/591.

GEOG 482. GIScience II. 4 Credits.

Spatial data collection, spatial data models, database design, data editing, geographic information system (GIS) project management, and advanced topics in geographic information science. Sequence with GEOG 481/581, 491/591, 493/593.

Prereq: GEOG 481.

GEOG 485. Remote Sensing I. 4 Credits.

Introduction to remote sensing science including its physical basis, instruments, platforms, data, processing methods, and applications. Sequence with GEOG 486/586.

Prereq: GEOG 481.

GEOG 486. Remote Sensing II. 4 Credits.

The use of digital electromagnetic data for classification, mapping, and monitoring biologic, hydrologic, atmospheric, geologic, and human processes and environmental change. Sequence with GEOG 485/585.

Prereq: GEOG 485.

GEOG 490. GIScience: [Topic]. 4 Credits.

Repeatable. Advanced topics on geographic information systems science including spatial analysis and modeling, data visualization, cartography, volunteered geographic information, GIS programming. Repeatable five times for a maximum of 24 credits.

Prereq: GEOG 481 or GEOG 311.

GEOG 491. Advanced Geographic Information Systems. 4 Credits.

Automated processing of geospatial data using Python scripting language. Programming for spatial analysis such as 3-D and network modeling; processing of big data (satellite imagery, climate data, demographic information). Sequence with GEOG 481/581, 482/582.

Prereq: GEOG 482.

GEOG 493. Advanced Cartography. 4 Credits.

Map design and production methods; use of color, cartographic visualization, graphing, data graphics theory, and integration of geographic information systems (GIS) and graphics tools. Sequence with GEOG 481/581, 482/582.

Prereq: GEOG 481.

GEOG 494. Spatial Analysis. 4 Credits.

Introduction to a variety of spatial analysis techniques that can be used for understanding and modeling geographic phenomena. Series.

Prereq: GEOG 481.

GEOG 495. Geographic Data Analysis. 4 Credits.

Analysis and display of geographical data by traditional data-analytical methods and by scientific-visualization approaches.

Prereq: GEOG 481.

GEOG 496. Location-Aware Systems. 4 Credits.

Explores technical fundamentals of location-aware systems, such as location models and location-based services, as well as challenges such as user privacy.

Prereq: GEOG 281.

GEOG 497. Qualitative Methods in Geography. 4 Credits.

Explores conceptual and practical dimensions of qualitative research. Includes linking theory and method; research question formulation; project design; ethics; data gathering, analysis, and presentation.

Prereq: GEOG 341, 342, or 343.

GEOG 498. Geospatial Project Design. 4 Credits.

Introduction to methods for designing and implementing professional projects involving geospatial data, technologies, and analytical methods.

Prereq: GEOG 481.

GEOG 503. Thesis. 1-16 Credits.

Repeatable.

GEOG 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GEOG 508. Workshop: [Topic]. 1-16 Credits.

Repeatable.

GEOG 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable. Topics are listed in the class schedule each term.

GEOG 521. Advanced Climatology: [Topic]. 4 Credits.

Topics in climatology, including physical climatology, dynamic and synoptic climatology, and paleoclimatology. Repeatable when topic changes.

GEOG 523. Advanced Biogeography: [Topic]. 4 Credits.

Selected topics in biogeography including relation of plants and animals to their environment, historical changes in plant distribution, and palynological analysis. Special fee. Repeatable when topic changes.

GEOG 525. Hydrology and Water Resources. 4 Credits.

Emphasis on surface water including precipitation, evapotranspiration, surface runoff, and stream flow. Understanding and analysis of processes. Management for water supply and quality. Special fee.

GEOG 527. Fluvial Geomorphology. 4 Credits.

Hydraulics and hydrology of stream channels; channel morphology and processes; drainage network development; fluvial deposits and landforms; field and analytical methods. Required field trips. Special fee.

GEOG 530. Long-Term Environmental Change. 4 Credits.

Evolution of the physical landscape during the Quaternary period. Elements of paleoclimatology, paleoecology, and geomorphology. Required field trips. Special fee.

GEOG 533. Fire and Natural Disturbances. 4 Credits.

Wildfire and other landscape disturbance processes, historical and current patterns of fire, use and management of fire. Offered alternate years.

GEOG 541. Political Geography. 4 Credits.

Spatial perspectives on global political patterns and processes. Relationship of political territories to resources, ethnic patterns, and ideological communities. Impact of political arrangements on landscapes.

GEOG 542. Urban Geography. 4 Credits.

Urbanization throughout the world, the structure of urban settlements; cities as regional centers, physical places, and homes for people; geographic problems in major urban environments.

GEOG 544. Cultural Geography. 4 Credits.

Patterns of culture as a force in human affairs. Dynamics of identity, place, and power. The creation of culture at different scales.

GEOG 545. Culture, Ethnicity, and Nationalism. 4 Credits.

Relationship of ethnic groups and nationality to landscapes, perception, and cultural geographic phenomena. Distribution of ethnic and national groups.

GEOG 548. Tourism and Development. 4 Credits.

Tourism-related concepts and practices associated with tourism planning, development, marketing, and impacts in different geographic contexts.

GEOG 561. Environmental Alteration. 4 Credits.

Human alterations of the earth's major ecosystems. Consequences of human activity at different times and places with respect to soils, atmosphere, vegetation, landforms, and water.

GEOG 563. Geography, Law, and the Environment. 4 Credits.

Values underlying American legal approaches to environmental issues; the role of laws in reflecting and shaping human understanding and use of the environment. Special fee.

GEOG 565. Environment and Development. 4 Credits.

Critical analysis of development concepts. Economic activity and environmental impacts. Sustainable development. Development projects and landscapes in the industrializing world.

GEOG 567. International Water Policy. 4 Credits.

Examines problems in water policy and governance in a global context. Draws on interdisciplinary perspectives, compares case studies, and analyzes institutions.

GEOG 568. Contemporary Food Systems. 4 Credits.

Explores contemporary food systems at local, national, and global scales. Emphasis on the political economy and sociocultural dynamics linking agriculture, food industries, and consumption.

GEOG 571. North American Historical Landscapes. 4 Credits.

Examines the origin and evolution of cultural landscapes in North America through historical and contemporary sources, and draws upon the local region for student projects.

GEOG 575. Advanced Geography of Non-European-American Regions: [Topic]. 4 Credits.

Repeatable. Examination of the settlement patterns, regional economies, political organization, and character of the landscapes of selected major regions of the non-European and American world. Repeatable when region changes.

GEOG 581. GIScience I. 4 Credits.

Introduction to geographic information science, geographic information systems (GIS), the current population survey (CPS), remote sensing, and cartography. Sequence with GEOG 482/582, 491/591.

GEOG 582. GIScience II. 4 Credits.

Spatial data collection, spatial data models, database design, data editing, geographic information system (GIS) project management, and advanced topics in geographic information science. Sequence with GEOG 481/581, 491/591, 493/593.

Prereq: GEOG 581.

GEOG 585. Remote Sensing I. 4 Credits.

Introduction to remote sensing science including its physical basis, instruments, platforms, data, processing methods, and applications. Sequence with GEOG 486/586.

Prereq: GEOG 581.

GEOG 586. Remote Sensing II. 4 Credits.

The use of digital electromagnetic data for classification, mapping, and monitoring biologic, hydrologic, atmospheric, geologic, and human processes and environmental change. Sequence with GEOG 485/585.

Prereq: GEOG 585.

GEOG 590. GIScience: [Topic]. 4 Credits.

Advanced topics on geographic information systems science including spatial analysis and modeling, data visualization, cartography, volunteered geographic information, GIS programming. Repeatable five times for a maximum of 24 credits.

Prereq: GEOG 581.

GEOG 591. Advanced Geographic Information Systems. 4 Credits.

Socioeconomic analysis with geographic information systems (GIS) and the U.S. census, network modeling, 3-D models of natural and urban landscapes, web-based GIS and programming. Sequence with GEOG 481/581, 482/582.

Prereq: GEOG 582.

GEOG 593. Advanced Cartography. 4 Credits.

Map design and production methods; use of color, cartographic visualization, graphing, data graphics theory, and integration of geographic information systems (GIS) and graphics tools. Sequence with GEOG 481/581, 482/582.

Prereq: GEOG 582.

GEOG 594. Spatial Analysis. 4 Credits.

Introduction to a variety of spatial analysis techniques that can be used for understanding and modeling geographic phenomena. Series.

Prereq: GEOG 581.

GEOG 595. Geographic Data Analysis. 4 Credits.

Analysis and display of geographical data by traditional data-analytical methods and by scientific-visualization approaches.

Prereq: GEOG 581.

GEOG 596. Location-Aware Systems. 4 Credits.

Explores technical fundamentals of location-aware systems, such as location models and location-based services, as well as challenges such as user privacy.

Prereq: GEOG 581.

GEOG 597. Qualitative Methods in Geography. 4 Credits.

Explores conceptual and practical dimensions of qualitative research. Includes linking theory and method; research question formulation; project design; ethics; data gathering, analysis, and presentation.

GEOG 598. Geospatial Project Design. 4 Credits.

Introduction to methods for designing and implementing professional projects involving geospatial data, technologies, and analytical methods.

GEOG 601. Research: [Topic]. 1-16 Credits.

Repeatable.

GEOG 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

GEOG 603. Dissertation. 1-16 Credits.

Repeatable.

GEOG 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

GEOG 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

GEOG 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GEOG 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

GEOG 609. Practicum: [Topic]. 1-16 Credits.

Repeatable.

GEOG 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

GEOG 611. Theory and Practice of Geography I. 4 Credits.

Introduction to professional practice in geography and the development of geographic concepts and theories from Ancient times through the mid-twentieth century. Sequence with GEOG 612, 613.

GEOG 612. Theory and Practice of Geography II. 4 Credits.

The development of geographic concepts and theories from the mid-20th century to the present. Students learn to refine effective geographic research questions. Sequence with GEOG 611 and 613.

Prereq: GEOG 611.

GEOG 613. Research Design. 4 Credits.

Examines main components of research design, including research questions, methodological approach, institutional review boards, funding programs, proposal writing, and application. Sequence with GEOG 611 and 612.

Prereq: GEOG 612.

GEOG 631. Progress in Physical Geography. 1 Credit.

Recent developments in climatology, geomorphology, hydrology, and biogeography. Lectures, readings, and presentation of faculty and student works in progress. Repeatable for maximum of 12 credits.

GEOG 632. Progress in Human Geography. 1 Credit.

Recent developments in cultural, economic, environmental and political geography. Lectures, readings, and presentation of faculty and student works in progress. Repeatable for maximum of 12 credits.

GEOG 633. Progress in Geographic Information Science. 1 Credit.

Recent developments in cartography, GIS, remote sensing, data analysis, and visualization. Lectures, readings, and presentation of faculty and student works in progress. Repeatable for maximum of 12 credits.

German and Scandinavian

Ian F. McNeely, Department Head

541-346-4051
202 Friendly Hall
1250 University of Oregon
Eugene, Oregon 97403-1250

The Department of German and Scandinavian offers a range of courses and degree programs, from instruction in beginning German and Swedish through a wealth of general-education and advanced undergraduate and graduate offerings in the literatures and cultures of German-speaking and Scandinavian Europe. Students may earn a bachelor of arts (BA) or a bachelor of science (BS) degree with a focus on German language, literature, and culture; interdisciplinary German and Scandinavian studies; or Scandinavian. Minors in all three of these focuses are also possible, and many undergraduates pursue concurrent degrees with second majors or minors in other departments and programs. At the graduate level, the department offers the master of arts (MA) and doctor of philosophy (PhD) degrees in German. Our five-year combined BA/MA program is an excellent option for motivated students. Ours is the only program in the state of Oregon that grants a PhD in German.

Preparation

The department recommends that students intending to major in German have at least some high school German or its equivalent. With careful planning it is also possible to complete a bachelor's degree in German by starting at the introductory level in our program. Our Scandinavian programs, which focus on Swedish, presume no prior knowledge of the language. Interest in the literature, film, history, art, politics, and geography of German-speaking and Scandinavian Europe is also helpful.

Careers

Students who graduate with a degree in German or Scandinavian typically enter a great variety of occupations, including but by no means limited to those with a direct connection to the languages and countries of Europe. Proficiency in a second language opens career opportunities in any number of fields that demand superior skills in oral and written communication, critical thinking and analysis, and intercultural understanding. The department's alumni have found positions in media and communications, government and public service, international business and law, education and teaching, social services, and the travel and tourism industry. Many go on to graduate school in education, law, the humanities, and other fields. Particularly in combination with another major or minor, the career possibilities are limitless.

Study Abroad

The department encourages all its students to study abroad in Germany or Scandinavia, and provides a scholarship funding to majors (and some minors) who are interested in an approved study-abroad program. Interested students should contact the department or consult a Global Education Oregon advisor in the Office of International Affairs.

Germany

The department encourages students of German to study in Germany on one of the many UO-sponsored exchange programs. Possibilities include the yearlong Baden-Württemberg program and the intensive Heidelberg accelerated program during spring term. Study for one or two months in summer is also available in Berlin. Students may also study for one or two terms in Vienna. We encourage all students to study abroad or to attend summer school programs such as the Deutsche Sommerschule am Pazifik in Portland.

Students in University of Oregon overseas study programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. See **Study Abroad** in the Supplementary Academic Programming section of this catalog.

For more information, students should consult departmental representatives and the Global Education Oregon office. Students working toward a German major or minor must consult an undergraduate advisor before beginning any study abroad program in order to ensure that departmental requirements can be met.

German majors with a focus in language, literature, and culture must complete six courses on the UO campus, two of which must be 400-level courses with the GER subject code, unless they intend to graduate in absentia while enrolled through the Baden-Württemberg program. German majors with a focus on interdisciplinary German Studies must complete three courses on the UO campus, one of which must have a GER subject code.

Denmark, Finland, Norway, and Sweden

Students in Scandinavian are strongly encouraged to spend a year studying in an exchange program at Denmark's International Study Program in Copenhagen, at Copenhagen Business School, at Aalborg University in Denmark, at the University of Tampere in Finland, at the University of Bergen or the University of Oslo in Norway, or at the University of Uppsala in Sweden. For more information, consult departmental advisors in Scandinavian.

Faculty

Susan C. Anderson, professor (20th- and 21st-century German and Austrian literature, literary theory, gender and diversity). BA, 1978, North Carolina, Asheville; MA, 1981, PhD, 1985, North Carolina, Chapel Hill. (1986)

Corinne Bayerl, instructor (16th- to early 18th-century French and German literature and philosophy; gender questions; history of pedagogy). See **Comparative Literature**.

Sonja Boos, associate professor (19th- through 21st-century German literature, culture, and film; critical thought). MA, 1997, Heinrich-Heine Universität Düsseldorf; MA, 2004, PhD, 2008, Princeton. (2013)

Kenneth S. Calhoun, professor (Enlightenment, Romanticism, literary and film history and theory). See **Comparative Literature**.

D. Gantt Gurley, associate professor (Scandinavian literature and folklore, Old Norse literature, Jewish studies). BA, 1994, Bard College; MA, 2002, PhD, 2007, California, Berkeley. (2009)

Martin Klebes, associate professor (18th- to 21st-century literature, philosophy, critical thought). PhD, 2003, Northwestern. (2007)

Jeffrey S. Librett, professor (literature since 1750, theoretical discourses, Jewish studies). BA, 1979, Yale; MA, 1981, Columbia; PhD, 1989, Cornell. (2004)

Dawn A. Marlan, lecturer (German and European literature and culture from 1700 forward; modernist novel). BA, 1989, Bennington College; MA, 1991, PhD, 2000, Chicago. (2004)

Alexander Mathäs, professor (18th- to 20th-century German literature, literary theory, cultural theory). Staatsexamen, 1981, Tübingen; MA, 1984, Oregon; PhD, 1990, Texas, Austin. (1996)

Benjamin Mier-Cruz, instructor (19th- through 21st-century Scandinavian literature and film, queer theory, Swedish language and pedagogy). BA, 2004, Arizona State; MA, 2006, PhD, 2013, California, Berkeley. (2017)

Dorothee Ostmeier, professor (18th- and 20th-century literature, culture, philosophy). Staatsexamen, 1984, MA, 1985, Ruhr; PhD, 1993, Johns Hopkins. (2001)

Michael Stern, associate professor (Nietzsche, Kierkegaard, 19th-century Scandinavian literature). BA, 1993, MA, 1995, PhD, 2000, California, Berkeley. (2001)

Matthias Vogel, senior instructor (second-language acquisition); language coordinator, German language programs; coordinator, German Global Scholars. BA, 1993, Johannes Gutenberg, Mainz; MA, 1996, Oregon. (2011)

Emeriti

James R. McWilliams, associate professor emeritus. BA, 1951, MA, 1957, PhD, 1963, California, Berkeley. (1960)

Helmut R. Plant, associate professor emeritus. BA, 1957, Fairmont; MA, 1961, PhD, 1964, Cincinnati. (1966)

Karla L. Schultz, professor emerita. BA, 1967, Alma; MA, 1968, Washington (Seattle); MA, 1980, PhD, 1984, Oregon. (1987)

Ingrid A. Weatherhead, senior instructor emerita. BA, 1950, MA, 1951, Puget Sound. (1962)

Virpi Zuck, professor emerita. BA, 1964, MA, 1965, University of Helsinki; PhD, 1977, Wisconsin, Madison. (1974)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts or Bachelor of Science: German Language, Literature, and Culture**
- **Bachelor of Arts or Bachelor of Science: Scandinavian Focus**
- **Minor in German** (p.)
- **Minor in Scandinavian**

Undergraduate Studies

The Department of German and Scandinavian offers a bachelor of arts (BA) and bachelor of science (BS) degree with a major in German. Students may focus their studies by emphasizing German language, literature, and culture; Scandinavian; or German studies. The Department of German and Scandinavian also offers a combined bachelor of arts or science–master of arts degree in German. In this program, students

complete the requirements for both degrees in a total of five years. For further information, see the Graduate Studies section.

Preparation

German majors and minors must demonstrate German language proficiency through successful completion of second-year German or a placement examination. Incoming students with experience in German must take the placement examination during registration week to help with proper placement.

Careers

A bachelor's degree in German enables students to pursue careers in college and secondary teaching, international business, government and foreign service, tourism, and translation and editorial work. Recent graduates of the department have been successful applicants to schools of law and business as well as graduate programs in German, Scandinavian, linguistics, history, comparative literature, and international studies. Majors planning to pursue graduate studies are encouraged to write an honors thesis.

Major Requirements

Students intending to major with a focus in German language, literature, and culture or interdisciplinary German studies must first acquire proficiency in the German language, typically demonstrated by satisfactory completion of the third term of Second-Year German (GER 203) or a placement exam. Thereafter, students may begin to take upper-division courses taught in German.

The department does not accept a grade of C– or lower in any course used to fulfill requirements for a major in German.

German Language, Literature, and Culture Focus

Code	Title	Credits
	Four upper-division German language courses	16
	Eight upper-division German literature and culture courses	32
	Total Credits	48

Of the requirements listed above, the following rules apply:

- Six courses must be taken in the UO Department of German and Scandinavian
- At least two courses must be 400-level courses with the GER subject code, and must be taken at the University of Oregon; one of the two must be in literature, culture, or theory
- One course may be taken pass/no pass
- Up to two courses taught in English may count toward the major

The following courses may not be used to satisfy major requirements:

Code	Title	Credits
GER 199	Special Studies: [Topic]	1-5
GER 405	Reading and Conference: [Topic]	1-16
GER 406	Special Problems: [Topic]	1-16
GER 408	Workshop: [Topic]	1-16
GER 409	Practicum: [Topic] ¹	1-4

¹ 4 credits of Practicum: Teaching Internship (GER 409) will satisfy a requirement for the major or minor.

Since all courses are not offered every year, plans should be made well in advance so that students can take prerequisites for 400-level courses. Specific questions should be addressed to departmental undergraduate German advisors.

Scandinavian Focus

Code	Title	Credits
	One topical upper-division course from related field (advisor approved)	4
SWED 201–203	Second-Year Swedish (or the equivalent)	12
	Eight Scandinavian literature or culture courses	32
Total Credits		48

Of the requirements listed above, the following rules apply:

- Three courses must be taken in the UO Department of German and Scandinavian
- One literature or culture course may be taken pass/no pass

Majors in Scandinavian must be proficient in Swedish at the third-year level, demonstrated either by evaluation by the Scandinavian advisor or by successful completion of work beyond Second-Year Swedish (SWED 203). Typically, this will occur through independent study in Reading and Conference: [Topic] (SWED 405), work with supplementary texts in advanced Swedish as extra requirements in the department's Scandinavian courses, and/or through study abroad in Scandinavia. Students should plan their course work carefully in consultation with a departmental undergraduate advisor in Scandinavian. They may also satisfy this requirement in Danish or Norwegian.

German and Scandinavian Studies Focus

The German and Scandinavian studies focus combines advanced language training and German literature courses in an interdisciplinary program that includes courses in history, philosophy, political science, art history, music, religious studies, and Judaic studies. The focus is described in the **German Studies** section of this catalog.

Honors

To earn a bachelor's degree with departmental honors, a student must maintain at least a 3.50 grade point average (GPA) and write an honors essay or thesis approved by the departmental honors committee for 4 credits in Thesis (GER 403).

Minor in German

The German minor correlates well with studies that have an international or European concentration. It is particularly useful for students of international studies, international business, European history, medieval studies, sociology, political science, journalism, linguistics, art history, music history, other languages, theater, and related fields.

Code	Title	Credits
	Seven upper-division German courses ¹	28
Total Credits		28

¹ May include courses in language, literature, or culture. Only one course taught in English may be applied to the minor. No courses from other departments count toward the minor in German. Grades of at least mid-C or P (pass) must be earned in all courses used to satisfy requirements for the minor. One course may be taken pass/no pass. At least 12 credits must be taken in the UO Department of German and Scandinavian.

The following courses may not be used to satisfy minor requirements:

Code	Title	Credits
GER 199	Special Studies: [Topic]	4
GER 405	Reading and Conference: [Topic]	4
GER 406	Special Problems: [Topic]	4
GER 408	Workshop: [Topic]	4
GER 470	German for Reading Knowledge I	4
GER 471	German for Reading Knowledge II	4

Minor in Scandinavian

The Scandinavian minor correlates well with studies that have an international or European concentration. It is particularly useful for students of international business, European history, sociology, political science, theater arts, and art history.

Code	Title	Credits
	Successful completion of one year of Swedish or equivalent	12
	Six Scandinavian literature or culture courses	24
Total Credits		36

Of the requirements listed above, the following rules apply:

- Three courses must be taken in the UO Department of German and Scandinavian
- One literature or culture course may be taken pass/no pass

Minors in Scandinavian must demonstrate basic aptitude in Swedish, demonstrated either by evaluation by the Scandinavian advisor or by successful completion of First-Year Swedish (SWED 103) with a grade of mid-C or better.

Specific questions about the Scandinavian minor should be addressed to departmental undergraduate advisors in Scandinavian.

Minor in German and Scandinavian Studies

The minor in interdisciplinary German and Scandinavian studies is described in the **German Studies** section of this catalog.

General-Education Requirements

The Department of German and Scandinavian offers many courses, including several taught in English, that satisfy university general-education requirements. See the Group Requirements and Multicultural Requirement sections of this catalog under **Bachelor's Degree Requirements** (<http://catalog.uoregon.edu/bachelorrequirements>).

Kindergarten through Secondary Teaching Careers

Students who complete the bachelor's degree with a major in German are eligible to apply for the College of Education's fifth-year licensure program in middle-secondary teaching, or the fifth-year licensure program

to become an elementary teacher. More information is available from the department's education advisors; see also the **College of Education** section of this catalog.

Some German courses may be applied to requirements for the certificate in second-language acquisition and teaching. See the **Linguistics** section of this catalog for a description of the certificate. More information is available from department advisors.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

	Total Credits	36	

¹ Beyond the German major and general-education requirements, this example includes 15 further courses for a second major and/or electives for a total of 180 credits, with only three courses each term senior year. With a full load of four courses per term, which would add up to 192 credits, there would room for 18 further courses.

- ² The first of eight upper-division German literature and culture courses for the major, and the one that may be taken in English language. For this and subsequently listed upper-division literature and culture courses in the Department of German and Scandinavian, any other 300- or 400-level courses could be substituted.
- ³ Advanced German grammar review completed (for increased fluency). Four upper-division German language courses now complete (including 300-level language courses).

Graduate Studies

The graduate program in German offers the master of arts (MA) in German, either through a regular two-year program or through a combined BA-MA program that enables students to complete the requirements for both the BA and the MA in German in five years. The program also offers the doctor of philosophy (PhD) degree in German, for which applicants may apply either with a BA or an MA already earned. The requirements for the PhD include one year of graded course work past the MA level and a written dissertation. The MA degree prepares students for teaching German language and culture up through the secondary-school level (in conjunction with teacher certification), while the PhD degree, as the highest degree in the field, is generally expected for an academic career involving both research and teaching.

The graduate curriculum acquaints students with the history of German letters (with a primary focus on modernity since the enlightenment), places this history in a European context, and provides tools for a critical analysis of the literary, theoretical, and cinematic discourses involved. The program encourages comparative, theoretically oriented work.

Core Curriculum

Students take one course each term. These courses are grouped according to common themes to give the program a topical and critical coherence. Core courses are paired with seminars of related or complementary content, and students are encouraged to explore connections between courses.

In the first year, core courses address a specific genre (narrative, drama, and lyric). While their content may vary with the instructor, they are

intended to present in general terms the history of the genre itself and of critical thinking about that genre. In the second year, core courses have less traditional themes and present a broader concept of textuality.

Code	Title	Credits
GER 621	Narrative	4
GER 622	Drama	4
GER 623	Lyric	4
GER 624	Critical and Philosophical Prose ¹	4
GER 625	Translations-Transformations ²	4
GER 690	Literary Studies: [Topic] ³	4

¹ Acquaints students with important aspects of German philosophical discourse since Kant.

² Presents the theory and practice of translation. "Transformations" is added to suggest that translation is not limited to written texts (e.g., the sister arts, literature into film).

³ Various topics in research methods, literary theory, history of German literature, and advanced methodology.

Beyond course work, the program features close mentoring, including guidance for developing portfolio papers that expand on writing done for courses, and, at the PhD level, a dissertation-writing colloquium in which students and faculty members join in responding to ongoing dissertation work by students in the program.

Students should consult the director of graduate studies in the German and Scandinavian department for more information on graduate programs. Information and application materials are also available on the department website.

Graduate Specialization in Translation Studies

Students may choose to complete a graduate specialization in translation studies. Translation studies examines the theory, description, and practice of translation, interpretation, and localization between languages and language-users. The specialization offers graduate students the opportunity to receive recognition for work in this complex academic discipline. For requirements, visit translationstudies.uoregon.edu/graduate-specialization.

Other relevant graduate certificate programs and graduate specializations with which students may supplement their PhD work in German include women's, gender, and sexuality studies; nonprofit management; and new media and culture. For details, visit gradschool.uoregon.edu/academic-programs.

Grammar and composition, reading selections from representative authors, conversation.

Prereq: GER 201 or GER 204.

GER 203. Second-Year German. 4 Credits.

Grammar and composition, reading selections from representative authors, conversation.

Prereq: GER 202.

GER 206. Law in Literature. 4 Credits.

Introduction to German literature and key concepts of Germany's legal tradition with a focus on the connection between legal codes and their representations in fiction.

GER 220M. From Kierkegaard to Kafka. 4 Credits.

Survey of the existential tradition in German and Scandinavian literature, philosophy, drama, and film. Historical and conceptual developments are considered, from Kierkegaard to Kafka. Taught in English. Multilisted with SCAN 220M.

GER 221. Postwar Germany: Nation Divided. 4 Credits.

Introduction to literary and cultural movements of public dissent, including 1960s student revolutions, in postwar Germany. Conducted in English.

GER 222. Voices of Dissent in Germany. 4 Credits.

Key debates in German culture, including the adequate representation of the Holocaust, literature in society, and the roles of ethnic and gender identities within the nation. Conducted in English.

GER 223. Germany: A Multicultural Society. 4 Credits.

Examines the multiethnic complexities of German, Austrian, and/or Swiss societies through the writings of African, Turkish, or Jewish Germans.

Period of focus varies. Conducted in English.

GER 250. The Culture of Money. 4 Credits.

Explores ideas about money, value, and exchange in German-speaking cultures from selected moments in modern history through readings of literature, philosophy, and the arts. Series with GER 251, GER 252.

GER 251. Sexuality. 4 Credits.

Examines discourses on sexuality (e.g., sexual norms, gender roles, and divergences from them) in modern German, Austrian, and Swiss-German contexts through literature, essays, and films. Series with GER 250, GER 252.

GER 252. War, Violence, Trauma. 4 Credits.

Examines works of literature, thought, art, music, and film on subjects of war, violence, and trauma in German and Austrian cultural history during one or more selected postmedieval epochs. Series with GER 250, GER 251.

GER 300. Temporary Group-Satisfying Course. 4 Credits.**GER 311. Intermediate Language Training. 4 Credits.**

Extensive practice in speaking and writing German; complex grammatical structures in writing.

Prereq: GER 203, GER 205, or equivalent.

GER 312. Intermediate Language Training. 4 Credits.

Extensive practice in speaking and writing German; complex grammatical structures in writing.

Prereq: GER 203, GER 205, or equivalent.

GER 313. Intermediate Language Training. 4 Credits.

Extensive practice in speaking and writing German; complex grammatical structures in writing. Option during 313 to take the Zertifikat Deutsch exam.

Prereq: GER 312.

GER 340. Introduction to German Culture and Society. 4 Credits.

Writings by such figures as Kant, Marx, Freud, and Weber. The emergence of Germany as a cultural and political entity explored through literature, film, and art. Readings, discussion, and written assignments in German. Offered alternate years.

Coreq: GER 311.

GER 341. Introduction to German Culture and Society. 4 Credits.

Writings by such figures as Kant, Marx, Freud, and Weber. The German crisis of modernization. Readings, discussion, and written assignments in German. Offered alternate years.

Coreq: GER 311.

GER 350. Genres in German Literature. 4 Credits.

Studies on such genres in German literature as Novelle, 20th-century drama, political poetry. No knowledge of German required; readings and discussions in English.

GER 351. Diversity in Germany. 4 Credits.

Examines the social construction of identity in German literature and culture. Addresses topics of plural voices and tolerance in German-speaking cultures. Topics vary. Conducted in English.

GER 352. Authors in German Literature. 4 Credits.

Representative works by writers such as Lessing, Schiller, Hoffmann, Brentano, Droste-Hulshoff, Kafka, Fleisser, Brecht, and Nietzsche. No knowledge of German required; readings and discussions in English.

GER 354. German Gender Studies. 4 Credits.

Student oral presentations and written papers on such topics as men and women writers of German romanticism, mothers and daughters in German literature, comparison of men and women dramatists. No knowledge of German required; readings and discussions in English.

GER 355. German Cinema: History, Theory, Practice. 4 Credits.

In-depth analysis of various facets of German cinema. Topics include film and the Third Reich, cinema and technology, German filmmakers in American exile, German New Wave. Conducted in English.

GER 356. German Fairy Tales. 1-4 Credits.

The German fairy tale in historical and theoretical context, from the Brothers Grimm and romantic tales to adaptations by Tchaikovsky and Sendak. Taught in English.

GER 357. Nature, Culture, and the Environment. 4 Credits.

Introduction to the contributions German writers, philosophers, scientists, and artists have made to changing notions of nature and its supposed opposition to culture. Offered alternate years.

GER 360. Introduction to German Literature: Poetry, Plays, Prose. 4 Credits.

Introduction to textual analysis--poetry, plays, and prose from 1800 to the present--in the context of major literary movements (romanticism, realism, modernism) and their social determinants. Focus on genre: poetry, plays, and prose.

Coreq: GER 311.

GER 361. Introduction to German Literature: Literary Movements. 4 Credits.

Introduction to textual analysis--poetry, plays, and prose from 1800 to the present--in the context of major literary movements (romanticism, realism, modernism) and their social determinants. Focus on literary movements.

Coreq: GER 311.

GER 362. Introduction to German Literature: Interpretive Models. 4 Credits.

Introduction to textual analysis--poetry, plays, and prose from 1800 to the present--in the context of major literary movements (romanticism, realism, modernism) and their social determinants. Focus on interpretive models.

Coreq: GER 311.

GER 366. Themes in German Literature. 4 Credits.

Significant literary texts organized by theme--crime and society, travels and explorations, nature and technology, relationships between the sexes, the Nazi past.

Coreq: GER 311.

GER 367. Themes in German Literature. 4 Credits.

Significant literary texts organized by theme--crime and society, travels and explorations, nature and technology, relationships between the sexes, the Nazi past.

Coreq: GER 311.

GER 368. Themes in German Literature. 4 Credits.

Significant literary texts organized by theme--crime and society, travels and explorations, nature and technology, relationships between the sexes, the Nazi past.

Coreq: GER 311.

GER 399. Special Studies: [Topic]. 1-5 Credits.

New topics or approaches appropriate for third-year German proficiency level. Content varies; focus may be on various aspects of German language, literature, or culture and civilization. Repeatable when topic changes.

Coreq: GER 311.

GER 401. Research: [Topic]. 1-16 Credits.

Repeatable.

GER 403. Thesis. 1-12 Credits.

Repeatable.

GER 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Recent topics are Doppelganger and Nietzsche.

GER 411. Advanced Language Training. 4 Credits.

Constant practice in speaking and writing with emphasis on complex syntactic structures as well as idiomatic nuances in German. Grammar.

Prereq: GER 311, 312, 313.

GER 412. Advanced Language Training. 4 Credits.

Constant practice in speaking and writing with emphasis on complex syntactic structures as well as idiomatic nuances in German. Writing.

Prereq: GER 311, 312, 313.

GER 413. Advanced Language Training. 4 Credits.

Constant practice in speaking and writing with emphasis on complex syntactic structures as well as idiomatic nuances in German. Speaking.

Prereq: GER 311, 312, 313.

GER 425. Play Performance: [Topic]. 4 Credits.

Extensive practice in effective oral communication with emphasis on correct pronunciation. Reading of the play and scene rehearsals in class; public performance at end of term. Repeatable.

Prereq: GER 203, GER 205, or equivalent.

GER 440. German Culture and Society: [Topic]. 4 Credits.

Cultural and sociopolitical aspects of Germany. Typical topics are the cultural history of the German forest, gender and terrorism, women and German film, peace movements. Repeatable when topic changes.

Prereq: one upper-division course GER literature or culture.

GER 460. German Literature: [Topic]. 4 Credits.

Representative writers (e.g., Lessing, Heine, Kafka, Brecht, Bachmann, or Wolf) or pervasive themes (e.g., peace movements, art and illusion, family and society, history and literature, the political imagination).

Repeatable when topic changes.

Prereq: one upper-division course GER literature or culture.

GER 470. German for Reading Knowledge I. 4 Credits.

Introduction to the reading of German, introducing most of the major grammatical categories and providing substantial basic and advanced vocabulary training. Students translate passages in their chosen fields. Sequence with GER 471.

GER 471. German for Reading Knowledge II. 4 Credits.

Completes the overview of German grammar, reviews selected grammatical points, expands knowledge of vocabulary, and enhances capacity to read and translate. Sequence with GER 470.

Prereq: GER 470.

GER 503. Thesis. 1-16 Credits.

Repeatable.

GER 507. Seminar: [Topic]. 1-16 Credits.

Repeatable. A recent topic is Experimental Poetry.

SCAN 316. History of Cinema. 4 Credits.

A survey of Nordic cinema from the silent era to the present. Films will be viewed and analyzed within their aesthetic and historical contexts. Taught in English. Offered alternate years.

SCAN 317. Directors, Movements, and Manifestos. 4 Credits.

A directed study of specific directors, movements, and manifestos from the Nordic cinematic tradition. Taught in English. Offered alternate years.

SCAN 325. Constructions versus Constrictions of Identity. 4 Credits.

Explores the notion of regional, ethnic, gender, and class identity in Scandinavian texts and culture. Topics include immigrant-emigrant experience, lore of the Arctic, folklore, Finland-Swedish writing. Conducted in English.

SCAN 341. Revisions of the Scandinavian Dream. 4 Credits.

Examines development of Scandinavian countries from impoverished kingdoms on the European periphery to modern, multicultural welfare societies. Analyzes patterns in the arts, social and political structures, ecological issues. Taught in English.

SCAN 343. Norse Mythology. 4 Credits.

Critical evaluation of the religious beliefs in Scandinavia from prehistory through the Viking Age. Taught in English. Offered alternate years.

SCAN 344. Medieval Hero and Monster. 4 Credits.

Study of medieval Scandinavian and Germanic literature addressing the remarkably fine line drawn between the heroes and monsters depicted. Offered alternate years.

SCAN 351. Periods in Scandinavian Literature. 4 Credits.

Possible topics are modern breakthrough and modernism in Scandinavian literature. Student discussion, oral presentations, and written papers. Readings and discussions in English.

SCAN 353. Scandinavian Women Writers. 4 Credits.

Examines social issues, especially gender, in literature written by women from Denmark, Finland, Iceland, Norway, and Sweden. Primary emphasis on 19th- and 20th-century texts.

SCAN 354. Genres in Scandinavian Literature. 4 Credits.

Recent topics include short narrative fiction and Scandinavian drama. Student discussion, oral presentations, and written papers. Readings and discussions in English.

German Studies

Jeffrey S. Librett, Program Director

541-346-0649

541-346-4051

202 Friendly Hall

1250 University of Oregon

Eugene, Oregon 97403-1250

The German Studies Program is supervised by the German Studies Committee, a group of scholars in the humanities, music, and social sciences who share a common interest in German culture, letters, history, and society.

The influence of German culture and letters on modern life is incalculable. In philosophy and religion; in sociology and psychology; in music, law, political science, and history—in every one of these fields and more, German-speaking thinkers have helped define our perception of the world. German and Scandinavian studies is an interdisciplinary program that offers undergraduates the opportunity to study these many influences in context with the society and cultures that produced them. It combines advanced language training with an interdisciplinary program of study that integrates courses in history, philosophy, political science, art history, music history, religious studies, and Judaic studies with the language and literature courses offered in the Department of German and Scandinavian. Students who choose the German and Scandinavian studies focus for the German major are encouraged to develop their language skills in German with an emphasis on reading and writing and to use these tools in all their course work.

Participating Faculty

Susan C. Anderson, German and Scandinavian

Corinne Bayerl, German and Scandinavian

Sonja Boos, German and Scandinavian

Jack Boss, music

Kenneth S. Calhoun, comparative literature

Joyce Cheng, history of art and architecture

James R. Crosswhite, English

Gantt Gurley, German and Scandinavian

Martin Klebes, German and Scandinavian

Lori Kruckenberg, music

Jeffrey Librett, German and Scandinavian

David M. Luebke, history

Alexander Mathas, German and Scandinavian

John McCole, history

Albert Narath, history of art and architecture

Dorothee Ostmeier, German and Scandinavian

Stephen Rodgers, music

Marian Smith, music

Michael Stern, German and Scandinavian

Bruce Harwood Tabb, UO Libraries

Daniela Vallega-Neu, philosophy

Matthias Vogel, German and Scandinavian

Peter Warnek, philosophy

Rocio Zambrana, philosophy

- **Bachelor of Arts**
- **Minor**

Undergraduate Studies

More information about courses applicable to the German and Scandinavian studies focus or the German and Scandinavian studies minor is available from the undergraduate advisor for German or the director of the German Studies Committee.

For students interested in combining such a major or minor with a European studies certificate, see the European Studies (<http://uoregon.edu/~gerscan/german/gerstudiesmajor.htm>) section of this catalog.

Bachelor of Arts in German: German and Scandinavian Studies Focus

German and Scandinavian studies is a focus for the German major offered by the Department of German and Scandinavian.

Requirements

The German and Scandinavian studies focus requires second-year language proficiency. Of the 48 credits beyond second-year language, at least 24 must be in courses taught by the UO Department of German and Scandinavian; at least 44 must be taken for a letter grade.

Code	Title	Credits
16 upper-division credits in courses taught in German or a Scandinavian language ¹		16
16 additional upper-division credits in approved courses		16
16 additional lower- or upper-division credits in approved courses		16
Completion of an approved capstone project		
Total Credits		48

¹ Eligible courses in this category include GER 311–313, GER 340–341, GER 360–499, and SWED 405.

Approved Courses

- German (GER) and Scandinavian (SCAN) courses numbered 210–499
- Courses taken at a European university taught in German or a Scandinavian language above the second-year level
- Courses from the preapproved list, which count automatically toward the major and the minor: European Union History (EURO 415), German History: [Topic] (HIST 342), Europe in the 20th Century: [Topic] (HIST 428), Medieval Central Europe: [Topic] (HIST 436), 16th-Century European Reformations (HIST 441), Early Modern German History: [Topic] (HIST 442), Modern Germany: [Topic] (HIST 443), The Holocaust (HIST 444), The Jewish Encounter with Modernity (JDST 213), The Music of Bach and Handel (MUS 351), History of Philosophy: 19th Century (PHIL 312), 19th-Century Philosophers: [Topic] (PHIL 453), Shadows of Modernity (PS 312), European Politics (PS 324)
- Other courses taken as part of an approved thematic pathway

Thematic Pathways. These are recommended course lists that include a significant number of approved course options beyond those on the preapproved list. Students are strongly encouraged to follow a thematic pathway, culminating in a capstone project, in consultation with a faculty

advisor. Details are posted on the department's website and are also available from the director of undergraduate studies.

Capstone Project. This is a piece of guided independent scholarly or creative work integrating knowledge acquired in courses for the major, typically as the culmination of a thematic pathway. It must be preapproved and either supervised or cosupervised by a faculty member in the department. This requirement typically will be met by a research paper of at least 15 pages or by a comparable scholarly or creative project in a 400-level course in an appropriate department, or through at least one credit of GER 401, 403, or 405; SCAN 401, 403, or 405; or SWED 401, 403, or 405. Work with non-English materials is strongly encouraged.

Double-Counting. Majors who seek an additional minor in either German or Scandinavian may count all credits for both. The same rule applies to minors who seek an additional major in either German or Scandinavian. Majors may not seek an additional major in either German or Scandinavian. The department encourages, and imposes no restrictions on, major or minor combinations with other programs.

Minor in German and Scandinavian Studies

The German and Scandinavian studies minor requires second-year language proficiency. Of the 24 credits beyond second-year language, at least 12 must be in courses taught by the UO Department of German and Scandinavian; at least 20 must be taken for a letter grade.

Code	Title	Credits
	12 upper-division credits in courses taught in German or a Scandinavian language ¹	12
	8 additional upper-division credits in approved courses	8
	4 additional lower- or upper-division credits in approved courses	4
	Completion of an approved capstone project	
	Total Credits	24

¹ Eligible courses in this category include GER 311–313, GER 340–341, GER 360–499, and SWED 405.

Approved courses are described in the Bachelor of Arts in German: German and Scandinavian Studies Focus section above.

History

Brett Rushforth, Department Head

541-346-5913
275 McKenzie Hall

The study of history offers a framework for a liberal education and the background that is essential for understanding the contemporary world. Through analyzing interpretive studies, accounts by witnesses to past events, and historical records, students come to appreciate the complexity of human experience. By examining changes in the past, they develop a broad perspective and the ability to weigh evidence and argument.

Faculty

Carlos Aguirre, professor (Latin America). BA, 1986, Lima (Peru); MA, 1990, Peru; PhD, 1996, Minnesota. (1996)

Leslie Alexander, associate professor (early African American and African diaspora, slavery, resistance movements). BA, Stanford; MA, PhD, Cornell. (2017)

Ina Asim, associate professor (premodern China). MA, 1982, PhD, 1992, Dr. phil. habil., 2001, Wurzburg. (2002)

Curtis Austin, associate professor. PhD, 1998, Mississippi State.

Steven Beda, assistant professor (20th-century United States, history of labor, environmental history). BA, 2002, Colorado, Boulder; MA, 2008, PhD, 2014, Washington (Seattle). (2015)

Lindsay F. Braun, associate professor (Africa). BS, 1994, Eastern Michigan; MA, 1997, Michigan State; PhD, 2008, Rutgers. (2009)

Jamie M. Bufalino, instructor (women and gender in history). BA, 1997, MA, 2001, PhD, 2009, California, Riverside. (2012)

Alexander Dracoby, senior instructor (modern Europe, military, medical). BA, 1987, Grinnell; MA, 1989, PhD, 1996, Chicago. (1995)

Andrew E. Goble, professor (premodern Japan, medical history, East Asia). BA, 1975, MA, 1981, Queensland; PhD, 1987, Stanford. (1990)

Bryna Goodman, professor (modern China). BA, 1978, Wesleyan; MA, 1982, PhD, 1990, Stanford. (1991)

Jeffrey E. Hanes, associate professor (modern Japan). AB, 1973, Williams; MA, 1978, PhD, 1988, California, Berkeley. (1993)

Robert S. Haskett, professor (Latin America). BA, 1975, California, Long Beach; MA, 1978, PhD, 1985, California, Los Angeles. (1988)

Annelise Heinz, assistant professor.

Ellen Herman, professor (modern United States). BA, 1979, Michigan; PhD, 1993, Brandeis. (1997)

Julie Hessler, associate professor (20th-century Russia, Europe). BA, 1988, Yale; MA, 1989, PhD, 1996, Chicago. (1995)

Ryan Tucker Jones, associate professor (early modern Europe, Russian empire, Atlantic history); Ann Swindells Chair in History. BA, 1998, Walla Walla; MA, 2001, Georgetown; PhD, 2008, Columbia. (2016)

Vera Keller, associate professor (history of science). BA, 2002, Harvard; PhD, 2008, Princeton. (2010)

R. Alan Kimball, associate professor (modern Russia). BA, 1961, Kansas; MA, 1963, PhD, 1967, Washington (Seattle). (1967)

David M. Luebke, professor (early modern Europe, Germany). BA, 1983, Nebraska; PhD, 1990, Yale. (1997)

Allison Madar, assistant professor.

Lindsey Mazurek, assistant professor.

John McCole, associate professor (European intellectual, cultural, and social; modern Europe; historiography and theory). BA, 1975, Brown; MA, 1982, PhD, 1988, Boston. (1994)

Ian F. McNeely, professor (Europe, the world). AB, 1992, Harvard; MA, 1993, PhD, 1998, Michigan. (2000)

Jeffrey Ostler, Carrie C. Beekman Professor of Northwest and Pacific History (American West). BA, 1979, Utah; MA, 1984, Oregon; PhD, 1990, Iowa. (1990)

Gabe Paquette, professor (intellectual history, Portuguese and Spanish history, history of European empires); dean, honors college. BA, 1999, Wesleyan; MA, 2001, National University of Ireland; MPhil, 2002, PhD, 2006, Cambridge. (2018)

Brett Rushforth, associate professor (colonial America, Atlantic world). BA, 1995, Utah; MA, 1998, Utah State; PhD, 2003, California, Davis. (2016)

George J. Sheridan Jr., professor (France, European socioeconomic). BA, 1969, Princeton; MA, 1974, PhD, 1978, Yale. (1976)

Arafaat Valiani, associate professor (South Asia). BFA, 1996, Concordia; MA, 1997, London School of Economics and Political Science; PhD, 2005, Columbia. (2012)

Marsha Weisiger, associate professor (environmental, Native American, American West); Julie and Rocky Dixon Chair in US Western History. BA, 1978, Arizona State; MA, 1991, PhD, 2000, Wisconsin, Madison. (2010)

Julie Weise, associate professor (20th-century United States, modern Mexico, global migration). BA, 2000, MA 2005, MPhil, 2006, PhD, 2009, Yale. (2013)

Lisa Wolverton, professor (medieval Europe). BSFS, 1986, Georgetown; MMS, 1991, PhD, 1997, Notre Dame. (2000)

Reuben Zahler, associate professor (Latin America). BA, 1991, Cornell; MA, 1999, PhD, 2005, Chicago. (2012)

Emeriti

Matthew Dennis, professor emeritus. BA, 1977, California, Irvine; MA, 1979, PhD, 1986, California, Berkeley. (1988)

Jack P. Maddex, professor emeritus. BA, 1963, Princeton; PhD, 1966, North Carolina. (1966)

Glenn A. May, professor emeritus. BA, 1966, MPhil, 1971, PhD, 1975, Yale. (1983)

Randall E. McGowen, professor emeritus. BA, 1970, American; MA, 1971, PhD, 1979, Illinois. (1982)

James C. Mohr, professor emeritus. BA, 1965, Yale; MA, 1966, PhD, 1969, Stanford. (1992)

John Nicols, professor emeritus. AB, 1966, California, Berkeley; MA, 1968, PhD, 1974, California, Los Angeles. (1980)

Daniel A. Pope, professor emeritus. BA, 1966, Swarthmore; MA, 1968, PhD, 1973, Columbia. (1975)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Judith R. Baskin, Judaic studies

Robert Bussel, Labor Education and Research Center

Mark Carey, honors college

Charise Cheney, ethnic studies

James D. Fox, library

Melissa Graboyes, honors college

Kevin Hatfield, Office of University Housing

Roxann Prazniak, honors college

Elizabeth Reis, women's and gender studies

Daniel Rosenberg, honors college

Gretchen Soderlund, journalism and communication

- **Bachelor of Arts**
- **Bachelor of Science**
- **Minor**

Undergraduate Studies

Students who plan to major in history should include in their high school studies four years of social studies, four years of English, and preparation in a second language. Students who transfer to the university at the end of their sophomore year should have completed a year of college-level history and at least one year of a second language.

Careers

History provides a foundation for careers in teaching, journalism, international endeavors, law, foreign service, business, government, ministry, librarianship, museum and archival work, and historic preservation. Work beyond the bachelor's degree is required in many of these fields.

Advising and Entering the Major

The Department of History requires students to have formal advising at the time that they enter the major. The advising coordinator assigns each student a faculty advisor who reviews departmental requirements and helps the student develop a plan that directs the course of study and ensures timely completion of the requirements. The faculty advisor is available for periodic review of the program and of progress in the major.

A staff of undergraduate peer advisors is available in the history peer advising office to help majors and prospective majors at any stage of their academic careers. Peer advisors are trained in university and history major requirements, and they are a resource for information about graduate programs in history, careers in history, and history-related activities in the university and the community. Students may obtain a checklist outlining the major in the history office and in the history peer advising office.

Forms and checklists for majors and minors may be found online at history.uoregon.edu/undergraduate/forms.

Bachelor's Degree Requirements

The Department of History offers two undergraduate degrees, a bachelor of arts (BA) and a bachelor of science (BS). Requirements are the same for both.

All history majors, regardless of whether they are earning a BA or BS, must fulfill the second-language requirement associated with the university's bachelor of arts general-education requirement. They must

demonstrate proficiency in a second language either by completing, with a C– or better or P, at least the third term, second year of a second language. History courses that satisfy major requirements must be taken for letter grades. Specific requirements follow:

Bachelor of Arts and Bachelor of Science Requirements

Code	Title	Credits
Upper-Division History Courses		33
21 credits at the 400 level, including a 5-credit Seminar (HIST 407) ¹		
8 credits in history before 1800		
8 credits in each of three concentration areas selected from a list of six historical fields ²		
Additional History Courses ³		12
Total Credits		45

- ¹ No more than 8 credits of Reading and Conference (HIST 405) may be used to fulfill major requirements.
- ² Historical fields: 1) Europe, 2) United States, 3) Africa and the Middle East, 4) Asia, 5) Latin America, 6) World
- ³ Upper or lower division

Additional Requirements

In exceptional circumstances, a term paper written in Seminar: [Topic] (HIST 407) or in a 400-level course may be expanded into a research paper. Students who have secured approval from the director of undergraduate studies for this option enroll in Reading and Conference: [Topic] (HIST 405) for 2 graded credits. The arrangement for writing a research paper based on the term paper is one that requires not only the approval of the director of undergraduate studies but also the agreement of the instructor in the relevant 400-level course to teach the reading and conference course and to supervise the writing of the research paper. This procedure for writing a research paper does not duplicate the seminar experience. It should not be used to compensate for a student's lack of planning or preparation. It is permitted only when there are strong pedagogical reasons for pursuing it.

A grade point average (GPA) of 2.50 or higher is required in history courses taken at the University of Oregon. A mid-C or better is required in courses taken to fulfill the research paper requirement. Majors who maintain a GPA of 3.50 or better qualify for the history honors track. More information on this option may be found on the department website.

A total of 21 upper-division credits, including three courses numbered 408, 410–499, and all courses taken to fulfill the research paper requirement must be taken at the University of Oregon.

Bachelor of Science Requirements

Code	Title	Credits
Upper-Division History Courses		33
21 credits at the 400 level, including a 5-credit Seminar (HIST 407) ¹		
8 credits in history before 1800		
8 credits in each of three concentration areas selected from a list of six historical fields ²		

Additional History Courses ³	12
Total Credits	45

- ¹ No more than 8 credits of Reading and Conference (HIST 405) may be used to fulfill major requirements.
- ² Historical fields: 1) Europe, 2) United States, 3) Africa and the Middle East, 4) Asia, 5) Latin America, 6) World
- ³ Upper or lower division

Additional Requirements

In exceptional circumstances, a term paper written in Colloquium: [Topic] (HIST 408) or in a 400-level course may be expanded into a research paper. Students who have secured approval from the director of undergraduate studies for this option enroll in Reading and Conference: [Topic] (HIST 405) HIST 405 HIST 405 HIST 405 HIST 405 for 2 graded credits. The arrangement for writing a research paper based on the term paper is one that requires not only the approval of the director of undergraduate studies but also the agreement of the instructor in the relevant 400-level course to teach the reading and conference course and to supervise the writing of the research paper. This procedure for writing a research paper does not duplicate the seminar experience. It should not be used to compensate for a student's lack of planning or preparation. It is permitted only when there are strong pedagogical reasons for pursuing it.

A grade point average (GPA) of 2.50 or higher is required in history courses taken at the University of Oregon. A mid-C or better is required in courses taken to fulfill the research paper requirement. Majors who maintain a GPA of 3.50 or better qualify for the history honors track. More information on this option may be found on the department website.

A total of 21 upper-division credits, including three courses numbered 408, 410–499, and all courses taken to fulfill the research paper requirement must be taken at the University of Oregon.

History Honors Program

The honors program provides an opportunity for capable and highly motivated history majors to develop their interests in historical research by writing a thesis during the senior year. To be eligible for admission to the program, students must have completed at least 28 credits in history, of which at least 16 upper-division credits must have been taken at the University of Oregon. The grade point average in all history courses must be 3.50 or better. Students who satisfactorily complete the thesis and related work and fulfill the requirements of the history major are eligible for a bachelor's degree with honors in history. Information about procedures for admission to the honors program, the course of study, the nature of the thesis, and the oral examination on the thesis may be obtained from the history department staff.

Minor Requirements

These new requirements became effective at the beginning of winter term 2010. Minors who signed up when the previous plan was in force may opt to fulfill the requirements of the 2010 plan, although they must formally declare their intention to do so with the director of undergraduate studies of the Department of History.

At least 20 credits—including at least 8 400-level credits—must be completed at the University of Oregon. Courses in history before 1800 and non-European or non-U.S. history require a grade of C– or better

to apply toward the minor requirements. Four of the credits may be completed at the lower division. Specific requirements follow:

Code	Title	Credits
History Courses		28
24 upper-division credits ¹		
4 credits in a course on history before 1800		
4 upper-division credits in a course that does not focus on either European or United States history		

¹ 12 of the 24 credits must be at the 400 level (three courses from among HIST 408, 410–499).

Additional Requirements

A grade point average (GPA) of 2.50 or higher is required in history courses taken at the University of Oregon.

Advising and Entering the Minor

To declare a minor in history, students must first have a formal advising session with the director of undergraduate studies. The director aids the student in developing and directing a plan of study that ensures timely completion of the requirements.

A staff of undergraduate peer advisors is available in the History Peer Advising Office to help minors and prospective minors at any stage of their academic careers. Peer advisors are trained in university and history minor requirements as well as information on graduate programs, careers, and other history-related activities.

Kindergarten through Secondary Teaching Careers

Students completing a degree with a major in history are eligible to apply for the College of Education's fifth-year licensure program in middle-secondary teaching in social studies. Students may also apply to the fifth-year licensure program to become an elementary teacher. More information is available from the department's education advisor, Robert Haskett; see also the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Total Credits 49

- **Master of Arts**
- **Doctor of Philosophy**

Graduate Studies

The department offers graduate instruction leading to the degrees of master of arts (MA) and doctor of philosophy (PhD) specializing in colonial America and the United States, Europe, East and Southeast Asia, Latin America, and Africa.

Admission

Applicants must submit the following items to be considered for admission to the graduate program in history:

1. A completed UO Graduate Admission Application
2. Transcripts of all college work
3. Three letters of recommendation
4. Scores on the verbal, quantitative, and analytical sections of the Graduate Record Examinations (GRE)
5. Test of English as a Foreign Language (TOEFL) scores for international students
6. A sample of written work and a statement of academic purpose

A number of graduate awards in the form of graduate teaching fellowships are available each year for entering graduate students.

Fields of Study

The primary fields are ancient history, medieval Europe, Europe 1400–1815, Europe since 1789, Russia, colonial America and the United States, East Asia, Southeast Asia, Latin America, and Africa.

Master of Arts Degree Requirements

The department recently adopted new requirements (listed below) for MA students entering in fall 2008 and subsequent years. Students who entered before this date are still subject to the old requirements, which are still available on the department website.

Applicants are expected to have completed an undergraduate degree in the liberal arts with emphasis on history. The MA program is typically completed in two years of full-time study. Before receiving the degree, students must demonstrate competence in a second language.

Students must write a master's thesis or complete two substantial research papers in the primary field and defend the thesis or research papers in an oral examination.

Major Field Requirement

Students must declare a major field of study, chosen in consultation with a faculty advisor.

Plan of Study

By the end of the first term in the program, students are required to file a plan of study, signed by the advisor, in which they state their major field, list all anticipated course work, and specify their language requirement. The plan of study may be modified later by agreement of both student and advisor. All plans of study are reviewed and approved by the director of graduate studies.

Code	Title	Credits
HIST 611	Field Readings ¹	5
HIST 612	Historical Methods and Writings ²	5
HIST 615	Professional Development ³	1
HIST 616	Graduate Student Conference ⁴	1
HIST 507 or HIST 607	Seminar: [Topic] (two seminars)	5
HIST 608	Colloquium: [Topic] (two colloquia) ⁵	5

- ¹ Completed during the first two terms of the first year. This requirement may also be satisfied by completion of (1) an appropriate 500-level course, approved by an advisor, or (2) Colloquium: [Topic] (HIST 608), if equivalent to Field Readings (HIST 611).
- ² Taken fall term.
- ³ Taken winter term.
- ⁴ Taken spring term.
- ⁵ Student may petition to replace Colloquium: [Topic] (HIST 608) with Colloquium: [Topic] (HIST 508).

Language Requirement

All MA students must demonstrate proficiency in at least one foreign language by passing an exam that tests the ability to read and comprehend a passage of average difficulty drawn from primary sources or the secondary literature. The language exam is offered once each term during the regular academic year.

Advisors must approve the choice of language. MA students whose thesis or research papers require work in foreign language sources are strongly urged to complete this requirement by the end of the first year of study. Advisors may set higher standards or include additional languages in which students must demonstrate competence. These standards should be established at the time a faculty member accepts a graduate student and fills out the plan of study form.

Writing Requirement

There are two options for satisfying the major writing requirement for the MA:

- A student must complete a master's thesis in his or her major focus of study and pass an oral defense of the thesis before a committee of three faculty members
- A student must complete two substantial research papers and pass an oral defense of these papers before a committee of three faculty members. For the purposes of this option, a research paper is defined as a paper of twenty-five pages or more, based on primary source research

Students completing the thesis option may enroll in a maximum of 10 credits of Thesis (HIST 503), usually in the winter and spring of their second year. Students choosing the research papers option may register for 5 credits of Research: [Topic] (HIST 601), usually in either winter or spring of their second year.

Under ordinary circumstances, it takes students two full years of work to complete this program.

Doctor of Philosophy Degree Requirements

The department recently adopted new requirements (listed below) for PhD students entering in fall 2008 and subsequent years. Students who entered before this date are still subject to the old requirements, which are still available on our website.

Typically, incoming PhD students who enter with a master's degree are expected to have completed the equivalent of the history department's MA program. Students admitted on the BA-to-PhD track complete the program's MA requirements as they progress toward their PhD degrees. In some cases, doctoral students might be admitted without having fulfilled some of these prerequisites—for example, a course

equivalent to Historical Methods and Writings (HIST 612). If this is the case, doctoral students will be required to take Historical Methods and Writings (HIST 612), Professional Development (HIST 615), and Graduate Student Conference (HIST 616).

PhD students prepare themselves in three fields, as follows:

1. **Major Research Field.** A specific, more narrowly defined field—typically, the area of one’s dissertation, as conventionally understood
2. **Major Teaching Field.** A general, more broadly defined field that encompasses the research field but is more extensive—typically, a teaching field, as conventionally understood
3. **Minor Thematic, Methodological, or Comparative Field.** Typically the theme, method, or comparison to be advanced in the dissertation

For example, a student of modern France might choose modern France as a major research field, modern Europe as a major teaching field, and gender history, intellectual history, or military history as a minor thematic field. A student of China might take a major research field in modern China, a teaching field in China, and a minor comparative field in Japan.

Plan of Study

By the end of the first term in the program, students are required to file a plan of study, signed by the advisor, in which they state their major field, list all anticipated course work, and specify their language requirement. The plan of study may be modified later by agreement of both student and advisor. All plans of study are reviewed and approved by the director of graduate studies.

An entering PhD student lacking the equivalent to Historical Methods and Writings (HIST 612) must take the same HIST 612, 615, 616 sequence (<http://history.uoregon.edu/graduate/ma/#course>) as that required of MA students (see table below). This requirement may be waived for incoming students with sufficient preparation based on prior graduate work.

Code	Title	Credits
HIST 611	Field Readings ¹	5
HIST 612	Historical Methods and Writings ²	5
HIST 615	Professional Development ³	1
HIST 616	Graduate Student Conference ⁴	1
HIST 507 or HIST 607	Seminar: [Topic] (two seminars)	5
HIST 608	Colloquium: [Topic] (two colloquia) ⁵	5

¹ Completed during the first two terms of the first year. This requirement may also be satisfied by completion of (1) an appropriate 500-level course, approved by an advisor, or (2) Colloquium: [Topic] (HIST 608), if equivalent to Field Readings (HIST 611).

² Taken fall term.

³ Taken winter term.

⁴ Taken spring term.

⁵ Student may petition to replace Colloquium: [Topic] (HIST 608) with Colloquium: [Topic] (HIST 508).

Additional Requirements

- **Minor Field.** Two courses at the 500 or 600 level that, together, define a thematic, methodological, or comparative field. A nonhistory course may be used with approval
- One additional course at the 500 or 600 level in history or another field

- **Distribution Requirement.** PhD students are required to take two courses focusing on subjects outside their country or region of geographic specialization

There is no total credit requirement for the PhD—rather, the Graduate School stipulates both a minimum (per term) credit requirement and a residency requirement (<http://gradschool.uoregon.edu/?page=residencyEnrollmentRequirements>).

Language Requirement

PhD students must demonstrate proficiency in at least one foreign language by passing an exam that tests their ability to read and comprehend a passage of average difficulty drawn from primary sources or the secondary literature. The language exam is offered once each term during the regular academic year.

Advisors must approve the choice of language. The language requirements of PhD students, however, will vary according to field. Students admitted into the PhD program should have the language preparation required to enable historical work in their field. Some additional language study might be required by individual advisors as an essential part of a student’s PhD work. These standards should be established at the time a faculty member accepts a graduate student and fills out the plan of study form.

Oral Comprehensive Examination

PhD students should take and pass their oral comprehensive examinations in the winter term of their second year, or during spring term at the latest. BA-to-PhD students should take their oral comprehensive exams in their third year. Students may, but are not required, to register for Comprehensive Exam Preparation (HIST 618) to prepare for their comprehensive examinations with the appropriate faculty members.

Dissertation

After completing course work, demonstrating language competence, and passing the oral comprehensive examination, the doctoral student advances to candidacy. The doctoral candidate must compose and defend a dissertation prospectus and then research and write a dissertation that makes an original scholarly contribution to the field and shows evidence of ability in independent investigation. Finally, the candidate defends the dissertation in a formal, public session.

Students should have tentatively identified a dissertation topic by the end of their first year (or, for BA-to-PhD students, by the fall of the third year) and should then file a Tentative Dissertation Topic Form with the graduate director.

PhD students must also prepare and defend a dissertation prospectus no later than the term subsequent to successful passage of the oral comprehensive exam. Students may, but are not required, to register for Dissertation Prospectus (HIST 619) to prepare their dissertation prospectus with the appropriate faculty.

Time to Degree

Applicants with MA degrees who are accepted into the PhD program must complete the PhD requirements within seven years.

Students with BA degrees who are admitted to the PhD program must complete the MA requirements within two years. Such students must complete both the MA and the PhD requirements within a total of seven years from the time of admission.

Courses

HIST 101. Ancient Mediterranean. 4 Credits.

Historical development of the ancient world focusing on the Near East, Egypt, Greece, Rome. Examines major changes in value systems, ideas, social structures, economic institutions, forms of political life.

HIST 102. Making Modern Europe. 4 Credits.

Historical development of Europe; major changes in value systems, ideas, social structures, economic institutions, and forms of political life. From the Renaissance to Napoleon.

HIST 103. Western Civilization. 4 Credits.

Historical development of the Western world; major changes in value systems, ideas, social structures, economic institutions, and forms of political life. From Napoleon to the present.

HIST 104. World History. 4 Credits.

Survey of world cultures and civilizations and their actions. Includes study of missionary religions, imperialism, economic and social relations. Ancient societies.

HIST 105. World History. 4 Credits.

Survey of world cultures and civilizations and their actions. Includes study of missionary religions, imperialism, economic and social relations. Early modern.

HIST 106. World History. 4 Credits.

Survey of world cultures and civilizations and their actions. Includes study of missionary religions, imperialism, economic and social relations. Modern.

HIST 121. Women in World History. 4 Credits.

Introduction to the history of women and gender. A comparative survey of women from prehistory to the present.

HIST 186. Cultures of India. 4 Credits.

Introduces students to the historical study of culture in the Indian subcontinent.

HIST 190. Foundations of East Asian Civilizations. 4 Credits.

Introduction to traditional China and Japan; Confucianism, Buddhism, Daoism; floating worlds; family and gender; traditional views of the body; literati class; samurai; Mongols and Manchus.

HIST 191. China, Past and Present. 4 Credits.

Introduction to Chinese culture. Explores meanings of past and present in 20th-century efforts to modernize China. Chronological and topical inquiry into politics, literature, social structure, gender, art, economy.

HIST 192. Japan, Past and Present. 4 Credits.

Introduction to Japanese culture. Explores myth, tradition, modernity, and postmodernity with one eye trained on the future. Examples from personal experience.

HIST 199. Special Studies: [Topic]. 1-5 Credits.

Problem-oriented course designed for students interested in history who might or might not become majors. Repeatable.

HIST 201. Inventing America. 4 Credits.

Development of the North American continent socially, economically, politically, culturally. Native America, European colonization, colonial development, origins of slavery, Revolution, early Republic.

HIST 202. Building the United States. 4 Credits.

Creation and development of the United States and its social, economical, political, and cultural consequences. Jacksonian era, expansion, commercial and industrial revolution, slavery, Civil War, Reconstruction.

HIST 203. American Century. 4 Credits.

Creation and development of the so-called "American Century" socially, economically, politically, culturally. Imperialism, progressivism, modernity, the 1920s, Depression and New Deal, world wars and Cold War, 1960s, and recent developments.

HIST 205. Ancient Sports. 4 Credits.

History of sports and athletics in ancient societies: examines intersections of class, social status, race, gender, and sexuality. Includes study of organizational, political, religious, and ideological dimensions.

HIST 211. Reacting to the Past. 4 Credits.

Centers on complex, exciting role-playing simulations of decisive historical events and the development of key analytical skills in close readings of classic texts.

HIST 215. Food in World History. 4 Credits.

Surveys the development of eating practices, tastes, foodstuffs, and culinary philosophies from early human history to the present in diverse parts of the world.

HIST 221. Sex in History. 4 Credits.

Introduces students to the history of sexuality. Comparative overview of sexual politics, ethics, and identities in diverse societies from the ancient world to the present.

HIST 239. Classical and Medieval Warfare. 4 Credits.

Examines war and armies in the ancient Mediterranean and in medieval Europe. Series with HIST 240, HIST 241.

HIST 240. War in the Modern World I. 4 Credits.

Evolution of the conduct of war in the 19th and 20th centuries as a reflection of social, political, and technological developments.

HIST 241. War in the Modern World II. 4 Credits.

Surveys changes in the nature and conduct of warfare in light of social, political, and technological developments from 1945 to present.

HIST 245. Russia, America, and the World. 4 Credits.

The United States and Russia share historical experiences that extend far beyond diplomacy, trade, and international adversity or alliance. Includes frontier expansion, revolution, industrialization, imperialism, world view.

HIST 248. Latinos in the Americas. 4 Credits.

Explores historical experiences of Latino groups, emphasizing Mexican and Caribbean migrations. Lectures in English; readings and discussions in English, Spanish, and Spanglish. Two years of high school Spanish or SPAN 103 with a grade of C or better recommended.

HIST 250. African American History. 4 Credits.

The African background, development of slavery, abolitionism, the Civil War and Reconstruction.

HIST 251. African American History. 4 Credits.

The 20th-century African American experience including the great migration, World War II, the Civil Rights Movement, post-1970 African America.

HIST 273. Introduction to Environmental History. 4 Credits.

Introduction to concepts, concerns, and methods of environmental history.

HIST 286. Cities in India and South Asia. 4 Credits.

This course examines the economic, cultural and social dimensions of cities in the subcontinent of India with comparisons from other Asian and North American cities.

HIST 290. Historian's Craft. 4 Credits.

Gateway course to the History major. Explores the diverse meanings and methods of modern historical interpretation. Trains students to work with original historical sources and become more effective consumers and producers of historical writing, preparing them for upper-division coursework.

HIST 298. Temporary Group-Satisfying Course. 4 Credits.**HIST 301. Modern Europe. 4 Credits.**

Political, social, cultural, intellectual, and economic trends from the 18th century to the present. 18th century. McCole.

HIST 302. Modern Europe. 4 Credits.

Political, social, cultural, intellectual, and economic trends in the 19th century.

HIST 303. Modern Europe. 4 Credits.

Political, social, cultural, intellectual, and economic trends in the 20th century.

HIST 308. History of Women in the United States I. 4 Credits.

Survey of the diverse experiences of American women from 1600 to 1870.

HIST 309. History of Women in the United States II. 4 Credits.

Survey of the diverse experiences of American women from 1870 to present.

HIST 319. Early Middle Ages in Europe. 4 Credits.

Emergence, from the remains of the late Roman Empire, of a uniquely medieval Christian culture in the Germanic kingdoms of northern Europe between the 4th and 9th centuries.

HIST 320. High Middle Ages in Europe. 4 Credits.

Changes that swept Europe from 1000 to 1225, including the rise of towns and universities, new spiritual and artistic visions, and varieties of religious and social reform.

HIST 321. Late Middle Ages in Europe. 4 Credits.

A survey of Europe, 1250-1430, the age of Dante and the Black Death, when breakthroughs alternated with disasters in the realms of politics, economics, and religion.

HIST 322. The Crusades. 4 Credits.

Surveys the idea and practice of Christian holy war—not only in Palestine, but within Europe. From the First Crusade in 1096 through early 13th Century.

HIST 325. Precolonial Africa. 4 Credits.

Survey of African history to the mid-19th century, analyzing processes of state formation, regional and long-distance trade, religion, oral tradition, and systems of slavery.

HIST 326. Colonial and Postcolonial Africa. 4 Credits.

Survey of African history from the late 1800s to the turn of the 21st century. Emphasis is on the internal dynamics of change as well as the effects of colonialism and global interaction.

HIST 332. British History: [Topic]. 4 Credits.

British history from the Celts to the 21st century—economic, political, religious, and social change. McGowen. Repeatable twice when topic changes for a maximum of 12 credits.

HIST 336. France. 4 Credits.

Ancient regime, 1789–1870—French Revolutions of 1789, 1830, and 1848; Napoleonic Empire; monarchy, republicanism, and dictatorship; society and culture in post-Revolutionary France. Birn, Sheridan.

HIST 337. France. 4 Credits.

1870 to the present—the Paris Commune and Third Republic; the Dreyfus affair; popular front, fall of France and Resistance; Algeria, de Gaulle, the 1968 student movement.

HIST 340. US Military History. 4 Credits.

Survey of US military history from the colonial period to the present with a focus on the organization, operations, and strategy of the US Army in wartime.

HIST 342. German History: [Topic]. 4 Credits.

Middle Ages to the end of the 20th century. I: Middle Ages and Reformation (1410–1648). II: Germany in the Old Regime and Age of Revolution (1648–1848). III: Modern Germany (1848–present). Repeatable twice when topic changes for a maximum of 12 credits.

HIST 345. Early Russia. 4 Credits.

Kievan Rus and Byzantium; Christianization; Mongol dominance; rise of Moscow and two Ivans, one Great, one Terrible; crisis of modernization and subsequent religious dissent.

HIST 346. Imperial Russia. 4 Credits.

Siberian and North American expansion; Peter the Great; Catherine the Great; abolition of serfdom; industrialization; Silver Age culture and revolution; World War I and collapse.

HIST 347. Soviet Union and Contemporary Russia. 4 Credits.

Examines the rise, development, and collapse of the Soviet Union, the world's first communist regime. Topics include the Russian Revolution, Stalinism, war, culture, and society.

HIST 350. American Radicalism. 4 Credits.

Motives, strategies, successes, and failures of radical movements and their significance for American society. American Revolution, slave revolts, abolitionism, women's rights.

HIST 351. American Radicalism. 4 Credits.

Motives, strategies, successes, and failures of radical movements and their significance for American society. Workers' movements, socialism, communism, African American freedom struggle, nationalist movements of people of color, feminism, student activism.

HIST 352. The United States in the 1960s. 4 Credits.

Exploration of a watershed era: civil rights, student activism, educational crisis, Vietnam War, gender revolution, environmentalism.

HIST 361. Early Modern Science. 4 Credits.

Explores the subject, practice, and social place of science in the early modern world.

HIST 363. American Business History. 4 Credits.

American businesses from their colonial origins to the present. Interaction between the political, social, economic, and ideological environment and the internal structure and activities of business enterprises.

HIST 368. American West in Popular Culture. 4 Credits.

Examines the idea of the West in the American imagination as expressed in popular literature, captivity narratives, dime novels, travel literature, art, Wild West shows, films, and television.

HIST 378. American Environmental History to 1890. 4 Credits.

Considers how humans and their natural environments have interacted and reshaped each other through time from 1491 to 1890.

HIST 379. American Environmental History, 1890-Present. 4 Credits.

Focuses on environmental change and the rise of environmental politics from the Progressive Era to the present.

HIST 380. Latin America. 4 Credits.

Major economic, political, and cultural trends and continuities. Pre-Columbian and Iberian history, the colonial period up to 1750. Prereq: Sophomore standing recommended.

HIST 381. Latin America. 4 Credits.

Major economic, political, and cultural trends and continuities. Transition from late colonial mercantilism to political independence and national definition, 1750–1910. Prereq: Sophomore standing recommended.

HIST 382. Latin America. 4 Credits.

Major economic, political, and cultural trends and continuities. Reform and revolution in modern Latin American history, 1910 to the present. Prereq: sophomore standing recommended.

HIST 383. Soccer and Society in Latin America. 4 Credits.

Exploring the complexities of Latin American societies using soccer as a historical, cultural, and sociological window to issues of race, class, gender, and national identity.

HIST 385. South Asia: [Topic]. 4 Credits.

Introduction to South Asian history in the modern period—South Asia I (1757–1971); South Asia II (1930 to the present). Repeatable once when topic changes for a maximum of 8 credits.

HIST 386. India. 4 Credits.

This course will survey the history of the Indian subcontinent as both a colony of Britain and then as a cluster of independent countries in the 20th and 21st centuries.

HIST 387. Early China. 4 Credits.

Survey from the beginnings to the 10th century focuses on the development of Chinese thought and religion and the growth of the imperial state and bureaucracy.

HIST 388. Vietnam War and the United States. 4 Credits.

Vietnamese society and history: the First Indochina War, origins and escalation of United States involvement in Vietnam; de-escalation and defeat.

HIST 396. Samurai in Film. 4 Credits.

Examination of the image of Japan's warrior class, the most prominent social group in Japan for over seven centuries. Combines films, readings, and lectures.

HIST 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

HIST 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

HIST 401. Research: [Topic]. 1-9 Credits.

Repeatable.

HIST 403. Thesis. 1-9 Credits.

Repeatable.

HIST 404. Internship. 1-3 Credits.

Repeatable once for a maximum of 6 credits.

HIST 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

HIST 407. Seminar: [Topic]. 5 Credits.

Recent topics include History of Los Angeles, Modern Japanese Culture, Rethinking America in the 1960s, and Stalinism. Repeatable.

HIST 408. Colloquium: [Topic]. 1-6 Credits.

Current topics include Southeast Asia Interpretations. Repeatable.

HIST 409. Supervised Tutoring. 1-4 Credits.

Repeatable four times for maximum of 8 credits.

HIST 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

HIST 411. Advanced Reacting to the Past: [Topic]. 4 Credits.

Intensive exploration of historical events through interactive games. Possible topics include U.S. Constitutional Convention, French Revolution, Democracy in Athens, India 1947. Repeatable once for a maximum of 8 credits when topic changes.

HIST 412. Ancient Greece: [Topic]. 4 Credits.

Political, cultural, and intellectual history of ancient Greece; emphasis on urban culture. I: Classical Greece. II: Hellenistic World. III: Greek Science. Repeatable twice when topic changes for maximum of 12 credits.

HIST 414. Ancient Rome: [Topic]. 4 Credits.

Political, social, cultural, and intellectual history of ancient Rome from its foundation to late antiquity; emphasis on urban culture. I: Roman Republic. II: Roman Empire. III: Roman Society. Repeatable twice when topic changes for maximum of 12 credits.

HIST 415. Advanced World History: [Topic]. 4 Credits.

Advanced intensive study of selected issues in world history. Possible topics include biology and ecology, ancient empires, or intercultural encounters. Repeatable when topic changes.

HIST 416. Advanced Women's History: [Topic]. 4 Credits.

Intensive study of select issues in women's history. Emphasis on the construction of their diverse identities; the framework for political, social, and economic empowerment; the historical development of gendered categories. Repeatable when topic changes. Offered alternate years.

HIST 417. Society and Culture in Modern Africa: [Topic]. 4 Credits.

Explorations in various topics with attention to class, gender, and generational and political struggles. Repeatable twice when topic changes for maximum of 12 credits.

HIST 419. African Regional Histories: [Topic]. 4 Credits.

Examines the historiography of specific nations or regions. Repeatable twice for a maximum of 12 credits.

HIST 420. The Idea of Europe. 4 Credits.

The concept and experience of Europe explored creatively throughout history from multiple disciplinary perspectives.

HIST 425. Economic History of Modern Europe: [Topic]. 4 Credits.

Industrial revolution, economic transformation, growth, and integration in political and social contexts. Focuses on Britain, France, Germany, and Russia. I: European Economies to 1914. II: European Economies in the 20th Century. Repeatable once when topic changes for maximum of 8 credits.

HIST 427. Intellectual History of Modern Europe: [Topic]. 4 Credits.

Major thinkers and movements include classical liberalism, utopian socialism, political economy, Marxism, aestheticism, Nietzsche, classical sociology, psychoanalysis, radical conservatism, Keynesian economics, intellectuals and political engagement, and Western Marxism. I: German Intellectual History. II: Ideas and Society, 19th Century. III: Ideas and Society, 20th Century. Repeatable twice when topic changes for maximum of 12 credits.

HIST 428. Europe in the 20th Century: [Topic]. 4 Credits.

War, revolution, social change, political transformation, and related intellectual and cultural developments in Europe from the Great War of 1914–18 through the present. I: European Fascism. II: Jews in Modern Europe. III: Eastern Europe since World War I. IV: Europe since 1945. Repeatable when chronological or thematic topic changes.

HIST 436. Medieval Central Europe: [Topic]. 4 Credits.

Selected topics in the political, cultural, religious and economic history of Germany and neighboring peoples during the Middle Ages, from the eighth through 13th centuries. Repeatable when topic changes. Offered alternate years.

HIST 441. 16th-Century European Reformations. 4 Credits.

History of religious, personal, and institutional reforms. Includes late medieval reform movements and the ideas of Erasmus, Luther, Calvin, Ignatius Loyola, and Teresa of Avila.

HIST 442. Early Modern German History: [Topic]. 4 Credits.

Topics include peasant society, the foundations of absolutism, the German Enlightenment, protoindustrialization. Repeatable twice when topic changes for maximum of 12 credits.

HIST 443. Modern Germany: [Topic]. 4 Credits.

Topics include class formation, revolutionary movements, the socialist tradition, the Third Reich. Repeatable when topic changes.

HIST 444. The Holocaust. 4 Credits.

Surveys history of Nazi genocide, focusing on terror and complicity in formation of racial policy; and on perceptions of Nazi anti-Semitism as the Holocaust was occurring.

HIST 446. Modern Russia: [Topic]. 4 Credits.

Explores topics such as the intellectual and cultural history of Russia from the revolution to recent times. Repeatable twice for a maximum of 12 credits.

HIST 449. Race and Ethnicity in the American West. 4 Credits.

Explores the growth of communities of color in western cities of the United States, with particular reference to competition and cooperation between groups.

HIST 450. The Iraq War. 4 Credits.

A history of the Iraq War including the US decision to invade, the subsequent civil war, the rise and fall of the Islamic State in Iraq and Syria (ISIS), and beyond.

HIST 455. Colonial American History. 4 Credits.

Native Americans; motives, methods, implications of European colonization; origins of American slavery; interaction of diverse peoples in shaping colonial North American societies, economies, landscapes, politics.

HIST 456. Revolutionary America. 4 Credits.

Origins, consequences, meanings of American Revolution; changing social, economic, and political contexts; intellectual, religious, and ideological trends; Constitution; institutional, social, and cultural legacy.

HIST 457. 19th-Century United States: [Topic]. 4 Credits.

Political, social, economic, and cultural history. I: Jacksonian Era. II: Civil War. III: Reconstruction. IV: Gilded Age. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 461. American Medical History. 4 Credits.

Explores nine major subjects in the social history of medicine and health in the United States. Offered alternate years.

HIST 463. American Economic History: [Topic]. 4 Credits.

Varying topics on the economic development of the United States as a preindustrial, industrial, and postindustrial society. I: The Great Depression. II: Industrialization. Repeatable twice when topic changes for maximum of 12 credits.

HIST 466. The American West. 4 Credits.

Social, political, and cultural history. Peoples of the American West and the expansion of the United States in the 19th century.

HIST 467. The American West. 4 Credits.

Social, political, and cultural history. 20th-century immigration, urban growth, economic development; social and political institutions; politics of race, ethnicity, and gender in a multicultural region.

HIST 468. The Pacific Northwest. 4 Credits.

Regional history to the mid-20th century. How the Pacific Northwest mirrors the national experience and how the region has a distinctive history and culture.

HIST 469. American Indian History: [Topic]. 4 Credits.

Variable chronological, thematic, and regional topics, including Indian history to 1860; 1860 to the present; Indians and colonialism; Indians and environments; Indians and gender; regional histories. Repeatable twice when topic changes for maximum of 12 credits.

HIST 470. African American History to 1877: [Topic]. 4 Credits.

Explores aspects of the African American experience in the era of slavery and Reconstruction. Repeatable twice when the topic changes for a maximum of 12 credits. Series with HIST 471.

HIST 471. African American History since 1877: [Topic]. 4 Credits.

In-depth exploration of specific topics in African American history from the late 19th century to the present. Repeatable twice when the topic changes for a maximum of 12 credits. Series with HIST 470.

HIST 473. American Environmental History: [Topic]. 4 Credits.

Variable topics examine the social, cultural, economic, and political history of the American landscape; how Americans have understood, transformed, degraded, conserved, and preserved their environments. I: To 1800. II: 19th Century. III: 20th-Century Environment and Environmentalism. IV: Environment and the West. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 480. Mexico. 4 Credits.

Mexican history from pre-Hispanic times to the present. Special attention to nationhood, economic development, church-state relations, the Mexican identity, and the Revolution of 1910.

HIST 482. Aztecs and Incas. 4 Credits.

Impact of Iberian conquest and settlement on the lives of the indigenous peoples of the Caribbean, Mexico, Central America, and South America.

HIST 483. Latin America: [Topic]. 4 Credits.

Variable topics include the experience of blacks and Indians; the struggle for land, reform, and revolution. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 487. China: [Topic]. 4 Credits.

Survey from the 10th century. Foundations and transformations of state and society; popular rebellions; impact of imperialism; issues of modernity; state building; political, cultural, and social revolutions. I: Song and Yuan. II: Ming and Qing. III: Late Qing. IV: Republican China. V: China since 1949. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 490. Japan: [Topic]. 4 Credits.

Political, social, and cultural history from ancient through contemporary. Origins, aristocratic society, medieval age, Zen, warrior class, urban growth, modernization, imperialism, Pacific war, postwar society. I: Classical Age. II: Shogun's Japan, 1550–1800. III: Modern Age. Repeatable twice when topic changes for maximum of 12 credits.

HIST 491. Medicine and Society in Premodern Japan. 4 Credits.

Examines the interweaving of folk, Buddhist, Chinese, and Dutch influences. Diseases, knowledge, sexual hygiene, and medical challenges in social context.

HIST 497. Culture, Modernity, and Revolution in China: [Topic]. 4 Credits.

I: Modernity and Gender. II: Cultural Revolution and Memory. III: Historiography of the Communist Revolution. Repeatable twice when topic changes for maximum of 12 credits.

HIST 498. Early Japanese Culture and Society: [Topic]. 4 Credits.

Aspects of social history through 1800—social change, hierarchy and power, interrelationship of society and religion, medieval transformations, warrior class. I: Buddhism and Society in Medieval Japan. II: Samurai and War. III: Medieval Japan. Repeatable twice when topic changes for maximum of 12 credits.

Prereq: Courses on Japanese or medieval history recommended.

HIST 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

HIST 503. Thesis. 1-12 Credits.

Repeatable.

HIST 507. Seminar: [Topic]. 5 Credits.

Repeatable. Recent topics include History of Los Angeles, Modern Japanese Culture, Rethinking America in the 1960s, and Stalinism.

HIST 508. Colloquium: [Topic]. 1-6 Credits.

Repeatable. Current topics include Southeast Asia Interpretations.

HIST 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

HIST 512. Ancient Greece: [Topic]. 4 Credits.

Political, cultural, and intellectual history of ancient Greece; emphasis on urban culture. I: Classical Greece. II: Hellenistic World. III: Greek Science. Repeatable twice when topic changes for maximum of 12 credits.

HIST 514. Ancient Rome: [Topic]. 4 Credits.

Political, social, cultural, and intellectual history of ancient Rome from its foundation to late antiquity; emphasis on urban culture. I: Roman Republic. II: Roman Empire. III: Roman Society. Repeatable twice when topic changes for maximum of 12 credits.

HIST 515. Advanced World History: [Topic]. 4 Credits.

Advanced intensive study of selected issues in world history. Possible topics include biology and ecology, ancient empires, or intercultural encounters. Repeatable when topic changes.

HIST 516. Advanced Women's History: [Topic]. 4 Credits.

Intensive study of select issues in women's history. Emphasis on the construction of their diverse identities; the framework for political, social, and economic empowerment; the historical development of gendered categories. Repeatable when topic changes. Offered alternate years.

HIST 517. Society and Culture in Modern Africa: [Topic]. 4 Credits.

Explorations in various topics with attention to class, gender, and generational and political struggles. Repeatable twice when topic changes for maximum of 12 credits.

HIST 519. African Regional Histories: [Topic]. 4 Credits.

Examines the historiography of specific nations or regions. Repeatable twice for a maximum of 12 credits.

HIST 520. The Idea of Europe. 4 Credits.

The concept and experience of Europe explored creatively throughout history from multiple disciplinary perspectives.

HIST 525. Economic History of Modern Europe: [Topic]. 4 Credits.

Industrial revolution, economic transformation, growth, and integration in political and social contexts. Focuses on Britain, France, Germany, and Russia. I: European Economies to 1914. II: European Economies in the 20th Century. Repeatable once when topic changes for maximum of 8 credits.

HIST 527. Intellectual History of Modern Europe: [Topic]. 4 Credits.

Major thinkers and movements include classical liberalism, utopian socialism, political economy, Marxism, aestheticism, Nietzsche, classical sociology, psychoanalysis, radical conservatism, Keynesian economics, intellectuals and political engagement, and Western Marxism. I: German Intellectual History. II: Ideas and Society, 19th Century. III: Ideas and Society, 20th Century. Repeatable twice when topic changes for maximum of 12 credits.

HIST 528. Europe in the 20th Century: [Topic]. 4 Credits.

War, revolution, social change, political transformation, and related intellectual and cultural developments in Europe from the Great War of 1914-18 through the present. I: European Fascism. II: Jews in Modern Europe. III: Eastern Europe since World War I. IV: Europe since 1945. Repeatable when chronological or thematic topic changes.

HIST 536. Medieval Central Europe: [Topic]. 4 Credits.

Selected topics in the political, cultural, religious and economic history of Germany and neighboring peoples during the Middle Ages, from the eighth through 13th centuries. Repeatable when topic changes. Offered alternate years.

HIST 541. 16th-Century European Reformations. 4 Credits.

History of religious, personal, and institutional reforms. Includes late medieval reform movements and the ideas of Erasmus, Luther, Calvin, Ignatius Loyola, and Teresa of Avila.

HIST 542. Early Modern German History: [Topic]. 4 Credits.

Topics include peasant society, the foundations of absolutism, the German Enlightenment, protoindustrialization. Repeatable twice when topic changes for maximum of 12 credits.

HIST 543. Modern Germany: [Topic]. 4 Credits.

Topics include class formation, revolutionary movements, the socialist tradition, the Third Reich. Repeatable when topic changes.

HIST 544. The Holocaust. 4 Credits.

Surveys history of Nazi genocide, focusing on terror and complicity in formation of racial policy; and on perceptions of Nazi anti-Semitism as the Holocaust was occurring.

HIST 546. Modern Russia: [Topic]. 4 Credits.

Explores topics such as the intellectual and cultural history of Russia from the revolution to recent times. Repeatable twice for a maximum of 12 credits.

HIST 549. Race and Ethnicity in the American West. 4 Credits.

Explores the growth of communities of color in western cities of the United States, with particular reference to competition and cooperation between groups.

HIST 550. The Iraq War. 4 Credits.

A history of the Iraq War including the US decision to invade, the subsequent civil war, the rise and fall of the Islamic State in Iraq and Syria (ISIS), and beyond.

HIST 555. Colonial American History. 4 Credits.

Native Americans; motives, methods, implications of European colonization; origins of American slavery; interaction of diverse peoples in shaping colonial North American societies, economies, landscapes, politics.

HIST 556. Revolutionary America. 4 Credits.

Origins, consequences, meanings of American Revolution; changing social, economic, and political contexts; intellectual, religious, and ideological trends; Constitution; institutional, social, and cultural legacy.

HIST 557. 19th-Century United States: [Topic]. 4 Credits.

Political, social, economic, and cultural history. I: Jacksonian Era. II: Civil War. III: Reconstruction. IV: Gilded Age. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 561. American Medical History. 4 Credits.

Explores nine major subjects in the social history of medicine and health in the United States. Offered alternate years.

HIST 563. American Economic History: [Topic]. 4 Credits.

Varying topics on the economic development of the United States as a preindustrial, industrial, and postindustrial society. I: The Great Depression. II: Industrialization. Repeatable twice when topic changes for maximum of 12 credits.

HIST 566. The American West. 4 Credits.

Social, political, and cultural history. Peoples of the American West and the expansion of the United States in the 19th century.

HIST 567. The American West. 4 Credits.

Social, political, and cultural history. 20th-century immigration, urban growth, economic development; social and political institutions; politics of race, ethnicity, and gender in a multicultural region.

HIST 568. The Pacific Northwest. 4 Credits.

Regional history to the mid-20th century. How the Pacific Northwest mirrors the national experience and how the region has a distinctive history and culture.

HIST 569. American Indian History: [Topic]. 4 Credits.

Variable chronological, thematic, and regional topics, including Indian history to 1860; 1860 to the present; Indians and colonialism; Indians and environments; Indians and gender; regional histories. Repeatable twice when topic changes for maximum of 12 credits.

HIST 570. African American History to 1877: [Topic]. 4 Credits.

Explores aspects of the African American experience in the era of slavery and Reconstruction. Repeatable twice when topic changes for a maximum of 12 credits. Series with HIST 571.

HIST 571. African American History since 1877: [Topic]. 4 Credits.

In-depth exploration of specific topics in African American history from the late 19th century to the present. Repeatable twice when the topic changes for a maximum of 12 credits. Series with HIST 571.

HIST 573. American Environmental History: [Topic]. 4 Credits.

Variable topics examine the social, cultural, economic, and political history of the American landscape; how Americans have understood, transformed, degraded, conserved, and preserved their environments. I: To 1800. II: 19th Century. III: 20th-Century Environment and Environmentalism. IV: Environment and the West. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 580. Mexico. 4 Credits.

Mexican history from pre-Hispanic times to the present. Special attention to nationhood, economic development, church-state relations, the Mexican identity, and the Revolution of 1910.

HIST 582. Aztecs and Incas. 4 Credits.

Impact of Iberian conquest and settlement on the lives of the indigenous peoples of the Caribbean, Mexico, Central America, and South America.

HIST 583. Latin America: [Topic]. 4 Credits.

Variable topics include the experience of blacks and Indians; the struggle for land, reform, and revolution. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 587. China: [Topic]. 4 Credits.

Survey from the 10th century. Foundations and transformations of state and society; popular rebellions; impact of imperialism; issues of modernity; state building; political, cultural, and social revolutions. I: Song and Yuan. II: Ming and Qing. III: Late Qing. IV: Republican China. V: China since 1949. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 590. Japan: [Topic]. 4 Credits.

Political, social, and cultural history from ancient through contemporary. Origins, aristocratic society, medieval age, Zen, warrior class, urban growth, modernization, imperialism, Pacific war, postwar society. I: Classical Age. II: Shogun's Japan, 1550–1800. III: Modern Age. Repeatable twice when topic changes for maximum of 12 credits.

HIST 591. Medicine and Society in Premodern Japan. 4 Credits.

Examines the interweaving of folk, Buddhist, Chinese, and Dutch influences. Diseases, knowledge, sexual hygiene, and medical challenges in social context.

HIST 597. Culture, Modernity, and Revolution in China: [Topic]. 4 Credits.

I: Modernity and Gender. II: Cultural Revolution and Memory. III: Historiography of the Communist Revolution. Repeatable twice when topic changes for maximum of 12 credits.

HIST 598. Early Japanese Culture and Society: [Topic]. 4 Credits.

Aspects of social history through 1800—social change, hierarchy and power, interrelationship of society and religion, medieval transformations, warrior class. I: Buddhism and Society in Medieval Japan. II: Samurai and War. III: Medieval Japan. Repeatable twice when topic changes for maximum of 12 credits.

Prereq: Courses on Japanese or medieval history recommended.

HIST 601. Research: [Topic]. 1-9 Credits.

Repeatable.

HIST 602. Supervised College Teaching. 1-6 Credits.

Repeatable.

HIST 603. Dissertation. 1-12 Credits.

Repeatable.

HIST 604. Internship: [Topic]. 1-3 Credits.

Repeatable once for a maximum of 6 credits.

HIST 605. Reading and Conference: [Topic]. 1-9 Credits.

Repeatable.

HIST 607. Seminar: [Topic]. 5 Credits.

Repeatable.

HIST 608. Colloquium: [Topic]. 1-6 Credits.

Recent offerings include Medieval Europe; Race and Labor in the United States; Race, Gender, and State; Society and Revolution in East Asia. Repeatable.

HIST 609. Supervised Tutoring. 1-3 Credits.

Repeatable.

HIST 610. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

HIST 611. Field Readings. 5 Credits.

Independent study designed to ground students in major works and issues of their chosen field. Intensive study, based on a substantial reading list, requiring substantial written work.

HIST 612. Historical Methods and Writings. 5 Credits.

Introduction to the historical profession; includes historical questions, methods, and theories, and historiographic debates. Sequence.

HIST 615. Professional Development. 1 Credit.

Promotes understanding of the history profession and development of professional skills through a variety of activities—workshops on research and writing, critiques of scholarly presentations, discussion of the academic job market. Offered once per academic year.

HIST 616. Graduate Student Conference. 1 Credit.

Designed to build on work from HIST 612 and 615 courses. Promotes understanding of history profession, standards, protocols; plan and host conference. Offered once per academic year.

HIST 618. Comprehensive Exam Preparation. 5 Credits.

Independent readings with faculty members to discuss a predetermined reading list in preparation for PhD comprehensive examination.

HIST 619. Dissertation Prospectus. 5 Credits.

Independent research under the direction of student's adviser with the specific aim of producing a defensible dissertation prospectus.

Humanities

Martha Bayless, Program Director

344 Prince Lucien Campbell Hall

mjbayless@uoregon.edu

The Humanities Program offers students the opportunity to pursue their interests across the humanistic disciplines. Combining the study of the arts, literature, and methods of inquiry, the curriculum fosters intellectual coherence and integration, awareness of cultural contexts and traditions, and the connection of humanistic theory to practice. It is designed to provide essential skills and understanding for intelligent action and preparation for a wide range of careers.

Program Committee

Rachel DiNitto, East Asian languages and literatures

Katya E. Hokanson, comparative literature

Mary Jaeger, classics

Jeffrey S. Librett, German and Scandinavian

F. Regina Psaki, Romance languages

George J. Sheridan Jr., history

Michael Stern, German and Scandinavian

Lisa Wolverton, history

Mary E. Wood, English

Undergraduate Studies

Major Requirements

The humanities major is an interdisciplinary bachelor of arts (BA) degree program. Proficiency in at least one second language, a requirement for the BA degree, is central to the humanities major. Although majors are not required to do more than meet the BA requirement, it is strongly recommended that they continue language study in upper-division courses.

Grades of mid-C or better must be earned in courses taken to satisfy major requirements. For graduation, humanities majors must maintain at least a 2.00 grade point average (GPA) in required courses. No upper-division course may be used to satisfy more than one major requirement.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Introductory Courses		
Option 1		8
Select two of the following:		
HUM 101	Introduction to the Humanities I	
HUM 102	Introduction to the Humanities II	
HUM 103	Introduction to the Humanities III	
Option 2		
HUM 300	Themes in the Humanities ¹	4
Breadth Requirement ²		
Arts (music history, theater history, art history) (see Courses from Other Department below)		4
Philosophy (see Courses from Other Department below)		4
Classics (see Courses from Other Department below)		4
History (see Courses from Other Department below)		4
Concentration		
Seven upper-division courses in concentration ³		28
Total Credits		48-52

¹ Recommended for students who declare the major in the junior or senior year.

² At least two breadth requirement courses must be in the upper division, and all four courses must be group satisfying.

³ Students must submit a brief essay defending the coherence of the concentration and outlining the seven courses they plan to take. No more than three of the seven courses may be taken in any one department. Students should choose at least one Seminar (407) as part of their concentration.

Courses from Other Departments

Students may be interested in the following courses:

Classics. Greek and Roman Epic (CLAS 301), Greek and Roman Tragedy (CLAS 302), Classical Greek Philosophers (CLAS 303)

History. Early China (HIST 387), Ancient Greece: [Topic] (HIST 412), Ancient Rome: [Topic] (HIST 414), The Idea of Europe (HIST 420), Intellectual History of Modern Europe: [Topic] (HIST 427)

Philosophy. History of Philosophy: Ancient and Medieval (PHIL 310), History of Philosophy: Modern (PHIL 311), History of Philosophy: 19th Century (PHIL 312), Introduction to Philosophy of Science (PHIL 339), Ancient Philosophers: [Topic] (PHIL 421)

Theater Arts. Studies in Theater and Culture: [Topic] (TA 471)

Honors

Honors in humanities allows a student to focus on an area of concentration in a written thesis. Requirements are as follows:

1. Satisfaction of the requirements for the major
2. A grade point average of 3.50 or better in courses taken to meet the upper-division requirements of the major
3. A senior thesis of substantial quality, approved by the thesis director and at least one member of the program committee

Kindergarten through Secondary Teaching Careers

Students who complete a degree with a major in humanities are eligible to apply to the College of Education’s fifth-year programs for a license in middle-secondary teaching or elementary teaching. More information is available in the **College of Education** section of this catalog. Students who want to teach language arts need more preparation in grammar, literature, and writing. Students who want to teach social studies need more preparation in history, economics, American government, culture, and society.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Courses

HUM 101. Introduction to the Humanities I. 4 Credits.

Ideas and modes of vision Western culture has inherited from the classical period. Readings and discussions focus on literature, philosophy, history, the arts, and religion.

HUM 102. Introduction to the Humanities II. 4 Credits.

Ideas and modes of vision Western culture has inherited from the medieval to the Renaissance periods. Readings and discussions focus on literature, philosophy, history, the arts, and religion.

HUM 103. Introduction to the Humanities III. 4 Credits.

An interdisciplinary introduction to the global humanities in the modern period.

HUM 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

HUM 240. Medical Humanities. 4 Credits.

Examines the intersection of literature, philosophy, history, and the arts with medical theory and practice.

HUM 245. Food, Art, and Literature. 4 Credits.

The study of food in the Ancient Greco-Roman world, ancient China, or the modern world using historical, literary, and practical approaches.

HUM 260. Postwar European Culture. 4 Credits.

Addresses the broad history and culture of 20th century Europe through humanistic themes and texts that reflect aspects of that experience.

HUM 298. Temporary Group-Satisfying Course. 4 Credits.

HUM 300. Themes in the Humanities. 4 Credits.

Interdisciplinary and multimedia introduction to the study of the humanities. Analysis of such themes as tragedy in music, literature, and art.

HUM 354. The City. 4 Credits.

Examines the urban experience in reference to law, culture, and systems of belief (e.g., classical Athens, Renaissance Florence, 20th-century Berlin).

HUM 355. The American City. 4 Credits.

Study of the great American city from the colonial period to the present, particularly New York, Los Angeles, and Chicago.

HUM 399. Special Studies: [Topic]. 1-5 Credits.

Problem-oriented course designed to explore new topics or approaches to studies in the humanities. Repeatable.

HUM 403. Thesis. 1-6 Credits.

Repeatable.

HUM 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

HUM 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

HUM 409. Practicum: [Topic]. 1-5 Credits.

Repeatable with consent of instructor and program head.

HUM 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

HUM 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

Human Physiology

John Halliwill, Department Head

541-346-4107
541-346-2841 fax
181 Esslinger Hall

Human physiology is the science of the mechanical, physical, and biochemical function of humans, and serves as the foundation of modern medicine. As a discipline, it connects science, medicine, and health, and creates a framework for understanding how the human body adapts to stresses, physical activity, and disease.

Human physiology and anatomy are closely related—anatomy is the study of form, physiology is the study of function, and form and function are intrinsically linked. The study of human physiology integrates knowledge across many levels, including biochemistry, cell physiology, and organ systems. Contemporary research in human physiology explores new ways to maintain or improve the quality of life, the development of new medical therapies and interventions, and the unanswered questions about how the human body works. The Department of Human Physiology serves its students by providing strong training in human physiology and anatomy to prepare them for careers in medicine, allied health professions, and biomedical research.

Faculty

Damien Callahan, assistant professor. BA, 2001, Boston; PhD, 2011, Massachusetts, Amherst. (2017)

Hans Dreyer, associate professor. BS, 1998, California State, Long Beach; MS, 2002, PhD, 2004, Southern California. (2009)

Grace Golden, senior lecturer. BS, 1989, MS, 1991, Oregon; PhD, 2007, Oregon State. (2009)

Ian Greenhouse, assistant professor. BA, 2004, Tufts; PhD, 2012, California, San Diego. (2017)

Barry Bates, professor emeritus. BSE, 1960, Princeton; MEd, 1971, East Stroudsburg; PhD, 1973, Indiana. (1974)

Gary Klug, professor emeritus. BS, 1970, MS, 1973, Wisconsin, La Crosse; PhD, 1980, Washington State. (1985)

Louis Osternig, professor emeritus. BS, 1965, MS, 1967, California State, Hayward; PhD, 1971, Oregon. (1971)

Richard Troxel, senior instructor emeritus. BS, 1975, MS, 1977, Oregon. (1976)

Marjorie Woollacott, professor emerita. BA, 1968, PhD, 1973, Southern California. (1980)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Arts
- Bachelor of Science

Undergraduate Studies

The department offers a program leading to either a bachelor of science (BS) or a bachelor of arts (BA) degree.

The rigorous undergraduate curriculum provides an in-depth exploration of the field as well as a strong foundation for future studies. Majors complete sequences in biology, chemistry, physics, and mathematics, in addition to upper-level course work in human physiology.

Preparation

High school preparation should include a strong background in chemistry, biology, mathematics, and physics. Students involved in Advanced Placement (AP) or International Baccalaureate (IB) programs can complete some lower division requirements by earning sufficient test scores. However, some graduate degree programs may require students to complete these courses at the collegiate level.

Transfer Students

Before transferring, students should complete as many general-education requirements and lower-division major requirements as possible, including general chemistry, general biology, general physics, and mathematics. Students should ensure that courses transfer specifically

as required sequences. The University's Transfer Course Equivalency (<http://registrar.uoregon.edu/transfer-students>) tool is a helpful resource.

The anatomy and physiology sequence (HPHY 321–325) provides the bulk of upper-division credits human physiology majors complete. The courses are the foundation on which students learn the human physiology culture and expectations, and are designed to prepare students for senior-level course work in the major. As a result, HPHY 321–325 must be completed in residence at the University of Oregon; transfer students should plan on taking the courses on the UO campus.

Scholarships

Numerous scholarships are available; a complete list is available on the department website.

Careers

A degree in human physiology prepares students to be critical thinkers who can independently assess their own personal health, using the guiding principles of scientific inquiry as a model for understanding the world around them. Students seeking a career in medicine, dentistry, physical therapy, or other health professions should work closely with the human physiology undergraduate advisor as well as health professions advisors to plan their program of study to meet the specific admission requirements of the postgraduate schools in which they are interested. Information on additional courses that may be required for graduate programs is available from the Health Professions Program (<http://healthprofessions.uoregon.edu/health-fields>) website.

HPHY 420	Human Anatomy Dissection

¹ Should be taken in the first year.

² Must be taken in residence at the University of Oregon.

Courses required for the major must be taken for letter grades and passed with grades of mid-C or better. Required preparatory and upper-division core courses may be repeated only once, including attempts that result in a grade of "W" (withdrawal). Students must maintain at least an overall 2.00 grade point average in courses required for the major.

Additional requirements for the bachelor's degree are described in the **Bachelor's Degree Requirements** section of this catalog.

Honors

To apply to graduate with departmental honors, a student must have a GPA of 3.50 or better in courses applied toward the human physiology degree requirements and complete an honors thesis under the supervision of a human physiology thesis committee. In addition, human physiology majors enrolled in the Robert Donald Clark Honors College at the University of Oregon are eligible to complete an honors thesis through that program.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

The bachelor of science is shown below. A bachelor of arts in human physiology may be earned by completing (or demonstrating proficiency in) two years of a foreign language.

¹ Students not starting in Elementary Functions (MATH 112) may require additional terms to graduate.
² To complete general-education requirements within eight courses, students must take arts and letters or social science group-satisfying courses that also satisfy multicultural requirements.
³ List A and List B options may be found online (<https://physiology.uoregon.edu/wp-content/uploads/sites/5/2013/03/HPHY-Major-Requirements.pdf>).

- **Master of Science: Athletic Training Emphasis**
- **Master of Science–Doctor of Philosophy: Research-Intensive Emphasis**

Graduate Studies

The Department of Human Physiology offers two graduate programs: the athletic training MS program and the research-intensive MS-PhD program.

Athletic Training MS Program

The department offers a graduate program in human physiology with an emphasis in athletic training leading to the master of science (MS). The primary goal of this program is to provide classroom and

clinical experiences that will allow entry-level certified athletic trainers to grow into professionals with the experience and confidence to be great clinicians. Providing students with advanced clinical skills is our hallmark. The program also provides students with the opportunity to grow as leaders, teachers, and researchers. Admission is granted only to students who are certified by the CAATE Board of Certification or who have qualified for the certification examination. Graduate employee (GE) positions are available for highly qualified students who are certified as athletic trainers. The GE award provides a full tuition waiver and a monthly stipend that varies in amount according to the assignment. Employment settings include intercollegiate athletics, club and recreational sports, and teaching. Qualified students can find more information at the Graduate Studies in Athletic Training website (<http://pages.uoregon.edu/uogradat>). (<http://pages.uoregon.edu/uogradat>)

Other human physiology courses		
Total Credits		52

Exit Requirement

All students participate in a comprehensive defense of their advanced clinical skills during spring term of their graduating year. In addition,

they select one of the following two options as their graduation exit requirement:

- **Option 1.** Comprehensive written and oral exams (completed during the final term of study), one-term (4-credit minimum) research experience, and literature review or evidence-based practice manuscript submitted for publication.
- **Option 2.** Original research study conducted, and manuscript submitted for publication.

Additional Requirements

Required courses must be taken for letter grades and passed with grades of B– or better. Students must maintain at least a 3.00 grade point average each term, and will not be eligible to hold a graduate employee (GE) position, take comprehensive exams, or graduate without a cumulative GPA of 3.00. Additional university master's degree requirements are described under Master's Degrees in the **Graduate School** section of this catalog.

Research-Intensive Master of Science–Doctor of Philosophy Program

The department offers a graduate program in human physiology with an emphasis on research leading through the master of science (MS) degree to the doctor of philosophy (PhD) degree. The goal is to provide classroom and research experiences that turn students into professionals with the knowledge and experience to be superior researchers or become university-level educators. This is an individualized program with a strong emphasis on research. Decisions on accepting applicants to the graduate program are made by the faculty members, and are based on available laboratory space and financial support—both of which vary greatly from year to year. graduate employee (GE) opportunities and research fellowships are available for highly qualified students to teach undergraduate laboratories or assist in research projects. The GE award provides a full-tuition waiver and a monthly stipend that varies in amount according to the assignment. For more information, visit the department website.

Total Credits		25

¹ Statistical analysis courses covering the following topics: descriptive statistics, logic of hypothesis testing, elementary inferential statistics, confidence intervals, one-way analysis of variance, post hoc comparisons, a priori contrasts, within-subjects and between-subjects effects, two-way and higher-order designs, and interactions. For recent additions to these course options, check with the director of graduate studies for the department.

² Determined in conjunction with program committee.

Additional Requirements

The master of science degree requires completion of a substantial research project. Department faculty members, in consultation with the student, determine the format for the presentation of the project, which will include an oral defense in combination with either a master's thesis, a journal-style manuscript, or a comprehensive project report. Required courses must be taken for letter grades and passed with grades of B– or better. Students must maintain at least a 3.00 grade point average for all courses. Additional university master's degree requirements are described under Master's Degrees in the **Graduate School** section of this catalog.

HPHY 685	Kinetics of Human Movement	
HPHY 603	Dissertation ³	1-16
Total Credits		30-45

¹ Statistical analysis courses covering the following topics: descriptive statistics, logic of hypothesis testing, elementary inferential statistics, confidence intervals, one-way analysis of variance, post hoc comparisons, a priori contrasts, within-subjects and between-subjects effects, two-way and higher-order designs, and interactions. For recent additions to these course options, check with the director of graduate studies for the department.

² Determined in conjunction with program committee.

³ Must register for course every term of enrollment after advancing to candidacy.

The doctoral degree requires completion of a minimum of 135 credits beyond the bachelor's degree; at least 60 of these credits must be completed through human physiology courses. Written and oral doctoral comprehensive examinations are taken after completing a substantial

portion of the program of study. Upon passing these examinations, the student is advanced to candidacy. A final oral defense is held after completion of the dissertation and after all other degree requirements have been met. Required courses must be taken for letter grades and passed with grades of B– or better. Students must maintain at least a 3.00 grade point average for all courses. Additional university doctor of philosophy degree requirements are described under Doctoral Degrees in the **Graduate School** section of this catalog

Admission Requirements

Applicants for the athletic training MS program should check the Graduate Studies in Athletic Training website (<http://pages.uoregon.edu/uogradat>) and applicants for the research-intensive MS-PhD program should check the department website (<http://physiology.uoregon.edu>) for information on the online graduate application and deadlines.

Recommended criteria for applying to all graduate programs include the following:

- Baccalaureate degree from an accredited university with a GPA of 3.40 or higher on a 4.00 scale
- Completed course work with a grade of B+ or better in general chemistry, general biology, and two courses of physiology or combined anatomy and physiology
- International students who have not received a degree from a university in a country whose official language is English must have a TOEFL score of 575 (paper test) or 90 (Internet-based test) or an IELTS overall band score of 7.0.

Minimum requirements for admission to all graduate programs include the following:

- Baccalaureate degree from an accredited university with a GPA of 3.00 or higher on a 4.00 scale
- Completed course work with a grade of B– or better in general chemistry, general biology, and two courses of physiology or combined anatomy and physiology
- International students who have not received a degree from a university in a country whose official language is English must have a TOEFL score of 575 (paper test) or 90 (Internet-based test) or an IELTS overall band score of 7.0

In addition, for graduate studies in athletic training:

- Recommended GRE scores of 153 or better on each of the verbal and quantitative sections (institution code: 4846; department code: 0217); minimum GRE scores of 148 or better on each of the verbal and quantitative sections
- Completed course work with a grade of B– or better in physics and biomechanics
- Must be a certified athletics trainer at time of matriculation

Courses

HPHY 103. Exercise and Performance. 4 Credits.

Structure and function of the human body including movement analysis. Topics include training and exercise responses; sport, daily living, and workplace performance; and injury adaptations.

HPHY 105. Principles of Nutrition. 4 Credits.

Explores the fundamentals of nutrition and its application to culture, lifestyle, and health as they relate to humans across the lifespan. Course will be taught once or more per academic year.

HPHY 111. The Science of Sex. 4 Credits.

The anatomy and physiology of sex, with assignments and discussion designed to develop scientific literacy.

HPHY 112. The Science of Health. 4 Credits.

Examines and assesses current health claims and controversies.

HPHY 199. Special Studies: [Topic]. 1-4 Credits.

Repeatable.

HPHY 211. Medical Terminology. 3 Credits.

Explore and develop skills in language and terminology specific to the medical sciences with an emphasis on derivation, meaning, and pronunciation.

HPHY 212. Scientific Investigation in Physiology. 4 Credits.

Explores the process of conducting and communicating scientific research, and how data and statistics help us build and understand scientific knowledge about physiology and medicine.

HPHY 321. Human Anatomy I. 5 Credits.

Introduction to the human body and histology; nerves; central, autonomic, and peripheral nervous systems; cranial nerves; regional anatomy of the head; special senses. Includes cadaver laboratory. Sequence with HPHY 322, 323, 324, 325.

Prereq: HPHY 211; BI 211 or BI 281H; BI 212 or BI 282H; CH 221 or CH 224H; CH 222 or CH 225H; CH 223 or CH 226H; MATH 246 or MATH 251. Must be passed with grades of C or better.

HPHY 322. Human Physiology I. 5 Credits.

Neuro- and muscular physiology: action potentials; synapses and receptors; skeletal muscle; central, peripheral, and autonomic nervous systems; special senses. Includes human-based laboratory. Sequence with HPHY 321, 323, 324, 325.

Prereq: HPHY 212; BI 211 or BI 281H; BI 212 or BI 282H; CH 221 or CH 224H; CH 222 or CH 225H; CH 223 or CH 226H; MATH 246 or MATH 251. Must be passed with grades of C or better.

HPHY 323. Human Anatomy II. 5 Credits.

Heart, lungs, and vasculature in addition to regional exploration of the musculoskeletal system. Includes cadaver laboratory. Sequence with HPHY 321, 322, 324, 325.

Prereq: HPHY 321. Must be passed with grades of C or better.

HPHY 324. Human Physiology II. 5 Credits.

Cardiovascular system; respiratory system; immunology. Includes human-based laboratory. Sequence with HPHY 321, 322, 323, 325.

Prereq: HPHY 212, HPHY 321, HPHY 322. Must be passed with grades of C or better.

HPHY 325. Human Anatomy and Physiology III. 5 Credits.

Anatomy and physiology of the digestive, reproductive, and renal systems; endocrinology. Includes combination of cadaver laboratory and human-based laboratory. Sequence with HPHY 321, 322, 323, 324.

Prereq: HPHY 323, HPHY 324. Must be passed with a grade of C or better.

HPHY 333. Motor Control. 4 Credits.

Introduction to the processes of control and coordination in the performance of motor skills. Neurophysiological, mechanical, and cognitive bases of motor skill acquisition.

Prereq: HPHY 321, HPHY 322; or PSY 304. Must be passed with grades of C or better.

HPHY 337. Clinical Pharmacology. 4 Credits.

Examines the pharmacokinetics (absorption, distribution, metabolism, excretion), pharmacodynamics, therapeutic considerations and adverse effects of select prototypes from within major clinically relevant drug families.

Prereq: HPHY 325. Must be passed with grades of C or better.

HPHY 362. Tissue Injury and Repair. 4 Credits.

Exploration of the physiology of injury and trauma. Emphasis on inflammation and healing of connective tissue injury, tissue biomechanics, mechanisms of injury, and clinical orthopedic evaluation techniques.

Prereq: HPHY 323, HPHY 324. Must be passed with grades of C or better.

HPHY 371. Physiology of Exercise. 4 Credits.

Physiology of exercise, physical conditioning, and training; mechanisms and significance of these effects for health and performance.

Prereq: HPHY 323, HPHY 324. Must be passed with a grade of C or better.

HPHY 374. Clinical Electrocardiography and Exercise. 4 Credits.

Overview of pathophysiology, diagnostic testing, exercise prescription and rehabilitation of cardiovascular diseases. Incorporated throughout the course, students will learn the fundamentals of electrocardiography and how this tool is applied in both the diagnostic and rehabilitative settings.

Prereq: HPHY 371. Must be passed with grades of C or better.

HPHY 375. Metabolism and Nutrition. 4 Credits.

Exploration of cellular, tissue, and whole body integrated metabolic processes as the basis of physiologic function. Integrating the metabolism of macronutrients at the cellular, tissue, and whole body systems level in the context of human growth, function, and disease.

Prereq: HPHY 325, HPHY 371. Must be passed with grades of C or better.

HPHY 381. Biomechanics. 4 Credits.

Fundamental principles of physics applied to the analysis of human movement. Emphasis on developing abilities to analyze human movement quantitatively.

Prereq: HPHY 323, PHYS 201. Must be passed with grades of C or better.

HPHY 399. Special Studies: [Topic]. 1-4 Credits.

Repeatable.

Prereq: HPHY 325 or HPHY 371. Must be passed with grades of C or better.

HPHY 401. Research: [Topic]. 1-15 Credits.

Repeatable.

HPHY 403. Thesis. 1-4 Credits.

For honors students during the terms in which they conduct research or write a thesis.

HPHY 404. Internship: [Topic]. 1-16 Credits.

Repeatable. Field experience in an agency, institution, or business. Practice knowledge from courses: planning, organizing, directing, evaluating, and developing professional competence.

HPHY 405. Reading and Conference: [Topic]. 1-15 Credits.

Repeatable. Reading and assignments in connection with other courses for extra credit. Honors readings.

HPHY 406. Special Problems: [Topic]. 1-15 Credits.

Repeatable.

HPHY 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics are offered regularly in such areas as health sciences, motor control, biomechanics, and physiology.

HPHY 408. Workshop: [Topic]. 1-15 Credits.

Repeatable.

HPHY 409. Practicum: [Topic]. 1-15 Credits.

Repeatable. Assist students learning anatomy or physiology in either the lecture or lab courses.

HPHY 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

Prereq: HPHY 325 or HPHY 371. Must be passed with grades of C or better.

HPHY 411. Scientific Teaching. 1 Credit.

For students currently completing the human anatomy and physiology core sequence; focuses on how people learn, evidence-based teaching practices, and strategies to improve student inclusion and representation. Prereq: HPHY 211, HPHY 212.

HPHY 412. Sleep Physiology. 4 Credits.

Fundamental principles of sleep and how physiology is affected by sleep. Prereq: HPHY 325 with a C or better.

HPHY 413. Muscle Structure, Function, and Plasticity. 4 Credits.

Physiologic basis for skeletal muscle adaptation to increased and decreased use and injury. Emphasizes how structure dictates function relevant to rehabilitation.

Prereq: HPHY 323, HPHY 324. Must be passed with a grade of C or better.

HPHY 414. Muscle Metabolism. 4 Credits.

Metabolic basis for skeletal muscle adaptation to increased and decreased use, and injury models. Emphasizes interorgan communication; uses clinical models.

Prereq: HPHY 371. Must be passed with grades of C or better.

HPHY 420. Human Anatomy Dissection. 2 Credits.

Dissection of one region of a preserved donated human cadaver and preparation of the specimen for the HPHY 321/HPHY 323/HPHY 325 laboratory experience. Students are accepted by application, which are due early February.

Prereq: HPHY 323. Must be passed with grades of C or better.

HPHY 422. Physiology of Obesity. 4 Credits.

Explores potential causes of the obesity epidemic, cellular mechanisms linking obesity to insulin resistance and metabolic diseases, and interventions in treatment of metabolic disease and obesity.

Prereq: HPHY 325, HPHY 371 with a C or better.

HPHY 423. Physiology of Aging. 4 Credits.

Examines changes that occur to cells and organs in old age and the causes of age-related disease and dysfunction (cardiovascular disease, diabetes, osteoporosis, Alzheimer's); interventions to increase longevity. Prereq: HPHY 325 with a C or better.

HPHY 432. Neural Development. 4 Credits.

Exploration of development of the cells in the nervous system. We will discuss the importance of "critical periods" in development and how interventions or dysfunction during critical periods can lead to neurodevelopmental disorders using the respiratory system as a model system.

Prereq: HPHY 323, HPHY 324. Must be passed with grades of C or better.

HPHY 433. Neurophysiology of Concussion. 4 Credits.

Investigate diagnosis, deficits, and treatment of mild traumatic brain injury and neurophysiological effects.

Prereq: HPHY 325, HPHY 333. Must be passed with grades of C or better.

HPHY 434. Movement Disorders. 4 Credits.

Discusses the clinical manifestations and underlying physiological mechanisms of selected movement disorders. Emphasizes the role of scientific experiment in diagnosis and treatment.

Prereq: HPHY 325, HPHY 333. Must be passed with grades of C or better.

HPHY 444. Clinical Anatomy. 4 Credits.

Through case-based learning, students have the opportunity to apply the knowledge of anatomy and physiology in the context of clinical practice and diagnosis.

Prereq: HPHY 325. Must be passed with grades of C or better.

HPHY 462. Therapeutic Techniques. 4 Credits.

Clinical application of therapeutic techniques including modalities and rehabilitation for soft-tissue orthopedic injuries. Offered alternate years.

Prereq: HPHY 362. Must be passed with grades of C or better.

HPHY 470. Environmental Physiology. 4 Credits.

Examination of physiological adaptations to acute and chronic exposure to extreme heat, cold, and high altitude.

Prereq: HPHY 371. Must be passed with grades of C or better.

HPHY 472. Science of Athletic Performance. 4 Credits.

Theoretical basis and practical application of modern physiological testing of cardiovascular and respiratory function with a focus on exercise and performance.

Prereq: HPHY 371. Must be passed with grades of C or better.

HPHY 473. High Altitude Physiology and Medicine. 4 Credits.

Explores major physiologic responses to high altitude (hypoxia), both adaptive and maladaptive, from systems to molecular level, as well as pathophysiological conditions at high altitude. Offered alternate years.

Prereq: HPHY 325 and 371. Must be passed with grades of C or better.

HPHY 503. Thesis. 1-16 Credits.

Repeatable.

HPHY 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics are offered regularly in such areas as health sciences, motor control, biomechanics, and physiology.

HPHY 508. Workshop: [Topic]. 1-15 Credits.

Repeatable.

HPHY 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

HPHY 512. Sleep Physiology. 4 Credits.

Fundamental principles of sleep and how physiology is affected by sleep.

HPHY 513. Muscle Structure, Function, and Plasticity. 4 Credits.

Physiologic basis for skeletal muscle adaptation to increased and decreased use and injury. Emphasizes how structure dictates function relevant to rehabilitation.

HPHY 514. Muscle Metabolism. 4 Credits.

Metabolic basis for skeletal muscle adaptation to increased and decreased use, and injury models. Emphasizes interorgan communication; uses clinical models.

HPHY 520. Human Anatomy Dissection. 2 Credits.

Dissection of one region of a preserved donated human cadaver and preparation of the specimen for the HPHY 321/HPHY 323/HPHY 325 laboratory experience. Students are accepted by application, which are due early February.

HPHY 522. Physiology of Obesity. 4 Credits.

Explores potential causes of the obesity epidemic, cellular mechanisms linking obesity to insulin resistance and metabolic diseases, and interventions in treatment of metabolic disease and obesity.

HPHY 523. Physiology of Aging. 4 Credits.

Examines changes that occur to cells and organs in old age and the causes of age-related disease and dysfunction (cardiovascular disease, diabetes, osteoporosis, Alzheimer's); interventions to increase longevity.

HPHY 532. Neural Development. 4 Credits.

Exploration of development of the cells in the nervous system. We will discuss the importance of "critical periods" in development and how interventions or dysfunction during critical periods can lead to neurodevelopmental disorders using the respiratory system as a model system.

HPHY 533. Neurophysiology of Concussion. 4 Credits.

Investigate diagnosis, deficits, and treatment of mild traumatic brain injury and neurophysiological effects.

HPHY 534. Movement Disorders. 4 Credits.

Discusses the clinical manifestations and underlying physiological mechanisms of selected movement disorders. Emphasizes the role of scientific experiment in diagnosis and treatment.

HPHY 570. Environmental Physiology. 4 Credits.

Examination of physiological adaptations to acute and chronic exposure to extreme heat, cold, and high altitude.

HPHY 573. High Altitude Physiology and Medicine. 4 Credits.

Explores major physiologic responses to high altitude (hypoxia), both adaptive and maladaptive, from systems to molecular level, as well as pathophysiological conditions at high altitude. Offered alternate years.

HPHY 601. Research: [Topic]. 1-16 Credits.

Repeatable.

HPHY 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

HPHY 603. Dissertation. 1-16 Credits.

Repeatable.

HPHY 605. Reading and Conference: [Topic]. 1-15 Credits.

Repeatable.

HPHY 606. Special Problems: [Topic]. 1-16 Credits.

Repeatable. Selected problems in the field of human physiology.

HPHY 607. Seminar: [Topic]. 1-9 Credits.

Repeatable. Topics are offered regularly in such areas as health sciences, motor control, biomechanics, and physiology.

HPHY 608. Workshop: [Topic]. 1-15 Credits.

Repeatable.

HPHY 609. Practicum: [Topic]. 1-15 Credits.

Repeatable.

HPHY 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

HPHY 611. Professional Skills I: Effective Teaching. 1 Credit.

Development of professional skills for academic careers related to human physiology. Sequence with HPHY 612, 613.

HPHY 612. Professional Skills II: Responsible Research. 1 Credit.

Development of professional skills for academic careers related to human physiology. Sequence with HPHY 611, 613.

HPHY 613. Professional Skills III: Career Development. 1 Credit.

Development of professional skills for academic careers related to human physiology. Sequence with HPHY 611, 612.

HPHY 621. Systems Physiology I. 4 Credits.

Advanced overview of neural physiology, neural control of human movement, and the biomechanical constraints underlying that control. Sequence with 622, 623.

HPHY 622. Systems Physiology II. 4 Credits.

Advanced overview of cardiovascular physiology and skeletal muscle cell physiology and metabolism. Series with HPHY 621, 623.

HPHY 623. Systems Physiology III. 4 Credits.

Advanced overview of renal and respiratory physiology. Series with HPHY 621, 622.

HPHY 631. Human Performance and Sports Products. 3 Credits.

Exploration of sciences of human performance: physiology and kinesiology, which inform the Sports Product Industry at the level of product development, product design and marketing. Available to non-majors only.

HPHY 660. Basic Science in Clinical Decisions. 4 Credits.

Literature-based investigation into the basic science and clinical research underlying clinical decisions in athletic medicine.

HPHY 661. Manual Therapy: Movement Patterns, Core Stability. 2 Credits.

Advanced skills in proprioceptive neuromuscular facilitation (PNF) movement patterns, and both pilates principles and manual therapy to improve core stability. For certified athletic trainers. Offered alternate years.

HPHY 662. Manual Therapy: Spine, Lower Quadrant. 2 Credits.

Advanced skills in muscle energy, mobilization, and trigger-point release techniques for the spine and lower quadrant. For certified athletic trainers. Offered alternate years.

HPHY 669. The Female Athlete. 4 Credits.

Literature-based investigation of the unique anatomy and physiology, as well as social-cultural issues, of the female athlete related to sports medicine.

HPHY 670. Advanced Respiratory Physiology. 4 Credits.

Explores advanced concepts in respiratory physiology; includes exercise adaptations and examples of pathophysiology. Offered alternate years. Prereq: HPHY 623.

HPHY 671. Therapeutic Restoration of Biomotor Abilities. 3 Credits.

Exploration of advanced rehabilitation techniques for athletic trainers, including advanced program design, evaluation, and movement-sport analysis.

Pre- or coreq: certification as an athletic trainer or physical therapist.

HPHY 676. Human Cardiovascular Control. 4 Credits.

Cardiovascular physiology, including central control of blood pressure and flow regulation. An integrative approach toward how the cardiovascular system is coordinated with overall body function. Offered alternate years.

Prereq: HPHY 623.

HPHY 684. Kinematics of Human Movement. 4 Credits.

Theory and application of kinematic analysis of human motion. Emphasis on 2D and 3D kinematics, including data collection, analysis and modeling. Offered alternate years.

Prereq: HPHY 621.

HPHY 685. Kinetics of Human Movement. 4 Credits.

Experimental methods and mechanical theories associated with the analysis of joint forces and movements during human motion. Offered alternate years.

Prereq: HPHY 621.

Global Studies

Kathie Carpenter, Department Head

541-346-5051

175 Prince Lucien Campbell Hall

5206 University of Oregon

Eugene, Oregon 97403-5206

The Department of Global Studies (formerly the Department of International Studies) offers bachelor of arts (BA), bachelor of science (BS), and master of arts (MA) degrees in international studies and minors in international studies and global health. The program is tailored to give students the theoretical tools to make sense of the fast-changing global arena; ensure the practical application of their research; immerse them in the language, history, and culture of a major world region; ensure they live, study, conduct research, or hold an internship that enhances their intercultural knowledge, understanding, and skills; and help them develop a professional concentration area suitable for their career goals. Professional concentration and geographic focus options are listed in the Undergraduate section of the department page.

The Department of Global Studies is a member of the Association of Professional Schools of International Affairs and the International Studies Association. These associations provide more opportunities in research, internships, funding, and employment for international studies students.

Faculty

Yvonne A. Braun, professor (gender and development, social change, Africa). BA, 1994, State University of New York, Geneseo; MA, 2000, PhD, 2005, California, Irvine. (2005)

Kathie Carpenter, associate professor (childhood, children's museums, Southeast Asia). BA, 1975, California, San Diego; MA, 1983, PhD, 1987, Stanford. (1989)

Dennis C. Galvan, professor (comparative politics, international development, Africa and Indonesia). BA, 1987, Stanford; MA, 1990, PhD, 1996, California, Berkeley. (2001)

Derrick Hindery, associate professor (environment and development, global economic restructuring, indigenous movements, Latin America). BA, 1994, MA, 1997, PhD, 2003, California, Los Angeles. (2007)

Angela Joya, assistant professor (global political economy, Middle East). BA, 2002, MA, 2004, PhD, 2013, York. (2014)

Galen Martin, senior instructor (environmental and cultural geography, global food security, Latin America). AA, 1977, Hesston College; BA, 1980, Goshen College; MA, 1985, Oregon; PhD, 2003, California, Davis. (1998)

David Meek, assistant professor (food sovereignty, popular education, India and Brazil). BA, 2004, Bard College; MSc, 2007, Antioch, New England; PhD, 2014, Georgia. (2018)

Gabe Paquette, professor (intellectual history, Portuguese and Spanish history, history of European empires). See **History**.

Lesley Jo Weaver, assistant professor (health disparities, race, India and Brazil). BA, 2004, Smith College; MPH 2008, PhD, 2014, Emory University. (2018)

Anita M. Weiss, professor (gender and development, political Islam, South Asia). BA, 1975, Rutgers; MA, 1976, PhD, 1983, California, Berkeley. (1987)

Stephen R. Wooten, associate professor (local-global dynamics, food studies, Africa). BA, 1986, Massachusetts, Amherst; MA, 1993, PhD, 1997, Illinois, Urbana-Champaign. (1999)

Kristin Yarris, associate professor (global health, migration, Latin America). BA, 1994, Lewis and Clark College; MPH, MA, 2004, PhD, 2011, California, Los Angeles. (2012)

Emeritus

Gerald W. Fry, professor emeritus. BA, 1964, Stanford; MPA, 1966, Princeton; PhD, 1977, Stanford. (1981)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Carlos Aguirre, history

Ina Asim, history

Oluwakemi Balogun, women's, gender, and sexuality studies

Diane B. Baxter, anthropology

Erin Beck, political science

Aletta Biersack, anthropology

Bruce A. Blonigen, economics

Lindsay F. Braun, history

Daniel P. Buck, geography

Alfredo Burlando, economics

Mark Carey, honors college

Shankha Chakraborty, economics

Shaul E. Cohen, geography

Jane K. Cramer, political science

Robert L. Davis, Romance languages

André Djiffack, Romance languages

Maram Epstein, East Asian languages and literatures

Michael Fakhri, law

John B. Foster, sociology

Alisa D. Freedman, East Asian languages and literatures

Pedro García-Caro, Latin American studies

Ibrahim J. Gassama, law

Bryna Goodman, history

Sangita Gopal, English

Jeffrey E. Hanes, history

Robert S. Haskett, history

Michael Hibbard, planning, public policy and management

David Hollenberg, religious studies

Zhuo Jing-Schmidt, East Asian languages and literatures

Lamia Karim, anthropology

Craig Kauffman, political science

Karrie Koesel, political science

Nicolas Larco, architecture

Jeffrey Magoto, Yamada Language Center

Gabriela Martinez, journalism and communication

Michelle McKinley, law

Karen McPherson, Romance languages

Katharine Meehan, geography

Ronald B. Mitchell, political science

Alexander B. Murphy, geography

Michael Malek Najjar, theater arts

Kevin Nute, architecture

Eileen M. Otis, sociology

Craig Parsons, political science

Doris L. Payne, linguistics

Eric W. Pederson, linguistics

Philip W. Scher, anthropology

Carol T. Silverman, anthropology

Lars Skalnes, political science

H. Leslie Steeves, journalism and communication

Lynn Stephen, anthropology

Jeffrey Stolle, management

Xiaobo Su, geography

Surendra Subramani, counseling psychology and human services

Tuong Vu, political science

Peter A. Walker, geography

Janis C. Weeks, biology

- **Bachelor of Arts**
- **Bachelor of Science**
- **Minor in Global Health**
- **Minor in International Studies**

Undergraduate Studies

The bachelor's degree offers students a rigorous education in the basic elements of the field. The program provides a sound general education for the student interested in the complex interrelationships (political, economic, environmental, social, and cultural) that exist among nations in the interdependent modern world.

Advising

Advising about specific major requirements is provided by the department's undergraduate advising office. Regular consultation with this office is strongly advised for majors, premajors, and minors. The role of the faculty advisor as mentor is central to the program. Students applying to the major are also required to choose a faculty member with whom they have a common area of interest to act as their advisor and mentor, typically one of the core or participating faculty members named in the departmental faculty list or a faculty member from the student's concentration areas, professional or geographic.

Admission

The first step for students planning to major in international studies is to declare the premajor. International studies premajors must first complete the requirements listed below before they can apply to the international studies major.

Code	Title	Credits
INTL 101	Introduction to International Issues	4
Select two of the following:		
INTL 199	Special Studies: [Topic] (Globalization and the Global Economy)	
INTL 240	Perspectives on International Development	
INTL 250	Value Systems in Cross-Cultural Perspective	
INTL 260	Culture, Capitalism, and Globalization	
INTL 280	Global Environmental Issues and Alternatives	
Second-language sequence or equivalency demonstrated		
WR 121	College Composition I	4
WR 122	College Composition II (WR 123 strongly recommended)	4
or WR 123	College Composition III	

Students must maintain a grade point average of 3.00 (cumulative) or higher than 3.00 for three consecutive terms prior to the term of application.

Courses required for the premajor must be passed with a C– or better. Freshman seminars do not count toward this requirement. Students are strongly encouraged not to wait until their junior or senior year to apply.

Premajor advising and help with application procedures are available at the international studies undergraduate advising office. Applicants must meet with an international studies undergraduate advisor to review the application before submitting it for consideration. Applications are due on Monday of the fourth week of fall, winter, and spring terms.

In exceptional cases (and to accommodate transfer students), students entering the university may apply to become an international studies major without completing the required two terms. More information is available from the director of undergraduate studies.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Preparatory Course		
INTL 101	Introduction to International Issues ¹	4
Block A: International Core Foundation		
Select four of the following: ²		16
INTL 199	Special Studies: [Topic] (Globalization and the Global Economy)	
INTL 240	Perspectives on International Development	
INTL 250	Value Systems in Cross-Cultural Perspective	
INTL 260	Culture, Capitalism, and Globalization	
INTL 280	Global Environmental Issues and Alternatives	
Block B: Professional Concentration Area		
Four upper-division courses in one area of concentration (see professional concentration areas list and tables) ³		16
Block C: Geographic Focus		
Four upper-division courses on one cultural area (a group of nations that share common cultural, historical, geographic, and/or linguistic experiences); at least one of the four must have the INTL subject code ⁴		16
Total Credits		52

¹ Should be taken before international core foundation courses. Must be taken prior to applying to the major.

² INTL courses at the 300- and 400-level may be used to fulfill this requirement if it is not already being used toward completion of a student's Block B or C requirements. More information is available from an international studies advisor.

³ Students may design their own professional concentration area if none of the predefined areas fits the student's professional goals. Students who choose this option must designate one of the core faculty members of the Department of International Studies as an advisor and work with that individual in designing the concentration.

⁴ As many as 4 credits in a third-year language sequence may be used to fulfill the geographic focus requirement. Appropriate courses should have significant course content on the region of study. Areas of focus may include Africa, Europe, Latin America and the Caribbean, the Middle East, North America, South and Central Asia, and East and Southeast Asia. A North American geographic focus is only open to international students.

Professional Concentration Areas

- Comparative International Development (p. 349)
- Cross-Cultural Communication and Education (p. 350)

- Culture, Art, and Development (p. 350)
- Diplomacy and International Relations (p. 350)
- Global Health and Development (p. 351)
- International Business (p. 351)
- International Economics (p. 351)
- International Environment (p. 352)
- International Gender Issues (p. 352)
- International Nonprofit Management (p. 352)
- International Tourism (p. 353)
- Law and Human Rights (p. 353)
- Media, Journalism, and Communication (p. 353)
- Migration, Displacement, and Refugees (<http://intldept.uoregon.edu/undergraduate/prof-concentration-areas/migration-displacement-refugees>)
- Peace Studies and Conflict Resolution (p. 354)
- Second-Language Acquisition and Teaching (p. 354)

Comparative International Development

Code	Title	Credits
Required Courses		
INTL 420	Global Community Development	4
INTL 422	Aid to Developing Countries	4
Elective Courses		
Select two courses from the following:		8
Economics		
EC 390	Problems and Issues in the Developing Economies	
EC 490	Economic Growth and Development	
EC 491	Issues in Economic Growth and Development	
Geography		
GEOG 341	Population and Environment	
GEOG 342	Geography of Globalization	
GEOG 465	Environment and Development	
International Studies		
INTL 340	Global Health and Development	
INTL 345	Africa Today: Issues and Concerns	
INTL 421	Gender and International Development	
INTL 423	Development and the Muslim World	
INTL 431	Cross-Cultural Communication	
INTL 442	South Asia: Development and Social Change	
INTL 446	Development and Social Change in Latin America	
Planning, Public Policy and Management		
PPPM 327	Global Leadership and Change	
PPPM 422	Grant Proposal Writing	
PPPM 432	Justice and Urban Revitalization	
PPPM 448	Collaboration	
PPPM 480	Nonprofit Management I	
Sociology		
SOC 303		
SOC 420	Political Economy	

SOC 450	Sociology of Developing Areas	
Total Credits		16

Cross-Cultural Communication and Education

Code	Title	Credits
Required Courses		
Both of the following:		8
INTL 431	Cross-Cultural Communication	
INTL 433	Childhood in Cross-Cultural Perspective	
Elective Courses		
Select two courses from the following:		8
Geography		
GEOG 343	Society, Culture, and Place	
GEOG 441	Political Geography	
GEOG 445	Culture, Ethnicity, and Nationalism	
International Studies		
INTL 360	International Cooperation and Conflict	
INTL 370	International Human Rights	
INTL 421	Gender and International Development	
INTL 432	Indigenous Cultural Survival	
INTL 434	Language Issues for International Studies	
Journalism

Second-Language Acquisition and Teaching

Students must complete the requirements of the certificate in second-language acquisition and teaching to fulfill this concentration. Students may choose their language specialization from the following target languages: Chinese, English, French, German, Japanese, Korean, Russian, or Spanish. For more information, including requirements and courses, please contact an international studies undergraduate advisor and visit slat.uoregon.edu.

Code	Title	Credits
Required and Elective Courses		
Students must contact an international studies undergraduate advisor for options in their linguistic areas		

Additional Requirements

Courses must be passed with grades of C– or better to satisfy major requirements. In addition, three years' proficiency in a second language is required (see below for details).

Courses applied to the major, with the exception of the language requirement and up to 8 credits in Field Studies: [Topic] (INTL 406) or Practicum: [Topic] (INTL 409), must be taken for letter grades.

A maximum of 12 credits in courses taken to fulfill the university group requirements may be applied toward the international studies major.

A maximum of 20 credits in courses taken in a single department other than international studies may be applied toward the international studies major, exclusive of the language requirement.

For the most current information about courses and requirements, visit the department website.

Language Requirement

To satisfy this requirement, students must achieve proficiency in a second language at a level associated with three years of study. Proficiency in the language may be demonstrated by passing three terms of a 300-level language sequence with grades of mid-C or better, by an examination, or by graduating from a high school in which English was not the medium of instruction.

A student may also fulfill the language requirement with two years' proficiency in two different languages exclusive of the student's native language. Students wishing to pursue this option must get approval from the director of undergraduate studies faculty.

Intercultural Experience

Majors must have a significant intercultural experience to complete requirements for the major. This can be satisfied by at least one term (ten weeks) of study or work in another country that coincides with their geographical focus area. Contact the departmental advising office for information about other ways to satisfy this requirement. For information about study in another country, see Study Abroad in the **Supplementary Academic Programming** section of this catalog. Advice is available from the Office of International Affairs, 330 Oregon Hall. *Domestic (US-based) cultural experiences and internships must be preapproved by the advising team.*

Internship Option

Students may earn pass/no pass (P/N) credit for work done as interns. Interested students should consult with international studies advisors.

Bachelor of Science Degree Requirements

Code	Title	Credits
Preparatory Course		
INTL 101	Introduction to International Issues ¹	4
Block A: International Core Foundation		
Select four of the following: ²		16
INTL 199	Special Studies: [Topic] (Globalization and the Global Economy)	
INTL 240	Perspectives on International Development	
INTL 250	Value Systems in Cross-Cultural Perspective	
INTL 260	Culture, Capitalism, and Globalization	
INTL 280	Global Environmental Issues and Alternatives	
Block B: Professional Concentration Area		
Four upper-division courses in one area of concentration (see professional concentration areas list and tables) ³		16
Block C: Geographic Focus		
Four upper-division courses on one cultural area (a group of nations that share common cultural, historical, geographic, and/or linguistic experiences); at least one of the four must have the INTL subject code ⁴		16
Total Credits		52

¹ Should be taken before international core foundation courses. Must be taken prior to applying to the major.

² INTL courses at the 300- and 400-level may be used to fulfill this requirement if it is not already being used toward completion of a student's Block B or C requirements. More information is available from an international studies advisor.

³ Students may design their own professional concentration area if none of the predefined areas fits the student's professional goals. Students who choose this option must designate one of the core faculty members of the Department of International Studies as an advisor and work with that individual in designing the concentration.

⁴ As many as 4 credits in a third-year language sequence may be used to fulfill the geographic focus requirement. Appropriate courses should have significant course content on the region of study. Areas of focus may include Africa, Europe, Latin America and the Caribbean, the Middle East, North America, South and Central Asia, and East and Southeast Asia. A North American geographic focus is only open to international students.

Professional Concentration Areas

- Comparative International Development (p. 349)
- Cross-Cultural Communication and Education (p. 350)
- Culture, Art, and Development (p. 350)

Second-Language Acquisition and Teaching

Students must complete the requirements of the certificate in second-language acquisition and teaching to fulfill this concentration. Students may choose their language specialization from the following target languages: Chinese, English, French, German, Japanese, Korean, Russian, or Spanish. For more information, including requirements and courses, please contact an international studies undergraduate advisor and visit slat.uoregon.edu.

Code	Title	Credits
Required and Elective Courses		

Students must contact an international studies undergraduate advisor for options in their linguistic areas

Additional Requirements

Courses must be passed with grades of C– or better to satisfy major requirements. In addition, three years' proficiency in a second language is required (see below).

Courses applied to the major, with the exception of the language requirement and up to 8 credits in Field Studies: [Topic] (INTL 406) or Practicum: [Topic] (INTL 409), must be taken for letter grades.

A maximum of 12 credits in courses taken to fulfill the university group requirements may be applied toward the international studies major.

A maximum of 20 credits in courses taken in a single department other than international studies may be applied toward the international studies major, exclusive of the language requirement.

For the most current information about courses and requirements, visit the department website.

Language Requirement

To satisfy this requirement, students must achieve proficiency in a second language at a level associated with three years of study. Proficiency in the language may be demonstrated by passing three terms of a 300-level language sequence with grades of mid-C or better, by an examination, or by graduating from a high school in which English was not the medium of instruction.

A student may also fulfill the language requirement with two years' proficiency in two different languages exclusive of the student's native language. Students wishing to pursue this option must get approval from the director of undergraduate studies.

Intercultural Experience

Majors must have a significant intercultural experience to complete requirements for the major. This can be satisfied by at least one term (ten weeks) of study or work in another country that coincides with their geographical focus area. Contact the departmental advising office for information about other ways to satisfy this requirement. For information about study in another country, see Study Abroad in the **Supplementary Academic Programming** section of this catalog. Advice is available from the Office of International Affairs, 330 Oregon Hall. *Domestic (US-based) cultural experiences and internships must be preapproved by the advising team.*

Internship Option

Students may earn pass/no pass (P/N) credit for work done as interns. Interested students should consult with international studies advisors.

International Studies Honors Thesis

Students who have a grade point average (GPA) of 3.50 or higher and want to graduate with department honors write a 30- to 50-page thesis. A faculty mentor must be selected and a proposal must be approved by the director of undergraduate studies at least two terms before graduation. Students may apply as many as 4 credits in Thesis (403) to the appropriate block of the 48 credits required for the international studies major.

The completed thesis must be awarded a grade of mid-B or better by the advisor (P, or pass, for a Clark Honors College thesis) and be approved as meeting thesis guidelines by the department head. This includes addressing a global or cross-cultural topic and using a minimum of two non-English-language sources for all projects, including the honors college thesis.

Minor in Global Health

The College of Arts and Sciences administers an undergraduate minor in global health, overseen by the global health program director and a faculty advisory committee.

To earn a minor, students must complete a total of 24 graded credits from approved courses, at least 12 of which must be at the upper-division level, as well as a 400-level field experience or internship, to be arranged in consultation with a faculty advisor from an affiliated program.

The courses that satisfy the minor are distributed as follows: two core courses and four elective courses. Core and elective courses applied to the minor must be taken for letter grades and passed with grades of C- or better.

Students seeking to qualify for a minor should, as early as possible, consult the global health program director as well as academic advisors.

Developing the plan for elective courses with the advisors' help ensures that the courses selected satisfy the minor requirements and may be completed in a timely fashion.

No later than two terms before graduation, the student must notify the undergraduate advisors of intent to graduate for verification of the global health minor course work and transcript evaluation. The student must also indicate the global health minor on the application for graduation. Students must complete major requirements for an undergraduate degree in another department or school of the university.

Requirements

SOC 450	Sociology of Developing Areas	4
WGS 407	Seminar: [Topic] (Gender and Bodies)	1-5

Deviations from the requirements listed must be approved by a global health advisor.

Restrictions

No more than three courses (12 credits) from a single department (courses with the same subject code) may count toward the minor. No more than three courses may count for both the global health minor and the student's major field of study. Twenty credits toward the minor and all upper-division courses must be taken in residence at the University of Oregon. Course work within the minor, including the field experience or internship, must be taken for a letter grade and passed with a grade of C– or better.

Majors in international studies are strongly encouraged to complete a minor in the UO program correlating with their geographic focus. Available programs include African studies, Asian studies, European studies, Latin American studies, Middle East–North Africa Studies, and Russian, East European, and Eurasian Studies.

Minor in International Studies

The international studies minor provides students with the opportunity to add a global perspective to any major, in addition to providing a solid grounding in intercultural communication and the foundations of global citizenship. Students are able to tailor course work to their own professional and personal objectives, so the minor is a suitable complement to a BA or BS degree in any school or department.

International studies minors must complete 24 international studies (subject code INTL) course credits, 12 of which must be upper division, with a grade of C– or better or P. Course selection is up to the individual student, but for advising purposes tracks are suggested for students coming from different majors, tracks that can especially complement particular career goals. Student may elect up to 12 lower-division credits, which share a common purpose of fostering critical and cross-cultural thinking as well as encouraging students to seek out and understand diverse perspectives and ways of approaching and communicating about current global issues. The 12 required upper-division credits allow a deeper investigation of issues, regions, and cultures and also hone skills in research, effective writing, and oral presentation to address rapidly changing and complex current and future issues.

Sample Schedule

- Introduction to International Issues (INTL 101)
- Special Studies: [Topic] (INTL 199) (Globalization and the Global Economy)
- Perspectives on International Development (INTL 240)
- Seminar: [Topic] (INTL 407) (Corruption and Development)
- Cross-Cultural Communication (INTL 431)
- Development and Social Change in Latin America (INTL 446)

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in International Studies

Below is an example of how to complete a BA in international studies with a diplomacy and international relations professional concentration and a Middle East geographic focus. Since the major offers 16 options for professional concentration areas and seven different geographic focus regions, with a wide variety of courses that can count toward each concentration, there are innumerable paths through the international studies major.

This degree plan is for general planning purposes only and, due to the interdisciplinary nature of the major, it is imperative that students speak with advisors to determine which courses would best match their personal, professional, and academic goals.

- **Master of Arts**

Graduate Studies

The interdisciplinary MA degree in international studies is offered for students who contemplate careers in international affairs, international development, diplomacy, international organizations, or domestic organizations with an international focus. A minimum of 73 credits must be completed for the degree.

The degree program can be tailored to meet the unique professional needs of each student. In close consultation with a faculty advisor, the student develops a program that combines expertise in a specific professional area with interdisciplinary training in international studies.

Concentrations

In consultation with their faculty advisor, students identify a professional concentration. Suggested areas include the following:

- comparative development
- cross-cultural training
- cultural arts
- environment
- food and food systems
- gender and development
- health
- international community development
- international education
- international tourism
- journalism
- migration
- nonprofit management
- public policy and planning

Concentrations in other professional areas can be arranged.

Graduates of the Department of International Studies serve as international technical advisors, career diplomats, community

development professionals, international business and trade experts, analysts in developing countries, international educators, administrators of international programs, and cross-cultural communication consultants.

Admission

The applicant must be a graduate of an accredited four-year college or university with a grade point average (GPA) of 3.30 or better in all academic work. The application deadline is January 5 for the following fall term. A Graduate Record Examinations (GRE) score is required. Students whose native language is not English must verify a score of 575 (paper-based test) or 90 (Internet-based test) or better on the Test of English as a Foreign Language (TOEFL) unless they have earned a bachelor's degree from a college or university in an English-speaking country such as Australia, Canada (excluding Quebec), Ireland, New Zealand, or the United Kingdom. A score of 7.0 or better on the overall band of the International English Language Testing System test may be submitted instead of the TOEFL. Additional information about the graduate program may be obtained from the Department of International Studies website. The application process is online.

International Students

International students are encouraged to apply. Study programs are designed to meet students' professional needs and those of their home countries. As many as half the program's graduate students are international students.

Master of Arts Degree Requirements

Code	Title	Credits
Interdisciplinary Core		
INTL 655	International Studies Graduate Core Seminar	4
Proseminar Series		
INTL 656	Research and Writing in International Studies	1
INTL 657	Proseminar: Proposal Writing	2
Professional Concentration Area ¹		
	Concentration area courses from relevant departments or professional schools ²	24
Geographic Focus		
	Courses in geographic focus area ³	12
Supervised Field Internship or Field Research		
	Internship or research experience related to student's career plans	12
Master of Arts Project		
	Thesis or capstone project	9
Total Credits		64

¹ Three of the four courses (12 credits) must have the INTL subject code.

² Concentration areas are tailored to individual student interests. Students interested in agricultural extension, forestry, and public health may take courses at Oregon State University. (For information about concurrent enrollment, see the **Bachelor's Degree Requirements** section of this catalog.)

³ Geographic focus areas are Africa, East Asia, Europe, Latin America, the Middle East, South Asia, or Southeast Asia. Students who earned their undergraduate degrees from institutions outside the United States may substitute an additional 12 credits in the professional concentration for the 12 credits of geographic focus. Students are encouraged to choose a geographic focus outside their home region.

Additional Requirements

Students must take a minimum of 24 graded credits in the professional concentration area. A maximum of 24 credits may be taken in any department other than international studies in order to allow an appropriate degree of specialization.

Language Study and Competence

Students must demonstrate a third-year level of proficiency in a second language relevant to their professional or geographic focus before completing the program. The University of Oregon offers formal courses in a number of European and non-European languages. Students also may study languages through self-instruction at the Yamada Language Center. International students whose high school or university instruction was not in English demonstrate proficiency in English as a second language through completion of the master's degree requirements. It is recommended that international students study a language from their geographic focus.

Supervised Field Internship or Field Research

The program assists students in locating internships or research opportunities and securing funding. International students may do their internship or research in the United States. Students are responsible for obtaining funding for the costs or for otherwise paying the costs in their entirety. Many graduate students in the program have competed successfully for funding to support internship and research experiences.

The international studies faculty expects students to gain the following from the internship or research experience:

1. a reasonably in-depth experience in a culture other than the student's own
2. greater fluency in the language of the culture in which the internship or research takes place
3. knowledge and experience useful to the career goals of the intern

Master of Arts Project

Each student must prepare an MA project, usually in the form of a thesis or capstone project. Students are required to present a thesis or capstone proposal defense, and at the conclusion of the project, present an oral defense before the student's final project committee. Other types of projects may be approved on a case-by-case basis by the student's master's advisor. Nine credits are awarded for a thesis or capstone project.

Concurrent Doctor of Jurisprudence/Master of Arts Degree

A four-year program for students interested in international human rights, this program provides background in legal theory and instruments sensitive to social, cultural, economic, and political realities against which international human-rights law is implemented. Future lawyers concerned with asylum, immigration, or public-interest law benefit from the study of international relations and cross-cultural communication.

Courses

INTL 101. Introduction to International Issues. 4 Credits.

Survey of major political, economic, and cultural themes in international studies through in-class debates on key contemporary issues.

INTL 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

INTL 198. Colloquium: [Topic]. 1-2 Credits.

Repeatable.

INTL 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

INTL 240. Perspectives on International Development. 4 Credits.

Introduction to major ideologies, theories, historical processes, and contemporary challenges in international development. Galvan.

INTL 250. Value Systems in Cross-Cultural Perspective. 4 Credits.

Introduction to value systems of various cultures, focusing on how values relate to religion, forms of social organization, group affiliation, and patterns of conflict resolution.

INTL 260. Culture, Capitalism, and Globalization. 4 Credits.

Cultural and historical perspectives on the development of capitalism as a way of life and its relationship to contemporary global issues and imbalances.

INTL 280. Global Environmental Issues and Alternatives. 4 Credits.

Examines root causes of "environmental problems" at local, regional, national, and global scales. Critically compares approaches to addressing international environmental challenges.

INTL 323. Islam and Global Forces. 4 Credits.

Addresses interactions between global forces and processes in historical and modern Muslim societies and the salience of Islam in contemporary global arenas. Sequence with INTL 423. Offered alternate years.

INTL 340. Global Health and Development. 4 Credits.

Introduction to major issues in global health, their causes and possible solutions, with a focus on the poor in developing countries.

INTL 345. Africa Today: Issues and Concerns. 4 Credits.

Introduces students to current challenges facing African peoples today. Extends survey of Africa courses, and prepares students for more advanced study regarding the African continent.

INTL 360. International Cooperation and Conflict. 4 Credits.

Utilizes case studies and selected themes to examine the root causes, stakeholder perspectives, and attempts to resolve international conflicts.

INTL 370. International Human Rights. 4 Credits.

Survey of human rights, examining diverse perspectives on the concept, practice, and implementation of human rights and human rights regimes.

INTL 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

INTL 401. Research: [Topic]. 1-12 Credits.

Repeatable.

INTL 403. Thesis. 1-12 Credits.

Repeatable.

INTL 405. Reading and Conference: [Topic]. 1-12 Credits.

Repeatable.

INTL 406. Field Studies: [Topic]. 1-12 Credits.

Repeatable.

INTL 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Special topics in international studies.

INTL 408. Workshop: [Topic]. 1-12 Credits.

Repeatable.

INTL 409. Practicum: [Topic]. 1-12 Credits.

Repeatable. Closely supervised participation in the activities of public or private organizations, institutes, and community service agencies.

INTL 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Africa: Development and Social Change. Repeatable when topic changes.

INTL 420. Global Community Development. 4 Credits.

Introduction to communitarian theory and local-level grass-roots development practices. Comparison across North-South divide of efforts to alleviate poverty, promote sustainability, and ensure mobilization and cohesion.

Prereq: INTL 240.

INTL 421. Gender and International Development. 4 Credits.

Analysis of the changing roles, opportunities, and expectations of Third World women as their societies undergo social upheavals associated with the problematic effects of development.

Prereq: INTL 240.

INTL 422. Aid to Developing Countries. 4 Credits.

Examines the history and current dynamics of international bilateral and multilateral development assistance, the possibilities and constraints of aid, and other related issues.

Prereq: INTL 240.

INTL 423. Development and the Muslim World. 4 Credits.

Introduction to discourse on current development in various Muslim societies. Focuses on North Africa, the Middle East, South Asia, and Southeast Asia. Weiss.

INTL 424. United Nations Intervention in Global Crises. 4 Credits.

Explores the theory and practice of humanitarian aid, peace-building, and development during or after violent conflict. Focuses on work of international organizations in conflict areas or on issues of conflict.

INTL 425. Global Food Security. 4 Credits.

Explores explanations for, and solutions to, persistent inequities in food access. Considers the political, agricultural, economic and humanitarian aspects of the global food system.

INTL 431. Cross-Cultural Communication. 4 Credits.

Focuses on skills and insights needed by professionals working in cross-cultural settings. Considers values, development, education, politics, and environment as central to cross-cultural understanding.

INTL 432. Indigenous Cultural Survival. 4 Credits.

Explores case studies of global indigenous peoples who are facing cultural survival issues and developing strategies and institutions to deal with this complex process.

INTL 433. Childhood in Cross-Cultural Perspective. 4 Credits.

Explores the experience of childhood around the world and examines how this experience is shaped by beliefs about who and what children are and by local conditions and contingencies.

INTL 434. Language Issues for International Studies. 4 Credits.

Explores the influence of language on policy issues in societies around the world relative to nationalism, identity, multilingualism, education, human rights globalization, and language spread and loss.

INTL 442. South Asia: Development and Social Change. 4 Credits.

Introduction to the vast social changes and development issues confronting the South Asian subcontinent.

INTL 444. Development and Social Change in Southeast Asia. 4 Credits.

Introduction to the region and to the complex social issues facing the peoples of Southeast Asia.

INTL 445. Development and Social Change in Sub-Saharan Africa. 4 Credits.

Introduces theoretical and practical aspects of development and social change in sub-Saharan Africa, with focus on key issues in African development during the post-colonial era.

INTL 446. Development and Social Change in Latin America. 4 Credits.

Explores development challenges, debt cycles, urban growth, neoliberalism, populism, socialism, gender, the environment, U.S.–Latin American relations, ecotourism, and drug geographies in the region.

INTL 448. Bollywood's Lens on Indian Society. 4 Credits.

Explores Indian society through film, focusing on critical social issues; depicted vs. the historical reality; and ongoing transformations of social orientations and values.

INTL 463. Population Displacement and Global Health. 4 Credits.

Explores health and mental health problems affecting displaced (migrant and refugee) communities and considers underdevelopment as a fundamental cause of displacement and health problems. Offered once per academic year.

INTL 465. Global Reproductive Health. 4 Credits.

Overview of issues in global reproductive health, including politics, economics, historical and cultural factors. Implications for international health and development programs reviewed. Offered alternate years.

INTL 467. Global Mental Health. 4 Credits.

Overview of global mental health from a critical, anthropological, and historical perspective, with attention to cross-cultural differences in illness experience and treatment options.

INTL 503. Thesis. 1-12 Credits.

Repeatable.

INTL 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Special topics in international studies.

INTL 508. Workshop: [Topic]. 1-12 Credits.

Repeatable.

INTL 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Africa: Development and Social Change. Repeatable when topic changes.

INTL 520. Global Community Development. 4 Credits.

Introduction to communitarian theory and local-level grass-roots development practices. Comparison across North-South divide of efforts to alleviate poverty, promote sustainability, and ensure mobilization and cohesion.

INTL 521. Gender and International Development. 4 Credits.

Analysis of the changing roles, opportunities, and expectations of Third World women as their societies undergo social upheavals associated with the problematic effects of development.

INTL 522. Aid to Developing Countries. 4 Credits.

Examines the history and current dynamics of international bilateral and multilateral development assistance, the possibilities and constraints of aid, and other related issues.

INTL 523. Development and the Muslim World. 4 Credits.

Introduction to discourse on current development in various Muslim societies. Focuses on North Africa, the Middle East, South Asia, and Southeast Asia.

INTL 524. United Nations Intervention in Global Crises. 4 Credits.

Explores the theory and practice of humanitarian aid, peace-building, and development during or after violent conflict. Focuses on work of international organizations in conflict areas or on issues of conflict.

INTL 525. Global Food Security. 4 Credits.

Explores explanations for, and solutions to, persistent inequities in food access. Considers the political, agricultural, economic and humanitarian aspects of the global food system.

INTL 531. Cross-Cultural Communication. 4 Credits.

Focuses on skills and insights needed by professionals working in cross-cultural settings. Considers values, development, education, politics, and environment as central to cross-cultural understanding.

INTL 532. Indigenous Cultural Survival. 4 Credits.

Explores case studies of global indigenous peoples who are facing cultural survival issues and developing strategies and institutions to deal with this complex process.

INTL 533. Childhood in Cross-Cultural Perspective. 4 Credits.

Explores the experience of childhood around the world and examines how this experience is shaped by beliefs about who and what children are and by local conditions and contingencies.

INTL 534. Language Issues for International Studies. 4 Credits.

Explores the influence of language on policy issues in societies around the world relative to nationalism, identity, multilingualism, education, human rights globalization, and language spread and loss.

INTL 542. South Asia: Development and Social Change. 4 Credits.

Introduction to the vast social changes and development issues confronting the South Asian subcontinent.

INTL 544. Development and Social Change in Southeast Asia. 4 Credits.

Introduction to the region and to the complex social issues facing the peoples of Southeast Asia.

INTL 545. Development and Social Change in Sub-Saharan Africa. 4 Credits.

Introduces theoretical and practical aspects of development and social change in sub-Saharan Africa, with focus on key issues in African development during the post-colonial era.

INTL 546. Development and Social Change in Latin America. 4 Credits.

Explores development challenges, debt cycles, urban growth, neoliberalism, populism, socialism, gender, the environment, U.S.–Latin American relations, ecotourism, and drug geographies in the region.

INTL 548. Bollywood's Lens on Indian Society. 4 Credits.

Explores Indian society through film, focusing on critical social issues; depicted vs. the historical reality; and ongoing transformations of social orientations and values.

INTL 563. Population Displacement and Global Health. 4 Credits.

Explores health and mental health problems affecting displaced (migrant and refugee) communities and considers underdevelopment as a fundamental cause of displacement and health problems. Offered once per academic year.

INTL 565. Global Reproductive Health. 4 Credits.

Overview of issues in global reproductive health, including politics, economics, historical and cultural factors. Implications for international health and development programs reviewed. Offered alternate years.

INTL 567. Global Mental Health. 4 Credits.

Repeatable.

INTL 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

INTL 605. Reading and Conference: [Topic]. 1-12 Credits.

Repeatable.

INTL 606. Field Studies: [Topic]. 1-12 Credits.

Repeatable.

INTL 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

INTL 608. Special Topics: [Topic]. 1-12 Credits.

Repeatable.

INTL 609. Practicum: [Topic]. 1-12 Credits.

Repeatable. Closely supervised participation in the activities of public or private organizations, institutes, and community service agencies.

INTL 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

INTL 655. International Studies Graduate Core Seminar. 4 Credits.

Graduate introduction to the field of International Studies, including exploration of development, culture, communication, and research methods, design, and ethics.

INTL 656. Research and Writing in International Studies. 1 Credit.

Focus on conceptualizing research topics; accessing bibliographic databases; writing grant applications, reports, and theses.

INTL 657. Proseminar: Proposal Writing. 2 Credits.

An introduction to thesis proposal writing for first-year graduate students in international studies.

Judaic Studies

D. Gantt Gurley, Program Director

541-346-5288
311 Susan Campbell Hall
5273 University of Oregon
Eugene, Oregon 97403-5273

The interdisciplinary Harold Schnitzer Family Program in Judaic Studies provides a comprehensive undergraduate curriculum in the history, religion, and cultural traditions of the Jewish people and offers instruction in biblical Hebrew language and literature. The program offers a major leading to a bachelor of arts (BA) degree and a minor. It sponsors courses, lectures, and other events of interest to the general student population and the wider community.

Faculty

Deborah A. Green, associate professor. BA, 1984, Brandeis; MA, 1997, PhD, 2003, Chicago. (2003)

D. Gantt Gurley, associate professor. See **German and Scandinavian**.

Emerita

Judith R. Baskin, professor emerita. See **Religious Studies**.

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Executive Committee

Monique Balbuena, honors college

Deborah A. Green, Judaic studies

D. Gantt Gurley (chair), German and Scandinavian

Gina Herrmann, Romance languages

Heidi N. Kaufman, English

Anne Kreps, religious studies

Jeffrey S. Librett, German and Scandinavian

David M. Luebke, history

David Wacks, Romance languages

Participating

Michael G. Aronson, English

Monique Balbuena, honors college

Diane B. Baxter, anthropology

Shaul E. Cohen, geography

Evlyn Gould, Romance languages

Gina Herrmann, Romance languages

Heidi N. Kaufman, English

David M. Luebke, history

Steven Shankman, English

Carol T. Silverman, anthropology

David Wacks, Romance languages

Mary E. Wood, English

Naomi Zack, philosophy

- **Bachelor of Arts**
- **Minor**

Undergraduate Studies

The Judaic studies program consists of core courses taught under the HBRW, JDST, and REL subject codes and related courses taught in the disciplines of participating faculty members—anthropology, art history, comparative literature, conflict and dispute resolution, English, geography, folklore and public culture, German and Scandinavian,

history, landscape architecture, music, philosophy, political science, religious studies, Romance languages, and women's and gender studies.

The focus on Jewish cultures and experience as a lens to study the world provides a liberal arts background suitable to careers in a range of professional fields (law, education, rabbinate, social service, public policy) and prepares students for graduate work in Judaic studies, religious studies, and related fields.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Lower-Division Requirements		
HBRW 111 & HBRW 112 & HBRW 113	Biblical Hebrew I and Biblical Hebrew II and Biblical Hebrew III	12
REL 211	Early Judaism	4
JDST 212	Medieval and Early Modern Judaism	4
JDST 213	The Jewish Encounter with Modernity	4
REL 222	Introduction to the Bible I	4
Upper-Division Requirements		
Select three of the following:		12
HBRW 311	Biblical Narrative	
HBRW 312	Biblical Poetry	
HBRW 313	Postbiblical Literature	
JDST 330	American Jewish Cultures	4
HBRW 399	Special Studies: [Topic]	1-12
Six approved elective courses ¹		24
Total Credits		69-80

¹ Courses must focus on significant issues in Judaic studies from the perspective of the instructor's academic discipline. See Electives table for a list of recently offered courses.

Electives

Code	Title	Credits
ANTH 429	Jewish Folklore and Ethnology	4
ENG 340	Jewish Writers	4
ENG 380	Film, Media, and History	4
FLR 411	Folklore and Religion	4
GER 368	Themes in German Literature	4
HIST 415	Advanced World History: [Topic]	4
HIST 428	Europe in the 20th Century: [Topic]	4
JDST 330	American Jewish Cultures	4
JDST 340	Israelis and Palestinians	4
PHIL 320	Philosophy of Religion	4
REL 318	Women in Judaism	4

A list of approved courses is available from the program director preceding each term; it also appears in the online class schedule and the program website.

Honors in Judaic Studies

A degree with honors in Judaic studies requires the following:

1. Satisfaction of the requirements of the major
2. A cumulative grade point average of 3.50 in courses taken to satisfy the major requirements
3. Satisfactory completion of an honors thesis

The candidate for honors must register for 4 credits in Research: [Topic] (JDST 401) winter term of the senior year in order to prepare for writing the thesis, and for 4 credits in Thesis (JDST 403) spring term for its completion. A faculty committee of two supervises the project. A first draft of the thesis must be submitted six weeks before the end of the term in which the student expects to graduate and the final draft two weeks before the end of the term.

Minor in Judaic Studies

Code	Title	Credits
Lower-Division Requirements		
REL 211	Early Judaism	4
JDST 212	Medieval and Early Modern Judaism	4
JDST 213	The Jewish Encounter with Modernity	4
Upper-Division Requirements		
Four courses including one about the American Jewish experience ¹		16
Total Credits		28

¹ As many as 4 credits in Internship: [Topic] (JDST 404) or Practicum: [Topic] (JDST 409) or Practicum: [Topic] (HBRW 409) may be used to satisfy minor requirements.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Hebrew Courses**HBRW 111. Biblical Hebrew I. 4 Credits.**

Prepares students to read biblical and postbiblical Hebrew texts. Emphasis on classical Hebrew grammar, vocabulary, and syntax.

HBRW 112. Biblical Hebrew II. 4 Credits.

Prepares students to read biblical and postbiblical Hebrew texts. Emphasis on classical Hebrew grammar, vocabulary, and syntax. Prereq: HBRW 111.

HBRW 113. Biblical Hebrew III. 4 Credits.

Prepares students to read biblical and postbiblical Hebrew texts. Emphasis on classical Hebrew grammar, vocabulary, and syntax. Prereq: HBRW 112.

HBRW 199. Special Studies: [Topic]. 1-12 Credits.

Repeatable.

HBRW 311. Biblical Narrative. 4 Credits.

Readings in extended narrative prose passages from the Hebrew Bible; emphasis on reading, translation, vocabulary formation, and Hebrew syntax. Taught in Hebrew. Repeatable twice when topic changes. Prereq: HBRW 113 or equivalent.

HBRW 312. Biblical Poetry. 4 Credits.

Readings in poetic passages from the Hebrew Bible; focus on reading, translation, vocabulary formation, Hebrew syntax, and biblical poetics. Taught in Hebrew. Repeatable twice when topic changes. Prereq: HBRW 113 or equivalent.

HBRW 313. Postbiblical Literature. 4 Credits.

Readings in postbiblical Hebrew texts of various genres from late antiquity and the Middle Ages, including legal writings, narratives, and poetry. Taught in Hebrew. Repeatable twice when topic changes. Prereq: HBRW 113 or equivalent.

HBRW 399. Special Studies: [Topic]. 1-12 Credits.

Repeatable.

HBRW 401. Research: [Topic]. 1-12 Credits.

Repeatable.

HBRW 402. Supervised College Teaching. 1-12 Credits.

Repeatable.

HBRW 403. Thesis. 1-12 Credits.

Repeatable.

Latin American Studies

Pedro García-Caro, Program Director

pgcaro@uoregon.edu

407 Friendly Hall

The University of Oregon offers a bachelor of arts degree in Latin American studies. A minor in Latin American studies is also available. An emphasis on Latin America is available for master of arts (MA) degrees with majors in anthropology, history, international studies, and Spanish. See the **Anthropology** (p. 65), **History** (p. 320), **International Studies** (p. 347), and **Romance Languages** sections of this catalog.

Study Abroad

Students in University of Oregon overseas study programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. See the Study Abroad (p. 969) section in the **Supplementary Academic Programming** section of this catalog.

Participating Faculty

Michael B. Aguilera, sociology

Carlos Aguirre, history

Monique Balbuena, honors college

Erin Beck, political science

Mayra Bottaro, Romance languages

Derek Burdette, history of art and architecture

Mark Carey, honors college

Christopher Chavez, journalism and communication

Alexandre Dossin, music

Michael Dreiling, sociology

Cecilia Enjuto Rangel, Romance languages

Linda O. Fuller, women's and gender studies

Dennis Galvan, international studies

Pedro García-Caro, Romance languages

Leonardo García-Pabón, Romance languages

Spike Gildea, linguistics

Amalia Gladhart, Romance languages

Michael Hames-García, ethnic studies

James Harper, history of art and architecture

Robert S. Haskett, history

Derrick Hindery, international studies

Craig Kauffman, political science

Ana M. Lara, anthropology

Kathryn A. Lynch, environmental studies

Galen Martin, international studies

Gabriela Martinez, journalism and communication

Michelle McKinley, law

Katharine Meehan, geography

Lanie Millar, Romance languages

Juan-Carlos Molleda, journalism and communication

Edward Olivos, education studies

Priscilla P. Ovalle, English

Doris Payne, linguistics

Amanda W. Powell, Romance languages

Gerardo Sandoval, planning, public policy and management

Alaí Reyes-Santos, ethnic studies

Philip W. Scher, anthropology

Lynn Stephen, anthropology

Analisa Taylor, Romance languages

Alejandro Vallega, philosophy

Jessica Vasquez-Tokos, sociology

David J. Vazquez, English

Julie Weise, history

Peter B. Wetherwax, biology

Juan Wolf, music

Stephanie Wood, College of Education

Kristin Yarris, international studies

Reuben Zahler, history

Rocio Zambrana, philosophy

Emeritus

Juan A. Epple, Romance languages

Linda Kintz, English

- **Bachelor of Arts**

- **Minor**

Undergraduate Studies

Preparation

High school students who have taken courses in economics, history, political science, or other approaches to international affairs, or who have participated in extracurricular activities (such as the Oregon High School International Relations League) may be interested in Latin American studies.

Community college students who have taken courses in international relations may be interested in specializing in Latin American studies.

Careers

Career opportunities for students completing Latin American studies are available through such avenues as the Peace Corps, the U.S. Foreign Service (including the Information Agency), the foreign-aid programs of the United States government, the United Nations and other international organizations, private foundations, international businesses, and international nongovernmental organizations (including church, human-rights, and environmental organizations).

Bachelor of Arts Degree Requirements

Code	Title	Credits
LAS 200	Introduction to Latin American Studies	4
LAS 211 or LAS 212	Latin American Humanities: [Topic] Latin American Social Sciences: [Topic]	4
Two courses chosen from the following:		8
SPAN 342	Hispanic Cultures through Literature II	
SPAN 343	Hispanic Cultures through Literature III	
SPAN 344	Hispanic Cultures through Literature IV	
HIST 380–382	Latin America (choose two courses for a total of 8 credits)	8
LAS 407	Seminar: [Topic] ¹	4
Elective courses related to Latin America		20
Total Credits		48

¹ In exceptional cases, Seminar: [Topic] (LAS 407) may be substituted with an equivalent seminar focusing on Latin America that is offered by another department or program.

Additional Requirements

Of the total 48 credits required for the Latin American studies major—

- 28 credits must be taken on the Eugene campus
- 16 credits is the maximum allowed from any single department
- 16 credits may be from courses related to United States Latino studies or studies of US Hispanic culture or society
- 12 credits may be in lower-division courses
- 8 credits may be used in independent study or internships
- 8 credits must be taken in courses covering the pre-1800 period
- 8 credits may be taken pass/no pass (P/N)

- 8 credits must be taken in social sciences departments other than history (e.g., anthropology, economics, ethnic studies, geography, international studies, political science, or sociology)

Language Requirements

In addition to the minimum of 48 credits in required and elective courses, all majors are required to demonstrate a third-year level of proficiency in Spanish or Portuguese. This will entail completing (with a grade of C– or better or P) the basic two years of college-level language courses and taking at least four 300-level courses taught in the respective foreign language—such as *Cultura y Lengua: Identidades Hispanas* (SPAN 301), *Cultura y lengua: expresiones artisticas* (SPAN 303), *Cultura y lengua: cambios sociales* (SPAN 305), *Hispanic Cultures through Literature III* (SPAN 343), or *Hispanic Cultures through Literature IV* (SPAN 344).

Minor Requirements

Code	Title	Credits
LAS 200	Introduction to Latin American Studies	4
Select one of the following:		4
LAS 211	Latin American Humanities: [Topic]	
LAS 212	Latin American Social Sciences: [Topic]	
LAS 407	Seminar: [Topic]	
Elective courses		20
Total Credits		28

Language Requirements

Students must satisfactorily complete, with grades of C– or better or P, two years of college-level Spanish- or Portuguese-language courses.

Language credits may be earned at the University of Oregon through an approved overseas program or transferred from another accredited college or university. As an alternative, students may satisfy the language requirement by examination, demonstrating a level of competence equivalent to two years of college-level Spanish or Portuguese. Students whose native language is either Spanish or Portuguese may substitute equivalent competence in English in lieu of this requirement.

Additional Requirements

Of the total 28 credits for the Latin American studies minor—

- 20 credits must be earned in University of Oregon courses
- 20 credits must be in upper-division (300- or 400-level) courses
- 20 credits must be taken for letter grades
- 12 credits from any one department may count toward the minor
- 8 credits may be earned through successful completion of preapproved courses in study-abroad program at an accredited Latin American college or university; transfer credits from universities outside Latin America are considered individually, following existing procedures in appropriate departments for determining their equivalence to UO courses
- 4 credits must be earned through completion of a course or courses whose focus is on pre-20th-century Latin America
- 4 credits may be in comparative, global, ethnic, and similar courses that are relevant to Latin American studies but lack a minimum of 50 percent content directly related to Latin America
- courses from no more than four departments, disciplines, or programs may count toward the minor

- Spanish, Portuguese, or Indigenous language courses must be upper-division literature and culture courses to count toward satisfaction of the 28-credit minor requirement

Advising

Students who want a major or a minor in Latin American studies should contact the program director, who serves as an advisor to determine which courses offered during any given academic year may be applied to requirements for the degree or minor.

Sampling of Courses from Other Departments That Satisfy Major and Minor Requirements

Code	Title	Credits
Anthropology		
ANTH 434	Native South Americans	4

SPAN 490	20th-Century Latin American Literature: [Topic]	4

Any Department, Program with Latin America Focus

Seminar (407)

Periodically, other departments and programs such as ethnic studies, geography, history of art and architecture, international studies, sociology, and women’s and gender studies offer courses that may satisfy degree and minor requirements.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Its purpose is to provide an example of one possible route through the Latin American studies major.

This degree plan is for general planning purposes only and, due to the interdisciplinary nature of the major, it is imperative that students speak with advisors to determine which courses would best match their personal, professional, and academic goals.

Graduate Studies

Specialization in Latin American studies at the graduate level is possible in a number of departments in the College of Arts and Sciences. Anthropology, economics, history, international studies, political science, sociology, and Spanish (in the Romance languages department) have faculty members who are competent and interested in the area. It is possible to arrange graduate degree programs in these departments with a concentration in Latin American studies.

Courses

LAS 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable twice when topic changes for a maximum of 15 credits.

LAS 200. Introduction to Latin American Studies. 4 Credits.

Introduction to the history, peoples, and cultures of Latin America and of the Latino population in the United States.

LAS 211. Latin American Humanities: [Topic]. 4 Credits.

Focuses on the comparative study of Latin American cultural and intellectual traditions. Introduces scholarship in the humanities about Latin American and U.S. Latinos. Repeatable once for a maximum of 8 credits when topic changes.

LAS 212. Latin American Social Sciences: [Topic]. 4 Credits.

Addresses various issues related to the historical, political, cultural, and economic development of Latin America from a social science perspective. Repeatable once for a maximum of 8 credits when topic changes.

LAS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable twice when topic changes for a maximum of 15 credits.

LAS 401. Research: [Topic]. 1-4 Credits.

Repeatable.

LAS 403. Thesis. 1-4 Credits.

Repeatable.

LAS 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

LAS 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable.

LAS 407. Seminar: [Topic]. 4 Credits.

Repeatable.

LAS 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable twice when topic changes for a maximum of 15 credits.

LAS 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable twice when topic changes for a maximum of 15 credits.

Linguistics

Melissa Redford, Department Head

541-346-3906
161 Straub Hall
1290 University of Oregon
Eugene, Oregon 97403-1290

The Department of Linguistics offers instruction leading to a bachelor of arts (BA), a master of arts (MA), and a doctor of philosophy (PhD) degree in linguistics. A master of arts in language teaching studies in also offered. The interests of its faculty are in the documentation, preservation, and revitalization of endangered languages; historical linguistics; laboratory phonology; language acquisition and learning; language variation and change; morphosyntax; phonetics; psycholinguistics; semantics; Slavic linguistics; sociolinguistics; and typology.

Faculty

Melissa Michaud Baese-Berk, associate professor (second-language acquisition, phonetics, laboratory phonology, psycholinguistics). BA, 2004, Boston; PhD, 2010, Northwestern. (2013)

B. Mokaya Bosire, senior instructor (Swahili). BA, 1991, MA, 1993, Nairobi; PhD, 2008, State University of New York, Albany. (2012)

Don Daniels, assistant professor (languages of Papua New Guinea, language change and reconstruction, linguistic fieldwork, morphosyntax). BA, 2006, Dartmouth College; PhD, 2015, California, Santa Barbara. (2018)

Spike Gildea, professor (language description, diachronic syntax, typology, phonology, comparative linguistics, field methods and ethics, Cariban and other South American languages). BA, 1983, MA, 1989, PhD, 1992, Oregon. (2000)

Vsevolod M. Kapatsinski, associate professor (psycholinguistics, corpus linguistics, experimental morphology and phonology, language learning in the lab). BA, 2003, MA, 2005, New Mexico; PhD, 2009, Indiana. (2009)

Tyler S. Kendall, associate professor (sociolinguistics, corpus linguistics, phonetics, language and law). BA, 1998, Cornell; PhD, 2009, Duke. (2010)

Doris L. Payne, professor (morphology, syntax, semantics, discourse; Amerindian and African languages). BS, 1974, Wheaton; MA, 1976, Texas, Arlington; PhD, 1985, California, Los Angeles. (1987)

Eric W. Pederson, associate professor (cognitive and psycholinguistics, language and culture; South Indian languages). BA, 1982, MA, 1985, PhD, 1991, California, Berkeley. (1997)

Gabriela Pérez Báez, assistant professor (language documentation and description, language revitalization, semantic typology, language and cognition, Zapotec languages). BFA, 1997, MA, 2005, PhD 2009, State University of New York, Buffalo. (2018)

Melissa Redford, professor (phonetics, laboratory phonology, psycholinguistics, cognitive science). BA, 1992, California, Berkeley; MA, 1995, PhD, 1999, Texas, Austin. (2002)

Julie M. Sykes, associate professor (second language acquisition, interlanguage pragmatics, transformative pedagogy). BA, 2001, MA, 2005, Arizona State; PhD, 2008, Minnesota. (2016)

Charlotte R. Vaughn, instructor (speech perception, psycholinguistics, talker variability, sociophonetics). BA, 2005, Duke; MA, 2011, PhD, 2014, Northwestern. (2014)

Keli D. Yerian, senior lecturer (language teacher education, curriculum development, gesture in discourse); director, Language Teaching Specialization MA Program. BA, 1991, North Carolina, Chapel Hill; MS, 1994, PhD, 2000, Georgetown. (2007)

Emeriti

Scott DeLancey, professor emeritus. BA, 1972, Cornell; PhD, 1980, Indiana. (1982)

T. Givón, professor emeritus. BSc, 1959, Jerusalem; MS, 1962, MA, 1966, PhD, 1969, California, Los Angeles. (1981)

Russell S. Tomlin, professor emeritus. BA, 1973, Knox; MA, 1975, PhD, 1979, Michigan. (1979)

Cynthia M. Vakareliyska, professor emerita. BA, 1973, Princeton; JD, 1976, Columbia; PhD, 1990, Harvard. (1994)

Participating

Gregory D. Anderson, linguistics

Dare A. Baldwin, psychology

Marjorie S. Barker, linguistics

Robert L. Davis, Romance languages

Tom Delaney, American English Institute

Robert Elliott, Northwest Indian Language Institute

Andrew Halvorsen, American English Institute

Laura G. Holland, American English Institute

Kaori Idemaru, East Asian languages and literatures

Zhuo Jing-Schmidt, East Asian languages and literatures

Mark Johnson, philosophy

Sarah Klinghammer, linguistics

Jeffrey Magoto, Yamada Language Center

Thomas E. Payne, linguistics

Trish Pashby, American English Institute

Janne Underriner, Northwest Indian Language Institute

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts** (p. 376)
- **Minor**

Undergraduate Studies

The program offers instruction in the nature of human language, the structural variety of individual languages, and the methodology of conducting a linguistic investigation. The primary aim of linguistics as a science is to study the use and organization of human language in coding and communicating knowledge. Although linguists may study specific facts of many languages, they do so to gain insight into the properties and processes common to all languages. Such common features may in turn reflect universals of human cognitive, cultural, and social organization.

Language occupies a central position in the human universe, so much so that it is often cited as a major criterion for defining humanity. Its use in the coding and processing of knowledge makes it relevant to psychology. As a tool of reasoning, it verges on logic and philosophy. As a computational system, it relates to computer science and language-data processing. As a repository of one's cultural worldview, it is a part of anthropology. As an instrument of social intercourse and a mark of social identity, it interacts with sociology. As a biological subsystem lodged in the brain, it is highly relevant to neurology. As the primary vehicle of learning and maturation, it is important for education. As an expressive medium, it is the crux of literature and rhetoric.

Careers

To gain understanding into the complexities of human language is thus to gain entrance into numerous fields of academic investigation and practical use. Indeed, computer programmers, conflict mediators, cryptologists, elementary school teachers, language teachers, lawyers, psychiatrists, speech therapists, and translators all depend heavily on understanding the nature and use of language.

The BA degree in linguistics provides a solid foundation for graduate studies in anthropology, communication, communication disorders and sciences, computer-science education, journalism, law, linguistics, literature and languages, philosophy, psychology, or sociology. It offers a strong entry into the applied fields listed above.

Advising

Undergraduate majors should consult one of the departmental undergraduate advisors each term about their study program.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Core Courses		
LING 301	Introduction to Linguistics Analysis	4
LING 302	Introduction to Linguistic Behavior	4
LING 411	Phonetics	4
LING 450	Introduction to Phonology	4
LING 435	Morphology and Syntax	4
LING 451	Functional Syntax I	4
Specialization Courses		
Choose three of the following:		12
LING 396	Language and Cognition	
LING 415	Semantics	
LING 444	Second-Language Acquisition	
LING 452	Functional Syntax II	
LING 460	Historical and Comparative Linguistics	
LING 491	Sociolinguistics	
Electives		
LING 407 Seminar: [Topic] (Proseminar)		8
Any 200-level or greater LING course (except LING 440)		
Total Credits		44

Core Courses

The six core courses are designed to expose you to the analysis of linguistic data and language acquisition, variation, and change: two introductory courses, Introduction to Linguistics Analysis (LING 301) and Introduction to Linguistic Behavior (LING 302); two courses focusing on sound, Phonetics (LING 411) and Introduction to Phonology (LING 450); and two courses focusing on grammar, Morphology and Syntax (LING 435) and Functional Syntax I (LING 451).

Specialization Courses

These three courses allow students to focus either on language behavior or linguistic analysis, on cognitive aspects or grammar.

Electives

Two courses complete the requirements:

- **Elective.** Any linguistics (LING) course numbered between 200 and 499, except Linguistic Principles and Second-Language Learning (LING 440).
- **Proseminar elective.** Seminar: [Topic] (LING 407). It is sometimes possible to substitute another 400-level course that has fewer students, most readings from primary literature, and discussion-oriented class periods with a rigorous term paper. Seminars typically have prerequisites, often a subset of the required courses.

For a list of preapproved non-LING courses that can serve as an elective, visit the department website (<http://linguistics.uoregon.edu/undergraduate/electives>).

Additional Requirements

Two years of one second language and one year of another.

Courses applied to the major in linguistics must be taken for letter grades. A course in which a grade of D+ or lower is earned cannot count toward the major.

The study program of undergraduate linguistics majors must be approved by a departmental undergraduate advisor.

Honors in Linguistics

By fulfilling the following requirements, any linguistics major may graduate with honors.

Grade Point Average

On entry to the honors program at the end of the junior year, a grade point average (GPA) of 3.75 or better in linguistics courses and at least 3.50 overall is required. At the end of the senior year, a GPA of 3.75 or better in linguistics courses is required.

Senior Thesis

Write an original honors thesis under the guidance of a thesis advisor from the linguistics faculty, chosen in consultation with the undergraduate advisor. The thesis must be a substantial piece of work; it may be a revised and expanded term paper. The thesis advisor determines whether the thesis is acceptable; the student is required to register for at least 6 credits in Thesis (LING 403), taken pass/no pass, over the course of at least two terms.

Upon fulfilling these requirements, the candidate is approved to receive a BA degree with honors in linguistics.

Minor in Linguistics

The minor grounds the student in the basics of linguistic analysis and offers the opportunity to pursue areas of special interest. The minor requires at least 28 credits in linguistics course work. Under special circumstances substitutions to courses listed below are possible. Students need permission from an undergraduate advisor to pursue an alternative program of study.

Minor Degree Requirements

Code	Title	Credits
LING 301	Introduction to Linguistics Analysis	4
LING 411	Phonetics	4
LING 435	Morphology and Syntax	4
LING 450	Introduction to Phonology	4
LING 451	Functional Syntax I	4
Select two of the following:		8
LING 211	Languages of the World	
LING 296	Language and Society in the United States	
LING 396	Language and Cognition	
Other elective courses as approved by advisor		
Total Credits		28

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Linguistics

Graduate Studies

Solid preparation in linguistics is indispensable to any specialization at the graduate level. Although the courses deal with a variety of linguistic topics, three facets of linguistics are strongly emphasized in the graduate program:

1. A pragmatic approach to the study of language structure and use, variation and change, and acquisition and learning
2. An empirical, live-data, fieldwork, experimental, and cross-linguistic approach to the methodology of linguistic research
3. Interdisciplinary emphasis on the place of human language in its wider natural context

Advising and Review Practices

Graduate students meet regularly with the departmental director of graduate studies. In addition, students are assigned a faculty member to advise them in the areas of their academic interest. The faculty reviews the performance of each graduate student at the end of each academic term. In case a student falls below what the faculty considers minimal standards of performance, a representative of the faculty notifies the student and suggests appropriate remedial steps.

Master of Arts in Linguistics

For those who intend to complete the PhD, the MA is not necessary and may delay completion of the advanced degree. While not necessary, the option of completing a terminal theoretical MA may be appropriate for some whose goals are, for example, professional work in a language community. Prospective students who are unsure which program would be appropriate are encouraged to consult with the department's director of graduate studies.

Prerequisites. Students may be required to take and pass (with grades of B– or better) certain prerequisite courses, typically an introductory course, such as Morphology and Syntax (LING 535) and Phonetics (LING 511).

Master of Arts Degree Requirements

Code	Title	Credits
Core Courses		
LING 550	Introduction to Phonology	4
LING 551 & LING 552	Functional Syntax I and Functional Syntax II	8
LING 507 or LING 607	Seminar: [Topic] Seminar: [Topic]	4
LING 614	Linguistic Theory: Phonology	4
LING 615	Linguistic Theory: Syntax	4
LING 616	Linguistic Theory: Semantics	4
Elective Courses		
Graduate-level linguistics or other relevant courses ¹		20
Total Credits		48

¹ Select electives in consultation with department's director of graduate studies and the student's faculty advisor.

No course with a grade lower than B– may be used to satisfy degree requirements.

Second-Language Requirement

Candidates for the MA are required to have taken at least two years of one second language within the past seven years. At the MA level, any foreign language is acceptable, including English for an international student whose first language is not English. It should be noted that the MA language may count toward the two language requirements for the PhD program if the language is used as a research language (see PhD requirements below).

MA Thesis or Substitute

Students in good standing may form an MA committee consisting of two linguistics faculty members who indicate their agreement to serve by signing a standard form and who share equal responsibility for directing the thesis. For the MA to be granted, both members of the committee

must approve the thesis and the main content of the thesis must be presented as a departmental colloquium.

Students who elect not to write a thesis or who are unsuccessful in forming the two-member thesis committee may complete the degree by taking an additional 8 credits of course work approved by the director of graduate studies.

Master of Arts in Language Teaching Studies

The MA in language teaching studies requires a background in basic linguistics and courses specifically designed for second-language teaching preparation. For more information, visit the website (<https://lts.uoregon.edu>).

Prerequisites. It is preferred that students should have a BS or BA degree in linguistics or a related field.

Code	Title	Credits
Required Courses		
Seminar (chosen in consultation with advisor)		4
LT 528	Teaching English Culture and Literature	4
LT 535	Second-Language Teaching Methods	4
LT 536	Second-Language Teaching Planning	4
LT 437	Second-Language Teaching Practice	4
LING 540	Linguistic Principles and Second-Language Learning	4
LT 541	Teaching English Pronunciation	4
LT 548	Curriculum and Materials Development	5
LT 549	Testing and Assessment	5
LING 594	English Grammar	4
LT 608	Workshop: [Topic] (Computer-Assistant Language Learning, two terms)	2
LT 608	Workshop: [Topic] (Language Teaching Specialization Orientation)	1
LT 611	Terminal Project (two terms)	7
Elective Courses		
EDLD 510	Experimental Course: [Topic] (Comparative Education)	1-4
Elective courses ¹		5
Total Credits		58-61

¹ Students who have already taken any of the required courses or their equivalents should replace them with elective course work in consultation with their advisor.

Only graded courses may be used to satisfy degree requirements. Exceptions must be approved by the department. No course with a grade lower than B– may be used to satisfy degree requirements.

Master's Project

Students working toward an MA degree with the language-teaching specialization must complete a master's project over two consecutive terms. The project topic must be approved by the faculty advisor, and be presented in a Terminal Project (LT 611) class session during the final term.

Doctor of Philosophy

The doctor of philosophy (PhD) program in linguistics is individually tailored to meet the needs and professional goals of the student, drawing strong interdisciplinary support from related fields at the university. These fields may include—but are not limited to—anthropological linguistics, cognitive science, communication disorders and sciences, discourse and text analysis, English linguistics, first- and second-language acquisition, language-data processing, neurolinguistics, and sociolinguistics.

Residency Requirement

The Graduate School requires at least three years of full-time work beyond the bachelor's degree for the doctorate, with at least one year spent in continuous residence on the Eugene campus. The Department of Linguistics interprets the latter requirement to mean that at least six courses, including seminars, must be taken in the program while the student is in continuous residence for three academic terms.

Doctoral Advisor

The department head appoints a doctoral advisor for each student upon admission to the PhD program.

Second-Year Review

By the end of a doctoral student's second year, he or she shall be given a review by the faculty members at a department meeting. Materials submitted by the student to the department for this review must include the following:

1. A report that includes a research plan for the next year's course work, potential topics for the two qualifying papers, a statement about the student's career plans beyond the doctoral degree (and how the specific qualifying paper and thesis topics are relevant), and any other details worked out in consultation with the student's advisor
2. A curriculum vitae (CV)
3. Written evidence of research progress and scholarly potential, such as a substantive term paper or revision of a term paper that demonstrates excellence of original research or a linguistics master's thesis; the materials must be submitted to the Department by April 15

Following review of these materials, the faculty members decides either to *accept* or *deny* the student for continued study in the PhD program. In some cases, a probation year may be granted for a student's third year of study; the review process is repeated at the end of the third year with an *accept* outcome the only possibility for continued study.

As soon as possible after completion of the review, a letter to each graduate student under review is issued by the director of graduate studies informing the student of his or her status and, in the case of a one-year probation, specifying the conditions that must be met for a successful outcome during the additional third-year review. The language of the probation conditions is drafted by the student's doctoral advisor and the director of graduate studies. The director may also meet with any students who are denied continued study or who are granted probation.

Annual review

Beginning in the third year of the program, each graduate student must submit an annual report and CV to his or her advisor by April 15 of each year. The report should be no more than one page in length and should detail what the student has accomplished over the past year in the program.

Doctoral Examination and Advancement to Candidacy

Requirements for the Qualifying Paper

The doctoral examination consists of two original publishable papers of substantial length and quality in different subfields of linguistics. The term "different subfields" may include two different methodological approaches to a single broad topic. A qualifying paper is considered publishable if the review committee deems it to stand a reasonable chance of acceptance by a refereed venue such as a peer-reviewed journal, although the paper itself is not required to be accepted for publication, and may be submitted to a nonrefereed venue.

An unmodified MA thesis cannot serve as one of the qualifying papers.

A qualifying paper may be, however, a publishable expansion or revision of an MA thesis or publishable term paper written for a course conducted by any faculty member in the department or, where deemed reasonable, for a course conducted by a faculty member outside the department. The paper may be written under the supervision of either the student's advisor or another faculty member in consultation with the student's advisor, who approves the topic and the final version.

On submitting each paper to the committee, and after consultation with the student's advisor, the student indicates in a cover note or e-mail to the coordinator the intended publication venue for the paper. In reviewing the paper, the committee takes into consideration the appropriateness of the proposed venue for the content of the paper.

Submission of both papers to the proposed venue or venues is required before the student can advance to candidacy. Before applying to the Graduate School for advancement to candidacy, the student must submit to the coordinator either his or her cover letter to the venue to which each of the two qualifying papers was sent or, in the case of invited publications, the invitation letter. The publishing venue may be a refereed journal, a refereed or nonrefereed conference proceedings volume, an online publication, or another venue. While submission of each qualifying paper to a publishing venue is required for advancement to candidacy, acceptance for publication is not a requirement.

Composition of the Qualifying Paper Committee

A committee of three faculty members is drawn up to review each qualifying paper. The committee is composed of two faculty member reviewers and the student's doctoral advisor. In cases where the qualifying paper supervisor is not the student's doctoral advisor, the doctoral advisor will be one of the two reviewers and the supervisor will be the third member of the committee. The advisor sits on both of an individual student's committees, whereas at least one of the two faculty reviewers serves on only one of the two committees. One of the two faculty members on the committee may be from another department, where appropriate.

Upon completion and documented submission to a publisher of both qualifying papers and completion of all required course work and the research language requirement, the student advances to candidacy for the PhD degree. The student and the department must electronically submit the advancement to candidacy to the Graduate School for approval.

Qualifying Paper Coordinator and Reviewers

The qualifying paper coordinator is a member of the faculty who

- receives papers submitted by the graduate student (after approval of the qualifying paper by the student's doctoral advisor)
- selects reviewers for the paper in consultation with the doctoral advisor

- sends the paper to the reviewers and sets a deadline for review (typically six weeks)
- receives the reviewers' comments and decisions
- sends a summary of the comments and decisions, together with the reviewers' specific comments, to the doctoral advisor and the student
- notifies the department when the qualifying paper is submitted and when it is accepted by the reviewers

In the event that one or both of the reviewers requests revisions, the student (after the doctoral advisor approves the revised version of the paper) submits the revision to the coordinator. A reviewer may choose whether or not to review the revised version. If a reviewer chooses to review the revision, the coordinator sends the revised version to the reviewer and sets a deadline for review (typically four weeks). Any further comments or revision requirements from the reviewer or reviewers are sent by the coordinator to the doctoral advisor and the student for further revision.

In the event that both reviewers reject a qualifying paper, the student may submit a substitute paper with the approval of the doctoral advisor. Except by petition to the faculty and subsequent faculty approval, there may be no third submission of a qualifying paper.

Doctoral Dissertation

A doctoral committee must include at least three linguistics faculty members and one outside member, and must be either chaired or cochaired by the student's doctoral advisor in linguistics. A dissertation prospectus must be submitted to and approved by the doctoral committee before the writing of the dissertation commences. The PhD will be granted upon completion of the preceding requirements, the writing of an original dissertation acceptable to the doctoral committee, and an oral examination on the dissertation.

Required Courses

Code	Title	Credits
LING 614 & LING 615 & LING 616	Linguistic Theory: Phonology and Linguistic Theory: Syntax and Linguistic Theory: Semantics	12
Select two of the following:		5
LING 507	Seminar: [Topic]	
LING 607	Seminar: [Topic]	
Equivalent seminar courses		
Select one of the following:		15
LING 617 & LING 618 & LING 618	Field Methods I and Field Methods II and Field Methods II	
Sequence of courses in quantitative methods		
Sequence of courses in philological methods		
Combination of courses from two of these areas		
Total Credits		32

The course work must be approved by the student's doctoral advisor. Even those students who have already earned an MA degree are typically expected to complete all of the MA degree course work requirements at Oregon as part of the normal progress toward the PhD.

For each student, the specific course requirements in courses the student selects are to be determined by the student's advisor and the department's director of graduate studies, as are all other courses required for the PhD. No course with a grade lower than B– may be

used to satisfy degree requirements. Candidates for the PhD must demonstrate proficiency equivalent to two years of college-level study of a second language and either proficiency equivalent to one year in a third research-related language or proficiency in programming or statistics in order to be advanced to candidacy.

Certificate in Second-Language Acquisition and Teaching

In collaboration with several UO departments, the Department of Linguistics offers an undergraduate certificate that focuses on the theory of second-language acquisition and teaching and its application in pedagogical settings. The certificate complements any other major. Specific course requirements may be found at slat.uoregon.edu.

Certificate Requirements

Code	Title	Credits
Three courses in second-language acquisition theory and language-teaching methodology		12
Three courses in linguistic description of target language		12
One practicum, internship, supervised tutoring		2-4
Total Credits		26-28

Additional Requirements

College-level second-language study (two years of any second language if the certificate target language is English; three years for any other target language).

Language Teaching Courses

LT 199. Special Studies: [Topic]. 1-5 Credits.

Various languages offered through the Yamada Language Center. Repeatable when topic changes.

LT 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LT 405. Reading and Conference: [Topic]. 1-12 Credits.

Repeatable four times for a maximum of 16 credits.

LT 407. Seminar: [Topic]. 1-5 Credits.

Repeatable twice for a maximum of 8 credits.

LT 409. Supervised Tutoring. 1-4 Credits.

Repeatable twice for a maximum of 8 credits.

LT 410. Experimental Course: [Topic]. 1-8 Credits.

Repeatable twice for a maximum of 8 credits.

LT 428. Teaching English Culture and Literature. 4 Credits.

The interaction between language and culture as it relates to second-language teaching. Application to the teaching of literature.

LT 435. Second-Language Teaching Methods. 4 Credits.

Approaches and methods in teaching second languages. Theoretical and pedagogical principles of language teaching, including a focus on language skills. Sequence with LT 436/536, 437/537. Prereq: LING 440 or LING 444.

LT 436. Second-Language Teaching Planning. 4 Credits.

Application of teaching principles and practices in teaching instruction. Practical techniques for developing skills in listening, speaking, reading, and writing second languages. Sequence with LT 435/535, 437/537. Prereq: LING 440 or 444; LT 435 with a C– or better.

LT 437. Second-Language Teaching Practice. 4 Credits.

Intensive workshop and practice in language instruction. Team-teaching of weekly English as a spoken language course including designing activities and creating materials. Sequence with LT 435/535, 436/536. Prereq: LT 435. Pre- or coreq: LT 436.

LT 441. Teaching English Pronunciation. 4 Credits.

Introduction to English phonetics and phonology, methods for teaching pronunciation, lesson plan development, and practice teaching.

LT 448. Curriculum and Materials Development. 5 Credits.

Introduction to elements of curriculum design and related materials development. Development and implementation of language curriculum. Practical application. Prereq: LT 436/536.

LT 449. Testing and Assessment. 5 Credits.

Principles and types of language testing; focuses on classroom testing, test design and integration into curriculum, and test planning for teaching situations. Prereq: LT 436/536.

LT 507. Seminar: [Topic]. 1-5 Credits.

Repeatable twice for a maximum of 8 credits.

LT 510. Experimental Course: [Topic]. 1-8 Credits.

Repeatable twice for a maximum of 8 credits.

LT 528. Teaching English Culture and Literature. 4 Credits.

The interaction between language and culture as it relates to second-language teaching. Application to the teaching of literature.

LT 535. Second-Language Teaching Methods. 4 Credits.

Approaches and methods in teaching second languages. Theoretical and pedagogical principles of language teaching, including a focus on language skills. Sequence with LT 436/536, 437/537. Prereq: LING 540 or LING 544.

LT 536. Second-Language Teaching Planning. 4 Credits.

Application of teaching principles and practices in teaching instruction. Practical techniques for developing skills in listening, speaking, reading, and writing second languages. Sequence with LT 435/535, 437/537. Prereq: LING 540 or 544; LT 535 with a B- or better.

LT 537. Second-Language Teaching Practice. 4 Credits.

Intensive workshop and practice in language instruction. Team-teaching of weekly English as a spoken language course including designing activities and creating materials. Sequence with LT 435/535, 436/536. Prereq: LT 535. Pre- or coreq: LT 536

LT 541. Teaching English Pronunciation. 4 Credits.

Introduction to English phonetics and phonology, methods for teaching pronunciation, lesson plan development, and practice teaching.

LT 548. Curriculum and Materials Development. 5 Credits.

Introduction to elements of curriculum design and related materials development. Development and implementation of language curriculum. Practical application. Prereq: LT 436/536.

LT 549. Testing and Assessment. 5 Credits.

Principles and types of language testing; focuses on classroom testing, test design and integration into curriculum, and test planning for teaching situations. Prereq: LT 436/536.

LT 605. Reading and Conference: [Topic]. 1-9 Credits.

Repeatable five times for a maximum of 21 credits.

LT 607. Seminar: [Topic]. 1-5 Credits.

Repeatable five times for a maximum of 16 credits.

LT 608. Workshop: [Topic]. 1-5 Credits.

Repeatable five times for a maximum of 16 credits.

LT 609. Supervised Tutoring. 1-4 Credits.

Repeatable twice for a maximum of 8 credits.

LT 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable twice for a maximum of 8 credits.

LT 611. Terminal Project. 1-7 Credits.

Two-term course required to complete an MA in language teaching specialization. Individual projects. Weekly group sessions provide guidance. Repeatable once for a maximum of 7 credits. Prereq: LT 536.

LT 629. Foundations in Language Theory. 4 Credits.

Provides a foundation in linguistic theory, sociolinguistics, and language acquisition for teachers assisting language-minority students.

Linguistics Courses

LING 101. Introduction to Language. 4 Credits.

Nontechnical introduction to language. Issues of general concern such as language attitudes; language and legislation, nationalism, gender; language learning; and human language versus animal communication.

LING 150. Structure of English Words. 4 Credits.

Word structure and derivation in English Greek- and Latin-derived vocabulary; Germanic- and Romance-derived derivational rules. Understanding the dynamic structure of the English lexicon; prefixes, suffixes, and morphology.

LING 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

LING 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

LING 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LING 201. Language and Power. 4 Credits.

Explores the nature of language, dialects, accents, and multilingualism, and relates these to issues of political, educational, and other forms of social power.

LING 211. Languages of the World. 4 Credits.

Survey of the variability and distribution of the languages of the world in terms of linguistic typology, genetic relationships, and geographic location.

LING 225. Writing Systems. 4 Credits.

Surveys historical and current systems for encoding languages through writing. Examines the different systems and the advantages and disadvantages of these systems, evaluating them in their historical development.

LING 294. Child Language. 4 Credits.

Systematic survey of language structure and representation presented through the lens of language acquisition. Sounds, words, phrases, discourse, and pragmatics in typically and atypically developing children.

LING 296. Language and Society in the United States. 4 Credits.

English and non-English language diversity in the U.S., including regional varieties, African American English, Latino English. Explores language and social structure, policy, and educational issues.

LING 297. Introduction to Bilingualism. 4 Credits.

The linguistic, cognitive, cultural, and social dimensions of individual and societal bilingualism, which dispel common myths about the way bilinguals develop and use their two or more languages.

LING 301. Introduction to Linguistics Analysis. 4 Credits.

Study of human language and linguistics as a scientific and humanistic discipline. Lexicon, phonology, syntax, semantics, language change. Basic analytic techniques for drawing linguistic generalizations.

LING 302. Introduction to Linguistic Behavior. 4 Credits.

Study of language as a human behavior, focusing on developmental, cognitive, and social aspects of language use. Theories and methods involved in empirical, quantitative linguistics.

LING 396. Language and Cognition. 4 Credits.

How human thought is coded by language. Topics include meaning, categorization; linguistic units and speech behavior; language use and memory; language comprehension and production.

LING 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LING 401. Research: [Topic]. 1-21 Credits.

Repeatable.

LING 403. Thesis. 1-12 Credits.

Repeatable.

LING 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

LING 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

LING 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics include history of linguistics, language contact, morphology, discourse pragmatics, conversational analysis, acoustic phonetics, psycholinguistics, language acquisition, applied linguistics..

LING 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

LING 409. Supervised Tutoring. 1-21 Credits.

Repeatable.

LING 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LING 411. Phonetics. 4 Credits.

The articulatory and acoustic basis for understanding the production and perception of speech sounds; relevance of this phonetic base to phonological analysis.

Pre- or coreq: LING 301 passed with a grade of C- or better.

LING 415. Semantics. 4 Credits.

Survey of the fundamentals of semantic theory from traditional formal logic to modern cognitive approaches. Additional coverage of fundamental notions in pragmatics.

Prereq: LING 301 passed with a grade of C- or better.

LING 423. Fieldwork Methods and Ethics. 4 Credits.

Qualitative methodology in cross-cultural fieldwork from an interdisciplinary perspective. Ethics and techniques in preparation for the field, field relations, leaving the field.

LING 435. Morphology and Syntax. 4 Credits.

Methods of determining the morphological and syntactic patterns of natural language data, with introduction to typological and theoretical issues in morphology.

Prereq: LING 301 passed with a grade of C- or better.

LING 440. Linguistic Principles and Second-Language Learning. 4 Credits.

Introduction to how languages are learned in school contexts; underlying human language principles. Special attention to learning issues that classroom teachers need to address. Students cannot receive credit for both LING 440 and 444.

LING 444. Second-Language Acquisition. 4 Credits.

Introduction to cognitive and social processes of acquiring second languages. Students cannot receive credit for both LING 440/LING 540 and LING 444/LING 544.

LING 450. Introduction to Phonology. 4 Credits.

Study of sound systems in language. Phonemic contrasts, allophonic variation, and complementary distribution in relation to lexical coding of words, phonological processes operating at the segmental and suprasegmental levels.

Prereq: LING 411 passed with a grade of C- or better.

LING 451. Functional Syntax I. 4 Credits.

Syntax within grammar; its interaction with lexical meaning, propositional semantics, and discourse pragmatics; syntactic structure; case roles; word order; grammatical morphology; tense, aspect, modality, and negation; definiteness and referentiality.

Prereq: LING 435 passed with a grade of C- or better.

LING 452. Functional Syntax II. 4 Credits.

Complex syntactic structures and their discourse function; embedded, coordinate, and subordinate clauses; nondeclarative speech acts, topicalization, contrast, and focusing; transitivity and detransitivization.

Prereq: LING 451 passed with a grade of C- or better.

LING 460. Historical and Comparative Linguistics. 4 Credits.

Principles of language change and the methods of comparative and internal reconstruction; typological change in phonology, morphology, and syntax; language families and protolanguages.

Prereq: LING 450 with a grade of C- or better.

LING 491. Sociolinguistics. 4 Credits.

Major approaches and frameworks to the study of sociolinguistics; social-cultural variation in language use and its relationship to change; attitudes about variations, multilingualism.

Prereq: LING 301.

LING 493. Corpus Linguistics. 4 Credits.

Corpus-based approaches to the study of natural, human language, focusing on the use of computer-based methods to conduct empirical analyses of written and spoken language. Developing skills in computer programming for linguistic analysis.

Prereq: Ling 301, 302.

LING 494. English Grammar. 4 Credits.

Survey of grammatical, syntactic, and morphological structures of English in terms of semantic and functional criteria. Students cannot receive credit for both ENG 209 and LING 494.

LING 503. Thesis. 1-16 Credits.

Repeatable.

LING 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics include history of linguistics, language contact, morphology, discourse pragmatics, conversational analysis.

LING 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

LING 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LING 511. Phonetics. 4 Credits.

The articulatory and acoustic basis for understanding the production and perception of speech sounds; relevance of this phonetic base to phonological analysis.

LING 515. Semantics. 4 Credits.

Survey of the fundamentals of semantic theory from traditional formal logic to modern cognitive approaches. Additional coverage of fundamental notions in pragmatics.

LING 523. Fieldwork Methods and Ethics. 4 Credits.

Qualitative methodology in cross-cultural fieldwork from an interdisciplinary perspective. Ethics and techniques in preparation for the field, field relations, leaving the field.

LING 535. Morphology and Syntax. 4 Credits.

Methods of determining the morphological and syntactic patterns of natural language data, with introduction to typological and theoretical issues in morphology.

LING 540. Linguistic Principles and Second-Language Learning. 4 Credits.

Introduction to how languages are learned in school contexts; underlying human language principles. Special attention to learning issues that classroom teachers need to address. Students cannot receive credit for both LING 440/540 and 444/544.

LING 544. Second-Language Acquisition. 4 Credits.

Introduction to cognitive and social processes of acquiring second languages. Students cannot receive credit for both LING 440/LING 540 and LING 444/LING 544.

LING 550. Introduction to Phonology. 4 Credits.

Study of sound systems in language. Phonemic contrasts, allophonic variation, and complementary distribution in relation to lexical coding of words, phonological processes operating at the segmental and suprasegmental levels.

LING 551. Functional Syntax I. 4 Credits.

Syntax within grammar; its interaction with lexical meaning, propositional semantics, and discourse pragmatics; syntactic structure; case roles; word order; grammatical morphology; tense, aspect, modality, and negation; definiteness and referentiality.

LING 552. Functional Syntax II. 4 Credits.

Complex syntactic structures and their discourse function; embedded, coordinate, and subordinate clauses; nondeclarative speech acts, topicalization, contrast, and focusing; transitivization and detransitivization.

LING 560. Historical and Comparative Linguistics. 4 Credits.

Principles of language change and the methods of comparative and internal reconstruction; typological change in phonology, morphology, and syntax; language families and protolanguages.

LING 591. Sociolinguistics. 4 Credits.

Major approaches and frameworks to the study of sociolinguistics; social-cultural variation in language use and its relationship to change; attitudes about variations, multilingualism.

LING 593. Corpus Linguistics. 4 Credits.

Corpus-based approaches to the study of natural, human language, focusing on the use of computer-based methods to conduct empirical analyses of written and spoken language. Developing skills in computer programming for linguistic analysis.

LING 594. English Grammar. 4 Credits.

Survey of grammatical, syntactic, and morphological structures of English in terms of semantic and functional criteria.

LING 601. Research: [Topic]. 1-16 Credits.

Repeatable.

LING 602. Supervised Teaching. 1-5 Credits.

Repeatable.

LING 603. Dissertation. 1-16 Credits.

Repeatable.

LING 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

LING 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

LING 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics include syntax, semantics, discourse pragmatics, stylistics, psycholinguistics, neurolinguistics.

Prereq: LING 450/550, 452/552.

LING 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

LING 609. Practicum: [Topic]. 1-8 Credits.

Prereq: LT 445/545.

LING 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LING 614. Linguistic Theory: Phonology. 4 Credits.

Detailed investigation of phonological theory with emphasis on experimental evidence. Topics may include sound systems and their typology, morphophonology, and the acquisition of phonological structures.

Prereq: LING 450/550.

LING 615. Linguistic Theory: Syntax. 4 Credits.

Issues in syntactic theory. Topics may include universals of semantic, pragmatic, and discourse function and their relation to syntax, syntactic typology and universals, formal models in syntactic description.

Prereq: LING 452/552.

LING 616. Linguistic Theory: Semantics. 4 Credits.

Detailed investigation of issues in semantic and pragmatic theory. Topics may include universals of lexical semantics and discourse pragmatics and their interaction.

Prereq: LING 415/515.

LING 617. Field Methods I. 5 Credits.

Supervised linguistics fieldwork with language speakers, both in and out of class. Application of language universals to the elicitation, analysis, and evaluation of data from particular languages; the writing of phonological, lexical, and grammatical descriptions; sentence versus text elicitation. Sequence.

Prereq: LING 450/550, 452/552.

LING 618. Field Methods II. 5 Credits.

Supervised linguistics fieldwork with language speakers, both in and out of class. Application of language universals to the elicitation, analysis, and evaluation of data from particular languages; the writing of phonological, lexical, and grammatical descriptions; sentence versus text elicitation. Sequence.

Prereq: LING 617.

LING 619. Field Methods III. 5 Credits.

Supervised linguistics fieldwork with language speakers, both in and out of class. Application of language universals to the elicitation, analysis, and evaluation of data from particular languages; the writing of phonological, lexical, and grammatical descriptions; sentence versus text elicitation. Sequence.

Prereq: LING 618.

LING 621. Empirical Methods in Linguistics. 4 Credits.

Empirical quantified methods of data collection and analysis; statistical evaluation of results. Data derived from discourse, conversation, psycholinguistics, first- and second-language acquisition, speech pathology, speech and writing deficiencies.

Prereq: LING 450/550, 452/552.

LING 660. Historical Syntax. 4 Credits.

Topics in the study of syntactic change.

Prereq: LING 452/552, 460/560 or equivalent.

Swahili Courses**SWAH 101. First Year Swahili. 5 Credits.**

Introduction to Swahili with emphasis on speaking, reading, writing and comprehension. Sequence: SWAH 102 and 103.

SWAH 102. First-Year Swahili. 5 Credits.

Introduction to Swahili with emphasis on speaking, reading, writing, and comprehension. Sequence: SWAH 101 and 103.

Prereq: SWAH 101 or equivalent.

SWAH 103. First-Year Swahili. 5 Credits.

Introduction to Swahili with emphasis on speaking, reading, writing, and comprehension. Sequence: SWAH 101 and 102.

Prereq: SWAH 102.

SWAH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

SWAH 201. Second-Year Swahili. 5 Credits.

Continued development of Swahili language skills with emphasis on African culture. Sequence with SWAH 202, 203.

Prereq: SWAH 103 or equivalent.

SWAH 202. Second-Year Swahili. 5 Credits.

Continued development of Swahili language skills with emphasis on African culture. Sequence with SWAH 201, 203.

Prereq: SWAH 201 or equivalent.

SWAH 203. Second Year Swahili. 5 Credits.

Continued development of Swahili language skills with emphasis on African culture. Sequence with SWAH 201, 202.

Prereq: SWAH 202.

SWAH 301. Advanced Swahili. 5 Credits.

Explores the noun class system, nominalization, styles in language use, genres, and literary devices; vowel system including vowel extensions; idioms; specialized language. Sequence with SWAH 302, 303.

Prereq: SWAH 203 or equivalent.

SWAH 302. Contemporary Swahili Literature. 4 Credits.

Survey of popular modern Swahili literature including the novel, the play, and Ushairi poetry. Series with SWAH 301, SWAH 303.

Prereq: SWAH 203.

SWAH 303. Language and Culture: Swahili Nation. 5 Credits.

Critical look at the origins, development, and expansion of Swahili including its sociology, use, and importance in the modern Swahili nation. Sequence with SWAH 301, 302.

Prereq: SWAH 302.

SWAH 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

SWAH 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

Mathematics**Daniel Dugger, Department Head**

541-346-4705

205 Fenton Hall

1222 University of Oregon

Eugene, Oregon 97403-1222

Courses offered by the Department of Mathematics are designed to satisfy the needs of majors and nonmajors interested in mathematics primarily as part of a broad liberal education. They provide basic mathematical and statistical training for students in the social, biological, and physical sciences and in the professional schools; prepare teachers of mathematics; and provide advanced and graduate work for students specializing in the field.

Facilities

The department office and the Mathematics Library are housed in Fenton Hall. A reading and study area is located in the Moursund Reading Room of the Mathematics Library. The Hilbert Space, an undergraduate mathematics center, is in Deady Hall.

Awards and Prizes

- The William Lowell Putnam examination, a competitive, nationally administered mathematics examination, is given early each December. It contains twelve very challenging problems, and prizes are awarded to the top finishers in the nation. Interested students should consult the chair of the undergraduate affairs committee at the beginning of fall term
- The Anderson Award, endowed by Frank and Dorothy Anderson, is awarded to one or more graduate students with outstanding teaching records
- The Jack and Peggy Borsting Award for Scholastic Achievement in Graduate Mathematics is awarded to a finishing graduate student based on outstanding academic work
- The Charles W. and Elizabeth H. Curtis Scholarship is awarded to a sophomore or junior to continue their studies in mathematics
- The DeCou Prize, which honors a former long-time department head, E. E. DeCou, and his son, E. J. DeCou, is awarded to an outstanding graduating senior
- The Juilfs Scholarship, in honor of Erwin and Gertrude Juilfs, is awarded to one or more students who show exceptional promise for achievement as evidenced by GPA, originality of research, or other applicable criteria
- The Marion Walter Future Teachers Award, which honors Professor Emerita Marion Walter, is awarded to an outstanding senior graduating with a precollege-teaching option
- The Civin Graduate Award, endowed by the family of Paul and Harriet Civin, is awarded for the purpose of attracting and retaining promising graduate students and encouraging underrepresented students in mathematics

- The Harrison Memory Award, endowed by Ann Hill Harrison in honor of former mathematics professor David K. Harrison, is awarded to outstanding students in mathematics

Faculty

Nicolas Addington, assistant professor (algebraic geometry). BS, 2004, Washington (Seattle); PhD, 2009, Wisconsin, Madison. (2015)

Shabnam Akhtari, associate professor (number theory). BA, 2002, Sharif University of Technology; PhD, 2008, British Columbia. (2012)

Arkadiy D. Berenstein, professor (quantum groups, representation theory). MS, 1988, Moscow Transport Institute; PhD, 1996, Northeastern. (2000)

Tricia H. Bevans, senior instructor. BA, 1995, MS, 1998, Oregon. (2013)

Boris Botvinnik, professor (algebraic topology). MS, 1978, Novosibirsk State; PhD, 1984, USSR Academy of Sciences, Novosibirsk. (1993)

Marcin Bownik, professor (harmonic analysis, wavelets). Magister, 1995, Warsaw, Poland; MA, 1997, PhD, 2000, Washington (St. Louis). (2003)

Jonathan Brundan, professor (Lie theory, representation theory). BA, 1992, Queens College, Cambridge; PhD, 1996, University of London. (1997)

Daniel K. Dugger, professor (algebraic topology and geometry, K-theory, commutative algebra). BA, 1994, Michigan, Ann Arbor; PhD, 1999, Massachusetts Institute of Technology. (2004)

Ellen E. Eischen, associate professor (number theory). BA, 2003, Princeton; PhD, 2009, Michigan, Ann Arbor. (2015)

Ben Elias, associate professor (representation theory, categorification). BA, 2005, Princeton; PhD, 2011, Columbia. (2014)

Cassandra Fisher, senior instructor. BS, 2010, George Fox; MS, 2012, Texas Tech. (2012)

Peter B. Gilkey, professor (global analysis, differential geometry). BS, MA, 1967, Yale; PhD, 1972, Harvard. (1981)

Hayden Harker, instructor. BA, 1995, Oberlin College; MS, 2000, PhD, 2005, Oregon. (2011)

Weiyong He, associate professor (differential geometry, geometric analysis and partial differential equations). MS, 2004, Science and Technology of China; PhD, 2007, Wisconsin, Madison. (2009)

Kristen Henderson, instructor. BA, 2001, California, Berkeley; MS, 2003, Nevada, Reno. (2015)

Fred Hervert, senior instructor. BA, 1983, MS, 1987, Northeastern Illinois. (1999)

James A. Isenberg, professor (mathematical physics, differential geometry, nonlinear partial differential equations). AB, 1973, Princeton; PhD, 1979, Maryland. (1982)

Alexander S. Kleshchev, professor (algebra, representation theory). BS, MS, 1988, Moscow State; PhD, 1993, Institute of Mathematics, Academy of Sciences of Belarus, Minsk. (1995)

Elina Kleshcheva, instructor, BS, 1987, MS, 1988, Moscow State. (1995)

David A. Levin, associate professor (probability theory and stochastic processes). BS, 1993, Chicago; MA, 1995, PhD, 1999, California, Berkeley. (2006)

Huaxin Lin, professor (functional analysis). BA, 1980, East China Normal, Shanghai; MS, 1984, PhD, 1986, Purdue. (1995)

Robert Lipshitz, professor (differential topology). AB, 2002, Princeton; PhD, 2006, Stanford. (2015)

Peng Lu, professor (differential geometry, geometric analysis). BSc, 1985, Nanjing; MSc, 1988, Nanki Mathematics Institute; PhD, 1996, State University of New York, Stony Brook. (2002)

Eric Merchant, instructor. BA, 1996, MS, 2000, PhD, 2005, Oregon. (2010)

Maria Nemirovskaya, instructor. MS, 1996, Brigham Young; PhD, 2002, Massachusetts Institute of Technology. (2017)

Tammy Nezol, senior instructor. BA, 2004, BS, 2006, MS, 2008, Oregon. (2008)

Jean B. Nganou, instructor (finite dimensional division algebras). MS, 2001, Yaoundé I; PhD, 2009, New Mexico State. (2009)

Victor V. Ostrik, professor (representation theory). MS, 1995, PhD, 1999, Moscow State. (2003)

Vivek Pal, postdoctoral instructional scholar (number theory). MA, 2013, PhD, 2016, Columbia. (2016)

Liliana Pazdan-Siudeja, instructor. MS, 2010, Illinois, Urbana-Champaign. (2013)

N. Christopher Phillips, professor (functional analysis). AB, 1978, MA, 1980, PhD, 1984, California, Berkeley. (1990)

Alexander Polishchuk, professor (algebraic geometry). MS, 1993, Moscow State; PhD, 1996, Harvard. (2003)

Michael R. Price, senior instructor; assistant department head. BS, 2003, MS, 2005, Oregon. (2005)

Nicholas J. Proudfoot, professor (algebraic geometry, combinatorics, topological groups). AB, 2000, Harvard; PhD, 2004, California, Berkeley. (2007)

Peter Ralph, assistant professor (populations and evolution with genomic data). AB, 2002, PhD, 2009, California, Berkeley. (2016)

Hal Sadofsky, associate professor (algebraic topology, homotopy theory). BS, 1984, Rochester; PhD, 1990, Massachusetts Institute of Technology. (1995)

Bijan Shahir, instructor. MS, 1979, PhD, 1987, Oregon; MSEE, 1999, Washington (Seattle). (2011)

Christopher D. Sinclair, associate professor (random matrix theory, number theory). BS, 1997, Arizona; PhD, 2005, Texas, Austin. (2009)

Dev P. Sinha, associate professor (algebraic and differential topology). BS, 1993, Massachusetts Institute of Technology; PhD, 1997, Stanford. (2001)

David C Steinberg, senior instructor. BSc, 2004, Alberta; MA, 2006, State University of New York, Binghamton; PhD, 2012, British Columbia. (2013)

Jennifer Thorenson, senior instructor. BS, 2003, North Dakota State; MS, 2005, PhD, 2013, Montana State. (2013)

Craig Tingey, senior instructor. BA, BS, 1989, MS, 1991, Utah. (2001)

Arkady Vaintrob, associate professor (algebraic geometry, Lie theory and representation theory, mathematical physics). BA, 1976, Moscow Institute of Railway Engineering; MS, 1979, PhD, 1987, Moscow State. (2000)

Vadim Vologodski, associate professor (algebraic geometry, number theory). MS, 1996, Independent University of Moscow; PhD, 2001, Harvard. (2009)

Hao Wang, associate professor (mathematics of finance, probability, statistics). BS, 1980, MS, 1985, Wuhan (China); PhD, 1995, Carleton (Canada). (2000)

Kai Shyang Wang, instructor. MA, 1985, California, Berkeley. (2009)

Qingyun Wang, Paul Olum Postdoctoral Scholar (operator algebras, K-theory, dynamic systems). BS, 2008, Zhejiang; MA, 2010, PhD, 2013, Washington (St. Louis). (2016)

Micah Warren, associate professor (geometric analysis). BS, 2000, Pacific Lutheran; MS, 2006, PhD, 2008, Washington (Seattle). (2012)

Yuan Xu, professor (numerical analysis). BS, 1982, Northwestern (China); MS, 1984, Beijing Institute of Aeronautics and Astronautics; PhD, 1988, Temple. (1992)

Benjamin Young, associate professor (combinatorics). BS, 2001, MS, 2002, Carleton; PhD, 2008, British Columbia. (2012)

Sergey Yuzvinsky, professor (representation theory, combinatorics, multiplication of forms). MA, 1963, PhD, 1966, Leningrad. (1980)

Emeriti

Fred C. Andrews, professor emeritus. BS, 1946, MS, 1948, Washington (Seattle); PhD, 1953, California, Berkeley. (1957)

Bruce A. Barnes, professor emeritus. BA, 1960, Dartmouth College; PhD, 1964, Cornell. (1966)

Richard B. Barrar, professor emeritus. BS, 1947, MS, 1948, PhD, 1952, Michigan. (1967)

Glenn T. Beelman, senior instructor emeritus. BS, 1938, South Dakota State; AM, 1962, George Washington. (1966)

Charles W. Curtis, professor emeritus. BA, 1947, Bowdoin; MA, 1948, PhD, 1951, Yale. (1963)

Micheal N. Dyer, professor emeritus. BA, 1960, Rice; PhD, 1965, California, Los Angeles. (1967)

Robert S. Freeman, associate professor emeritus. BAE., 1947, New York University; PhD, 1958, California, Berkeley. (1967)

William M. Kantor, professor emeritus. BS, 1964, Brooklyn; MA, 1965, PhD, 1968, Wisconsin, Madison. (1971)

Richard M. Koch, professor emeritus. BA, 1961, Harvard; PhD, 1964, Princeton. (1966)

Shlomo Libeskind, professor emeritus. BS, 1962, MS, 1965, Technion-Israel Institute of Technology; PhD, 1971, Wisconsin, Madison. (1986)

Theodore W. Palmer, professor emeritus. BA, 1958, MA, 1958, Johns Hopkins; AM, 1959, PhD, 1966, Harvard. (1970)

Kenneth A. Ross, professor emeritus. BS, 1956, Utah; MS, 1958, PhD, 1960, Washington (Seattle). (1964)

Gary M. Seitz, professor emeritus. AB, 1964, MA, 1965, California, Berkeley; PhD, 1968, Oregon. (1970)

Brad S. Shelton, professor emeritus. BA, 1976, Arizona; MS, PhD, 1982, Washington (Seattle). (1985)

Allan J. Sieradski, professor emeritus. BS, 1962, Dayton; MS, 1964, PhD, 1967, Michigan. (1967)

Stuart Thomas, senior instructor emeritus. AB, 1965, California State, Long Beach; MA, 1967, California, Berkeley. (1990)

Marie A. Vitulli, professor emerita. BA, 1971, Rochester; MA, 1973, PhD, 1976, Pennsylvania. (1976)

Marion I. Walter, professor emerita. BA, 1950, Hunter; MS, 1954, New York University; DEd, 1967, Harvard. (1977)

Lewis E. Ward Jr., professor emeritus. AB, 1949, California, Berkeley; MS, 1951, PhD, 1953, Tulane. (1959)

Jerry M. Wolfe, associate professor emeritus. BS, 1966, Oregon State; MA, 1969, PhD, 1972, Washington (Seattle). (1970)

Charles R. B. Wright, professor emeritus. BA, 1956, MA, 1957, Nebraska; PhD, 1959, Wisconsin, Madison. (1961)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts: S** (p. 390)**tandard Track** (p. 390)
- **Bachelor of Arts: Pure Mathematics**
- **Bachelor of Arts: Secondary Teaching**
- **Bachelor of Science: Standard Track**
- **Bachelor of Science: Pure Mathematics**
- **Bachelor of Science: Secondary Teaching**
- **Minor**

Undergraduate Studies

Students planning to major in mathematics at the university should take four years of high school mathematics including a year of mathematics as a senior. Courses in algebra, geometry, trigonometry, and more advanced topics should be included whether offered as separate courses or as a unit.

College transfer students who have completed a year of calculus should be able to satisfy the major requirements in mathematics at the University of Oregon in two years.

Science Group Requirement

The department offers courses that satisfy the science group requirement:

Code	Title	Credits
MATH 105–107	University Mathematics I-III	12
MATH 211–213	Fundamentals of Elementary Mathematics I-III	12
MATH 231–233	Elements of Discrete Mathematics I-III	12
MATH 241–242 & MATH 243	Calculus for Business and Social Science I-II and Introduction to Methods of Probability and Statistics	12
MATH 246–247	Calculus for the Biological Sciences I-II	8
MATH 251–253	Calculus I-III	12
MATH 261–263	Calculus with Theory I-III	12
MATH 307	Introduction to Proof	4

The 100-level courses present important mathematical ideas in an elementary setting, stressing concepts more than computation. They do not provide preparation for other mathematics courses but are compatible with further study in mathematics.

Enrollment in Courses

Beginning and transfer students must take a placement examination before enrolling in their first UO mathematics course; the examination is given during each registration period. Students who transfer credit for calculus to the university are excused from the examination.

To enroll in courses that have prerequisites, students must complete the prerequisite courses with grades of C– or better or P.

Students cannot receive credit for a course that is a prerequisite to a course they have already taken. For example, a student with credit in Calculus for Business and Social Science I (MATH 241) cannot later receive credit for College Algebra (MATH 111). For more information about credit restrictions, contact a mathematics advisor.

Bridge Requirement

Most upper-division courses include mathematical proof as a significant element. To prepare for this, students must satisfy the bridge requirement as a prerequisite to taking any 300- or 400-level course other than Elementary Linear Algebra (MATH 341–342), Statistical Methods I-II (MATH 425–426), or Partial Differential Equations: Fourier Analysis I-II (MATH 421–422).

The bridge requirement is one of the following:

Code	Title	Credits
MATH 307 and four of MATH 201, MATH 202, MATH 203, MATH 204, MATH 205, and MATH 206		12
MATH 231, MATH 232, and two of MATH 201, MATH 202, MATH 203, MATH 204, MATH 205, and MATH 206		12
MATH 261, MATH 262, and two of MATH 201, MATH 202, MATH 203, MATH 204, MATH 205, and MATH 206		12

Calculus Sequences

The department offers four calculus sequences. Students need to consult an advisor in mathematics or in their major field about which sequence to take.

Sequence	Description
MATH 251–253	<ul style="list-style-type: none"> Standard sequence recommended to most students in the physical sciences and mathematics For students interested in more advanced mathematics courses
MATH 261–263	<ul style="list-style-type: none"> Same material as the standard sequence but includes theoretical background material and is for strong students with an interest in mathematics For students interested in more advanced mathematics courses
MATH 246–247, MATH 253	<ul style="list-style-type: none"> Covers comparable material as Calculus I,II but with an emphasis on modeling and applications to the life sciences For students interested in more advanced mathematics courses
MATH 241–242	<ul style="list-style-type: none"> Serves the mathematical needs of students in the business, managerial, and social sciences For students not interested in more advanced mathematical courses

The first three sequences are equivalent as far as department requirements for majors or minors and as far as prerequisites for more advanced courses.

Program Plan Example

First Year	Credits
Select one of the following:	12
MATH 251–253 Calculus I-III	12
MATH 261–263 Calculus with Theory I-III	12
Select two of the following	4
MATH 201 Algebra Math Lab	2
MATH 202 Geometry Math Lab	2
MATH 203 Analysis and Number Theory Math Lab	2
Second Year	
Select two of the following	4
MATH 204 Probability and Statistics Math Lab	2
MATH 205 Foundations Math Lab	2

MATH 206	Combinatorics Math Lab	2
Select one of the following		8
MATH 281–282	Several-Variable Calculus I-II	8
MATH 341–342	Elementary Linear Algebra	8
Select one of the following		8
MATH 231–232	Elements of Discrete Mathematics I-II	8
MATH 261–262	Calculus with Theory I-II	8
MATH 307	Introduction to Proof	4
Third Year		
Complete second year sequence as necessary		
CIS 122	Introduction to Programming and Problem Solving	4
Select one of the following Fundamentals sequences		8
MATH 316–317	Fundamentals of Analysis I-II	8
MATH 347–348	Fundamentals of Number Theory I-II	8
MATH 391–392	Fundamentals of Abstract Algebra I-II	8
One upper division mathematics course		4
Fourth Year		
Three upper-division mathematics courses		12
Total Credits:		64

Students who are considering graduate school in mathematics should take at least one or two of the pure math sequences, Introduction to Analysis I-III (MATH 413–415), Introduction to Abstract Algebra I-III (MATH 444–446), or Introduction to Topology (MATH 431–432) and Introduction to Differential Geometry (MATH 433). The choice merits discussion with an advisor.

Bachelor's Degree Requirements

The department offers undergraduate preparation for positions in government, business, and industry and for graduate work in mathematics and statistics. Each student's major program is individually constructed in consultation with an advisor.

Upper-division courses used to satisfy major requirements must be taken for letter grades, and only one D grade (D+ or D or D–) may be counted toward the upper-division requirement. At least 12 credits in upper-division mathematics courses must be taken in residence at the university.

Statistical Methods I (MATH 425) cannot be used to satisfy requirements for a mathematics major or minor.

To qualify for a bachelor's degree with a major in mathematics, a student must satisfy the requirements for one of three options: the standard track, pure mathematics, or secondary teaching. In each option, most courses require calculus as a prerequisite, and in each option some of the courses require satisfying the bridge requirement.

Bachelor of Arts: Standard Track

Code	Title	Credits
MATH 253	Calculus III	4
MATH 281–282	Several-Variable Calculus I-II	8
MATH 341–342	Elementary Linear Algebra	8
CIS 122	Introduction to Programming and Problem Solving (or another programming course approved by advisor)	4
Select one of the following sets of Bridge courses:		12
MATH 231–232 and two of MATH 201–206		
MATH 261–262 and two of MATH 201–206		
MATH 307 and four of MATH 201–206		
Select one of the following Fundamentals sequences:		8
MATH 316–317	Fundamentals of Analysis I-II	
MATH 347–348	Fundamentals of Number Theory I-II	
MATH 391–392	Fundamentals of Abstract Algebra I-II	
Select four of the following, including at least one two-term sequence: ²		16
MATH 316	Fundamentals of Analysis I	
MATH 317	Fundamentals of Analysis II	
MATH 320	Theory of Differential Equations	
MATH 343	Statistical Models and Methods ³	
MATH 347	Fundamentals of Number Theory I	
MATH 348	Fundamentals of Number Theory II	
MATH 351	Elementary Numerical Analysis I	
MATH 352	Elementary Numerical Analysis II	
MATH 391	Fundamentals of Abstract Algebra I	
MATH 392	Fundamentals of Abstract Algebra II	
MATH 394	Geometries from an Advanced Viewpoint I	
MATH 395	Geometries from an Advanced Viewpoint II	
MATH 397	History and Applications of Calculus	
MATH 411	Functions of a Complex Variable I	
MATH 412	Functions of a Complex Variable II	
MATH 420	Ordinary Differential Equations	
MATH 421M	Partial Differential Equations: Fourier Analysis I	
MATH 422	Partial Differential Equations: Fourier Analysis II	
MATH 456	Networks and Combinatorics	
MATH 457	Discrete Dynamical Systems	
MATH 458	Introduction to Mathematical Cryptography	
MATH 461	Introduction to Mathematical Methods of Statistics I	

MATH 462	Introduction to Mathematical Methods of Statistics II ³	
MATH 463	Mathematical Methods of Regression Analysis and Analysis of Variance	
MATH 467	Stochastic Processes	
Total Credits		60

¹ For students who have completed Calculus with Theory I-III (MATH 261–263) with a grade of mid-C or better, the department will waive the requirement for Fundamentals of Analysis I (MATH 316).

² Sequences include MATH 316-317, 347-348, 351-352, 391-392, 411-412, 421M-422, 413-414, 431-432, 444-446, 461-462, 461-467; credit for these courses cannot count for both the two-term Fundamentals sequence and the four upper-division electives.

³ Students cannot receive credit for both Statistical Models and Methods (MATH 343) and Introduction to Mathematical Methods of Statistics II (MATH 462).

Bachelor of Science: Standard Track

Code	Title	Credits
MATH 253	Calculus III	4
MATH 281–282	Several-Variable Calculus I-II	8
MATH 341–342	Elementary Linear Algebra	8
CIS 122	Introduction to Programming and Problem Solving (or another programming course approved by advisor)	4
Select one of the following sets of Bridge courses:		12
MATH 231–232 and two of MATH 201–206		
MATH 261–262 and two of MATH 201–206		
MATH 307 and four of MATH 201–206		
Select one of the following Fundamentals sequences: ¹		8
MATH 316–317	Fundamentals of Analysis I-II	
MATH 347–348	Fundamentals of Number Theory I-II	
MATH 391–392	Fundamentals of Abstract Algebra I-II	
Select four of the following, including at least one two-term sequence: ²		16
MATH 316	Fundamentals of Analysis I	
MATH 317	Fundamentals of Analysis II	
MATH 320	Theory of Differential Equations	
MATH 343	Statistical Models and Methods ³

Total Credits		60

¹ For students who have completed Calculus with Theory I-III (MATH 261–263) with grades of mid-C or better, the department will waive the requirement for Fundamentals of Analysis I-II (MATH 316–317).

² The two-term abstract algebra sequence—Introduction to Abstract Algebra I (MATH 444), Introduction to Abstract Algebra II (MATH 445)—cannot also count toward the two upper-division electives.

³ Students cannot receive credit for both Statistical Models and Methods (MATH 343) and Introduction to Mathematical Methods of Statistics II (MATH 462).

Mathematics and Computer Science

The Department of Mathematics and the Department of Computer and Information Science jointly offer an undergraduate major in mathematics and computer science, leading to a bachelor of arts or a bachelor of science degree. This program is described in the **Mathematics and Computer Science** section of this catalog.

Recommended Mathematics Courses for Other Areas

Students with an undergraduate mathematics degree often change fields when enrolling in graduate school. Common choices for a graduate career include computer science, economics, engineering, law, medicine, and physics. It is not unusual for a mathematics major to complete a second major as well. The following mathematics courses are recommended for students interested in other areas:

Code	Title	Credits
Actuarial Science		
MATH 351–352	Elementary Numerical Analysis I-II	8
MATH 461–462	Introduction to Mathematical Methods of Statistics I-II	8
MATH 463	Mathematical Methods of Regression Analysis and Analysis of Variance ¹	4
Biological Sciences		
MATH 461–462	Introduction to Mathematical Methods of Statistics I-II	8
Computer and Information Science		
MATH 231–233	Elements of Discrete Mathematics I-III	12
MATH 351–352	Elementary Numerical Analysis I-II	8
	or MATH 461– Introduction to Mathematical Methods of Statistics I-II 462	
MATH 456	Networks and Combinatorics	4
Economics, Business, and Social Science		
MATH 461–462	Introduction to Mathematical Methods of Statistics I-II ²	8
Physical Sciences and Engineering		
MATH 351–352	Elementary Numerical Analysis I-II	8

MATH 411–412	Functions of a Complex Variable I-II	8
MATH 420	Ordinary Differential Equations	4
MATH 421–422	Partial Differential Equations: Fourier Analysis I-II	8

¹ Courses in computer science, accounting, and economics are also recommended. It is possible to take the first few actuarial examinations (on calculus, statistics, and numerical analysis) as an undergraduate student.

² Students who want to take upper-division mathematics courses should take Calculus I-II (MATH 251–252) in place of Calculus for Business and Social Science I-II (MATH 241–242).

Honors Program

Students preparing to graduate with honors in mathematics should notify the department's honors advisor no later than the first term of their senior year (and ideally during the penultimate year of study). There are two requirements for receiving departmental honors:

1. Complete all upper division mathematics courses with a net GPA of 3.7 or greater.
2. Write a thesis covering advanced topics as assigned by the honors advisor.

The degree with departmental honors is awarded to students whose work is judged truly exceptional.

Minor Requirements

To earn a minor in mathematics, a student must complete at least 30 credits in mathematics at the 200 level or higher, with at least 15 upper-division mathematics credits; Statistical Methods I (MATH 425) cannot be used toward the upper-division requirement. A minimum of 15 credits must be taken at the University of Oregon.

Only one D grade (D+ or D or D–) may be counted toward fulfilling the upper-division requirement. All upper-division courses must be taken for letter grades. The flexibility of the mathematics minor program allows each student, in consultation with a mathematics advisor, to tailor the program to his or her needs.

The minor is intended for any student, regardless of major, with a strong interest in mathematics. While students in such closely allied fields as computer and information science or physics often complete double majors, students with more distantly related majors such as psychology or history may find the minor useful.

Preparation for Kindergarten through Secondary School Teaching Careers

The College of Education offers a fifth-year program for middle-secondary licensure in mathematics and for elementary teaching. For more information, see the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

To enroll with courses that have prerequisites, students must complete the prerequisite course with grades of C– or better or P. All upper-division mathematics courses must be taken for letter grades to count toward a

mathematics major or minor, and only one D grade (D+ or D or D–) may be counted toward the upper-division requirements for the major or minor.

Graduate Studies

The university offers graduate study in mathematics leading to the master of arts (MA), master of science (MS), and doctor of philosophy (PhD) degrees.

Master's degree programs are available to suit the needs of students with various objectives. There are programs for students who intend to enter a doctoral program and for those who plan to conclude their formal study of pure or applied mathematics at the master's level.

Admission depends on the student's academic record—both overall academic quality and adequate mathematical background for the applicant's proposed degree program. The application for admission is available online (<http://math.uoregon.edu/graduate/apply-online>). Prospective applicants should note the general university requirements for graduate admission that appear in the **Graduate School** section of this catalog as well as requirements specific to the department at math.uoregon.edu/graduate/admissions. (<http://math.uoregon.edu/graduate/admissions>)

Transcripts from all undergraduate and graduate institutions attended and copies of Graduate Record Examinations (GRE) scores in the verbal, quantitative, and mathematics tests (general and subject GREs) should be submitted to the department.

In addition to general Graduate School requirements, the specific graduate program courses and conditions listed below must be fulfilled. More details can be found in the Department of Mathematics *Graduate Student Handbook*, available in the department office and online (<http://math.uoregon.edu/graduate/handbook>). All mathematics courses applied to degree requirements, including associated reading courses, must be taken for letter grades. A final written or oral examination or both is required for master's degrees except under the pre-PhD option outlined below. This examination is waived under circumstances outlined in the departmental *Graduate Student Handbook*.

Master's Degree Programs

Master of Arts: Pre-PhD Requirements

Code	Title	Credits
Two 600-level mathematics sequences ¹		24-45
Other 600-level courses ^{1, 2}		12-15
Total Credits		45

¹ Students must complete two 600-level sequences acceptable for the qualifying examinations in the PhD program. In addition, they must complete one other 600-level sequence or a combination of three terms of 600-level courses approved by the master's degree subcommittee of the graduate affairs committee.

² As many as 15 credits from graduate-level courses outside mathematics may be used toward the degree.

Master of Science: Pre-PhD Requirements

Code	Title	Credits
Two 600-level mathematics sequences ¹		24-45
Other 600-level courses ^{1, 2}		12-15
Total Credits		45

¹ Students must complete two 600-level sequences acceptable for the qualifying examinations in the PhD program. In addition, they must complete one other 600-level sequence or a combination of three terms of 600-level courses approved by the master's degree subcommittee of the graduate affairs committee.

² As many as 15 credits from graduate-level courses outside mathematics may be used toward the degree.

Master of Arts Degree Requirements

Code	Title	Credits
Option 1		
One 600-level sequence ¹		12-15
Select two of the following:		24
MATH 513–515	Introduction to Analysis I-III	
MATH 531–532 & MATH 533	Introduction to Topology and Introduction to Differential Geometry	
MATH 544–546	Introduction to Abstract Algebra I-III	
Option 2		
Two 600-level sequences ¹		24-30
Select one of the following:		12
MATH 513–515	Introduction to Analysis I-III	
MATH 531–532 & MATH 533	Introduction to Topology and Introduction to Differential Geometry	
MATH 544–546	Introduction to Abstract Algebra I-III	

¹ Excluding Reading and Conference: [Topic] (MATH 605)

Of the required 45 credits, 15 may be in graduate-level courses other than mathematics. Students should also have taken a three-term

upper-division or graduate sequence in statistics, numerical analysis, computing, or other applied mathematics.

Master of Science Degree Requirements

Code	Title	Credits
Option 1		
One 600-level sequence ¹		12-15
Select two of the following:		24
MATH 513–515	Introduction to Analysis I-III	
MATH 531–532 & MATH 533	Introduction to Topology and Introduction to Differential Geometry	
MATH 544–546	Introduction to Abstract Algebra I-III	
Option 2		
Two 600-level sequences ¹		24-30
Select one of the following:		12
MATH 513–515	Introduction to Analysis I-III	
MATH 531–532 & MATH 533	Introduction to Topology and Introduction to Differential Geometry	
MATH 544–546	Introduction to Abstract Algebra I-III	

¹ Excluding Reading and Conference: [Topic] (MATH 605)

Of the required 45 credits, 15 may be in graduate-level courses other than mathematics. Students should also have taken a three-term upper-division or graduate sequence in statistics, numerical analysis, computing, or other applied mathematics.

Doctor of Philosophy

The PhD is a degree of distinction not to be conferred in routine fashion after completion of a specific number of courses or after attendance in Graduate School for a given number of years.

The department offers programs leading to the PhD degree in the areas of algebra, analysis, applied mathematics, combinatorics, geometry, mathematical physics, numerical analysis, probability, statistics, and topology. Advanced graduate courses in these areas are typically offered in Seminar: [Topic] (MATH 607). Each student, upon entering the graduate degree program in mathematics, reviews previous studies and objectives with the graduate advising committee. Based on this consultation, conditional admission to the master's degree program or the pre-PhD program is granted. A student in the pre-PhD program may also be a candidate for the master's degree.

Pre-PhD Program

To be admitted to the pre-PhD program, an entering graduate student must have completed a course of study equivalent to the graduate preparatory bachelor's degree program described above. Other students are placed in the master's degree program and may apply for admission to the pre-PhD program following a year of graduate study. Students in the pre-PhD program must take the qualifying examination by the beginning of their third year, during the week before classes begin fall

term. It consists of examinations on two basic 600-level graduate course sequences, one each from two of the following three categories:

1. algebra
2. analysis and probability
3. topology and geometry

PhD Program

Admission to the PhD program is based on the following criteria:

- satisfactory performance on the qualifying examination
- completion of three courses at a level commensurate with study toward a PhD
- satisfactory performance in seminars or other courses taken as a part of the pre-PhD or PhD program.

Students who are not admitted to the PhD program because of unsatisfactory performance on the fall-term qualifying examination may retake the examination at the beginning of winter term.

A student in the PhD program is advanced to candidacy after passing a language examination and the comprehensive examination. To complete the requirements for the PhD, candidates must submit a dissertation, have it read and approved by a dissertation committee, and defend it orally in a formal public meeting.

Language Requirement

The department expects PhD candidates to be able to read mathematical material in a second language selected from French, German, and Russian. Other languages are acceptable in certain fields. To fulfill the language requirement, the student must meet with a faculty member—a doctoral advisor or a member of the PhD committee—to obtain advice for a suitable paper or book. The paper or book should be written in French, German, or Russian and have mathematical material beneficial to the student's area of study. After reading, translating, and understanding the material, the student meets with the faculty member again. The faculty member determines whether the student understands the material. If satisfied, the faculty member deems the requirement met and the decision is added in writing to the student's record.

Comprehensive Examination

This oral examination emphasizes the basic material in the student's general area of interest. A student is expected to take this examination by the end of the second academic year in the PhD program. To be eligible to take this examination, a student must have completed the language examination and nearly all the course work needed for the PhD.

Dissertation

PhD candidates in mathematics must submit a dissertation containing substantial original work in mathematics. Requirements for final defense of the dissertation are those of the Graduate School.

Courses

MATH 101. Foundations of Algebra and Mathematical Modeling. 4 Credits.

Critical elements of pre-college algebra, topics including equation solving; rational, radical, and polynomial expression evaluation and simplification; lines, linear equations, and quadratic equations. Focus on mathematical modeling and preparation for additional college level mathematics.

Prereq: UO Math Placement Exam with a score of 30-45.

MATH 105. University Mathematics I. 4 Credits.

Topics include logic, sets and counting, probability, and statistics. Instructors may include historical context of selected topics and applications to finance and biology.

Prereq: MATH 101 or satisfactory placement test score.

MATH 106. University Mathematics II. 4 Credits.

Topics include mathematics of finance, applied geometry, exponential growth and decay, and a nontechnical introduction to the concepts of calculus.

Prereq: MATH 101 or satisfactory placement test score.

MATH 107. University Mathematics III. 4 Credits.

Topics chosen from modular arithmetic and coding, tilings and symmetry, voting methods, apportionment, fair division, introductory graph theory, or scheduling.

Prereq: MATH 101 or satisfactory placement test score.

MATH 111. College Algebra. 4 Credits.

Algebra needed for calculus including graph sketching, algebra of functions, polynomial functions, rational functions, exponential and logarithmic functions, linear and nonlinear functions.

Prereq: MATH 101 or satisfactory placement test score.

MATH 112. Elementary Functions. 4 Credits.

Exponential, logarithmic, and trigonometric functions. Intended as preparation for MATH 251.

Prereq: MATH 111 or satisfactory placement test score.

MATH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MATH 201. Algebra Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from algebra.

MATH 202. Geometry Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from geometry.

MATH 203. Analysis and Number Theory Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from analysis and the theory of numbers.

MATH 204. Probability and Statistics Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from probability and statistics.

MATH 205. Foundations Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from the foundations of mathematics.

MATH 206. Combinatorics Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from combinatorics.

MATH 211. Fundamentals of Elementary Mathematics I. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence.

Prereq: MATH 111 or satisfactory placement test score.

MATH 212. Fundamentals of Elementary Mathematics II. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence. Prereq: MATH 211, C- or better.

MATH 213. Fundamentals of Elementary Mathematics III. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence. Prereq: MATH 212, C- or better.

MATH 231. Elements of Discrete Mathematics I. 4 Credits.

Sets, mathematical logic, induction, sequences, and functions. Sequence. Prereq: MATH 112 or satisfactory placement test score.

MATH 232. Elements of Discrete Mathematics II. 4 Credits.

Relations, theory of graphs and trees with applications, permutations and combinations. Prereq: MATH 231.

MATH 241. Calculus for Business and Social Science I. 4 Credits.

Introduction to topics in differential and integral calculus including some aspects of the calculus of several variables. Sequence. Students cannot receive credit for both MATH 241 and 251.

Prereq: MATH 111 or satisfactory placement test score; a programmable calculator capable of displaying function graphs.

MATH 242. Calculus for Business and Social Science II. 4 Credits.

Introduction to topics in differential and integral calculus including some aspects of the calculus of several variables. Students cannot receive credit for both MATH 242 and 252.

Prereq: MATH 241.

MATH 243. Introduction to Methods of Probability and Statistics. 4 Credits.

Discrete and continuous probability, data description and analysis, sampling distributions, emphasizes confidence intervals and hypothesis testing. Students cannot receive credit for both MATH 243 and 425. Prereq: MATH 101 or satisfactory placement test score; MATH 111 recommended; a programmable calculator capable of displaying function graphs.

MATH 246. Calculus for the Biological Sciences I. 4 Credits.

For students in biological science and related fields. Emphasizes modeling and applications to biology. Differential calculus and applications. Sequence. Students cannot receive credit for more than one of MATH 241, 246, 251.

Prereq: MATH 112 or satisfactory placement test score.

MATH 247. Calculus for the Biological Sciences II. 4 Credits.

For students in biological science and related fields. Emphasizes modeling and applications to biology. Integral calculus and applications. Students cannot receive credit for more than one of MATH 242, 247, 252. Prereq: MATH 246.

MATH 251. Calculus I. 4 Credits.

Standard sequence for students of physical and social sciences and of mathematics. Differential calculus and applications. Sequence. Students cannot receive credit for more than one of MATH 241, 246, 251. Prereq: MATH 112 or satisfactory placement test score.

MATH 252. Calculus II. 4 Credits.

Standard sequence for students of physical and social sciences and of mathematics. Integral calculus. Sequence. Students cannot receive credit for more than one of MATH 242, 247, 252.

Prereq: MATH 251.

MATH 253. Calculus III. 4 Credits.

Standard sequence for students of physical and social sciences and of mathematics. Introduction to improper integrals, infinite sequences and series, Taylor series, and differential equations. Sequence.

Prereq: MATH 252.

MATH 256. Introduction to Differential Equations. 4 Credits.

Introduction to differential equations and applications. Linear algebra is introduced as needed.

Prereq: MATH 253.

MATH 261. Calculus with Theory I. 4 Credits.

Covers both applications of calculus and its theoretical background. Axiomatic treatment of the real numbers, limits, and the least upper bound property.

MATH 262. Calculus with Theory II. 4 Credits.

Covers both applications of calculus and its theoretical background. Differential and integral calculus.

Prereq: MATH 261.

MATH 263. Calculus with Theory III. 4 Credits.

Covers both applications of calculus and its theoretical background. Sequences and series, Taylor's theorem.

Prereq: MATH 262.

MATH 281. Several-Variable Calculus I. 4 Credits.

Introduction to calculus of functions of several variables including partial differentiation; gradient, divergence, and curl; line and surface integrals; Green's and Stokes's theorems. Linear algebra introduced as needed. Sequence.

Prereq: MATH 253.

MATH 282. Several-Variable Calculus II. 4 Credits.

Introduction to calculus of functions of several variables including partial differentiation; gradient, divergence, and curl; line and surface integrals; Green's and Stokes's theorems. Linear algebra introduced as needed.

Prereq: MATH 281.

MATH 307. Introduction to Proof. 4 Credits.

Proof is how mathematics establishes truth and communicates ideas. Introduces students to proof in the context of interesting mathematical problems.

Prereq: MATH 247 or 252 or 262.

MATH 316. Fundamentals of Analysis I. 4 Credits.

Rigorous treatment of topics introduced in calculus such as limits, sequences, series, the Cauchy condition, and continuity. Development of mathematical proof in these contexts. Sequence with MATH 317.

Prereq: MATH 253 or equivalent; one from MATH 232, MATH 262, MATH 307.

MATH 317. Fundamentals of Analysis II. 4 Credits.

Rigorous treatment of topics introduced in calculus such as continuity, uniform convergence, power series, differentiation, and integration. Development of mathematical proof in these contexts. Sequence with MATH 316.

Prereq: MATH 316.

MATH 320. Theory of Differential Equations. 4 Credits.

An introduction to differential equations for students with background in linear algebra, with a mixture of applications and theory. Topics include linear and nonlinear equations, systems of equations, and questions of existence and uniqueness.

Prereq: MATH 281, MATH 342; one from MATH 232, MATH 262, MATH 307.

MATH 341. Elementary Linear Algebra. 4 Credits.

Vector and matrix algebra; n -dimensional vector spaces; systems of linear equations; linear independence and dimension; linear transformations; rank and nullity; determinants; eigenvalues; inner product spaces; theory of a single linear transformation. Sequence.

Prereq: MATH 252. MATH 253 is recommended.

MATH 342. Elementary Linear Algebra. 4 Credits.

Vector and matrix algebra; n -dimensional vector spaces; systems of linear equations; linear independence and dimension; linear transformations; rank and nullity; determinants; eigenvalues; inner product spaces; theory of a single linear transformation.

Prereq: MATH 341.

MATH 343. Statistical Models and Methods. 4 Credits.

Review of theory and applications of mathematical statistics including estimation and hypothesis testing.

Prereq: MATH 252.

MATH 347. Fundamentals of Number Theory I. 4 Credits.

A study of congruences, the Chinese remainder theorem, the theory of prime numbers and divisors, Diophantine equations, and quadratic reciprocity. Development of mathematical proof in these contexts. Sequence with MATH 348.

Prereq: MATH 253 or equivalent; one from MATH 232, MATH 262, MATH 307.

MATH 348. Fundamentals of Number Theory II. 4 Credits.

Study of nonlinear Diophantine equations, sums of squares, the theory of partitions, geometric number theory, and the distribution of prime numbers. Development of mathematical proof in these contexts.

Sequence with MATH 347.

Prereq: MATH 347.

MATH 351. Elementary Numerical Analysis I. 4 Credits.

Basic techniques of numerical analysis and their use on computers. Topics include root approximation, linear systems, interpolation, integration, and differential equations. Sequence.

Prereq: MATH 253 or equivalent; one from MATH 232, 262, 307.

MATH 352. Elementary Numerical Analysis II. 4 Credits.

Basic techniques of numerical analysis and their use on computers. Topics include root approximation, linear systems, interpolation, integration, and differential equations.

Prereq: MATH 351.

MATH 391. Fundamentals of Abstract Algebra I. 4 Credits.

Introduction to algebraic structures including groups, rings, fields, and polynomial rings. Sequence.

Prereq: MATH 341; one from MATH 232, 262, 307.

MATH 392. Fundamentals of Abstract Algebra II. 4 Credits.

Introduction to algebraic structures including groups, rings, fields, and polynomial rings.

Prereq: MATH 391.

MATH 394. Geometries from an Advanced Viewpoint I. 4 Credits.

Topics in Euclidean geometry in two and three dimensions including constructions. Emphasizes investigations, proofs, and challenging problems. For prospective secondary and middle school teachers.

Prereq: MATH 253 or equivalent; one from MATH 232, 262, 307.

MATH 395. Geometries from an Advanced Viewpoint II. 4 Credits.

Analysis of problems in Euclidean geometry using coordinates, vectors, and the synthetic approach. Transformations in the plane and space and their groups. Introduction to non-Euclidean geometries. For prospective secondary teachers.

Prereq: grade of C- or better in MATH 394.

MATH 397. History and Applications of Calculus. 4 Credits.

Historical applications of calculus. Topics may include volumes by the method of exhaustion, Archimedean spiral, Kepler problem, calculus of variations, brachistochrone problem, spread of infectious disease, analysis of savings.

Prereq: MATH 253; one from MATH 232, MATH 262, MATH 307.

MATH 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MATH 401. Research: [Topic]. 1-21 Credits.

Repeatable.

MATH 403. Thesis. 1-4 Credits.

Repeatable.

MATH 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable.

MATH 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

MATH 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

MATH 411. Functions of a Complex Variable I. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products. Sequence.

Prereq: MATH 281; one from MATH 232, 262, 307.

MATH 412. Functions of a Complex Variable II. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products.

Prereq: MATH 411.

MATH 413. Introduction to Analysis I. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 282, MATH 317.

MATH 414. Introduction to Analysis II. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms.

Prereq: MATH 413.

MATH 415. Introduction to Analysis III. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 414.

MATH 420. Ordinary Differential Equations. 4 Credits.

Ordinary differential equations. General and initial value problems. Explicit, numerical, graphical solutions; phase portraits. Existence, uniqueness, stability. Power series methods. Gradient flow; periodic solutions.

Prereq: MATH 263 or MATH 316.

MATH 421M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with PHYS 421M.

Prereq: MATH 253; one from MATH 256, MATH 281.

MATH 422. Partial Differential Equations: Fourier Analysis II. 4 Credits.

General theory of PDEs; the Fourier transform. Laplace and Poisson equations; Green's functions and application. Mean value theorem and max-min principle.

Prereq: MATH 421M or PHYS 421M.

MATH 425. Statistical Methods I. 4 Credits.

Statistical methods for upper-division and graduate students anticipating research in nonmathematical disciplines. Presentation of data, sampling distributions, tests of significance, confidence intervals, linear regression, analysis of variance, correlation, statistical software. Sequence. Only nonmajors may receive upper-division credit. Students cannot receive credit for both MATH 243 and 425.

Prereq: MATH 111 or satisfactory placement test score.

MATH 431. Introduction to Topology. 4 Credits.

Elementary point-set topology with an introduction to combinatorial topology and homotopy. Sequence.

Prereq: MATH 317.

MATH 432. Introduction to Topology. 4 Credits.

Introduction to smooth manifolds and differential topology. Sequence.

Prereq: MATH 281, MATH 341, MATH 431.

MATH 433. Introduction to Differential Geometry. 4 Credits.

Plane and space curves, Frenet-Serret formula surfaces. Local differential geometry, Gauss-Bonnet formula, introduction to manifolds.

Prereq: MATH 282, 342; one from MATH 232, 262, 307.

MATH 441. Linear Algebra. 4 Credits.

Theory of vector spaces over arbitrary fields, theory of a single linear transformation, minimal polynomials, Jordan and rational canonical forms, quadratic forms, quotient spaces.

Prereq: MATH 342; one from MATH 232, 262, 307.

MATH 444. Introduction to Abstract Algebra I. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory. Sequence.

Prereq: MATH 342; one from MATH 232, 262, 307.

MATH 445. Introduction to Abstract Algebra II. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 444.

MATH 446. Introduction to Abstract Algebra III. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 445.

MATH 456. Networks and Combinatorics. 4 Credits.

Fundamentals of modern combinatorics; graph theory; networks; trees; enumeration, generating functions, recursion, inclusion and exclusion; ordered sets, lattices, Boolean algebras.

Prereq: one from MATH 232, 262, 307.

MATH 457. Discrete Dynamical Systems. 4 Credits.

Linear and nonlinear first-order dynamical systems; equilibrium, cobwebs, Newton's method. Bifurcation and chaos. Introduction to higher-order systems. Applications to economics, genetics, ecology.

Prereq: MATH 256; one from MATH 232, 262, 307.

MATH 458. Introduction to Mathematical Cryptography. 4 Credits.

Mathematical theory of public key cryptography. Finite field arithmetic, RSA and Diffie-Hellman algorithms, elliptic curves, generation of primes, factorization techniques. Offered alternate years.

Prereq: MATH 341.

MATH 461. Introduction to Mathematical Methods of Statistics I. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates. Sequence.

Prereq: MATH 253 or 263; one from MATH 232, 262, 307.

MATH 462. Introduction to Mathematical Methods of Statistics II. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates.

Prereq: MATH 461.

MATH 463. Mathematical Methods of Regression Analysis and Analysis of Variance. 4 Credits.

Multinomial distribution and chi-square tests of fit, simple and multiple linear regression, analysis of variance and covariance, methods of model selection and evaluation, use of statistical software.

Prereq: MATH 342, MATH 462.

MATH 467. Stochastic Processes. 4 Credits.

Basics of stochastic processes including Markov chains, martingales, Poisson processes, Brownian motion and their applications.

Prereq: MATH 341, MATH 461.

MATH 503. Thesis. 1-12 Credits.

Repeatable.

MATH 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

MATH 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

MATH 511. Functions of a Complex Variable I. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products. Sequence.

MATH 512. Functions of a Complex Variable II. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products.

Prereq: MATH 411/511.

MATH 513. Introduction to Analysis I. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

MATH 514. Introduction to Analysis II. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 413/513.

MATH 515. Introduction to Analysis III. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 414/514.

MATH 520. Ordinary Differential Equations. 4 Credits.

Ordinary differential equations. General and initial value problems. Explicit, numerical, graphical solutions; phase portraits. Existence, uniqueness, stability. Power series methods. Gradient flow; periodic solutions.

MATH 521M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with PHYS 521M.

MATH 522. Partial Differential Equations: Fourier Analysis II. 4 Credits.

General theory of PDEs; the Fourier transform. Laplace and Poisson equations; Green's functions and application. Mean value theorem and max-min principle.

Prereq: MATH 421/521.

MATH 525. Statistical Methods I. 4 Credits.

Statistical methods for upper-division and graduate students anticipating research in nonmathematical disciplines. Presentation of data, sampling distributions, tests of significance, confidence intervals, linear regression, analysis of variance, correlation, statistical software. Sequence. Only nonmajors may receive graduate credit.

MATH 531. Introduction to Topology. 4 Credits.

Elementary point-set topology with an introduction to combinatorial topology and homotopy. Sequence.

MATH 532. Introduction to Topology. 4 Credits.

Elementary point-set topology with an introduction to combinatorial topology and homotopy. Sequence.

Prereq: MATH 431/531.

MATH 533. Introduction to Differential Geometry. 4 Credits.

Plane and space curves, Frenet-Serret formula surfaces. Local differential geometry, Gauss-Bonnet formula, introduction to manifolds.

MATH 541. Linear Algebra. 4 Credits.

Theory of vector spaces over arbitrary fields, theory of a single linear transformation, minimal polynomials, Jordan and rational canonical forms, quadratic forms, quotient spaces.

MATH 544. Introduction to Abstract Algebra I. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory. Sequence.

MATH 545. Introduction to Abstract Algebra II. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 444/544.

MATH 546. Introduction to Abstract Algebra III. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 445/545.

MATH 556. Networks and Combinatorics. 4 Credits.

Fundamentals of modern combinatorics; graph theory; networks; trees; enumeration, generating functions, recursion, inclusion and exclusion; ordered sets, lattices, Boolean algebras.

MATH 557. Discrete Dynamical Systems. 4 Credits.

Linear and nonlinear first-order dynamical systems; equilibrium, cobwebs, Newton's method. Bifurcation and chaos. Introduction to higher-order systems. Applications to economics, genetics, ecology.

MATH 561. Introduction to Mathematical Methods of Statistics I. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates. Sequence.

MATH 562. Introduction to Mathematical Methods of Statistics II. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates.

Prereq: MATH 461/561.

MATH 563. Mathematical Methods of Regression Analysis and Analysis of Variance. 4 Credits.

Multinomial distribution and chi-square tests of fit, simple and multiple linear regression, analysis of variance and covariance, methods of model selection and evaluation, use of statistical software.

Prereq: MATH 462/562.

MATH 567. Stochastic Processes. 4 Credits.

Basics of stochastic processes including Markov chains, martingales, Poisson processes, Brownian motion and their applications.

Prereq: MATH 561.

MATH 601. Research: [Topic]. 1-9 Credits.

Repeatable.

MATH 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

MATH 603. Dissertation. 1-16 Credits.

Repeatable.

MATH 605. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

MATH 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics include Advanced Topics in Geometry, Ring Theory, Teaching Mathematics.

MATH 616. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.

MATH 617. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.

Prereq: MATH 616.

MATH 618. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.
Prereq: MATH 617.

MATH 619. Complex Analysis. 4-5 Credits.

The theory of Cauchy, power series, contour integration, entire functions, and related topics.

MATH 634. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.

MATH 635. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.
Prereq: MATH 634.

MATH 636. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.
Prereq: MATH 635.

MATH 637. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.

MATH 638. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.
Prereq: MATH 637.

MATH 639. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.

MATH 647. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.

MATH 648. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.
Prereq: MATH 647.

MATH 649. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.
Prereq: MATH 648.

MATH 672. Theory of Probability. 4-5 Credits.

Measure and integration, probability spaces, laws of large numbers, central-limit theory, conditioning, martingales, random walks.
Prereq: MATH 671.

MATH 673. Theory of Probability. 4-5 Credits.

Measure and integration, probability spaces, laws of large numbers, central-limit theory, conditioning, martingales, random walks.
Prereq: MATH 672.

MATH 681. Advanced Algebra: [Topic]. 4-5 Credits.

Repeatable. Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

MATH 682. Advanced Algebra: [Topic]. 4-5 Credits.

Repeatable. Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

MATH 683. Advanced Algebra: [Topic]. 4-5 Credits.

Repeatable. Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

MATH 684. Advanced Analysis: [Topic]. 4-5 Credits.

Repeatable. Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

MATH 685. Advanced Analysis: [Topic]. 4-5 Credits.

Repeatable. Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

MATH 686. Advanced Analysis: [Topic]. 4-5 Credits.

Repeatable. Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

MATH 690. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Repeatable. Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

MATH 691. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Repeatable. Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

MATH 692. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Repeatable. Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

Mathematics and Computer Science

Arkady Vaintrob and Christopher B. Wilson, Advisors

The undergraduate major in mathematics and computer science leads to a bachelor of arts or bachelor of science degree. The major combines elements of the mathematics and computer and information science curricula into a four-year program that offers an alternative to the undergraduate degree programs in either field. It serves students who want knowledge in both fields but are not ready to specialize in either. The courses selected for the program provide a solid foundation for professional work or for advanced study.

The program is designed to develop team players for information-based occupations. Its graduates have the tools to analyze complex problems and compute the answers to them. Consistent with its emphasis on teamwork and communication, the program requires college-level exposure to an additional scientific field and an upper-division writing course.

Students with strong mathematics backgrounds in high school are frequently advised to major in computer science at the university, often

without a clear idea of what the field of study is actually like. The joint major program offers such students the chance to experiment with computer science while retaining the anchor to mathematics. It also allows students the possibility of changing easily to the single-major program in either mathematics or CIS with no loss of credit and, at least through the junior year, without jeopardizing degree completion in four years.

Careers

Graduates with this major can enter industrial positions that require computer science skills and mathematical problem-solving ability. They are particularly well suited for positions in the high-performance computing industry, developing the software tools for large-scale scientific computation. The combination of mathematics and computer science forms an excellent professional background for secondary-school mathematics teachers, and the major program also provides a solid foundation for actuarial, financial, and related professions. Graduates are also prepared to enter advanced programs of study in either mathematics or computer science, or in applied areas such as biological computational science.

Preparation

A high school student planning to major in mathematics and computer science should pursue a strong academic program with four years of mathematics. Courses in algebra, geometry, trigonometry, and more advanced topics should be included. Experience preparing substantial written reports is highly desirable.

Transfer Students

College transfer students who have completed a year of calculus should be able to fit the remaining mathematics courses for the degree into just two years, provided that they have already completed the bulk of their general-education requirements before they transfer.

Transfer students should call or write to the Department of Computer and Information Science to determine whether computer courses they have taken can be counted toward the joint major requirements. Sequential subjects such as mathematics and computer science typically require several years to progress from introductory to senior-level courses. The joint program lets students move forward in both fields at once with limited prerequisites, making it relatively accessible to transfer students and to students who change from other major programs. Students who want to pursue the material in greater depth need to consider prerequisite paths carefully.

Students attending community college in Oregon are encouraged to obtain the Associate of Arts Oregon Transfer degree before entering the University of Oregon. While earning this degree, community college transfer students should take as much discrete mathematics, calculus, and computer science as possible, and also try to complete the science requirement for the major. The associate degree does not automatically satisfy the science requirement for this major.

Faculties and Facilities

The faculties and facilities in both the mathematics and the computer and information science departments are available to students in the combined major program. For detailed descriptions, see those sections of this catalog. Information is also available online.

Honors Program

Both of the cooperating departments offer departmental honors programs to their undergraduate majors. After obtaining advance approval from both of their advisors, students in the joint degree program are eligible to attain honors in mathematics and computer science by meeting the honors requirements of either department, including writing a thesis.

Preparation for Kindergarten through Secondary School Teaching Careers

The College of Education offers a fifth-year program for middle-secondary licensure in mathematics and for elementary teaching. More information is available from the mathematics department's advisors; see also the **College of Education** section of this catalog.

Minor

Minors are offered by the Department of Mathematics and the Department of Computer and Information Science. There is no joint minor in mathematics and computer science.

- Bachelor of Arts
- Bachelor of Science

Undergraduate Studies

Bachelor of Arts Degree Requirements

To earn a bachelor of arts (BA) in mathematics and computer science (MACS), majors must complete the requirements for a bachelor of science (BS) in addition to demonstrating proficiency in a second language.

The requirements for the MACS major fall into four categories: mathematics, computer science, writing, and science, with 44 credits taken in mathematics, 40 credits in computer science, and 16 credits (science and writing) in other departments.

Computer Science I (CIS 210), Computer Science II (CIS 211), Computer Science III (CIS 212), Elements of Discrete Mathematics I (MATH 231), and Elements of Discrete Mathematics II (MATH 232) must be passed with grades of B– or better before students can take the upper-division core courses. Courses required for the major must be taken for a letter grade. Upper-division courses must be passed with a grade of C– or better.

253

Psychology

PSY 201 Mind and Brain

PSY 202 Mind and Society

Select one of the following:

PSY 304 Biopsychology

PSY 348 Music and the Brain

Total Credits 96

¹ Excludes Statistical Methods I-II (MATH 425–426)

² Special Studies: [Topic] (CIS 399) and Experimental Course: [Topic] (CIS 410) courses used as electives must have a prerequisite of Intermediate Data Structures (CIS 313) and have regular class meetings and homework assignments. At least one course must be numbered 410 or above.

³ Students are encouraged to complete the accompanying lab courses.

Additional Bachelor Requirements

Students must earn no grade below a B– in required lower-division mathematics and computer science courses—Computer Science I (CIS 210), Computer Science II (CIS 211), Computer Science III (CIS 212), Elements of Discrete Mathematics I (MATH 231), Elements of Discrete Mathematics II (MATH 232)—for automatic advancement to upper-division computer and information science courses. At least 12 of the mathematics upper-division credits applied to the degree must be

taken in residence at the university. The science courses may be taken pass/no pass (P/N) or for letter grades.

Advising and Program Planning

Each major is assigned two advisors, one in the Department of Mathematics and one in the Department of Computer and Information Science. One of the two is designated as the advisor of record for the student, but both cooperate in planning the student's program. Because of the interrelationship between mathematics and computer science courses, it is especially important that a student planning for the combined major consult closely with both advisors. Since both mathematics and computer science are sequential subjects, prerequisite planning should be discussed with the student's advisors.

Programming Experience

Students who take Computer Science I-III (CIS 210–212) are expected to have programming experience, which may have been acquired in a high school course, through employment, or in a course such as Introduction to Programming and Problem Solving (CIS 122). Students who are unsure about their level of preparation should meet with a CIS advisor.

Sequence of Courses

Elements of Discrete Mathematics I-II (MATH 231–232) and Computer Science I-III (CIS 210–212) go well together, as do calculus and physics. Students with advanced placement credit in calculus and programming experience may want to take Elements of Discrete Mathematics I-II (MATH 231–232) and Computer Science I-III (CIS 210–212) in the freshman year. Students with little or no programming experience should plan to take Introduction to Programming and Problem Solving (CIS 122), Calculus I-III (MATH 251–253), and the major science requirement in the freshman year. In the sophomore year, students should take whichever of calculus or computer science was not taken freshman year, and continue into the 300 level of the branch that was taken.

Major Progress Review and Major in Good Standing

Each major must meet with a CIS advisor to file a Major Progress Review form after completing 12 credits of the upper-division core, including at least one course from each department. Mathematics and computer science courses and at least 8 credits of upper-division CIS courses used to satisfy upper-division major requirements must be taken for letter grades and passed with grades of C– or better. At least 12 of the upper-division mathematics credits and 12 of the upper-division computer and information science credits applied to the degree must be taken in residence at the university. A student who receives two grades below C– in the upper-division core or three grades below C– in any upper-division courses may be removed from the major.

Computer and Information Science Courses

CIS 105. Explorations in Computing. 4 Credits.

Overview of basic ideas and areas of computer science: includes algorithms, hardware, machine organization, programming languages, networks, artificial intelligence, and associated ethical issues.

Prereq: MATH 101 or equivalent.

CIS 110. Fluency with Information Technology. 4 Credits.

Introduction to information technology (IT), the study of computer-based information systems. Basics of the Internet and World Wide Web. Students create websites using XHTML and CSS.

CIS 111. Introduction to Web Programming. 4 Credits.

Project-based approach to learning computer programming by building interactive web pages using JavaScript and XHTML. Programming concepts including structured and object-oriented program design. CIS 110 recommended preparation.

Prereq: MATH 101 or equivalent.

CIS 115. Multimedia Web Programming. 4 Credits.

Intermediate web programming with an emphasis on HTML5 multimedia: two-dimensional graphics, image processing, animation, video, user interaction, geolocation. Continuing JavaScript, DOM, Ajax, and JSON use, programming fundamentals, and debugging techniques.

Prereq: CIS 111.

CIS 122. Introduction to Programming and Problem Solving. 4 Credits.

Computational problem solving, algorithm design, data structures, and programming using a multi-paradigm programming language. Introduces techniques for program design, testing, and debugging.

Prereq: MATH 101 or equivalent.

CIS 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

CIS 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

CIS 199. Special Studies in Computer Science: [Topic]. 1-5 Credits.

Repeatable.

CIS 210. Computer Science I. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence.

Prereq: MATH 112. Prior programming experience strongly encouraged.

CIS 211. Computer Science II. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence.

Prereq: CIS 210.

CIS 212. Computer Science III. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence.

Prereq: CIS 211.

CIS 313. Intermediate Data Structures. 4 Credits.

Design and analysis of data structures as means of engineering efficient software; attention to data abstraction and encapsulation. Lists, trees, heaps, stacks, queues, dictionaries, priority queues.

Prereq: CIS 210, CIS 211, CIS 212, MATH 231, MATH 232 with grades of B- or better.

CIS 314. Computer Organization. 4 Credits.

Introduction to computer organization and instruction-set architecture--digital logic design, binary arithmetic, design of central processing unit and memory, machine-level programming.

Prereq: CIS 210, CIS 211, CIS 212, MATH 231 with grades of B- or better.

CIS 315. Intermediate Algorithms. 4 Credits.

Algorithm design, worst-case and average-behavior analysis, correctness, computational complexity.

Prereq: CIS 313.

CIS 322. Introduction to Software Engineering. 4 Credits.

A project-intensive introduction to software engineering intended to build skills, knowledge, and habits of mind that prepare students for 400-level computer science courses, internships, and other software.

Prereq: CIS 210, CIS 211, CIS 212 with grades of B- or better.

CIS 330. C/C++ and Unix. 4 Credits.

Practical software design and programming activities in a C/C++ and Unix environment, with emphasis on the details of C/C++ and good programming style and practices.

Prereq: CIS 314.

CIS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

CIS 401. Research: [Topic]. 1-21 Credits.

Repeatable.

Prereq: CIS 313

CIS 403. Thesis. 1-12 Credits.

Repeatable.

Prereq: CIS 313

CIS 404. Internship; [Topic]. 1-4 Credits.

Repeatable.

Prereq: CIS 313.

CIS 405. Reading and Conference: [Topic]. 1-12 Credits.

Repeatable.

Prereq: CIS 313

CIS 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

Prereq: CIS 313

CIS 407. Seminar: [Topic]. 1-5 Credits.

Repeatable when the topic changes. Opportunity to study in greater depth specific topics arising out of other courses.

Prereq: CIS 313

CIS 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

Prereq: CIS 313

CIS 409. Practicum: [Topic]. 1-2 Credits.

The student assists other students who are enrolled in introductory programming classes. For each four hours of scheduled weekly consulting, the student is awarded 1 credit. Repeatable for maximum of 4 credits.

Prereq: CIS 313

CIS 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

CIS 413. Advanced Data Structures. 4 Credits.

Complex structures, storage management, sorting and searching, hashing, storage of texts, and information compression.

Prereq: CIS 315.

CIS 415. Operating Systems. 4 Credits.

Principles of operating system design. Process and memory management, concurrency, scheduling, input-output and file systems, security.

Prereq: CIS 313, CIS 330.

CIS 420. Automata Theory. 4 Credits.

Provides a mathematical basis for computability and complexity.

Models of computation, formal languages, Turing machines, solvability. Nondeterminism and complexity classes.

Prereq: CIS 315.

CIS 422. Software Methodology I. 4 Credits.

Technical and nontechnical aspects of software development, including specification, planning, design, development, management and maintenance of software projects. Student teams complete projects.

Prereq: CIS 313.

CIS 423. Software Methodology II. 4 Credits.

Application of concepts and methodologies covered in CIS 422/522.

Student teams complete a large system design and programming project. Final system specification, test plan, user documentation, and system walk throughs.

Prereq: CIS 422 with a B- or better.

CIS 425. Principles of Programming Languages. 4 Credits.

Syntax and semantics. Scope rules, environments, stores, denoted and expressed values, procedures, and parameters. Definitional interpreters. Types, overloading, parametric polymorphism, and inheritance. Varieties of abstraction.

Prereq: CIS 315.

CIS 427. Introduction to Logic. 4 Credits.

Basic notions of logic: propositional logic, first-order logic, Hilbert systems, sequent calculus, natural deduction. Soundness, completeness, undecidability. Current research in logic frameworks, automated deduction, Curry-Howard isomorphism.

Prereq: CIS 315; CIS 425 recommended pre or co-req.

CIS 431. Introduction to Parallel Computing. 4 Credits.

Parallel architecture, theory, algorithms, and programming with emphasis on parallel programming, focusing on models, languages, libraries, and runtime systems.

Prereq: CIS 330.

CIS 432. Introduction to Networks. 4 Credits.

Principles of computer network design. Link technologies, packet switching, routing, inter-networking, reliability. Internet protocols.

Programming assignments focus on protocol design.

Prereq: CIS 330. CIS 415 recommended.

CIS 433. Computer and Network Security. 4 Credits.

Security for various aspects of computers and networks. Elementary cryptography, program security, trusted operating systems, network security, privacy, and legal and ethical issues.

Prereq: CIS 415.

CIS 441. Introduction to Computer Graphics. 4 Credits.

Introduction to the hardware, geometrical transforms, interaction techniques, and shape representation schemes that are important in interactive computer graphics. Programming assignments using contemporary graphics hardware and software systems.

Prereq: CIS 330.

CIS 443. User Interfaces. 4 Credits.

Introduction to user interface software engineering. Emphasis on theory of interface design, understanding the behavior of the user, and implementing programs on advanced systems.

Prereq: CIS 313.

CIS 445. Modeling and Simulation. 4 Credits.

Theoretical foundations and practical problems for the modeling and computer simulation of discrete and continuous systems. Simulation languages, empirical validation, applications in computer science.

Prereq: CIS 315, 330.

CIS 451. Database Processing. 4 Credits.

Fundamental concepts of DBMS. Data modeling, relational models and normal forms. File organization and index structures. SQL, embedded SQL, and concurrency control.

Prereq: CIS 313, 314.

CIS 452. Database Issues. 4 Credits.

Covers central database issues such as access methods, security, tuning, and concurrency control. Examines alternative database models.

Prereq: CIS 451.

CIS 453. Data Mining. 4 Credits.

Databases, machine learning, artificial intelligence, statistics, and data visualization. Examines data warehouses, data preprocessing, association and classification rule mining, and cluster analysis.

Prereq: CIS 451/551.

CIS 461. Introduction to Compilers. 4 Credits.

Lexical analysis, parsing, attribution, code generation.
Prereq: CIS 314, 425. CIS 420 strongly recommended.

CIS 471. Introduction to Artificial Intelligence. 4 Credits.

Basic themes, issues, and techniques of artificial intelligence, including agent architecture, knowledge representation and reasoning, problem solving and planning, game playing, and learning.
Prereq: CIS 315.

CIS 472. Machine Learning. 4 Credits.

A broad introduction to machine learning and its established algorithms. Topics include concept learning, decision trees, neural network.
Prereq: CIS 315.

CIS 473. Probabilistic Methods for Artificial Intelligence. 4 Credits.

Fundamental techniques for representing problems as probability distributions, performing inference, and learning from data. Topics include Bayesian and Markov networks, variable elimination, loopy belief propagation, and parameter.
Prereq: CIS 315.

CIS 503. Thesis. 1-16 Credits.

Repeatable.

CIS 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Opportunity to study in greater depth specific topics arising out of other courses.

CIS 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

CIS 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CIS 513. Advanced Data Structures. 4 Credits.

Complex structures, storage management, sorting and searching, hashing, storage of texts, and information compression.

CIS 520. Automata Theory. 4 Credits.

Provides a mathematical basis for computability and complexity. Models of computation, formal languages, Turing machines, solvability. Nondeterminism and complexity classes.

CIS 522. Software Methodology I. 4 Credits.

Technical and nontechnical aspects of software development, including specification, planning, design, development, management and maintenance of software projects. Student teams complete projects.

CIS 523. Software Methodology II. 4 Credits.

Student teams complete a large system design and programming project. Final system specifications, test plan, user documentation, and system walk-through.
Prereq: CIS 522

CIS 527. Introduction to Logic. 4 Credits.

Basic notions of logic: propositional logic, first-order logic, Hilbert systems, sequent calculus, natural deduction. Soundness, completeness, undecidability. Current research in logic frameworks, automated deduction, Curry-Howard isomorphism.

CIS 531. Introduction to Parallel Computing. 4 Credits.

Parallel architecture, theory, algorithms, and programming with emphasis on parallel programming, focusing on models, languages, libraries, and runtime systems.

CIS 532. Introduction to Networks. 4 Credits.

Principles of computer network design. Link technologies, packet switching, routing, inter-networking, reliability. Internet protocols. Programming assignments focus on protocol design.

CIS 533. Computer and Network Security. 4 Credits.

Security for various aspects of computers and networks. Elementary cryptography, program security, trusted operating systems, network security, privacy, and legal and ethical issues.

CIS 541. Introduction to Computer Graphics. 4 Credits.

Introduction to the hardware, geometrical transforms, interaction techniques, and shape representation schemes that are important in interactive computer graphics. Programming assignments using contemporary graphics hardware and software systems.

CIS 543. User Interfaces. 4 Credits.

Introduction to user interface software engineering. Emphasis on theory of interface design, understanding the behavior of the user, and implementing programs on advanced systems.

CIS 545. Modeling and Simulation. 4 Credits.

Theoretical foundations and practical problems for the modeling and computer simulation of discrete and continuous systems. Simulation languages, empirical validation, applications in computer science.

CIS 551. Database Processing. 4 Credits.

Fundamental concepts of DBMS. Data modeling, relational models and normal forms. File organization and index structures. SQL, embedded SQL, and concurrency control.

CIS 552. Database Issues. 4 Credits.

Covers central database issues such as access methods, security, tuning, and concurrency control. Examines alternative database models.
Prereq: CIS 4/551.

CIS 553. Data Mining. 4 Credits.

Databases, machine learning, artificial intelligence, statistics, and data visualization. Examines data warehouses, data preprocessing, association and classification rule mining, and cluster analysis.
Prereq: CIS 451/551.

CIS 561. Introduction to Compilers. 4 Credits.

Lexical analysis, parsing, attribution, code generation.
Prereq: CIS 314 or equivalent, 624. CIS 420/520 strongly recommended.

CIS 571. Introduction to Artificial Intelligence. 4 Credits.

Basic themes, issues, and techniques of artificial intelligence, including agent architecture, knowledge representation and reasoning, problem solving and planning, game playing, and learning.

CIS 572. Machine Learning. 4 Credits.

A broad introduction to machine learning and its established algorithms. Topics include concept learning, decision trees, neural network.

CIS 573. Probabilistic Methods for Artificial Intelligence. 4 Credits.

Fundamental techniques for representing problems as probability distributions, performing inference, and learning from data. Topics include Bayesian and Markov networks, variable elimination, loopy belief propagation, and parameter.

CIS 601. Research: [Topic]. 1-16 Credits.

Repeatable.

CIS 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

CIS 603. Dissertation. 1-16 Credits.

Repeatable.

CIS 604. Internship: [Topic]. 1-4 Credits.

Repeatable.

CIS 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

CIS 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

CIS 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Research topics are presented.

CIS 608. Colloquium: [Topic]. 1 Credit.

Repeatable.

CIS 609. Final Project. 1-16 Credits.

Repeatable. Final project for master's degree without thesis.

CIS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CIS 621. Algorithms and Complexity. 4 Credits.

Design and analysis of algorithms, strategies for efficient algorithms, introduction to complexity theory including NP-completeness.

Prereq: CIS 420/520 strongly recommended.

CIS 624. Structure of Programming Languages. 4 Credits.

Introduction to axiomatic, operational, and denotational semantics.

Environments, stores, and continuations. Type theory, subtypes, polymorphism, and inheritance. Functional and logic programming.

CIS 630. Distributed Systems. 4 Credits.

Principles of distributed computer systems: interprocess communication, distributed file systems, distributed timing and synchronization, distributed programming, transactions, process scheduling, distributed shared memory.

Prereq: CIS 415 or equivalent, CIS 429/529.

CIS 631. Parallel Processing. 4 Credits.

Advanced topics in parallel processing including massively parallel computer architecture, supercomputers, parallelizing compiler technology, performance evaluation, parallel programming languages, parallel applications.

Prereq: CIS 529, CIS 531.

CIS 632. Computer Networks. 4 Credits.

Advanced issues in computer networks, focusing on research to extend the services offered by the Internet.

Prereq: CIS 432/532.

CIS 633. Advanced Network Security. 4 Credits.

Classic and state-of-the-art research topics in network security; threats and attacks, defense algorithms and mechanisms, measurement and evaluation of both security problems and solutions. Offered alternate years.

Prereq: CIS 533.

CIS 640. Writing in Computer Research. 2 Credits.

Students learn to provide and accept constructive criticism of writing samples in a workshop format.

CIS 650. Software Engineering. 4 Credits.

Examines recent models and tools in software engineering including modifications to the traditional software life-cycle model, development environments, and speculative view of the future role of artificial intelligence.

CIS 670. Data Science. 4 Credits.

Data science is the development of methods to study large and complex data sets. Methods that scale to very large data sets are of particular interest. This course introduces state-of-art data science methods focused on processing very large data sets of real-world data.

Prereq: CIS 451/CIS 551 Database Processing

Mathematics Courses**MATH 101. Foundations of Algebra and Mathematical Modeling. 4 Credits.**

Critical elements of pre-college algebra, topics including equation solving; rational, radical, and polynomial expression evaluation and simplification; lines, linear equations, and quadratic equations. Focus on mathematical modeling and preparation for additional college level mathematics.

Prereq: UO Math Placement Exam with a score of 30-45.

MATH 105. University Mathematics I. 4 Credits.

Topics include logic, sets and counting, probability, and statistics.

Instructors may include historical context of selected topics and applications to finance and biology.

Prereq: MATH 101 or satisfactory placement test score.

MATH 106. University Mathematics II. 4 Credits.

Topics include mathematics of finance, applied geometry, exponential growth and decay, and a nontechnical introduction to the concepts of calculus.

Prereq: MATH 101 or satisfactory placement test score.

MATH 107. University Mathematics III. 4 Credits.

Topics chosen from modular arithmetic and coding, tilings and symmetry, voting methods, apportionment, fair division, introductory graph theory, or scheduling.

Prereq: MATH 101 or satisfactory placement test score.

MATH 111. College Algebra. 4 Credits.

Algebra needed for calculus including graph sketching, algebra of functions, polynomial functions, rational functions, exponential and logarithmic functions, linear and nonlinear functions.

Prereq: MATH 101 or satisfactory placement test score.

MATH 112. Elementary Functions. 4 Credits.

Exponential, logarithmic, and trigonometric functions. Intended as preparation for MATH 251.

Prereq: MATH 111 or satisfactory placement test score.

MATH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MATH 201. Algebra Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from algebra.

MATH 202. Geometry Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from geometry.

MATH 203. Analysis and Number Theory Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from analysis and the theory of numbers.

MATH 204. Probability and Statistics Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from probability and statistics.

MATH 205. Foundations Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from the foundations of mathematics.

MATH 206. Combinatorics Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from combinatorics.

MATH 211. Fundamentals of Elementary Mathematics I. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence. Prereq: MATH 111 or satisfactory placement test score.

MATH 212. Fundamentals of Elementary Mathematics II. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence. Prereq: MATH 211, C- or better.

MATH 213. Fundamentals of Elementary Mathematics III. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence. Prereq: MATH 212, C- or better.

MATH 231. Elements of Discrete Mathematics I. 4 Credits.

Sets, mathematical logic, induction, sequences, and functions. Sequence. Prereq: MATH 112 or satisfactory placement test score.

MATH 232. Elements of Discrete Mathematics II. 4 Credits.

Relations, theory of graphs and trees with applications, permutations and combinations. Prereq: MATH 231.

MATH 241. Calculus for Business and Social Science I. 4 Credits.

Introduction to topics in differential and integral calculus including some aspects of the calculus of several variables. Sequence. Students cannot receive credit for both MATH 241 and 251. Prereq: MATH 111 or satisfactory placement test score; a programmable calculator capable of displaying function graphs.

MATH 242. Calculus for Business and Social Science II. 4 Credits.

Introduction to topics in differential and integral calculus including some aspects of the calculus of several variables. Students cannot receive credit for both MATH 242 and 252. Prereq: MATH 241.

MATH 243. Introduction to Methods of Probability and Statistics. 4 Credits.

Discrete and continuous probability, data description and analysis, sampling distributions, emphasizes confidence intervals and hypothesis testing. Students cannot receive credit for both MATH 243 and 425. Prereq: MATH 101 or satisfactory placement test score; MATH 111 recommended; a programmable calculator capable of displaying function graphs.

MATH 246. Calculus for the Biological Sciences I. 4 Credits.

For students in biological science and related fields. Emphasizes modeling and applications to biology. Differential calculus and applications. Sequence. Students cannot receive credit for more than one of MATH 241, 246, 251. Prereq: MATH 112 or satisfactory placement test score.

MATH 247. Calculus for the Biological Sciences II. 4 Credits.

For students in biological science and related fields. Emphasizes modeling and applications to biology. Integral calculus and applications. Students cannot receive credit for more than one of MATH 242, 247, 252. Prereq: MATH 246.

MATH 251. Calculus I. 4 Credits.

Standard sequence for students of physical and social sciences and of mathematics. Differential calculus and applications. Sequence. Students cannot receive credit for more than one of MATH 241, 246, 251. Prereq: MATH 112 or satisfactory placement test score.

MATH 252. Calculus II. 4 Credits.

Standard sequence for students of physical and social sciences and of mathematics. Integral calculus. Sequence. Students cannot receive credit for more than one of MATH 242, 247, 252. Prereq: MATH 251.

MATH 253. Calculus III. 4 Credits.

Standard sequence for students of physical and social sciences and of mathematics. Introduction to improper integrals, infinite sequences and series, Taylor series, and differential equations. Sequence. Prereq: MATH 252.

MATH 256. Introduction to Differential Equations. 4 Credits.

Introduction to differential equations and applications. Linear algebra is introduced as needed. Prereq: MATH 253.

MATH 261. Calculus with Theory I. 4 Credits.

Covers both applications of calculus and its theoretical background. Axiomatic treatment of the real numbers, limits, and the least upper bound property.

MATH 262. Calculus with Theory II. 4 Credits.

Covers both applications of calculus and its theoretical background. Differential and integral calculus. Prereq: MATH 261.

MATH 263. Calculus with Theory III. 4 Credits.

Covers both applications of calculus and its theoretical background. Sequences and series, Taylor's theorem. Prereq: MATH 262.

MATH 281. Several-Variable Calculus I. 4 Credits.

Introduction to calculus of functions of several variables including partial differentiation; gradient, divergence, and curl; line and surface integrals; Green's and Stokes's theorems. Linear algebra introduced as needed. Sequence. Prereq: MATH 253.

MATH 282. Several-Variable Calculus II. 4 Credits.

Introduction to calculus of functions of several variables including partial differentiation; gradient, divergence, and curl; line and surface integrals; Green's and Stokes's theorems. Linear algebra introduced as needed. Prereq: MATH 281.

MATH 307. Introduction to Proof. 4 Credits.

Proof is how mathematics establishes truth and communicates ideas. Introduces students to proof in the context of interesting mathematical problems. Prereq: MATH 247 or 252 or 262.

MATH 316. Fundamentals of Analysis I. 4 Credits.

Rigorous treatment of topics introduced in calculus such as limits, sequences, series, the Cauchy condition, and continuity. Development of mathematical proof in these contexts. Sequence with MATH 317.
Prereq: MATH 253 or equivalent; one from MATH 232, MATH 262, MATH 307.

MATH 317. Fundamentals of Analysis II. 4 Credits.

Rigorous treatment of topics introduced in calculus such as continuity, uniform convergence, power series, differentiation, and integration. Development of mathematical proof in these contexts. Sequence with MATH 316.
Prereq: MATH 316.

MATH 320. Theory of Differential Equations. 4 Credits.

An introduction to differential equations for students with background in linear algebra, with a mixture of applications and theory. Topics include linear and nonlinear equations, systems of equations, and questions of existence and uniqueness.
Prereq: MATH 281, MATH 342; one from MATH 232, MATH 262, MATH 307.

MATH 341. Elementary Linear Algebra. 4 Credits.

Vector and matrix algebra; n -dimensional vector spaces; systems of linear equations; linear independence and dimension; linear transformations; rank and nullity; determinants; eigenvalues; inner product spaces; theory of a single linear transformation. Sequence.
Prereq: MATH 252. MATH 253 is recommended.

MATH 342. Elementary Linear Algebra. 4 Credits.

Vector and matrix algebra; n -dimensional vector spaces; systems of linear equations; linear independence and dimension; linear transformations; rank and nullity; determinants; eigenvalues; inner product spaces; theory of a single linear transformation.
Prereq: MATH 341.

MATH 343. Statistical Models and Methods. 4 Credits.

Review of theory and applications of mathematical statistics including estimation and hypothesis testing.
Prereq: MATH 252.

MATH 347. Fundamentals of Number Theory I. 4 Credits.

A study of congruences, the Chinese remainder theorem, the theory of prime numbers and divisors, Diophantine equations, and quadratic reciprocity. Development of mathematical proof in these contexts. Sequence with MATH 348.
Prereq: MATH 253 or equivalent; one from MATH 232, MATH 262, MATH 307.

MATH 348. Fundamentals of Number Theory II. 4 Credits.

Study of nonlinear Diophantine equations, sums of squares, the theory of partitions, geometric number theory, and the distribution of prime numbers. Development of mathematical proof in these contexts. Sequence with MATH 347.
Prereq: MATH 347.

MATH 351. Elementary Numerical Analysis I. 4 Credits.

Basic techniques of numerical analysis and their use on computers. Topics include root approximation, linear systems, interpolation, integration, and differential equations. Sequence.
Prereq: MATH 253 or equivalent; one from MATH 232, 262, 307.

MATH 352. Elementary Numerical Analysis II. 4 Credits.

Basic techniques of numerical analysis and their use on computers. Topics include root approximation, linear systems, interpolation, integration, and differential equations.
Prereq: MATH 351.

MATH 391. Fundamentals of Abstract Algebra I. 4 Credits.

Introduction to algebraic structures including groups, rings, fields, and polynomial rings. Sequence.
Prereq: MATH 341; one from MATH 232, 262, 307.

MATH 392. Fundamentals of Abstract Algebra II. 4 Credits.

Introduction to algebraic structures including groups, rings, fields, and polynomial rings.
Prereq: MATH 391.

MATH 394. Geometries from an Advanced Viewpoint I. 4 Credits.

Topics in Euclidean geometry in two and three dimensions including constructions. Emphasizes investigations, proofs, and challenging problems. For prospective secondary and middle school teachers.
Prereq: MATH 253 or equivalent; one from MATH 232, 262, 307.

MATH 395. Geometries from an Advanced Viewpoint II. 4 Credits.

Analysis of problems in Euclidean geometry using coordinates, vectors, and the synthetic approach. Transformations in the plane and space and their groups. Introduction to non-Euclidean geometries. For prospective secondary teachers.
Prereq: grade of C- or better in MATH 394.

MATH 397. History and Applications of Calculus. 4 Credits.

Historical applications of calculus. Topics may include volumes by the method of exhaustion, Archimedean spiral, Kepler problem, calculus of variations, brachistochrone problem, spread of infectious disease, analysis of savings.
Prereq: MATH 253; one from MATH 232, MATH 262, MATH 307.

MATH 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MATH 401. Research: [Topic]. 1-21 Credits.

Repeatable.

MATH 403. Thesis. 1-4 Credits.

Repeatable.

MATH 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable.

MATH 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

MATH 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

MATH 411. Functions of a Complex Variable I. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products. Sequence.
Prereq: MATH 281; one from MATH 232, 262, 307.

MATH 412. Functions of a Complex Variable II. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products.
Prereq: MATH 411.

MATH 413. Introduction to Analysis I. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.
Prereq: MATH 282, MATH 317.

MATH 414. Introduction to Analysis II. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms.

Prereq: MATH 413.

MATH 415. Introduction to Analysis III. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 414.

MATH 420. Ordinary Differential Equations. 4 Credits.

Ordinary differential equations. General and initial value problems. Explicit, numerical, graphical solutions; phase portraits. Existence, uniqueness, stability. Power series methods. Gradient flow; periodic solutions.

Prereq: MATH 263 or MATH 316.

MATH 421M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with PHYS 421M.

Prereq: MATH 253; one from MATH 256, MATH 281.

MATH 422. Partial Differential Equations: Fourier Analysis II. 4 Credits.

General theory of PDEs; the Fourier transform. Laplace and Poisson equations; Green's functions and application. Mean value theorem and max-min principle.

Prereq: MATH 421M or PHYS 421M.

MATH 425. Statistical Methods I. 4 Credits.

Statistical methods for upper-division and graduate students anticipating research in nonmathematical disciplines. Presentation of data, sampling distributions, tests of significance, confidence intervals, linear regression, analysis of variance, correlation, statistical software. Sequence. Only nonmajors may receive upper-division credit. Students cannot receive credit for both MATH 243 and 425.

Prereq: MATH 111 or satisfactory placement test score.

MATH 431. Introduction to Topology. 4 Credits.

Elementary point-set topology with an introduction to combinatorial topology and homotopy. Sequence.

Prereq: MATH 317.

MATH 432. Introduction to Topology. 4 Credits.

Introduction to smooth manifolds and differential topology. Sequence.

Prereq: MATH 281, MATH 341, MATH 431.

MATH 433. Introduction to Differential Geometry. 4 Credits.

Plane and space curves, Frenet-Serret formula surfaces. Local differential geometry, Gauss-Bonnet formula, introduction to manifolds.

Prereq: MATH 282, 342; one from MATH 232, 262, 307.

MATH 441. Linear Algebra. 4 Credits.

Theory of vector spaces over arbitrary fields, theory of a single linear transformation, minimal polynomials, Jordan and rational canonical forms, quadratic forms, quotient spaces.

Prereq: MATH 342; one from MATH 232, 262, 307.

MATH 444. Introduction to Abstract Algebra I. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory. Sequence.

Prereq: MATH 342; one from MATH 232, 262, 307.

MATH 445. Introduction to Abstract Algebra II. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 444.

MATH 446. Introduction to Abstract Algebra III. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 445.

MATH 456. Networks and Combinatorics. 4 Credits.

Fundamentals of modern combinatorics; graph theory; networks; trees; enumeration, generating functions, recursion, inclusion and exclusion; ordered sets, lattices, Boolean algebras.

Prereq: one from MATH 232, 262, 307.

MATH 457. Discrete Dynamical Systems. 4 Credits.

Linear and nonlinear first-order dynamical systems; equilibrium, cobwebs, Newton's method. Bifurcation and chaos. Introduction to higher-order systems. Applications to economics, genetics, ecology.

Prereq: MATH 256; one from MATH 232, 262, 307.

MATH 458. Introduction to Mathematical Cryptography. 4 Credits.

Mathematical theory of public key cryptography. Finite field arithmetic, RSA and Diffie-Hellman algorithms, elliptic curves, generation of primes, factorization techniques. Offered alternate years.

Prereq: MATH 341.

MATH 461. Introduction to Mathematical Methods of Statistics I. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates. Sequence.

Prereq: MATH 253 or 263; one from MATH 232, 262, 307.

MATH 462. Introduction to Mathematical Methods of Statistics II. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates.

Prereq: MATH 461.

MATH 463. Mathematical Methods of Regression Analysis and Analysis of Variance. 4 Credits.

Multinomial distribution and chi-square tests of fit, simple and multiple linear regression, analysis of variance and covariance, methods of model selection and evaluation, use of statistical software.

Prereq: MATH 342, MATH 462.

MATH 467. Stochastic Processes. 4 Credits.

Basics of stochastic processes including Markov chains, martingales, Poisson processes, Brownian motion and their applications.

Prereq: MATH 341, MATH 461.

MATH 503. Thesis. 1-12 Credits.

Repeatable.

MATH 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

MATH 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

MATH 511. Functions of a Complex Variable I. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products. Sequence.

MATH 512. Functions of a Complex Variable II. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products.

Prereq: MATH 411/511.

MATH 513. Introduction to Analysis I. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

MATH 514. Introduction to Analysis II. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 413/513.

MATH 515. Introduction to Analysis III. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 414/514.

MATH 520. Ordinary Differential Equations. 4 Credits.

Ordinary differential equations. General and initial value problems. Explicit, numerical, graphical solutions; phase portraits. Existence, uniqueness, stability. Power series methods. Gradient flow; periodic solutions.

MATH 521M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with PHYS 521M.

MATH 522. Partial Differential Equations: Fourier Analysis II. 4 Credits.

General theory of PDEs; the Fourier transform. Laplace and Poisson equations; Green's functions and application. Mean value theorem and max-min principle.

Prereq: MATH 421/521.

MATH 525. Statistical Methods I. 4 Credits.

Statistical methods for upper-division and graduate students anticipating research in nonmathematical disciplines. Presentation of data, sampling distributions, tests of significance, confidence intervals, linear regression, analysis of variance, correlation, statistical software. Sequence. Only nonmajors may receive graduate credit.

MATH 531. Introduction to Topology. 4 Credits.

Elementary point-set topology with an introduction to combinatorial topology and homotopy. Sequence.

MATH 532. Introduction to Topology. 4 Credits.

Elementary point-set topology with an introduction to combinatorial topology and homotopy. Sequence.

Prereq: MATH 431/531.

MATH 533. Introduction to Differential Geometry. 4 Credits.

Plane and space curves, Frenet-Serret formula surfaces. Local differential geometry, Gauss-Bonnet formula, introduction to manifolds.

MATH 541. Linear Algebra. 4 Credits.

Theory of vector spaces over arbitrary fields, theory of a single linear transformation, minimal polynomials, Jordan and rational canonical forms, quadratic forms, quotient spaces.

MATH 544. Introduction to Abstract Algebra I. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory. Sequence.

MATH 545. Introduction to Abstract Algebra II. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 444/544.

MATH 546. Introduction to Abstract Algebra III. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 445/545.

MATH 556. Networks and Combinatorics. 4 Credits.

Fundamentals of modern combinatorics; graph theory; networks; trees; enumeration, generating functions, recursion, inclusion and exclusion; ordered sets, lattices, Boolean algebras.

MATH 557. Discrete Dynamical Systems. 4 Credits.

Linear and nonlinear first-order dynamical systems; equilibrium, cobwebs, Newton's method. Bifurcation and chaos. Introduction to higher-order systems. Applications to economics, genetics, ecology.

MATH 561. Introduction to Mathematical Methods of Statistics I. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates. Sequence.

MATH 562. Introduction to Mathematical Methods of Statistics II. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates.

Prereq: MATH 461/561.

MATH 563. Mathematical Methods of Regression Analysis and Analysis of Variance. 4 Credits.

Multinomial distribution and chi-square tests of fit, simple and multiple linear regression, analysis of variance and covariance, methods of model selection and evaluation, use of statistical software.

Prereq: MATH 462/562.

MATH 567. Stochastic Processes. 4 Credits.

Basics of stochastic processes including Markov chains, martingales, Poisson processes, Brownian motion and their applications.

Prereq: MATH 561.

MATH 601. Research: [Topic]. 1-9 Credits.

Repeatable.

MATH 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

MATH 603. Dissertation. 1-16 Credits.

Repeatable.

MATH 605. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

MATH 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics include Advanced Topics in Geometry, Ring Theory, Teaching Mathematics.

MATH 616. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.

MATH 617. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.

Prereq: MATH 616.

MATH 618. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.

Prereq: MATH 617.

MATH 619. Complex Analysis. 4-5 Credits.

The theory of Cauchy, power series, contour integration, entire functions, and related topics.

MATH 634. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.

MATH 635. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.

Prereq: MATH 634.

MATH 636. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.

Prereq: MATH 635.

MATH 637. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.

MATH 638. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.

Prereq: MATH 637.

MATH 639. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.

MATH 647. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.

MATH 648. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.

Prereq: MATH 647.

MATH 649. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.

Prereq: MATH 648.

MATH 672. Theory of Probability. 4-5 Credits.

Measure and integration, probability spaces, laws of large numbers, central-limit theory, conditioning, martingales, random walks.

Prereq: MATH 671.

MATH 673. Theory of Probability. 4-5 Credits.

Measure and integration, probability spaces, laws of large numbers, central-limit theory, conditioning, martingales, random walks.

Prereq: MATH 672.

MATH 681. Advanced Algebra: [Topic]. 4-5 Credits.

Repeatable. Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

MATH 682. Advanced Algebra: [Topic]. 4-5 Credits.

Repeatable. Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

MATH 683. Advanced Algebra: [Topic]. 4-5 Credits.

Repeatable. Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

MATH 684. Advanced Analysis: [Topic]. 4-5 Credits.

Repeatable. Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

MATH 685. Advanced Analysis: [Topic]. 4-5 Credits.

Repeatable. Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

MATH 686. Advanced Analysis: [Topic]. 4-5 Credits.

Repeatable. Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

MATH 690. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Repeatable. Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

MATH 691. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Repeatable. Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

MATH 692. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Repeatable. Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

Medieval Studies

Stephen J. Shoemaker, Program Director

311 Susan Campbell Hall

Medieval studies, an interdisciplinary undergraduate program, integrates various approaches to the Middle Ages by medievalists in several departments. Medieval studies provides an excellent general education or a solid base for graduate work in a more specialized area. Study abroad is strongly encouraged.

Medieval studies concentrates on the period from 300 to 1500, combining courses in art and architecture, history, language, literature, music, philosophy, and religion. A typical course of study includes diverse topics such as the Bible, the early Church, Byzantium, Islam, the Vikings, the

Crusades, women in the Middle Ages, mysticism, romance, the Gothic cathedral, Chaucer, Dante, and medieval China and Japan. The program aims to provide a comprehensive introduction to the medieval worldview in Europe and beyond, and the origins of the modern world.

Participating Faculty

Ina Asim, history

Judith R. Baskin, Judaic studies

Martha J. Bayless, English

Louise M. Bishop, honors college

Steven T. Brown, comparative literature

Stephanie Clark, English

Frederick Colby, religious studies

Warren Ginsberg, English

Andrew E. Goble, history

Deborah A. Green, Judaic studies

D. Gantt Gurley, German and Scandinavian

David Hollenberg, religious studies

Maile Hutterer, history of art and architecture

Mary Jaeger, classics

Lori Kruckenberg, music

Charles H. Lachman, history of art and architecture

C. Anne Laskaya, English

Eric Mentzel, music

F. Regina Psaki, Romance languages

Stephen J. Shoemaker, religious studies

Mark T. Unno, religious studies

Cynthia M. Vakareliyska, linguistics

Marc Vanscheeuwijck, music

David Wacks, Romance languages

Lisa Wolverton, history

- Bachelor of Arts
- Minor

Undergraduate Studies

Bachelor of Arts Degree Requirements

Medieval studies majors must complete twelve medieval courses in at least three departments with a grade of mid-C or better. At least 24 credits must be in upper-division work. Two years of Latin are

recommended for those who want to do graduate work in medieval studies. See the program website for more information.

Honors in Medieval Studies

A degree with honors in medieval studies allows a student to focus on an area of concentration in a written thesis. Requirements are as follows:

1. Satisfaction of the requirements for the major
2. A grade point average of 3.50 or better in courses taken to meet the upper-division requirements of the major. A minimum cumulative UO grade point average of 3.00
3. A prospectus for the thesis approved by both the thesis director and the program director. The prospectus must be submitted no later than week seven of the term before the student plans to complete the honors project. When the prospectus has been approved, the student and thesis director will agree on a schedule of submission of work
4. A senior thesis of substantial quality, representing new or substantially new work beyond any project or paper submitted within other university courses, approved by the thesis director and at least one other member of the medieval studies participating faculty. The thesis must be complete and ready for public presentation no later than week seven of the fall, winter, or spring term
5. **A presentation of the project.** The student presents the honors project to students and faculty members and participates in an open discussion of the project with the audience. Presentations typically occur in weeks seven through ten of fall, winter, or spring terms and are arranged in consultation with both the director of the Medieval Studies Program and the student's thesis advisor
6. Honors in medieval studies are not given for substantially the same project or paper submitted for honors to any other unit in the university. Departmental honors theses shall be written exclusively for honors in medieval studies
7. Students normally enroll in at least one but no more than two terms of Thesis (MDVL 403). Enrollment in Thesis is not required but is recommended. Thesis credits cannot serve to fulfill the minimum major requirements

Minor Requirements

Students who want a minor in medieval studies must complete seven medieval courses in at least two departments.

Suggested Courses

Students should plan their programs as early as possible with the aid of a medieval studies faculty advisor. With the advisor's consent, courses numbered 199, 399, 405, 407, 408, or 410 may be substituted for suggested courses. At least five of the courses must be taken at the University of Oregon. More information is available from the medieval studies office or from the Medieval Studies Program director.

Middle East–North Africa Studies

Frederick "Rick" Colby, Program Director
Oregon Consortium for International and Area Studies
175 Prince Lucien Campbell Hall
5206 University of Oregon
Eugene, Oregon 97403-5206
mena@uoregon.edu

The Middle East and North Africa region is home to a wide range of peoples and cultures and has a crucial place in the history of societies and cultures. It is also in the midst of grave instability and unrest, which has global consequences.

The Middle East–North Africa studies minor is a broad examination of the Middle East and North Africa region. The minor requires a minimum of 24 credits and one of three concentrations: language study, study abroad, or research. The minor is designed to offer flexibility so that students may focus on particular areas of interest while providing them with an introduction to critical issues in the contemporary Middle East and North Africa.

Participating Faculty

Michael Allan, comparative literature

Judith R. Baskin, religious studies

Diane Baxter, anthropology

Shaul Cohen, geography

Rick Colby, religious studies

Jane Cramer, political science

Alex Dracobly, political science

Stephen Dueppen, anthropology

Hanan Elsherif, religious studies

David Frank, honors college

Deborah Green, Judaic studies

David Hollenberg, religious studies

Angela Joya, international studies

Farhad Malekafzali, political science

Michael Malek Najjar, theater arts

Lindsey Mazurek, history

Stephen Shoemaker, religious studies

Priscilla Southwell, political science

David Wacks, Romance languages

Anita Weiss, international studies

Minor in Middle East–North Africa Studies

Students must satisfactorily complete a minimum of 24 credits of course work. Courses applied toward the minor must be passed with a C– or better or P (pass). Of the 24 credits, a minimum of 20 must be graded. Students must take a minimum of 16 credits in residence. In addition, students must complete an area of concentration (language, study abroad, or research). Some credits toward the concentration may be used to satisfy the 24 credits of course work, as described below.

Requirements

Code	Title	Credits
ANTH 250	Introduction to Middle East Studies	4
Choose one of the following:		4
GEOG 209	Geography of the Middle East and North Africa	
INTL 423	Development and the Muslim World	
PS 199	Special Studies: [Topic] (Crisis in the Middle East)	
COLT 231	Literature and Society ¹	
COLT 370	Comparative Comics ¹	
COLT 461	¹	
COLT 462	Cultural Intersections: [Topic] ¹	
COLT 470	Studies in Identity: [Topic] ¹	
Elective courses		16
Total Credits		24

¹ Taken as applicable and/or available.

Electives. Of the 16 required credits in elective courses, 8 must be drawn from social science courses and 8 must be drawn from humanities courses, as listed of below. Confer with a program advisor to determine other applicable courses not listed below. Check for courses with Middle East–North Africa (MENA) themes listed in the Schedule of Classes each term; courses listed under MENA count toward the minor. In addition, students may petition the director of the minor for the inclusion of other applicable MENA-related courses that have at least 50 percent Middle East–North Africa content.

A minimum of 12 credits must be in upper-division courses (300 or 400 level). No more than 8 elective credits from any one department may count toward the minor. Courses must be taken from a minimum of three departments.

The social science and humanities elective course lists are not exhaustive, as new courses are added periodically. Other courses may

count toward these requirements. See the program advisor and/or the Middle East-North Africa studies entry in the Schedule of Classes for up-to-date information.

Social Science Electives

- Archaeology of Egypt and Near East (ANTH 342)
- Experimental Course: [Topic] (CRES 410) (Working Abroad)
- Israel and Palestine (CRES 435)
- Geography of the Middle East and North Africa (GEOG 209)
- Honors College Social Science Colloquium: [Topic] (HC 431H) (The Politics of Human Rights)
- Honors College International Cultures Colloquium: [Topic] (HC 434H) (Middle East Peace)
- The Crusades (HIST 322)
- The Iraq War (HIST 450)
- Islam and Global Forces (INTL 323)
- Development and the Muslim World (INTL 423)
- Israelis and Palestinians (JDST 340)
- Special Studies: [Topic] (PS 399) (Nuclear Politics of the Middle East)

Humanities Electives

- Second-Year Arabic (ARB 201), Second-Year Arabic (ARB 202), Second-Year Arabic (ARB 203)
- Language and Culture (ARB 301), Language and Culture (ARB 302), Language and Culture (ARB 303)
- Introduction to Arabic Culture (ARB 253)
- Reading Classical Arabic (ARB 331)
- Arab Cinema (ARB 353)
- Literature and Society (COLT 231) (if taught by Michael Allan)
- Comparative Comics (COLT 370) (if taught by Michael Allan)
- (COLT 461) (if taught by Michael Allan)
- Studies in Identity: [Topic] (COLT 470) (if taught by Michael Allan)
- Folklore and the Bible (FLR 350)
- Biblical Narrative (HBRW 311), Biblical Poetry (HBRW 312), Postbiblical Literature (HBRW 313)
- World Religions: Near Eastern Traditions (REL 102)
- Early Judaism (REL 211)
- Introduction to the Bible I (REL 222), Introduction to the Bible II (REL 223)
- Introduction to Islam (REL 233)
- Jesus and the Gospels (REL 317)
- History of Christianity (REL 321)
- History of Eastern Christianity (REL 324), History of Eastern Christianity (REL 325)
- Introduction to the Qur'an (REL 335)
- Experimental Course: [Topic] (REL 410) (Islamic Origins)
- Biblical Book: [Topic] (REL 414)
- Martyrdom (REL 418)
- Early and Medieval Christian Heresy (REL 424)
- (REL 426)
- Islamic Mysticism: [Topic] (REL 432)
- Multicultural Theater: [Topic] (TA 472) (Israeli and Palestinian Theater)

- Experimental Course: [Topic] (WGS 410) (Muslim Women: Life and Identity)

Concentration

In addition to the credit requirements above, students choose to complete one of the three following concentrations: language, study abroad, or research.

Language Concentration. Students must satisfactorily complete a minimum of one year of a MENA language: Arabic, Hebrew, Turkish, or Persian-Farsi. Language credits may be earned at the UO, through an approved overseas program, or transferred from another college or university. Students may also satisfy the language requirement by examination, demonstrating a level of competence equivalent to one year of college-level language.

Currently, Arabic and Hebrew are offered as regular UO language courses. Turkish and Persian-Farsi are offered through the Yamada Language Center. Students may earn university credit for courses taken at the Yamada Center (1–3 credits per term). In order to complete the minimum one-year requirement for Turkish and Persian, students must take the New York University 12-point Foreign Language Proficiency Examination. Students who receive 12 points on the exam have satisfactorily completed the minimum one-year language requirement.

In addition, students may complete a second year of a MENA language and apply 8 credits of this work toward satisfaction of the humanities credits requirements.

Study-Abroad or Internship Concentration. Students spend a minimum of one term in an approved study-abroad or internship program in a Middle Eastern–North African country.

Currently, there are 19 study-abroad programs offered through the UO, in Jordan, Morocco, Israel, Turkey, and Tunisia. All of these programs meet the study-abroad requirement option. Other programs through accredited universities and organizations may be accepted for university credit and for the study-abroad requirement option. For these programs to count toward the concentration, the student must meet with the minor advisor. Students planning on the study-abroad or internship option must meet with the program advisor to discuss the study-abroad program that fits with the objectives of the minor.

The UO participates in IE₃ Global, which offers internships in Tunisia and which count toward the study-abroad or internship requirement. Other internship possibilities may be available. For these programs to count toward the concentration, the student must meet with the minor advisor and have it approved before signing up for the internship program.

Once students return from their study-abroad or internship experience, they must write a five- to six-page reflection of their experiences abroad, to be read and approved by the minor advisor. As noted, the minor advisor must approve courses taken abroad and the structure and content of an internship in advance. With the approval of the advisor, up to 8 credits taken abroad may count toward the overall minor requirement of 24 credits.

Research Concentration. Students write a high-quality, 15- to 20-page research paper on a MENA-related topic. For this pathway, students work with a professor who guides their research, monitors their progress, and approves their completed research paper. To research and write their paper, students may select to enroll in a 401 (Research) or 405 (Reading

and Conference) course. Four credits of 401 or 405 may apply to the 24-credit requirement.

Native American Studies

Brian Klopotek, Program Director

541-346-0900
541-346-0904 fax
104 Alder Building
5268 University of Oregon
Eugene, Oregon 97403-5268

The University of Oregon offers a minor in Native American studies, housed in the Department of Ethnic Studies.

Native American studies is an interdisciplinary field that uses multiple approaches—from history, anthropology, law, literature, ethnic studies, and other disciplines—to understand contemporary Native American lives, and to examine Native American identities, practices, histories, cultures, and political statuses in context from the earliest times until the present. Academically, the central goal of the minor in Native American studies is to inform students about the unique place of tribes in the state-tribal-federal intergovernmental matrix and about the myriad distinct issues native peoples of the United States face, from language and cultural protection to environmental issues to economic development and tribal sovereignty. In a state with nine federally recognized indigenous nations and a Native American population 50 percent higher proportionally than the national average, this is critical information for future leaders in all fields.

Undergraduate Studies

Students may earn a minor in Native American studies. The primary goal of the minor is to help students understand contemporary and historic native lives through attention to the politics, cultures, identities, and practices of Native American and indigenous peoples. A secondary goal of the program is to encourage student awareness of the ethnic and cultural dimensions and applications of other major fields. Students of literature, social sciences, education, urban planning, art history, humanities, international studies—to name only a few—find that related Native American studies courses can enrich their academic programs.

Courses applied to a minor in Native American studies may be used to satisfy major or minor requirements for other programs.

Specific details and course approvals must be obtained from the Native American Studies Program.

Requirements for the Minor

The Native American studies minor requires 28 credits. At least 16 credits must be taken in residence at the University of Oregon. Up to 4 credits may be counted toward the minor from a list of related courses that fall outside the core of Native American studies but that focus on other issues closely related to the field. Courses must be taken for a grade, and grades must be mid-C or higher to count toward the minor. The course load is distributed as follows:

Code	Title	Credits
ES 256	Introduction to Native American Studies	4
Additional Courses		24
16 credits must be in upper-division courses		
At least 4 credits focusing on Oregon Indians		

At least 4 credits in each of three distribution groups ¹

Up to 4 credits may be taken from a list of related courses approved by a program advisor

Total Credits 28

¹ Distribution groups: 1) culture, language, and education; 2) law, policy, governance, and history; 3) literature, media, and the arts.

Distribution Groups

Code	Title	Credits
Group 1: Culture, Language, and Education		
ANTH 310	Exploring Other Cultures: [Topic] (Oregon Indians)	4
ANTH 320	Native North Americans	4
EDST 456	Equal Opportunity: Decolonization	3
LING 399	Special Studies: [Topic] (Native Languages of Oregon)	1-5
LT 199	Special Studies: [Topic] (Sahaptin Language; Tolowa and Lushootseed Language)	1-5
PHIL 451	Native American Philosophy	4
Group 2: Law, Policy, Governance, and History		
ENVS 411	Environmental Issues: [Topic] (Climate Change and Indigenous Peoples)	4
ES 258	Introduction to Pacific Islander Studies	4
ES 350	Native Americans and the Environment	4
ES 399	Special Studies: [Topic] (Oregon Indians)	4
ES 407	Seminar: [Topic] (Native American Ethnohistory; Native American and African American Relations; Native-Latinx Relations)	4
ES 456	History of Native American Education	4
HC 444H	Honors College American Cultures Colloquium: [Topic] (Race and Ethnicity in the American West; North Paiute History)	4
HIST 399	Special Studies: [Topic] (Pacific Northwest Indians)	5
HIST 407	Seminar: [Topic] (Indian Nations in the United States)	5
HIST 468	The Pacific Northwest	4
HIST 469	American Indian History: [Topic]	4
PS 399	Special Studies: [Topic] (American Indian Politics)	1-5
Group 3: Literature, Media, and the Arts		
ENG 244	Introduction to Native American Literature	4
ENG 361	Native American Writers	4
ENG 381M	Film, Media, and Culture (Native American Film)	4
ENG 488	Race and Representation in Film: [Topic] (Native American Literature and Film)	4
ES 370	Race, Ethnicity, and Cinema: [Topic] (Native Americans and Film)	4
J 412	Issues in Communication Studies: [Topic] (American Indians and the Media)	4

TA 472	Multicultural Theater: [Topic] (Native American Theater)	4
--------	--	---

Code	Title	Credits
Related Courses		4
ANTH 310	Exploring Other Cultures: [Topic] (Indigenous Immigrants in Oregon) (Group 1)	
ANTH 344	Oregon Archaeology (Group 1)	
ANTH 434	Native South Americans (Group 1)	
ANTH 442	Northwest Coast Archaeology (Group 1)	
ANTH 443	North American Archaeology (Group 1)	
HIST 482	Aztecs and Incas (Group 2)	

Neuroscience

David A. McCormick, Director

541-346-4556

Institute of Neuroscience

222 Huestis Hall

1254 University of Oregon

Eugene, Oregon 97403-1254

Graduate Studies

Neuroscience is the interdisciplinary study of neural function, development, and behavior. At the University of Oregon, the graduate training program in neuroscience is centered in the Institute of Neuroscience. Participating faculty members are drawn from the Departments of Biology, Human Physiology, and Psychology.

Curriculum

First-year graduate students take one of two core sequences:

1. cellular, systems, and cognitive neuroscience
2. developmental, molecular, and genetic neuroscience

The core sequences are taught cooperatively by the faculty. Most students also take elective courses in a variety of subjects.

Faculty-Student Seminars

Faculty members and graduate students participate in weekly informal seminars that feature lively discussion of research papers in specific areas of neuroscience. Students and faculty members also participate in the neuroscience seminar, a weekly series featuring visiting scientists. The purpose of the neuroscience seminar is to keep both the faculty and students abreast of current developments in this broad field.

Research

Students are encouraged to participate in laboratory research from the very beginning of their graduate training. A laboratory rotation program is directed toward this objective. In the rotation program, new students take part in the activities of a different laboratory group during each of the three terms of the first year. Participation may include a research project, ongoing experiments, or other activities. This program allows students to learn firsthand about different approaches to the study of neuroscience before choosing an area of concentration.

Doctoral Study

Students who want to enter the neuroscience program should apply to the PhD program of a participating department and indicate their interest in neuroscience. Typically, students interested in cognitive neuroscience apply to the psychology department; students interested in molecular, cellular, developmental, or systems neuroscience apply to the biology department. Such applications are reviewed by the neuroscience faculty as well as the departmental admission committee. Answers to specific questions about prerequisites and deadlines may be obtained by writing directly to one of the participating departments, University of Oregon, Eugene, Oregon 97403. Additional information about the Institute of Neuroscience may be obtained from the institute website. See also the Institute of Neuroscience section in the **Research Centers and Institutes** (p. 955) area of this catalog.

Courses

Biology. Cell Biology (BI 322), Sensory Physiology (BI 353), Animal Physiology (BI 356), Neurobiology (BI 360), Special Studies: [Topic] (BI 399) (Cellular Biology of the Senses), Experimental Course: [Topic] (BI 410) (Computational Neuroscience), Protein Toxins in Cell Biology (BI 422), Systems Neuroscience (BI 461), Cellular Neuroscience (BI 463), Developmental Neurobiology (BI 466), Experimental Course: [Topic] (BI 510) (Computational Neuroscience), Protein Toxins in Cell Biology (BI 522), Systems Neuroscience (BI 561), Cellular Neuroscience (BI 563), Developmental Neurobiology (BI 566), Experimental Course: [Topic] (BI 610) (Advanced Cellular Neuroscience)

Human Physiology. Motor Control (HPHY 333), Experimental Course: [Topic] (HPHY 410) (Neurophysiology of Concussion), Experimental Course: [Topic] (HPHY 510) (Neurophysiology of Concussion), Experimental Course: [Topic] (HPHY 610) (Advanced Systems Neuroscience)

Psychology. Biopsychology (PSY 304), Brain Mechanisms of Behavior (PSY 445), Cognitive Neuroscience (PSY 449), Brain Mechanisms of Behavior (PSY 545), Cognitive Neuroscience (PSY 549), Experimental Course: [Topic] (PSY 610) (Advanced Cognitive Neuroscience)

Participating Faculty

Yashar Ahmadian, biology

Paul Dassonville, psychology

Chris Q. Doe, biology

Judith S. Eisen, biology

Santiago Jaramillo, biology

Clifford Kentros, psychology

Charles B. Kimmel, biology

Shawn R. Lockery, biology

Adam Miller, biology

Helen Neville, psychology

Cristopher Neill, biology

Michael I. Posner, psychology

John H. Postlethwait, biology

Matt Smear, psychology

Terry Takahashi, biology

Philip E. Washbourne, biology

Michael Wehr, psychology

Monte Westerfield, biology

Marjorie Woollacott, human physiology

Dasa Zeithamova, psychology

Pacific Island Studies

William S. Ayres, Program Director

541-346-5119

541-346-0668 fax

273 Condon Hall

1218 University of Oregon

Eugene, Oregon 97403-1218

The Pacific Island Studies Program, part of the Center for Asian and Pacific Studies, offers individualized programs of study and research related to islands and island cultures. The University of Oregon's long-standing educational and scholarly interest in the Pacific islands, involving active researchers and teachers in many fields, was formalized as a program committee in 1987 and it has worked since to coordinate instructional, research, and exchange programs related to the islands. The program emphasizes interdisciplinary perspectives essential for understanding natural and cultural environments, cultural history and change, and educational and contemporary socioeconomic issues in the Pacific.

Courses about the Pacific cover a range of topics. Students can enroll in undergraduate courses and advanced degree programs in various departments and through the Asian Studies Program. Students may also work with committee members from Pacific island studies toward an Interdisciplinary Studies: Individualized Program master's degree (MA or MS). Information is available in the Graduate School (p. 945) section of this catalog.

The Pacific island studies faculty participates in the Asian studies BA and MA degree programs by teaching courses that may be used to satisfy degree requirements (e.g., in developing a secondary cultural or geographical area with Southeast Asia). Undergraduate- and graduate-level courses are available in anthropology and archaeology, art history, biology, earth sciences, international studies, ethnic studies, and sociology. A small number of courses focus solely on the Pacific Islands, but a broader range includes courses related to islands and coastal communities.

The Pacific Islands Archaeological Project, directed by William S. Ayres and Scott Fitzpatrick, offers students opportunities to participate in archaeological and anthropological study in the Pacific. Members of the anthropology faculty offer a field school in archaeology.

Training in selected Pacific island languages is possible through individual study using tutors and materials developed for use at the Yamada Language Center. The center now has language-study modules

for Pohnpeian and Kosraen. Tutoring in Samoan and other island languages is possible.

Courses

Anthropology. New Guinea (ANTH 328), Pacific Islands Archaeology (ANTH 343), Workshop: [Topic] (ANTH 408) (Archaeology Field Schools: Micronesia and Caribbean), Experimental Course: [Topic] (ANTH 410) (Pacific Island Studies; Polynesian Archaeology), (ANTH 440), Workshop: [Topic] (ANTH 508) (Archaeology Field Schools: Micronesia and Caribbean), (ANTH 540)

Earth Sciences. Oceanography (GEOL 307)

Sociology. Sociology of Developing Areas (SOC 450)

Approved Seminars (407, 507) and Experimental Courses (410, 510) are other possibilities in these and other departments.

Program Committee

William S. Ayres, anthropology

Aletta Biersack, anthropology

Scott Fitzpatrick, anthropology

Richard G. Hildreth, law

Judith Raiskin, women's, gender, and sexuality studies

Richard A. Sundt, history of art and architecture

Stephanie 'Lani' Teves, ethnic studies

Peace Studies

Shaul E. Cohen, Committee Chair

541-346-4500

107G Condon Hall

The Peace Studies Program offers systematic study of peace—what it means and how it is achieved. Interdisciplinary in its orientation, the program encourages students to approach the problem of peace from a variety of viewpoints. The focus of the program addresses the conditions that give rise to violence and how to prevent them, the conditions that constitute alternatives to violence and how to promote them, and the strategies for achieving peace in its various forms.

The peace studies minor is available to university undergraduate students. There are no requirements for admission to the program.

Graduate students who want to concentrate on peace studies should contact a member of the steering committee. Most 400-level courses, including courses numbered 407 and 410, are offered for graduate credit under 500-level numbers.

Steering Committee

Shaul E. Cohen, geography

David A. Frank, honors college

Gregory McLauchlan, sociology

Undergraduate Studies

Minor Requirements

Code	Title	Credits
Core Courses		
Select three of the following:		12
INTL 250	Value Systems in Cross-Cultural Perspective	
PHIL 307	Social and Political Philosophy	
SOC 464	Systems of War and Peace	
Conditions That Give Rise to Violence		
Select two of the following:		8
HIST 240	War in the Modern World I	
HIST 241	War in the Modern World II	
SOC 345	Race and Ethnicity	
SOC 445	Sociology of Race and Ethnicity: [Topic]	
SOC 464	Systems of War and Peace	
Values and Arrangements Necessary to Transcend Violence		
Select one or two of the following:		4-8
GEOG 441	Political Geography	
INTL 250	Value Systems in Cross-Cultural Perspective	
PS 309	Political Ideologies	
SOC 450	Sociology of Developing Areas	
Strategies for Achieving Peace		
Select one or two of the following:		4-8
ANTH 314	Gender in Cross-Cultural Perspective	
HIST 350	American Radicalism	
HIST 351	American Radicalism	
INTL 420	Global Community Development	
INTL 421	Gender and International Development	
INTL 431	Cross-Cultural Communication	
PPPM 446	Socioeconomic Development Planning	
SOC 313	Social Issues and Movements	
Total Credits		32-36

Additional Requirements

A grade of mid-C or better must be earned in each of the eight courses taken to fulfill requirements for the peace studies minor.

Students may take a maximum of 9 credits of courses in any one department. With advisor's consent, students may substitute a course numbered 199, 407, 408, or 410 for one approved group-satisfying course for the minor.

Internships are offered through some of the departments listed.

More information is available from a cochair.

Philosophy

Daniela Vallega-Neu, Department Head

541-346-5549

541-346-5544 fax

211C Susan Campbell Hall

1295 University of Oregon
Eugene, Oregon 97403-1295

Philosophy asks fundamental questions about human identity, the nature of knowledge and reality, moral virtue and responsibility, the nature of community and political authority, aesthetic judgments and values, and other concepts central to the meaning and value of human existence. Through the study of primary texts and concrete issues, drawn from various historical periods and cultures, philosophy provides a means for reflection on actions, beliefs, and values while developing critical thinking, reading, and writing skills. Philosophy also strengthens the ability to reason, enlarges the imagination, and refines aesthetic sensitivity. A philosophical education thus offers excellent preparation for a broad range of careers that require critical intelligence and creative problem-solving as well as oral and written communication skills.

Faculty

Steven Brence, instructor (social and political philosophy, philosophy of film, ethics). BS, 1989, MA, 1993, PhD, 2001, Oregon. (2001)

Colin Koopman, Robert F. and Evelyn Nelson Wulf Professor in the Humanities; associate professor (political philosophy, pragmatism, genealogy). BA, 1997, Evergreen State College; MA, 1999, Leeds; PhD, 2006, McMaster. (2010)

Bonnie Mann, professor (feminist, Continental). BA, 1983, Portland State; PhD, 2002, State University of New York, Stony Brook. (2003)

Erin McKenna, professor (feminist theory, American pragmatism). BA, 1987, Claremont McKenna College; MA, 1990, PhD, 1992, Purdue. (2016)

Nicolae Morar, assistant professor (bioethics, philosophy of biology, ecology). BA, 2004, MA, 2005, Université Jean Moulin Lyon 3; PhD, 2011, Purdue. (2015)

Barbara Muraca, assistant professor (process philosophy, environmental and social philosophy, feminist philosophy). MA, 1998, Turin; PhD, 2008, Greifswald. (2019)

Scott L. Pratt, Dean of the Graduate School and professor of philosophy (American philosophy, history of philosophy, education). BA, 1981, Beloit; PhD, 1995, Minnesota. (1995)

Camisha Russell, assistant professor (critical philosophy of race, bioethics, African American philosophy). BA, 2000, American; MA, 2008, Memphis; PhD, 2013, Penn State. (2017)

Beata Stawarska, professor (phenomenology, Continental, philosophical psychology). BA, 1992, MA, 1994, PhD, 2000, Louvain. (2003)

Alejandro Vallega, associate professor (Latin American philosophy, Continental philosophy, aesthetics). BA, 1993, Saint John's College; MA, 1996, Boston; PhD, 1999, Vienna. (2010)

Daniela Vallega-Neu, professor (19th- and 20th-century European philosophy, history of philosophy, phenomenology). BA, 1984, European School, Varese; MA, 1992, PhD, 1995, Universitat Freiburg. (2010)

Peter Warnek, associate professor (ancient philosophy, 19th- and 20th-century Continental philosophy, Kant). BA, 1986, Seattle; MA, 1990, Villanova; PhD, 1998, Vanderbilt. (1999)

Naomi Zack, professor (race, feminism, disaster). BA, 1966, New York University; PhD, 1970, Columbia. (2001)

Rocio Zambrana, associate professor (German idealism, critical theory, "decolonial" thought). BA, 2001, Puerto Rico; MA, 2004, PhD, 2010, New School for Social Research. (2010)

Emeriti

William E. Davie, associate professor emeritus. BA, 1964, Washington (Seattle); PhD, 1969, California, Irvine. (1968)

Mark Johnson, professor emeritus. BA, 1971, Kansas; MA, 1972, PhD, 1977, Chicago. (1994)

Don S. Levi, professor emeritus. BA, 1956, Wisconsin, Madison; MA, 1961, PhD, 1962, Harvard. (1964)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Studies

The department offers bachelor of arts (BA) and bachelor of science (BS) degree programs. University degree requirements are listed in the **Bachelor's Degree Requirements** section of this catalog and in the schedule of classes. Declaration of a major may be accomplished online by completing a form available on the department website.

Major Requirements

Course work for the major in philosophy must be passed with grades of C– or better or P (pass). No more than 8 credits may be taken pass/no pass.

Bachelor of Arts Degree Requirements

Code	Title	Credits
PHIL 225	Introduction to Formal Logic	4

Honors in Philosophy

The philosophy honors program is designed to provide outstanding, highly motivated philosophy majors with the opportunity to develop their skills during the senior year through the independent exploration of a special topic of their own choosing under the guidance of a faculty mentor. To be eligible for admission to the honors program, students must have completed at least 24 credits in philosophy, at least 12 of which have been taken at the University of Oregon. The honors candidate's grade point average (GPA) in philosophy must be at least 3.50, maintained through graduation. To graduate with honors, the candidate must fulfill the following requirements:

Courses

Besides the courses required of majors, a candidate for departmental honors must take at least 16 of the 52 credits in philosophy at the 400 level.

Senior Thesis

The candidate must write an honors thesis under the guidance of a member of the philosophy faculty chosen as thesis advisor. The thesis must demonstrate the student's ability to formulate a significant research problem, research primary resources, interpret sources with imagination and technical skill, and present the finished work in a form meeting professional standards in philosophy. The thesis must be approved by a thesis committee consisting of two faculty members from the philosophy department. Approval of the thesis depends in part on a public defense attended by the committee.

Upon fulfilling these requirements, the candidate is approved to receive a bachelor's degree with honors in philosophy.

Minor Requirements

Minor in Philosophy

Code	Title	Credits
Select two of the following:		8
PHIL 310	History of Philosophy: Ancient and Medieval	
PHIL 311	History of Philosophy: Modern	
PHIL 312	History of Philosophy: 19th Century	
Course on the work of a specific philosopher		4
Upper-division course		4
Two additional philosophy courses		8
Total Credits		24

Courses must be passed with grades of C– or better or P (pass). No more than 8 credits may be taken pass/no pass.

Minor in Ethics

Code	Title	Credits
PHIL 102	Ethics	4
or PHIL 323	Moral Theory	
Five ethics-related courses chosen from the following (or from additional rotating topics courses):		20
PHIL 102	Ethics	
PHIL 120	Ethics of Enterprise and Exchange	
PHIL 123	Internet, Society, and Philosophy	
PHIL 130	Philosophy and Popular Culture	
PHIL 170	Love and Sex	
PHIL 216	Philosophy and Cultural Diversity	
PHIL 220	Food Ethics	
PHIL 307	Social and Political Philosophy	
PHIL 308	Social and Political Philosophy	
PHIL 309	Global Justice	
PHIL 315	Introduction to Feminist Philosophy	
PHIL 323	Moral Theory	
PHIL 330	Philosophy and Disaster	
PHIL 335	Medical Ethics	
PHIL 340	Environmental Philosophy	
PHIL 342	Introduction to Latin American Philosophy	
PHIL 343	Critical Theory	
PHIL 344	Introduction to Philosophy of Law	
ENVS 345	Environmental Ethics	
PHIL 443	Feminist Philosophy: [Topic]	
PHIL 451	Native American Philosophy	
PHIL 452	Philosophy and Race	

Courses must be passed with grades of C– or better or P (pass). No more than 8 credits may be taken pass/no pass. Twelve credits must be taken at the upper-division level, 4 credits of which must be at the 400 level.

A minimum of 12 upper-division credits must be taken in residence at the University of Oregon.

Students with a major in philosophy may not earn a minor in ethics (although minoring in both ethics and philosophy is permitted).

The minor will be awarded beginning fall 2015; students with course work earned prior to fall 2015 will be permitted to use that course work toward the requirements for the minor.

Diversity Focus

The diversity focus in philosophy gives students the opportunity to combine diversity courses in race, gender, and class with lectures, events, and workshops to earn formal recognition of focused philosophical study in diversity. The program must be completed within four years of the time the student signed up.

Requirements for Students Majoring or Minor-ing in Philosophy or Minor-ing in Ethics

Code	Title	Credits
PHIL 399	Special Studies: [Topic] (Philosophy and Diversity)	1-5
Select two diversity-related courses from the following: ¹		
PHIL 110	Human Nature	
PHIL 170	Love and Sex	
PHIL 213	Asian Philosophy	
PHIL 216	Philosophy and Cultural Diversity	
PHIL 315	Introduction to Feminist Philosophy	
PHIL 342	Introduction to Latin American Philosophy	
PHIL 443	Feminist Philosophy: [Topic]	
PHIL 451	Native American Philosophy	
PHIL 452	Philosophy and Race	
Documented attendance at six diversity-related events on campus or an equivalent event as approved by the diversity focus administrator		

¹ Students may substitute other topics courses or an equivalent course on this theme with the approval of the diversity focus administrator.

Requirements for All Other Students

Code	Title	Credits
PHIL 399	Special Studies: [Topic] (Philosophy and Diversity)	1-5
Select three diversity-related courses from the following: ¹		
PHIL 110	Human Nature	
PHIL 170	Love and Sex	
PHIL 213	Asian Philosophy	
PHIL 216	Philosophy and Cultural Diversity	
PHIL 315	Introduction to Feminist Philosophy	
PHIL 342	Introduction to Latin American Philosophy	
PHIL 443	Feminist Philosophy: [Topic]	
PHIL 451	Native American Philosophy	
PHIL 452	Philosophy and Race	
Documented attendance at six diversity-related events on campus or an equivalent event as approved by the diversity focus administrator		

¹ Students may substitute other topics courses or an equivalent course on this theme with the approval of the diversity focus administrator.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- **Master of Arts: Distribution** (p. 436)
- **Master of Arts: Thesis** (p. 437)
- **Doctor of Philosophy**

Graduate Studies

The department offers a graduate program leading to the master of arts (MA) and the doctor of philosophy (PhD) degrees. The program, which is pluralistic in orientation, requires students to develop a broad knowledge of the history of philosophy, major fields, and various approaches and methods. Students are urged to concentrate in a specific area at the advanced level. Specializations are supported in American philosophy, Continental philosophy, feminist philosophy, Latin American philosophy, philosophy of race, philosophical psychology, and environmental philosophy.

Each student designs a program in consultation with the graduate advisor. Two or more years are typically required for completing the MA degree, and five or more years are typically required for completing the PhD degree. A complete and detailed list of the university and department requirements for graduate degrees is available online through the department website.

Master of Arts Degree Requirements

The master's program is designed to prepare students for PhD research or other professional pursuits through providing a broad background in the history of philosophy and recent developments in the areas of philosophy that are strengths of the department.

There are two paths to earning a master's degree. The first requires completion of the second-language requirement and 48 credit hours of graduate course work including the distribution requirements (listed below). The second requires satisfaction of the second-language requirement, completing 45 credits of graduate course work—9 of which are taken in Thesis (PHIL 503)—and the writing of a master's thesis under the direction of a thesis advisor with a second faculty reader.

The distribution requirements may be satisfied by receiving a mid-B or better in

- two courses in each of three interdisciplinary fields: society and value; knowledge, rationality, and inquiry; and metaphysics
- one course from each of three out of the four historical periods: ancient and medieval, modern (16th–18th centuries), 19th century, and 20th and 21st centuries
- two courses from each of the four philosophical traditions—continental, analytic, American, and feminist—that ground the diverse philosophical perspectives of the department, one of which is a proseminar taken within the first two years of graduate study

- one course in one of four requirement areas: Asian philosophy, philosophy of race, Native American philosophy, and Latin American philosophy

A single course may count toward each of two categories, but no more than once in a single category. For example, a course may count in a subdisciplinary field such as metaphysics, and, at the same time, apply to the history requirement or the traditions requirement.

Master of Arts: Distribution

Code	Title	Credits
Subdisciplinary Requirements		
	Two courses about society and value	8
	Two courses about knowledge, rationality, and inquiry	8
	Two courses about metaphysics	8
History Requirements		
	Select three of the following:	12
	Course from ancient and medieval period	
	Course from modern (16th-18th centuries) period	
	Course from 19th century	
	Course from 20th and 21st centuries	
Traditions Requirements		
	Two courses about continental philosophical traditions ¹	8
	Two courses about analytic philosophic traditions ¹	8
	Two courses about American philosophical traditions ¹	8
	Two courses about feminist philosophical traditions ¹	8
Requirements Areas		
	Select one of the following:	4
	Course in Asian philosophy	
	Course in philosophy of race	
	Course in Native American philosophy	
	Course in Latin American philosophy	
Total Credits		72

¹ One philosophical tradition course must be a proseminar taken within the first two years of graduate study.

For the thesis requirement, the student asks two faculty members to serve as his or her master's committee, with one agreeing to serve as chair. The student prepares a short (maximum five pages) description of the proposed thesis topic. Once both committee members have approved the thesis proposal, the student registers for as many as 9 credits of Thesis (PHIL 503) during the one or two terms over which the thesis is written. Typically, the committee chair meets periodically with the student to assess progress and to oversee the writing of the thesis. When both members of the thesis committee agree that the thesis is suitable for a final defense, the candidate schedules a one-hour oral examination, during which the committee members ask questions about the argument and make suggestions for further revision, if necessary. The thesis is completed when it is given final approval by both members of the committee and is accepted by the Graduate School as satisfying its requirements for thesis preparation.

Master of Arts: Thesis

Code	Title	Credits
PHIL 503	Thesis	9
Additional graduate-level philosophy courses		36
Total Credits		45

Additional Requirement

Students must complete the second-language requirement.

The student asks two faculty members to serve as his or her master's committee, with one agreeing to serve as chair. The student prepares a short (maximum five pages) description of the proposed thesis topic. Once both committee members have approved the thesis proposal, the student registers for Thesis (PHIL 503) during the one or two terms over which the thesis is written. Typically, the committee chair meets periodically with the student to assess progress and to oversee the writing of the thesis. When both members of the thesis committee agree that the thesis is suitable for a final defense, the candidate schedules a one-hour oral examination, during which the committee members ask questions about the argument and make suggestions for further revision, if necessary. The thesis is completed when it is given final approval by both members of the committee and is accepted by the Graduate School as satisfying its requirements for thesis preparation.

Doctor of Philosophy

The PhD degree requires a minimum of 81 credits of graduate-level course work, of which 18 must be in Dissertation (PHIL 603). Students must complete a logic requirement, demonstrate proficiency in a second language, complete the four course distribution requirements, and pass two comprehensive examinations—extensive research projects, one in history (a paper) and one in the student's area of specialization (a literature review). Most students finish their doctoral degrees within five to six years. The Graduate School imposes a limit of seven years for completion of the PhD degree.

The distribution requirements may be satisfied by receiving a mid-B or better in

- two courses in each of three subdisciplinary fields: society and value; knowledge, rationality, and inquiry; and metaphysics
- one course from each of the four historical periods: ancient and medieval, modern (16th–18th centuries), 19th century, and 20th and 21st centuries
- two courses from each of the four philosophical traditions—continental, analytic, American, and feminist—that ground the diverse philosophical perspectives of the department, one of which is a proseminar taken within the first two years of graduate study
- one course in one of four requirement areas: Asian philosophy, philosophy of race, Native American philosophy, and Latin American philosophy

A single course may count toward each of two categories, but no more than once in a single category.

Course in Native American philosophy	
Course in Latin American philosophy	

Dissertation

PHIL 603	Dissertation	18
Total Credits		90

¹ One philosophical tradition course must be a proseminar taken within the first two years of graduate study.

Additional Requirements

The comprehensive examinations are passed by completing two substantial research papers under the supervision of faculty members. Students are advanced to candidacy upon completion of the comprehensives. A dissertation prospectus must be accepted by the candidate's committee after a preliminary oral examination. The written dissertation must receive the approval of the dissertation committee after a final oral examination.

Admission

Applicants for admission to graduate studies are asked to write a brief letter explaining their philosophical background and their specific philosophical interests. This helps the department's admissions committee decide whether this is an appropriate philosophy department for the applicant's goals. They should also submit a writing sample, a college transcript, and a notification of their scores on the Graduate Record Examinations (GRE). International students must provide proof of competence in English. A score of at least 500 on the Test of Spoken English (TSE), 26 on the Internet-based Test of English as a Foreign Language (TOEFL), or 7 on the International English Language Testing System (IELTS) is required of international students unless their native language is English.

In addition to general university regulations governing graduate admission (see the **Graduate School** section of this catalog), the Department of Philosophy requires applicants to submit three confidential report forms completed by teachers (preferably philosophy teachers) familiar with the applicant's academic background.

The application process is exclusively online; a link to the application guidelines is posted on the department website. Applicants who are unable to make the application fee payment online with Visa, Discover, or MasterCard may now pay online with a check. This application and one complete set of transcripts, together with the application fee (\$70 for domestic applicants, \$90 for international applicants), should be sent

to the Office of Admissions, 1217 University of Oregon, Eugene OR 97403-1217. A second set of transcripts should be uploaded to GradWeb (<https://gradweb.uoregon.edu>). Confidential report forms should be sent directly to the department by the faculty members recommending the applicant if they are unable to upload their letters of recommendation.

Graduate teaching fellowships are the only form of financial aid available in the philosophy department; the application deadline is January 2 for the following academic year. An application form is provided upon request.

Courses

PHIL 101. Philosophical Problems. 4 Credits.

Introduction to philosophy based on classical and modern texts from Plato through the 21st century. Sample topics include free will, the mind-body problem, the existence of an external world.

PHIL 102. Ethics. 4 Credits.

Philosophical study of morality (e.g., ethical relativism; justification of moral judgments; concepts of duty, right, and wrong).

PHIL 103. Critical Reasoning. 4 Credits.

Introduction to thinking and reasoning critically. How to recognize, analyze, criticize, and construct arguments.

PHIL 110. Human Nature. 4 Credits.

Consideration of various physiological, cultural, psychological, and personal forces that characterize human beings, taking into account issues of class, gender, race, and sexual orientation.

PHIL 120. Ethics of Enterprise and Exchange. 4 Credits.

Moral examination of business by considering the nature of enterprise and exchange. Topics include corporate and consumer responsibility, meaningful work, and leadership.

PHIL 123. Internet, Society, and Philosophy. 4 Credits.

Introduction to philosophical problems of the Internet. Primary focus on social, political, and ethical issues with discussion of epistemological and metaphysical topics.

PHIL 130. Philosophy and Popular Culture. 4 Credits.

Engages in critical philosophical reflection about and through popular culture, including movies, music, graphic novels, and sports.

PHIL 170. Love and Sex. 4 Credits.

Philosophical study of love, relationships, marriage, sex, sexuality, sexual identity, and sexual representation.

PHIL 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PHIL 211. Existentialism. 4 Credits.

Basic ideas of the Christian and atheistic divisions of the existentialist movement; some attention to the philosophical situation that generated the existentialist rebellion.

PHIL 213. Asian Philosophy. 4 Credits.

Introduction to classic writings in the Chinese, Indian, Japanese, and other Asian philosophical traditions.

PHIL 216. Philosophy and Cultural Diversity. 4 Credits.

Philosophical investigation of the implications of cultural diversity for identity, knowledge, and community, from the perspectives of several American cultures.

PHIL 220. Food Ethics. 4 Credits.

Examination of a variety of issues relating to food production and consumption in light of virtue, utilitarian, deontological, pragmatist, and care ethics.

PHIL 225. Introduction to Formal Logic. 4 Credits.

Introduces formal logic, including both propositional (sentence) and predicate logic, including the use of truth trees. Students cannot receive credit for both PHIL 225 and MATH 307.

PHIL 307. Social and Political Philosophy. 4 Credits.

Major social and political theorists from Plato through Marx. Inquiry into such ideas as justice, natural law, natural rights, and the social contract.

PHIL 308. Social and Political Philosophy. 4 Credits.

Major social and political theorists from Plato through Marx. Inquiry into such ideas as justice, natural law, natural rights, and the social contract.

PHIL 309. Global Justice. 1-4 Credits.

Introduction to philosophical problems of globalization and justice related to global poverty, citizenship, human rights, and issues of identity, multiculturalism, war, terrorism, environmentalism and health care.

PHIL 310. History of Philosophy: Ancient and Medieval. 4 Credits.

Focuses primarily on Plato and Aristotle. Examines their roots in pre-Socratic philosophy and their influence on medieval philosophers such as St. Augustine and St. Thomas Aquinas.

Prereq: one lower-division philosophy course.

PHIL 311. History of Philosophy: Modern. 4 Credits.

Survey of European philosophy through Hume, including the work of Descartes, Locke, and Spinoza.

Prereq: one course from Philosophy.

PHIL 312. History of Philosophy: 19th Century. 4 Credits.

Traces Kant's influence on such philosophers as Hegel, Nietzsche, and Marx.

Prereq: one philosophy course.

PHIL 315. Introduction to Feminist Philosophy. 4 Credits.

Introduces basic questions of philosophy through topics central to feminism.

PHIL 320. Philosophy of Religion. 4 Credits.

Philosophical investigation of the nature of "religion" (e.g., the nature of the sacred, spirituality, and transcendence).

Prereq: one philosophy course.

PHIL 322. Philosophy of the Arts. 4 Credits.

Survey of classical and contemporary theories of art and aesthetic experience, with examples from various arts.

Prereq: one philosophy course.

PHIL 323. Moral Theory. 4 Credits.

Study of the most important traditional ethical theories; modern philosophical analysis of moral terms and statements.

Prereq: one philosophy course.

PHIL 325. Logic, Inquiry, and Argumentation. 4 Credits.

Explores the means and ends of argumentation and inquiry by considering deductive reason, argumentation and emotion, and ethical and social dilemmas in inquiry.

Prereq: one philosophy course.

PHIL 330. Philosophy and Disaster. 4 Credits.

Philosophical and interactive course on disaster preparation, with contemporary, historical, and current event readings; students also learn a new practical skill. Offered alternate years.

PHIL 331. Philosophy in Literature. 4 Credits.

Selective study of major philosophical ideas and attitudes expressed in the literature of Europe and America.

Prereq: one philosophy course.

PHIL 332. Philosophy of Film. 4 Credits.

Explores questions about the aesthetic dimensions of film, its relation to the other arts, and the treatment of philosophical questions in films.

PHIL 335. Medical Ethics. 4 Credits.

Introduces theoretical tools and concrete case studies for formulating, analyzing, and evaluating ethical judgments raised by contemporary biomedical practice.

PHIL 339. Introduction to Philosophy of Science. 4 Credits.

Examines theories of scientific practice, rationality, objectivity, values in science, and the role of science in society.

Prereq: one philosophy course.

PHIL 340. Environmental Philosophy. 4 Credits.

Considers the nature and morality of human relationships with the environment (e.g., the nature of value, the moral standing of nonhuman life).

PHIL 342. Introduction to Latin American Philosophy. 4 Credits.

History of Latin American philosophy through the study of ideas, issues, problems, and forms of thinking in the work of key periods, movements, and authors.

PHIL 343. Critical Theory. 4 Credits.

Examines the methodological, epistemological, moral, and political dimensions of critical theory. Prereq: one philosophy course. Offered alternate years.

PHIL 344. Introduction to Philosophy of Law. 4 Credits.

Introduces central problems in the law; examines the nature of legal reasoning.

PHIL 345. Place in the Cosmos. 4 Credits.

Explores the relation between humans and the cosmos as a matter of place by comparing seminal texts in the history of philosophy. Offered alternate years.

PHIL 350. Metaphysics. 4 Credits.

Traditional issues in metaphysics selected from among such topics as substance, existence, time, causation, God, the nature of individuals, and the meaningfulness of metaphysics.

Prereq: one philosophy course.

PHIL 372. Teaching Children Philosophical Inquiry. 4 Credits.

Explores ways to tap into children's wonder and curiosity about their world, lives, and relationships. Teaches undergraduates to become skillful facilitators of elementary classroom philosophical discussions.

PHIL 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PHIL 401. Research: [Topic]. 1-21 Credits.

Repeatable.

PHIL 403. Thesis. 1-12 Credits.

Repeatable.

PHIL 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

PHIL 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Eastern Philosophy, Feminist Theory, Nonviolence.

Prereq: one 300-level philosophy course.

PHIL 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PHIL 415. Continental Philosophy: [Topic]. 4 Credits.

Survey of significant areas in the Continental tradition, e.g. phenomenology, critical social theory, deconstruction, feminism, and hermeneutics. Repeatable when topic changes.

Prereq: junior standing.

PHIL 420. American Philosophy: [Topic]. 4 Credits.

Survey of significant areas of the American tradition, e.g. 19th-, 20th-, and 21st-century thought, African and Native American thought, feminism, recent pragmatism, the self, and pluralism. Repeatable when topic changes.

Prereq: junior standing.

PHIL 421. Ancient Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher, typically Plato or Aristotle. Repeatable when philosopher changes.

Prereq: PHIL 310.

PHIL 423. Technology Ethics: [Topic]. 4 Credits.

Advanced inquiry in ethics with a focus on technology. Addresses moral, political, and cultural issues raised by socio-technical systems for everyday living and democratic citizenship. Repeatable once for a maximum of 8 credits when the topic changes.

PHIL 425. Philosophy of Language. 4 Credits.

Philosophical theories of language and meaning, with special attention to the nature of concepts and reasoning.

Prereq: junior standing.

PHIL 433. 17th- and 18th-Century Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher, typically Descartes, Locke, Hume, Leibniz, Berkeley, or Kant. Repeatable when philosopher changes.

Prereq: PHIL 310, 311.

PHIL 443. Feminist Philosophy: [Topic]. 4 Credits.

Repeatable. Examines contemporary feminist contributions to philosophy. Repeatable once for maximum of 8 credits.

Prereq: one 300-level PHIL course

PHIL 451. Native American Philosophy. 4 Credits.

Survey of Native American philosophy focusing on philosophical perspectives in historical traditions and contemporary Native American philosophy. Offered alternate years.

PHIL 452. Philosophy and Race. 4 Credits.

Surveys the philosophical contribution to studies of race including intellectual history, philosophy of science, racism and its remedies, media studies, and cultural criticism.

Prereq: one philosophy course at the 300 level.

PHIL 453. 19th-Century Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher, typically Hegel, Nietzsche, Marx, or Kierkegaard. Repeatable when philosopher changes.

Prereq: PHIL 312.

PHIL 463. 20th-Century Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher (e.g., Wittgenstein, Dewey, Quine, Merleau-Ponty, C.I. Lewis, or Foucault). Repeatable when philosopher changes.

Prereq: junior standing.

PHIL 503. Thesis. 1-16 Credits.

Repeatable.

PHIL 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Eastern Philosophy, Feminist Theory, Nonviolence, Philosophy and Race, Philosophy and Tragedy, Philosophy of Education, Philosophy of Nature.

PHIL 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PHIL 521. Ancient Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher, typically Plato or Aristotle. Repeatable when philosopher changes.

PHIL 533. 17th- and 18th-Century Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher, typically Descartes, Locke, Hume, Leibniz, Berkeley, or Kant. Repeatable when philosopher changes.

PHIL 551. Native American Philosophy. 4 Credits.

Survey of Native American philosophy focusing on philosophical perspectives in historical traditions and contemporary Native American philosophy. Offered alternate years.

PHIL 553. 19th-Century Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher, typically Hegel, Nietzsche, Marx, or Kierkegaard. Repeatable when philosopher changes.

PHIL 563. 20th-Century Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher (e.g., Wittgenstein, Dewey, Quine, Merleau-Ponty, C.I. Lewis, or Foucault). Repeatable when philosopher changes.

PHIL 601. Research: [Topic]. 1-16 Credits.

Repeatable.

PHIL 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

PHIL 603. Dissertation. 1-16 Credits.

Repeatable.

PHIL 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

PHIL 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Emerson, Philosophy of Race, Recent Moral Theory, Schelling.

PHIL 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PHIL 614. Issues in Ethics. 4 Credits.

Examination of ethical theory.

Prereq: major standing.

PHIL 615. Continental Philosophy: [Topic]. 4 Credits.

Explores philosophical problems and traditions in contemporary European philosophy. Repeatable when topic changes.

PHIL 620. American Philosophy: [Topic]. 4 Credits.

Treats issues in classical and contemporary American philosophy. Repeatable when topic changes.

PHIL 625. Philosophy of Language. 4 Credits.

Philosophical theories of language and meaning, with special attention to the nature of concepts and reasoning.

PHIL 641. Social and Political Philosophy: [Topic]. 4 Credits.

Examination of classical and current problems in social and political philosophy including the nature of justice, legitimacy of the state, conditions of war and peace. Repeatable when topic changes.

PHIL 643. Feminist Philosophy: [Topic]. 4 Credits.

Explores contemporary feminist philosophy. Repeatable when topic changes.

PHIL 645. Environmental Philosophy: [Topic]. 4 Credits.

Pursues advanced questions in environmental philosophy regarding a particular tradition or problem area. Repeatable when topic changes.

PHIL 657. Philosophy and Race: Contemporary Issues. 4 Credits.

Examination of contemporary discussions regarding race including biology and race, race in medicine, reparations, perspectives on race in Continental and American philosophy.

PHIL 658. Philosophy of Mind. 4 Credits.

Analyzes basic concepts and problems in psychology.

PHIL 670. Issues in Metaphysics. 4 Credits.

Discussion of current controversies in metaphysics (e.g., essentialism, identity, future contingency).

Prereq: major standing.

Physics

Richard P. Taylor, Department Head

541-346-5861 fax

173 Willamette Hall

1274 University of Oregon

Eugene, Oregon 97403-1274

Physics, the most basic of the natural sciences, is concerned with the discovery and development of the laws that describe our physical universe. This endeavor serves, also, to directly benefit humankind: integrated circuits found in computers, mobile phones, and solar cells, lasers in DVD players and computer mice, and the Internet itself were developed from fundamental physics discoveries.

Faculty

Benjamín Alemán, assistant professor (experimental condensed matter, optical physics). BS, 2004, Oregon; MA, 2010, PhD, 2011, California, Berkeley. (2013)

David Allcock, assistant professor (ion trapping and quantum information). MS, 2007, PhD, 2012, Oxford. (2019)

Dietrich Belitz, professor (condensed matter theory). Dipl Phys, 1980, Dr.rer.nat., 1982, Technical University Munich. (1987)

Roger Haydock, professor (solid state theory). BA, 1968, Princeton; MA, PhD, 1972, ScD, 1989, Cambridge. (1982)

James N. Imamura, professor (astrophysics); director, Institute of Theoretical Science. BA, 1974, California, Irvine; MA, 1978, PhD, 1981, Indiana. (1985)

Laura Jeanty, assistant professor (high-energy physics). BS, 2006, Yale; MS, 2009, PhD, 2013, Harvard. (2018)

Stephen D. Kevan, professor (solid state physics). BA, 1976, Wesleyan; PhD, 1980, California, Berkeley. (1985)

Graham Kribs, professor (elementary particle theory). BASc, 1993, Toronto; PhD, 1998, Michigan, Ann Arbor. (2004)

Dean W. Livelybrooks, senior instructor (geophysics). BS, 1977, Massachusetts Institute of Technology; MS, 1984, PhD, 1990, Oregon. (1996)

Stephanie Majewski, associate professor (experimental elementary particle physics). BS, 2002, Illinois, Urbana-Champaign; PhD, 2007, Stanford. (2012)

Brian W. Matthews, professor (protein crystallography). BSc, 1959, BSc, 1960, PhD, 1964, Adelaide. (1969)

Benjamin McMorran, associate professor (experimental condensed matter, optical physics). BS, 2000, Oregon State; MS, PhD, 2009, Arizona. (2011)

Stanley J. Micklavzina, senior instructor (physics education). BS, 1982, MS, 1985, Oregon. (1985)

Jens Nöckel, associate professor (optical physics). Dipl. Phys., 1992, Hamburg; PhD, 1997, Yale. (2001)

Raghuvveer Parthasarathy, Alec and Kay Keith Professor (condensed matter physics, biophysics). BA, 1997, California, Berkeley; PhD, 2002, Chicago. (2006)

Jayson Paulose, assistant professor (condensed matter theory). AB, 2007, Princeton; SM, 2009, PhD, 2013, Harvard. (2018)

Michael G. Raymer, Philip H. Knight Professor (quantum optics and optical physics). BA, 1974, California, Santa Cruz; PhD, 1979, Colorado. (1988)

Stephen J. Remington, professor (protein crystallography). BS, 1971, Oregon State; PhD, 1977, Oregon. (1985)

William C. Scannell, lab instructor (physics education). BS, 2002, MS, 2004, PhD, 2010, Oregon. (2016)

James M. Schombert, Noble F. and Frances L. Miller Professor in Astrophysics (astronomy). BS, 1979, Maryland; MPhil, 1982, PhD, 1984, Yale. (1996)

Brian J. Smith, associate professor (quantum optics, optical physics). BA, 2000, Gustavus Adolphus College; PhD, 2007, Oregon. (2015)

Davison E. Soper, professor (elementary particle theory). BA, 1965, Amherst; PhD, 1971, Stanford. (1977)

Daniel Steck, associate professor (atom optics and nonlinear dynamics). BS, 1995, Dayton; PhD, 2001, Texas, Austin. (2004)

David M. Strom, professor (experimental elementary particle physics). BA, 1980, St. Olaf; PhD, 1986, Wisconsin, Madison. (1991)

Richard P. Taylor, professor (solid state physics). BS, 1985, PhD, 1988, Nottingham. CAD, 1995, Manchester School of Art; MA, 2000, New South Wales. (1999)

John J. Toner, professor (condensed matter theory). BS, 1977, Massachusetts Institute of Technology; MA, 1979, PhD, 1981, Harvard. (1995)

Eric Torrence, professor (experimental elementary particle physics). BS, 1990, Washington (Seattle); PhD, 1997, Massachusetts Institute of Technology. (2000)

Tristan S. Ursell, assistant professor (condensed matter physics, biophysics). BS, 2003, Rensselaer Polytechnic Institute; MS, 2003, PhD, 2009, California Institute of Technology. (2014)

Steven J. van Enk, professor (theoretical optical physics). MSc, 1988, Utrecht; PhD, 1992, Leiden. (2006)

Hailin Wang, professor (quantum optics); Alec and Kay Keith Chair. BS, 1982, Science and Technology (China); MS, 1986, PhD, 1990, Michigan. (1995)

David Wineland, research professor (atomic spectroscopy, quantum information, quantum-limited metrology). BA, 1965, California, Berkeley; MA, 1966, PhD, 1970, Harvard. (2018)

Tien-Tien Yu, assistant professor (high-energy physics). AB, 2007, Chicago; PhD, 2013, Wisconsin, Madison. (2017)

Research Faculty and Staff

Robert Schofield, senior research associate (nuclear biophysics). BS, 1982, Brigham Young; PhD, 1990, Oregon. (1993)

Nikolai Sinev, senior research associate (experimental high energy physics). BS, 1968, PhD, 1974, Moscow State. (1993)

Frank Vignola, senior research associate (solar energy). BA, 1967, California, Berkeley; MS, 1969, PhD, 1975, Oregon. (1977)

Emeriti

Rudolph C. Hwa, professor emeritus. BS, 1952, MS, 1953, PhD, 1957, Illinois; PhD, 1962, Brown. (1971)

Harlan Lefevre, professor emeritus. BA, 1951, Reed; PhD, 1961, Wisconsin. (1961)

Joel W. McClure Jr., professor emeritus. BS, 1949, MS, 1951, Northwestern; PhD, 1954, Chicago. (1954)

David K. McDaniels, professor emeritus. BS, 1951, Washington State; MS, 1958, PhD, 1960, Washington (Seattle). (1963)

John T. Moseley, professor emeritus. BS, 1964, MS, 1966, PhD, 1969, Georgia Institute of Technology. (1979)

George W. Rayfield, professor emeritus. BS, 1958, Stanford; PhD, 1964, California, Berkeley. (1967)

David R. Sokoloff, professor emeritus. BA, 1966, City University of New York, Queens; PhD, 1972, Massachusetts Institute of Technology. (1978)

Robert L. Zimmerman, professor emeritus. BA, 1958, Oregon; PhD, 1963, Washington (Seattle). (1966)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts: Applied Physics**
- **Bachelor of Arts: Teaching Physics** (p. 444)
- **Bachelor of Arts: Physics**
- **Bachelor of Science: Applied Physics**
- **Bachelor of Science: Teaching Physics**
- **Bachelor of Science: Physics**
- **Minor**

Undergraduate Studies

As it involves the development of analytical, technical, problem-solving, and science communication skills, a major in physics provides a good start for many career paths. In addition to major and minor programs, the Department of Physics offers a variety of courses for nonmajors and health science premajor students.

Preparation

Entering freshmen should have taken as much high school mathematics as possible in preparation for starting calculus in their freshman year. High school study of physics and chemistry is desirable.

Transfer Students

Because of the sequential nature of the physics curriculum, it is useful for students from two-year colleges to complete as much as possible of calculus, differential equations, several-variable calculus, chemistry, and calculus-based physics (part of an associate's degree) before transferring.

Years Completed Before Transfer	Suggested Completed Courses	UO Equivalent Courses
Two, more than two	One year of differential and integral calculus	MATH 251–253-253

Two, more than two	One year of calculus general physics with laboratory	PHYS 251–253-253, PHYS 290
Two, more than two	General chemistry	CH 221–222-222 or CH 224H–225H-225H
Two, more than two	One term of differential equations and two terms of multivariable calculus	MATH 256, MATH 281–282-282
More than two	Second year of physics	

Transfer students should also have completed as many as possible of the university requirements for the bachelor's degree (see Bachelor's Degree Requirements (<http://catalog.uoregon.edu/bachelorrequirements>)).

Careers

Fifty percent of graduates with bachelor's degrees in physics find employment in the private sector working as applied physicists, software developers, managers, or technicians, typically alongside engineers and computer scientists. About 30 percent of students who earn an undergraduate degree continue their studies in a graduate degree program, leading to a career in teaching or research or both at a university, at a government laboratory, or in industry. In addition, a degree in physics is good preparation for a career in business. Students who have demonstrated their ability with a good record in an undergraduate physics program are generally considered very favorably for admission to medical and other professional schools.

Major Requirements

The major in physics leads to a bachelor of arts (BA) or a bachelor of science degree (BS). Complete requirements are listed under **Bachelor's Degree Requirements**. The bachelor of arts degree has a second-language requirement. Knowledge of a language other than English is recommended for students planning graduate study in physics.

Required courses must be taken for letter grades and a grade point average of 2.00 (mid-C) or better must be earned in these courses. Courses beyond the minimum requirement may be taken pass/no pass (P/N). At least 20 of the upper-division credits must be completed in residence at the University of Oregon. Exceptions to these requirements must be approved by the physics director of undergraduate studies.

Undergraduate research is strongly encouraged. Laboratory courses such as Foundations of Physics Laboratory (PHYS 290) and Physics Experimentation Data Analysis Laboratory (PHYS 391) provide the correct foundation. Approximately 50 percent of physics undergraduates engage in substantive research during their course of study—typically beginning with Research Project I-III (PHYS 491–493). Contact the physics advisor for more information.

The sequential nature of physics courses makes it imperative to start planning a major program in physics early. Interested students should consult the advisor in the Department of Physics near the beginning of their studies. Sample programs are designed for students who are preparing for employment in industry and choose the applied physics emphasis or who are preparing for graduate studies and choose the physics emphasis. The programs assume that students are prepared to take calculus in their freshman year. Consult the physics advisor for assistance in planning a specific program adapted to a student's individual needs.

The department offers three areas of emphasis for the physics major.

- **physics**—designed for majors with a strong interest in studying physics in graduate school
- **applied physics**—designed for majors who seek a less theoretical study of physics and a more applied focus in optics, electronics, and other project areas
- **teaching physics**—designed for majors preparing to teach physical sciences in middle or high school

All physics majors have the same curriculum for the first two years.

Bachelor of Arts: Applied Physics

Code	Title	Credits
Core Courses		
MATH 251–253	Calculus I-III	12
	or MATH 261–263	Calculus with Theory I-III
PHYS 251–253	Foundations of Physics I	12
MATH 256	Introduction to Differential Equations	4
MATH 281–282	Several-Variable Calculus I-II	8

Sample Programs for Transfer Students

These sample programs are for transfer students who have completed two years of college work including one year of calculus, one year of general physics with laboratories, one year of general chemistry, and as many as possible of the university requirements for the bachelor's degree. In addition to graduation requirements for the bachelor's degree, transfer students should plan to take the following courses, depending on their area of emphasis:

Applied Physics Emphasis

Third Year		Credits
MATH 256	Introduction to Differential Equations	4
MATH 281–282	Several-Variable Calculus I-II	8
PHYS 351–353	Foundations of Physics II	12
PHYS 391	Physics Experimentation Data Analysis Laboratory	4
Fourth Year		
PHYS 412–413	Mechanics, Electricity, and Magnetism	8
PHYS 422	Electromagnetism	4
PHYS 424 & PHYS 425	Classical Optics	8
Select one or two of the following:		4-8
PHYS 431	Analog Electronics	2-4
PHYS 432	Digital Electronics	2-4
PHYS 491	Research Project I	2-4
PHYS 492	Research Project II	2-4

PHYS 493	Research Project III	2-4
Total Credits:		52-56

Teaching Physics Emphasis

Third Year		Credits
ASTR 321	Topics in Astrophysics	4
PHYS 362	Biological Physics	4
PHYS 409	Supervised Tutoring	6
PHYS 431 & PHYS 432	Analog Electronics	8
Fourth Year		
PHYS 491–493	Research Project I-III	8
Total Credits:		30

Physics Emphasis

Third Year		Credits
MATH 256	Introduction to Differential Equations	4
MATH 281–282	Several-Variable Calculus I-II	8
PHYS 351–353	Foundations of Physics II	12
PHYS 391	Physics Experimentation Data Analysis Laboratory	4
Fourth Year		
PHYS 411–413	Mechanics, Electricity, and Magnetism	12
PHYS 414–415	Quantum Physics	8
PHYS 417	Topics in Quantum Physics	4
PHYS 422	Electromagnetism	4
Select one or two of the following:		4-8
PHYS 424	Classical Optics	4
PHYS 425	Modern Optics	4
PHYS 431	Analog Electronics	4
PHYS 432	Digital Electronics	4
PHYS 491	Research Project I	4
PHYS 492	Research Project II	4
PHYS 493	Research Project III	4
Mathematics or physics electives or both		8
Total Credits:		68-72

Honors

To be recommended by the faculty for graduation with honors in physics, a student must complete at least 46 credits in upper-division physics courses, of which at least 40 credits must be taken for letter grades, and earn at least a 3.50 grade point average in these courses.

As an alternative, undergraduate research leading to the defense of a thesis accompanied by at least a 3.30 grade point average can lead to recommendation for graduation with honors. Contact the director of undergraduate studies for more information.

Minor Requirements

Code	Title	Credits
Pre-Minor Requirements		
PHYS 251–253	Foundations of Physics I ¹	12
or PHYS 201–203	General Physics	
Required Courses		
PHYS 351–353	Foundations of Physics II	12
or PHYS 411–413	Mechanics, Electricity, and Magnetism	
Select one of the following:		4
PHYS 391	Physics Experimentation Data Analysis Laboratory	
400-level physics course		
Physics courses		8
Total Credits		36

¹ General Physics (PHYS 201–203) may fulfill requirements with the physics undergraduate advisor's approval.

Additional Requirements

Course work must be completed with grades of C– or better or P. At least 12 of the upper-division credits must be completed in residence at the University of Oregon.

Engineering

Students interested in engineering may complete preparatory course work at the University of Oregon before enrolling in a professional engineering program at another institution. The Department of Physics coordinates a three-plus-two program that allows a student to earn a bachelor's degree in physics from Oregon and one in engineering from another institution. For more information, see Preparatory Programs in the **Academic Advising** section of this catalog.

Engineering students interested in semiconductor process engineering or polymer science may be interested in the nationally recognized master's industrial internship program. For more information, visit internship.uoregon.edu.

Preparation for Kindergarten through Secondary School Teaching Careers

The College of Education offers a fifth-year program for middle-secondary teaching licensure in physics and integrated sciences and a program for elementary teaching. Students considering a career pathway to teaching should consider following the physics teaching emphasis to prepare for the licensure programs. More information is available from the department's education advisor, Dean Livelybrooks; see also the **College of Education** section of this catalog.

Four-Year Degree Plan

- **Doctor of Philosophy**

Graduate Studies

The Department of Physics offers graduate programs leading to the master of science degree in applied physics or to the master of arts (MA), master of science (MS), and doctor of philosophy (PhD) degrees in physics with a variety of opportunities for research. Current research areas include astronomy and astrophysics, biophysics, condensed matter physics, elementary particle physics, and optical physics.

The interdisciplinary Institute of Theoretical Science houses theoretical research in some of the above areas as well as in areas of overlap between chemistry and physics.

The Center for High Energy Physics conducts research in particle physics, much of it in laboratories outside Oregon.

The Materials Science Institute and the Oregon Center for Optics provide facilities, support, and research guidance for graduate students and postdoctoral fellows in the interdisciplinary application of concepts and techniques from both physics and chemistry to understanding physical systems.

Cooperative programs of study are possible in molecular biology through the Institute of Molecular Biology.

Pine Mountain Observatory

Pine Mountain Observatory, operated by the Department of Physics for research and advanced instruction in astronomy, is located thirty miles southeast of Bend, Oregon, off Highway 20 near Millican, at an altitude of 6,300 feet above sea level. The observatory has three telescopes—fifteen inches, twenty-four inches, and thirty-two inches in diameter—the largest governed by computer. All are Cassegrain reflectors. A wide-field CCD camera is available on the thirty-two-inch telescope. The site has an astronomers' residence building and a caretaker's house. Professional astronomical research is in progress at the observatory on every partially or totally clear night of the year, and the site is staffed year round.

Admission and Financial Aid

For admission to graduate study, a bachelor's degree in physics or a related area is required with a minimum undergraduate grade point average (GPA) of 3.00 (B) in advanced physics and mathematics courses. Submission of scores on the Graduate Record Examinations (GRE), including the physics test, is required. Students from non-English-speaking countries must demonstrate proficiency in English by submitting scores from the Test of English as a Foreign Language (TOEFL). Information about the department and the Graduate Admission Application are available through the department's website.

Financial aid in the form of graduate employee (GE) opportunities or research fellowships is available on a competitive basis to PhD students. GEs require approximately sixteen hours of work a week and provide a stipend and tuition waiver. New students are typically eligible only for teaching fellowships.

The sequential nature of most physics courses makes it difficult to begin graduate study in terms other than Fall. Furthermore, financial aid is usually available only to students who begin their studies in the Fall.

To ensure equal consideration for fall term admission, the deadline for applications for financial aid is January 15. Late applications for admission may be considered until July 15.

Degree Requirements

Entering students should consult closely with their assigned advisors. Students showing a lack of preparation are advised to take the necessary undergraduate courses in order to remedy their deficiencies.

Students should consult the **Graduate School** section of this catalog for general university admission and degree requirements. Departmental requirements, outlined in a handbook for incoming students that is available in the department office and online, are summarized below.

Industrial Internships and the Applied Physics Master's Degree

The department offers a traditional master's as well as an internship-based master's program in applied physics, designed to serve physics students whose primary interests lie in applied research and development rather than in basic research. The Master's Industrial Internship Program includes course work, professional development, and a nine-month paid internship that helps prepare physicists for a career in industry or government labs. The internship salary helps offset the cost of tuition for students in this program; the traditional master's program does not include financial support.

Master of Science: Applied Physics

Code	Title	Credits
500- or 600-level courses ¹		24
Industrial internship		10
Additional graduate-level physics courses		11-19
Total Credits		45-53

¹ At least 9 credits of 600-level courses are required.

Additional Requirements

For a student to be in good academic standing, the cumulative GPA of the graded-credit total must be 3.00 or better.

Graduate School requirements, including time limits, must be satisfied.

The applied physics master of science (MS) degree requires the completion of 54 total credits—24 graded credits at the 500 level or higher and 30 internship research credits. The internship requirement must be fulfilled through the industrial internship program. Internship credits are taken pass/no pass. A student who is working full-time as an intern typically earns 10 credits each term.

Graded credits must be selected from an approved departmental list. The table below highlights courses commonly taken by students in the Master's Industrial Internship Program. Other 600-level physics courses qualify, but may require additional prerequisites. Some graduate-level courses in chemistry may qualify. Other courses may be added or substituted with the approval of the applied physics program advisor.

Code	Title	Credits
PHYS 581	Design of Experiments	4
PHYS 626	Physical Optics with Labs	4
PHYS 627	Optical Materials and Devices	4
PHYS 628	Laser and Nonlinear Optics with OpticStudio	4
PHYS 677M	Semiconductor Device Physics	4
PHYS 678M	Semiconductor Processing and Characterization Technology	4
PHYS 679M	Device Processing and Characterization Laboratory	4
CH 680	Electronics and Vacuum Systems	4
CH 681	Introduction to Electron Microscopy	4
CH 682	Electron Microprobe Analysis	4
CH 683	Surface Analysis	4
CH 685	Advanced Transmission Electron Microscopy	4

Master of Science: Physics

Typically this degree is based solely on course work. Detailed requirements can be found in the Graduate Student Handbook on the department's website.

Candidates must either submit a written thesis **or** take a program of specialized courses.

Thesis Option

Code	Title	Credits
Select one of the following:		9
PHYS 503	Thesis	
PHYS 503 & PHYS 601	Thesis and Research: [Topic]	
Total Credits		9

Specified-Course Option

The specified-courses option requires 40 graded graduate credits in physics with a GPA of at least 3.00 in these courses; 36 of those 40 credits must be selected from a list of courses approved by the department.

The master's degree program is typically completed in four terms, unless sufficient transfer credits are available, in which case it can be obtained in three.

Master of Arts

Typically this degree is based solely on course work. Detailed requirements can be found in the Graduate Student Handbook on the department's website.

Candidates must either submit a written thesis **or** take a program of specialized courses.

Thesis Option

Code	Title	Credits
Select one of the following:		9
PHYS 503	Thesis	
PHYS 503 & PHYS 601	Thesis and Research: [Topic]	
Total Credits		9

Specified-Course Option

The specified-courses option requires 40 graded graduate credits in physics with a GPA of at least 3.00 in these courses; 36 of those 40 credits must be selected from a list of courses approved by the department.

The master's degree program is typically completed in four terms, unless sufficient transfer credits are available, in which case it can be obtained in three.

In addition to all the preceding requirements, candidates for the master of arts (MA) degree must demonstrate foreign-language proficiency.

Doctor of Philosophy

The doctor of philosophy degree (PhD) in physics is based primarily on demonstrated knowledge of physics and doctoral dissertation research. PhD students also must take and pass the core graduate sequences, listed below, achieving a B– or better grade in each course. Courses may be retaken once to achieve this minimum grade. The director of graduate studies can selectively waive these requirements in exceptional cases:

Code	Title	Credits
Core Sequences		
PHYS 611 & PHYS 612	Theoretical Mechanics and Theoretical Mechanics	6

PHYS 613 & PHYS 614	Statistical Physics and Statistical Physics	6
PHYS 622 & PHYS 623	Electromagnetic Theory and Electromagnetic Theory	8
PHYS 631 & PHYS 632 & PHYS 633	Quantum Mechanics and Quantum Mechanics and Quantum Mechanics	12

Breadth Requirements

Six breadth courses ¹

Total Credits	32
---------------	----

¹ Breadth courses can be chosen from several areas of physics and allied areas such as mathematics, chemistry, and biology.

Next, students must locate an advisor and an advisory committee, who then administer a comprehensive oral examination testing whether the student is ready to undertake dissertation research. The heart of the PhD requirements is research leading to a doctoral dissertation.

Detailed information is available in the *Graduate Student Handbook* on the department's website.

Astronomy Courses

ASTR 121. The Solar System. 4 Credits.

Naked-eye astronomy, development of astronomical concepts, and the solar system.

ASTR 122. Birth and Death of Stars. 4 Credits.

The structure and evolution of stars.

ASTR 123. Galaxies and the Expanding Universe. 4 Credits.

Galaxies and the universe.

ASTR 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ASTR 321. Topics in Astrophysics. 4 Credits.

Problem solving of the orbits, kinematics, and dynamics of astronomical systems, structure and evolution of stars and galaxies.

Pre- or coreq: MATH 252; PHYS 252 or equivalents.

Physics Courses

PHYS 101. Essentials of Physics. 4 Credits.

Fundamental physical principles. Mechanics.

PHYS 102. Essentials of Physics. 4 Credits.

Fundamental physical principles. Heat, waves, and sound; electricity and magnetism.

PHYS 152. Physics of Sound and Music. 4 Credits.

Introduction to the wave nature of sound; hearing; musical instruments and scales; auditorium acoustics; and the transmission, storage, and reproduction of sound.

PHYS 153. Physics of Light, Color, and Vision. 4 Credits.

Light and color, their nature, how they are produced, and how they are perceived and interpreted.

PHYS 155. Physics behind the Internet. 4 Credits.

How discoveries in 20th-century physics mesh to drive modern telecommunications. Topics include electron mobility in matter, the development of transistors and semiconductors, lasers, and optical fibers.

PHYS 156M. Scientific Revolutions. 4 Credits.

Surveys several major revolutions in our views of the natural and technological world, focusing on scientific concepts and methodological aspects. For nonscience majors. Multilisted with GEOL 156M.

PHYS 161. Physics of Energy and Environment. 4 Credits.

Practical study of energy generation and environmental impact, including energy fundamentals, fossil fuel use, global warming, nuclear energy, and energy conservation.

PHYS 162. Solar and Other Renewable Energies. 4 Credits.

Topics include photovoltaic cells, solar thermal power, passive solar heating, energy storage, geothermal energy, and wind energy.

PHYS 171. The Physics of Life. 4 Credits.

Explores how physical laws guide the structure, function, and behavior of living organisms, and examines the physical properties of biological materials. Topics span microscopic and macroscopic scales.

PHYS 181. Quantum Mechanics for Everyone. 4 Credits.

Introduction to quantum mechanics, a set of sometimes counterintuitive scientific principals describing atoms and light, along with the modern technologies it makes possible.

PHYS 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

PHYS 198. Worskhop: [Topic]. 1-2 Credits.

Repeatable.

PHYS 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PHYS 201. General Physics. 4 Credits.

Introductory series. Mechanics and fluids.
Prereq: MATH 112 or equivalent.

PHYS 202. General Physics. 4 Credits.

Introductory series. Thermodynamics, waves, optics.
Prereq: PHYS 201.

PHYS 203. General Physics. 4 Credits.

Introductory series. Electricity, magnetism, modern physics.
Prereq: PHYS 201.

PHYS 204. Introductory Physics Laboratory. 2 Credits.

Practical exploration of the principles studied in general-physics lecture. Measurement and analysis methods applied to experiments in mechanics, waves, sound, thermodynamics, electricity and magnetism, optics, and modern physics. Sequence.
Pre- or coreq: PHYS 201.

PHYS 205. Introductory Physics Laboratory. 2 Credits.

Practical exploration of the principles studied in general-physics lecture. Measurement and analysis methods applied to experiments in mechanics, waves, sound, thermodynamics, electricity and magnetism, optics, and modern physics.
Pre- or coreq: PHYS 202.

PHYS 206. Introductory Physics Laboratory. 2 Credits.

Practical exploration of the principles studied in general-physics lecture. Measurement and analysis methods applied to experiments in mechanics, waves, sound, thermodynamics, electricity and magnetism, optics, and modern physics.
Pre- or coreq: PHYS 203.

PHYS 251. Foundations of Physics I. 4 Credits.

Newtonian mechanics; units and vectors; one-dimensional motion; Newton's laws; work and energy; momentum and collisions. Sequence.
Coreq: MATH 251; Prereq MATH 112 or equivalent.

PHYS 252. Foundations of Physics I. 4 Credits.

Vibrations and waves; oscillations; wave mechanics; dispersion; modes; introductory optics.
Prereq: PHYS 251; coreq: MATH 252 or equivalent.

PHYS 253. Foundations of Physics I. 4 Credits.

Electricity and magnetism; charge and electric field; electric potential; circuits; magnetic field; inductance.
Prereq: PHYS 252; coreq: MATH 253 or equivalent.

PHYS 290. Foundations of Physics Laboratory. 1 Credit.

Repeatable. Introduction to laboratory measurements, reports, instrumentation, and experimental techniques. Repeatable twice for maximum of 3 credits.
Coreq: PHYS 251, 252 or 253.

PHYS 351. Foundations of Physics II. 4 Credits.

Introduction to relativity and quantum physics with applications to atomic, solid-state, nuclear, and astro-particle systems
Prereq: MATH 253, PHYS 253; coreq: MATH 256 or 281.

PHYS 352. Foundations of Physics II. 4 Credits.

Thermodynamic systems; first and second laws; kinetic theory of gases; entropy. Sequence.
Prereq: PHYS 351; coreq: MATH 281.

PHYS 353. Foundations of Physics II. 4 Credits.

Thermal radiation; Maxwell-Boltzmann statistics; Fermi and Bose gases; phase transitions. Sequence.
Prereq: PHYS 352; coreq: MATH 282.

PHYS 362. Biological Physics. 4 Credits.

Physical principles governing biological systems. Topics include molecular machines, DNA and other macromolecules, signaling and information transfer, entropic forces, and physical mechanisms of self-organization.
Prereq: PHYS 351 or 353.

PHYS 391. Physics Experimentation Data Analysis Laboratory. 4 Credits.

Practical aspects of physics experimentation, including data acquisition, statistical analysis, and introduction to scientific programming, and use of Fourier methods for data analysis.

PHYS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PHYS 401. Research: [Topic]. 1-16 Credits.

Repeatable.

PHYS 403. Thesis. 1-12 Credits.

Repeatable.

PHYS 405. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

PHYS 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

PHYS 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

PHYS 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

PHYS 409. Supervised Tutoring. 1-3 Credits.

Repeatable.

PHYS 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

PHYS 411. Mechanics, Electricity, and Magnetism. 4 Credits.

Fundamental principles of Newtonian mechanics, conservation laws, small oscillations, planetary motion, systems of particles. Electromagnetic phenomena. Series. Only nonmajors may earn graduate credit.
Prereq: MATH 282.

PHYS 412. Mechanics, Electricity, and Magnetism. 4 Credits.

Fundamental principles of Newtonian mechanics, conservation laws, small oscillations, planetary motion, systems of particles. Electromagnetic phenomena. Series.
Prereq: MATH 281.

PHYS 413. Mechanics, Electricity, and Magnetism. 4 Credits.

Fundamental principles of Newtonian mechanics, conservation laws, small oscillations, planetary motion, systems of particles. Electromagnetic phenomena. Series.
Prereq: PHYS 412.

PHYS 414. Quantum Physics. 4 Credits.

Planck's and de Broglie's postulates, the uncertainty principle, Bohr's model of the atom, the Schrodinger equation in one dimension, the harmonic oscillator, the hydrogen atom, molecules and solids, nuclei and elementary particles. Sequence.
Prereq: PHYS 413.

PHYS 415. Quantum Physics. 4 Credits.

Planck's and de Broglie's postulates, the uncertainty principle, Bohr's model of the atom, the Schrodinger equation in one dimension, the harmonic oscillator, the hydrogen atom, molecules and solids, nuclei and elementary particles. Sequence.
Prereq: PHYS 414.

PHYS 417. Topics in Quantum Physics. 4 Credits.

Perturbation theory, variational principle, time-dependent perturbation theory, elementary scattering theory.
Prereq: PHYS 415.

PHYS 421M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with MATH 421M.
Prereq: MATH 253; one from MATH 256, MATH 281.

PHYS 422. Electromagnetism. 4 Credits.

Study of electromagnetic waves. Topics include Maxwell's equations, wave equation, plane waves, guided waves, antennas, and other related phenomena.
Prereq: PHYS 413.

PHYS 424. Classical Optics. 4 Credits.

Geometrical optics, polarization, interference, Fraunhofer and Fresnel diffraction.
Prereq: PHYS 353.

PHYS 425. Modern Optics. 4 Credits.

Special topics in modern applied optics such as Fourier optics, coherence theory, resonators and lasers, holography, and image processing.
Prereq: PHYS 424.

PHYS 431. Analog Electronics. 4 Credits.

Passive and active discrete components and circuits. General circuit concepts and theorems. Equivalent circuits and black box models. Integrated circuit operational amplifiers.
Prereq: PHYS 203 or equivalent; knowledge of complex numbers; MATH 256.

PHYS 432. Digital Electronics. 4 Credits.

Digital electronics including digital logic, measurement, signal processing and control. Introduction to computer interfacing.
Prereq: PHYS 203 or equivalent; MATH 253.

PHYS 481. Design of Experiments. 4 Credits.

Applies statistics to practical data analysis, data-based decision making, model building, and the design of experiments. Emphasizes factorial designs.

PHYS 491. Research Project I. 2-4 Credits.

For physics and other science majors, Physics Projects entails construction and use of apparatus, interfaces and computers to perform technically-sophisticated experiments, analyze and communicate results.
Prereq: PHYS 391 or PHYS 399.

PHYS 492. Research Project II. 2-4 Credits.

For physics and other science majors, Physics Projects entails construction and use of apparatus, interfaces and computers to perform technically-sophisticated experiments, analyze and communicate results.
Prereq: PHYS 491.

PHYS 493. Research Project III. 2-4 Credits.

For physics and other science majors, Physics Projects entails construction and use of apparatus, interfaces and computers to perform technically-sophisticated experiments, analyze and communicate results.
Prereq: PHYS 492.

PHYS 503. Thesis. 1-16 Credits.

Repeatable.

PHYS 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

PHYS 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

PHYS 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

PHYS 521M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with MATH 521M.

PHYS 581. Design of Experiments. 4 Credits.

Applies statistics to practical data analysis, data-based decision making, model building, and the design of experiments. Emphasizes factorial designs.

PHYS 601. Research: [Topic]. 1-16 Credits.

Repeatable.

PHYS 603. Dissertation. 1-16 Credits.

Repeatable.

PHYS 604. Internship: [Topic]. 1-16 Credits.

Repeatable.

Coreq: good standing in applied physics master's degree program.

PHYS 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

PHYS 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

PHYS 607. Seminar: [Topic]. 1-4 Credits.

Repeatable. Recent topics include Astrophysics and Gravitation, Biophysics, Condensed Matter, High Energy Physics, Physics Colloquium, Theoretical Physics.

PHYS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

PHYS 609. Supervised Tutoring. 1-3 Credits.

Repeatable.

PHYS 610. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

PHYS 611. Theoretical Mechanics. 4 Credits.

Lagrangian and Hamiltonian mechanics, small oscillations, rigid bodies. Sequence.

PHYS 612. Theoretical Mechanics. 2 Credits.

Lagrangian and Hamiltonian mechanics, small oscillations, rigid bodies. Sequence.

Prereq: PHYS 611.

PHYS 613. Statistical Physics. 2 Credits.

Thermodynamics, statistical mechanics, kinetic theory, application to gases, liquids, solids, atoms, molecules, and the structure of matter. Sequence.

PHYS 614. Statistical Physics. 4 Credits.

Thermodynamics, statistical mechanics, kinetic theory, application to gases, liquids, solids, atoms, molecules, and the structure of matter. Sequence.

Prereq: PHYS 613.

PHYS 622. Electromagnetic Theory. 4 Credits.

Microscopic form of Maxwell's equations, derivation and solution of the wave equation, Lorentz covariant formulation, motion of charges in given fields, propagation and diffraction, radiation by given sources, coupled motion of sources and fields, the electromagnetic field in dense media.

PHYS 623. Electromagnetic Theory. 4 Credits.

Microscopic form of Maxwell's equations, derivation and solution of the wave equation, Lorentz covariant formulation, motion of charges in given fields, propagation and diffraction, radiation by given sources, coupled motion of sources and fields, the electromagnetic field in dense media. Sequence.

Prereq: PHYS 622.

PHYS 626. Physical Optics with Labs. 4 Credits.

Fundamentals of applied geometric and wave optics theory, reinforced through homework assignments, and explored in experiments conducted with lasers and optical components. Sequence with PHYS 627, PHYS 628.

PHYS 627. Optical Materials and Devices. 4 Credits.

Principles of quantum mechanics and solid-state physics relating to material properties of optoelectronic devices with corresponding laboratories teaching how to operate and characterize these devices. Sequence with PHYS 626, PHYS 628.

Prereq: PHYS 626 with B- or better grade.

PHYS 628. Laser and Nonlinear Optics with OpticStudio. 4 Credits.

Introduction to the nature of laser and nonlinear optics and the practical systems that utilize these phenomena with computational simulations using Zemax OpticStudio software. Sequence with PHYS 626, PHYS 627.

Prereq: PHYS 627 with B- or better grade.

PHYS 631. Quantum Mechanics. 4 Credits.

Review of fundamentals, central force problems, matrix mechanics. Sequence.

PHYS 632. Quantum Mechanics. 4 Credits.

Approximation methods, scattering. Sequence.

Prereq: PHYS 631.

PHYS 633. Quantum Mechanics. 4 Credits.

Rotation symmetry, spin, identical particles. Sequence.

Prereq: PHYS 632.

PHYS 634. Advanced Quantum Mechanics. 4 Credits.

Time-dependent formulation of scattering, relativistic equations and solutions, hole theory, symmetry properties, second quantization, Fock space.

PHYS 661. Elementary Particle Phenomenology. 4 Credits.

Classification and quantum numbers of elementary particles; elements of group theory, Lorentz group and spin; discrete and continuous symmetries; phenomenology of weak, electromagnetic, and strong interactions; quark model of hadron structure. Sequence.

Prereq: PHYS 633.

PHYS 662. Elementary Particle Phenomenology. 4 Credits.

Classification and quantum numbers of elementary particles; elements of group theory, Lorentz group and spin; discrete and continuous symmetries; phenomenology of weak, electromagnetic, and strong interactions; quark model of hadron structure. Sequence.

Prereq: PHYS 661.

PHYS 665. Quantum Field Theory. 4 Credits.

Canonical quantization, path integral formulation of quantum field theory, Feynman rules for perturbation theory, quantum electrodynamics, renormalization, gauge theory of the strong and electroweak interactions. Sequence.

Prereq: PHYS 634.

PHYS 666. Quantum Field Theory. 4 Credits.

Canonical quantization, path integral formulation of quantum field theory, Feynman rules for perturbation theory, quantum electrodynamics, renormalization, gauge theory of the strong and electroweak interactions. Sequence.

Prereq: PHYS 665.

PHYS 671. Solid State Physics. 4 Credits.

Crystallography; thermal, electrical, optical, and magnetic properties of solids; band theory; metals, semiconductors, and insulators; defects in solids. Sequence.

Prereq: PHYS 633.

PHYS 672. Solid State Physics. 4 Credits.

Crystallography; thermal, electrical, optical, and magnetic properties of solids; band theory; metals, semiconductors, and insulators; defects in solids. Sequence.

Prereq: PHYS 671.

PHYS 674. Theory of Condensed Matter. 4 Credits.

Advanced topics include quantum and statistical description of many-particle systems, electronic structure, elementary excitations in solids and fluids, critical phenomena, statics and dynamics of soft condensed matter. Topics and emphasis vary.

Prereq: PHYS 673.

PHYS 675. Theory of Condensed Matter. 4 Credits.

Advanced topics include quantum and statistical description of many-particle systems, electronic structure, elementary excitations in solids and fluids, critical phenomena, statics and dynamics of soft condensed matter. Topics and emphasis vary.

Prereq: PHYS 674.

PHYS 677M. Semiconductor Device Physics. 4 Credits.

Introduction to the theory behind semiconductors. Elementary theory of inorganic solids; electronic structures and transport properties. Basic theory of devices including diodes, transistors, mosfets, and optoelectronic devices. Offered only in summer. Sequence with PHYS 678M, PHYS 679M. Multilisted with CH 677M.

PHYS 678M. Semiconductor Processing and Characterization Technology. 4 Credits.

Introduction to the techniques required to make semiconductors and test their properties. Solid-state and surface chemistry of inorganic semiconductors as it pertains to microelectronic devices. Offered only in summer. Sequence with PHYS 677M, PHYS 679M. Multilisted with CH 678M.

Prereq: PHYS 677M.

PHYS 679M. Device Processing and Characterization Laboratory. 4 Credits.

Students use theory and techniques learned to design, fabricate, and test a device that performs a specific function, with an emphasis on wafer processing and device realization. Offered only in summer. Sequence with PHYS 677M, PHYS 678M. Multilisted with CH 679M.

Prereq: PHYS 678M.

PHYS 684. Quantum Optics and Laser Physics. 4 Credits.

Nonlinear optical processes and quantum statistical properties of light produced by such processes, laser theory, wave mixing processes, optical Bloch equations, field quantization, photon statistics, cooperative emissions. Sequence.

Prereq: PHYS 354 or equivalent.

PHYS 685. Quantum Optics and Laser Physics. 4 Credits.

Nonlinear optical processes and quantum statistical properties of light produced by such processes, laser theory, wave mixing processes, optical Bloch equations, field quantization, photon statistics, cooperative emissions. Sequence.

Prereq: PHYS 684; coreq PHYS 631.

PHYS 686. Quantum Optics and Laser Physics. 4 Credits.

Nonlinear optical processes and quantum statistical properties of light produced by such processes, laser theory, wave mixing processes, optical Bloch equations, field quantization, photon statistics, cooperative emissions. Sequence.

Prereq: PHYS 685; coreq: PHYS 632.

Political Science

Craig Parsons, Department Head

541-346-4864

541-346-4860 fax

936 Prince Lucien Campbell Hall

1284 University of Oregon

Eugene, Oregon 97403-1284

polisci@uoregon.edu

The Department of Political Science offers a broad range of courses. For undergraduates, three 100-level courses cover foundational knowledge and skills, and six 200-level courses serve as “gateways” to career paths that organize the upper-division curriculum: public policy and political action; politics, law, and justice; politics of business; global engagement; sustainability, development, and social action; and ethics, identity, and society. For graduate study, the department offers training in six traditional subfields of political science, each with their own designated faculty members: comparative politics, formal theory and methodology, international relations, public policy, political theory, and United States

politics. Faculty members employ varied theoretical and methodological approaches but share the pursuit of answers to questions with real-world implications.

Careers

An undergraduate degree in political science provides a strong foundation for any number of career choices. The program has been designed to develop in students a concrete set skills—critical thinking, analytical abilities, writing proficiency, and precise communication.

Majors are encouraged to select course work that aligns with their career goals, and may choose to complete as many as two career paths. Students begin a career path by completing a 200-level gateway introductory course, then develop and refine skills in upper-division courses. Majors may be awarded at most two career path certificates of completion upon graduation, adding documented expertise to their degree.

The department offers credit for internships related to political science and a workshop to explore and prepare students for the job market. For more information, visit polisci.uoregon.edu/internship-careers.

Political science graduates may also continue on to graduate education, especially in the fields of law, international studies, business administration, or advanced studies in political science.

Faculty

Yvette Alex-Assensoh, professor (immigration, racial politics): vice president for equity and inclusion. BA, 1988, Columbia; MA, 1991, PhD, 1993, Ohio State; JD, 2006, Indiana, Bloomington. (2012)

Erin Beck, associate professor (Latin American politics; micropolitics; women, gender, and development). BA, 2004, Providence College; MA, 2007, PhD, 2012, Brown. (2012)

Gerald Berk, professor (American politics, political development, political economy). BA, 1977, Clark; PhD, 1987, Massachusetts Institute of Technology. (1994)

Anita Chari, associate professor (political theory). BA, 2001, Georgetown; MA, 2003, PhD, 2008, Chicago. (2010)

James Conran, assistant professor (comparative politics, European politics, political economy). BA, 2006, University College, Dublin; MSc, 2008, London School of Economics and Political Science; PhD, 2017, Massachusetts Institute of Technology. (2017)

Jane K. Cramer, associate professor (international relations, international security, US foreign policy). BA, 1986, Oberlin; PhD, 2002, Massachusetts Institute of Technology. (2000)

Dennis C. Galvan, professor (Africa, development, comparative politics); vice provost for international affairs. See **International Studies**.

Alison Gash, associate professor (public law). BA, 1995, Vassar College; MPA-URP, 2000, Princeton; MA, 2004, PhD, 2010, California, Berkeley. (2010)

Burke Hendrix, associate professor (normative political theory, indigenous politics, global justice). BA, 1992, Linfield College; MA, 2000, PhD, 2002, Colorado, Boulder. (2012)

Craig Kauffman, associate professor (environmental politics, global governance, democratization). BA, 1992, College of Wooster; MS, 1996, George Mason; PhD, 2012, George Washington. (2012)

Joseph E. Lowndes, associate professor (US politics). BA, 1990, Antioch College; MA, 1996, New School for Social Research; PhD, 2004, New School University. (2003)

Ronald B. Mitchell, professor (environmental politics, international relations). BA, 1981, Stanford; MPP, 1985, PhD, 1992, Harvard. (1993)

Mikhail Myagkov, professor (comparative politics, formal political theory). BS, 1990, Moscow Institute of Physics and Technology; MS, 1994, PhD, 1996, California Institute of Technology. (1996)

Craig Parsons, professor (comparative politics, European politics). BA, 1992, Stanford; CEP, 1993 Institut d'Etudes Politiques; MA, 1994, PhD, 1999, California, Berkeley. (2004)

Lars Skalnes, associate professor (international political economy, international relations). CandMag, 1984, Bergen; MA, 1989, PhD, 1993, California, Los Angeles. (1992)

Yeling Tan, assistant professor (international and comparative political economy, global economic governance, politics of China). BA, 2002, Stanford; MPA, 2011, PhD, 2017, Harvard. (2017)

Deb Thompson, associate professor (race and ethnic politics, Black politics, comparative race studies). BA, 2003, MA, 2005, Carleton; PhD, 2010, Toronto. (2017)

Daniel Tichenor, professor (American presidency, interest groups and social movements, US political institutions); Philip H. Knight Chair. BA, 1988, Earlham College; PhD, 1996, Brandeis. (2008)

Tuong Vu, professor (comparative politics, political economy of Southeast Asia). BA, 1987, Vietnam National, Ho Chi Minh City; BA, 1994, Minnesota, Twin Cities; MPA, 1997, Princeton; PhD, 2004, California, Berkeley. (2007)

Priscilla Yamin, associate professor (US politics and history, gender studies, feminist theory). BA, 1990, Wisconsin, Madison; MA, 1996, PhD, 2005, New School for Social Research. (2007)

Emeriti

William H. Baugh, associate professor emeritus. SB, 1963, Massachusetts Institute of Technology; MS, 1965, Rochester; MA, 1971, PhD, 1973, Indiana. (1978)

Deborah Baumgold, professor emerita. BA, 1971, Oberlin; MA, 1975, PhD, 1980, Princeton. (1987)

Daniel Goldrich, professor emeritus. BA, 1955, Antioch; MA, 1957, PhD, 1959, North Carolina, Chapel Hill. (1963)

Arthur M. Hanhardt Jr., professor emeritus. BA, 1953, Rochester; M.A, 1958, Colgate; Ph.D, 1963, Northwestern. (1963)

Richard Kraus, professor emeritus. BA, 1966, Grinnell; certificate (East Asian Institute), 1969, MA, 1969, PhD, 1974, Columbia. (1983)

Jerry F. Medler, associate professor emeritus. BA, 1963, Northwestern; MA, 1965, PhD, 1966, Oregon. (1968)

John M. Orbell, professor emeritus. BA, 1957, MA, 1960, New Zealand; PhD, 1965, North Carolina, Chapel Hill. (1967)

Priscilla Southwell, professor emerita. BA, 1974, MA, 1977, Colorado; PhD, 1983, North Carolina, Chapel Hill. (1981)

Richard P. Suttmeier, professor emeritus. AB, 1963, Dartmouth College; PhD, 1969, Indiana. (1990)

M. George Zaninovich, professor emeritus. BA, 1953, MA, 1959, PhD, 1964, Stanford. (1966)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Arts
- Bachelor of Science
- Minor

Undergraduate Studies

The Department of Political Science offers a program leading to a bachelor of science (BS) or a bachelor of arts (BA) degree. This program is designed to

1. provide students with substantive expertise in political institutions, key policy issues, salient ideologies, law and regulation, and political identities in local, national, and global contexts
2. prepare students for graduate work or professional careers in law, business, government, teaching, journalism, social activism, or the academic community

Bachelor's Degree

Courses at the 100 and 200 levels are introductory, setting foundations for the major. Courses at the 300 and 400 level build students' expertise in selected career paths, with 300-level courses typically in lecture format and 400-level courses typically in seminar format. A minimum of 32 credits must be upper division.

At the discretion of the instructor, certain 300- and 400-level courses may have prerequisites. Students are advised to complete foundational lower-division requirements prior to taking upper-division courses, especially at the 400 level.

Undergraduate majors who complete a 200-level introductory course and four upper-division courses in a career path earn a certificate of completion, adding documented expertise to their degree. Additional information may be found online (<https://polisci.uoregon.edu/career-path>).

Bachelor of Arts Degree Requirements

Code	Title	Credits
	Two 100-level courses	8
	Two 200-level courses	8
	Course in political theory (any level) ¹	4
	Two 400-level courses ²	8
	Additional upper-division courses ^{3,4}	20
	Total Credits	48

¹ Political theory courses are indicated by a footnote in the Class Schedule.

- ² A minimum of two 400-level courses numbered 407, 410, or 412–499 are required.
- ³ If the political theory course is upper-division, the total number of additional upper-division credits needed will total 20. If it is lower-division, the total number of additional upper-division credits needed will total 24.
- ⁴ A minimum of 20 upper-division credits must be completed in residence at the University of Oregon.

Additional Requirements

The 48 credits that satisfy major requirements must be taken for letter grades and passed with C– or better with the exception that one course (as many as 4 credits) may be taken pass/no pass (P/N). Courses such as Thesis (PS 403) and Honors Thesis Prospectus (PS 411) are offered pass/no pass only and may be applied to the 48 credits. Credits earned in Practicum: [Topic] (PS 409) may not be applied to the major.

No more than a total of 16 credits in Research: [Topic] (PS 401), Thesis (PS 403), Internship: [Topic] (PS 404), Reading and Conference: [Topic] (PS 405), Workshop: [Topic] (PS 408), Honors Thesis Prospectus (PS 411), and Overseas Study: Internships (OINT 488) may be applied toward the 48-credit requirement. Overseas Study: Internships (OINT 488) is subject to preapproval by the political science department.

No more than 8 credits of Internship: [Topic] (PS 404) or Overseas Study: Internships (OINT 488) may be applied toward the 48 credits. This work must be done under the direction of a faculty member who, prior to registration, must approve and set up academic criteria to evaluate the work. Credit for these courses must be earned at the University of Oregon.

UO bachelor's degree requirements also apply.

Bachelor of Science Degree Requirements

Code	Title	Credits
Two 100-level courses		8
Two 200-level courses		8
Course in political theory (any level) ¹		4
Two 400-level courses ²		8
Additional upper-division courses ^{3,4}		20
Total Credits		48

- ¹ Political theory courses are indicated by a footnote in the Class Schedule.
- ² A minimum of two 400-level courses numbered 407, 410, or 412–499 are required.
- ³ If the political theory course is upper-division, the total number of additional upper-division credits needed will total 20. If it is lower-division, the total number of additional upper-division credits needed will total 24.
- ⁴ A minimum of 20 upper-division credits must be completed in residence at the University of Oregon.

Additional Requirements

The 48 credits that satisfy major requirements must be taken for letter grades and passed with C– or better with the exception that one course (as many as 4 credits) may be taken pass/no pass (P/N). Courses such as Thesis (PS 403) and Honors Thesis Prospectus (PS 411) are offered

pass/no pass only and may be applied to the 48 credits. Credits earned in Practicum: [Topic] (PS 409) may not be applied to the major.

No more than a total of 16 credits in Research: [Topic] (PS 401), Thesis (PS 403), Internship: [Topic] (PS 404), Reading and Conference: [Topic] (PS 405), Workshop: [Topic] (PS 408), Honors Thesis Prospectus (PS 411), and Overseas Study: Internships (OINT 488) may be applied toward the 48-credit requirement. Overseas Study: Internships (OINT 488) is subject to preapproval by the political science department.

No more than 8 credits of Internship: [Topic] (PS 404) or Overseas Study: Internships (OINT 488) may be applied toward the 48 credits. This work must be done under the direction of a faculty member who, prior to registration, must approve and set up academic criteria to evaluate the work. Credit for these courses must be earned at the University of Oregon.

UO bachelor's degree requirements also apply.

Freshmen and Transfer Students

There are no departmental requirements for entering freshmen. Students planning to transfer to the university from two-year colleges should take the basic introductory political science courses offered at those institutions. At least 20 credits in upper-division graded political science courses must be completed in residence at the University of Oregon to qualify for a BA or BS degree in political science. Transfer students should ensure that all transcripts are submitted to the Office of the Registrar prior to their first term of enrollment. During the first term, the department office will review transferred credits approved by the registrar to confirm courses that fulfill degree requirements. In all cases, students are required to fulfill the equivalent of 48 credits for the major.

Second Bachelor's Degree or Second Major

Students who want to earn a second bachelor's degree or a second or double major in political science must complete 48 credits in political science, as outlined under Bachelor of Arts Degree Requirements (p. 463) or Bachelor of Science Degree Requirements (p. 464). Students who are considering a second bachelor's degree and have prior political science credits should consult with the undergraduate advisor, John Davidson. Some of these prior credits may not be applicable to the second bachelor's degree.

Honors in Political Science

Political science majors who have reached junior standing and meet GPA minimums are eligible to enter the honors program. The honors program spans the spring term of a student's junior year to the spring term of senior year. GPA minimums must be maintained to participate—an overall grade point average for UO and transfer credits of at least 3.50, plus a 3.70 GPA or above in the political science major. Students must successfully complete Honors Thesis Prospectus (PS 411) during fall term of the academic year in which the thesis is completed, then complete 4 credits in Thesis (PS 403) in the following winter term. Honors students select a thesis advisor and reader; the advisor supervises and grades the thesis course. The thesis advisor and reader determines if the thesis is approved for honors distinction after eligibility is determined prior to graduation.

Minor Requirements

Code	Title	Credits
	Political science courses	8
	Upper-division political science courses ¹	16
Total Credits		24

¹ Only 6 credits may be in Research: [Topic] (PS 401), Reading and Conference: [Topic] (PS 405), and Workshop: [Topic] (PS 408).

All credits must be taken for letter grades and passed with grades of C– or better. As many as 8 credits may be transferred from another institution.

Thesis (PS 403), Internship: [Topic] (PS 404), Practicum: [Topic] (PS 409), Honors Thesis Prospectus (PS 411), and Overseas Study: Internships (OINT 488) do not count toward the minor. The minor in political science does not have a subfield requirement.

Kindergarten through Secondary Teaching Careers

Students who complete a degree with a major in political science are eligible to apply to the College of Education's fifth-year licensure program in middle-secondary teaching or the fifth-year licensure program in elementary teaching. More information is available in the **College of Education** section of this catalog.

- **Doctor of Philosophy**

Graduate Studies

The Department of Political Science offers a graduate program of studies leading to the master of arts (MA), master of science (MS), and doctor of philosophy (PhD) degrees. The program is designed to prepare students for teaching, research, and government or other public service, and to enable them to understand and participate in public affairs.

Members of the faculty offer advanced courses and seminars across the major fields of political science. Graduate student participation in joint faculty-student research and interdepartmental research projects is common on a wide range of topics.

Admission

Applications for the master’s and doctoral programs are submitted online and consist of the following documents:

1. Official transcripts; successful applicants usually have a grade point average (GPA) of 3.00 or higher for all undergraduate and graduate academic work
2. Official scores on the Graduate Record Examinations (GRE) taken within the last five years; successful applicants usually have a combined verbal and quantitative score of 300 or better
3. International students from non-English-speaking countries must provide proof of English language proficiency by submitting results from one of the following:
 - a. Official English as a Foreign Language (TOEFL) test results taken within the last two years. A minimum score of 575 (paper-based) or 88 (internet-based) is required
 - b. Official International English Language Testing System (IELTS) test results taken within the last two years with a minimum score of 7.0
 - c. A transcript showing the applicant has received a bachelor’s degree or higher from an accredited US institution or from an institution in the following countries: Australia, Canada (excluding Quebec), Ireland, New Zealand, or the United Kingdom
4. A statement of purpose prepared by the student
5. Recommendations from at least three teachers from whom courses have been taken, or from practitioners in your expected field of study
6. Other evidence that may be helpful in reaching a decision. Although an undergraduate major in political science is not a prerequisite for admission, the committee takes into consideration previous academic work in political science

Information about the graduate program, graduate employee appointments, and application process may be obtained by visiting the

department's website. The deadline for fall term admission and graduate employee appointment applications is February 1.

Master's Degree Program

The master's degree program prepares students for professional careers in teaching and research. Two years is the typical period for completing the program. The graduate program is geared toward doctoral studies and typically only admits students for a terminal master's degree under exceptional circumstances. Applicants whose main goal is to obtain a PhD should apply directly to the doctoral program. Those wanting to obtain a terminal master's degree should contact the department's director of graduate studies before applying to discuss a potential fit.

Master of Arts Degree Requirements

- Completion of 45 credits of graduate course work
- Completion of required courses as specified by the department
- Demonstrated proficiency in qualitative and quantitative research methods
- Completion of a master's degree thesis

Master of Science Degree Requirements

- Completion of 45 credits of graduate course work
- Completion of required courses as specified by the department
- Demonstrated proficiency in qualitative and quantitative research methods
- Completion of a master's degree thesis

Doctoral Program

This program is designed to allow the well-prepared student to complete course requirements for the PhD in two years of full-time study. Students complete a research paper in their second year and take comprehensive examinations during their third year, followed by preparation of a dissertation. Requirements for the PhD in political science include the following:

1. Completion of 100 credits (18 credits are for dissertation) beyond the bachelor's degree. Research: [Topic] (PS 601) and Reading and Conference: [Topic] (PS 605) may be taken pass/no pass. All other course work must be taken for letter grades
2. Completion of State of the Discipline (PS 620), to be taken the first time it is offered
3. Demonstrated proficiency in quantitative and qualitative research methods
4. Completion of a research paper no later than the sixth term of enrollment (excluding summer)
5. Completion of required seminars in the two area fields in which the student takes comprehensive examinations. Students should take these seminars as early as possible, and prior to examination
6. Passing two comprehensive examinations: one major field and one minor field, selected from the list below. Each field comprises several themes from which the student must choose a subset
 - classical and contemporary political theory
 - comparative politics
 - formal theory and methodology
 - international relations
 - public policy
 - United States politics

7. After passing the comprehensive examinations, completion of 18 credits in Dissertation (PS 603), to be taken while completing the PhD dissertation
8. Defense of the written dissertation in an oral examination

A complete description of graduate requirements, including an explanation of themes and field requirements, is available on the department website (<http://polisci.uoregon.edu>).

Courses

PS 100. Temporary Group-Satisfying Course. 4 Credits.

PS 102. Thinking Like a Social Scientist. 4 Credits.

Illustrates how the ways social scientists think—using quantitative, qualitative, and interpretive methods—help to sharpen thinking for many contexts and careers.

PS 106. Power, Politics, and Inequality. 4 Credits.

Examines power and politics through the lens of inequality, focusing on the constant struggle between the haves and the have-nots.

PS 109. Politics, Science, and the Body. 4 Credits.

An interdisciplinary examination of the scientific and biological explanations of poverty and social inequality in the United States, historically and in the present day.

PS 111. Introduction to Political Science. 4 Credits.

Offers students the tools to think for themselves about politics: multiple ideological and analytical viewpoints on varying political arrangements around the world.

PS 199. Special Studies: [Topic]. 1-5 Credits.

Topics vary from year to year. Repeatable when topic changes.

PS 201. United States Politics. 4 Credits.

Theoretical introduction to American institutions, political doctrines, and ideology as these affect the course of politics and public policy in the United States.

PS 205. Introduction to International Relations. 4 Credits.

Introduction to theoretical and methodological tools for the analysis of world politics.

PS 210. Politics of Business. 4 Credits.

Introduces the political science subfield of political economy, which studies the relationship between concepts like the market and the state, capitalism and democracy, politics and the economy. The American political economy is examined from both a historical and an international perspective.

PS 275. Legal Process. 4 Credits.

Overview of the United States legal system. Covers a range of sociolegal writing and provides a context for the legal system under which the U.S. operates.

PS 297. Introduction to Environmental Politics. 4 Credits.

United States environmental policy and alternative environmental political futures.

PS 302. States' Rights (and Wrongs). 4 Credits.

Explores the division between U.S. federal, state and municipal power through the lens of our nation's most contentious and most critical political and policy debates. Examines how elected officials, judges and activists influence fights over federalism.

PS 304. Democracy, Dictators, and Development. 4 Credits.

Examines key questions in political science like why some countries are rich while others are poor, why some countries are democratic and others are authoritarian, how these different political systems work, and which are best equipped to address ethno-nationalist conflict and economic development.

PS 308. United States Political Thought. 4 Credits.
