Development of United States political thought from the Revolution through the 20th century. Includes writings of Jefferson, Paine, Madison, Tocqueville.

PS 309. Political Ideologies. 4 Credits.

Ideology is a more-or-less coherent lens through which a person views the world in order to process information and direct action. The course examines how the world looks different for those holding liberal, conservative, communist, fascist, or anarchist world views.

PS 310. Roots of Democracy. 4 Credits.

Examines modern conceptions of democracy, citizenship, legality, virtue, equality, and political order, which grew out of ideas initially developed in ancient Greek city-states. Special attention given to ideas of active citizenship. Series with PS 311 and 312.

PS 311. Sovereignty and Revolution. 4 Credits.

Examines contemporary conceptions of politics springing from European debates about the power of kings, law, and the people. Considers key textual moments in the process by which modern conceptions of democracy emerged.

PS 312. Shadows of Modernity. 4 Credits.

Explores the distinct critiques of modernity offered by John Stuart Mill, Karl Marx, Friedrich Nietzsche, Michel Foucault, and Sigmund Freud. Concepts explored include liberalism, capitalism, power, morality, and the unconscious. Series with PS 310 and PS 311.

PS 316. Black Lives Matter and American Democracy. 4 Credits.

Explores the ideological origins and contemporary politics of the Black Lives Matter movement. Modules include the demands of/on democracy, race and the criminal justice system, and the politics of protest.

PS 319. The Politics of the Body. 4 Credits.

This course examines the politics of the body in the US. It will focus on scientific and biological definitions of identity and how that affects policies.

PS 320. International Organization. 4 Credits.

Studies efforts by states to cooperate in an effort to avoid or resolve conflict in the realms of security, trade, human rights, and the environment.

PS 324. European Politics. 4 Credits.

Overview of the formation and current dynamics of national politics in Western Europe.

PS 326. United States Foreign Policy I. 4 Credits.

Basic concepts underlying the formulation and implementation of United States foreign policy; relationships between American society and foreign policy; the relationship of the U.S. to its international environment.

PS 330. Governments and Politics in Latin America. 4 Credits.

Social, political, and economic developments in Latin America; causes and consequences of revolutions, democratization, economic politics; examples from Mexico, Brazil, Chile, Argentina, Cuba, Guatemala, Venezuela. Offered alternate years.

PS 337. The Politics of Development. 4 Credits.

Presents alternative perspectives on key north-south issues: trade, aid, foreign investment, debt, and the environment. Includes such institutions as the International Monetary Fund, World Bank, and World Trade Organization.

PS 340. International Political Economy. 4 Credits.

Links between economics and politics in the international system. Basic concepts include power, dependence, inequality, imperialism, and development. EC 201, 202, or PS 205 recommended preparation.

PS 342. Politics of China. 4 Credits.

Survey of the politics of the People's Republic of China. Emphasis on political sociology and group conflict: elites, ideology, social change, and organization.

PS 345. Southeast Asian Politics. 4 Credits.

Surveys major themes in contemporary Southeast Asian politics, including nation-state building, economic development, authoritarianism and democracy, and religious and ethnic politics.

PS 346. Terrorism and Weapons Proliferation. 4 Credits.

Examines causes and control of terrorism, especially preventing terrorist use of weapons of mass destruction; theories and policies of nonproliferation and arms control.

PS 347. Political Power, Influence, and Control. 4 Credits.

Survey of the use of the concept of power in the social sciences, stressing diverse theoretical perspectives and empirical studies of political institutions.

PS 348. Women and Politics. 4 Credits.

Examines the political role of women and questions of equality in the U.S. from historical and contemporary perspectives. Topics may include voting, welfare, reproductive rights, and representation.

PS 349. Mass Media and American Politics. 4 Credits.

The role of the mass media in contemporary American politics; the effect of the media on such institutions as political parties, elections, and the presidency.

PS 350. Politics and Film. 4 Credits.

Examines the political relevance of films and their role as a medium for illustrating, defending, and challenging political ideas.

PS 351. Democratic Dilemmas. 4 Credits.

Core course for the Wayne Morse Scholars Program, exploring significant political and policy challenges confronting our representative democracy.

PS 352. Political Parties and Elections. 4 Credits.

Overview of current developments in political parties and interest groups in the United States.

PS 355. Oregon Government and Politics. 4 Credits.

Current political issues in Oregon with particular attention to political races and ballot measures before the Oregon electorate as well as the state's major political institutions.

PS 367. Science and Politics of Climate Change. 4 Credits.

Understanding the causes, impacts, policies, and politics of global climate change from natural and social science perspectives.

PS 368. Gender in the Law. 4 Credits.

Examines the role courts have played in framing and shaping policies where gender is a central feature with a focus on reproductive rights, pregnancy and abortion, domestic violence, rape, family issues, prostitution, and sexual harassment. Offered alternate years.

PS 369. Southern Politics. 4 Credits.

Explores the economic, social, and political aspects of life in the 20th-century US South.

PS 371. United States Congress. 4 Credits.

Study of Congress as an institution: congressional elections, the committee system, and the internal distribution of influence; relations with the president and the Supreme Court.

PS 372. Music and Politics. 4 Credits.

In this class we will be asking questions about what is political about music of various musical styles and from diverse historical periods, exploring issues of cultural appropriation, issues of race, gender, and sexuality in music, and the politics of technology and music.

PS 374. Politics of the Middle East. 4 Credits.

Provides an overview of current political developments in the Middle East.

PS 375. Race, Politics, and the Law. 4 Credits.

Examines the development and transformation of race-based domination and resistance in the United States by examining the intersection of policy and law.

PS 378. Games in Politics. 4 Credits.

Politics viewed as strategic interactions among politicians, voters, and countries; focuses on how to model these interactions using tools of game theory.

PS 380. Gender and Politics in Developing Countries. 4 Credits.

Examines gender politics in the developing world and efforts to help women. Topics include female genital cutting, violence against women, economic development, microfinance, migration, trafficking. Offered alternate years.

PS 386. United States Social Movements and Political Change. 4 Credits.

Causes and consequences of American social movements. Considers theoretical perspectives. Topics may include agrarian populism, labor movement, civil rights movement, the women's movement, and identity politics.

PS 387. Russian Politics. 4 Credits.

The course traces Russian politics from a communist regime to its current state, investigates contemporary aspects of Russian politics, and examines Russia's vision of the world and its foreign policy.

PS 390. American Indian Politics. 4 Credits.

Examination of the political and constitutional status of American Indian tribes in the United States, with some comparison to Canada. Focus on history, current policy, and potential futures.

PS 391. Non-Western Political Theory. 4 Credits.

This course examines political ideas from outside of the "Western" tradition. It begins by comparing political ideas in classical China and India with those of classical Greece, and then turns to 19th and 20th century colonial experiences in China, India, and North Africa.

PS 399. Special Studies: [Topic]. 1-5 Credits.

Topics vary from year to year. Repeatable when topic changes.

PS 401. Research: [Topic]. 1-15 Credits.

Repeatable.

PS 403. Thesis. 1-12 Credits.

Repeatable.

PS 404. Internship: [Topic]. 1-2 Credits.

Repeatable once for a maximum of four credits.

PS 405. Reading and Conference: [Topic]. 1-15 Credits.

Repeatable.

PS 406. Field Studies: [Topic]. 1-5 Credits.

Repeatable for maximum of 10 credits.

PS 407. Seminar: [Topic]. 1-4 Credits.

Offerings vary from year to year, depending on student need and faculty interests. Repeatable when topic changes.

PS 408. Workshop: [Topic]. 1-21 Credits.

Repeatable when title changes.

PS 409. Practicum: [Topic]. 1-3 Credits.

Repeatable.

PS 410. Experimental Course: [Topic]. 1-4 Credits.

Offerings vary from year to year, depending on student need and faculty interests. Repeatable when topic changes.

PS 411. Honors Thesis Prospectus. 1 Credit.

Prepares students for writing the senior honors thesis in political science. Provides guidance in framing a suitable topic, conducting preliminary research, and writing a prospectus.

Prereq: majors with honors standing.

PS 433. Marxism and Radical Thought. 4 Credits.

Surveys utopian socialist thought, anarchism, Marxism, and Leninism. Central themes include the nature of radical theory, the role of the state, human nature and the new society.

PS 440. Causes and Prevention of War. 4 Credits.

Surveys theories of causes of war; focuses on major theories of prevention; case studies from World War I, World War II, and other wars.

PS 445. Methods for Politics and Policy Analysis I. 4 Credits.

Introduction to quantitative analysis, concepts and methods of empirical research, applied statistical data analysis in political science. Methods include descriptive statistics, bivariate correlation, and regression techniques.

PS 446. Methods for Politics and Policy Analysis II. 4 Credits.

Survey of multivariate model building for political analysis. Multiple regression, discrete-variable techniques, recursive systems, and cross-level analysis. Application of these techniques to concrete political problems.

Prereq: PS 445/545.

PS 449. Racial Politics in the United States. 4 Credits.

Considers how race has interacted with political development in the U.S. from the New Deal to the present.

PS 455. Theories of International Politics. 4 Credits.

Competing theories of international relations and strategies for testing the theories.

PS 458. Feminist Political Theories. 4 Credits.

Examines the relationship between feminism, gender, and the state. Offered alternate years.

PS 460. Political Economy of East Asia. 4 Credits.

Examines the political economy of East Asia, with a focus on states, markets, and social classes during economic transformation. Offered alternate years.

PS 465. LGBT Rights in the Courts. 4 Credits.

Analyzes the role of legal advocates and the courts in advancing and curtailing lesbian, gay, bisexual, and transgender rights with a focus on relationship recognition, parenting, employment, housing, military, education, and health care. Offered alternate years.

PS 466. Civil Rights in Post-Warren Era. 4 Credits.

Analyzes development in civil rights advocacy in the United States since the heyday of the Warren Court. Focuses primarily on developments in race, gender, disability, and sexuality. Offered alternate years.

PS 467. The United States Presidency. 4 Credits.

An ambivalent view of the presidency as the key institution in the United States political system: source of great good but also of great harm.

PS 470. Constitutional Law. 4 Credits.

Surveys how the U.S. Constitution works as a structure for government. Addresses how the federal courts interact within the U.S. system of government.

PS 471. Intergenerational Justice. 4 Credits.

Examines the ethical and legal obligations that exist between earlier and later generations within a political society.

PS 472. Matters of Life and Death. 4 Credits.

Examines the right to life from political, legal, and philosophical perspectives. Considers abortion, capital punishment, assisted suicide, just-war theory, and animal rights.

PS 475. Politics of the European Union. 4 Credits.

Surveys the historical development and current workings of the European Union's major institutions and policies. Offered alternate years.

PS 477. International Environmental Politics. 4 Credits.

How nations solve international environmental problems. Explores major problems, processes, and current debates. Evaluates existing treaties through case studies.

PS 479. U.S. Interventions in Developing Nations. 4 Credits.

Examines theories of intervention: security, economic imperialism, humanitarian intervention, spreading democracy, domestic politics; over thirty-seven U.S. interventions since 1898 are surveyed.

PS 480. Introduction to Rational Choice. 4 Credits.

Introduces the paradigm of rational choice and game theory that is of special significance to politics.

PS 484. United States Supreme Court. 4 Credits.

The Supreme Court as a political body; the judicial role in the context of the economic, political, social, and psychological factors that influence the court's decisions.

PS 485. Civil Rights and Civil Liberties. 4 Credits.

Overview of the role of rights in the United States legal system. Particular emphasis on the role of freedom and equality in a federal system.

PS 491. Politics of Everyday Life. 4 Credits.

Examines how we try to influence each other's behaviors in the course of everyday life. Readings from several disciplines.

PS 495. United States Political Economy. 4 Credits.

Examines United States political-economic institutions from a comparative and historical perspective. Topics include rise and fall of mass production, labor and the law, and regional development.

PS 503. Thesis. 1-16 Credits.

Repeatable.

PS 507. Seminar: [Topic]. 1-4 Credits.

Repeatable. Offerings vary from year to year, depending on student needs and faculty interests.

PS 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

PS 510. Experimental Course: [Topic]. 1-4 Credits.

Offerings vary from year to year, depending on student needs and faculty interests. Repeatable when topic changes.

PS 540. Causes and Prevention of War. 4 Credits.

Surveys theories of causes of war; focuses on major theories of prevention; case studies from World War I, World War II, and other wars.

PS 545. Methods for Politics and Policy Analysis I. 4 Credits.

Introduction to quantitative analysis, concepts and methods of empirical research, applied statistical data analysis in political science. Methods include descriptive statistics, bivariate correlation, and regression techniques.

PS 546. Methods for Politics and Policy Analysis II. 4 Credits.

Survey of multivariate model building for political analysis. Multiple regression, discrete-variable techniques, recursive systems, and cross-level analysis. Application of these techniques to concrete political problems.

PS 549. Racial Politics in the United States. 4 Credits.

Considers how race has interacted with political development in the U.S. from the New Deal to the present.

PS 555. Theories of International Politics. 4 Credits.

Competing theories of international relations and strategies for testing the theories.

PS 558. Feminist Political Theories. 4 Credits.

Examines the relationship between feminism, gender, and the state. Offered alternate years.

PS 560. Political Economy of East Asia. 4 Credits.

Examines the political economy of East Asia, with a focus on states, markets, and social classes during economic transformation.

PS 565. LGBT Rights in the Courts. 4 Credits.

Analyzes the role of legal advocates and the courts in advancing and curtailing lesbian, gay, bisexual, and transgender rights with a focus on relationship recognition, parenting, employment, housing, military, education, and health care. Offered alternate years.

PS 566. Civil Rights in Post-Warren Era. 4 Credits.

Analyzes development in civil rights advocacy in the United States since the heyday of the Warren Court. Focuses primarily on developments in race, gender, disability, and sexuality. Offered alternate years.

PS 567. The United States Presidency. 4 Credits.

An ambivalent view of the presidency as the key institution in the United States political system: source of great good but also of great harm.

PS 570. Constitutional Law. 4 Credits.

Surveys how the U.S. Constitution works as a structure for government. Addresses how the federal courts interact within the U.S. system of government.

PS 571. Intergenerational Justice. 4 Credits.

Examines the ethical and legal obligations that exist between earlier and later generations within a political society.

PS 572. Matters of Life and Death. 4 Credits.

Examines the right to life from political, legal, and philosophical perspectives. Considers abortion, capital punishment, assisted suicide, just-war theory, and animal rights.

PS 575. Politics of the European Union. 4 Credits.

Surveys the historical development and current workings of the European Union's major institutions and policies. Offered alternate years.

PS 577. International Environmental Politics. 4 Credits.

How nations solve international environmental problems. Explores major problems, processes, and current debates. Evaluates existing treaties through case studies.

PS 579. U.S. Interventions in Developing Nations. 4 Credits.

Examines theories of intervention: security, economic imperialism, humanitarian intervention, spreading democracy, domestic politics; over thirty-seven U.S. interventions since 1898 are surveyed.

PS 584. United States Supreme Court. 4 Credits.

The Supreme Court as a political body; the judicial role in the context of the economic, political, social, and psychological factors that influence the court's decisions.

PS 585. Civil Rights and Civil Liberties. 4 Credits.

Overview of the role of rights in the United States legal system. Particular emphasis on the role of freedom and equality in a federal system.

PS 595. United States Political Economy. 4 Credits.

Examines United States political-economic institutions from a comparative and historical perspective. Topics include rise and fall of mass production, labor and the law, and regional development.

PS 601. Research: [Topic]. 1-16 Credits.

Repeatable.

PS 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

PS 603. Dissertation. 1-16 Credits.

Repeatable.

PS 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

PS 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

PS 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

PS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

PS 609. Practicum: [Topic]. 1-4 Credits.

Repeatable.

PS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PS 612. Qualitative Methods. 5 Credits.

Survey of rationales for qualitative methods in the social sciences and the main conceptual and practical issues raised in qualitative research. Offered alternate years.

PS 617. Political Behavior. 5 Credits.

Provides an overview of the important literature in the subfield of political behavior in U.S. politics.

PS 618. American Political Institutions. 5 Credits.

One of three required seminars for PhD students planning to take a comprehensive examination in American politics. Explores how political science approaches the study of institutional contributions to political and policy developments.

PS 619. United States Political Culture. 5 Credits.

In this course we examine the different ways that scholars study the relationship between politics and culture, and then focus on the United States as our case.

PS 620. State of the Discipline. 5 Credits.

Introduction to trends in the political science profession and to the faculty at the University of Oregon.

PS 622. Political Theory. 5 Credits.

Survey of major works in the field of classical and contemporary political theory.

PS 624. International Relations. 5 Credits.

Survey of major works in the field of international relations.

PS 625. Public Policy. 5 Credits.

Survey of major works in the field of public policy.

PS 626. International Political Economy. 5 Credits.

One of two required seminars for PhD students planning to take a comprehensive examination in international relations. Explores how politics and economics interact in shaping economic relations among states.

PS 627. Formal Theory and Methodology. 5 Credits.

Reviews basic formal theory as developed in political science since 1957.

PS 628. States and State-Society Relations. 5 Credits.

Examines how scholars have studied the state and its relationship to society. Students develop a comparative perspective of contentious politics ranging from peasant rebellions to revolutions to transnational social movements.

PS 629. Comparative Political Economy. 5 Credits.

Doctoral-level survey of how political factors explain variations in national or regional trajectories of economic development, including industrialization, wealth, growth, and inequality.

PS 630. States and Regimes. 5 Credits.

Introduction to the major issues, theories, concepts, and arguments about states and regimes in comparative politics. Offered alternate years.

Psychology

Ulrich Mayr, Department Head

541-346-4921

Straub Hall

1227 University of Oregon

Eugene, Oregon 97403-1227

The mission of the Department of Psychology undergraduate program is to educate students about the major research findings and theories in the field of psychology, and to train them to use an empirical approach to understanding human behavior. Specifically, the program endeavors to provide students with

- Broad exposure to the basic concepts and ethical issues of psychology
- Education in the scientific method, including applied research opportunities
- Strong critical-thinking and written-communication skills, including the ability to evaluate and convey the evidence for claims regarding human behavior
- Experience through internship and practicum opportunities at partnering community organizations

Faculty

Jennifer Ablow, associate professor (developmental psychopathology, attachment, interpersonal emotional arousal and regulation). BA, 1988, Colorado, Boulder; PhD, 1997, California, Berkeley. (1999)

Nicholas Allen, Ann Swindells Professor in Clinical Psychology (adolescent development and mental health, mood disorders, developmental social and affective neuroscience). BS 1985, MS, 1988, PhD, 1993, Melbourne. (2013)

- Holly Arrow, professor (group dynamics, psychology of war). BA, 1977, Elmira; MFA, 1982, Colorado; MA, 1995, PhD, 1996, Illinois, Urbana-Champaign. (1996)
- Dare A. Baldwin, professor (language acquisition, semantic development, cognitive development). BA, 1982, California, Berkeley; MSc, 1984, California, Santa Cruz; PhD, 1989, Stanford. (1993)
- Ted Bell, instructor (brain development, human memory, applied cognitive science). BS, 1990, Oregon State; MS, 1997, PhD, 2005, Oregon. (2011)
- Elliot Berkman, associate professor (affective neuroscience, self-regulation, quantitative methods for neuroimaging). BA, 2002, Stanford; PhD, 2009, California, Los Angeles. (2010)
- Melynda D. Casement, assistant professor (clinical psychology). AB, 2002, Mount Holyoke College; PhD, 2010, Michigan, Ann Arbor. (2016)
- Robert Chavez, assistant professor (social neuroscience, interpersonal perception, personality and individual differences). BS, 2008, New Mexico; PhD, 2015, Dartmouth College. (2016)
- David Condon, assistant professor (personality and individual differences, data science, cognitive abilities). AB, 1996, Duke; MBA, 2002, Chicago; MS, 2012, PhD, 2014, Northwestern. (2019)
- Paul Dasonville, associate professor (cognitive neuroscience, perception, sensorimotor integration). BS, 1986, Texas A & M; PhD, 1992, California, Los Angeles. (1999)
- Crystal Dehle, clinical associate professor (clinical psychology). BS, 1990, Washington State; PhD, 1995, Oregon. (2005)
- Dagmar Zeithamova Demircan, assistant professor (cognitive neuroscience, memory). MA, 2003, Charles University, Prague; PhD, 2008, Texas, Austin. (2014)
- Sarah DuBrow, assistant professor (cognitive neuroscience, memory, decision-making). BA, 2008, Stanford; PhD, 2016, New York. (2019)
- Nicole M. Dudukovic, senior instructor (cognitive neuroscience, memory). BA, 2000, Stanford; MA, 2002, California, Los Angeles; PhD, 2007, Stanford. (2015)
- Caitlin M. Fausey, assistant professor (development, language and cognition, experience sampling). BA, 2004, Northwestern; MA, 2008, PhD, 2010, Stanford. (2014)
- Philip A. Fisher, professor (prevention research, stress neurobiology, foster care); Philip H. Knight Chair. BA, 1986, Bowdoin College; MS, 1990, PhD, 1993, Oregon. (2008)
- Jennifer J. Freyd, professor (trauma psychology). BA, 1979, Pennsylvania; PhD, 1983, Stanford. (1987)
- Gordon C. Nagayama Hall, professor (sociocultural context of psychopathology, sexual aggression). BS, 1977, Washington (Seattle); PhD, 1982, Fuller Theological Seminary. (2001)
- Sara D. Hodges, professor (social cognition, construction of social judgments). BA, 1989, Rhodes; MA, 1992, PhD, 1995, Virginia. (1995)
- Benjamin Hutchinson, assistant professor (cognitive neuroscience, memory, attention). BA, 2004, Pennsylvania; PhD, 2011, Stanford. (2018)
- Christina M. Karns, research associate (attention, social emotions, neuroplasticity, neuroimaging). BS, 1999, California, San Diego; PhD, 2008, California, Berkeley. (2008)
- Jagdeep Kaur-Bala, senior instructor (cognitive neuroscience, perception, attention). BSc, 1988, MSc, 1990, All India Institute of Medical Sciences, New Delhi; PhD, 1996, Tata Institute of Fundamental Research, Mumbai. (2007)
- Brice A. Kuhl, associate professor (cognitive neuroscience, memory, neuroimaging). BA, 2001, Kenyon College; PhD, 2009, Stanford. (2015)
- Robert Mauro, associate professor (social, emotions, psychology and law). AB, 1979, Stanford; MS, 1981, Yale; PhD, 1984, Stanford. (1984)
- Ulrich Mayr, Robert and Beverly Lewis Professor in Neuroscience (cognitive neuroscience, cognitive aging). BA, 1988, PhD, 1992, Berlin. (2000)
- Jeffrey Measelle, associate professor (developmental psychology, emotional development, family). BA, 1985 Brown; PhD, 1997, California, Berkeley. (1999)
- Kate Mills, assistant professor (development, social neuroscience, adolescence). BA, 2011, Portland State; PhD, 2015, University College, London. (2018)
- Jordan Pennefather, senior instructor (social and educational psychology, methodology, data analysis). BA, 2003, California State, Dominguez Hills; PhD, 2008, Colorado, Boulder. (2010)
- Jennifer Pfeifer, professor (developmental and social cognitive neuroscience, adolescent self-perception and emotion processing). BA, 2000, Stanford; MA, 2003, PhD, 2007, California, Los Angeles. (2008)
- Catrin Rode, instructor (cognitive psychology). MA, 1992, Konstanz; PhD, 1996, Münster. (2000)
- Gerard Saucier, professor (personality beliefs and values, psychometrics). BA, 1978, North Carolina, Chapel Hill; MA, 1984, PhD, 1991, Oregon. (1997)
- Margaret E. Sereno, associate professor (visual cognition, neural network modeling, brain imaging). BA, 1983, Northern Illinois; PhD, 1989, Brown. (1991)
- Paul Slovic, professor (judgment, decision-making, risk assessment). BA, 1959, Stanford; MA, 1962, PhD, 1964, Michigan. (1986)
- Matt Smear, assistant professor (systems neuroscience, olfaction). ScB, 1998, Duke; PhD, 2005, California, San Francisco. (2014)
- Sanjay Srivastava, professor (interpersonal perception and self-perception, social functions of emotions, personality dynamics and development). BA, 1995, Northwestern; PhD, 2002, California, Berkeley. (2004)
- Don M. Tucker, professor (emotion, cognition, neuropsychology). BA, 1969, Colorado; MS, 1972, PhD, 1974, Pennsylvania State. (1984)
- Nash Unsworth, professor (working memory, memory and attention differences, memory search and retrieval). BS, 2001, Idaho State; PhD, 2006, Georgia Institute of Technology. (2010)

Michael Wehr, professor (systems neuroscience, auditory neurophysiology, cortical circuits). ScB, 1991, Brown; PhD, 1999, California Institute of Technology. (2005)

Sara Weston, assistant professor (social personality, health, personality development). BA, 2012, Northwestern; MA, 2014, PhD, 2017, Washington (St. Louis). (2019)

Maureen Zalewski, associate professor (clinical psychology, emotion and stress regulation contributing to psychopathology) BS, 2005, Pennsylvania State; MS, 2008, PhD, 2012, Washington (Seattle). (2013)

Emeriti

Lewis R. Goldberg, professor emeritus. AB, 1953, Harvard; MA, 1954, PhD, 1958, Michigan. (1960)

Barbara Gordon-Lickey, professor emerita. AB, 1963, Radcliffe; PhD, 1966, Massachusetts Institute of Technology. (1969)

Marvin Gordon-Lickey, professor emeritus. AB, 1959, Oberlin; MA, 1962, PhD, 1965, Michigan. (1967)

Douglas L. Hintzman, professor emeritus. BA, 1963, Northwestern; PhD, 1967, Stanford. (1969)

Ray Hyman, professor emeritus. AB, 1950, Boston University; MA, 1952, PhD, 1953, Johns Hopkins. (1961)

Carolyn Keutzer, associate professor emerita. BA, 1960, MA, 1963, PhD, 1967, Oregon. (1967)

Daniel P. Kimble, professor emeritus. BA, 1956, Knox; PhD, 1961, Michigan. (1963)

Peter M. Lewinsohn, professor emeritus. BS, 1951, Allegheny; MA, 1953, PhD, 1955, Johns Hopkins. (1965)

Edward Lichtenstein, professor emeritus. BA, 1956, Duke; MA, 1957, PhD, 1961, Michigan. (1966)

Richard Marrocco, professor emeritus. BA, 1965, California, Los Angeles; PhD, 1972, Indiana. (1973)

Louis J. Moses, professor emeritus. BA, 1983, Western Australia; PhD, 1991, Stanford. (1993)

Helen Neville, professor emerita. BA, 1968, British Columbia; MA, 1970, Simon Fraser; PhD, 1975, Cornell. (1995)

Michael I. Posner, professor emeritus. BS, 1957, MS, 1959, Washington (Seattle); PhD, 1962, Michigan. (1965)

Mary K. Rothbart, professor emerita. BA, 1962, Reed; PhD, 1967, Stanford. (1969)

Myron Rothbart, professor emeritus. BA, 1962, Reed; PhD, 1966, Stanford. (1969)

Anne D. Simons, professor emerita. BA, 1974, Stanford; PhD, 1982, Washington (St. Louis). (2006)

Marjorie Taylor, professor emerita. BS, 1979, MS, 1981, Acadia; PhD, 1985, Stanford. (1985)

Robert L. Weiss, professor emeritus. BA, 1952, PhD, 1958, State University of New York, Buffalo. (1966)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts**
- **Bachelor of Science**
- **Minor**

Undergraduate Studies

All students participate in and collaborate on research as part of the academic course sequence. Students are encouraged to gain additional research experience through research assistant positions in faculty labs and the undergraduate honors thesis program. The psychology major affords students great flexibility in selecting upper-division courses to fit individual goals and interests. Classroom and internship opportunities are enriched by numerous faculty research programs that range in levels of analysis and intellectual focus. An undergraduate degree in psychology provides the background for a broad range of careers, including social services, education, law, or graduate programs in psychology.

Preparation

High school preparation should include courses in social sciences as well as the natural sciences (physics, biology, chemistry). Language and mathematical skills are also highly desirable. In general, the broad liberal-arts training that prepares students for college studies is appropriate for majoring in psychology at the university.

Careers

Some students major in psychology to prepare for graduate training and careers in related fields such as personnel relations, vocational and personal counseling, medicine and dentistry, social and case work, marketing, administration, the legal profession, or counseling in the public schools. Others prepare for careers as academic psychologists (teaching and research), clinical psychologists (mental health centers, institutions, and private practice), industrial and organizational psychologists, and government psychologists (testing, research, and administration).

Career information is also available on the American Psychological Association website.

Review of Courses

Lower-Division Courses

Among lower-division courses, psychology is introduced as a social science by the following courses:

Code	Title	Credits
PSY 201	Mind and Brain	4
PSY 202	Mind and Society	4

Transfer students should plan to take no more than two lower-division courses before starting upper-division work. The introductory courses should be chosen with an eye toward prerequisites for upper-division courses and toward providing a broad background in the field. Transfer equivalents for lower-division courses are evaluated case by case. Check with the department's head advisor to determine equivalency of completed introductory work.

Upper-Division Courses

Upper-division courses fall into four categories:

1. Courses that teach research skills and methodologies—Scientific Thinking in Psychology (PSY 301), Statistical Methods in Psychology (PSY 302), Research Methods in Psychology: [Topic] (PSY 303)
2. 300-level core courses that provide breadth in the major—Biopsychology (PSY 304), Cognition (PSY 305), Social Psychology (PSY 306), Personality (PSY 307), Developmental Psychology (PSY 308), Psychopathology (PSY 309)
3. Other 300-level courses of broad interest to many different majors throughout the university as well as to psychology majors
4. Area courses, numbered 410 to 480, designed for psychology majors, which may be open to other students who fulfill the prerequisites and obtain instructor approval

Group Requirements

For psychology courses approved to fulfill social science or science group requirements, see the current course list on the registrar's website (<https://registrar.uoregon.edu/current-students/group-satisfying-and-multicultural-courses>).

Major Requirements

To satisfy major requirements students take a total of 68 credits. Of those credits, 56 credits in psychology courses are required, 48 of which must be upper-division, and 16 of which must be taken in residence at the University of Oregon. Mind and Brain (PSY 201) and Mind and Society (PSY 202) must be taken for letter grades and passed with grades of mid-C or better. All other required courses must be taken for letter grades and passed with grades of C– or better, although elective psychology courses may be taken pass/no pass. A minimum grade point average of 2.00 in psychology course work is required.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Introductory Prerequisite Courses		
WR 121	College Composition I	4
WR 122	College Composition II (WR 123 recommended)	4
or WR 123	College Composition III	
PSY 201	Mind and Brain	4
PSY 202	Mind and Society	4
MATH 243	Introduction to Methods of Probability and Statistics	4
Methods Foundations Courses		
PSY 301	Scientific Thinking in Psychology	4
PSY 302	Statistical Methods in Psychology	4
PSY 303	Research Methods in Psychology: [Topic]	4
300-Level Core Courses		12
Select three of the following, one of which must be PSY 304 or PSY 305:		
PSY 304	Biopsychology	
PSY 305	Cognition	
PSY 306	Social Psychology	
PSY 307	Personality	
PSY 308	Developmental Psychology	
PSY 309	Psychopathology	
400-Level Specialty Courses		12

Select three of the following:

PSY 420	Psychology and Law
PSY 433	Learning and Memory
PSY 436	Human Performance
PSY 438	Perception
PSY 440	Psycholinguistics
PSY 445	Brain Mechanisms of Behavior
PSY 449	Cognitive Neuroscience
PSY 450	Hormones and Behavior
PSY 457	Group Dynamics
PSY 458	Decision-Making
PSY 459	Cultural Psychology
PSY 468	Motivation and Emotion
PSY 472	Psychology of Trauma
PSY 473	Intimate Relationships
PSY 475	Cognitive Development
PSY 476	Language Acquisition
PSY 478	Social Development
PSY 479	Infancy
PSY 480	Development and Psychopathology

Upper-Division Elective Courses ¹	12
Total Credits	68

- ¹ Students must take 12 upper-division psychology elective credits, 8 of which must be actual content courses. A maximum of 4 credits in Research: [Topic] (PSY 401) or Practicum: [Topic] (PSY 409) may be applied to the upper-division credits. Practicum credits must be earned at a practicum site approved by the head undergraduate faculty advisor.

Upper-Division Elective Courses ¹		12
Total Credits		68

¹ Students must take 12 upper-division psychology elective credits, 8 of which must be actual content courses. A maximum of 4 credits in Research: [Topic] (PSY 401) or Practicum: [Topic] (PSY 409) may be applied to the upper-division credits. Practicum credits must be earned at a practicum site approved by the head undergraduate faculty advisor.

Planning a Program

Besides attending lecture courses, students may participate in seminars, reading and conference courses, laboratory work, and other means of gaining experience. Departmental requirements for a psychology major are designed to maximize individual curriculum planning. Students are encouraged to schedule frequent consultations with their advisors to ensure completion of all requirements. Peer advisors can help students create a two- or four-year plan.

Sample Program

The sample program shown provides an idea of a typical course load during the freshman year for a student working on a bachelor of science or bachelor of art degree.

First Year

Fall	Credits
First-year interest group or elective course	4
First-year interest group course or arts and letters group-satisfying course	4

PSY 202	Mind and Society (or a social science group-satisfying course)	4
BA-required mathematics or second-language course		4
Winter		
WR 121	College Composition I	4
PSY 201	Mind and Brain (or a science group-satisfying course)	4
Arts and letters group-satisfying course		4
BA-required mathematics or second-language course		4
Spring		
WR 123	College Composition III	4
PSY 202	Mind and Society (or social science group-satisfying course)	4
MATH 243	Introduction to Methods of Probability and Statistics (or science group-satisfying course)	4
BA-required second-language or elective course		4
Total Credits:		48

Departmental requirements for a psychology major are designed to maximize individual curriculum planning. This should be done in close and frequent consultation with the advisor.

Peer Advising

The psychology department's peer advisors work to make academic advising more effective, inclusive, and efficient. Questions about the university system and specific inquiries about the department's norms, opportunities, and courses are welcome. During the academic year, the peer advisors hold regularly scheduled office hours in 229 Straub Hall.

Preparation for Graduate Study

A bachelor's degree is seldom sufficient qualification for professional work in psychology; at least a master's degree is required for most positions. Students should not undertake graduate work unless their grades in undergraduate psychology and related courses have averaged mid-B (3.00) or better.

Prospective graduate students in psychology are advised to take courses in related fields such as anthropology, biology, computer science, chemistry, linguistics, mathematics, philosophy, physics, and sociology. Strong preparation in quantitative methods is advisable. Reading knowledge of at least one second language appropriate to psychology also may be useful.

Honors Curriculum

Students with excellent records who plan to pursue a career in psychology may consider applying to the departmental honors program upon completion of PSY 303. The honors program centers on an independent research project, which the student develops and carries out under the supervision of a departmental committee. Information

about admission criteria and how to apply is available online (<http://psychology.uoregon.edu/undergraduate/academics/honors-program>).

Minor Requirements

Special Studies: [Topic] (PSY 199) does not count toward the minor.

Code	Title	Credits
PSY 201	Mind and Brain	4
PSY 202	Mind and Society	4
PSY 301	Scientific Thinking in Psychology	4
PSY 302	Statistical Methods in Psychology	4
Select three of the following, one of which must be PSY 304 or PSY 305:		12
PSY 304	Biopsychology	
PSY 305	Cognition	
PSY 306	Social Psychology	
PSY 307	Personality	
PSY 308	Developmental Psychology	
PSY 309	Psychopathology	
Total Credits		28

All 28 credits must be taken for letter grades and passed with a C– or better. At least 16 credits must be upper-division courses taken in residence at the University of Oregon.

Middle and Secondary School Teaching Careers

The College of Education offers a fifth-year program for middle-secondary teaching in social studies. This program is described in the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- Master of Arts
- Master of Science
- Doctor of Philosophy

Graduate Studies

Master's Degree Program

The individualized master's degree program does not lead to a PhD. The degree—either a master of arts (MA) or a master of science (MS)—requires 45 credits of course work. Program and application information may be obtained from the department website. Clinical training is not available in the master's program.

Doctoral Degree Programs

The five chief PhD program options are clinical, cognitive-neuroscience, systems neuroscience, developmental, and social-personality.

The department maintains a psychology clinic; specialized facilities for child and social research; experimental laboratories for human research, and well-equipped animal laboratories.

Applicants to the PhD program in psychology must take the Graduate Record Examination (GRE) and provide official results to institute code 4846 and department code 2016. Applicants must also provide three letters of recommendation, curriculum vitae, writing sample, statement of purpose, and official transcripts from all colleges and universities attended. Instructions, deadlines, and a complete list of required materials may be obtained from the department website.

During the first year of graduate work, students acquire a broad background in psychology and are introduced to methods, research, and ethics. Each student's program is planned in relation to background, current interests, and future goals. Research experience and a dissertation are required of PhD candidates; teaching experience is recommended, and opportunities to teach are available.

Requirements for Doctoral Students

Code	Title	Credits
PSY 611–613	Data Analysis I-III	12
Three of five core courses		
PSY 607	Seminar: [Topic] (three terms: Research, Ethics, Research)	1-5
First-year research requirement		
Supporting area requirement		
Major preliminary examination		
Additional course work required for students in the clinical program ¹		
Doctoral dissertation		

¹ See the *Guide to the Clinical Psychology Program*.

More detailed program and application information may be obtained from the department website.

For general regulations governing graduate work at the university, see the **Graduate School** section of this catalog.

Clinical Psychology

The clinical psychology program has been continuously accredited by the American Psychological Association since 1958 (Office of Program Consultation and Accreditation, American Psychological Association, 750 First Street NE, Washington, D.C. 20002-4242, 202-336-5979, email apaaccred@apa.org, website www.apa.org/ed/accreditation (<http://www.apa.org/ed/accreditation>)); it is also accredited by the Psychological Clinical Science Accreditation System, and is a member of the Academy of Psychological Clinical Science.

The program endorses a clinical scientist model for graduate training. This model emphasizes multilevel conceptualizations of psychopathology, comprising neurobiological, developmental, psychosocial, and multicultural perspectives. Doctoral students receive training in infant, child, and adult psychopathology; culture and diversity; infant, child, family, and adult assessment; and neuropsychology. In all practica and clinical training experiences there is a strong focus on evidence-based treatments. Students receive training in the clinical techniques and practices, as well as the methodology for development, implementation, and evaluation of these interventions. Both psychotherapeutic interventions and prevention programs are included in the training.

The major goal of doctoral training is to support promising doctoral students in developing careers as scientist-practitioners. Students interested primarily in clinical practice would most likely prefer a program

less research-oriented than the Oregon Clinical Psychology Training Program.

The research and clinical opportunities available to doctoral students depend on current activities of the clinical and departmental faculty, and may also encompass ongoing projects in research hubs linked with the clinical program, notably the Center for Translational Neuroscience, Center for Digital Mental Health, and the Prevention Science Institute, as well as research institutes located in the Eugene community that are affiliated with the clinical program. These institutions include the the Oregon Research Institute, Oregon Social Learning Center, Decision Research, and Electrical Geodesics.

Members of the clinical faculty and other faculty members with clinical interests have ongoing research in several areas, including the neurobiology of early stress, brain development and neural plasticity, behavior and molecular genetics, infant mental health, emotion and attention, prevention science, school readiness, child welfare system research, pubertal development and the transition to adolescence, depression, anxiety, personality measurement and theory, cognitive therapy, child and family assessment, social and emotional adjustment of children and adolescents, drug and alcohol abuse, cross-cultural psychology, sexual aggression, interpersonal violence, child abuse, institutional betrayal, and traumatic stress.

The department places a particularly high priority on translational research, encouraging multidisciplinary collaborations with colleagues from other areas of psychology and other academic departments. Currently, faculty research is funded by the National Science Foundation, National Institute of Mental Health, National Institute of Drug Abuse, National Institute on Child Health and Development, and the Institute of Education Sciences.

Please note: All clinical students must submit an FBI criminal background check and, when participating in external practicums, must carry their own liability insurance. Newly admitted students must complete a background check prior to enrolling in the program.

Additional information regarding course requirements for clinical students is provided in the *Guide to the Clinical Program* and the *Doctoral Student Handbook*, located on the department website.

Cognitive Psychology and Cognitive Neuroscience

The Department of Psychology at the University of Oregon has played an important role in the development of the field of cognitive neuroscience, and current researchers are continuing that tradition. Research areas include the cognitive and neural basis of perception, visual cognition, selective attention, working memory, long-term memory, executive control, action, language processing, and brain plasticity. In addition, studies include how these processes are altered by development in impoverished environments, aging, traumatic brain injury, autism, and other conditions. Studies employ a wide range of methods, including behavioral experiments, analyses of individual differences, functional imaging, electrophysiology, and transcranial magnetic and direct current stimulation.

The research efforts of the cognitive neuroscience laboratories benefit from the collaborative atmosphere at the University of Oregon, both within psychology and across other departments, allowing for an exploration of cognitive processes at many levels of analysis. Labs are located within the state-of-the-art facilities of the Robert and Beverly Lewis Integrative Science Building, in close proximity to the many other labs of

the Institute of Neuroscience. The building also houses the Lewis Center for Neuroimaging, a research-dedicated facility with a 3T MRI scanner that supports ongoing research and training with functional and structural magnetic resonance imaging.

One of the most important aspects of the cognitive neuroscience graduate program is its informal, collaborative atmosphere. At the same time, there is an emphasis on the development of imagination and intellectual independence. Students are encouraged to explore their research ideas from many different perspectives, with the assistance of the expertise from researchers in several labs within the Department of Psychology and the Institute of Neuroscience.

Developmental Psychology

The Department of Psychology has recently expanded the scope of its developmental psychology program with the addition of new faculty members and new emphases in the graduate curriculum. The department as a whole offers extensive coverage of development during infancy, childhood, and adolescence, with some additional interest in aging. Several areas of research are strongly represented, including cognitive development, socio-emotional development, developmental psychopathology, and developmental social and affective neuroscience.

Several exciting clusters of expertise exist within these broad areas. Research on theory of mind and perspective-taking, as well as learning and knowledge acquisitions, links to research on the development of executive functioning and self-regulation. This cluster also connects with research on self-evaluation, affective and appetitive motivations, and decision-making. Another vibrant area of work looks at infant processing of action, language, and the statistical properties of everyday visual, linguistic, and musical environments. In addition, many researchers share a strong interest in social contextual effects on infant, child, and adolescent well-being, ranging from the small-scale (familial and peer influences, early adversity) to the large-scale (cultural and global contexts of development).

Members of the developmental psychology faculty also have strong collaborative links with the Center for Translational Neuroscience (<http://ctn.uoregon.edu>), Oregon Social Learning Center (<http://www.oslc.org>), Prevention Science Institute (<http://psi.uoregon.edu>), and Oregon Research Institute (<http://www.ori.org>). Current and previous funding sources for the faculty and students in developmental psychology include the Bill and Melinda Gates Foundation, National Science Foundation, National Institute on Drug Abuse, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institute of Mental Health, John Merck Scholars Program, James S. McDonnell Foundation, John Templeton Foundation, and the Oregon Medical Research Foundation. Graduates from the program have risen to faculty and postdoctoral positions at the University of Minnesota, Swarthmore College, Queen's University, Vanderbilt University, University of California at Davis, University of Michigan, Harvard University, Hamilton College, University of Utah, Oregon Health and Science University, Oregon Social Learning Center, University of Oregon, Villanova University, Brown University, University of Regina, Otterbein University, Wabash College, College of Idaho, and others.

Social and Personality Psychology

Research in social and personality psychology at the University of Oregon reflects an intellectually diverse approach to understanding intrapersonal and interpersonal processes and individual differences. The primary goal of the program is to train outstanding researchers, concentrating on high-quality research and training combined with

substantive and methodological breadth. Faculty members conduct research spanning a broad spectrum of human behavior using innovative approaches. Areas of particular focus include the following:

- Emotion and motivation—nature of emotions, emotion regulation, social functions of emotions, self-regulation, goal pursuit, self-control
- Self, identity, and social cognition—self-perception and interpersonal perception, perspective-taking and empathy, self-other comparisons
- Groups, networks, and organizations—status hierarchies, social power, psychology of war and sociopolitical violence, group dynamics, online social networks
- Culture, values, and worldviews—moral psychology, culture and belief systems, psychology of religion
- Personality structure and development—structure of personality attributes, culture and personality description, lifespan development
- Decision-making and risk perception—human judgment, individual and group decision-making, decision-making in applied contexts (e.g., legal, aviation), risk perception, communication, and assessment

Research in these areas draws upon a wide range of methods, including individual, dyadic and group methods, psychophysiology, neuroimaging, neuroendocrinology, experience sampling, longitudinal studies, surveys, computational methods, and field studies. Students have the opportunity to develop their skills through course work and through collaboration with faculty mentors.

The program encourages interdisciplinary approaches, and training exposes students to a wide range of topics through small seminars, informal brown-bag series, lab meetings, and a variety of other opportunities. Students often work with multiple instructors and researchers, including faculty members from other areas of psychology, from other departments and units on campus, and from other institutions. Students may flexibly tailor their own graduate program under the guidance of faculty advisors, making the social and personality psychology program a distinctive training experience for each graduate student.

System Neuroscience

Systems neuroscience at the University of Oregon bridges the psychology and biology departments, and is strongly affiliated with the Institute of Neuroscience. Research areas span levels from genes to circuits to behavior, with a focus on understanding how neuronal computations underlie behavior. Researchers study the sensory systems, such as the olfactory, visual, and auditory systems, as well as how they interact with neural systems for memory, attention, and decision-making. Graduate students studying systems neuroscience join the neurons, circuits, and cognition graduate program, which provides an interdisciplinary training program that includes cross-rotations in different laboratories, multilab group meetings, research seminars, journal clubs, and retreats. Students combine a core neuroscience curriculum with a customized course of study designed to fit their interests.

Systems neuroscience labs at Oregon are highly collaborative within the systems area as well as with biology labs studying synaptic, cellular, and molecular neuroscience and with cognitive neuroscience labs using fMRI and EEG to study working memory and attention in humans. Research uses a range of innovative approaches, including optogenetics,

electrophysiology, imaging, and theory, placing systems neuroscience at the heart of a highly collaborative intellectual community.

Courses

PSY 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PSY 201. Mind and Brain. 4 Credits.

Introduction to perception, memory, learning, and cognition.

PSY 202. Mind and Society. 4 Credits.

Introduction to topics in clinical, personality, social, and developmental psychology.

PSY 301. Scientific Thinking in Psychology. 4 Credits.

Fundamentals in the empirical study of human behavior, including hypothesis formation, experiment design, behavioral data basics, and critical evaluation of scientific claims. Sequence with PSY 302, PSY 303. Students may not register for PSY 301 after completing PSY 303.

PSY 302. Statistical Methods in Psychology. 4 Credits.

Probability and statistics applied in psychological research. Topics include descriptive statistics, hypothesis testing, correlation, regression, and design of experiments. With laboratory. Sequence with PSY 301, PSY 303.

Prereq: MATH 243 or one from MATH 241, MATH 246, MATH 251; PSY 301, WR 121; Pre- or coreq: PSY 201, 202.

PSY 303. Research Methods in Psychology: [Topic]. 4 Credits.

Practical experience designing, conducting, analyzing, and communicating original research about human behavior. Sequence with PSY 301, PSY 302. Repeatable once for a total of 8 credits when the topic changes.

Prereq: PSY 201, PSY 202, PSY 301, PSY 302; one from WR 122, WR 123.

PSY 304. Biopsychology. 4 Credits.

Relationships between brain and endocrine activity and behavior. Topics include sensation, perception, sexual behavior, drug effects, eating, drinking, sleeping, dreaming, and learning.

Prereq: PSY 201.

PSY 305. Cognition. 4 Credits.

Major topics addressed in this class include perception, attention, memory, language, reasoning, and decision-making.

Prereq: PSY 201.

PSY 306. Social Psychology. 4 Credits.

Processes underlying social perception and social interaction. Topics include aggression, the self-concept, stereotyping and prejudice, conformity, persuasion, attraction, and helping.

Prereq: PSY 202.

PSY 307. Personality. 4 Credits.

Theory and methods for studying human traits, including personality tests and measures. Current research in personality. Studies of age, gender, culture, and relation to emotion and motivation.

Prereq: PSY 202.

PSY 308. Developmental Psychology. 4 Credits.

Survey of cognitive, social-emotional, and personality development in infancy, childhood, adolescence, adulthood.

Prereq: PSY 202.

PSY 309. Psychopathology. 4 Credits.

Major descriptive and theoretical approaches to etiological, developmental, and social factors in emotion and personality disorders. Includes assessment, diagnosis, treatment, and special topics. Prereq: PSY 202.

PSY 348. Music and the Brain. 4 Credits.

Explores the neural correlates of our perception of tonality, harmony, melody, and rhythm and how these relate to neurobiology, brain damage, and cognitive neuroscience.

PSY 366. Culture and Mental Health. 4 Credits.

Role of culture in the definition and maintenance of mental health and the definition and treatment of mental illness.

PSY 380. Psychology of Gender. 4 Credits.

Critical analysis of evidence for sex differences, gender roles, and the effect of gender on traditional issues in psychology. Topics include parenthood, violence, and sexual orientation.

PSY 383. Psychoactive Drugs. 4 Credits.

Physiological and behavioral effects of psychoactive drugs such as alcohol, opiates, barbiturates, and excitants. The psychology of use and overuse; therapies for correcting drug problems.

PSY 388. Human Sexuality. 4 Credits.

The nature of human sexuality; hormonal, instinctual, and learned factors in sexuality; psychosexual development; sexual orientation; frequency and significance of various types of sexual behavior; sexual inadequacy; sexual deviation.

PSY 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PSY 401. Research: [Topic]. 1-21 Credits.

Repeatable.

PSY 403. Thesis. 1-12 Credits.

Repeatable.

PSY 405. Reading and Conference: {Topic}. 1-21 Credits.

Repeatable.

PSY 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

PSY 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

PSY 408. Laboratory Projects: [Topic]. 1-9 Credits.

Repeatable.

PSY 409. Practicum: [Topic]. 1-9 Credits.

Repeatable.

PSY 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PSY 412. Applied Data Analysis. 4 Credits.

Intermediate-level practical data analysis and interpretation. Topics include experimental design, analysis of variance, multiple regression, exploratory data analysis. Extensive computer use. Honors only. Prereq: PSY 303.

PSY 420. Psychology and Law. 4 Credits.

Introduction to topics of concern to both psychology and the law. Includes eyewitness identification, legal decision-making, criminal defenses, profiling, polygraphy, and mental-health law. Prereq: PSY 303.

PSY 433. Learning and Memory. 4 Credits.

Processes underlying learning and memory, including evolution. Topics range from simple forms of behavior change to the acquisition, retention, forgetting, and retrieval of symbolic information. Prereq: PSY 303; one course from PSY 304, PSY 305.

PSY 436. Human Performance. 4 Credits.

Motor and intellectual capacities; analysis of the flow of information within the nervous system; applications of performance principles to human-machine systems. Prereq: PSY 303, PSY 305.

PSY 438. Perception. 4 Credits.

Topics covered are color, size, shape, depth, distance, and movement. Examines the relationships between stimuli and perception, stimuli and the neural response, and the neural response and perception. Prereq: PSY 303, PSY 304.

PSY 440. Psycholinguistics. 4 Credits.

Processes and structures underlying language use. Methods of studying language processing. Relationships between psycholinguistic data and observations from linguistics and neurophysiology. Prereq: PSY 303, PSY 305.

PSY 445. Brain Mechanisms of Behavior. 4 Credits.

Organization of the mammalian brain. Structure and function of the neuronal systems underlying vision, perception, motivation, coordinated movement, sleep-wakefulness, learning and memory, and affective disorders. Prereq: PSY 303, 304.

PSY 449. Cognitive Neuroscience. 4 Credits.

Integrative neural mechanisms of normal and abnormal processes in systems (e.g., selective attention, language, memory, object recognition, and emotion). Prereq: PSY 303, 304.

PSY 450. Hormones and Behavior. 4 Credits.

Relationships among the brain, endocrine systems, and behavior. Developmental effects of hormones on the brain, puberty, sexuality, aggression, stress. Prereq: PSY 303, PSY 304.

PSY 457. Group Dynamics. 4 Credits.

Topics in small-group dynamics, including decision-making, conflict, and changes over time in group structure and behavior. Prereq: PSY 303.

PSY 458. Decision-Making. 4 Credits.

Psychological processes involved in judgment and decision-making. Normative theories of ideal behavior contrasted with descriptive analysis of actual behavior. Prereq: PSY 303.

PSY 459. Cultural Psychology. 4 Credits.

Examines interdependence between mind and culture in substantive domains such as social cognition, motivation, emotion, and psychopathology. Cultural pluralism, collective identities, tolerance, and diversity considered. Prereq: PSY 303.

PSY 468. Motivation and Emotion. 4 Credits.

Adaptive human behavior; considers biological processes involved in emotions, how emotions interact with cognition, and social influences. Prereq: PSY 303.

PSY 472. Psychology of Trauma. 4 Credits.

Cognitive, neuropsychological, developmental, social, and clinical approaches to understanding trauma. Includes analysis of childhood trauma, sexual assault, domestic violence, terrorism, combat, and natural disasters.

Prereq: PSY 303.

PSY 473. Intimate Relationships. 4 Credits.

Adult intimacy and love relationships. Clinical-counseling approaches: assessment, couple and family therapies, and evaluation. Models of relationship functioning and the empirical study of interpersonal relationships.

Prereq: PSY 303.

PSY 475. Cognitive Development. 4 Credits.

Intellectual development in children from infancy to adolescence with a focus on early childhood. Topics covered include perception, attention, memory, reasoning, conceptual structure, social cognition.

Prereq: PSY 303; one course from PSY 305, PSY 308.

PSY 476. Language Acquisition. 4 Credits.

How children acquire language from the earliest speech sounds to full sentences. Topics include babbling, first words, word combinations, the relationship between cognition and language development.

Prereq: PSY 303; one course from PSY 305, PSY 308.

PSY 478. Social Development. 4 Credits.

Theoretical issues and empirical studies of social-emotional development. Topics may include attachment, temperament, moral development, family interaction, self-image, aggression, and sex-role development.

Prereq: PSY 303; one course from PSY 306, PSY 307, PSY 308.

PSY 479. Infancy. 4 Credits.

Mechanisms and processes that underlie and promote rapid changes in physical, cognitive, and linguistic capabilities, from birth to 24 months. Covers innovative methodologies and cultural attitudes toward infants.

Prereq: PSY 303; one course from PSY 308, PSY 376.

PSY 480. Development and Psychopathology. 4 Credits.

Biological and environmental factors that shape normal and abnormal development. Analysis of how family functioning affects psychopathology and resilience in children and adolescents.

Prereq: PSY 303; one course from PSY 308, PSY 309.

PSY 490. Honors in Psychology. 1 Credit.

Repeatable. Reading and conference. Repeatable twice for maximum of 3 credits each.

Prereq: Honors psychology majors only.

PSY 491. Honors in Psychology. 1 Credit.

Repeatable. Reading and conference. Repeatable twice for maximum of 3 credits each.

Prereq: Honors psychology majors only.

PSY 492. Honors in Psychology. 1 Credit.

Repeatable. Reading and conference. Repeatable twice for maximum of 3 credits each.

Prereq: Honors psychology majors only.

PSY 503. Thesis. 1-16 Credits.

Repeatable.

PSY 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

PSY 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PSY 512. Applied Data Analysis. 4 Credits.

Intermediate-level practical data analysis and interpretation. Topics include experimental design, analysis of variance, multiple regression, exploratory data analysis. Extensive computer use.

PSY 520. Psychology and Law. 4 Credits.

Introduction to topics of concern to both psychology and the law. Includes eyewitness identification, legal decision-making, criminal defenses, profiling, polygraphy, and mental-health law.

PSY 533. Learning and Memory. 4 Credits.

Processes underlying learning and memory, including evolution. Topics range from simple forms of behavior change to the acquisition, retention, forgetting, and retrieval of symbolic information.

PSY 536. Human Performance. 4 Credits.

Motor and intellectual capacities; analysis of the flow of information within the nervous system; applications of performance principles to human-machine systems.

PSY 538. Perception. 4 Credits.

Topics covered are color, size, shape, depth, distance, and movement. Examines the relationships between stimuli and perception, stimuli and the neural response, and the neural response and perception.

PSY 540. Psycholinguistics. 4 Credits.

Processes and structures underlying language use. Methods of studying language processing. Relationships between psycholinguistic data and observations from linguistics and neurophysiology.

PSY 545. Brain Mechanisms of Behavior. 4 Credits.

Organization of the mammalian brain. Structure and function of the neuronal systems underlying vision, perception, motivation, coordinated movement, sleep-wakefulness, learning and memory, and affective disorders.

PSY 549. Cognitive Neuroscience. 4 Credits.

Integrative neural mechanisms of normal and abnormal processes in systems (e.g., selective attention, language, memory, object recognition, and emotion).

PSY 550. Hormones and Behavior. 4 Credits.

Relationships among the brain, endocrine systems, and behavior. Developmental effects of hormones on the brain, puberty, sexuality, aggression, stress.

PSY 557. Group Dynamics. 4 Credits.

Topics in small-group dynamics, including decision-making, conflict, and changes over time in group structure and behavior.

PSY 558. Decision-Making. 4 Credits.

Psychological processes involved in judgment and decision-making. Normative theories of ideal behavior contrasted with descriptive analysis of actual behavior.

PSY 559. Cultural Psychology. 4 Credits.

Examines interdependence between mind and culture in substantive domains such as social cognition, motivation, emotion, and psychopathology. Cultural pluralism, collective identities, tolerance, and diversity considered.

PSY 568. Motivation and Emotion. 4 Credits.

Adaptive human behavior; considers biological processes involved in emotions, how emotions interact with cognition, and social influences.

PSY 572. Psychology of Trauma. 4 Credits.

Cognitive, neuropsychological, developmental, social, and clinical approaches to understanding trauma. Includes analysis of childhood trauma, sexual assault, domestic violence, terrorism, combat, and natural disasters.

PSY 573. Intimate Relationships. 4 Credits.

Adult intimacy and love relationships. Clinical-counseling approaches: assessment, couple and family therapies, and evaluation. Models of relationship functioning and the empirical study of interpersonal relationships.

PSY 575. Cognitive Development. 4 Credits.

Intellectual development in children from infancy to adolescence with a focus on early childhood. Topics covered include perception, attention, memory, reasoning, conceptual structure, social cognition.

PSY 576. Language Acquisition. 4 Credits.

How children acquire language from the earliest speech sounds to full sentences. Topics include babbling, first words, word combinations, the relationship between cognition and language development.

PSY 578. Social Development. 4 Credits.

Theoretical issues and empirical studies of social-emotional development. Topics may include attachment, temperament, moral development, family interaction, self-image, aggression, and sex-role development.

PSY 579. Infancy. 4 Credits.

Mechanisms and processes that underlie and promote rapid changes in physical, cognitive, and linguistic capabilities, from birth to 24 months. Covers innovative methodologies and cultural attitudes toward infants.

PSY 580. Development and Psychopathology. 4 Credits.

Biological and environmental factors that shape normal and abnormal development. Analysis of how family functioning affects psychopathology and resilience in children and adolescents.

PSY 601. Research: [Topic]. 1-21 Credits.

Repeatable.

PSY 602. Supervised College Teaching. 1-3 Credits.

Repeatable.

PSY 603. Dissertation. 1-16 Credits.

Repeatable.

PSY 605. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

PSY 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

PSY 609. Practicum: [Topic]. 1-9 Credits.

Repeatable.

PSY 610. Experimental Course: [Topic]. 1-21 Credits.

Repeatable.

PSY 611. Data Analysis I. 4 Credits.

Introduction to probability, hypothesis testing, and analysis of variance with applications. Includes training in the statistical analysis of data by computer. With laboratory.

PSY 612. Data Analysis II. 4 Credits.

Multiple regression and advanced topics in analysis of variance. Includes training in the statistical analysis of data by computer. With laboratory. Prereq: PSY 611.

PSY 613. Data Analysis III. 4 Credits.

Multivariate techniques including MANOVA, factor analysis, principal components. Includes training in the statistical analysis of data by computer. With laboratory. Prereq: PSY 612.

PSY 620. Psychopathology. 3 Credits.

Definition, measurement, and diagnosis of deviant behavior; includes critical reviews of research on the etiology, intervention, and outcome of major mental disorders.

Prereq: major standing.

PSY 621. Clinical Psychobiology. 3 Credits.

Research and theory from the neurosciences applied to clinical problems and biological therapies.

Prereq: major standing.

PSY 704. Internship: [Topic]. 1-15 Credits.

Repeatable.

Religious Studies

David Hollenberg, Department Head

541-346-4971

541-346-4118 fax

311 Susan Campbell Hall

1294 University of Oregon

Eugene, Oregon 97403-1294

religion@uoregon.edu

The Department of Religious Studies offers courses about the teachings and practices of the world's religions from an academic perspective.

Courses focus on the history of religions including their origins, sacred texts, rituals and practices, beliefs, and subgroups. These courses provide a broad understanding of the nature and role of religion in the world's many cultures, present and past, for students in all fields, as well as integrated programs for majors in religious studies.

The department annually sponsors two programs, the Ira E. Gaston Lecture in Christianity and the Distinguished Visiting Lecturer in Asian Religion, which bring eminent scholars to campus for lectures and seminars.

Preparation

The best high school or community college preparation for an undergraduate program in religious studies is a good general background in social science and the humanities.

Careers

An undergraduate major in religious studies can lead to graduate programs in religious studies—either academic or professional—as well as other related areas of graduate studies such as history, sociology, folklore, and various area studies (e.g., Middle East studies, East Asian languages and literatures).

Students with a bachelor of arts in religious studies have had success in various professional fields such as religion, journalism, social work, education, business, and law.

Graduate Studies

In the absence of a graduate program, students may work with faculty members from religious studies as well as other university departments toward an interdisciplinary studies: individualized program master's degree (MA or MS) focusing on religious studies, offered through the Graduate School. Information is available in the **Graduate School** section of this catalog.

Advanced Degrees in Other Departments

Faculty members in other departments may have a specialty or interest in the study of religion. Students interested in an advanced degree in these areas should apply for admission to graduate study in the relevant department. Prior contact with the faculty member is encouraged. The available degrees, faculty members, and area of specialty are listed below as a guide.

Department	Degree(s)	Specialty	Faculty
Anthropology	PhD (general anthropology MA presupposed)	Comparative religions, religion and symbol in particular cultures	Aletta Biersack, Carol T. Silverman
Asian Studies	MA	Buddhism in premodern Japan East Asian religions Religion and thought in premodern China	Andrew E. Goble (history) Mark Unno (religious studies) Ina Asim (history)
Classics	MA	Classical civilization, ancient philosophy and religions in or related to ancient Greece and Rome	Jeffrey M. Hurwit (art history), Mary K. Jaeger (classics), Steven Shankman (English), Malcolm Wilson (classics)
Folklore	MA		Carol T. Silverman (anthropology), Daniel N. Wojcik (English)
History	MA, PhD	Reformation	David M. Luebke
History of Art and Architecture	MA, PhD	Buddhist art Japanese art	Charles H. Lachman Akiko Walley

Faculty

Faten Arfaoui, instructor (Arabic). BA, 2006, Ibn Charaf; MA, 2010, 2012, Texas Tech. (2014)

Frederick Colby, associate professor (Islam). BA, 1991, Haverford College; MA, 1995, Chicago; PhD, 2002, Duke. (2008)

Hanan Elsherif, senior instructor (Arabic). BA, 1993, MA, 2002, PhD, 2009, Minia. (2011)

Deborah A. Green, associate professor. See **Judaic Studies**.

Luke Habberstad, assistant professor. BA, 2003, Yale; MA, 2007, PhD, 2014, California, Berkeley. (2014)

David Hollenberg, associate professor (Arabic). BA, 1990, Wesleyan; MA, 1996, California, Santa Barbara; PhD, 2006, Pennsylvania. (2010)

Anne Kreps, assistant professor (biblical studies, history of Christianity). BA, 2003, Michigan; MA, 2005, California, Berkeley; PhD, 2013, Michigan. (2016)

Jeffrey Schroeder, assistant professor (religion and modern Asia). BA, 2005, MA, 2009, Reed; MA, 2009, Duke; PhD, 2015, Duke. (2017)

Stephen J. Shoemaker, professor (history of Christianity). BA, 1991, Emory; MA, 1994, PhD, 1997, Duke. (2000)

Mark T. Unno, associate professor (East Asian religions, Buddhism). BA, 1987, Oberlin; MA, 1991, PhD, 1994, Stanford. (2000)

Emeriti

Judith R. Baskin, professor emerita. BA, 1971, Antioch; PhD, 1976, Yale. (2000)

Hee-Jin Kim, professor emeritus. BA, 1957, MA, 1958, California, Berkeley; PhD, 1966, Claremont. (1973)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Andrew E. Goble, history

Charles H. Lachman, history of art and architecture

Elizabeth Reis, women's and gender studies

Akiko Walley, history of art and architecture

Anita M. Weiss, international studies

Daniel N. Wojcik, English

- **Bachelor of Arts**
- **Bachelor of Science**
- **Minor**

Undergraduate Studies

The Department of Religious Studies offers bachelor of arts (BA) and a bachelor of science (BS) degrees. The department also offers minors in religious studies and Arabic studies. Courses used to satisfy major and minor requirements must be taken for letter grades and passed with a mid-C or better.

Bachelor of Arts Degree Requirements

Honors in Religious Studies

Requirements for a degree with honors in religious studies typically include the following:

1. Satisfaction of the requirements for a major
2. A cumulative grade point average of 3.80 in courses taken to satisfy the major requirements
3. Formal approval of the department

The candidate for honors shall request approval no later than the second week of fall term in the senior year. Students are strongly encouraged to meet with the undergraduate advisor before applying. Application forms are available in the department office.

A faculty committee supervises the honors thesis project. Candidates typically register for 3 credits of Research: [Topic] (REL 401) for both fall and winter terms of the senior year to prepare for writing the thesis. Contingent on satisfactory progress, the candidate then enrolls for 4 credits of Thesis (REL 403) spring term. A first draft of the thesis must be submitted six weeks before the end of spring term and the final draft two weeks after that.

Religious Studies Minor Requirements

Code	Title	Credits

Category I: Third-Year Arabic		
ARB 301–303	Language and Culture	12
Category II: Advanced Arabic		
ARB 331	Reading Classical Arabic	4
An additional course, approved by an advisor		4
Category III: Arabic Culture and Society		
An elective from the following list (or any course with substantial content in Arabic, Middle Eastern, or Islamic studies):		4
ARB 199	Special Studies: [Topic]	
COLT 370	Comparative Comics	
COLT 461	(Colonialism and Postcolonial Theory)	
COLT 462	Cultural Intersections: [Topic] (Orientalism)	
COLT 470	Studies in Identity: [Topic] (Multiculturalism and Empire)	
GEOG 209	Geography of the Middle East and North Africa	
HIST 199	Special Studies: [Topic] (The Iraq War; Islamic Civilization I or II; Islam in the Modern World)	
HIST 322	The Crusades	
HIST 399	Special Studies: [Topic] (The Iraq War)	
INTL 399	Special Studies: [Topic] (Islam and Global Forces)	
INTL 407	Seminar: [Topic] (Militant Islam; Middle Eastern Politics; Development and Social Change in the Middle East)	
INTL 423	Development and the Muslim World	
J 467	Issues in International Communication: [Topic] (The Arab World and the Media)	
JDST 340	Israelis and Palestinians	
PS 399	Special Studies: [Topic] (Egypt; Politics of the Middle East)	

REL 102	World Religions: Near Eastern Traditions	
REL 233	Introduction to Islam	
REL 324–325	History of Eastern Christianity	
REL 335	Introduction to the Qur'an	
REL 432	Islamic Mysticism: [Topic]	
REL 435	Advanced Study of the Qur'an: [Topic]	
TA 472	Multicultural Theater: [Topic] (Arab American Theater)	
Total Credits		24

Modified Requirements for Students with Prior Literacy in Arabic

Students who already have skills that satisfy the equivalent of the ARB 301–303 third-year sequence—whether from native proficiency, study abroad, or courses from another university—may choose to test out of one or more of these courses by passing a proficiency examination, administered by the UO Testing Center, designed to demonstrate basic literacy in Arabic. If students wish to transfer their third-year Arabic courses from other universities or from overseas study, they may do so contingent on the successful completion of an examination at the appropriate level, to ensure proper placement.

Students who pass the proficiency exam must still complete 24 credits for the minor in Arabic studies, including at least 12 from among Category II courses and up to 12 from among Category III electives.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Arabic Courses

ARB 101. First-Year Arabic. 5 Credits.

Introduction to Arabic with emphasis on speaking, reading, writing, and comprehension. Sequence with ARB 102, 103.

ARB 102. First-Year Arabic. 5 Credits.

Introduction to Arabic with emphasis on speaking, reading, writing, and comprehension. Sequence with ARB 101, 103.

Prereq: ARB 101.

ARB 103. First-Year Arabic. 5 Credits.

Introduction to Arabic with emphasis on speaking, reading, writing and comprehension. Sequence: ARB 101, 102

Prereq: ARB 102

ARB 199. Special Studies: [Topic]. 1-10 Credits.

Repeatable.

ARB 201. Second-Year Arabic. 5 Credits.

Development of Arabic speaking, reading, writing and comprehension; study of short literary and cultural materials. Sequence: ARB 202, 203.

Prereq: ARB 103 or equivalent.

ARB 202. Second-Year Arabic. 5 Credits.

Development of Arabic speaking, reading, writing, and comprehension; study of short literary and cultural materials. Sequence with ARB 201, 203.

Prereq: ARB 201 or equivalent.

ARB 203. Second-Year Arabic. 5 Credits.

Development of Arabic speaking, reading, writing, and comprehension; study of short literary and cultural materials. Sequence with ARB 201, 202.

Prereq: ARB 202 or equivalent.

ARB 253. Introduction to Arabic Culture. 4 Credits.

A survey of the linguistic, geographic, social, cultural, religious, political, and artistic aspects of the contemporary Arab world.

ARB 301. Language and Culture. 4 Credits.

Provides third-year-level Arabic proficiency and substantially adds to the vocabulary base. Activates and augments grammar structures of modern spoken Arabic, colloquial Egyptian Arabic, and the study of Arabic culture. Sequence: ARB 302, 303.

Prereq: ARB 203.

ARB 302. Language and Culture. 4 Credits.

Provides third-year-level Arabic proficiency and substantially adds to the vocabulary base. Activates and augments grammar structures of modern spoken Arabic, colloquial Egyptian Arabic, and the study of Arabic culture. Sequence: ARB 301, 303.

Prereq: ARB 301.

ARB 303. Language and Culture. 4 Credits.

Provides third-year-level Arabic proficiency and substantially adds to the vocabulary base. Activates and augments grammar structures of modern spoken Arabic, colloquial Egyptian Arabic, and the study of Arabic culture. Sequence: ARB 301, 302.

Prereq: ARB 302.

ARB 331. Reading Classical Arabic. 4 Credits.

Improves students' abilities to work with classical Arabic texts; serves as a gateway to other classical Arabic text courses.

Prereq: ARB 202 or equivalent.

ARB 353. Arab Cinema. 4 Credits.

Introduction to Arab cinema and culture through an examination of the development of cinema in Arabic-speaking countries. Offered alternate years.

ARB 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ARB 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

ARB 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ARB 409. Practicum: [Topic]. 1-5 Credits.

Repeatable.

ARB 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ARB 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

Religious Studies Courses

REL 101. World Religions: Asian Traditions. 4 Credits.

Introduction to related religious traditions of Asia, including Hinduism, Buddhism, Daoism, Confucianism and Shinto. Readings in sacred texts and scholarly literature. Lecture, discussion.

REL 102. World Religions: Near Eastern Traditions. 4 Credits.

Introduction to the Abrahamic religions of Judaism, Christianity, Islam and to related traditions such as the Zoroastrian, Manichean, Mandeian, Baha'i. Lecture, discussion.

REL 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

REL 211. Early Judaism. 4 Credits.

Development of the Jewish religion from its earliest existence until the Christian era.

REL 222. Introduction to the Bible I. 4 Credits.

Content and organization of the Hebrew scriptures (Old Testament); examination of scholarly methods and research tools used in biblical studies.

REL 223. Introduction to the Bible II. 4 Credits.

Examination of the written traditions of early Christianity with an emphasis on the New Testament.

REL 233. Introduction to Islam. 4 Credits.

Islamic religious tradition, beginnings to present. Pre-Islamic Arabia, Prophet Muhammed, pillars of Islam, ethics and piety, Sunni-Shiite divide, reform and renewal movements.

REL 302. Chinese Religions. 4 Credits.

Prehistoric roots of Chinese religion, Confucius and his followers, philosophical Taoism, Han Confucianism, religious Taoism, Chinese Buddhism, Neo-Confucianism, religion in China today.

REL 303. Japanese Religions. 4 Credits.

Early Shinto and its developments, Japanese Buddhism, transformation of Taoism and Confucianism, medieval Shinto, religion in the Tokugawa period, Nationalistic Shinto, folk religion, new religions.

REL 304. Religions of India. 4 Credits.

An introduction to the major religious traditions of the Indian subcontinent: Hinduism and Buddhism, and more briefly Sikhism and Jainism.

REL 317. Jesus and the Gospels. 4 Credits.

Considers early evidence for Jesus, including canonical and noncanonical gospels, in light of critical scholarship and historical reconstructions.

REL 318. Women in Judaism. 4 Credits.

Women and their roles in Judaism; emphasis on early modern and contemporary eras. Texts read include historical, literary, and theoretical documents.

REL 321. History of Christianity. 4 Credits.

Course of Christian history in East and West; relations between spirituality, doctrine, and institutional forms. Covers the ancient period, from the Apostolic Fathers to the Islamic conquests (90–650).

REL 322. History of Christianity. 4 Credits.

Course of Christian history in East and West; relations between spirituality, doctrine, and institutional forms. Covers medieval Western Christianity, from the Germanic invasions to the Reformation (400–1500).

REL 323. History of Christianity. 4 Credits.

Course of Christian history in East and West; relations between spirituality, doctrine, and institutional forms. Covers modern Western Christianity, from the Reformation to the present (1500 to the present).

REL 324. History of Eastern Christianity. 4 Credits.

Byzantine Christianity from the founding of the Christian Roman Empire to the Fall of Constantinople in the 15th century.

REL 325. History of Eastern Christianity. 4 Credits.

The Eastern churches from the 15th century to the present.

REL 335. Introduction to the Qur'an. 4 Credits.

An introduction to the nature of the Qur'an and the various ways it has been interpreted throughout history by both Muslims and non-Muslims.

REL 353. Dark Self, East and West. 4 Credits.

Comparative examination of selfhood in Eastern and Western religious thought and cultural contexts. Focus on dark side or problematic dimensions of Buddhist, Christian, Daoist, Jewish, and other thought.

REL 355. Mysticism. 4 Credits.

The experiential or mystical dimensions of the three major Abrahamic faiths. Exploration of the original writings of men and women from each spiritual tradition.

REL 357. War, Terrorism, and Religion. 4 Credits.

Offers an examination of the theme of war, terrorism, and religion, focusing on cases of religiously motivated acts of violence in the contemporary era.

REL 359. Religion After Atheism. 4 Credits.

Atheist critiques of religion, analyses of secularism from multiple disciplinary perspectives, and responses to atheism and secularism by modernist Christian, Muslim, and Buddhist writers.

REL 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

REL 401. Research: [Topic]. 1-4 Credits.

Repeatable.

REL 403. Thesis. 1-4 Credits.

Repeatable.

REL 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable.

REL 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

REL 408. Colloquium: [Topic]. 1-4 Credits.

Repeatable.

REL 409. Supervised Tutoring. 1-4 Credits.

Repeatable.

REL 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

REL 411. Making Sense of Religion. 4 Credits.

History of the study of religion, from the late 19th century to the present, as an expression of society, agent of oppression, psychological experience, symbolic system, and Western concept. Junior standing required.

REL 412. Dead Sea Scrolls: [Topic]. 4 Credits.

Exploration of the Dead Sea Scrolls literature. Focus on either biblical texts and the development of the Hebrew Bible or nonbiblical texts and sectarian Judaism. Repeatable once when topic changes for a maximum of 8 credits.

REL 414. Biblical Book: [Topic]. 4 Credits.

Close reading of one or more books of the Judeo-Christian Bible in literary, historical, and cultural contexts; history of interpretation; and critical scholarship. Repeatable twice when topic changes for a maximum of 12 credits.

REL 417. New Religious Movements. 4 Credits.

This course offers a deep exploration of New Religious Movements both ancient and modern. How are New Religious Movements born? What determines whether they grow, thrive, and die? Through a survey of biblically based new religions, we will analyze the formation of New Religious Movements.

REL 418. Martyrdom. 4 Credits.

Exploration of themes of sacrifice and martyrdom in ancient and medieval literatures of the Abrahamic traditions. Comparative approach to development of concepts within and across religious boundaries.

REL 424. Early and Medieval Christian Heresy. 4 Credits.

Survey of various heretical beliefs from early medieval Christian history; examines alternative visions of Christian truth, and the formation from heterodoxy of orthodoxy.

REL 432. Islamic Mysticism: [Topic]. 4 Credits.

Inner dimensions of Islamic piety and righteousness, from the Koranic and prophetic foundations to principal thinkers in the medieval Arabic and Persian Sufi traditions. Repeatable twice for a maximum of 12 credits.

REL 435. Advanced Study of the Qur'an: [Topic]. 4 Credits.

Close reading of a section of the Qur'an in terms of its literary, historical, and cultural contexts, history of interpretation, and critical scholarship. Sequence with REL 335. Repeatable once for a maximum of 8 credits when topic changes.

REL 440. Readings in Buddhist Scriptures. 4 Credits.

Readings in representative scriptures in English translation. Selection based on their import in development of Indian Buddhist philosophy and their impact on evolution of East Asian forms of Buddhism.

REL 444. Medieval Japanese Buddhism. 4 Credits.

Medieval Japanese Buddhism of the 12th and 13th centuries. Examination of religious thought and cultural history including Zen and Pure Land.

REL 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

REL 508. Colloquium: [Topic]. 1-4 Credits.

Repeatable.

REL 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

REL 511. Making Sense of Religion. 4 Credits.

History of the study of religion, from the late 19th century to the present, as an expression of society, agent of oppression, psychological experience, symbolic system, and Western concept.

REL 512. Dead Sea Scrolls: [Topic]. 4 Credits.

Exploration of the Dead Sea Scrolls literature. Focus on either biblical texts and the development of the Hebrew Bible or nonbiblical texts and sectarian Judaism. Repeatable once when topic changes for a maximum of 8 credits.

REL 514. Biblical Book: [Topic]. 4 Credits.

Close reading of one or more books of the Judeo-Christian Bible in literary, historical, and cultural contexts; history of interpretation; and critical scholarship. Repeatable twice when topic changes for a maximum of 12 credits.

REL 517. New Religious Movements. 4 Credits.

This course offers a deep exploration of New Religious Movements both ancient and modern. How are New Religious Movements born? What determines whether they grow, thrive, and die? Through a survey of biblically based new religions, we will analyze the formation of New Religious Movements.

REL 518. Martyrdom. 4 Credits.

Romance Languages

David Wacks, Department Head

541-346-4021

541-346-4030 fax

102 Friendly Hall

1233 University of Oregon

Eugene, Oregon 97403-1233

The Department of Romance Languages offers an extensive range of courses and degree programs, from instruction in beginning languages through the study of the literatures and cultures of French-, Italian-, Portuguese-, and Spanish-speaking countries. Students can earn a bachelor of arts (BA) degree in French, Italian, Spanish, or Romance languages; the master of arts (MA) is also available in these areas. The doctor of philosophy (PhD), awarded in Romance languages, encompasses a primary language and literature and a supporting area. Romance languages is a liberal-arts major, providing a valuable background for students interested in graduate work, teaching, and a wide array of other professional and international careers that require strong analytical and communication skills.

Preparation

The department recommends the following preparation for study leading to a major in any of the Romance languages:

1. As much work as possible in the student's major language. Knowledge of a second Romance language is helpful but not required
2. Knowledge of the history, geography, and politics of the areas where the student's major language is spoken
3. Communication skills, speech, and essay writing that help the student convey ideas logically. In literature and film courses, papers or essay examinations are generally required
4. Experience in literary and cultural studies and linguistics

Careers

Students who graduate with a bachelor of arts degree in Romance languages typically enter a variety of occupations. Language teaching is an obvious possibility. Proficiency in a second language and knowledge of other cultures enhances study and career opportunities in other areas as well. Romance languages majors, especially those who have a second major in another discipline (e.g., art history, business administration, economics, family and human services, history, international studies, journalism, music, or political science) find positions in communications media, government foreign service, international business and law, libraries, social service organizations, and travel and tourist-related agencies, among others.

Faculty

Faculty members in the Department of Romance Languages actively participate in other UO interdisciplinary programs and departments (e.g., African studies, cinema studies, comparative literature, European studies, Latin American studies, linguistics, medieval studies, and women's and gender studies). For descriptions, see those sections of this catalog.

Scholarships

The department administers scholarships for undergraduate and graduate students of Romance languages:

- The Leona M. Kail Scholarship supports studies in the Department of Romance Languages
- The Perry J. Powers Scholarship is awarded annually to an outstanding Romance languages student
- The Charles Stickles Endowment Scholarship is awarded for study in a Spanish-speaking country
- The Emmanuel Hatzantonis Scholarship is awarded every year to a Romance languages major or minor who is studying in Italy with the university's overseas study program
- The Helen Fe Jones Spanish Student Fellowship supports study abroad in a Spanish-speaking country
- The Françoise Calin scholarship is awarded every year to a French major or minor
- The James T. and Mary Alice Wetzel Graduate Scholarship is awarded every year to an outstanding graduate student in the Department of Romance Languages
- The Beall Graduate Dissertation Scholarship is awarded to doctoral students to support dissertation writing

More information may be obtained from the department office in early January or on the department website, rl.uoregon.edu/scholarships.

Faculty

Rafael Arias, senior instructor (Spanish); BA, 2009, MA, 2011, Oregon (2011)

- **Minor: Italian**
- **Minor: Spanish**

Undergraduate Studies

Programs leading to undergraduate degrees are offered in French, Italian, Spanish, and Romance languages (a major that combines advanced study in two languages). Students concentrate on the languages, literatures, and cultures of the Romance world, both modern and historical. They work on understanding, speaking, reading, and writing the modern language; they also focus on the historical roots of these languages and cultures, and on their writings—fiction, poetry, film, theater, criticism, and nonfiction.

To get exposure to the cultures of the countries where Romance languages are spoken, students are urged to study abroad. Visit the

department website (<http://rl.uoregon.edu/study-abroad>) for more information.

Students who intend to pursue graduate work in Romance languages are advised to begin a second Romance language early in their studies. Courses in English and other literatures are also recommended. A goal of the department is to give students a thorough view of the cultures of the countries where Romance languages are spoken.

Major Requirements

Students are urged to consult their faculty advisors regularly to create balanced programs and avoid mistakes in course selection.

French, Italian, or Spanish

Courses for the major must be taught in the target language and address the target culture; readings in courses taken for the major must be in the target language. Internship credits, always taken pass/no pass, do not apply toward major or minor requirements. Courses must be passed with grades of C– or better beyond the second-year language sequence.

Bachelor of Arts: French

- ¹ For the Spanish survey, choose only **one** of the two concentrations: Literature and Culture **or** Language and Society.
- ² Students who have already taken *Culture et langage: identités francophones* (FR 303) cannot receive credit for French Survey: Francophone Literature (FR 312).

Departmental Honors

Approval for graduation with honors is granted to any student who meets one of the following requirements:

1. Maintains at least a 4.00 grade point average (GPA) in all upper-division department course work and at least a 3.50 GPA overall, **or**
2. Maintains at least a 3.75 GPA in all upper-division department course work and at least a 3.50 GPA overall, and submits an honors thesis written under the guidance of a Romance languages faculty thesis advisor. The thesis adviser determines whether the thesis is acceptable and may require the student to register for up to 6 pass/no pass (P/N) credits in Thesis (FR, ITAL, SPAN 403)

If a student wishes to apply for honors by submitting an honors thesis, the application for graduation with honors must be submitted by the end of the term that immediately precedes the term of graduation. If a student is planning on graduating in the spring term, they must apply for graduation through their departmental advisor during the winter term.

Transfer credits and overseas-study work used to fulfill major graduation requirements are typically included in determining the major GPA.

Minor Requirements

Students may earn a minor in French, Italian, or Spanish. Courses taken for the minor must be passed with grades of C– or better and must be in the target language and address the target culture. Further details are available on the department website.

Minor in French

- ¹ Must be taught on the Eugene campus.
- ² Courses must be upper-division, taught in Spanish and address the cultures of the Spanish-speaking world (e.g. courses in literature, linguistics, language, culture, film, etc.)

Study Abroad

One of the best ways to learn a language and its culture is the experience of immersion in it. The Department of Romance Languages strongly encourages students to participate in one of the numerous study-abroad programs that the UO offers. Visit the department website (<http://rl.uoregon.edu/study-abroad>) for more information.

The department sponsors programs for the study of French, Italian, Portuguese, and Spanish languages and cultures. Students live, study, and travel in Europe, Africa, and the Americas, in countries such as Argentina, Bolivia, Brazil, Ecuador, France, Italy, Mexico, Morocco, Peru, Senegal, and Spain. Cosponsoring programs include IE₃ Global, the Council on International Educational Exchange, the School for International Training, and the National Student Exchange.

To ensure success in goals of language and cultural study, majors and minors in the department need to identify the program that best fits their academic requirements, financial situation, and personal interests. The list of programs posted on the department website is recommended based on their outstanding academic, linguistic, and cultural opportunities and strong on-site support.

Before traveling abroad, students should consult their assigned major or minor advisor about the selection of a program and the courses to be taken within that program.

Tips for Selecting a Study-Abroad Program

- Choose a program that offers a maximum of immersion (e.g., living with host families or local students, course work entirely in the target language, direct university enrollment opportunities)
- Longer programs offer you more opportunity to acclimate to the language, to be more fully immersed in the local culture, and to form meaningful relationships with people from the host country
- Courses in which the readings and lectures are in English **do not** count toward majors or minors in the Department of Romance Languages or the UO bachelor of arts second-language requirement
- Students in all UO overseas study programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. Advisors can help students determine course equivalencies to maximize the credits applied to requirements for the degree
- The department offers scholarships to help students with travel expenses for language learning and research projects. For more information, visit the scholarships page (<http://rl.uoregon.edu/scholarships>).

For additional information and to obtain applications for specific programs, contact the Office of International Affairs at (541) 346-3206. For questions on applying study-abroad credit to majors or minors, students should visit their assigned departmental advisor.

Cultural Ambassador Program in Spain

The Ministry of Education of Spain offers more than 1,200 openings for U.S. and Canadian language and culture assistants (termed “cultural ambassadors”). The positions are offered in Spain’s equivalent of the K–12 school system of public education.

Teaching Assistant Program in France

This program is coordinated by the French Embassy and offers 1,500 positions for native English speakers with a demonstrated knowledge of French to teach and its overseas department in France, to assist French teachers with English courses for a period of six to nine months, or both. The positions are offered in elementary and high schools (*écoles primaire, collèges, and lycées*). This is an excellent opportunity for graduating seniors with interest in education and experience abroad. It is open to United States citizens or permanent residents under 29 years of age with a demonstrated knowledge of French—not just majors or minors. The Department of Romance Languages does not administer the program, but simply offers guidance to interested students, and gives information and advice on the application process and on the program itself.

Kindergarten through Secondary School Teaching Careers

Students who complete a degree with a major in French, Spanish, or Romance languages are eligible to apply for the College of Education’s fifth-year licensure program in middle-secondary teaching. Students may also apply to the fifth-year licensure program to become an elementary teacher. More information is available from the department’s education advisor, Robert Davis; see also the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- **Master of Arts: Spanish** (p. 504)
- **Master of Arts: Romance Languages**
- **Doctor of Philosophy**

Graduate Studies

The Department of Romance Languages offers programs of study leading to the degree of master of arts (MA) in Romance languages, French, Italian, or Spanish and to the degree of doctor of philosophy (PhD) in Romance languages.

The master's degree program provides solid grounding and broad coverage in the literatures and cultures of each of the language areas. The PhD program allows students to focus on a specific literary and/or cultural field of interest.

Students follow these degree programs in an intellectually stimulating and supportive environment, characterized by close personal supervision, interdisciplinary approaches to literary and cultural studies, and professional training in both research methods and foreign-language pedagogy.

The university's library resources for research in French, Italian, and Spanish support the department's graduate programs; in some fields they are outstanding. The library's holdings of learned periodicals are extensive.

Admission

An applicant for admission to the master of arts (MA) program should have completed an undergraduate major in a Romance language and literature or its equivalent (e.g., licence, laurea, licenciatura). Students with a degree in another discipline may apply, provided they have a good knowledge of at least one Romance language and are familiar with one Romance literature.

An applicant for admission to the PhD program should have completed a master of arts degree in a Romance language and literature or its equivalent. Students should have at least a reading knowledge of a second Romance language upon entering the PhD program.

Admission Procedure

Applications may be made online at rl.uoregon.edu/graduate/admissions. Applicants are required to

- upload transcripts
- submit a 750-word statement of purpose describing academic experience, the reasons for wanting to do graduate work in the Department of Romance Languages, and eventual career goals.

Students applying to the PhD program are encouraged to specify research interests

- submit three letters of recommendation from faculty members who can directly comment on the applicant's language competence and aptitude for graduate studies in literature. One letter may refer to potential teaching ability

International students must demonstrate proficiency in English to the Graduate School and the Department of Romance Languages by one of the following three methods:

1. Submit an acceptable score from the Test of English as a Foreign Language (TOEFL) examination, currently offered in paper-based (written) or Internet-based formats. A minimum score of 575 on the paper-based test or 88 on the Internet-based test is required. More information on Graduate School admission requirements may be found at gradschool.uoregon.edu/academic-programs?page=gradProgramInfo
2. Submit an acceptable score from the International English Language Testing System (IELTS) examination. The minimum IELTS (academic module) overall band score for graduate admission is 7.0
3. Submit degree transcripts proving that you have received a bachelor's degree or higher from an accredited U.S. institution or from an institution in the following countries: Australia, Canada (excluding Quebec), Ireland, New Zealand, or the United Kingdom

If applying to the PhD program, submit a substantial writing sample (e.g., master's thesis graduate seminar paper or master's-level research paper on a relevant topic).

In addition to the application, send all official transcripts showing college-level work as of the date of application to the department's graduate coordinator at the following address:

University of Oregon
Department of Romance Languages
1233 University of Oregon
Eugene, Oregon 97403-1233

Priority is given to applicants whose files are complete by January 6. The department's graduate admissions committee reviews the completed file and notifies each applicant of its decision. New students are typically admitted to the program for fall term.

Graduate Employee Opportunities

Graduate employee (GE) opportunities are available each year for new graduate students in the department. Students should apply to the department by January 6 for fall admission and appointment priority. In exceptional cases, these fellowships may be supplemented by academic scholarships and awards.

Students who hold a graduate employee (GE) appointment are required to register and complete a minimum of 9 graduate credits during each quarter of their appointment, all of which must apply toward their degree programs. GTF support to complete the master's degree program is two years.

Master of Arts Program

Students entering the MA program may specialize in French, Italian, or Spanish, or combine two of these fields for a major in Romance languages. The master of arts program consists of course work, written

examinations, and a research project. The program is designed to be completed in two years.

To help students navigate requirements, a faculty advisor is assigned by the department during fall term of the first year. Students may change advisors later if they wish.

Degree Requirements

All courses must be taken on a graded basis. Course work must be completed with grades of B– or better, and a grade point average (GPA) of 3.00 or better must be maintained.

A student whose knowledge of the language or languages is found to be deficient must take remedial work—an advanced writing class, additional study abroad, or some form of language immersion.

Literary Periods

- French
 - medieval and Renaissance
 - 17th–18th centuries
 - 1830–1945
 - 1945 to the present
- Italian
 - medieval
 - Renaissance
 - 17th–19th centuries
 - 20th century to the present
- Spanish
 - 11th century–1605
 - 1605–1810
 - 1810–1939
 - 1939 to the present

Master of Arts Research Project

The degree requires a research project (either a master's essay or a pedagogy portfolio) that allows a student to expand his or her expertise in literary and cultural studies or in teaching language, literature, and culture. A faculty member oversees the development of the final product and evaluates it. The student must identify a faculty member willing to serve as director and secure his or her signature of approval for the project by the ninth week of spring term of the first year.

The research project should be between 6,000 and 9,000 words. In consultation with the research project director, the student chooses whether to write the project in a Romance language or in English.

Research projects are approved by the director and are referred to the student's MA examination committee (see below) for remediation if the work is found to be deficient or in need of revision. The director submits a final copy of the approved essay or portfolio to the department office by the last day of classes in spring term of the second year.

Essay in Literary and Cultural Studies

This essay allows students to widen their knowledge in one or more Romance languages, literatures, and cultures. In addition, the essay permits students to focus in greater depth on writing formal academic prose, presenting an interpretation, constructing an argument, documenting sources and references, and honing persuasive strategies. At the end of the first year of study, the student chooses one of the seminar papers that he or she submitted during the first three terms of course work. During the summer session immediately following, the student expands and polishes the paper.

Students who plan to apply for the PhD program in Romance languages at the University of Oregon must complete an essay in literary and cultural studies.

MA Pedagogy Portfolio in Teaching Language, Literature, and Culture

This project allows students to explore in depth specific issues of teaching a Romance language, its literature and cultures. The portfolio is designed in consultation with the director and serves to demonstrate the student's professional expertise. The portfolio may include the following documents: a coherent collection of teaching materials supported by a theoretical rationale; a description, personal assessment, and third-party evaluation of an internship experience (e.g., a participatory learning experience at the UO); a formal "philosophy of teaching" statement; documentation of participation in a professional conference; and other components as recommended by the director.

Students who plan to apply for the doctoral program in Romance languages at the University of Oregon must complete a master of arts essay in literary and cultural studies.

Examinations

The master of arts examination comprises two four-hour exams taken in the seventh week of spring term in the second year.

For students studying for the MA in French, Italian, or Spanish, the first exam consists of one specific question in each of the four literary periods. The second exam consists of a detailed analysis of a short text in two parts: a close reading of the text and a consideration of the text in its social, historical, cultural, and/or literary contexts. The student, in consultation with the examination committee, chooses in which of the four periods this second exam is done.

The exams for the Romance languages MA are similar to those for French, Italian and Spanish. However, in the first exam students are asked to draw on examples from both their major and minor literatures in their answer to at least one of the questions. They are encouraged (but not required) to refer to both literatures in their answers to the other three short questions.

The graduate secretary informs the students and the examination committee members of the scheduled exam date.

Examination Committee

By the sixth week of fall term in the second year, students submit to their advisors and to the director of graduate studies an MA Examination Committee form with the names of faculty members suggested to cover other examination periods and signed by the committee chair.

By the end of the tenth week of fall term in the second year, students submit a preliminary examination reading list of literary works on which to be examined to the members of their exam committees and to the director of graduate studies.

Examination Reading List

Students construct a reading list, drawn up in consultation with the exam committee, using the departmental reading list and the syllabuses and bibliographies of the seminars they have taken, as well as the summer reading done in preparation for the fall forum.

For students studying for the MA in French, Italian, or Spanish, the reading list consists of at least ten items in each of the four periods, drawn up in consultation with the exam committee. Of the ten works in each period, at least five must be chosen from the departmental reading list. The other works can be suggested by the student, based on his or her own interests and readings.

For students studying for the MA in Romance languages, the reading list consists of at least twelve items in each of the four periods: eight in the major language and four in the minor. Of the eight works in the major language, at least four must be chosen from the departmental reading list; all texts in the minor language must be chosen from the departmental reading list.

The examination reading list also contains two additional secondary readings (usually literary histories or general literary surveys) that cover the four periods, also drawn from the departmental reading list.

The final version of the examination reading list must be approved and signed by the student's exam committee and filed with the graduate secretary by the end of winter term of the second year. Students are responsible for distributing the approved reading list to the MA committee members as soon as the list is approved.

Examination Questions

In all fields, one of the two exams must be answered in the candidate's major language; the other can be written in the major language or in English. Choice of language is to be determined in consultation with the committee chair.

The four members of the MA exam committee work together to prepare the questions for the candidate. The exam committee chair is responsible for collecting questions from the committee members and submitting them to the graduate secretary. On the first exam, the candidate answers four questions, choosing between two questions in each of four periods. On the second exam, the candidate chooses between two possible

selections for the close reading analysis. The four members read and grade both exams and come to an agreement on the final grade to be submitted for each exam. The committee chair moderates this discussion, submits the grades to the graduate secretary, and communicates the results to the candidate. The student passes when the average grade for each exam is satisfactory (*low pass*, *pass* or *high pass*).

The master's examination is a closed book exam and therefore without footnotes or a bibliography. The exam must be typed using a twelve-point font, double-spaced.

Students who fail the master of arts examination in whole or in part will be allowed to take it over (in whole or in part) once. They are encouraged to do so during the course of the following term (usually the summer session) and no later than six months after failing. If they fail again, they are disqualified.

Research: [Topic] (FR 601), Research: [Topic] (ITAL 601), or Research: [Topic] (SPAN 601) and Practicum: [Topic] (FR 609), Practicum: [Topic] (ITAL 609), or Practicum: [Topic] (SPAN 609).

Students who hold a GTF appointment may register for 2 credits of Practicum or one credit of Research in order to complete the nine credits per term required by the Graduate School (two graduate courses constitute 8 credits). During the first quarter of their first year, students holding a GTF appointment use Practicum to develop their teaching skills in practical application. Students not holding a GTF appointment are encouraged to take a third course (for a total of 12 credits) or 1 credit of Research to work on an independent research project.

Reading and Conference: [Topic] (FR 605), Reading and Conference: [Topic] (ITAL 605), or Reading and Conference: [Topic] (SPAN 605).

Students may request to do a Reading and Conference course to address a specific problem on which no course currently exists. Before the end of the term preceding the Reading and Conference course, the student prepares a project proposal and submits it to the faculty member with whom he or she wants to work. The project proposal should include a statement of the problem the student wants to explore and a tentative reading list of primary and secondary sources. Only one 4-credit Reading and Conference course may be used to satisfy requirements for the MA degree.

Reading and Conference: [Topic] (RL 605). The purpose of this required independent reading course is to motivate students to begin reading during the summer following their first year in the MA program in preparation for the exams that will take place in the spring term of their second year.

During the spring term of the first year of the MA program, students present to their advisors a reading list of eight to ten works to be studied during the summer. The books must belong to no more than two of the periods defined by the MA program, and five of the books must be taken from the departmental reading list. At least one of the texts should be a literary history or a similar text about the period. This approved list (signed by the faculty advisor) will be submitted to the director of graduate studies before the end of the spring term.

In fall term, students will register for a 2-credit, graded Reading and Conference course with the director of graduate studies as the instructor of record.

In the third week of the fall term of the second year, students present the findings of their summer study in a public forum. This one-day forum is organized as a professional meeting, with a chair for each session, a discussion following the presentations, and refreshments. Most Romance

language faculty members are present during these presentations, as well as all MA students.

Presentations are fifteen minutes long and delivered in English. Presentations focus on the main themes that students have explored in their readings. Students should be able to discuss both literary techniques and historical context of the period selected, providing examples from the books they have read. Plot summaries should be avoided.

At the end of the presentations, the faculty members meet to evaluate the presentations. On satisfactory completion of this exercise, students receive 2 graded credits for the course. If the faculty members find that a presentation was deficient, they recommend that the student do supervised reading with the faculty specialist in the period before being assigned a grade and receiving course credit.

Incompletes

Incompletes are strongly discouraged. However, students who find it necessary to ask for an incomplete are urged to complete their incompletes as rapidly as possible. Agreements for obtaining and completing incompletes must be filed with the department. Graduate students must convert a graduate course incomplete into a passing grade within one calendar year of the assignment of the incomplete. Any student who has more than 5 credits of incompletes is making unsatisfactory progress toward the degree.

Doctor of Philosophy

The PhD program in Romance languages is designed to provide

- a thorough familiarity with several fields (e.g., a movement, a genre, a period, or a literary problem)
- the opportunity to situate the student's special interests in the wider context of Romance languages and literatures as well as in the context of trends inside and outside Western European culture
- the tools necessary to engage literary issues at a high level
- the ability to examine new and challenging literary or theoretical perspectives

Students who enter the PhD program with no knowledge of a second Romance language are required to start learning one as soon as possible during their graduate studies.

The PhD program has five components: course work, comprehensive examination, dissertation prospectus, original dissertation, and final oral defense.

Course Work

The PhD degree requires a total of 84 graduate-level credits—32 credits in addition to the 52 required for the master's degree. Course work applied to the degree must be taken for letter grades, and a grade point average (GPA) of 3.00 or better must be maintained.

Students must complete at least 21 graduate seminars in the department (at least 84 credits in all) beyond the bachelor's degree. PhD students must thus take at least 8 graduate courses (32 credits) beyond the 13 courses (52 credits) required for the master's. Only one of these 8 courses (4 credits) may be satisfied in the form of a Reading and Conference course (Reading and Conference: [Topic] (FR 605), Reading and Conference: [Topic] (ITAL 605), or Reading and Conference: [Topic] (SPAN 605)).

Of the twenty-one courses (84 credits), three (12 credits) must be taken in a second Romance language.

As many as three of the twenty-one courses (12 of the 84 credits) may be taken outside the department, with the authorization of the advisor, and provided that the courses bear directly on the student's program of study.

Doctoral students are also strongly encouraged to take Romance Languages Colloquium: [Topic] (RL 623) for at least two credits. Colloquium may either be taken as a 2-credit pass/no pass course (in which case it does not count toward the 52 credits required for the degree) or as a 4-credit graded course.

Students with an MA in French, Italian, Spanish, or Romance languages from the University of Oregon may count a maximum of two graduate courses completed during the MA program toward PhD course requirements, provided that these courses were not used to fulfill MA requirements.

Graduate students with an MA in French, Italian, Spanish, or Romance languages from another institution must take a minimum of 40 credits in the Department of Romance Languages. The department's graduate committee evaluates previous graduate course work and determines whether additional work is necessary to fill any gaps in a student's preparation. This may result in a student having to take more than 40 credits at the University of Oregon—up to a maximum of 68 credits. If the candidate is found to be seriously deficient or if the master's degree is in a field other than Romance languages, the graduate committee may admit the student into the master's program. In this case, the student may submit a petition to the committee to transfer a maximum of three courses toward the twelve courses required for the MA. This petition may be submitted after the student has completed four graduate-level courses with grades of mid-B or better in the Romance languages master's program.

Comprehensive Examination

Students entering the PhD program should develop, as soon as possible but no later than the third term of course work beyond the master's degree, a field of interest that forms the basis of their research for the PhD comprehensive examination and ideally for the dissertation. This field of interest usually emerges from the selected courses and shapes the areas of concentration represented on the comprehensive examination.

The comprehensive examination consists of two written examinations and an oral examination. Each written examination covers a subfield that pertains to the student's field of interest. The subfields should be defined and prepared with three members of the Romance languages faculty who constitute the PhD examination committee. One of these faculty members should represent the student's second Romance language. A fourth member may be added from another department. In consultation with the members of the examination committee, the student creates a reading list for each of the subfields. The reading list must be approved by the examination committee no later than four weeks before the date of the exam. Student are responsible for distributing the reading list to the committee members of the examination committee as soon as the list is approved.

The written examinations take the form of two essays that respond to questions formulated by members of the PhD examination committee. Each written examination covers one of the subfields and is a maximum

of twenty double-spaced, typed pages in length. The student has two weeks to write each of the two essays.

Two weeks after the successful completion of the written essays, the student takes an oral examination. The oral examination attempts to integrate the subfields addressed in the written examinations with the other facets of the student's declared field of interest. In a two-hour conversation, the candidate and the committee members examine and elaborate on ways in which the written essays help to define a project within the student's field of interest.

Typically undertaken during the fifth term of study following the master's degree, the comprehensive examination should result in clarification of the dissertation's subject matter and possible approaches to it. The exam should, in other words, yield at least a tentative dissertation topic.

A student who fails the PhD examination in whole or in part will be allowed to take it over (in whole or in part) once. The student is encouraged to do so no later than six months after failing. A second failure results in disqualification.

It is the student's responsibility to schedule both the written and oral portions of the comprehensive examination.

With the successful completion of the PhD comprehensive exam, the student will advance to candidacy and begin preparing the dissertation prospectus.

Dissertation Prospectus

The prospectus, typically completed during the sixth term of study following the master's degree, defines the scope of the dissertation and demonstrates the originality of the project. It consists of an eight- to ten-page description of the proposed dissertation project and a substantial research bibliography of primary and secondary material.

Students are responsible for putting together a dissertation committee, which typically consists of four members: one director and two readers from the Department of Romance Languages, and one reader from another department. A student may also choose to have two codirectors in the Department of Romance Languages (plus two further members of the department).

When the student has a solid draft of the prospectus, she or he schedules a meeting with the dissertation committee members for a presentation and discussion of the prospectus. Following this conversation, the student will make final revisions to the prospectus. Once the committee has given its final approval, the student submits the prospectus to the department for filing.

Students are reminded that they must have a dissertation committee in place and proper documents filed with the Graduate School six months before the dissertation defense.

Any student making significant changes to the dissertation project after the final approval of the prospectus must schedule a meeting with the dissertation committee before proceeding.

Dissertation

The dissertation constitutes an original and valuable contribution to scholarship in the student's field of interest. It should be characterized by mature literary interpretation, informed and reasoned argument, and an awareness of the means and goals of research.

It is the student's responsibility to ascertain the rules and deadlines of the Graduate School for proper filing of the dissertation. Students are strongly encouraged to familiarize themselves with the stringent formatting and structure guidelines for the dissertation provided by the Graduate School (available online).

A final copy of the dissertation must be distributed to the dissertation committee for final approval at least three weeks before the dissertation defense.

Final Oral Defense

When all members of the dissertation committee have approved the dissertation, a final public oral presentation and defense of the work is held.

Funding

All post-MA work, including the dissertation, is typically completed in four to five years of study. PhD students making satisfactory progress toward the degree are eligible for funding packages in the form of graduate employee (GE) opportunities. These fellowships include stipends for teaching, as well as tuition waivers. Satisfactory progress entails completing all courses taken for credit with a grade of mid-B or better; passing the PhD comprehensive examination; timely submission of an acceptable dissertation prospectus; and regular and timely progress on the dissertation itself.

French Courses

FR 101. First-Year French. 5 Credits.

Introduction to French stressing the development of listening, speaking, reading, and writing skills through a communicative approach. Sequence. Conducted in French.

FR 102. First-Year French. 5 Credits.

Introduction to French stressing the development of listening, speaking, reading, and writing skills through a communicative approach. Sequence. Conducted in French.

Prereq: FR 101.

FR 103. First-Year French. 5 Credits.

Introduction to French stressing the development of listening, speaking, reading, and writing skills through a communicative approach. Sequence. Conducted in French.

Prereq: FR 102.

FR 111. Intensive Beginning French. 5 Credits.

Intensive study for experienced language learners; introduction to French culture. Sequence. Cannot be combined with FR 101, 102, 103 for more than 15 credits of first-year French.

Prereq: previous study of French or competence in another Romance language.

FR 112. Intensive Beginning French. 5 Credits.

Intensive study for experienced language learners; introduction to French culture. Cannot be combined with FR 101, 102, 103 for more than 15 credits of first-year French.

Prereq: FR 111.

FR 150. Cultural Legacies of France. 4 Credits.

French civilization in France and beyond. Possible topics are the Francophone world; premodern, early modern, and modern France; French film, architecture, and painting. Conducted in English.

FR 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

FR 201. Second-Year French. 4 Credits.

Development of reading, writing, and speaking skills; study of short literary and cultural texts; considerable attention paid to oral use of the language. Sequence.

Prereq: first-year language competence.

FR 202. Second-Year French. 4 Credits.

Development of reading, writing, and speaking skills; study of short literary and cultural texts; considerable attention paid to oral use of the language. Sequence.

Prereq: FR 201.

FR 203. Second-Year French. 4 Credits.

Development of reading, writing, and speaking skills; study of short literary and cultural texts; considerable attention paid to oral use of the language. Sequence.

Prereq: FR 202.

FR 301. Culture et langage: la France contemporaine. 4 Credits.

Training in language and culture of modern France using newspapers, short stories, poetry and film. Vocabulary enrichment activities. Conducted in French.

Prereq: FR 203.

FR 302. Culture et langage: Le monde francophone contemporain. 4 Credits.

Training in language and cultures of the French-speaking world using literary texts, websites, videos. Grammar review and vocabulary enrichment.

Prereq: FR 203.

FR 307. Oral Skills. 2 Credits.

Repeatable. Practice in improving oral, comprehension, and listening skills in French. Communicative activities in class in addition to language laboratory work. Repeatable once for maximum of 4 credits.

Prereq: FR 203 or equivalent.

FR 312. French Survey: Francophone Literature. 4 Credits.

Introduction to major authors and texts of the French-speaking world outside of France.

Prereq: FR 301 or FR 302.

FR 317. French Survey: Medieval and Renaissance. 4 Credits.

Introduction to major themes and ideas in French literature from the medieval and Renaissance periods through the reading of representative texts.

Prereq: FR 301 or FR 302.

FR 318. Monarchy, Liberty, Revolution. 4 Credits.

Introduction to major themes and ideas in French literature from the 17th and 18th centuries through the reading of representative texts.

Prereq: FR 301 or FR 302.

FR 319. French Survey: 19th and 20th Centuries. 4 Credits.

Representative literary works from the 19th and 20th centuries with attention to literary analysis and literary history.

Prereq: FR 301 or FR 302.

FR 320. Intensive French Grammar Review. 4 Credits.

Promotes linguistic competency in French through intensive review and refinement of French grammar while introducing basic vocabulary and linguistic concepts.

Prereq: FR 203.

FR 330. French Poetry. 4 Credits.

Poems from the Middle Ages to the 20th century, literary movements, introduction to textual analysis and modern critical approaches.

Prereq: FR 301, FR 302.

FR 331. French Theater. 4 Credits.

Explores important aspects of French theater. Reading plays from different periods. Emphasizes formal aspects and critical reading.
Prereq: FR 301, FR 302.

FR 333. French Narrative. 4 Credits.

Covers important aspects of French narrative. Reading texts from different periods. Emphasis on formal aspects and critical reading.
Prereq: FR 301, FR 302.

FR 361. French Cinema for Nonmajors. 4 Credits.

An introduction to the major movements of French cinema for nonmajors. No prior knowledge of film studies or French culture required. Taught in English.

FR 362. French Film. 4 Credits.

Focuses on the differences between American culture and French and Francophone cultures. Addresses a sensitive issue exemplified by the attitude of the international movie industry.
Prereq: FR 301, FR 302.

FR 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.
Prereq: FR 301 or FR 302.

FR 403. Thesis. 3-6 Credits.

Repeatable.

FR 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

FR 407. Seminar: [Topic]. 1-6 Credits.

Repeatable. Recent topics include French Novel and World War II, Writers and Painters, Medievalism, Francophone Caribbean, Gide and Sartre.
Prereq: two survey courses from FR 312, FR 317, FR 318, or FR 319.

FR 408. Workshop: [Topic]. 1-12 Credits.

Repeatable.

FR 409. Practicum: [Topic]. 1-4 Credits.

Repeatable.

FR 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

FR 416. Advanced Writing in French. 4 Credits.

Extended written production; writing for specific purposes and audiences. Advanced grammar review and composition; study of specialized vocabulary.
Prereq: FR 301, FR 302.

FR 425. French-English Translation. 4 Credits.

Offers an overview of translation theory and practice from English to French and French to English.
Prereq: FR 301, FR 302.

FR 450. 17th-Century Literature: [Topic]. 4 Credits.

Changing topics concerning trends or particular authors representative of 17th-century French literature. Repeatable when topic changes.
Prereq: two survey courses from FR 312, FR 317, FR 318, or FR 319.

FR 451. Baroque Theater: [Topic]. 4 Credits.

Intensive study of representative plays by Moliere, Racine, or Corneille with emphasis on modern criticism. Repeatable when topic changes for maximum of 16 credits.
Prereq: two survey courses from FR 312, FR 317, FR 318, or FR 319.

FR 460. 18th-Century Literature: [Topic]. 4 Credits.

Changing topics concerning trends or particular authors representative of 18th-century French literature. A recent topic is Being Modern in the 18th century. Repeatable when topic changes.
Prereq: two survey courses from FR 312, FR 317, FR 318, or FR 319.

FR 480. 19th-Century Literature: [Topic]. 4 Credits.

Changing topics concerning trends or particular authors representative of 19th-century French literature. Repeatable when topic changes.
Prereq: two survey courses from FR 312, FR 317, FR 318, or FR 319.

FR 490. 20th-Century Literature: [Topic]. 4 Credits.

Changing topics concerning trends or particular authors representative of 20th-century French literature. Recent topics include African Identities, The French Novel in 2000, Postcolonial Africa. Repeatable when topic changes.
Prereq: two survey courses from FR 312, FR 317, FR 318, or FR 319.

FR 497. Francophone Women's Writing. 4 Credits.

Developments in literature by women from areas such as Maghreb, the Caribbean, Sub-Saharan Africa, Quebec, the Indian Ocean, and Europe.
Prereq: two survey courses from FR 312, FR 317, FR 318, or FR 319.

FR 507. Seminar: [Topic]. 1-6 Credits.

Repeatable. Recent topics include French Novel and World War II, Writers and Painters, Medievalism, Francophone Caribbean, Gide and Sartre.

FR 508. Workshop: [Topic]. 1-12 Credits.

Repeatable.

FR 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

FR 516. Advanced Writing in French. 4 Credits.

Extended written production; writing for specific purposes and audiences. Advanced grammar review and composition; study of specialized vocabulary.

FR 550. 17th-Century Literature: [Topic]. 4 Credits.

Changing topics concerning trends or particular authors representative of 17th-century French literature. Repeatable when topic changes.

FR 551. Baroque Theater: [Topic]. 4 Credits.

Intensive study of representative plays by Moliere, Racine, or Corneille with emphasis on modern criticism. Repeatable when topic changes for maximum of 16 credits.

FR 560. 18th-Century Literature: [Topic]. 4 Credits.

Changing topics concerning trends or particular authors representative of 18th-century French literature. A recent topic is Being Modern in the 18th century. Repeatable when topic changes.

FR 580. 19th-Century Literature: [Topic]. 4 Credits.

Changing topics concerning trends or particular authors representative of 19th-century French literature. Repeatable when topic changes.

FR 590. 20th-Century Literature: [Topic]. 4 Credits.

Changing topics concerning trends or particular authors representative of 20th-century French literature. Recent topics include African Identities, The French Novel in 2000, Postcolonial Africa. Repeatable when topic changes.

FR 597. Francophone Women's Writing. 4 Credits.

Developments in literature by women from areas such as Maghreb, the Caribbean, Sub-Saharan Africa, Quebec, the Indian Ocean, and Europe.

FR 601. Research: [Topic]. 1-6 Credits.

Repeatable.

FR 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

FR 607. Seminar: [Topic]. 1-6 Credits.

Repeatable.

FR 609. Practicum: [Topic]. 1-4 Credits.

Repeatable.

Italian Courses**ITAL 101. First-Year Italian. 5 Credits.**

Introduction to Italian stressing speaking, reading, writing, and comprehension skills. Sequence.

ITAL 102. First-Year Italian. 5 Credits.

Introduction to Italian stressing speaking, reading, writing, and comprehension skills. Sequence.

Prereq: ITAL 101.

ITAL 103. First-Year Italian. 5 Credits.

Introduction to Italian stressing speaking, reading, writing, and comprehension skills. Sequence.

Prereq: ITAL 102.

ITAL 104. Intensive First-Year Italian. 5 Credits.

Covers in two terms the work of ITAL 101, 102, 103. Sequence. Cannot be taken in any combination with ITAL 101, 102, 103 to total more than 15 credits of first-year Italian.

ITAL 105. Intensive First-Year Italian. 5 Credits.

Covers in two terms the work of ITAL 101, 102, 103. Sequence. Cannot be taken in any combination with ITAL 101, 102, 103 to total more than 15 credits of first-year Italian.

Prereq: ITAL 104.

ITAL 150. Cultural Legacies of Italy. 4 Credits.

Italy's contributions to world cultures includes topics such as modern Italian life, Italians in America, Italian cinema and its influence, the Italian Renaissance, Roman art, opera. Conducted in English.

ITAL 152. Desire and Resistance: Italian Cinema. 4 Credits.

The theories and works of the major Italian filmmakers; topics in Italian history and culture; introduction to film analysis.

ITAL 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ITAL 201. Second-Year Italian. 4 Credits.

Review of grammar, reading of short literary and cultural texts, development of speaking and writing skills. Sequence. Conducted in Italian.

Prereq: first year language competence.

ITAL 202. Second-Year Italian. 4 Credits.

Review of grammar, reading of short literary and cultural texts, development of speaking and writing skills. Sequence. Conducted in Italian.

Prereq: ITAL 201.

ITAL 203. Second-Year Italian. 4 Credits.

Review of grammar, reading of short literary and cultural texts, development of speaking and writing skills. Sequence. Conducted in Italian.

Prereq: ITAL 202.

ITAL 252. The Italian-American Experience. 4 Credits.

Selected topics from literary periods, authors, genres, and aesthetic trends. Repeatable twice when topic changes for maximum of 12 credits.

Russian, East European, and Eurasian Studies

Jenifer Presto, Program Director

541-346-4065

175 Prince Lucien Campbell Hall

The Russian, East European, and Eurasian Studies Program is devoted to the study of the peoples living in the eastern third of Europe, throughout the northern steppes of Central Asia, and across Siberia to the Pacific Ocean. Settled over a territory that spans half the earth's time zones, these peoples have created a complex mosaic of cultures, expressed in literature and art as well as in institutions and social forms. Over the centuries, these lands have come under the sway of several great world-historical civilizations and empires: the Byzantine, Mongolian, Ottoman Turkish, Holy Roman, Austro-Hungarian, Russian, and Soviet. These lands have felt the influence of Orthodox Christianity, Catholicism, Protestantism, Judaism, Islam, and Communism. At the intersection of many powerful forces, these lands experience the historical drama of what some call "modernization" with its challenge to customary ways of life. Yet, after centuries of massive transplantation and transformation, national and ethnic heritages survive. Customary ways and native self-consciousness, more diverse than anywhere else on the globe, express themselves with new vigor.

Visiting Faculty Members

The program sponsors extended stays by visiting Fulbright and International Research and Exchange Board scholars from Russia and Eastern Europe.

Overseas Study

Qualified students of Russian may spend a summer, semester, or academic year in the Commonwealth of Independent States—in the Council on International Educational Exchange (CIEE) Cooperative Russian Language Program, of which the University of Oregon is an affiliate. Participating CIEE schools include Novosibirsk State University and St. Petersburg University. Students may also participate in Moscow and St. Petersburg programs sponsored by the American Council of Teachers of Russian and at a direct exchange program with the University of Latvia. Opportunities also exist for study in the Czech Republic, Hungary, and Poland. Limited fellowship aid is available for these programs.

Students in University of Oregon overseas study programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. See International Affairs in the **Academic Resources** section of this catalog. Students interested in study in the Commonwealth of Independent States or in Eastern Europe should write or call the Overseas Program

Coordinator, Office of International Affairs, 5209 University of Oregon, Eugene, Oregon 97403-5209; 541-346-3206.

Cultural Programs

The program sponsors lectures, panel discussions, symposiums, films, plays, exhibitions, concerts, and festivals. These presentations involve scholars from other institutions in the United States and Europe as well as specialists at the university. In addition, the program faculty engages in outreach activities with local schools, community groups, and organizations such as the Eugene-Irkutsk Sister City Committee. Students in the program organized a Russian Club.

Resources

The University of Oregon's library has more than 130,000 volumes in Russian and other Slavic and East European languages, more than 60,000 on Russia and Eastern Europe in Western languages; and subscribes to more than 100 serial titles. The library also has a large collection of Russian and East European films. The bulk of the collection is in the humanities and social sciences.

Facilities at the well-known Yamada Language Center enhance the learning of Slavic and East European languages. For more information, visit the website (<https://babel.uoregon.edu>).

Faculty

Heghine Hakobyan, instructor (Slavic librarian). BA, 1983, Kurgan College of Culture and Enlightenment; MA, 1988, Tyuman State; MLIS, 2003, City University of New York, Queens College. (2007)

Katya E. Hokanson, associate professor (Russian literature, travel literature, cultural studies). B.A., 1984, Williams; M.A., 1988, Ph.D., 1994, Stanford. (1995)

Yelaina Kripkov, senior lecturer (Russian language, culture); coordinator, Russian language program. MA, 1983, Moscow State Pedagogical Institute; PhD, 1996, Kansas. (1995)

Susanna Soojung Lim, associate professor (19th- and 20th-century Russian literature). BA, 1996, MA, 1998, Korea; MA, 1999, PhD, 2006, California, Los Angeles. (2007)

Julia Nemirovskaya, senior instructor (Russian literature and theater). MA, 1986, PhD, 1991, Moscow State. (2002)

Jenifer Presto, associate professor (Russian literature, modernism, environmental criticism). A.B., 1985, Smith; M.A., 1988, Middlebury; M.A., 1989, Ph.D., 1996, Wisconsin, Madison. (2003)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Roy Bing Chan, East Asian languages and literatures (Chinese literature)

Julie Hessler, history (20th-century Russia, Europe)

Ryan Tucker Jones, history (Russian and environmental history)

R. Alan Kimball, history (modern Russia)

Mikhail Myagkov, political science (comparative politics, formal political theory)

Steven Shankman, English (comparative literature, Russian novel)

Lara Ravitch, American English Institute

Stephen J. Shoemaker, religious studies (history of Eastern Christianity)

Carol T. Silverman, anthropology (performance, eastern Europe, gender)

Caleb Southworth, sociology (economic sociology, postsocialist societies, quantitative-historical methods)

Courtesy

Amanda Bird, courtesy instructor (folklore, translation, Persian literature). BA, 1994, Baylor; MA, 2006, Oregon. (2013)

Norma "Bean" Comrada, courtesy instructor (Slavic literature). BA, 1954, Whitman College; MS, 1983, Oregon. (2013)

Tamara Morris, courtesy professor (Russian language, culture of "Old Believers"). Baccalaureate, D. Banzarov; MA, 1984, Krasnoyarsky State Pedagogical Institute; PhD, 1986, Institute of Russian Language. (2013)

Emeriti

Esther Jacobson-Tepfer, history of art and architecture

Sherwin Simmons, history of art and architecture

Ronald Wixman, geography

Cynthia Vakareliyska, linguistics

Associated

John E. Bonine, law

Lisa Wolverton, history

- **Bachelor of Arts** (p. 517)
- **Minor**

Undergraduate Studies

The program offers a bachelor of arts degree (BA) and a minor. The undergraduate certificate is inactive.

General Requirements

Fields of Concentration

The program offers the following concentrations for the undergraduate major and minor:

- Russian language, literature, and culture
- Russian and East European history, politics, and society

Courses with these focus areas are offered by the program and such participating departments as anthropology, geography, history, political science, and sociology. Any course taken that includes instruction on one of these focus areas and has at least 40 percent Russian, East European, former Soviet Eurasian, or Slavic content, including independent research undertaken by the student, may be applied to the field of concentration requirement with administrative approval. Students may petition to have courses taken in other disciplines count toward the concentration or elective requirement if the content of these courses

meets the 40 percent standard. This applies to regularly scheduled courses and to independent reading and conference courses.

Students can request sample programs of study in the various concentrations from their advisor or from the program's office.

Major Requirements

The major requires 36 graded credits; courses must be passed with grades of C– or better. Credits used to fulfill the language requirement may not be applied to the 36-credit requirement.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Language Courses		
RUSS 101–103	First-Year Russian ¹	15
RUSS 201–203	Second-Year Russian ¹	15
RUSS 316–318	Third-Year Russian ¹	15
Field of Concentration Courses		20
At least four upper-division courses in a chosen concentration ²		
Elective Courses ³		16
Total Credits		36

¹ Three years of college-level Slavic language study is usually fulfilled by taking Russian language courses. Students may petition to substitute one year of a second Slavic language for one year of the primary Slavic language. The language option is chosen in consultation with program advisors.

² Two courses must be at the 400 level.

³ At least two 4-credit courses should be outside of the field of concentration.

Double Majors

To apply for a double major, students must complete and submit a declaration form to the program office.

Honors in Russian, East European, and Eurasian Studies

Majors who have an overall GPA of 3.50 by the end of the junior year and who are interested in honors should meet with their advisor, then submit a thesis proposal to the program's director for approval. If approved, the student registers for a minimum of 4 credits in Thesis (403) under the supervision of a program faculty member. The thesis must be completed at least one term before the term of graduation.

Minor Requirements

The minor requires 24 graded credits; courses must be passed with a grade of C– or better. Courses taken to fulfill the language requirement may not be used to fulfill the 24-credit requirement.

Code	Title	Credits
Language Courses		
RUSS 101–103	First-Year Russian ¹	15
RUSS 201–203	Second-Year Russian ¹	15
RUSS 316–318	Third-Year Russian ¹	15
Field of Concentration Courses		12
Three upper-division courses in a chosen concentration ²		

Elective Courses	12
Total Credits	24

¹ Three years of college-level Slavic language study is usually fulfilled by taking Russian language courses. Students may petition to substitute one year of a second Slavic language for one year of the primary Slavic language. The language option is chosen in consultation with program advisors.

² One course in the field of concentration must be at the 400 level.

Additional Requirements

There is no limit on the number of language courses taken at other universities, including courses taken abroad, that may be used to satisfy the language requirement for the major or minor, subject to an equivalency assessment by the Russian language coordinator. With respect to concentration and elective requirements, undergraduate majors may apply as many as 16 transfer credits to the major, but no more than 8 of these credits can be applied to the field of concentration. Undergraduate minors may apply up to 8 transfer credits to the minor, but no more than 4 of them can be applied to the field of concentration.

Secondary School Teaching Careers

The College of Education offers a fifth-year program for teaching licensure in foreign language. This program is described in the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years (Below is a sample for a Russian, East European, and Eurasian studies major with a concentration in Russian language, literature, and culture). There are alternative ways. Students should consult their advisor to determine the best path for them.

- Master of Arts
- Certificate

Graduate Studies

The program offers a master of arts (MA) and a graduate certificate in Russian, East European, and Eurasian studies. The center is affiliated with the master's and PhD programs in comparative literature and linguistics, and students in the center have also successfully applied to PhD programs in history, geography, and other fields.

Master of Arts

Application

Graduate application instructions are available online (<http://reees.uoregon.edu/graduate/admission-and-aid>). The application deadline for admission the following fall term is February 1. Applicants who are not seeking graduate fellowship support are considered for admission throughout the academic year if space is available in the program.

Incoming candidates for the master's degree must meet with an advisor and take a Russian proficiency examination on the Friday before the beginning of their first academic term.

Graduate students are expected to meet regularly with their advisor and submit an updated program plan every spring term. Students and their advisors use degree planning sheets to design individual programs.

Master of Arts Degree Requirements

The MA in Russian, East European, and Eurasian studies requires 40 graded graduate-level credits passed with a grade of B– or better and 9 thesis credits (taken pass/no pass), for a total of 49 graduate credits. Credits used to fulfill the language requirement may not be applied to the 49-credit requirement. The MA typically takes two years (six terms) to complete.

Code	Title	Credits
Language Courses		
	Four years of university study of a Slavic language or equivalent, plus reading competency as defined by a translation exam in the student's field of concentration ¹	
Field of Concentration Courses		
	Four graded graduate-level courses in a chosen concentration	16
Research and Thesis		
REES 503	Thesis	9
or RUSS 503	Thesis	
Elective Courses		
	Six graded graduate-level courses ²	24
	Total Credits	49

¹ In exceptional cases, a student may petition to substitute one year of a second Slavic language or equivalent mastery for one of the years of the primary language, but must pass the reading exam. Native speakers of a Slavic language may petition to substitute an appropriate alternative measure of English competency to the translation exam.

² Two courses may be in the field of concentration. The electives must include courses in at least two fields outside the student's concentration.

Fields of Concentration

- Russian literature
- Russian and East European history
- Contemporary Russia, East Europe, and Eurasia

Additional Requirements

A written comprehensive examination on the field of concentration is typically taken the term prior to submission of the thesis. The thesis is

defended before the candidate's committee. The defense may include discussion of the comprehensive exam.

Graduate Certificate

The graduate certificate in Russian, East European, and Eurasian studies requires 32 graded graduate-level credits; courses must be passed with grades of B– or better. Credits used to fulfill the language requirement may not be applied to the 32-credit requirement.

Code	Title	Credits
Language Courses		
Select one of the following:		
	Four years of college study or equivalent in one Slavic language	
	Total of four years of college study in two languages of the region	
Field of Concentration Courses		
	Three graduate-level courses in chosen concentration	12
Elective Courses		
	Four graduate-level courses ¹	16
	Total Credits	28

¹ One elective may be in the field of concentration.

Additional Requirements

A research paper written in conjunction with a course or as a separate reading course in the field of concentration.

Fields of Concentration

- Russian literature
- Russian and East European history
- Contemporary Russia, East Europe, and Eurasia

The certificate may be earned in conjunction with any MA or PhD degree. Courses taken to fulfill the graduate degree may also be used to fulfill certificate requirements. Master's candidates in the program may earn the graduate certificate if the field of concentration chosen for the certificate is not the same as the one for the master's degree.

Study of representative literary works.
Prereq: RUSS 103 or equivalent.

RUSS 202. Second-Year Russian. 5 Credits.

Intermediate Russian grammar, reading, conversation, and composition. Study of representative literary works.
Prereq: RUSS 201 or equivalent.

RUSS 203. Second-Year Russian. 5 Credits.

Intermediate Russian grammar, reading, conversation, and composition. Study of representative literary works.
Prereq: RUSS 202 or equivalent.

RUSS 204. Introduction to Russian Literature. 4 Credits.

Survey of Russian literature from its origins to the present; emphasis on Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy, Chekhov, and contemporary works. Readings, lectures, and discussions in English.

RUSS 205. Introduction to Russian Literature. 4 Credits.

Survey of Russian literature from its origins to the present; emphasis on Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy, Chekhov, and contemporary works. Readings, lectures, and discussions in English.

RUSS 206. Introduction to Russian Literature. 4 Credits.

Survey of Russian literature from its origins to the present; emphasis on Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy, Chekhov, and contemporary works. Readings, lectures, and discussions in English.

RUSS 240. Russian Culture. 4 Credits.

Comparative aesthetics and development of art, film, architecture, music, and literature in the context of Russian intellectual history. Readings, lectures, and discussions in English.

RUSS 309. Russian through Theater. 2-4 Credits.

Combined elements of Russian language, literature, and culture learned through participation in a theater production. Credits vary with degree of involvement. Repeatable when different theater production is offered.

RUSS 316. Third-Year Russian. 5 Credits.

Intermediate-to-advanced Russian. Further development of basic skills, with special attention to reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication.
Prereq: RUSS 203 or equivalent.

RUSS 317. Third-Year Russian. 5 Credits.

Intermediate-to-advanced Russian. Further development of basic skills, with special attention to reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication.
Prereq: RUSS 203 or equivalent.

RUSS 318. Third-Year Russian. 5 Credits.

Intermediate-to-advanced Russian. Further development of basic skills, with special attention to reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication.
Prereq: RUSS 203 or equivalent.

RUSS 331. Russian Short Story. 4 Credits.

Analysis of short stories by important 19th and 20th century Russian writers in the context of social political and literary development. Readings in English. Offered alternate years.

RUSS 334. Dostoevsky. 4 Credits.

Introduction to the novels and short stories of Dostoevsky. His literary, ethical, and political development. Readings and instruction in English.

RUSS 335. Tolstoy. 4 Credits.

Examines short and long works by Leo Tolstoy, focusing on ethical questions and Tolstoy's literary art. Readings and instruction in English.

RUSS 351. Russian Literature and Film. 4 Credits.

Introduction to great works of 19th-century Russian literature and analysis of the cinematic adaptation of these works by Western filmmakers.

RUSS 399. Special Studies: [Topic]. 1-5 Credits.

Recent topics are Solzhenitsyn, Sex and Feminism in Russia. Repeatable when topic changes.

RUSS 401. Research: [Topic]. 2-6 Credits.

Repeatable.

RUSS 403. Thesis. 3-6 Credits.

Repeatable.

RUSS 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

RUSS 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

RUSS 407. Seminar: [Topic]. 2-4 Credits.

Repeatable when topic changes.

RUSS 408. Colloquium: [Topic]. 2-4 Credits.

Special on-campus activities. Conducted in Russian. Repeatable when topic changes.

RUSS 409. Practicum: [Topic]. 1-5 Credits.

Repeatable.

RUSS 410. Experimental Course: [Topic]. 2-4 Credits.

Recent topics are Self and Other in Russian Literature and Film. Repeatable when topic changes.

RUSS 426. Classics of Russian Poetry: [Topic]. 4 Credits.

Comprehensive study of selected topics in Russian poetry (e.g., Alexander Pushkin, Russian symbolism, acmeism, futurism, and contemporary poetry). Repeatable twice when topic changes for maximum of 12 credits.

RUSS 434. Russian Literature: [Topic]. 4 Credits.

Comprehensive study of selected topics in Russian literature, (e.g., 20th-century, contemporary, and Old Russian literature). Repeatable twice when topic changes for maximum of 12 credits.

RUSS 436. Advanced Russian: [Topic]. 4 Credits.

Analysis of Russian texts, films, and TV broadcasts about selected topics in Russian culture, literature, politics, and economics with practice in comprehension, conversation, and composition. Repeatable twice when topic changes for a maximum of 12 credits.
Prereq: RUSS 318 or equivalent.

RUSS 440. Russian Phonology and Morphology. 4 Credits.

Russian phonology and morphology (sound system and word formation)
Offered alternate years.

RUSS 445. Old Church Slavonic. 4 Credits.

Sound system and grammar of Old Church Slavonic; its role as a primary source of evidence on the development of the Slavic languages. Readings from Old Church Slavonic texts.
Prereq: RUSS 203 or LING 290 or equivalent.

RUSS 503. Thesis. 1-9 Credits.

Repeatable.

RUSS 507. Seminar: [Topic]. 2-4 Credits.

Repeatable when topic changes.

RUSS 508. Colloquium: [Topic]. 2-4 Credits.

Special on-campus activities. Conducted in Russian. Repeatable when topic changes.

RUSS 510. Experimental Course: [Topic]. 2-4 Credits.

Recent topics are Self and Other in Russian Literature and Film. Repeatable when topic changes.

RUSS 526. Classics of Russian Poetry: [Topic]. 4 Credits.

Comprehensive study of selected topics in Russian poetry (e.g., Alexander Pushkin, Russian symbolism, acmeism, futurism, and contemporary poetry). Repeatable twice when topic changes for maximum of 12 credits.

Eugene, Oregon 97403-1250

Undergraduate Studies

The Scandinavian Studies Committee endeavors to stimulate interest in Scandinavian culture, society, languages, and history. The committee is a focal point for faculty members and students who want to teach or take courses related to Scandinavia or to do research on Scandinavian countries. Students can earn a minor in Scandinavian or a major in German with a focus on Scandinavian. Both academic programs are described in the **German and Scandinavian** section of this catalog.

Overseas Study

Students in all University of Oregon overseas study programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. See International Affairs in the **Academic Resources** section of this catalog.

The university has student exchange programs with the University of Aalborg, Copenhagen Business School, Denmark's International Study Program in Copenhagen, the University of Tampere in Finland, the Universities of Bergen and Oslo in Norway, and the University of Uppsala in Sweden. Area-studies courses not offered by the university can often be taken at one of the Nordic universities. The courses may be applied to the Scandinavian minor or the German and Scandinavian focus of the German major.

Committee members have close ties to the information services of Nordic governments. As a result, books, periodicals, and newspapers regularly arrive from Nordic countries.

Curriculum

Courses appropriate for Scandinavian studies have been offered in anthropology, comparative literature, English, German and Scandinavian, political science, sociology, and other departments. The Department of German and Scandinavian offers language instruction in Swedish.

Steering Committee Faculty

Jon M. Erlandson, anthropology

D. Gantt Gurley, German and Scandinavian

Sonja Rasmussen, International Resource Center

sociology@uoregon.edu

Sociology is the systematic study of human social life, groups, and societies. Sociology can reveal how society works, what motivates individuals to behave in certain ways, how particular rules and norms get established, why people obey those rules and norms, how seemingly invisible social forces might govern our behavior, and how the outcome of our lives are frequently determined by forces largely outside of our

control. It can even help us understand why we might sometimes act in ways that are contrary to our deeply held beliefs.

Sociologists study how societies form, change, and die out. They study how society affects you and vice versa. The department curriculum focuses on social institutions—the family, work, religion, and the economy; culture—the governing ideas and beliefs of a society; and social interactions—the way people behave as individuals and in groups. Taken together, they make up what sociologists call the social structure: enduring, patterned, orderly relationships among institutions, people, and other elements of a given society. Through a systematic study of society, sociology helps us understand social problems such as inequality, racism, environmental degradation, and poverty, to name a few, and aids in the development of creative solutions to solve them.

Faculty

Michael B. Aguilera, associate professor (economic sociology, social inequality, race and ethnicity). BA, 1995, California, Irvine; MA, 1995, PhD, 1999, State University of New York, Stony Brook. (2004)

Oluwakemi Balogun, assistant professor (gender, race and migration, African Studies). See **Women's, Gender, and Sexuality Studies**.

Michael C. Dreiling, professor (political sociology, environmental sociology, social movements). BA, 1990, California, Irvine; MA, 1993, PhD, 1997, Michigan, Ann Arbor. (1996)

Clare R. Evans, assistant professor (medical sociology, quantitative methods, social networks). BA, 2008, Lewis and Clark College; MPH, 2011, Columbia; ScD, 2015, Harvard. (2015)

John B. Foster, professor (environment, Marxism, political economy). BA, 1975, Evergreen State; MA, 1977, PhD, 1984, York. (1985)

Aaron O. Gullickson, associate professor (race and ethnicity, stratification, demography). BA, 1998, Washington (Seattle); MA, 1999, 2001, PhD, 2004, California, Berkeley. (2007)

Jill A. Harrison, associate professor (work, organizations, qualitative methods). BA, 2000, Youngstown State; MA, 2004, PhD, 2009, Ohio State. (2009)

Jocelyn Hollander, professor (gender, microsociology, gender-based violence). BA, 1987, Stanford; MA, 1991, PhD, 1997, Washington (Seattle). (1997)

Raoul S. Liévanos, assistant professor (environment and health, race and ethnicity, science and technology). BA, 2004, California State, Fresno; MA, 2007, PhD, 2013, California, Davis. (2016)

Ryan Light, associate professor (cultural sociology, inequality, social networks). BA, 2000, Kenyon College; MA, 2004, PhD, 2009, Ohio State. (2009)

Amy J. Luebbbers, instructor pro tem. BS, 1996 McPherson College; MA, 1999, Kansas. (2016)

Kari Norgaard, professor (environmental and cultural sociology, sociology of emotions). BS, 1992, Humboldt State; MA, 1994, Washington State; PhD, 2003, Oregon. (2011)

Matthew Norton, associate professor (political and cultural sociology, theory). BA, 1998, Villanova; MA, 2002, Bradford; PhD, 2012, Yale. (2012)

Eileen M. Otis, associate professor (gender, labor, China), B.A, 1987, California, Berkeley; MA, 1996 and 1999, California, Santa Barbara; PhD, 2003, California, Davis. (2008)

C. J. Pascoe, associate professor (sexuality and gender, childhood and youth, new media). BA, 1996, Brandeis; MA, 2000, PhD, 2006, California, Berkeley. (2013)

Elaine Replogle, senior instructor I (sociology of medicine and mental health, culture, qualitative methods). BA, 1989, Earlham College; MTS, 1994, Harvard; MA, 2002, PhD, 2005, Rutgers. (2008)

Ellen K. Scott, professor (low-wage work, public policy, gender). BA, 1982, Williams; MA, 1991, New School for Social Research; MA, 1992, PhD, 1997, California, Davis. (2001)

Jiannbin Lee Shiao, associate professor (race and ethnicity, research methods, Asian America). BA, 1991, Brown; MA, 1994, 1996, PhD, 1998, California, Berkeley. (1998)

Caleb Southworth, associate professor (policy evaluation, data visualization, quantitative methods). BA, 1989, Michigan, Ann Arbor; MA, 1994, California, Irvine; PhD, 2001, California, Los Angeles. (2001)

Jessica Vasquez-Tokos, professor (race and ethnicity, immigration, family). BA, 1998, Princeton; MA, 2002, PhD, 2007, California, Berkeley. (2012)

Richard York, professor (environmental sociology, statistics, research methods). BS, 1994, Southern Oregon; MS, 1997, Bemidji State; PhD, 2002, Washington State. (2002)

Emeriti

Vallon L. Burriss, professor emeritus. BA, 1969, Rice; PhD, 1976, Princeton. (1977)

Steven Deutsch, professor emeritus. BA, 1958, Oberlin; MA, 1959, PhD, 1964, Michigan State. (1966)

Marion Sherman Goldman, professor emeritus [sic]. AB, 1967, California, Berkeley; MA, 1970, PhD, 1977, Chicago. (1973)

Patricia A. Gwartney, professor emerita. AB, 1973, California, Berkeley; MA, 1979, PhD, 1981, Michigan. (1981)

Benton Johnson, professor emeritus. BA, 1947, North Carolina; MA, 1953, PhD, 1954, Harvard. (1957)

Kenneth B. Liberman, professor emeritus. BA, 1970, State University of New York, Old Westbury; MA, 1976, PhD, 1981, California, San Diego (1983)

Gregory McLaughlan, associate professor (urban sociology; political sociology; science, technology, environment). BA, 1974, MA, 1978, PhD, 1988, California, Berkeley. (1989)

Robert M. O'Brien, professor emeritus. BS, 1967, Pomona; MS, 1970, PhD, 1973, Wisconsin. (1981)

Donald R. Van Houten, professor emeritus. BA, 1958, Oberlin; PhD, 1967, Pittsburgh. (1968)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Science**
- **Minor** (p. 526)

Undergraduate Studies

Sociology is the analytical study of the development, structure, and function of human groups and societies. It is concerned with the scientific understanding of human behavior as it relates to, and as a consequence of, interaction within groups. The undergraduate program in the Department of Sociology provides a broad understanding of human society for students in every field and integrated programs for majors in sociology.

Preparation

High school students planning to major in sociology should take courses in history and social studies; in addition, a course in statistics should be considered. Substantial work in English composition, mathematics, and second languages is also desirable. Two-year transfer students are advised to come with a year's work in introductory sociology courses as well as courses that fulfill university group requirements.

Careers

Recent graduates with bachelor's degrees in sociology are found in all the pursuits traditionally open to liberal-arts graduates—especially social service, management, marketing, teaching, library, and research-statistics occupations in industries related to health, education, business, government, and the environment. Some graduates seek additional training in graduate professional schools of social work, business administration, and law. A bachelor's degree alone is seldom sufficient to allow a person to enter a professional career as a sociologist. Students who seek careers as social scientists enter graduate programs in sociology or related fields.

Curriculum

Undergraduate courses in sociology are offered at four levels.

- Topical courses at the 100 level provide an introduction to a specific facet of sociology.
- Courses at the 200 level provide a broad introduction to the field. Basic courses are Introduction to Sociology (SOC 204) and Social Inequality (SOC 207). Completion of one 200-level course is a major requirement. One must also be taken to advance to some 300-level courses.
- Courses at the 300 level extend the student's knowledge of subjects covered in the 200-level courses and provide an introduction to social research methods and social theory.
- Courses at the 400 level are advanced and specialized. Most build on background obtained in the 100-, 200- and 300-level courses. As prerequisites for enrollment in some 400-level courses, students must successfully complete one or more of the core courses: Social Theory (SOC 310), Research Methods (SOC 311), Statistical Analysis in Sociology (SOC 312). Upper-division (300- and 400-level) classes are usually smaller in size than the lower-division classes and provide more opportunity for faculty-student interaction.

Courses used to satisfy major requirements must be taken for letter grades and passed with grades of C– or better; at least a 2.00 grade point average (GPA) must be achieved in these courses. Four credits

from a course not numbered 401–409 may be taken pass/no pass (P/N); P grades must be earned to apply them to the major.

Courses numbered 401–406 may be taken pass/no pass (P/N); P grades must be earned to apply them to the major. No more than 8 credits from these courses may be applied to the major.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Core Courses		
SOC 204	Introduction to Sociology (May be replaced by SOC 207 Social Inequality)	4
SOC 310	Social Theory	4
SOC 311	Research Methods	4
SOC 312	Statistical Analysis in Sociology	4
Upper-Division Courses		
400-level lecture courses (407, 410–499) ¹		12
300- or 400-level courses		8
Additional Courses		
Sociology courses (any level)		12
Total Credits		48

¹ These credits must be earned at the University of Oregon.

Bachelor of Science Degree Requirements

Code	Title	Credits
Core Courses

300- or 400-level courses		8
Additional Courses		
Sociology courses (any level)		12
Total Credits		48

¹ These credits must be earned at the University of Oregon.

General Sociology

Work in sociology begins with Introduction to Sociology (SOC 204) or Social Inequality (SOC 207), both of which provide an introduction to the discipline. They emphasize how sociology can be applied to contemporary social issues. Students specializing in general sociology move on to courses that provide a more in-depth study of social institutions. Courses on social stratification, social psychology, social change, and sociological theory help to tie these diverse areas together by providing perspectives that are useful in the study of any institutional area. Finally, courses in methodology and statistics provide a tool kit of analytical and research skills that are useful both in sociology courses and in whatever activities the student pursues after graduation.

Minor Requirements

The minor in sociology complements a major in another discipline. Courses used to satisfy requirements for the minor must be taken for letter grades and passed with grades of C– or better.

- Of the 24 credits required in sociology courses, 12 must be upper division
- 12 credits must be taken in residence at the University of Oregon; 8 of those credits must be upper division
- No more than 8 credits from the sociology minor may be used to complete the requirements of another major or minor

Code	Title	Credits
Select one from the following:		4
SOC 204	Introduction to Sociology	
SOC 207	Social Inequality	
Select one of the following: ¹		4
SOC 310	Social Theory	
SOC 311	Research Methods	
SOC 312	Statistical Analysis in Sociology	
Other sociology courses ²		16
Total Credits		24

¹ Students in the minor may take 400-level courses only after completing this requirement. Exceptions may be made by instructor permission.

² No more than 4 credits in courses numbered 401–406 may be applied to the minor.

Advising

Academic advising in sociology is provided by Elizabeth Milner, a full-time professional advisor. The advising office is in 707 Prince Lucien Campbell Hall; Elizabeth may be reached at emilner@uoregon.edu or 541-346-1181. Students are encouraged to make appointments via the Navigate system and to come for advising at least once a year, preferably each term.

Internship advising is available through Amy Luebbers; her office is in 631 Prince Lucien Campbell Hall.

The department also maintains an active peer advising program for undergraduate students. Peer advisors keep regular office hours in the peer advising office, 706 Prince Lucien Campbell Hall.

Career Planning

With the help of advisors, each student should select courses that emphasize experiences most useful for the student's educational and career objectives. Career advising is available through Bill Sherman; his office is in 475 Prince Lucien Campbell Hall. Students with specific career plans may also go to the University Career Center for advice about suitable course programs.

When planning a program, students should keep in mind the ways in which major requirements fit with career objectives.

Social Service Professions

Social service professions include social work, work in nonprofit organizations, counseling, community relations, housing, labor relations, and human resources. Sociology majors who want to enter a helping

profession should take at least one course each in sociological methodology and social psychology and several courses dealing with social issues and problems.

Students may supplement their programs with courses in the psychology and political science departments and in the College of Education. Many of these occupations require graduate or field training. Students can get more detailed information from the University Career Center.

Business or Government Service

Business or government organizations typically require general human-relations skills, some awareness of organizations and the surrounding social environment, and an ability to analyze and understand basic social data.

Students interested in business should include in their programs courses in methodology, social psychology, and organizations and occupations. Programs may be supplemented with courses in the Lundquist College of Business and in the Department of Economics.

Students with career goals in governmental service should include courses in community, urban affairs, population, and resources; social psychology; organizations and occupations; and methodology. Related courses in the economics, political science, and planning, public policy and management departments also are useful.

Honors in Sociology

Motivated students may participate in the honors program in sociology. Qualified senior year students work closely with faculty members and fellow honors students on a yearlong project of their own design, and write an honors thesis. The thesis may be based on existing data or data collected by the student.

Students who successfully complete the honors program are awarded departmental honors. The honors distinction is noted on the student's official transcript and diploma.

Applicants to the honors program must demonstrate a high level of competence and motivation for advanced studies in sociology. A GPA of no less than 3.40 in sociology courses or a nomination by two faculty members is required for admittance, but does not guarantee acceptance. Students selected for the program are notified during spring term of their junior year. Application forms are available in the sociology department office or the department's web page. Students also receive an e-mail describing the application process in the spring term.

During fall and winter terms of the senior year, honors students take part in the two-credit honors thesis seminar, Seminar: [Topic] (SOC 407), and also enroll in Thesis (SOC 403). In fall term, they work closely with the course instructor and other students to refine research questions and design. By the end of the term, each student submits a thesis proposal for approval. During winter term, students work with the course instructor and classmates to collect data and begin their analysis. In the spring term, students complete, publicly present, and submit their theses.

Twelve credits of sociology degree requirements are earned through the honors program: 8 credits of SOC 403 and 4 credits of SOC 407. The SOC 407 credits count toward the 400-level requirement for the major.

Preparing for Graduate Study

Students planning graduate work in sociology should have a strong background in sociological theory and social research methods well beyond courses required for the major. Besides taking advanced courses

in areas of special interest to them, students should take a substantial number of upper-division courses in other social sciences.

Applications to graduate school should be made in fall or winter the year before the student plans to enter a graduate program. Students considering graduate school should talk to their faculty advisors before their final year of school about programs at various schools, experiences that increase chances for admission, and requirements for students in graduate programs in sociology.

Kindergarten through Secondary Teaching Careers

Students who complete a degree with a major in sociology are eligible to apply to the College of Education’s fifth-year program for a license in middle-secondary teaching or the fifth-year program for a license in elementary teaching. Refer early to information in the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Sociology

Course	Title	Credits	Milestones
First Year			
Fall			
WR 121	College Composition I	4	If you wish to pursue a BA, then begin taking a second language freshman or sophomore year
SOC 204 or SOC 207	Introduction to Sociology or Social Inequality	4	Take language placement test if not starting a new language
	General-education course in arts and letters	4	Meet with advisor for progress check and next term planning

- **Master of Arts**
- **Master of Science**
- **Doctor of Philosophy**

Graduate Studies

The Department of Sociology offers graduate work leading to a doctor of philosophy (PhD) and is intended for students seeking a professional career in research and teaching in both academic and nonacademic settings. The department does not offer a terminal master's degree, although students enrolled in the PhD program will also receive a master's degree as part of their training.

Students receive training in qualitative and quantitative research methodologies, sociological theory, and major substantive fields within sociology such as gender, sexuality, environment, race and ethnicity, culture, social networks, labor, immigration, and political economy. The department places a strong emphasis on research, and many students will find opportunities to participate in projects conducted by faculty members.

Curriculum

All graduate-level courses taken to meet requirements are taken for letter grades except for the following courses:

Code	Title	Credits
SOC 601	Research: [Topic]	1-16
SOC 603	Dissertation	1-16
SOC 605	Reading and Conference: [Topic] ¹	1-16
SOC 606	Supervised Field Study: [Topic]	1-16
SOC 608	Workshop: [Topic] (Master's Project)	1-16

¹ In some cases, Reading and Conference: [Topic] (SOC 605) must be taken for a grade. Consult with the graduate coordinator.

Master's-Level Requirements

Students typically complete 55 credits of master's-level requirements in the first six terms of full-time work. Students are awarded a master's degree if they have completed their required courses, achieved a mid-B or better average in their graded courses, and passed the master's paper

requirement. Students who enter with a master's degree in sociology may request substitution of as many as five courses from their previous institutions to meet programmatic requirements.

Doctoral-Level Requirements

After earning the master's degree, students take an additional 20 credits of doctoral-level course work and prepare for a comprehensive examination in a sociological subfield chosen jointly by the student and the advisor.

Upon passing the comprehensive examination, the student is advanced to PhD candidacy and begins work on the doctoral dissertation. The final product is a book-length manuscript presenting empirical research that demonstrates originality and the scholar's ability to conduct independent investigation.

Master of Arts Degree Requirements

Code	Title	Credits
Graduate-level sociology courses		55
Master's paper ¹		
Total Credits		55

¹ The paper must present original empirical research and be stylistically formatted for an existing peer-reviewed journal approved by the student's advisor.

Doctor of Philosophy Degree Requirements

Code	Title	Credits
Graduate-level sociology courses		75
SOC 603	Dissertation	18
Total Credits		93

Courses

SOC 196. Field Studies: [Topic]. 1-2 Credits.
Repeatable.

SOC 198. Workshop: [Topic]. 1-2 Credits.
Repeatable.

SOC 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

SOC 204. Introduction to Sociology. 4 Credits.
The sociological perspective with emphasis on fundamental concepts, theories, and methods of research.

SOC 207. Social Inequality. 4 Credits.
Overview of social inequality, cross-culturally and within the United States. Examines relationship of social inequality based on social class, race, and gender to social change, social institutions, and self-identity.

SOC 301. American Society. 4 Credits.
Selected aspects of American culture and institutions and the ways in which they are changing.
Prereq: SOC 204 recommended.

SOC 304. Community, Environment, and Society. 4 Credits.
Interrelationship of social and environmental factors in human communities, processes of community change, impact of environmental change on human communities.

SOC 310. Social Theory. 4 Credits.
Analysis of the major writers and ideas that have shaped contemporary sociology. Focus on recurrent concepts and issues that continue to challenge sociological inquiry.

SOC 311. Research Methods. 4 Credits.
The development of social research; the nature of scientific inquiry and basic methods and techniques; examination of representative sociological studies from the standpoint of methodology.
Prereq: SOC 204 or SOC 207.

SOC 312. Statistical Analysis in Sociology. 4 Credits.
Construction and interpretation of tables and graphs, descriptive statistics, measures of association and contingency relationships, basic ideas of probability, and elementary statistical inference applied to nonexperimental research.

SOC 313. Social Issues and Movements. 4 Credits.
Contemporary social issues viewed in relation to the social structure of American society. Social movements and ideologies related to these issues.

SOC 317. Sociology of the Mass Media. 4 Credits.
Analysis of media events: advertisements, news broadcasts, documentaries, popular music, and television. Perspectives include content analysis, semiotics, functionalist and structuralist paradigms, and power system analysis.

SOC 328. Self and Society. 4 Credits.
How the thought, feeling, and behavior of individuals influence and are influenced by the actual, imagined, or implied presence of others.

SOC 330. Sociology of the Family. 4 Credits.
Introduction to and historical perspective of the family as a social institution and small-group association.
Prereq: SOC 204 or SOC 207.

SOC 345. Race and Ethnicity. 4 Credits.
Examines the major racial and ethnic groups in the United States with special attention to social interactions and inequalities.

SOC 346. Work and Occupations. 4 Credits.
Characteristics of work and occupational careers in modern societies; relationships of those to family, the economy, bureaucracy, technology, and alienation.

SOC 347. Complex Organizations. 4 Credits.
Nature of organizations in modern societies (e.g., specialization, impersonality, formalization, authority, and power); relationship of organizations to work and careers, stratification, democracy, discrimination, and deviance.

SOC 355. Sociology of Gender. 4 Credits.

Position of women in contemporary society; women and work, politics, families, the economy; intersection of gender, race, and class; women's movements.

SOC 370. Urban Sociology. 4 Credits.

Examines the growth of cities; urban inequalities, politics, and social movements; built environment, ecology, and sustainability of cities and identity; global cities and immigration.

SOC 380. Introduction: Deviance, Control, and Crime. 4 Credits.

Origins of rules and laws, patterns of reactions to their violation, emphasis on causal theories of deviance and of crime, data sources for study of crime.

SOC 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

SOC 401. Research: [Topic]. 1-21 Credits.

Repeatable.

SOC 403. Thesis. 1-12 Credits.

Repeatable.

SOC 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

SOC 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

SOC 406. Supervised Field Study: [Topic]. 1-21 Credits.

Repeatable.

SOC 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Offerings vary from year to year depending on student needs and faculty interests.

Prereq: SOC 204 or SOC 207.

SOC 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

SOC 409. Practicum: [Topic]. 1-21 Credits.

Repeatable.

SOC 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SOC 412. Sociological Research Methods. 4 Credits.

Descriptive and inferential statistics, including multiple regression.

SOC 413. Sociological Research Methods. 4 Credits.

Advanced statistical techniques focusing on generalized linear models.

Prereq: SOC 412.

SOC 416. Issues in Environmental Sociology [Topic]. 4 Credits.

Analysis of selected topics in environmental sociology. Topics include environmental movement, impacts of technological change, environmental policy and the state, environmental values, attitudes, and behaviors. Repeatable twice when topic changes for maximum of 12 credits.

SOC 420. Political Economy. 4 Credits.

Survey of the fundamentals of political economy. Readings from Marxian and mainstream traditions introduce contemporary debates on socioeconomic crisis.

SOC 425. Issues in Sociology of Family: [Topic]. 4 Credits.

Analysis of selected topics in the sociology of the family. Topics include the sociology of parenthood, feminist perspectives on the family, and the family in cross-cultural perspective. Repeatable twice for a maximum of 12 credits when topic changes.

Prereq: SOC 330.

SOC 442. Issues in Urban Sociology: [Topic]. 4 Credits.

Determinants and consequences of urbanization under different conditions; the city as a social and ecological system. Repeatable twice when topic changes for a maximum of 12 credits.

SOC 445. Sociology of Race and Ethnicity: [Topic]. 4 Credits.

This course provides advanced study in the sociology of race/ethnicity by exploring the "big picture" of current developments in the field. The course invites students to explore both sociological theories about race/ethnicity in the United States and major areas of empirical research: (1) stratification, (2) attitudes, (3) identities and interactions, (4) assimilation, and (5) boundaries. We begin by reviewing and updating classic sociological theories of racial oppression and resistance before examining the post-civil rights era through instructor-led and student-led seminars on contemporary research in the major areas. This course is approved to satisfy American Cultures multicultural category.

Prereq: SOC 310, SOC 311.

SOC 446. Issues in Sociology of Work: [Topic]. 4 Credits.

Selected topics in sociology of work: occupational structures and careers, industrial democracy; technological change and work reform, politics of work. Repeatable twice when topic changes for maximum of 12 credits.

SOC 447. Issues in Sociology of Organizations: [Topic]. 4 Credits.

Analysis of selected topics in the sociology of organizations. Topics include industrial sociology, organizational change; organizational democracy; corporate deviance; bureaucracy, power, and society. Repeatable twice when topic changes for maximum of 12 credits.

SOC 450. Sociology of Developing Areas. 4 Credits.

Social and economic structures and processes promoting or inhibiting change in the developing nations of Africa, Asia, Latin America. Topics include urbanization, industrialization, cultural change, world poverty, and dependence.

SOC 451. Social Stratification. 4 Credits.

The interrelations among class, race, and sex. Historical origins and development of class and class systems including slavery.

Prereq: SOC 310, 311, 312.

SOC 452. Issues of Migration: [Topic]. 4 Credits.

Sociological analysis of migration, including dynamics of race and ethnicity, social structure, and social policy. Examines assimilation, marginalization, multiculturalism, postcolonialism, and social cohesion. Repeatable twice when the topic changes for a maximum of 12 credits. Offered alternate years.

Prereq: SOC 310.

SOC 455. Issues in Sociology of Gender: [Topic]. 4 Credits.

Advanced analysis of gender and social relations of power in contemporary society. Variable topics include Women and Health; Violence against Women. Repeatable twice when topic changes for maximum of 12 credits.

SOC 456. Feminist Theory. 4 Credits.

Examines major sociological theories that elucidate the position of women and gender as part of the configuration of social relations of power in contemporary societies.

SOC 457. Sex and Society. 4 Credits.

Examines alternative sociological perspectives on sexual behavior, the social construction and regulation of sexuality, contemporary social and political issues pertaining to sexuality.

Prereq: SOC 310.

SOC 464. Systems of War and Peace. 4 Credits.

Violence and nonviolence as functions of social structures and as instruments of social change. Systems of international threat, their supporting institutions, and the ideology of nationalism.

SOC 465. Political Sociology. 4 Credits.

Analysis of political theory and behavior, social bases of power and policy determination, institutional interrelationships, intellectuals and ideologies, political trends and change, political participation and membership.

SOC 467. Economic Sociology. 4 Credits.

Applies the sociological perspective to basic economic phenomena such as markets, exchange, prices, money and rationality.

Prereq: SOC 310.

SOC 475. Marxist Sociological Theory. 4 Credits.

Basic concepts, theory, and social analysis in the works of Marx and Engels. Topics include dialectical and historical materialism, class, historical development, political economy, and imperialism.

SOC 484. Issues in Deviance, Control, and Crime: [Topic]. 4 Credits.

Topics vary. Examples are modern policing, juvenile delinquency, correction, emerging forms of social control. Repeatable twice when topic changes for maximum of 12 credits.

SOC 491. Sociology of Education. 4 Credits.

The relationship between education and other social institutions, the school and the community, the school as a social system, social change and education.

SOC 503. Thesis. 1-16 Credits.

Repeatable.

SOC 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Offerings vary from year to year depending on student needs and faculty interests.

SOC 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

SOC 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SOC 512. Sociological Research Methods. 4 Credits.

Descriptive and inferential statistics, including multiple regression.

SOC 513. Sociological Research Methods. 4 Credits.

Advanced statistical techniques focusing on generalized linear models. Prereq: SOC 4/512.

SOC 516. Issues in Environmental Sociology [Topic]. 4 Credits.

Analysis of selected topics in environmental sociology. Topics include environmental movement, impacts of technological change, environmental policy and the state, environmental values, attitudes, and behaviors. Repeatable twice when topic changes for maximum of 12 credits.

SOC 520. Political Economy. 4 Credits.

Survey of the fundamentals of political economy. Readings from Marxian and mainstream traditions introduce contemporary debates on socioeconomic crisis.

SOC 542. Issues in Urban Sociology: [Topic]. 4 Credits.

Determinants and consequences of urbanization under different conditions; the city as a social and ecological system. Repeatable twice when topic changes for a maximum of 12 credits.

SOC 545. Sociology of Race and Ethnicity: [Topic]. 4 Credits.

Advanced analysis of selected topics in sociology of race/ethnicity. Topics vary. Examples include Asian Americans, Latinos, mixed race, racial oppression, residential segregation, and the post-civil rights era. Repeatable twice for a maximum of 12 credits.

SOC 546. Issues in Sociology of Work: [Topic]. 4 Credits.

Selected topics in sociology of work: occupational structures and careers, industrial democracy; technological change and work reform, politics of work. Repeatable twice when topic changes for maximum of 12 credits.

SOC 547. Issues in Sociology of Organizations: [Topic]. 4 Credits.

Analysis of selected topics in the sociology of organizations. Topics include industrial sociology, organizational change; organizational democracy; corporate deviance; bureaucracy, power, and society. Repeatable twice when topic changes for maximum of 12 credits.

SOC 551. Social Stratification. 4 Credits.

The interrelations among class, race, and sex. Historical origins and development of class and class systems including slavery.

SOC 552. Issues of Migration: [Topic]. 4 Credits.

Sociological analysis of migration, including dynamics of race and ethnicity, social structure, and social policy. Examines assimilation, marginalization, multiculturalism, postcolonialism, and social cohesion. Repeatable twice when the topic changes for a maximum of 12 credits. Offered alternate years.

SOC 555. Issues in Sociology of Gender: [Topic]. 4 Credits.

Advanced analysis of gender and social relations of power in contemporary society. Variable topics include Women and Health; Violence against Women. Repeatable twice when topic changes for maximum of 12 credits.

SOC 556. Feminist Theory. 4 Credits.

Examines major sociological theories that elucidate the position of women and gender as part of the configuration of social relations of power in contemporary societies.

Prereq: SOC 4/555.

SOC 565. Political Sociology. 4 Credits.

Analysis of political theory and behavior, social bases of power and policy determination, institutional interrelationships, intellectuals and ideologies, political trends and change, political participation and membership.

SOC 567. Economic Sociology. 4 Credits.

Applies the sociological perspective to basic economic phenomena such as markets, exchange, prices, money and rationality.

SOC 575. Marxist Sociological Theory. 4 Credits.

Basic concepts, theory, and social analysis in the works of Marx and Engels. Topics include dialectical and historical materialism, class, historical development, political economy, and imperialism.

SOC 584. Issues in Deviance, Control, and Crime: [Topic]. 4 Credits.

Topics vary. Examples are modern policing, juvenile delinquency, correction, emerging forms of social control. Repeatable twice when topic changes for maximum of 12 credits.

SOC 601. Research: [Topic]. 1-16 Credits.

Repeatable.

SOC 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

SOC 603. Dissertation. 1-16 Credits.

Repeatable.

SOC 604. Internship: [Topic]. 1-6 Credits.

Repeatable.

SOC 605. Reading and Conference: [Topic]. 1-16 Credits.
Repeatable.

SOC 606. Supervised Field Study: [Topic]. 1-16 Credits.
Repeatable.

SOC 607. Seminar: [Topic]. 1-5 Credits.
Repeatable. Proseminar required for all incoming Sociology graduate students. Professional socialization and preparation for the discipline.

SOC 608. Workshop: [Topic]. 1-16 Credits.
Repeatable. A current topic is Master's Project.

SOC 609. Practicum: [Topic]. 1-3 Credits.
Repeatable.

SOC 610. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

SOC 612. Overview of Sociological Methods. 5 Credits.
Examines the research process--framing research questions, qualitative and quantitative design, relationships between methods and theory, deductive and inductive investigation logic, research ethics, sampling procedures, explanatory power.

SOC 613. Advanced Sociological Methods: [Topic]. 5 Credits.
Major methodological topics such as comparative, demographic, experimental, field, historical, and survey methods. Other possible topics include time-series analysis. Repeatable twice when topic changes for maximum of 15 credits.
Prereq: SOC 612 or equivalent.

SOC 615. Advanced Sociological Theory: [Topic]. 5 Credits.
Major sociological theories such as modern functionalism, contemporary Marxism, phenomenology, postmodernism, feminist and organizational theory. Repeatable twice when topic changes for maximum of 15 credits.

SOC 616. Environment and Resource Issues: [Topic]. 5 Credits.
Explores issues of environmental sociology and resource policy, including ecological crisis; environmental justice as it pertains to race, gender, class, and international inequality. Repeatable twice when topic changes for maximum of 15 credits.

SOC 617. Sociological Theory I. 5 Credits.
Sociological theories of the 19th century (especially Marx, Weber, and Durkheim) and 20th century (e.g., modern functionalism, feminist, neo-Marxism, neo-Weberian, poststructuralist theories).

SOC 618. Sociological Theory II. 5 Credits.
Major themes and historical foundation of contemporary sociological theory.
Prereq: SOC 617.

SOC 621. Teaching in the Social Sciences. 4 Credits.
Prepares graduate students to teach their own classes. Covers pedagogy and develops practical skills. Offered alternate years.

SOC 644. Race and Ethnicity Issues: [Topic]. 5 Credits.
Explores current research and theoretical debates, such as Chicano-Chicana and Latino-Latina studies, in the sociology of race and ethnicity. Repeatable twice when topic changes for maximum of 15 credits.

SOC 646. Work and Organization Issues: [Topic]. 5 Credits.
Examples of issues explored include power in organizations; changing patterns of employment and work; industrial democracy; and race, class and gender. Repeatable twice when topic changes for maximum of 15 credits.

SOC 656. Issues in Sociology of Gender: [Topic]. 5 Credits.
Examines sociological theories of gender, focusing on a particular substantive area such as health, work, family, or sexuality. Explores gender in relation to race, ethnicity, and class. Repeatable twice when topic changes for maximum of 15 credits.

SOC 664. Political and Economic Sociology Issues: [Topic]. 5 Credits.
Examines the relationship between economic institutions and political processes. Sample topics include theories of modern capitalism, corporations and the state, development and underdevelopment, war and peace. Repeatable twice when topic changes for maximum of 15 credits.

Southeast Asian Studies

William S. Ayres, Associate Director

541-346-5119
541-346-0668 fax
837 Prince Lucien Campbell Hall
5206 University of Oregon
Eugene, Oregon 97403-5206
ast@uoregon.edu

The University of Oregon offers students an opportunity to pursue interdisciplinary studies on Southeast Asia. Specialists from across the university acquaint students with recent research on such topics as women, health, healing, and nutrition in Thailand and Indonesia; the archaeology of Thailand and Malaysia; education and development in Vietnam, Laos, and Thailand; regional transnationalisms; and indigenous minority communities and cultures throughout the region. Individualized and self-instructional study of Southeast Asian languages can be arranged through the Yamada Language Center.

Important resources include Southeast Asian library collections, the Center for Asian and Pacific Studies, and the Office of International Affairs. The university also sponsors conferences, workshops, outreach, study abroad opportunities, internships, fellowships, student and faculty exchange, and cooperation between libraries.

Southeast Asian studies is a track in the Asian Studies Program. Undergraduates may pursue a minor in Southeast Asian studies in conjunction with majors in most departments (e.g., anthropology, history), as a concentration in international studies, or as the basis for a BA in Asian studies. See the **Asian Studies** (p. 76) section of this catalog for requirements and curriculum offerings.

Statistics

The University of Oregon does not have a formal department of statistics. However, a variety of courses are either exclusively or primarily about statistics. Over the past several decades, statistical techniques have become a primary tool of empirical research. As such, a variety of functional areas and disciplines teach applied statistical techniques. This is particularly true at the graduate level, where research plays an important role.

Degrees

The Department of Mathematics in the College of Arts and Sciences offers both undergraduate and graduate degrees with options that allow a specialty in statistics. Interested students should address inquiries about specific requirements to that department.

Statistics Courses

Students and advisors should be aware that, within any given area, two or more courses offered by different departments could contain such similar content that a student might not be granted credit toward graduation for more than one of the courses.

Introductory Statistics

- **Earth Sciences.** Earth and Environmental Data Analysis (GEOL 418), Earth and Environmental Data Analysis (GEOL 518)
- **Human Physiology.** Scientific Investigation in Physiology (HPHY 212)
- **Mathematics.** Introduction to Methods of Probability and Statistics (MATH 243), Statistical Models and Methods (MATH 343), Statistical Methods I (MATH 425), Statistical Methods I (MATH 525)
- **Political Science.** Methods for Politics and Policy Analysis I (PS 445), Methods for Politics and Policy Analysis I (PS 545)
- **Psychology.** Applied Data Analysis (PSY 412), Applied Data Analysis (PSY 512)
- **Sociology.** Statistical Analysis in Sociology (SOC 312)

Advanced Statistics

- **Anthropology.** Statistical Analysis of Biological Anthropology (ANTH 470), Statistical Analysis of Biological Anthropology (ANTH 570)
- **Economics.** Introduction to Econometrics (EC 320), Introduction to Econometrics (EC 421), Econometrics (EC 423), Econometrics (EC 523), Econometrics (EC 424), Econometrics (EC 524), Econometrics (EC 425), Econometrics (EC 525)
- **Education.** Educational Statistics (EDUC 614), Applied Statistical Design and Analysis (EDUC 640), Applied Multivariate Statistics (EDUC 644)
- **Finance.** Quantitative Methods for Finance (FIN 615)
- **Mathematics.** Introduction to Mathematical Methods of Statistics I (MATH 461), Introduction to Mathematical Methods of Statistics I (MATH 561), Introduction to Mathematical Methods of Statistics II (MATH 462), Introduction to Mathematical Methods of Statistics II (MATH 562), Mathematical Methods of Regression Analysis and Analysis of Variance (MATH 463), Mathematical Methods of Regression Analysis and Analysis of Variance (MATH 563), Stochastic Processes (MATH 467), Stochastic Processes (MATH 567), Theory of Probability (MATH 672), Theory of Probability (MATH 673)
- **Operations and Business Analytics.** (OBA 330), (OBA 330H)
- **Political Science.** Methods for Politics and Policy Analysis II (PS 446), Methods for Politics and Policy Analysis II (PS 546)
- **Psychology.** Data Analysis I (PSY 611), Data Analysis II (PSY 612), Data Analysis III (PSY 613)
- **Sociology.** Sociological Research Methods (SOC 412), Sociological Research Methods (SOC 512), Sociological Research Methods (SOC 413), Sociological Research Methods (SOC 513)

Theater Arts

Harry Wonham, Department Head

541-346-4145
541-346-1978 fax
216 Villard Hall

1231 University of Oregon
Eugene, Oregon 97403-1231

About the Department

The Department of Theater Arts offers major curricula leading to the bachelor of arts (BA), bachelor of science (BS), master of arts (MA), master of fine arts (MFA) with a specialization in design, and doctor of philosophy (PhD) degrees. The master of science (MS) degree program is currently inactive. Courses in theater arts are available for students majoring in other disciplines who want to develop their communication skills and their ability to appreciate and evaluate what they see and hear.

At the undergraduate level, the department offers a cross-disciplinary and liberal-arts education. Preprofessional courses provide vocational competence in teaching and in some aspects of commercial theater. Some students seek careers in commercial, educational, and community theaters as designers, actors, technicians, stage managers, or theater managers. Many continue specialized training in MFA degree programs or nondegree professional training schools. Some students use their liberal-arts background to pursue vocational opportunities that require advanced skills in communication and organization.

Students may gain practical experience in theater studies through University Theatre productions and other opportunities.

At the graduate level, the department offers intensive study and practical work toward the MFA degree focus areas of costume design, scenic design, and technical theater, with opportunities to also emphasize lighting, sound design, or both. The MA and PhD programs offer an in-depth study of theater and performance through contemporary critical and cultural theories as well as historiography and performance praxis.

Theaters

The James F. Miller Theatre Complex includes the renovated Robinson Theatre, a proscenium theater seating 300, and the Hope Theatre, a flexible venue that can seat 100–150. The complex includes a large lobby and costume and scene shops. The Pocket Playhouse, in Villard Hall, is a small proscenium stage and seats 75 people.

Technical Facilities

The scene shop is well equipped with power tools for wood and metal fabrication. Lighting equipment includes computerized controls and up-to-date instruments. The costume shop has power sewing and serging machines and a laundry and crafts area. Students are encouraged to sign up for production workshop classes or to practice their crafts as volunteers. Those who qualify for work-study financial aid are hired to assist in the shops. The shops are open every day.

Pocket Playhouse

Pocket Playhouse is the site for a series of productions presented by an elected student board.

University Theatre

The department's season is composed of productions in two venues: the Robinson Theatre and the Hope Theatre. Faculty members and graduate students direct and design as many as six shows a year. Auditions are open to UO students, and admission for UO students is free.

Faculty

Bradley Branam, associate professor (technical direction, media design). BA, 2000, Luther College; MFA, 2009, Missouri, Kansas City. (2012)

Jeanette De Jong, associate professor. BA, 1982, Puget Sound; MFA, 1984, Oregon. (2015)

Jerry Hooker, associate professor (scene designer). BA, 1978, Puget Sound; MFA, 1985, Utah State. (2001)

Theresa May, associate professor (acting, embodiment, Native American theater); director, graduate studies. BA, 1980, California, Irvine; MFA, 1983, Southern California; PhD, 2000, Washington (Seattle). (2007)

Michael Malek Najjar, associate professor (Arab American theater and performance, playwriting, performance theory). BA, 1993, New Mexico; MFA, 1999, York; PhD, 2011, California, Los Angeles. (2011)

Tricia Rodley, instructor (acting, voice and dialect) BA, 1992, Oregon; MA, 2005, Royal Central School of Speech and Drama (London); PhD, 2014, Oregon. (2015)

Janet Rose, senior instructor (technical director, lighting designer). BFA, 1977, Florida Atlantic; MFA, 1979, Ohio. (1987)

John Schmor, associate professor (theory, history, acting). BA, 1984, Willamette; MA, 1989, PhD, 1991, Oregon. (1999)

Emeriti

Alexandra Bonds, professor emerita. BS, 1972, Syracuse; MA, 1974, Denver. (1979)

Robert Barton, professor emeritus. BA, 1967, Western Michigan; MA, 1968, PhD, 1977, Bowling Green State. (1980)

Grant F. McKernie, professor emeritus. BA, 1964, Northwestern; MA, 1965, PhD, 1972, Ohio State. (1979)

John C. Watson, associate professor emeritus. BA, 1964, Lewis and Clark; PhD, 1987, Oregon. (1987)

Jerry R. Williams, professor emeritus. BFA, 1964, Carnegie-Mellon; MA, 1965, Washington (Seattle). (1973)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Arts
- Bachelor of Science
- Minor

Undergraduate Studies

For its undergraduate major program, the Department of Theater Arts has three principal objectives:

1. The attainment, by all of its majors, of a broad liberal arts education
2. Sufficient instruction to provide an appreciation of the different areas of theater
3. Direct experience in several aspects of theater production

Students study acting, directing, design, costume, lighting, stagecraft, history, dramatic literature, and theory. Courses in these fields are available to both majors and nonmajors.

In addition to the BA or BS degree requirements of the university, the following requirements are specified for students with a major in theater arts:

Bachelor of Arts Degree Requirements

Code	Title	Credits
TA 210	Introduction to Design	4
TA 211–212	Theater Production I-II	8
TA 250	Acting I	4
TA 271	Introduction to Theater Arts	4
TA 367–369	History of the Theater I-III	12
TA 470	Majors Seminar	4
TA 490	Theater Capstone: [Topic] (Play Direction, Playwriting, Devising, Dramaturgy)	4
Three of the following: ¹		3
TA 321	Scenery Production	
TA 322	Costume Production	
TA 323	Lighting Production	
TA 324	Production	
Three upper-division courses in acting, directing, design, technical production, or playwriting		12
Three upper-division courses in history, literature, criticism, or dramaturgy ²		12
Total Credits		67

¹ Production assignments are 1–4 credits each.

² With the consent of an advisor, a student may substitute a course in another department for one of these courses, selected from a list approved by the theater arts faculty.

Bachelor of Science Degree Requirements

Code	Title	Credits
TA 210	Introduction to Design	4
TA 211–212	Theater Production I-II	8
TA 250	Acting I	4
TA 271	Introduction to Theater Arts	4
TA 367–369	History of the Theater I-III	12
TA 470	Majors Seminar	4
TA 490	Theater Capstone: [Topic] (Play Direction, Playwriting, Devising, Dramaturgy)	4
Three of the following: ¹		3
TA 321	Scenery Production	
TA 322	Costume Production	
TA 323	Lighting Production	
TA 324	Production	
Three upper-division courses in acting, directing, design, technical production, or playwriting		12
Three upper-division courses in history, literature, criticism, or dramaturgy ²		12
Total Credits		67

- ¹ Production assignments are 1–4 credits each.
- ² With the consent of an advisor, a student may substitute a course in another department for one of these courses, selected from a list approved by the theater arts faculty.

Grading Options

Some courses in theater arts are offered pass/no pass (P/N) only. Work counts toward fulfillment of the 180-credit requirement for a BA or BS only if satisfactorily completed.

Transfer Students

Transfer students must complete six 4-credit, upper-division courses and two of the production courses listed in the course list in residence at the University of Oregon.

Honors in Theater Arts

At the end of each academic year, the department’s faculty selects certain graduating seniors and confers on them departmental honors. Criteria include academic performance as well as the quality of participation in the production program.

Minor Requirements

Course work for the minor must be completed with letter grades of mid-C or better. At least 16 credits must be taken at the university. One course in each of the following areas must be included:

- literature and criticism
- performance
- technical theater
- theater history

Code	Title	Credits
Theater arts courses		8
Upper-division theater arts courses		16
Total Credits		24

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Theater Arts

Course	Title	Credits	Milestones
First Year			
Fall			
TA 271	Introduction to Theater Arts	4	
WR 121	College Composition I	4	
First term of first-year second-language sequence		4	
TA 250	Acting I	4	
or TA 210	or Introduction to Design

- Master of Arts
- Master of Fine Arts
- Doctor of Philosophy

Graduate Studies

The department offers graduate work leading to the master of arts (MA), master of fine arts (MFA), and doctor of philosophy (PhD) degrees. The master of science (MS) degree program is currently inactive. Students entering the master's degree program should have an undergraduate major in theater arts or the equivalent, while students entering the doctoral program should have completed a master's degree in theater arts or the equivalent.

Each graduate student is expected to show ability in both academic and production areas. During residence at the university, a student is expected to make a significant contribution in three areas out of the following seven: acting, directing, technical theater, management, playwriting, teaching, and design.

Master of Arts Degree Requirements

Code	Title	Credits
Graduate credits in graded theater arts course work		28
TA 503	Thesis	12
TA 607	Seminar: [Topic] ¹	16
Total Credits		56

¹ Course topic changes every term. The master of arts requires at least 16 credits (four seminars). The student may also take approved 600-level course work.

Additional Requirements

- A minimum grade point average of 3.00
- Language proficiency (course work or examination)
- Completion of approved thesis
- Faculty-guided artistic production in design, acting, directing, technical production, dramaturgy, and playwriting

Master of Fine Arts Degree Requirements

The following are minimum requirements, all of which must be taken for a letter grade with the exception of Research: [Topic] (TA 601) and Practicum: [Topic] (TA 609).

Code	Title	Credits
TA 601	Research: [Topic]	4
TA 607	Seminar: [Topic] ¹	8
TA 609	Practicum: [Topic]	16
Design and technology courses ²		24
Theater history, literature, and theory courses at the 500 and 600 level		8
Related courses outside the department ³		8
At least one course from acting, directing, dramaturgy, or stage management		4
Additional graded graduate-level theater arts course work		16
Total Credits		88

¹ Course topics change every term. The MFA requires at least 8 credits. Students may also take approved and graded 600-level course work.

² Must include at least one course each in lighting, scenery, and costumes.

³ With advisor approval, undergraduate courses at the 300 level may apply.

Additional Requirements

- A minimum grade point average of 3.00
- Completion and approval of a final project and written document

Specialization

Areas of specialization are set design, lighting design, technical direction, and costume design.

The master of fine arts degree does *not* require proficiency in a second language. Course work is substantially completed during the first two years; the MFA program typically takes three years to complete.

Doctor of Philosophy Degree Requirements

The PhD in theater arts requires nine courses in the first year and seven courses in the second year, which may include as much as 6 credits of independent reading toward the qualifying examinations in winter or spring terms of the second year. Students seeking the PhD must have demonstrated proficiency in a foreign language, either from two years of successful college course work or by passing a basic translation-comprehension exam, such as the College-Level Examination Program (CLEP) test.

Following completion of course work, students wishing to pass to doctoral candidacy must pass qualifying examinations. Within one month after advancement to doctoral candidacy, students must deliver a dissertation prospectus for committee approval. Candidacy may be granted only after an approved dissertation prospectus. The degree is granted only with successful completion and full approval of a dissertation under Graduate School rules and deadlines.

Requirements Summary

- A minimum of 20 graded credits in 600-level graduate seminars
- At least 12 graded credits (or three 500- to 600-level courses) in a related field outside of theater arts
- Proof of reading comprehension in a foreign language (transcript credits or examination)
- Involvement in a faculty-guided artistic production in design, acting, directing, technical production, dramaturgy, and playwriting
- Qualifying examinations, oral defense, and approved prospectus
- At least 18 credits of Dissertation (TA 603)
- Completion of dissertation and approval of oral defense

Courses

TA 121. Scenery and Lighting Laboratory. 1-2 Credits.

Building and painting scenery, hanging lights for productions. Repeatable thrice for maximum of 8 credits.

TA 122. Costume Laboratory. 1-2 Credits.

Building costumes for productions. Repeatable thrice for maximum of 8 credits.

TA 124. Production. 1-2 Credits.

Working backstage for productions. Repeatable thrice for maximum of 8 credits.

TA 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

TA 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

TA 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable. Freshman seminars.

TA 210. Introduction to Design. 4 Credits.

Introduction to the principles of design as applied to the arts of theater design, scenery, costumes, and lighting. Creative projects to develop concepts of visual imagery. Includes laboratory.

TA 211. Theater Production I. 4 Credits.

Introduction to the mechanics of mounting a theatrical production including basic construction of scenery and props and use of lighting equipment. Includes laboratory.

TA 212. Theater Production II. 4 Credits.

Introduction to costumes and makeup. Costume construction includes basic hand and machine sewing techniques. Beginning makeup covers ingenue, beards, wounds, and fantasy. Includes laboratory.

TA 250. Acting I. 4 Credits.

Principles of warm-ups, individual inventory, Stanislavski system, character analysis, and rehearsal procedure.

TA 251. Acting II. 4 Credits.

Continuation of performance principles for contemporary realistic theater with addition of dramaturgical scene study.

TA 252. Acting III. 4 Credits.

Development of improvisational skills while establishing a working file of monologue material.

TA 271. Introduction to Theater Arts. 4 Credits.

Play and script structure, contemporary aesthetic attitudes, and the value of theater arts to society and the individual.

TA 321. Scenery Production. 1-3 Credits.

Production or performance crew head for scenery. Repeatable thrice for maximum of 12 credits.

Prereq: TA 211

TA 322. Costume Production. 1-3 Credits.

Production or performance crew head for costumes. Repeatable thrice for maximum of 12 credits.

Prereq: TA 212

TA 323. Lighting Production. 1-3 Credits.

Production or performance crew head for lighting. Repeatable thrice for maximum of 12 credits.

Prereq: TA 211

TA 324. Production. 1-3 Credits.

Stage manager, assistant director, or dramaturgy position. Repeatable thrice for maximum of 12 credits.

TA 325. Performance. 1-3 Credits.

Preparation, rehearsal, and performance of an acting role. Repeatable thrice for maximum of 12 credits.

TA 367. History of the Theater I. 4 Credits.

Development of the theater from its origins to the present. Emphasizes the history of dramatic literature, criticism, theater architecture, design, and performance.

TA 368. History of the Theater II. 4 Credits.

Development of the theater from its origins to the present. Emphasizes the history of dramatic literature, criticism, theater architecture, design, and performance.

TA 369. History of the Theater III. 4 Credits.

Development of the theater from its origins to the present. Emphasizes the history of dramatic literature, criticism, theater architecture, design, and performance.

TA 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

TA 401. Research: [Topic]. 1-4 Credits.

Repeatable nine times when the topic changes for a maximum of 40 credits.

TA 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable nine times when the topic changes for a maximum of 40 credits.

TA 406. Field Studies: [Topic]. 1-16 Credits.

Repeatable twice for a maximum of 48 credits.

TA 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

TA 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

TA 409. Practicum: [Topic]. 1-3 Credits.

Repeatable thrice for maximum of 12 credits.

TA 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

TA 411. Costume History I. 4 Credits.

History of Western clothing in cultural context. Egyptian to Renaissance.

TA 412. Costume History II. 4 Credits.

History of Western clothing in cultural context. Mid-Renaissance to romanticism.

TA 416. Costume Design. 4 Credits.

Beginning design concepts and various artistic media as applicable to costume design and rendering techniques.

Prereq: TA 210.

TA 417. Advanced Costume Design. 4 Credits.

Analysis and interpretation of scripts for costume design. Continuation of development of rendering techniques.

Prereq: TA 416.

TA 418. Costume Pattern Drafting. 4 Credits.

Designing patterns through flat patterning and draping techniques.

Practical experience in pattern development and execution.

Prereq: TA 212.

TA 419. Costume Construction. 4 Credits.

Practical problems encountered in building and decorating costumes for the stage.

Prereq: TA 212.

TA 420. Return and Review for Actors. 1 Credit.

Review foundational concepts and technique by participating, demonstrating, and coaching in Acting I or II. Repeatable for Acting I (TA 250) only once; for Acting II (TA 251) only once.

Prereq: TA 250, 251, 252. Coreq: TA 409.

TA 441. Scene Design: Single Set. 4 Credits.

Elements of scene design; the scene designer's role. Creating a ground plan, measured perspective techniques, elevations, design styles. Design process and procedures related to the proscenium stage only.

Prereq: TA 210.

TA 445. Advanced Projects in Theater Technology: [Topic]. 4 Credits.

Specialized areas of theater technology, one topic per term. Topics include scene painting, stage management, props, and computer drafting. Repeatable seven times when topic changes for maximum of 32 credits.

TA 452. Advanced Acting: [Topic]. 4 Credits.

Topics in the performance of a specific genre or authors, or in specific performance technique, including voice, movement, and musical skills. Repeatable when topic changes.

Prereq: TA 251, 252, 271; one from TA 210, 211, 212.

TA 467. Lighting for the Stage. 4 Credits.

Designing lighting for the stage; technical and aesthetic problems.

TA 470. Majors Seminar. 4 Credits.

Capstone seminar for junior theater majors; readings and research in new theater trends, aesthetics, professional and higher academic opportunities.

TA 471. Studies in Theater and Culture: [Topic]. 4 Credits.

Dramatic literature and historical cultural concepts. Establishes a cultural context for periods of drama, using arts materials and socioeconomic factors to clarify aesthetic attitudes and practices of theater. Repeatable thrice when topic changes for maximum of 16 credits.

TA 472. Multicultural Theater: [Topic]. 4 Credits.

Origins and development of contributions in theater and drama by various cultures including Latino, Chicano, African American, Asian American, and Native American. Repeatable four times when topic changes for maximum of 20 credits.

TA 490. Theater Capstone: [Topic]. 4 Credits.

Required for the major and may be fulfilled by successful completion of any one of four topics: Play Direction, Playwriting, Dramaturgy, Devising. Prereq: TA 210, TA 211, TA 212, TA 250, TA 271, and one from the theatre history series: TA 367, TA 368, TA 369.

TA 503. Thesis. 1-16 Credits.

Repeatable.

TA 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

TA 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

TA 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

TA 511. Costume History I. 4 Credits.

History of Western clothing in cultural context. Egyptian to Renaissance.

TA 512. Costume History II. 4 Credits.

History of Western clothing in cultural context. Mid-Renaissance to romanticism.

TA 516. Costume Design. 4 Credits.

Beginning design concepts and various artistic media as applicable to costume design and rendering techniques.

TA 517. Advanced Costume Design. 4 Credits.

Analysis and interpretation of scripts for costume design. Continuation of development of rendering techniques.

Prereq: TA 416/516.

TA 518. Costume Pattern Drafting. 4 Credits.

Designing patterns through flat patterning and draping techniques. Practical experience in pattern development and execution.

TA 519. Costume Construction. 4 Credits.

Practical problems encountered in building and decorating costumes for the stage.

TA 541. Scene Design: Single Set. 4 Credits.

Elements of scene design; the scene designer's role. Creating a ground plan, measured perspective techniques, elevations, design styles. Design process and procedures related to the proscenium stage only.

TA 545. Advanced Projects in Theater Technology: [Topic]. 4 Credits.

Specialized areas of theater technology, one topic per term. Topics include scene painting, stage management, props, and computer drafting. Repeatable seven times when topic changes for maximum of 32 credits.

TA 552. Advanced Acting: [Topic]. 4 Credits.

Topics in the performance of a specific genre or authors, or in specific performance technique, including voice, movement, and musical skills. Repeatable when topic changes.

TA 567. Lighting for the Stage. 4 Credits.

Designing lighting for the stage; technical and aesthetic problems.

TA 571. Studies in Theater and Culture: [Topic]. 4 Credits.

Dramatic literature and historical cultural concepts. Establishes a cultural context for periods of drama, using arts materials and socioeconomic factors to clarify aesthetic attitudes and practices of theater. Repeatable thrice when topic changes for maximum of 16 credits.

TA 572. Multicultural Theater: [Topic]. 4 Credits.

Origins and development of contributions in theater and drama by various cultures including Latino, Chicano, African American, Asian American, and Native American. Repeatable four times when topic changes for maximum of 20 credits.

TA 601. Research: [Topic]. 1-16 Credits.

Repeatable.

TA 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

TA 603. Dissertation. 1-16 Credits.

Repeatable.

TA 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

TA 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

TA 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

TA 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

TA 609. Practicum: [Topic]. 1-3 Credits.

Rehearsal and Performance is a current topic. Repeatable five times for a maximum of 18 credits.

TA 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

TA 651. Theory of Dramatic Production. 4 Credits.

Theory of acting.

Women's, Gender, and Sexuality Studies

Priscilla Yamin, Department Head

541-346-5529
541-346-0652 fax
315 Hendricks Hall
1298 University of Oregon
Eugene, Oregon 97403-1298
wgs@uoregon.edu

The Department of Women's, Gender, and Sexuality Studies offers students an interdisciplinary curriculum that focuses on the diverse experiences of women in both national and international contexts. The department also examines the meaning of gender as a socially constructed category that shapes personal identities, beliefs, opportunities, and behaviors. The wide range of courses explores the intersections of gender, race, class, and sexuality; the institutional structures that have an impact on women's and men's lives; and the broad range of feminist theory that seeks to explain and influence women's status in society. Among the areas of emphasis in women's, gender, and sexuality studies are gender and sexuality, queer studies, third-world feminism, cultural representation and literature, women and labor, feminist theory, critical race feminism, immigration and citizenship, and social activism.

Core and affiliated faculty members in the department come from a wide range of disciplinary perspectives including history, literature, anthropology, sociology, geography, environmental studies, ethnic studies, philosophy, religious studies, architecture and fine arts, music,

Romance and Germanic languages, political science, public policy, and law.

Any student may take women's, gender, and sexuality studies courses. Some students take a few courses to complement the curriculum in another major. Others choose to fulfill the requirements for a major in women's, gender, and sexuality studies or a minor in women's, gender, and sexuality studies or in queer studies.

Most women's, gender, and sexuality studies courses satisfy group and multicultural requirements. For courses approved to fulfill these requirements, see the current list on the registrar's website (<http://registrar.uoregon.edu/current-students/group-satisfying-and-multicultural-courses>).

Faculty

Oluwakemi Balogun, assistant professor (globalization, nationalism, African studies). BA, 2003, Pomona College; PhD, 2012, California, Berkeley. (2013)

Jamie M. Bufalino, instructor (gender and sexuality in US history, history of feminism, US consumer culture). See **History**.

Isabel Millán, assistant professor (Latino and Chicano studies, transnational feminism, women and queer of color theory). BA, 2004, California, Santa Barbara; MA, 2007, San Francisco State; PhD, 2013, Michigan, Ann Arbor. (2018)

Judith Raiskin, associate professor (postcolonial literature, feminist theory, sexuality). BA, 1979, California, Berkeley; MA, 1981, Chicago; PhD, 1989, Stanford. (1995)

Carol Stabile, professor (gender, race, and class in the media). AB, 1983, Mount Holyoke College; MA, 1985, PhD, 1992, Brown. (2008)

Priscilla Yamin, associate professor (marriage and family politics; US political development and institutions; race, gender, and sexuality studies). See **Political Science**.

Emerita

Barbara Corrado Pope, professor emerita. BA, 1964, Hiram; MA, 1966, Iowa; PhD, 1981, Columbia. (1976)

Linda O. Fuller, professor emerita. BA, 1966, MA, 1977, PhD, 1985, California, Berkeley. (1989)

Elizabeth Reis, professor emerita. AB, 1980, Smith; MA, 1982, Brown; PhD, 1991, California, Berkeley. (2002)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Studies

Preparation

No specific high school preparation is necessary. Students who transfer to the university from other colleges may apply as many as 8 credits of women's, gender, and sexuality studies courses to the major or to the minors.

Careers

An understanding of gender and of women's experiences, abilities, and needs is an asset to careers in such fields as education, social service, government, business, law, medicine, the ministry, journalism, media, technology, counseling, and child care. In addition, a background in women's, gender, and sexuality studies can be used as a basis for entering a growing number of graduate programs that emphasize the study of women or gender.

Major Requirements

The Department of Women's, Gender, and Sexuality Studies offers an undergraduate major leading to a bachelor of arts (BA) or bachelor of science (BS) degree. Students may major in women's, gender, and sexuality studies alone or as one of two or more majors. Majors must construct their programs in consultation with women's, gender, and sexuality studies advisors.

Graded courses in the major must be completed with grades of C– or higher. No more than 8 credits taken pass/no pass in these courses may be counted toward the major.

At least 36 credits must be in upper-division courses; of those 36 credits, as many as 12 may be approved in other subject codes with advisor approval. At least 16 credits applied to the major must be taken at the University of Oregon. Women's, gender, and sexuality studies (WGS) majors must attain a grade point average of 2.50 or higher in courses applied to the major. No more than 8 credits from another major or minor may count toward the major.

Bachelor of Arts Degree Requirements

Code	Title	Credits
WGS 101	Introduction to Women's and Gender Studies	4
Select two of the following:		8
WGS 201	Introduction to Queer Studies	
WGS 221	Bodies and Power	
WGS 250	Gender, Literature, and Culture	
WGS 251	Transnational and Indigenous Feminisms	
Select eight of the following: ¹		32
WGS 303	Women and Gender in American History	
WGS 315	History and Development of Feminist Theory	
WGS 321	Feminist Perspectives: Identity, Race, Culture	
WGS 322	Queer Theory	
WGS 331	Science, Technology, and Gender

Senior Honors Thesis

Students interested in producing a substantial piece of original research and writing may elect to write a senior thesis in women's, gender, and sexuality studies.

To be eligible to write an honors thesis, students should have a cumulative GPA of 3.50 in WGS courses. Students who satisfy the major requirements, maintain throughout their undergraduate studies at Oregon a GPA of 3.50 or above in the major, and submit a copy of the honors thesis approved by their committee to the department receive

a baccalaureate degree with honors in women’s, gender, and sexuality studies.

Thesis Criteria

A thesis must be based on a student’s original research. Depending on the discipline, it can be a written paper that presents the results of the research. Theses average between 30 and 50 pages, including notes and bibliographies.

Only theses that meet the following criteria will be approved and awarded honors:

- Identifies a clear and original topic or research question
- Demonstrates knowledge of the literature concerning that topic or research question in the field of gender studies by reviewing that body of literature and providing a substantive bibliography
- Provides an analysis of the topic or research question, using clearly identified methodology
- It uses the citational style appropriate to its disciplinary focus
- The thesis is mindful of the relationships among gender, race, class, ability, and national identity as these pertain to the object of study

Students producing a senior thesis should expect to do the following work over the course of a full year prior to their graduation. In the spring and summer before the thesis writing begins, students need to identify a primary advisor (first reader) and a second reader, both of whom are either a faculty member in the department or an affiliated faculty member (see faculty list). If an affiliated faculty member is the first reader, then the instructor of Reading and Conference: [Topic] (WGS 405) will be the second reader.

In fall, students should register for Reading and Conference: [Topic] (WGS 405) (1–4 variable credits) with their thesis advisor and submit a timeline for completion of the thesis to the thesis advisor.

By the end of the fall term, students should complete a draft of a research proposal that is five to eight pages in length and includes a literature review, a short section on the methods that will be used, research questions or a thesis statement (depending on the discipline), and a bibliography.

Research proposals must be approved by the thesis advisor and a copy must be submitted to the department. If an affiliate faculty member is the thesis advisor, the proposal must be approved by the student’s primary advisor in the department as well.

In winter, students should register for Thesis (WGS 403). Using the timeline submitted in the fall, students spend winter term conducting research and writing the thesis in consultation with their advisor. By the end of winter term, research should be complete and thesis writing should be significantly underway.

In spring, students write, revise, and produce a final draft of the thesis following the timeline submitted in the fall. By no later than the end of the fifth week of the term, students must submit their final thesis to their departmental advisor, their affiliate advisor, or both. Upon approval, students must submit a copy of their final thesis to the department head.

The student’s performance on the thesis and on courses taken during the senior year will be reviewed before the honors distinction is granted. Obtain complete instructions and required forms from the department office.

Minor Requirements

Graded courses in the minors must be completed with grades of C– or higher. No more than 8 credits taken pass/no pass in these courses may be counted toward the minors.

A minimum of 16 credits applied to the minors must be taken at the University of Oregon. No more than 8 credits from other majors or minors may count toward the minors for women’s, gender, and sexuality studies and queer studies.

Women’s, Gender, and Sexuality Studies Minor Requirements

Code	Title	Credits
WGS 101	Introduction to Women's and Gender Studies	4
Select one of the following:		4
WGS 201	Introduction to Queer Studies	
WGS 221	Bodies and Power	
WGS 250	Gender, Literature, and Culture	
WGS 251	Transnational and Indigenous Feminisms	
Select three of the following: ¹		12
WGS 303	Women and Gender in American History	
WGS 315	History and Development of Feminist Theory	
WGS 321	Feminist Perspectives: Identity, Race, Culture	
WGS 322	Queer Theory	
WGS 331	Science, Technology, and Gender	
WGS 341	Women, Work, and Class	
WGS 350	Literature as Feminist Theory	
WGS 351	Decolonial Feminisms	
WGS 361	Gender, Film, and the Media	
WGS 407	Seminar: [Topic]	
WGS 409	Practicum: [Topic]	
WGS 411	Feminist Praxis ²	
WGS 421	Bodies and Embodiment	
WGS 422	Sexuality Studies: [Topic]	
WGS 432	Gender, Environment, and Development	
WGS 450	Literature and Feminist World-Making	
WGS 451	Global Perspectives on Gender [Topic]	
Choose one 300- or 400-level WGS elective or an advisor-approved course with another subject code		4
Total Credits		24

Queer Studies Minor Requirements

Code	Title	Credits
WGS 201	Introduction to Queer Studies	4
Select one of the following:		4
WGS 221	Bodies and Power	
WGS 250	Gender, Literature, and Culture	
WGS 251	Transnational and Indigenous Feminisms	
Select one of the following:		4
WGS 322	Queer Theory	

WGS 422	Sexuality Studies: [Topic] (repeatable when topic changes)	
Select one queer studies course (with the QST subject code) at any level—100. 200. 300. or 400		4
Select two 300- or 400-level queer studies courses (with the QST subject code)		8
Total Credits		24

Students wishing to minor in queer studies should consult frequently with a women's, gender, and sexuality studies advisor to determine which courses offered during any given academic year will count toward the fulfillment of credits.

Students must apply for the queer studies minor in the women's, gender, and sexuality studies office well in advance of graduation for transcript evaluation. In order to be eligible for the minor, students must complete all degree requirements and a major in women's, gender, and sexuality studies or another academic department.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

The degree plan shows courses that are solely within the department (subject code WGS) and suggestions for arranging general-education courses, language courses, and mathematics courses. The plans below do not necessarily include sufficient courses to meet the 180-credit minimum to graduate.

It is suggested that students look for courses that meet the multicultural requirements when taking general-education requirements.

Graduate Studies

The graduate certificate in women's, gender, and sexuality studies requires 24 credits in courses approved by the women's, gender, and sexuality studies graduate advisor. At least 12 of these credits must be in core courses in the Department of Women's, Gender, and Sexuality Studies. At least 8 of these credits must be in approved graduate courses offered in other departments.

Graduate Certificate Requirements

Code	Title	Credits
Core Courses		
Select WGS courses totaling 12 credits from the following:		12
WGS 507	Seminar: [Topic]	
WGS 511	Feminist Praxis	
WGS 522	Sexuality Studies: [Topic]	
WGS 532	Gender, Environment, and Development	
WGS 551	Global Perspectives on Gender [Topic]	
WGS 605	Reading and Conference: [Topic] ¹	
WGS 607	Seminar: [Topic]	
WGS 609	Practicum: [Topic] ¹	
WGS 615	Contemporary Feminist Theory	
Other Courses		
Approved graduate courses in other departments		8
WGS or other department graduate course		4
Total Credits		24

¹ Indicates a variable-credit course. The student must declare the credit value upon registering online—e.g., Practicum: [Topic] (WGS 609).

Additional Requirements

No more than 4 credits in Reading and Conference: [Topic] (WGS 605) and Practicum: [Topic] (WGS 609) can be applied to the certificate.

No more than 8 credits may be taken pass/no pass without specific approval.

Applicants should arrange an appointment with the graduate advisor.

Courses

WGS 101. Introduction to Women's and Gender Studies. 4 Credits.

Interdisciplinary examination of the diverse experiences, status, and contributions of women in the United States. Topics include social construction of gender, race, sexualities, work, class, violence, and health.

WGS 198. Colloquium: [Topic]. 1,2 Credit.

Repeatable.

WGS 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

WGS 201. Introduction to Queer Studies. 4 Credits.

Introduction to the study of sexuality and society from a queer studies interdisciplinary perspective.

WGS 221. Bodies and Power. 4 Credits.

Focuses on gender, the body, and dis/ability as a particular nexus of experience and social meaning, influenced as well by race, sexuality, age and class. This course considers bodies and how we understand them within contexts shaped by social relations and systems of power.

WGS 250. Gender, Literature, and Culture. 4 Credits.

Examines literary and other cultural representations of gendered experiences using novels, short stories, poetry, plays, and visual cultural production.

WGS 251. Transnational and Indigenous Feminisms. 4 Credits.

Introductory survey of transnational and Indigenous feminist scholarship, two intersecting strains of feminism that address the workings of culture, nationalism, and gender in multiple contexts. Explores cross-section of key issues and perspectives using interdisciplinary lenses and methodologies employed by scholars in transnational and Indigenous studies.

WGS 261. Gender and Popular Culture. 4 Credits.

Drawing on contemporary popular culture texts, including films, music, and TV shows, introduces students to feminist perspectives on pop culture representations, production, and reception. Engages with pop culture as a meaningful site for the construction of gender in intersection with sexuality, race, nation, and bodies.

WGS 303. Women and Gender in American History. 4 Credits.

Focuses on women and gender in America, highlighting how diverse women have experienced gender roles and sexism since the 17th century.

WGS 315. History and Development of Feminist Theory. 4 Credits.

Feminist theory from the Enlightenment through the Second Wave, with special emphasis on the diverse theories of the 1960s to the present. Prereq: WGS 101.

WGS 321. Feminist Perspectives: Identity, Race, Culture. 4 Credits.

Examines intersections of race and ethnicity, class, sexuality, and gender in the history and lives of United States women of color. Explores definitions of community, culture, and identity. Prereq: one course WGS or ES 101.

WGS 322. Queer Theory. 4 Credits.

Surveys key terms and texts of the interdisciplinary fields that constitute queer theory; recent debates in scholarship and popular culture on gender, sexuality, race, disability, and other identities.

WGS 331. Science, Technology, and Gender. 4 Credits.

Topics include the role of gender in the practice of science and the impact of sexism and racism on the development of science and technology.

Prereq: WGS 101 or equivalent.

WGS 341. Women, Work, and Class. 4 Credits.

Explores contexts and cultural attitudes shaping the women's market and domestic labor including race, sexuality, age, and class as well as occupational segregation and control.

WGS 350. Literature as Feminist Theory. 4 Credits.

Analyzes literary and media texts while considering questions and intersections of race, gender, sexuality, ability, class, nation, culture, and power central to the field of women and gender studies, and demonstrates how these intersections within literary texts are sites of knowledge production in feminist theory.

Prereq: one 200 level WGS course.

WGS 351. Decolonial Feminisms. 4 Credits.

Exploration of feminist activism and women's movements globally, organizing to challenge the state, civil society, international agencies, and corporations for a more just world.

Prereq: one 200-level WGS course.

WGS 361. Gender, Film, and the Media. 4 Credits.

Students read, view, examine, discuss, and write about film and media in terms of gender and feminist and queer theory. Offered alternate years.

WGS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

WGS 401. Research: [Topic]. 1-16 Credits.

Repeatable.

WGS 403. Thesis. 1-12 Credits.

Repeatable with program director's and thesis adviser's consent for maximum of 12 credits.

WGS 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

WGS 406. Field Studies: [Topic]. 1-12 Credits.

Repeatable for maximum of 12 credits.

WGS 407. Seminar: [Topic]. 1-5 Credits.

A current topic is Feminist Research Issues. Repeatable when topic changes.

WGS 408. Workshop: [Topic]. 1-16 Credits.

Repeatable.

WGS 409. Practicum: [Topic]. 1-5 Credits.

Repeatable.

WGS 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

WGS 411. Feminist Praxis. 4 Credits.

Combined internship and seminar explores the history and politics of community agencies and the relationship of feminist theory to practice.

Prereq: one course WGS or equivalent.

WGS 421. Bodies and Embodiment. 4 Credits.

Focuses on the complex relationships between gender, bodies, and society from theoretical and empirical perspectives. Theories examine the body through an intersectional lens to understand social construction, cultural symbolism, and political struggles, especially within institutional contexts like the media, medicine, and the market.

Prereq: one 300-level WGS course.

WGS 422. Sexuality Studies: [Topic]. 4 Credits.

Various topics in sexuality studies, including the relationship between gender and sexuality and between queer studies and women's and gender studies. Repeatable twice when topic changes for maximum of 12 credits.

Prereq: WGS 101 or 201.

WGS 432. Gender, Environment, and Development. 4 Credits.

Surveys gender and political, economic, and cultural strategies for development and environmental change around the world.

Pre- or coreq: WGS 101.

WGS 450. Literature and Feminist World-Making. 4 Credits.

Examines feminist world-making in literary texts as a form of political theory, a strategy for thinking critically about the present, imagining the world under different circumstances, and building an alternative world from a feminist perspective.

Prereq: one 300-level WGS course.

WGS 451. Global Perspectives on Gender [Topic]. 4 Credits.

Designed to deepen understanding of diverse global issues and perspectives related to women's and gender studies. Repeatable twice when topic changes for a maximum of 12 credits.

WGS 507. Seminar: [Topic]. 1-5 Credits.

A current topic is Feminist Research Issues. Repeatable when topic changes.

WGS 508. Workshop: [Topic]. 1-16 Credits.

Repeatable.

WGS 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

WGS 511. Feminist Praxis. 4 Credits.

Combined internship and seminar explores the history and politics of community agencies and the relationship of feminist theory to practice.

Prereq: one course WGS or equivalent.

WGS 521. Bodies and Embodiment. 4 Credits.

Focuses on the complex relationships between gender, bodies, and society from theoretical and empirical perspectives. Theories examine the body through an intersectional lens to understand social construction, cultural symbolism, and political struggles, especially within institutional contexts like the media, medicine, and the market.

WGS 522. Sexuality Studies: [Topic]. 4 Credits.

Various topics in sexuality studies, including the relationship between gender and sexuality and between queer studies and women's and gender studies. Repeatable twice when topic changes for maximum of 12 credits.

WGS 532. Gender, Environment, and Development. 4 Credits.

Surveys gender and political, economic, and cultural strategies for development and environmental change around the world.

WGS 550. Literature and Feminist World-Making. 4 Credits.

Examines feminist world-making in literary texts as a form of political theory, a strategy for thinking critically about the present, imagining the world under different circumstances, and building an alternative world from a feminist perspective.

WGS 551. Global Perspectives on Gender [Topic]. 4 Credits.

Designed to deepen understanding of diverse global issues and perspectives related to women's and gender studies. Repeatable twice when topic changes for a maximum of 12 credits.

WGS 601. Research: [Topic]. 1-16 Credits.

Repeatable.

WGS 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

WGS 605. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

WGS 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

WGS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

WGS 609. Practicum: [Topic]. 1-5 Credits.

Repeatable.

WGS 610. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

WGS 615. Contemporary Feminist Theory. 5 Credits.

This interdisciplinary graduate seminar covers foundational texts as well as critical cutting-edge developments in feminist theory. The course centers intersectional, transnational, and de-colonial theoretical frameworks.

Robert Donald Clark Honors College

Gabe Paquette, Dean

541-346-5414
541-346-0125 fax
Chapman Hall
1293 University of Oregon
Eugene, Oregon 97403-1293
honors@uoregon.edu

The Robert Donald Clark Honors College at the University of Oregon is a competitively enrolled, small liberal arts college of approximately 800 students. Its classes—limited to 19 students—and four-year curriculum feature close interaction between students and faculty members. The Clark Honors College emphasizes creativity, interdisciplinary scholarship, and independent research.

The college's curriculum—lower-division courses, upper-division colloquia, and thesis courses—integrate the humanities, social sciences, and sciences and feature the study of cultures and issues from around the globe. Honors college courses are taught by its core faculty members as well as by specially selected affiliated faculty members from other campus schools and programs. The college's curriculum replaces the general-education requirements mandated for all university students.

Each honors college student selects a major from the academic departments or professional schools of the university. Twenty-one percent of honors students have more than one major. Every school and department at the university, from architecture and music to biology and business, enrolls Clark Honors College students pursuing majors in those fields. Because the Clark Honors College curriculum is an honors track specifically for general-education requirements, many students choose to pursue honors within their major departments as well. These “disciplinary honors” complement the general-education honors offered through the Clark Honors College.

The student's undergraduate education at the honors college culminates in the thesis, a required advanced research project completed in his or her major field, designed to help students achieve future success in graduate school, postgraduation careers, and civic commitments. The thesis embodies the defining characteristics of a Clark Honors College education:

- intellectual discipline
- independent research
- capacity to design and execute a complex project
- ability to focus and pursue a subject in depth
- skills of analysis, synthesis, and clear writing

The thesis is the culmination of work in a major—a natural outgrowth from and expression of the ideas, problems, and approaches taught in that discipline. It creatively applies the methods of the discipline and tests their power and limits. It reflects discussion, common work, and apprenticeship with faculty members in their specialized fields of interest.

Honors college students pay honors college tuition, established yearly by the University of Oregon Board of Trustees. Complete tuition information is available on the honors college website. The honors college awards need-based tuition-remission scholarships based on the expected family

contribution listed on a student's Free Application for Federal Student Aid (FAFSA).

Honors college students pay honors college tuition, known as differential tuition, established yearly by the University of Oregon Board of Trustees. Complete tuition information is available on the honors college website. The honors college awards need-based tuition-remission scholarships based on the expected family contribution listed on a student's Free Application for Federal Student Aid (FAFSA). Scholarships covering the cost of differential tuition are offered through the Office of Admissions and the Office of Student Financial Aid and Scholarships based on demonstrated financial need as determined by the FAFSA.

Facilities

The honors college is located in historic Chapman Hall on the west side of the University of Oregon campus, close to Knight Library. Chapman Hall reopened in 2018 following a complete interior renovation. The building provides classrooms, student common areas, and a library.

The honors college academic residential communities (ARC) are located on the east side of campus in the Global Scholars Hall and the adjacent, recently renovated Bean Hall. The ARC offer academic and social programming and access to campus resources that support undergraduate research. Each residential hall is led by a residence assistant who is also a Clark Honors College student.

Programs

Inside-Out Prison Exchange Program

Each term, Clark Honors College offers, exclusively for its students, one or two course sections of the Inside-Out Prison Exchange Program, bringing together honors students and incarcerated men and women to study as peers in a seminar behind prison walls. The course meets once a week in Salem, Oregon (the state capitol), at a major correctional institution. Each class includes as many as 13 “outside” (Clark Honors College) students and the same number of “inside” (incarcerated) students.

Oregon Health and Science University Internships

Each year Oregon Health and Science University (OHSU), a leading, nationally ranked medical teaching school, hosts an internship program in its Department of Cell, Developmental, and Cancer Biology. A partnership between the Clark Honors College and OHSU reserves two intern spots exclusively for CHC students. This partnership provides an invaluable firsthand learning experience for undergraduate students considering a medical career.

Speech, Debate, and Mock Trial

In 2016, the Mock Trial team placed 19th in the country among 48 invited teams at the American Mock Trial Association's National Championship Tournament. The speech and debate team regularly competes at the highest collegiate levels nationally, and in 2016 placed first in national competition after 17 consecutive undefeated rounds. These programs provide students with the opportunity to translate what they learn in the classroom into a different context and force students to carefully and deeply consider different points of view on often sensitive social and political topics.

3 + 3 Program

The 3 + 3 Program enables highly talented and motivated honors college students interested in a legal career to complete both a bachelor's degree and a doctor of jurisprudence at the University of Oregon in six years rather than the usual seven. All honors college students who meet the minimum requirements are guaranteed admission to the UO School of Law. Advantages of the program include

- saving a year's tuition and living expenses associated with undergraduate education
- getting an early start on establishing a professional career
- avoiding the time, effort, and expense of applying to multiple law schools

Entering the Clark Honors College

Clark Honors College seeks high-achieving, academically motivated students who will bring their own unique and diverse contributions to the student body. The admissions committee looks for evidence of academic scholarship, motivation, and creative critical thinking.

Application Procedure

General university application procedures, prerequisites, and requirements apply. Applicants to Clark Honors College may complete the UO's online application to apply to both the honors college and the University of Oregon at the same time. Students applying via the Common Application may also apply to the honors college by completing the "Honors College" section of the University of Oregon application within the Common Application.

Students with an excellent academic record who have attended another higher-education institution, or who are enrolled in the university but not in the honors college, may apply for admission by submitting a Clark Honors College supplemental PDF application by January 15 for fall term admission. Students interested in winter term admission should contact the Clark Honors College Office of Admissions directly. Winter term admission is on a space-available basis. Spring term admission is not available.

International students who wish to apply must complete an International Undergraduate Application for Admission and a Clark Honors College supplemental PDF application by January 15 for fall term admission.

A complete Clark Honors College online **or** supplemental PDF application must include an essay and a description of accomplishments. Required supporting documents include recommendations from two teachers, official high school transcripts, official college transcripts (if applicable), and official test scores. *Transcripts and test scores will be shared between UO and honors college admissions offices. Do not submit them twice.*

The Clark Honors College online application, available August through January 15 for the following academic year, is part of the University of Oregon online application. The Clark Honors College supplemental PDF application and Clark Honors College Teacher Evaluation form are available from the websites for the honors college and the UO Office of Admissions.

The Clark Honors College online application, available August through January 15 for the following academic year, is part of the University of Oregon online application and the Common Application. The Clark Honors College supplemental PDF application and Clark Honors

College teacher recommendation forms are available from the websites for the honors college and the UO Office of Admissions. Teacher recommendation forms are also accessible through the Common Application.

Application Deadlines

Early notification deadline: November 1
Supporting documents due by November 7
Regular notification deadline: January 15
Supporting documents due by February 1

Deadlines to apply are the same for all applicants including domestic and international freshmen and transfer students.

Faculty

Monique Balbuena, associate professor (comparative literature, Jewish studies, Sephardic languages). BA, 1988, MA, 1994, Federal University of Rio de Janeiro; PhD, 2003, California, Berkeley. (2004)

Dare A. Baldwin, professor (cognitive science). See **Psychology**.

Mark Carey, professor (glaciers, climate change, natural disasters). BA, 1991, State University of New York, Potsdam; MA, 1998, Montana; PhD, 2005, California, Davis. (2010)

Mai-Lin Cheng, associate professor (literature of the British Romantic period, travel writing, gender and genre). BA, 1993, Brown; PhD, 2006, California, Berkeley. (2008)

Nicole M. Dudukovic, senior instructor (psychology). See **Psychology**.

David A. Frank, professor (argumentation, international ethics, rhetorical theory and history). BA, 1978, MA, 1979, Western Washington; PhD, 1982, Oregon. (1979)

Daphne Gallagher, senior lecturer (anthropology); associate dean, undergraduate studies. See **Anthropology**.

Melissa Graboyes, associate professor (colonial and postcolonial African history, medical history, history of science). BA, 2002, California, Davis; MA, MPH, 2007, PhD, 2010, Boston. (2016)

Samantha Hopkins, associate professor (vertebrate paleontology, environmental change, mammalian ecology and evolution); associate dean, faculty. BS, 1999, Tennessee, Knoxville; PhD, 2005, California, Berkeley. (2007)

Trond Jacobsen, instructor (speech and debate, political communication, legal proceedings); director, forensics and university forum. BA, 2002, Oregon; PhD, 2014, Michigan, Ann Arbor. (2013)

Brian McWhorter, associate professor (music). See **Music**.

Barbara Mossberg, professor of practice (poetry, leadership, drama.). BA, 1970, California, Los Angeles; MA, 1972, PhD, 1977, Indiana, Bloomington. (2013)

Gabe Paquette, professor (history). See **History**.

Carol Paty, associate professor.

Roxann Prazniak, professor (history of China and Eurasia, modernity, transcultural studies). BA, 1970, California, Berkeley; MA, 1973, San Francisco State; PhD, 1981, California, Davis. (2002)

Elizabeth Raisanen, instructor (women writers of the British Romantic Period, romantic drama, digital humanities); director, undergraduate advising. BA, 2003, Northern Michigan; MA, 2005, Colorado, Boulder; PhD, 2013, California, Los Angeles. (2015)

Daniel Rosenberg, professor (modern European intellectual and cultural history, the Enlightenment, history of information). BA, 1988, Wesleyan; MA, 1991, PhD, 1996, California, Berkeley. (2000)

Casey Shoop, postdoctoral instructional scholar (19th- and 20th-century American literature, critical theory, urban theory). BA, 1999, California, Berkeley; MA, 2001, PhD, 2008, Columbia. (2013)

Christopher D. Sinclair, associate professor (mathematics). See **Mathematics**.

Helen Southworth, professor (modernism, Virginia Woolf, digital humanities). BA, 1989, London; MA, 1991, PhD, 1999, Southern California. (2002)

Carol Stabile, professor (women's, gender, and sexuality studies). See **Women's, Gender and Sexuality Studies**.

Charlotte R. Vaughn, instructor (linguistics). See **Linguistics**.

Tim Williams, assistant professor (intellectual and cultural history, 19th-century United States, gender and sexuality). BA, 2003, Wake Forest; MA, 2005, PhD, 2010, North Carolina, Chapel Hill. (2014)

Emeriti

Henry M. Alley, professor emeritus. BA, 1967, Stanford; MFA, 1969, PhD, 1971, Cornell. (1982)

Louise M. Bishop, associate professor emerita. BA, 1978, Fairleigh Dickinson; MA, 1980, PhD, 1984, Fordham. (1987)

Joseph G. Fracchia, professor emeritus. BA, 1972, California, Davis; MA, 1975, California, Santa Barbara; PhD, 1985, California, Davis. (1986)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Academic Requirements

Requirements in the honors college satisfy the general-education requirements that other University of Oregon students meet for graduation. Honors college faculty members advise honors college students concerning these requirements and mentor them concerning their academic choices. Students retain full responsibility for understanding and shaping their study programs.

Depending on test scores, students may use advanced placement or international baccalaureate credits toward honors college mathematics and science requirements, second-language requirements, applicable major requirements, multicultural requirements, or university electives. To earn a BS degree, students must complete one year of college-level mathematics, or the equivalent. Advanced placement and transfer credits may help fulfill either such a math requirement or the language requirement.

University and Major Requirements

Honors college requirements, which replace university general-education requirements, represent roughly one-third of a student's total four-year schedule. Before graduating, Clark Honors College students must also

meet the requirements, listed elsewhere in this catalog, of their major department or professional school. They must maintain a 3.00 or better cumulative grade point average (GPA).

Honors College Degree Requirements

Code	Title	Credits
Lower-Division Requirements		
Honors College Requirement		
HC 199H	Special Studies: [Topic] (Clark Honors Introductory Program) ¹	1
Social Science and Arts and Letters Requirements		
HC 221H	Honors College Arts and Letters (Ancient World)	4
HC 222H	Honors College Arts and Letters (Modern World)	4
HC 223H	Honors College Arts and Letters (Research)	4
or HC 233H	Honors College Social Science	
HC 231H	Honors College Social Science (Ancient World)	4
HC 232H	Honors College Social Science (Modern World)	4
Mathematics and Science Requirements ²		
HC 207H	Honors College Science ³	
or HC 209H	Honors College Science	
One course in quantitative reasoning or mathematics ⁴		4
Two additional approved mathematics or science courses ⁴		8
Second-Language Requirements ⁵		
Demonstrate second-language proficiency equivalent to completion of second college year in second language; satisfy all requirements in university department, program, or school that offers a major leading to a BA or BS		
Upper-Division Requirements		
Multicultural Requirements		
Two courses chosen from two different categories, listed below: ⁶		
American cultures (HC 444H)		
Identity, pluralism, and tolerance (HC 424H)		
International cultures (HC 434H)		
Colloquia Requirements ⁷		
HC 421H	Honors College Arts and Letters Colloquium: [Topic]	4
HC 431H	Honors College Social Science Colloquium: [Topic]	4
HC 441H	Honors College Science Colloquium: [Topic]	4
Any two additional colloquia		8
Thesis Requirements		
HC 408H	Workshop: [Topic] (Thesis Orientation) ⁸	1
HC 477H	Thesis Prospectus ⁹	2
Successful completion and defense of a thesis		

- 1 Clark Honors Introductory Program (CHIP) is the course topic, offered only in the fall and required of incoming freshmen; transfer students may also choose to take the CHIP course. More information on the program may be found at honors.uoregon.edu.
- 2 Web-based courses do not fulfill this requirement.
- 3 Honors College Science (HC 207H) for laboratory science, Honors College Science (HC 209H) for nonlaboratory science. Exempt majors and minors are listed on the honors college website.
- 4 Approved courses listed on the honors college website.
- 5 The second-language requirement is waived if a department, program, or school requires 90 or more credits of course work for a major leading to a BS degree (see Majors, Degrees, and Contexts Waiving Second-Language Requirements list). No case exists in which Clark Honors College language requirements replace departmental language requirements.
- 6 Designated honors college colloquia carry a supplemental course number if they satisfy one of the below categories—Honors College Identities Colloquium: [Topic] (HC 424H), Honors College International Cultures Colloquium: [Topic] (HC 434H), Honors College American Cultures Colloquium: [Topic] (HC 444H)—or any approved (p. 46) UO courses may be used to satisfy the multicultural requirement.
- 7 Recent topics include Madness in Society; The Literature of War; Cosmology; Latin American History; Language, Sustainable Communities, and Global Warming; the Physics and Politics of Global Energy Generation, and John Muir’s Backpack.
- 8 Course taken toward the end of their sophomore year or at the beginning of their junior year for an introduction to the thesis project. Recommended but not required.
- 9 Course taken at least two terms before intended graduation to formalize the thesis project.

Majors, Degrees, and Contexts Waiving Second-Language Requirement

- Accounting
- Biology
- Business administration
- Biochemistry
- Chemistry
- Computer and information science
- Earth sciences
- Environmental science
- Environmental studies
- Human physiology
- Marine biology
- Music, only in cases in which the second language is not a requirement for the student’s chosen degree
- Physics
- Product design
- Bachelor of architecture
- Bachelor of interior architecture
- Bachelor of landscape architecture
- Students pursuing a bachelor of fine arts degrees who choose to satisfy the BS mathematics or computer and information sciences proficiency requirement

Writing

The honors college is committed to excellence in writing. The core curriculum integrates instruction and practice in fundamental rhetorical skills—writing, reading, speaking, and listening—with the subject matter of the courses. Students who complete the honors college 200-level arts and letters and social science curricula with a grade point average of 3.00 or better in all five courses satisfy the university’s writing requirement if they withdraw from the honors college.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

The Robert D. Clark Honors College is not a major. Students who follow the honors college curriculum fulfill all of the University of Oregon general-education requirements. Honors college requirements must be taken for a letter grade, unless pass/no pass is the only option. In addition, only courses passed with grades of C– or better will fulfill honors college requirements.

Bachelor of Arts

Course	Title	Credits	Milestones
First Year			
Fall			
HC 221H or HC 231H	Honors College Arts and Letters or Honors College Social Science	4	Either HC 221H (Arts and Letters: Ancient World) or HC 231H (Social Science: Ancient World) may be taken during fall term of the first year.

First term of first-year second-language sequence

The honors college second-language requirement differs from the university's language requirement. In the honors college, the second language is waived only if the student's major requires 90 or more credits of course work leading to a BS. For further details, visit <https://honors.uor.edu/second-language-course-requirement>. The honors college second-language requirement may be fulfilled in full or in part by Advanced Placement International Baccalaureate College-Level Examinations, Program, or transfer scores or course work. Students may also

Courses

HC 199H. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

HC 207H. Honors College Science. 4 Credits.

The scientific process as a mode of inquiry to gain insight into fundamental questions in the natural sciences. Includes discussions, lectures, demonstrations, laboratories, field trips.

HC 209H. Honors College Science. 4 Credits.

How science may be applied and misapplied in answering questions about nature and society. Includes discussions, demonstrations, laboratories, field trips. Primarily for nonscience students.

HC 221H. Honors College Arts and Letters. 4 Credits.

Literary history and modes of literary analysis and interpretation: premodern literature.

HC 222H. Honors College Arts and Letters. 4 Credits.

Literary history and modes of literary analysis and interpretation: modern literature.

HC 223H. Honors College Arts and Letters. 4 Credits.

Research in literature.

HC 231H. Honors College Social Science. 4 Credits.

Introduction to methods of historical inquiry and to major historical trends in a global framework; focuses on premodern history.

HC 232H. Honors College Social Science. 4 Credits.

Introduction to methods of historical inquiry and to major historical trends in a global framework; focuses on modern history.

HC 233H. Honors College Social Science. 4 Credits.

Research in history.

HC 399H. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

HC 401H. Research: [Topic]. 1-21 Credits.

Repeatable.

HC 403H. Thesis. 1-21 Credits.

Repeatable.

HC 404H. Internship: [Topic]. 1-16 Credits.

Repeatable.

HC 405H. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

HC 406H. Special Problems: [Topic]. 1-21 Credits.

Repeatable.

HC 407H. Seminar: [Topic]. 1-5 Credits.

Repeatable. The 2-credit thesis seminar supports early work on the honors thesis.

HC 408H. Workshop: [Topic]. 1-12 Credits.

Topics include Thesis Orientation. Repeatable.

HC 409H. Practicum: [Topic]. 1-21 Credits.

Repeatable.

HC 410H. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

HC 421H. Honors College Arts and Letters Colloquium: [Topic]. 4 Credits.

Repeatable. Offered in a range of topics with an emphasis on arts and letters. Repeatable thrice when topic changes for a maximum of 16 credits.

HC 424H. Honors College Identities Colloquium: [Topic]. 4 Credits.

Topics focus on construction of collective identities (classes, genders, religions, sexual orientations), the emergence of representative voices, and the effects of prejudice, intolerance, and discrimination. Repeatable thrice for a maximum of 16 credits when topic changes.

HC 431H. Honors College Social Science Colloquium: [Topic]. 4 Credits.

Offered in a range of topics with an emphasis on social science. Repeatable thrice when topic changes for a maximum of 16 credits.

HC 434H. Honors College International Cultures Colloquium: [Topic]. 4 Credits.

Topics focus on race, ethnicity, pluralism-monoculturalism, or prejudice-tolerance of international cultures, or may describe and analyze a worldview substantially different from current U.S. views. Repeatable thrice for a maximum of 16 credits when topic changes.

HC 441H. Honors College Science Colloquium: [Topic]. 4 Credits.

Offered in a range of topics with an emphasis on science. Repeatable thrice when topic changes for a maximum of 16 credits.

HC 444H. Honors College American Cultures Colloquium: [Topic]. 4 Credits.

Topics focus on multiple American racial and ethnic groups—African American, Chicano or Latino, Native American, Asian American, European American—from historical and comparative perspectives. Repeatable thrice for a maximum of 16 credits when subject changes.

HC 477H. Thesis Prospectus. 2 Credits.

Students create prospectus, exchange critiques and ideas, and present research in mock defenses with thesis advisor present.

Charles H. Lundquist College of Business

Sarah Nutter, Edward Maletis Dean in the Lundquist College of Business

541-346-3300
350 Lillis Hall

The business college was established in 1914 as the School of Commerce. The name was changed to the School of Business Administration in 1921, then to the College of Business Administration in 1967. It was renamed the Charles H. Lundquist College of Business in 1994. Its academic programs are accredited by the Association to Advance Collegiate Schools of Business International—the undergraduate program since 1923, the graduate since 1962. The accounting programs have been separately accredited since 1989.

The college offers programs of study leading to bachelor's degrees in accounting and business administration (with concentrations in finance, marketing, management, operations and business analytics, or sports business). It also offers a master of business administration (MBA) and master's and doctoral degrees in accounting, finance, management, marketing, operations and business analytics, and sports product management.

At the undergraduate level, the college operates an honors program for high-achieving students. Minors are available in business administration, entrepreneurship, and sports business, offering majors the opportunity to enhance their degrees with the knowledge and organizational skills necessary for effective leadership in future professions. Students from all majors may also elect to earn a certificate in global business in preparation for an international career.

Research

Faculty members in the Lundquist College of Business carry on active programs of research, and are the recipients of numerous research awards. Their works are published in the leading academic journals of their disciplines, and many serve as editors or on the editorial boards of premier accounting, finance, management, marketing, and operations management journals. At the forefront of their fields, they bring new ideas to the classroom, keeping their students ahead of the curve through ongoing research on evolving national and international business practices and economic drivers.

Facilities

Designed to complement the college's team-based approach to learning, the Lillis Business Complex (<https://business.uoregon.edu/lillis-complex>) enhances and enriches the business curriculum. Certified by the US Green Building Council at the silver level with their Leadership in Energy and Environmental Design sustainability rating, the building features one of the largest solar installations in the Pacific Northwest and one of the pioneering uses of photovoltaic solar glass in the world.

The college also maintains a Portland location at 109 NW Naito Parkway, which houses its sports product management master's degree and executive MBA programs, offering to students connections to the city's business community. The Portland facility also houses a product-making innovation lab, providing students with access to specialized equipment

to design, build, and test prototypes of sports and outdoor apparel, footwear, and products.

International Experiences

Students are strongly encouraged to obtain international experience as part of their business education. The college and the university have partnerships with campuses worldwide to provide extensive opportunities for undergraduate and graduate students to study, intern, and research abroad. Faculty-led study tours are also a popular option for students to obtain an introduction to another culture while making progress toward their degree. Business students may opt to study language, culture, business, or a combination of them depending on the specific program selected. Students are advised to meet with an advisor prior to participating in an international program to fully understand how such as experience might apply toward degree requirements. Undergraduates who study or intern in an approved program are exempt from some, or all, of the global context requirement. Business students are encouraged to contact the Office of International Affairs to learn more about these options. Undergraduate students interested in international business are particularly encouraged to take advantage of one of these programs while also completing the certificate in global business.

Charles H. Lundquist College of Business Code of Professional Business Conduct

The Lundquist College of Business learning community is committed to a set of core values (<https://business.uoregon.edu/code-of-conduct>) that guide members' interactions with one another. These values include integrity, respect, openness, responsibility, and teamwork, and they are as important in the Lundquist College community as they are in the business community.

Support Services

Mohr Career Services

Gene Rhee, Executive Director
541-346-3301

Through this office, business students explore career paths, develop an employment strategy, identify strengths, form connections with industry leaders, and understand the skills they need to achieve their career ambitions. Services include career advising and exploration, job and internship information, guidance in establishing a résumé and online profile, a job shadow program, networking opportunities, a mentoring program, and skills development through a variety of workshops and events. The office also offers short courses to help students develop advanced skills essential in the modern job market while earning industry-recognized certifications. For more information, visit their website (<https://business.uoregon.edu/career>).

Braddock Tutoring

Weili Wee, Learning Specialist
541-346-4739

This program provides free tutoring in accounting, economics, finance, calculus, and statistics to business majors, accounting majors, business premajors, and business minors. Private tutoring with hourly fees can also be arranged for select courses. For more information, visit their website (<https://business.uoregon.edu/ug/tutoring>).

Diversity Programs

Damien Pitts, Academic Advisor and Diversity Initiatives Specialist
541-346-3303

Coordinated through undergraduate advising, a cohort program, Building Business Leaders, is offered for self-identified, underrepresented minority students. It supports students as they progress through the business premajor curriculum with opportunities on campus and in the business community through programs, events, and seminars. Business premajors in this program receive academic support services, such as tutoring, career-development programs, and academic advising, in addition to a seminar teaching students how to maximize their education. For more information, visit the website (<https://business.uoregon.edu/ug/bbl>).

Computer Laboratories

Shandon Bates, Director, Information Services and Instructional Technology
541-346-3311

The Lundquist College of Business provides dedicated computer labs for business students. The systems run Windows, Microsoft Office, and all software necessary to complete business courses. Students also have access to high-capacity black-and-white and color printers, as well as binding and laminating services for a fee. Electronically enhanced study rooms may be reserved at the front desk of the lab or online, and 50 virtualized lab seats may be accessed via the internet from anywhere in the world. Mac and Dell video and power adapters, calculators, and presentation remotes are also available for checkout. Wireless networking is available throughout the Lillis Business Complex, and most Lillis classrooms are equipped with a resident computer, projector, document camera, and sound system to enhance presentation capabilities. There are two fully operational videoconferencing rooms in the building, and a portable videoconferencing unit can be requested for classroom use. For more information, visit the website (<https://business.uoregon.edu/computer-labs>).

Academic Residential Community

541-346-3303
<https://business.uoregon.edu/ug/advising/residential-community>

In partnership with the Office of University Housing, the business college sponsors an academic residential community—an on-campus living and learning opportunity for undergraduate students interested in business. In the business residential community, residents take courses together and participate in a wide variety of dedicated programming, including career exploration, academic advising, résumé building, business etiquette, and panels focused on majors in the Lundquist College of Business.

Student Organizations

Involvement in student organizations helps develop leadership and organizational skills and offers a professional network to students and members of the faculty and the business community. Students may choose from more than a dozen student organizations supported by the college. For more information, visit the website (<https://business.uoregon.edu/ug/clubs>).

Centers for Excellence

Experiential learning is a cornerstone of a Lundquist College of Business education. The college provides undergraduate and graduate students many opportunities to take learning beyond the classroom through its

many student-run clubs and activities, a faculty-supervised consulting agency, internships, practicums, and its Centers for Excellence.

Center for Sustainable Business Practices

Izabel Loinaz, Program Manager
541-346-8846

The Center for Sustainable Business Practices prepares students to integrate environmental, social, and financial stewardship into competitive business strategies. The center offers a collaborative program focused on supply-chain and operations management, organizational change for sustainability, performance measurement and governance, and life-cycle analysis. It complements the curriculum by giving students real-world experience in industry with consulting projects and internships, seminars, center-sponsored speakers, study tours, and leadership and mentoring opportunities. For more information, visit the website (<https://business.uoregon.edu/centers/csbp>).

Marilyn C. and Gerry B. Cameron Center for Finance and Securities Analysis

Michele Henney, Program Manager
541-346-3281

The Cameron Center for Finance and Securities Analysis provides students with practical experience in corporate finance, treasury management, and investment management. The center augments the curriculum by integrating finance and accounting, allowing students to apply their academic course work to financial analysis and decision-making in real time, using state-of-the-art investment tools and analytics in close collaboration with the center's partners in industry. Opportunities include management of live equity portfolios through the University of Oregon Investment Group and Emerging Markets Equity Portfolio, an Engaging Asia tour, internships, seminars, visiting speakers, and mentoring. For more information, visit the website (<https://business.uoregon.edu/centers/cameron>).

Lundquist Center for Entrepreneurship

Nathan Lillegard, Program Manager
541-346-3349

The Lundquist Center for Entrepreneurship helps students develop the tools, skills, and abilities to turn innovative ideas into reality, whether the idea is improving a Fortune 500 company or starting a business. Courses, internships, guest speakers, study tours, and business plan competitions offer opportunities to develop entrepreneurial skills, attitude, and knowledge. The center's New Venture Championship is recognized as one of the top business-plan competitions in the world. By creating opportunities for participants to gain from the experience and wisdom of successful entrepreneurs, the center's programs help make students more competitive in today's business world. For more information, visit the website (<https://business.uoregon.edu/centers/lce>).

James H. Warsaw Sports Marketing Center

Whitney Wagoner, Director
541-346-3706

The Warsaw Sports Marketing Center advances sports marketing and sports business leadership through research, education, and interaction among students, faculty members, alumni, and successful sports business professionals. As the first endowed sports marketing program in a business college at a major public university, the Warsaw Center

supports curricula that lead to a concentration in sports business for the bachelor's degree program and to a sports business specialization area in the MBA degree program. The center also organizes research, sports-industry internships, guest speakers, and a variety of nonclassroom experiences for students. For more information, visit the website (<https://business.uoregon.edu/centers/warsaw>).

Undergraduate Programs

Collette Niland, Assistant Dean, Undergraduate Programs

541-346-3303
203 Peterson Hall
<https://business.uoregon.edu/ug>

The Lundquist College of Business is widely recognized for its outstanding programs in business education. Students and faculty members from around the world come to study, research, and learn together. The college offers courses in business premajor studies, accounting, business administration, global management, sports business, management, entrepreneurship, marketing, finance, operations and business analytics, and international business communications. Students may earn a bachelor of arts (BA) or bachelor of science (BS) degree with a major in either accounting or business administration. An honors program is offered for outstanding undergraduates. Student clubs and organizations provide opportunities to develop leadership and business skills outside of the classroom. A minor is offered for students in other majors. International students, regardless of major, may earn a letter certifying mastery in international business communication. A certificate in global business may be added to the business administration or accounting major.

Student Services

Undergraduate Advising Office

Heather Bottorff, Senior Director
541-346-3303

Professional advisors and peer advisors regularly meet with undergraduates to answer questions, plan academic programs, and track progress toward graduation. Students are urged to meet with a business college advisor at least once a year to ensure that they are meeting requirements and to stay informed of program changes. The college's undergraduate advising office also maintains information about major and minor admission processes, degree requirements, scholarships, educational exchange programs, tutoring services, and student organizations. For more information, visit the website (<https://business.uoregon.edu/ug/advising>).

Scholarships

Each year, the Lundquist College of Business awards scholarships to outstanding students majoring in accounting or business administration. Typically, the college awards approximately 70 scholarships that range from \$500 to \$7,500. Scholarships are made possible through generous donations by alumni and other friends of the Lundquist College of Business. Although criteria vary by scholarship, the primary emphasis is academic performance and demonstrated potential for success in a business career. Financial need may be considered, but it is typically a secondary consideration when making awards. Scholarship applications are available winter term. Scholarships are awarded in the spring. The accounting department has additional scholarship opportunities for its majors. A list of scholarships is available on the Lundquist College of Business website.

Academic Opportunities

Honors Program

Eric Boggs, Director
541-346-4659

Students in the business honors program are offered unique opportunities to enhance their educational experiences and prepare themselves for the growth and challenge of a career in business. A maximum of 35 students take nine of the core business courses as a cohort. Among the many advantages and benefits are smaller classes, select instructors, and opportunities to gain experience. Additional information is available online (<https://business.uoregon.edu/ug/honors>).

Graduate Programs

Graduate School of Management

The Graduate School of Management offers degree programs at the master's and doctoral levels and coordinates the graduate work of the five academic departments in the Lundquist College of Business. Graduate instruction in every field of business is supported by courses in related fields offered elsewhere in the university.

The Graduate School of Management is accredited by the Association to Advance Collegiate Schools of Business International.

Activities of the Center for Sustainable Business Practices, James H. Warsaw Sports Marketing Center, Lundquist Center for Entrepreneurship, and the Marilyn C. and Gerry B. Cameron Center for Finance and Securities Analysis may be of interest to graduate students. The centers are described in the introductory section to the Charles H. Lundquist College of Business.

Master's Degree Programs

The Graduate School of Management offers course work leading to the master of accounting (MActg), the master of science in finance (MS), the master of science in sports product management (MS), and the master of business administration (MBA). In the Lundquist College of Business, with the exception of the master of science in finance, master of arts (MA) and master of science (MS) degrees are available to PhD candidates. Students must complete the requirements specified in the description of their degree program.

Doctoral Degree Programs

Ryan J. Wilson, Director
380 Lillis Hall
541-346-4552

The Lundquist College of Business offers a program of advanced graduate study and research leading to the degree of doctor of philosophy (PhD) for students preparing for careers in university teaching and research. The program is administered by the director of doctoral programs for the Lundquist College of Business, assisted by the PhD programs committee.

The PhD typically requires four or five years of intensive study with a concentration in accounting, finance, management, marketing, or operations and business analytics. The program focuses on developing productive scholars, and it emphasizes both research and teaching skills. Doctoral students must demonstrate competence in scholarly research, and they must assume primary teaching responsibility for undergraduate business courses sometime during their program. Students are expected

to work closely with faculty members whose interests are similar to their own. Applicants are advised to be as specific as possible about their areas of interest. In the Lundquist College, with the exception of the master of science in finance, master of arts (MA) and master of science (MS) degrees are available to PhD candidates. Students must complete the requirements specified in the description of their degree program.

For more information, visit the website (<https://business.uoregon.edu/phd>).

Concurrent Degree Programs

At the University of Oregon, the term “concurrent degrees” is used when a student is pursuing two degrees simultaneously. Below are some examples involving graduate degrees in business. For more information, visit the website (<https://gradschool.uoregon.edu/policies-procedures/concurrent-degrees>).

MBA/MS in Finance

Business students may augment their management skills by developing expertise in finance. The curriculum for the master of science in finance is designed to provide students with insights from the most advanced theoretical and empirical research in finance while attending quarterly professional development seminars taught by a master career consultant. Through the Cameron Center for Finance and Securities Analysis, students have the opportunity to practice securities analysis and portfolio management in a live environment with access to the Pacific Northwest's financial, banking, and investment industry through the center's tailored series and study tours. The concurrent MBA/MSF program may be completed in two years. For more information, visit the website (<https://business.uoregon.edu/mba/degree-programs/concurrent-msf>).

JD/MBA

In cooperation with the University of Oregon School of Law, a concurrent JD/MBA program makes it possible to earn both the doctor of jurisprudence and master of business administration degrees in four years instead of the five that would be required if each degree was completed separately. Students spend their first year in the School of Law and their second year in the Lundquist College of Business, or vice versa. The third and fourth years are spent taking advanced courses in both law and business.

It is a highly selective program; students must meet the admission requirements of both the School of Law and the Lundquist College of Business. Admission is allowed only for the fall term. Prospective students should consult the admissions staff of both the School of Law and the MBA program. Students interested in sustainability may obtain a JD/MBA with a sustainability specialization in both areas. For more information, visit the MBA website (<https://business.uoregon.edu/mba/degree-programs/full-time>) and JD website (<https://law.uoregon.edu/explore/joint-biz-and-law>).

MBA/MActg

Students who wish to pursue both an MBA and master of accounting degree may do so concurrently if they meet the admissions requirements for both. Concurrent MBA/MActg students may save as much as two terms compared with the time required for both degrees independently. For more information, visit the website (<https://business.uoregon.edu/master-accounting>).

MBA/MA or MS in Conflict and Dispute Resolution

Business students may augment their management skills by developing expertise in the management of conflict. The master of arts or master of science in conflict and dispute resolution is structured to prepare a new generation of practitioners, educators, and scholars. Grounded in dispute resolution theory, the program combines broad interdisciplinary training and opportunities for individualized study and skills development. Concurrent MBA/MA or MS students have the option of obtaining both degrees in three years rather than the four years required if earned separately. Students are required to meet the admission requirements of both the schools. Admission is allowed only for the fall term. Prospective students should consult the admissions staffs of the MBA program and the program in conflict and dispute resolution, housed in the School of Law. For more information, visit the website (<https://law.uoregon.edu/explore/CRES-concurrent-degrees>).

MBA/MCRP

Business students interested in management and leadership roles related to city planning and land development should consider concurrent MBA and MCRP degrees. The master of community and regional planning (MCRP) prepares policy-oriented planners for leadership positions in the public, nonprofit, and private sectors. The program differs from public policy programs primarily in its focus on spatial issues including but not limited to building form and land use. Students are required to meet the admission requirements of both programs. Admission is allowed only for the fall term. Prospective students should consult the admissions staffs of the MBA program and the School of Planning, Public Policy and Management. For more information, visit the website (<https://pppm.uoregon.edu/grad/master-of-community-and-regional-planning>).

MBA/Graduate Certificate in Arts Management or Nonprofit Management

Students interested in both business and the arts should consider furthering their careers with a master of business administration degree and a concurrent certificate in arts management or nonprofit management. The certificates in arts management and nonprofit management are based on the underlying belief that professional arts and nonprofit managers must be familiar with the social, cultural, and ethical contexts of the arts in general—and the business context if combined with an MBA. Students are required to meet the admission requirements for both programs. Applications are reviewed on a rolling basis in fall, winter and spring terms. Prospective students should consult the admissions staffs of the MBA program and the School of Planning, Public Policy and Management. For more information, visit the website (<https://pppm.uoregon.edu/grad/certificate/arts-management>).

Administration of the Master's Degree Programs

The Charles H. Lundquist College of Business seeks diversity in its student population and evaluates applicants on their strengths. The college is interested in applicants' general intellectual ability, initiative and resourcefulness, creativity, seriousness of purpose, maturity, and capacity for growth. Oral and written communication skills are important. Students should have demonstrated a capacity for quantitative thinking and be able to take an orderly, analytical approach to solving problems and generating alternative solutions. The ability to derive ideas from various sources and see important relationships is essential. Students should be self-motivated, with persistence and drive, and with some understanding of the broad social, political, and economic implications

of decisions and actions. For MBA students, work experience is highly desirable.

The college's master's degree students describe the programs as rigorous, supportive, interactive, close-knit, warm, and dedicated to a sense of community. Once admitted to a program, students are evaluated as they would be in the workplace: they are given continual feedback on areas in which they are excelling and areas that need improvement.

Admission Criteria and Deadlines

Admission for the MBA, MActg, MS in Finance

The admission process is based on these factors:

1. Undergraduate academic performance
2. Graduate Management Admission Test (GMAT) score
3. One (MS in finance) to two (MBA and MActg) written recommendations from people who have worked closely with the applicant and can comment on student's ability, accomplishments, and potential
4. Completion of essay questions included in the application
5. Work experience or demonstrated leadership ability
6. Potential to benefit from and add value to the college's learning community
7. Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) for international applicants
8. Personal interview

The applicant should also provide any other pertinent information for consideration. Applicants are judged on their academic abilities and promise; their potential for leadership; and their commitment, readiness, and motivation to complete the program. Please visit links for each program to explore requirements specific to each program.

Prerequisites

In addition to proficiency in mathematics, MBA and MActg applicants must complete an online tutorial in accounting, economics, finance, and statistics in the summer before matriculation. MActg applicants with a business degree other than accounting must complete additional accounting courses.

Deadlines

MActg. To start winter term, the deadline is October 15; to start spring term, the deadline is January 15.

MBA and MSF. A rolling admission system is used. The early-decision deadline is October 15; round two is January 15, round three is March 15, and round four is May 15. The deadline for international applicants is February 15. Admission for applicants whose applications are received after March 15 is granted only if space is available in the incoming class of students.

Admission for the OEMBA

Admission to the program requires the following:

1. Demonstrate at least three years of managerial or leadership experience in a position that included supervision of other employees, responsibility for budgets, or financial performance, project management, account management, or similar responsibilities
2. Demonstrate at least five years of career-related work experience

3. Currently hold a mid- to senior-level management position with significant responsibility
4. Hold an undergraduate degree from a US or internationally accredited institution of recognized standing

Deadlines. A rolling admission system is used.

Admission for the MS in Sports Product Management

Admission to the program requires the following:

1. A bachelor's degree from a regionally accredited four-year college or university in the United States or its equivalent from a foreign institution
2. Two to three letters of recommendation
3. Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) scores if GPA is below a 3.00
4. A résumé
5. A product project
6. Three essays

Deadlines

Online. Round one is December 15; round two is January 15; final round is March 1.

Full-time. Round one is November 15; round two is January 15; round three is March 15; round four is May 15; final round is June 30.

Doctoral Admissions

For admission to the doctoral program, the student must

1. Satisfy the admission requirements of the Lundquist College of Business (<https://business.uoregon.edu/phd/admissions>) and of the Graduate School (<https://gradschool.uoregon.edu/?page=admissions>)
2. Be recommended by the department with primary responsibility for the area in which the candidate expects to earn a major
3. Provide evidence of scholarly promise

Averages for Recently Matriculated Students

- Grade point average (GPA)—3.84 on a four-point scale
- Test of English as a Foreign Language (TOEFL), internet-based test score—104
- Graduate Management Admission Test (GMAT) scores—720 (quantitative, 87th percentile; verbal, 87th percentile; writing, 5.3)
- Graduate Record Examination (GRE) revised general test scores—320 (163 quantitative, 87th percentile; 157 verbal, 73rd percentile)

Minimum Testing Qualifications

- GPA—3.00 on a four-point scale (undergraduate and graduate)
- TOEFL scores—96 (internet-based test) or 600 (paper-based test)
- International English Language Testing System (IELTS) score—7.5
- GMAT scores—600 total (quantitative, 63rd percentil; verbal, 65th percentile)
- GRE revised general test scores—315 (155 quantitative, 61st percentile; 160 verbal, 84th percentile; 308 combined quantitative and verbal) for operations and business analytics applicants

PhD students receive financial support in the form of an appointment as a graduate employee. For 2015–16, typical appointments were 0.49 FTE and carried a stipend of approximately \$19,000 plus waiver of tuition, and summer support of approximately \$5,000 for newly admitted students. Graduate employees may assist faculty members in research and teaching and assume responsibility for teaching undergraduate business courses. Inquiries concerning the program should be addressed to the Lundquist College of Business director of doctoral programs.

Deadline. Application to the PhD program for fall term is the preceding January 5 by 5:00 p.m. Pacific Standard Time.

Program Planning. Students should plan their course of study with the director of the program and the PhD coordinator of their major department.

Academic Performance

In addition to fulfilling Graduate School requirements, a student enrolled in an advanced degree program is required to maintain a GPA of 3.00 for graduate courses that are counted toward the business degree. Students whose GPAs fall below 3.00 in a graduate college of business degree program are automatically placed on probation. Their continued enrollment is subject to review by the director of the program.

Students may formally appeal disqualification or other decisions relevant to their academic performance or program. A description of the probation policy and appeal procedures is available from the director of the program.

General University Regulations

See the **Graduate School** section of this catalog for general university regulations and information regarding registration, academic performance, and other matters applicable to university graduate students.

Business Administration Courses

BA 101. Introduction to Business. 4 Credits.

Historical, social, political, economic, and legal environments within which business operates. Interrelationships of the functional areas of management, finance, marketing, accounting, and international studies.

BA 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

BA 215. Accounting: Language of Business Decisions. 4 Credits.

How the accounting model reflects business transactions or events. Interpretation and analysis of financial statements. Understanding cost and revenue information, organization, and decisions.

Prereq: BA 101.

BA 240. Managing Business Information. 4 Credits.

Data-oriented approaches for structuring and analyzing information, with applications in the traditional functional areas of business, emphasizing modern techniques for developing fact-based decision models.

Sophomore standing required.

BA 252. Global Perspectives in Business. 4 Credits.

An interdisciplinary introduction to what it means to participate in a global economy, critically reflecting on globalization, the impacts of business activity, human rights, global finance, marketing, and management. Also explores concepts and skills in intercultural communication and working with others from around the world.

BA 308. Leadership and Communication. 4 Credits.

Personal leadership and communication skills. Focuses on self-awareness for leading, persuading, and working with others; effective business writing and speaking; and team development. Students may not receive credit both BA 308 and BA 308H. Sophomore standing required. Prereq: C- or better in BA 101, WR 121; WR 122 or WR 123.

BA 308H. Leadership and Communication. 4 Credits.

Personal leadership and communication skills. Focuses on self-awareness for leading, persuading, and working with others; effective business writing and speaking; and team development. Students may not receive credit both BA 308 and BA 308H. Open only to students in the LCB Honors Program.

Prereq: C- or better in BA 101, WR 121; WR 122 or WR 123.

BA 315. Economy, Industry, and Competitive Analysis. 4 Credits.

Free enterprise capitalism and market competition. Economic value added, product cost, and product pricing. Organizational arrangements and the control of economic activity.

Prereq: BA 101.

BA 316. Management: Creating Value through People. 4 Credits.

Management systems for planning, controlling, organizing, and leading; how they influence human behavior in organizations. Selecting, training, retaining, and motivating the human resource in organization.

Prereq: BA 101.

BA 317. Marketing: Creating Value for Customers. 4 Credits.

Market analysis, target customer identification, and development of marketing-mix strategies to deliver superior customer value and contribute to the performance of the organization.

Prereq: BA 101.

BA 318. Finance: Creating Value through Capital. 4 Credits.

Financial statement analysis, pro forma statements and capital budgeting, time value of money, net present-value analysis, risk and cost of capital.

Prereq: BA 101; BA 215 or ACTG 211.

BA 325. Business Law and Ethics. 4 Credits.

Legal and ethical environments of business, including U.S. legal concepts, social and environmental impacts of business, and ethical decision making.

Prereq: BA 101, WR 121.

BA 361. Cross-Cultural Business Communication. 4 Credits.

Theoretical and practical approach to value dimensions across cultures and their impact on communication in business and professional contexts. Develops intercultural business communication skills.

Prereq: WR 121 recommended.

BA 362. Effective Business Writing. 4 Credits.

Theory and practice of writing effectively for U.S. and international business audiences; use of rhetorical, cultural, and organizational analysis to create persuasive business documents. Designed for nonnative speakers of English.

Prereq: WR 121 recommended.

BA 363. Effective Business Presentations. 4 Credits.

Contrastive rhetoric approach to business presentations in U.S. and international settings. Students research and learn to present effectively for different purposes and global audiences. Designed for nonnative speakers of English.

Prereq: WR 121 recommended.

BA 364. International Business Research. 4 Credits.

International, cross-cultural perspective to communicating information. Presents language, concepts, and strategies needed to conduct international business research and guidelines for communicating research findings.

BA 365. Cross-Cultural Negotiation. 4 Credits.

Theory and practice of negotiating effectively across cultures. Research and analysis of culturally specific models for negotiating and experience using those models in cross-cultural simulations.
Prereq: WR 121 recommended.

BA 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

BA 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

BA 404. Internship: [Topic]. 1 Credit.**BA 406. Special Problems: [Topic]. 1-12 Credits.**

Repeatable.

BA 407. Seminar: [Topic]. 1-4 Credits.**BA 410. Experimental Course: [Topic]. 1-4 Credits.**

Repeatable when the topic changes.

BA 453. Business Strategy and Planning. 4 Credits.

Capstone course focusing on strategy formulation and decisional processes. Includes writing a business plan that applies knowledge and develops course of action to accomplish organizational objectives. Students cannot receive credit for both BA 453 and BA 453H.
Prereq: completion of 300-level business core courses, senior standing.

BA 453H. Business Strategy and Planning. 4 Credits.

Provides conceptual tools for in-depth strategic analysis and interactive discussions from sources relevant to the challenge of developing and implementing strategy. Students cannot receive credit for both BA 453 and BA 453H.

Prereq: completion of 300-level business core courses, senior standing.
Open only to students in the LCB honors program;

BA 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes.

BA 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

BA 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

BA 608. Special Topics: [Topic]. 1-12 Credits.

Repeatable.

BA 610. Experimental Course: [Topic]. 1-6 Credits.

Repeatable when the topic changes.

BA 661. Oregon Advanced Strategy. 3 Credits.

Examines advanced strategic analysis in corporate setting and integrates multidisciplinary values such as sustainability, product-service excellence, cultural values, financial strength, advanced marketing, entrepreneurial thinking, customer relationship management, big data analytics. This course is taught through the C-level practitioner's perspective.
Prereq: MGMT 614.

BA 705. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

BA 707. Seminar: [Topic]. 1-6 Credits.

Repeatable.

BA 708. Workshop: [Topic]. 1-6 Credits.

Repeatable.

BA 710. Experimental Course: [Topic]. 1-9 Credits.

Repeatable.

BA 711. Legal Environment of Business. 3 Credits.

Analysis of government policy and the legal environment in which business operates; the effects of law, government policy, and social forces on the formulation of business strategy and decision-making.

BA 712. Financial Accounting and Reporting. 3 Credits.

Preparation, interpretation, and use of external financial statements and reports. Covers basic accounting principles, recording and reporting techniques underlying valuation and income determination. Series with BA 714.

BA 713. Applied Statistics for Managers. 3 Credits.

Exposure to descriptive statistics, decision analysis, regression analysis, and forecasting. Emphasis on when and how to use statistics. Integrates statistical tools used to analyze business data with microcomputers.

BA 714. Managerial Accounting. 3 Credits.

Introduction to cost accounting terminology; costing strategies, nontraditional costing systems, activity-based costing and product-service costing applications. Series with BA 712.

BA 715. Managerial Economics. 3 Credits.

Covers micro- and macroeconomic analyses and the concepts of cost, demand, profit, and competition. Examines monetary and fiscal policy, the Federal Reserve System, and money and capital markets.

BA 716. Managing Organizations. 2 Credits.

Organizations as complex social systems; leadership; managing individuals, groups, and teams; formal and informal processes and systems.

BA 717. Marketing Management. 3 Credits.

Examines marketing analysis and planning necessary to develop marketing plans and strategies for a product-line. Includes basic marketing concepts and philosophies and brief exposure to macromarketing strategies. Sequence with BA 719.

BA 718. Financial Analysis. 4 Credits.

Covers objectives, tools, methods, and problems of financial management. Includes fund acquisitions, dividend policy, capital acquisitions, taxes, mergers, and investment banking. Sequence with BA 720.

BA 719. Marketing Strategy. 3 Credits.

Marketing strategies for product-service introduction, growth, maturity, and decline; managing product-service innovation and development; brand equity, relationship marketing. Sequence with BA 717.

BA 720. Corporate Financial Strategy. 3 Credits.

Advanced topics in firm evaluation (e.g., acquisitions, restructuring) and financial risk management (e.g., hedging, derivatives, foreign projects) as related to global and domestic corporate strategies. Sequence with BA 718.

BA 722. Leadership and Motivation: [Topic]. 1 Credit.

LEAD is the leadership foundation course that runs across the entire first year. The instructors and 2nd year students lead the in-class discussions of a variety of leadership topics. Topics include elements of motivation and leadership that affect management decision-making and problem-solving.

BA 723. Formulating Corporate Strategy. 3 Credits.

Focuses on how corporations choose to compete. Covers the analytical techniques and planning models appropriate for making this fundamental decision.

BA 725. Implementing Corporate Strategy. 3 Credits.

Uses problems and cases to examine the implementation of corporate strategy, the strategy process and cycle, and implementation methods. Sequence with BA 723.

BA 726. Global Business. 3 Credits.

Examines global competition and strategy, regional economic integration, cross-cultural challenges, foreign market entry, international joint ventures and strategic alliances, international dimensions in functional areas of business.

BA 727. Operations Management. 3 Credits.

Examines methods and processes for providing a competitive advantage through continuous quality and process improvements, supplier management, and efficient production of goods and services.

BA 729. Negotiation. 3 Credits.

Explores the major theories and concepts of negotiation. Opportunities to practice deal-making and conflict resolution. Encourages improvement in communication and persuasion.

BA 730. Business Ethics. 1 Credit.

Studies the derivation of values and the application of those values to individual choices. Emphasizes the conflict manager's experience when choosing between two alternatives.

BA 731. New Venture Planning. 3 Credits.

Students identify and research a business opportunity; develop and present a professional start-up business plan that includes market, competitor, cash flow, and financial analyses.

BA 734. Supply-Chain Strategy. 2 Credits.

Examines strategic and tactical issues pertaining to the distribution and delivery of products and services.

BA 735. Opportunity Recognition. 3 Credits.

Provides students with techniques and models to identify and develop new opportunities and manage innovation processes.

BA 736. Alliances and Acquisitions. 3 Credits.

Using alliances and acquisitions as a strategic tool; emphasis on value creation. Includes deal valuation, deal-making, due diligence, integration, and ecosystem development. Builds on negotiation, strategy, and finance courses.

BA 740. Capstone Business Project. 1-9 Credits.

Repeatable. Focuses on integration of functional areas of business. Includes writing a plan that applies knowledge and develops a course of action to accomplish organizational objectives. Repeatable thrice for a maximum of 9 credits.

Prereq: offered only to students in the second year of the Oregon Executive M.B.A. program.

Business Environment Courses**BE 199. Special Studies: [Topic]. 1-5 Credits.**

Repeatable.

BE 401. Research: [Topic]. 1-21 Credits.

Repeatable.

BE 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

BE 406. Special Problems: [Topic]. 1-21 Credits.

Repeatable.

BE 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

BE 409. Practicum: [Topic]. 1-21 Credits.

Repeatable.

BE 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable. A recent topic is Law for Managers.

BE 503. Thesis. 1-16 Credits.

Repeatable.

BE 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable. A recent topic is Law for Managers.

BE 601. Research: [Topic]. 1-16 Credits.

Repeatable.

BE 603. Dissertation. 1-16 Credits.

Repeatable.

BE 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

BE 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

BE 608. Special Topics: [Topic]. 1-12 Credits.

Repeatable.

BE 609. Practicum: [Topic]. 1-16 Credits.

Repeatable.

BE 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. A recent topic is Global Business Environments.

BE 625. Business Law and Ethics. 3 Credits.

Examines the legal and ethical facets of real-life business cases and develops the core knowledge and critical thinking skills around law and ethics for today's successful business leaders.

Accounting

Angela K. Davis, Director

Undergraduate Advising Office
203 Peterson Hall

Accounting students are highly recruited by a variety of organizations—taking positions in public accounting firms, industry, and government. Accountants deal with issues ranging from the design of information systems to the formulation of acquisition strategies. Given the growing internationalization of business, career paths can even lead to exciting opportunities abroad. Accounting graduates of the University of Oregon include Phil Knight, Nike cofounder and chairman, and Charles H. Lundquist, the namesake of the UO business college.

The challenging curriculum emphasizes the development of skills in problem-solving, analytical reasoning, and written and oral communication. Students participate in various real-world projects and obtain considerable computer experience. The relatively small size of the program allows meaningful student-faculty interaction. The School of Accounting is one of only 120 accounting programs accredited by AACSB International.

Faculty

Dane M. Christensen, associate professor (corporate misconduct, corporate social responsibility). BA, 2003, Oregon State; BS, 2004, MAActg, 2005, Oregon; PhD, 2013, Arizona. (2016)

Robin P. Clement, Robert and Lois Braddock Distinguished Senior Instructor II (consolidations, financial accounting theory); director, master of accounting program; academic director, sports product management. BSBA, 1979, Ohio State; MBA, 1983, Wisconsin, Milwaukee; PhD, 1994, Michigan State. (2003)

Angela K. Davis, Jack O. Rickli Professor of Business (financial reporting, valuation). BS, 1993, Idaho; PhD, 2001, Washington. (2006)

Kari Day, instructor. BS, 2002, MS, 2002, Oklahoma City; DBA, 2017, Northcentral. (2018)

Shannon Dolan, instructor [profit sharing 401(k) plan administration, compliance, and design]. BA, 2000, MS, 2001, Oregon. (2013)

Qintao Fan, associate professor. BA, 1996, Renmin University of China; MA, 1998, Maryland, College Park; MS, 2001, PhD, 2004, Stanford. (2016)

Gudrun K. Granholm, instructor. MBA, 1975, Stanford. (2013)

David A. Guenther, Scharpf-Knight Professor in Business (effects of income taxes, economic effects of international accounting differences). BA, 1976, California State, San Bernardino; PhD, 1990, Washington. (2005)

Michele C. Henney, Bashaw Senior Instructor II of Accounting (auditing, corporate governance); program manager, Cameron Center for Finance and Securities Analysis. BS, 1982, California State; MS, 1988, Golden Gate; PhD, 1994, Oregon. (2004)

Nicole Bastian Johnson, associate professor (managerial incentives, performance measurement). BS, 1996, MAcc, 1996, Brigham Young; MS, 2002, PhD, 2005, Stanford. (2013)

Drummond Kahn, instructor (auditing). BA, 1989, Whitman; MS, 1990, Oregon. (2000)

Linda K. Krull, associate professor (capital structure decisions, effects of taxes on corporate financial reporting and investment); coordinator, doctoral program. BS, 1992, Indiana; MAcc, 1994, Florida; PhD, 2001, Arizona. (2008)

Steven Roy Matsunaga, Charles E. Johnson Memorial Professor of Accounting (corporate governance, managerial incentives). BA, 1979, San Francisco State; MBA, 1984, William and Mary; PhD, 1992, Washington. (1992)

Sarah Nutter, professor (impact of taxes and taxation structures, institutional and individual behavior); Edward Maletis Dean. BS, Ferris State; MBA, PhD, Michigan State. (2017)

Stephanie Peel, instructor pro tem. BS, 1990, Washington, St. Louis. (2018)

Kyle Peterson, associate professor (comparability, disclosure). BS, 2001, MAcc, 2001, Brigham Young; PhD, 2008, Michigan, Ann Arbor. (2008)

Joel Sneed, senior instructor (accounting information systems, financial and international accounting). BS, 1986, MBA, 1988, Appalachia State; MS, 1997, PhD, 2001, Arizona. (2000)

Michael P. Tomcal, senior instructor (financial accounting, cost accounting, federal taxation). BS, 1982, DePaul; MEd, 2005, Oregon State; MAActg, 2005, Oregon. (2006)

Brady J. Twedt, assistant professor (capital markets, information intermediaries). BS, 2009, Utah State; PhD, 2013, Texas A&M. (2018)

Ryan J. Wilson, Richard W. Lindholm Professor of Taxation (corporate governance and tax planning, financial accounting for income taxes); director, doctoral program;. BS, 1999, Oregon; PhD, 2007, Washington. (2013)

Emeriti

Helen Gernon, professor emerita. BBA, 1968, Georgia; MBA, 1972, Florida Atlantic; PhD, 1978, Pennsylvania State; CPA, Florida. (1978)

Raymond D. King, professor emeritus. BS, 1971, Montana State; MBA, 1974, Montana; PhD, 1980, Oregon; CPA, Montana. (1982)

Dale Morse, professor emeritus. BA, 1969, MBA, 1975, Oregon; PhD, 1978, Stanford. (1991)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Arts
- Bachelor of Science
- 3 + 1 Accounting Pathway (Bachelor of Arts/Master of Accounting)

Undergraduate Programs

Academic Requirements

To earn an undergraduate degree in the Lundquist College of Business, a student must be an admitted major in good academic standing with the college and the university. Two sets of requirements must be completed: general university requirements and college requirements.

The college is firmly committed to an undergraduate degree program in business based on a solid foundation in the arts and sciences. Students may not earn two majors in the Lundquist College of Business; in other words, a student who has an undergraduate degree in business administration cannot earn another undergraduate degree from the college. See the **Bachelor's Degree Requirements** section of this catalog for specific requirements for bachelor's degrees and for general-education and university requirements.

Students must satisfy the upper-division business core and major requirements in effect when they are admitted as majors.

For a more detailed explanation of requirements for majors, students should pick up the undergraduate degree programs handout in the Advising Office.

Business Premajor Admission

New students planning to earn a bachelor's degree in the Lundquist College of Business typically enter the university as business premajors. Transfer students and university students from other majors may become business premajors by submitting a Request for Addition or Deletion

Major form, available in the Advising Office. Students who seek premajor status in business should meet with an advisor in the college if their GPA is below 3.00. Business premajors typically are not eligible to take most 300- and 400-level business courses. Business premajor status does not guarantee admission to the accounting or business administration major.

Admitted business premajors typically spend the first two years fulfilling general-education and premajor requirements.

Premajor Requirements

- **Junior Standing.** Course work of 90 or more credits must be complete.
- **Cumulative GPA Requirement.** Guaranteed admission requires a 3.00 cumulative grade point average in college course work, including transfer work. The college includes all course work when calculating the cumulative GPA for admission to the major.
- **Holistic Review.** Students who have taken all required business premajor course work but fall slightly below the minimum GPA requirements may be considered for admission under a holistic review process. For more details, interested students may visit an academic advisor in 203 Peterson Hall.
- **English Competence.** International students must have a Test of English as a Foreign Language (TOEFL) score of at least 575 (paper-based test), 233 (computer-based test), 89 (internet-based test), an International English Language Testing System (IELTS) score of 7.0, or have completed the Academic English for International Students (AEIS) program.

First-Year Direct Admission

Direct admission is only offered to first-year students who are entering in the fall term and list their intended major as business administration. The University of Oregon considers a number of factors when making direct admissions decisions, including high school GPA, strength of academic course work, test scores, and ability to enhance the diversity of the university. Students selected for direct admission will need to complete the lower-division course requirements but will not need to apply to the major like other students interested in business administration or accounting.

3 + 1 Accounting Pathway (Concurrent Degree Program)

The 3+1 Accounting Pathway is an accelerated program for accounting majors, an opportunity for qualified incoming freshman students interested in accounting to complete within four years the bachelor's degree in accounting concurrently with the master of accounting degree. Through an evaluation of college-ready credits (e.g., Advanced Placement and International Baccalaureate programs), high-achieving students are fast-tracked for admission to the Lundquist College of Business one full year before their contemporaries. Students in this program may complete their undergraduate degree in three years, with the fourth year used to complete the master of accounting program. Students must submit applications for admission to the 3+1 Accounting Pathway by October 31 of the fall trimester of their freshman year.

For more information, visit the website (<https://business.uoregon.edu/master-accounting>). For application information, visit the admissions website (<https://business.uoregon.edu/ug/majors/accounting/3-1/application-instructions>).

Business Premajor Courses

Premajor core business courses must be taken at the University of Oregon.

In addition, international students are required to take Academic English for International Students (AEIS) courses or produce English language proficiency test scores (575 on the TOEFL paper-based test, 89 on the TOEFL internet-based test, or 7.0 in the IELTS).

Code	Title	Credits
Core Courses ¹		
BA 101	Introduction to Business	4
ACTG 211	Introduction to Accounting I	4
ACTG 213	Introduction to Accounting II	4
EC 201	Introduction to Economic Analysis: Microeconomics	4
EC 202	Introduction to Economic Analysis: Macroeconomics	4
Additional Courses ²		
BA 240	Managing Business Information	4

MATH 243	Introduction to Methods of Probability and Statistics	4
Select one of the following:		8
WR 121 & WR 122	College Composition I and College Composition II	
WR 121 & WR 123	College Composition I and College Composition III	
Total Credits		40

¹ A 3.00 cumulative GPA (including both UO and transfer course work) and a minimum grade of C– in core courses are required for guaranteed admission to the major. Premajor requirements must be taken for letter grades. The university limits retaking of courses in which a P or mid-C or better is earned; a petition is required. When repeating a core course, only the second grade is used in calculating the core GPA. Core courses may be repeated only once (including marks of W, N, F, D, C–).

² Must be taken for letter grades and passed with grades of C– or better.

Application to the Major

Students seeking admission through the standard pathway must submit a formal application for admission to the major one term prior to enrolling in upper-division business courses. Typically this takes place in the term they are completing their lower-division requirements. To be eligible for admission as a major, a student must apply before the term deadline. Applications are due the first week of the term for admission the following term. Applications are not accepted during summer session. Students who are completing their final term of business premajor requirements may submit applications.

The following documents are required for admission:

1. Completed application form (<https://business.uoregon.edu/ug/apply/major>)
2. Academic transcripts or proof of enrollment

3. A cover letter and résumé
4. Short answer essays

Upper-Division Core

Code	Title	Credits
BA 308	Leadership and Communication	4
BA 325	Business Law and Ethics	4
BA 453	Business Strategy and Planning	4
FIN 311	Economic Foundations of Competitive Analysis	4
FIN 316	Financial Management	4

MKTG 311	Marketing Management	4
OBA 311	Business Analytics I	4
OBA 312	Business Analytics II	4
OBA 335	Operations Management	4
Total Credits		40

Upper-division core courses typically are completed during junior year.

Bachelor of Arts Degree Requirements

Code	Title	Credits
ACTG 350–352	Intermediate Accounting I-III	12
ACTG 360	Cost Accounting	4
ACTG 440	Auditing	4
ACTG 450	Advanced Financial Accounting	4
ACTG 470	Federal Taxation	4
Total Credits		28

Bachelor of Science Degree Requirements

Code	Title	Credits
ACTG 350–352	Intermediate Accounting I-III	12
ACTG 360	Cost Accounting	4
ACTG 440	Auditing	4
ACTG 450	Advanced Financial Accounting	4
ACTG 470	Federal Taxation	4
Total Credits		28

The 400-level courses are typically taken in the senior year.

Upper-division accounting credits applied toward the major must be taken at the Lundquist College. Exceptions require explicit approval from the accounting department head.

Students pursuing the certified public accountant (CPA) designation are required to take additional course work prior to sitting for the Certified Public Accountant Examination. This course work is provided through a one-year master's degree program. Contact the School of Accounting for details.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them. Milestones are not specific to one course unless explicitly stated. Please visit the website (<https://business.uoregon.edu/ug/advising>) for more information.

Graduate Programs

Master of Accounting

Robin P. Clement, Director
 308A Peterson Hall
 541-346-3295

The master of accounting (MAcgt) is designed for students whose undergraduate major is accounting or the equivalent. The program is constructed so that it can be completed in three terms (one academic year) of full-time study. The curriculum is designed to sharpen written and oral communication, leadership, critical thinking, and analytical skills that are needed to excel in the accounting profession.

Program Requirements

The program requires an undergraduate degree in accounting or the equivalent. Five core accounting courses, two accounting electives, five general business or other graduate electives, and two one-credit seminars titled Developing the Business Professional are required. A four-day orientation in September is also required, and an optional half-day miniorientation in June is optional.

MActg Course Requirements

Code	Title	Credits
	Accounting courses	30
	Five electives outside accounting ¹	15
Total Credits		45

¹ The plan of study for the electives outside of accounting is determined by the student and the program director.

Visit the college's master of accounting website (<https://business.uoregon.edu/master-accounting>) for more information.

Doctoral Program

Linda Krull, Director

393D Anstett Hall

541-346-3252

Faculty expertise focuses on federal income taxation, disclosure of financial information, and use of accounting information in corporate governance.

The student's program must satisfy the requirements of the Graduate School and the following requirements of the Lundquist College of Business.

The doctoral program requires four to five years of work while in residence on the Eugene campus.

PhD Degree Requirements

Code	Title	Credits
	Nine doctoral courses ¹	
	Five or more graduate-level statistics courses ²	
	Three graduate-level economics, mathematics, or behavioral science courses ³	

¹ The department specifies the courses. At least three courses must be taken at the University of Oregon after admission to the doctoral program.

² Grades of mid-B or better are required; none of these courses may be taken pass/no pass. These courses may be taken outside the Lundquist College of Business. At least three courses must be completed at the university after admission to the doctoral program.

³ Courses in these areas of study are subject to final approval by the student's advisory committee and the director of doctoral programs. Each course used to meet this area requirement must be passed with a grade of mid-B or better, and at least two courses must be completed at the university after admission to the doctoral program.

Competence in Specialty

Students are expected to master the literature and techniques in their area of concentration, prepare to write an acceptable dissertation, and perform high-quality research. Competence is demonstrated by passing a departmental written comprehensive examination and by successfully completing one or more required research papers. The department specifies the number of required papers. To be eligible to take a comprehensive examination, students must have completed most of the course work required in the area.

Competence in Statistics and Research Methods

If the department requires an examination in statistics and research methods, it is administered and graded by a committee that includes at least two operations and business analytics faculty members appointed by the director of doctoral programs.

Examinations

Students must pass one written comprehensive examination in their area of concentration. Examinations are graded *high pass*, *pass*, or *no pass*. For examinations given in separate and predesignated parts, the grade may apply to each subpart. All grades are outright; a conditional pass is not permitted.

In the event of failure, a student may be allowed to retake a comprehensive examination or predesignated subpart one time, at the discretion of the department in which the student is majoring. Normally, the examination or predesignated subpart should be retaken during the term following the initial attempt, but it may be taken no sooner than two months after the initial attempt. Failure to pass the comprehensive examination or a subpart on the second attempt results in automatic termination from the PhD program.

Advancement to Candidacy

The student is advanced to candidacy for the PhD degree after satisfying the preceding requirements and upon recommendation by his or her advisory committee to the Lundquist College of Business and to the Graduate School. Advancement must occur no later than three years after the student's entry into the doctoral program.

Dissertation

The student must complete a dissertation embodying the results of research and showing evidence of originality and ability in independent investigation. The dissertation must show mastery of the literature and techniques, be written in creditable literary form, and make a contribution to knowledge.

The student is responsible for formation of a dissertation committee, subject to approval by the Lundquist College of Business and the Graduate School of the university. This committee includes at least three regular faculty members of the college and at least one member from outside the college. The chair of the committee serves as the student's primary dissertation advisor. Before the dissertation topic is accepted by the dissertation committee, the student makes an oral presentation and defense of the research proposal and design. When the topic is accepted by the committee, a copy of the proposal, signed as approved by the committee, is placed in the candidate's file.

The dissertation must be completed within four years of the student's advancement to candidacy. Upon petition to and approval by the PhD program committee and the Graduate School, this period may be extended for one year. Failure to complete the dissertation within this time period invalidates the student's comprehensive examinations and advancement to candidacy. The student must successfully defend the completed dissertation in a public oral examination and defense before the dissertation committee.

Grade Point Average (GPA)

The student must maintain a cumulative GPA of 3.00 or higher in graduate courses.

Termination from Program

A student's participation in the PhD program may be terminated under one or more of the following conditions:

- failure to make satisfactory progress toward advancement to candidacy
- a GPA below 3.00 for two consecutive terms
- failure to complete a dissertation within four years after advancement to candidacy

The decision to terminate will be made by the director of the PhD program after consultation with the PhD coordinator and faculty members of the department in which the student is majoring.

A student dropped from the program is notified in writing, with reasons for termination clearly explained, and a copy of the letter is placed in the student's file. The student has the right to appeal the termination decision by submitting a petition to the senior associate dean for academic affairs.

Waivers

Waiver of any of the above requirements is permitted only in exceptional instances and with the approval of the candidate's program committee, the PhD program committee, and the director of PhD programs. Under no circumstances can requirements of the Graduate School be waived by the Lundquist College of Business.

For more information, visit the website (<https://business.uoregon.edu/phd/concentrations/accounting>).

Courses

ACTG 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

ACTG 211. Introduction to Accounting I. 4 Credits.

The accounting model and financial statements for external users.

Prereq: sophomore standing.

ACTG 213. Introduction to Accounting II. 4 Credits.

Reporting of assets, equities, revenues, and expenses. Cost information and uses in management planning and control. Budgeting, manufacturing cost flows, and product costs.

Prereq: ACTG 211, C- or better; sophomore standing.

ACTG 340. Accounting for Entrepreneurs. 4 Credits.

Sources and uses of cash in the context of start-up and small firms. Emphasis on cash generated by operations and used for operations and growth. Secondary emphasis on external sources of cash.

Prereq: ACTG 211 or MGMT 335.

ACTG 350. Intermediate Accounting I. 4 Credits.

Concepts and principles of financial accounting, including U.S. and international financial reporting standards; analysis of alternatives for income measurement and asset and liability valuation.

Prereq: C- or better in ACTG 213, BA 101, BA 240, EC 201, EC 202, MATH 241, MATH 243, WR 121, and WR 122 or WR 123.

ACTG 351. Intermediate Accounting II. 4 Credits.

Concepts and principles of financial accounting, including U.S. and international financial reporting standards. Analysis of alternatives for income measurement and asset and liability valuation.

Prereq: ACTG 350.

ACTG 352. Intermediate Accounting III. 4 Credits.

Concepts and principles of financial accounting, including U.S. and international financial reporting standards; analysis of alternatives for income measurement and asset and liability valuation.

Prereq: C- or better in ACTG 351, FIN 316.

ACTG 360. Cost Accounting. 4 Credits.

Development and communication of cost information to assist in planning, motivating managers, controlling costs, and evaluating performance.

Prereq: C- or better in ACTG 213, BA 101, BA 240, EC 201, EC 202, MATH 241, MATH 243, WR 121 and WR 122 or WR 123.

ACTG 401. Research: [Topic]. 1-21 Credits.

Repeatable.

Repeatable. Current Research in Accounting is a recent topic.

ACTG 608. Special Topics: [Topic]. 1-16 Credits.

Repeatable.

ACTG 609. Practicum: [Topic]. 1-3 Credits.

Repeatable.

ACTG 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable when the topic changes. Recent topics include Developing the Business Professional, International Accounting, Tax Pass-Through Entities.

ACTG 612. Financial Accounting. 3 Credits.

Introduces the accounting model and financial statements for external users. Emphasizes the use of accounting information in valuation and performance evaluation.

Prereq: ACTG 211 or equivalent.

ACTG 617. Taxation of Business. 4 Credits.

Taxation of business entities (C corporations, partnerships, S corporations, and limited liability companies) as they form, operate, and dissolve.

ACTG 618. Taxes and Business Strategy. 4 Credits.

How to use economic analysis as a tax planning tool, thereby incorporating tax factors in economic decisions.

Prereq: ACTG 617.

ACTG 620. Entrepreneurial Accounting. 3 Credits.

Coverage includes selection of a company's legal organizational structure; compensation strategies for small business owners; cash flow budgeting, management and forecasting; and financial statement analysis.

Prereq: MBA core or the equivalent.

ACTG 625. Financial Reporting. 3 Credits.

In-depth coverage of the measurement and disclosure principles used to prepare generally accepted accounting principle-based financial statements.

Prereq: MBA core introduction to accounting courses or equivalent.

ACTG 630. Accounting Measurement and Disclosure. 4 Credits.

Recent Financial Accounting Standards Board decisions; current measurement and disclosure conflicts facing the accounting profession. Includes exposure to governmental and not-for-profit accounting issues.

ACTG 631. Financial Statement Analysis and Valuation. 4 Credits.

Examines the role of accounting information in financial decisions. Highlights valuation's relationship to accounting earnings and book value.

ACTG 642. Advanced Assurance Services. 4 Credits.

Knowledge and application of generally accepted accounting principles and generally accepted auditing standards systems, design and flow charting, work paper preparation and review, oral and written presentation, and application of judgment.

Prereq: ACTG 440/540.

ACTG 662. Strategic Cost Management. 4 Credits.

Theory and application of management accounting techniques to decisions made under uncertainty in complex business environments.

Finance

John Chalmers, Department Head

Undergraduate Advising Office

203 Peterson Hall

The Department of Finance offers courses in finance and business economics. The curriculum is designed to impart an understanding of the principles of finance and to provide students with analytical training. Courses on financial institutions and markets, financial management, and investments provide an understanding of the application of financial analysis to the solution of business problems.

The department offers a concentration in finance for the undergraduate major in business administration.

Faculty

Deborah J. Bauer, Peter and Molly Powell Distinguished Senior Instructor of Finance (investment strategies, competitive analysis); academic director, Oregon Executive MBA. BS 1997, Bryant; MS, 2001, Oregon. (2001)

Ioannis Branikas, assistant professor (household finance, mutual funds). BA, 2010, MSc, 2012, Athens University of Economics and Business; MA, 2014, PhD, 2018, Princeton. (2018)

John Chalmers, Abbott Keller Professor in Finance (household finance, municipal bond markets). BA, 1985, Middlebury; MS, 1992, PhD, 1995, Rochester. (1996)

Diane Del Guercio, Gerry and Marilyn Cameron Professor in Finance (corporate governance, institutional investors); senior associate dean, faculty affairs. BA, 1986, California, Santa Barbara; MA, 1989, PhD, 1994, Chicago. (1994)

Jennifer M. Ellis, senior instructor (competitive analysis, international trade and finance). BA, 1977, MA, 1978, Essex; PhD, 1992, Oregon. (1997)

Ali Emami, Bashaw Senior Instructor II of Finance (economics of the public accounting profession, international trade and finance). BS, 1972, National University of Iran; MS, 1980, Oregon; PhD, 1988, Oregon State. (1991)

Roberto Cruz Gutierrez Jr., associate professor (asset pricing, return anomalies). BS, 1992, Tulane; PhD, 1999, North Carolina, Chapel Hill. (2003)

Brandon R. Julio, associate professor (corporate investment, international finance). BA, 1998, Brigham Young; MS, 2001, South Carolina; MS, 2005, PhD, 2007, Illinois, Urbana-Champaign. (2014)

Scott Kerslake, James F. and Shirley J. Rippey Professor of Practice. BS, 1986, Boston. (2016)

Xiaoding Liu, assistant professor (corporate finance, corporate governance). BS, 2005, MS, 2006, PhD, 2012, Florida. (2012)

Stephen B. McKeon, associate professor (corporate finance, behavioral finance); academic director, Cameron Center for Finance and Securities Analysis. BS, 2000, Oregon; MS, 2009, PhD, 2011, Purdue, West Lafayette. (2011)

Jonathan Moulton, senior instructor (banking, corporate finance, investments). BS, 1982, Oregon; MBA, 1986, California State, East Bay; PhD, 1995, Oregon. (2011)

Robert Ready, associate professor (asset pricing, commodities). BA, 2003, Carnegie Mellon; MS, 2008, PhD, 2011, Pennsylvania. (2017)

Philip J. Romero, professor (cost-benefit analysis, economics policy). BA, 1983, Cornell; MA, 1985, PhD, 1988, Rand Graduate School. (1999)

Albert Sheen, assistant professor (corporate finance). BA, 1995, Chicago; PhD, 2009, California, Los Angeles. (2014)

Zhi "Jay" Wang, associate professor (asset management, institutional investors); coordinator, doctoral program. BA, 1994, Peking (Beijing); MS, 1998, PhD, 2000, Iowa State; PhD, 2004, Michigan, Ann Arbor. (2012)

Michael Wismer, instructor (real estate). BA, 1970, MS, 1974, Brigham Young. (1996)

Youchang Wu, associate professor (asset pricing, corporate finance). BS, 1994, MS, 1996, Peking (Beijing); PhD, 2004, Vienna. (2015)

Emeriti

Larry Y. Dann, professor emeritus. BS, 1967, Northwestern; MBA, 1969, Harvard; PhD, 1980, California, Los Angeles. (1977)

Jerome J. Dasso, professor emeritus. BS, 1951, Purdue; MBA, 1952, Michigan; MS, 1960, PhD, 1964, Wisconsin, Madison. (1966)

Michael H. Hopewell, associate professor emeritus. BA, 1963, MBA, 1967, PhD, 1972, Washington (Seattle). (1969)

Wayne H. Mikkelson, professor emeritus. BA, 1974, Macalester; MS, 1978, PhD, 1980, Rochester. (1984)

George A. Racette, associate professor emeritus. BA, 1966, Stanford; MBA, 1967, Michigan; PhD, 1972, Washington (Seattle). (1974)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Glen R. Waddell, professor (applied econometrics, industrial organization, labor economics). See **Economics**.

Undergraduate Programs

Academic Requirements

To earn an undergraduate degree in the Lundquist College of Business, a student must be an admitted major in good academic standing with the college and the university. Two sets of requirements must be completed: general university requirements and college requirements.

The college is firmly committed to an undergraduate degree program in business based on a solid foundation in the arts and sciences. Students may not earn two majors in the Lundquist College of Business; in other words, a student who has an undergraduate degree in business administration cannot earn another undergraduate degree from the college. See the **Bachelor's Degree Requirements** section of this catalog for specific requirements for bachelor's degrees and for general-education and university requirements.

Students must satisfy the upper-division business core and major requirements in effect when they are admitted as majors.

For a more detailed explanation of requirements for majors, students should pick up the undergraduate degree programs handout in the Advising Office.

Business Premajor Admission

New students planning to earn a bachelor's degree in the Lundquist College of Business typically enter the university as business premajors. Transfer students and university students from other majors may become business premajors by submitting a Request for Addition or Deletion Major form, available in the Advising Office. Students who seek premajor status in business should meet with an advisor in the college if their GPA is below 3.00. Business premajors typically are not eligible to take most 300- and 400-level business courses. Business premajor status does not guarantee admission to the accounting or business administration major.

Admitted business premajors typically spend the first two years fulfilling general-education and premajor requirements.

Premajor Requirements

- **Junior Standing.** Course work of 90 or more credits must be complete.
- **Cumulative GPA Requirement.** Guaranteed admission requires a 3.00 cumulative grade point average in college course work, including transfer work. The college includes all course work when calculating the cumulative GPA for admission to the major.
- **Holistic Review.** Students who have taken all required business premajor course work but fall slightly below the minimum GPA requirements may be considered for admission under a holistic review process. For more details, interested students may visit an academic advisor in 203 Peterson Hall.
- **English Competence.** International students must have a Test of English as a Foreign Language (TOEFL) score of at least 575 (paper-based test), 233 (computer-based test), 89 (internet-based test), an International English Language Testing System (IELTS) score of 7.0, or have completed the Academic English for International Students (AEIS) program.

First-Year Direct Admission

Direct admission is only offered to first-year students who are entering in the fall term and list their intended major as business administration. The University of Oregon considers a number of factors when making direct

admissions decisions, including high school GPA, strength of academic course work, test scores, and ability to enhance the diversity of the university. Students selected for direct admission will need to complete the lower-division course requirements but will not need to apply to the major like other students interested in business administration or accounting.

Business Premajor Courses

Premajor core business courses must be taken at the University of Oregon.

In addition, international students are required to take Academic English for International Students (AEIS) courses or produce English language proficiency test scores (575 on the TOEFL paper-based test, 89 on the TOEFL internet-based test, or 7.0 in the IELTS).

Code	Title	Credits
Core Courses ¹		
BA 101	Introduction to Business	4
ACTG 211	Introduction to Accounting I	4
ACTG 213	Introduction to Accounting II	4
EC 201	Introduction to Economic Analysis: Microeconomics	4
EC 202	Introduction to Economic Analysis: Macroeconomics	4
Additional Courses ²		
BA 240	Managing Business Information	4
MATH 241	Calculus for Business and Social Science I	4
MATH 243	Introduction to Methods of Probability and Statistics	4
Select one of the following:		8
WR 121 & WR 122	College Composition I and College Composition II	
WR 121 & WR 123	College Composition I and College Composition III	
Total Credits		40

¹ A 3.00 cumulative GPA (including both UO and transfer course work) and a minimum grade of C– in core courses are required for guaranteed admission to the major. Premajor requirements must be taken for letter grades. The university limits retaking of courses in which a P or mid-C or better is earned; a petition is required. When repeating a core course, only the second grade is used in calculating the core GPA. Core courses may be repeated only once (including marks of W, N, F, D, C–).

² Must be taken for letter grades and passed with grades of C– or better.

Application to the Major

Students seeking admission through the standard pathway must submit a formal application for admission to the major one term prior to enrolling in upper-division business courses. Typically this takes place in the term they are completing their lower-division requirements. To be eligible for admission as a major, a student must apply before the term deadline. Applications are due the first week of the term for admission the following term. Applications are not accepted during summer session. Students who are completing their final term of business premajor requirements may submit applications.

The following documents are required for admission:

1. Completed application form (<https://business.uoregon.edu/ug/apply/major>)
2. Academic transcripts or proof of enrollment
3. A cover letter and résumé
4. Short answer essays

Language courses beyond the first year satisfy this requirement. Global context plans must be approved by an advisor in the Advising Office.

3 + 1 Finance Pathway (Concurrent Degree Program)

The 3 + 1 Finance Pathway is an opportunity for qualified incoming freshman students interested in finance to complete both a bachelor of arts degree and a master of science in finance degree in four years.

Through an evaluation of college-ready credits—e.g., the Advance Placement (AP) and International Baccalaureate programs—these high-achieving students are fast-tracked for admission to the Lundquist College of Business one full year before their contemporaries. Students in this program may complete their undergraduate degree (bachelor of arts in accounting, business administration, or economics) in three years, with the fourth year used to complete the master's degree.

For more information, visit the website (<https://business.uoregon.edu/ug/concentrations/finance/3-1>).

Definitions, Limitations, and Policies

Transfer Students

The sequential nature of this program requires careful academic planning. Students who want to transfer to the college are encouraged to meet with an advisor in the Lundquist College of Business early in their academic careers. Students are admitted to the university as business premajors. Once admitted, they may apply for major status in accordance with the procedure described. Applications are due the first Friday of the term for admission the following term.

Second Bachelor's Degree

A student who has a bachelor's or master's degree in a field of business administration may not earn a second bachelor's degree in business. Students who have earned a nonbusiness degree and want a second degree in a field of business must be admitted to the university as postbaccalaureate nongraduate students. Second-degree candidates must meet the same admission requirements and follow the same application process described.

Students retain business premajor status until admission requirements are completed or waived because of completed course work. Second-degree students must complete the same upper-division requirements as first-degree candidates. The Second Bachelor's Degree section of this catalog, under **Bachelor's Degree Requirements**, lists university requirements for a second bachelor's degree; the Undergraduate Advising office has information about Lundquist College requirements.

Residence Requirement

Students must complete a minimum of 44 upper-division credits in regularly scheduled Lundquist College of Business courses. With the department head's approval, credits may be transferred from other accredited institutions, independent study, or approved courses in other departments. Accounting majors must complete all upper-division accounting courses at the University of Oregon.

Grading

Premajor required courses and upper-division courses must be taken for letter grades and passed with grades of C– or better. See the **Registration and Academic Policies** section of this catalog for an explanation of the university's grading systems.

Upper-Division Courses

Courses for the minor are open to nonmajors, and courses for the certificate in international business communication are open to students whose native language is not English. Only admitted majors in the Lundquist College of Business may enroll in all other 300- and 400-level business courses.

Continuous Progress

Students who do not attend the university for an extended period of time after being admitted as a major may be required to reapply for admission and fulfill current major requirements if the *UO Catalog* for the last year of attendance has expired. See Catalog Expiration and Requirements Policies in the **Reader's Guide to the Catalog** (p. 3).

Business Administration Minor

All professions and organizations, public and private, operate according to business principles. Earning a minor in business administration prepares students to participate in organizational conversations and become leaders within their future professions. The minor in business administration is open to students from all majors other than business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in business administration online at the college's website, where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Twelve upper-division credits must be taken in the Lundquist College of Business. Upper-division business courses must be taken for letter grades. Students must earn a C– or better in all courses taken for a letter grade to fulfill minor requirements. When minor requirements have been completed and notification of application for a degree has been received from the Office of the Registrar, the student is cleared for the minor.

Code	Title	Credits
BA 101	Introduction to Business ¹	4
BA 215	Accounting: Language of Business Decisions ²	4
BA 315	Economy, Industry, and Competitive Analysis	4
BA 316	Management: Creating Value through People	4
BA 317	Marketing: Creating Value for Customers	4
BA 318 or FIN 316	Finance: Creating Value through Capital ³ Financial Management	4
Total Credits		24

¹ Must be taken before the other required minor courses.

² Must be taken before Finance: Creating Value through Capital (BA 318).

³ Financial Management (FIN 316) may be substituted by economics majors who have maintained a 3.00 GPA.

Entrepreneurship Minor

The minor in entrepreneurship is intended for nonbusiness students who want to learn about innovation processes and the managerial and leadership skills required to create a new venture. The

entrepreneurship minor gives students the opportunity to envision, develop, test, and build a for-profit or nonprofit venture working within an interdisciplinary framework of exploration and self-discovery. The minor in entrepreneurship is open to students from all majors except business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in entrepreneurship online at the college's website (<https://business.uoregon.edu/ug/minors/entrepreneurship>), where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Twelve upper-division credits must be taken in the Lundquist College of Business. Upper-division business courses must be taken for letter grades. Students must earn a C– or better in all courses taken for a letter grade to fulfill minor requirements. When minor requirements have been completed and notification of application for a degree has been received from the Office of the Registrar, the student is cleared for the minor.

¹ Must be taken before the other required minor courses

Sports Business Minor

The sports business minor develops skills in teamwork, writing, and oral communications with an emphasis on providing core business competencies to those pursuing sports industry–related careers. The minor is intended to provide baseline business skills and knowledge to students who are not intending to pursue a sports business career per se, but rather are pursuing sports-related professional paths in which business acumen is a supporting skill (e.g., sports journalist, sports psychologist, sportswear designer). The minor in sports business is open to students from all majors except business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in sports business online at the college's website (<https://business.uoregon.edu/ug/minors/sports-business>), where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Twelve upper-division credits must be taken in the Lundquist College of Business. Upper-division business courses must be taken for letter grades. Students must earn a C– or better in all courses taken for a letter grade to fulfill minor requirements. When minor requirements have been completed and notification of application for a degree has been received from the Office of the Registrar, the student is cleared for the minor.

<https://business.uoregon.edu/mba>

302 Peterson Hall
Lillis Business Complex
541-346-3306
541-346-0073 fax

The Charles H. Lundquist College of Business MBA degree embodies the college's emphasis on interdisciplinary study, experiential learning, research excellence, and a supportive learning environment.

True to this interdisciplinary focus, the MBA curriculum consists of five tracks: advanced strategy and leadership, innovation and entrepreneurship, finance and securities analysis, sports business, and sustainable business practices. Building on a common core of foundational courses in accounting, decision sciences, finance, management, marketing, and operations and business analytics, students choose one of these curricular tracks when applying to the program.

Four of the tracks of the MBA curriculum are aligned with the college's centers—the Lundquist Center for Entrepreneurship, the Cameron Center for Finance and Securities Analysis, the Center for Sustainable Business Practices, and the James H. Warsaw Sports Marketing Center. The centers not only promote research collaboration among faculty members from different departments but they also facilitate student interactions with industry professionals and provide practical, real-world learning opportunities. These include internships, business planning ventures, competitions, and one- or two-term consulting projects in the second year.

Strong faculty involvement and the state-of-the-art facilities of the Lillis Business Complex create an ideal learning environment. An emphasis on group work ensures that students get to know one another and their instructors well. In addition, a strong cohort model aids in developing solid working relationships and strong friendships. Finally, students may choose to enhance their international education by studying abroad in the summer on the Engaging Asia tour.

Virtually all MBA students come to the university with work experience; the average is four years. About one-third are women; two thirds hold a nonbusiness bachelor's degree; and one-sixth are international students. The program draws students from across the United States and 12 to 15 countries.

Two years of full-time study are needed to earn the minimum of 76 credits required for the degree. See the website (<https://business.uoregon.edu/executive-mba>) for more information and admission requirements.

Accelerated Program

The accelerated master's degree program is intensive, allowing outstanding undergraduate majors in business, economics, or students of the science, technology, engineering, and mathematics (STEM) curriculum from an accredited institution to earn an MBA degree in nine or 15 months by taking 15 courses (a minimum of 45 credits) in three or four terms. Applicants should have a strong overall academic record and significant full-time work experience. Students choose one of the five tracks listed above. See the website (<https://business.uoregon.edu/mba/degree-programs/accelerated>) for more information.

Program Requirements

- Oregon MBA application (<https://business.uoregon.edu/mba/admissions>) (statement of purpose, two professional recommendations, résumé)
- University of Oregon Graduate School application
- GMAT or GRE scores
- Transcripts
- Proof of English language proficiency (TOEFL, IELTS, PTE scores) for applicants whose native language is not English

Master of Science in Finance

302G Peterson Hall
Lillis Business Complex
541-346-8925
msfinfo@uoregon.edu

The master of science in finance is a 12-month degree program with an emphasis on valuation and asset management designed for students who recently graduated with majors in science, technology, engineering, mathematics, business, economics, or equivalent subjects.

The curriculum is designed to provide students with insights from the most advanced theoretical and empirical research in finance while attending quarterly professional development seminars. Through the UO's Cameron Center for Finance and Securities Analysis, students have the opportunity to practice securities analysis and portfolio management in a live environment with access to the Pacific Northwest's financial, banking, and investment industry.

Program Requirements

The program requires an undergraduate degree in science, technology, engineering, mathematics, business, economics, or equivalent subjects. Applications are evaluated holistically; this includes the essay, recommendations, and list of experience—not merely test scores and grades.

The following accomplishments fit the profile for a typical master of finance student:

- GMAT score of 620, GRE score of 310 (not the minimum requirements)

- grade point average of 3.20 on a four-point scale (not the minimum requirement)
- a four-year undergraduate degree

Course Requirements

Students complete the program in 12 months (four terms). The curriculum consists of six core courses plus electives, totaling a minimum of 45 credits. The plan of study for the electives is determined by the student and the program director.

Visit the college's master of science in finance website (<https://business.uoregon.edu/ms-finance>) for more information.

Oregon Executive MBA

109 NW Naito Parkway
Portland, Oregon 97209
503-412-3777
oemba@uoregon.edu (oemba@oemba.uoregon.edu)

The University of Oregon offers the two-year Oregon Executive Master of Business Administration (OEMBA) Program for employed mid- to senior-level executives. Classes are held in Portland every other week. In addition to meeting standard admission criteria, applicants to this program must have substantial managerial experience and corporate sponsorship. Courses are open only to students who apply and are admitted to this program. For more information, visit the website (<https://business.uoregon.edu/executive-mba>). For admission criteria and deadlines, visit the admissions website (<https://business.uoregon.edu/mba/admissions>).

Master of Science in Sports Product Management

109 NW Naito Parkway
Portland, Oregon 97209
503-412-3777
uospm@uoregon.edu

The degree program leading to a master of science in sports product management is designed for experienced professionals looking to advance their careers by learning about the design and manufacture of sports-related products. Students learn from leading industry professionals in the sports and outdoor product industry, while instructors and guest speakers bring a wealth of real-world experience to the classroom. A 50-member advisory board of senior industry executives continually shape the content and direction of the program to align with industry needs. The curriculum is available online or full-time. For more information, visit the website (<https://business.uoregon.edu/spm/masters>). For admission criteria and deadlines, visit the admissions website (<https://business.uoregon.edu/spm/apply>).

Master of Science or Master of Arts

The master of arts (MA) degree in finance, management, marketing, and operations and business analytics and the master of science (MS) degree in management, marketing, and operations and business analytics are awarded exclusively to students who are enrolled in a PhD program. The MA degree requires competence in a second language. The requirements are as follows:

1. Completion of the AACSB International core areas as specified by the department in the Graduate School of Management in which the majority of specialization takes place. For students without academic

preparation in business, completion of the common body of business knowledge usually amounts to satisfying the MBA core courses. The manner in which this requirement is satisfied is determined by the student in consultation with his or her program committee and subject to approval

2. Completion of a minimum of 45 graduate credits beyond the MBA core courses. These should include the following:
 - a. A minimum of 18 credits of course work in the primary area of specialization. A majority of this work should be taken in the college. However, specialization is defined by a subject of study and is not limited to courses offered by one department or by the Graduate School of Management
 - b. A minimum of 12 credits of course work in a secondary area of study either in the Graduate School of Management or in a related field
 - c. A maximum of 15 credits in electives. A maximum of 9 credits of Thesis (503) can be taken at the option of the student and the program committee. For students choosing to complete a thesis, the number of credits taken for the thesis is deducted from the required number of elective credits
 - d. A minimum of 27 graduate credits taken in the Graduate School of Management
3. Approval of the proposed program of study by a program committee of at least two faculty members. At least one faculty member must be from the department in which the majority of specialization courses are taken:
 - a. The composition of the program committee must be approved by the director of doctoral programs
 - b. An approved program of study must be submitted before any courses beyond the common body of business knowledge can be taken
4. If a thesis is undertaken, approval is required by a thesis committee of at least two faculty members. At least one faculty member must be from the department in which the majority of specialization courses is taken
 - a. The composition of the thesis committee must be approved by the director of doctoral programs. The thesis committee may have different members than the program committee
 - b. A thesis proposal must be approved in writing by all members of the thesis committee and submitted to the assistant dean for graduate programs before substantial work is undertaken on the thesis
 - c. In case of disagreement between thesis committee members over the acceptability of the thesis, the issue is resolved by an ad hoc committee of at least three faculty members appointed by the head of the department in which the majority of specialization courses has been taken
5. **Computer Competence.** Details of this requirement appear under **Undergraduate Programs**

Doctoral Programs

Z. Jay Wang, Program Coordinator

385 Lillis Hall
541-346-3622

The focus is financial economics applied to financial management, financial institutions and markets, and includes course work in microeconomics, statistics, and econometrics. Specializations are

corporate finance, corporate governance, managed portfolios and institutional investors, empirical asset pricing.

The student's program must satisfy the requirements of the Graduate School and the following requirements of the Charles H. Lundquist College of Business.

The doctoral program requires four to five years of work while in residence on the Eugene campus.

For more information, visit the website (<https://business.uoregon.edu/phd/concentrations/finance>).

The student's program must satisfy the requirements of the Graduate School and the following requirements of the Lundquist College of Business.

The doctoral program requires four to five years of work while in residence on the Eugene campus.

PhD Degree Requirements

Code	Title	Credits
	Nine doctoral courses ¹	
	Five or more graduate-level statistics courses ²	
	Three graduate-level economics, mathematics, or behavioral science courses ³	

- ¹ The department specifies the courses. At least three courses must be taken at the University of Oregon after admission to the doctoral program.
- ² Grades of mid-B or better are required; none of these courses may be taken pass/no pass. These courses may be taken outside the Lundquist College of Business. At least three courses must be completed at the university after admission to the doctoral program.
- ³ Courses in these areas of study are subject to final approval by the student's advisory committee and the director of doctoral programs. Each course used to meet this area requirement must be passed with a grade of mid-B or better, and at least two courses must be completed at the university after admission to the doctoral program.

Competence in Specialty

Students are expected to master the literature and techniques in their area of concentration, prepare to write an acceptable dissertation, and perform high-quality research. Competence is demonstrated by passing a departmental written comprehensive examination and by successfully completing one or more required research papers. The department specifies the number of required papers. To be eligible to take a comprehensive examination, students must have completed most of the course work required in the area.

Competence in Statistics and Research Methods

If the department requires an examination in statistics and research methods, it is administered and graded by a committee that includes at least two operations and business analytics faculty members appointed by the director of doctoral programs.

Examinations

Students must pass one written comprehensive examination in their area of concentration. Examinations are graded *high pass*, *pass*, or *no pass*. For examinations given in separate and predesignated parts, the grade

may apply to each subpart. All grades are outright; a conditional pass is not permitted.

In the event of failure, a student may be allowed to retake a comprehensive examination or predesignated subpart one time, at the discretion of the department in which the student is majoring. Normally, the examination or predesignated subpart should be retaken during the term following the initial attempt, but it may be taken no sooner than two months after the initial attempt. Failure to pass the comprehensive examination or a subpart on the second attempt results in automatic termination from the PhD program.

Advancement to Candidacy

The student is advanced to candidacy for the PhD degree after satisfying the preceding requirements and upon recommendation by his or her advisory committee to the Lundquist College of Business and to the Graduate School. Advancement must occur no later than three years after the student's entry into the doctoral program.

Dissertation

The student must complete a dissertation embodying the results of research and showing evidence of originality and ability in independent investigation. The dissertation must show mastery of the literature and techniques, be written in creditable literary form, and make a contribution to knowledge.

The student is responsible for formation of a dissertation committee, subject to approval by the Lundquist College of Business and the Graduate School of the university. This committee includes at least three regular faculty members of the college and at least one member from outside the college. The chair of the committee serves as the student's primary dissertation advisor. Before the dissertation topic is accepted by the dissertation committee, the student makes an oral presentation and defense of the research proposal and design. When the topic is accepted by the committee, a copy of the proposal, signed as approved by the committee, is placed in the candidate's file.

The dissertation must be completed within four years of the student's advancement to candidacy. Upon petition to and approval by the PhD program committee and the Graduate School, this period may be extended for one year. Failure to complete the dissertation within this time period invalidates the student's comprehensive examinations and advancement to candidacy. The student must successfully defend the completed dissertation in a public oral examination and defense before the dissertation committee.

Grade Point Average (GPA)

The student must maintain a cumulative GPA of 3.00 or higher in graduate courses.

Termination from Program

A student's participation in the PhD program may be terminated under one or more of the following conditions:

- failure to make satisfactory progress toward advancement to candidacy
- a GPA below 3.00 for two consecutive terms
- failure to complete a dissertation within four years after advancement to candidacy

The decision to terminate will be made by the director of the PhD program after consultation with the PhD coordinator and faculty members of the department in which the student is majoring.

A student dropped from the program is notified in writing, with reasons for termination clearly explained, and a copy of the letter is placed in the student's file. The student has the right to appeal the termination decision by submitting a petition to the senior associate dean for academic affairs.

Waivers

Waiver of any of the above requirements is permitted only in exceptional instances and with the approval of the candidate's program committee, the PhD program committee, and the director of PhD programs. Under no circumstances can requirements of the Graduate School be waived by the Lundquist College of Business.

Courses

FIN 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

FIN 240. Survey of Real Estate. 4 Credits.

Basics of buying, selling, and leasing real estate. Overview of real estate law, commercial and residential brokerage, real estate financing, and real estate administration.

Not open to LCB majors or prebusiness majors with junior standing or above.

FIN 281. Personal Finance. 4 Credits.

Overview of lifetime personal financial strategies. Topics include financial goals and building net worth, major purchasing decisions, credit use, tax planning, retirement, and estate planning.

Not open to LCB majors, prebusiness majors with junior standing or above.

FIN 283. The Stock Market and Investing. 4 Credits.

Investments and the stock market, securities and approaches to security selection, portfolio composition and structure.

Not open to LCB majors, prebusiness majors with junior standing or above, or students who have credit for FIN 380.

FIN 311. Economic Foundations of Competitive Analysis. 4 Credits.

Analysis of market competition and its relation to product cost and pricing decisions by the firm. Students may receive credit for only one of EC 311, FIN 311, or FIN 311H.

Prereq: C- or better in BA 101, BA 240, EC 201, ACTG 211, ACTG 213, MATH 241.

FIN 311H. Economic Foundations of Competitive Analysis. 4 Credits.

Analyzes the competitive structure of markets and industries. Focuses on the relationships among cost, pricing strategy and economic profit in competitive environments. Students may receive credit for only one of EC 311, FIN 311, or FIN 311H.

Prereq: open only to students in the LCB honors program.

FIN 316. Financial Management. 4 Credits.

Corporate financial planning, selection among alternative investment opportunities, analysis of risk, funds acquisition, and long-term financing. Students cannot receive credit for both FIN 316 and FIN 316H.

Prereq: C- or better in BA 101, BA 240, EC 201, ACTG 211, ACTG 213, MATH 241.

FIN 316H. Financial Management. 4 Credits.

Covers the fundamental tools and concepts of finance, including the evaluation of investment opportunities and the relation between risk and return. Students cannot receive credit for both FIN 316 and FIN 316H. Prereq: open only to students in the LCB honors program.

FIN 380. Financial Markets and Investments. 4 Credits.

Financial markets and security investment decisions, analysis of risk and return, portfolio policies for individual and institutional investors, financial instruments. Prereq: FIN 316, OBA 330.

FIN 401. Research: [Topic]. 1-21 Credits.

Repeatable.

FIN 403. Thesis. 1-12 Credits.

Repeatable.

FIN 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

FIN 406. Special Problems: [Topic]. 1-4 Credits.

Repeatable.

FIN 407. Seminar: [Topic]. 4 Credits.

Repeatable.

FIN 409. Practicum: [Topic]. 1-12 Credits.

Repeatable.

FIN 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes.

Prereq: C- or better in FIN 316 or FIN 316H.

FIN 462. Derivative Markets and Financial Institutions. 4 Credits.

Valuation of financial derivatives, methodologies for identifying firms' risk exposures, the role of risk management and financial derivatives in corporate strategy, and analysis of financial institutions. Prereq: FIN 316.

FIN 463. International Finance. 4 Credits.

Analysis of currency exchange rates, balance of payments; management of foreign exchange risk; risk and return in international investment. Prereq: FIN 316.

FIN 464. Commercial Banking. 4 Credits.

Operation and pricing policies of a commercial bank, concentrating on management of institutions that take deposits and make loans and investments through the use of computer-simulated banking operations. Prereq: FIN 316.

FIN 473. Financial Analysis and Valuation. 4 Credits.

Topics include working capital management, advanced capital budgeting, dividend policy, financing policy, business valuation, and corporate acquisitions. Prereq: FIN 380.

FIN 503. Thesis. 1-16 Credits.

Repeatable.

FIN 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes.

FIN 562. Derivative Markets and Financial Institutions. 4 Credits.

Valuation of financial derivatives, methodologies for identifying firms' risk exposures, the role of risk management and financial derivatives in corporate strategy, and analysis of financial institutions. Prereq: FIN 380 or FIN 612.

FIN 564. Commercial Banking. 4 Credits.

Operation and pricing policies of a commercial bank, concentrating on management of institutions that take deposits and make loans and investments through the use of computer-simulated banking operations.

FIN 601. Research: [Topic]. 1-16 Credits.

Repeatable.

FIN 603. Dissertation. 1-16 Credits.

Repeatable.

FIN 604. Internship: [Topic]. 1-9 Credits.

Repeatable.

FIN 605. Reading and Conference: [Topic]. 1-12 Credits.

Repeatable.

FIN 606. Special Problems: [Topic]. 1-9 Credits.

Repeatable.

FIN 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

FIN 608. Special Topics: [Topic]. 1-12 Credits.

Repeatable.

FIN 609. Practicum: [Topic]. 1-9 Credits.

Repeatable.

FIN 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

FIN 612. Fundamentals of Finance. 3 Credits.

Covers the fundamental theories and tools of financial analysis. Topics include valuation, capital budgeting, risk and return, market efficiency, and financial policies. Sequence with FIN 613.

FIN 613. Managerial Economics. 3 Credits.

Covers the fundamental theories and tools of economic and strategic analysis. Topics include demand and supply, pricing strategies, and perfect and imperfect competition. Sequence with FIN 612. Prereq: FIN 612.

FIN 615. Quantitative Methods for Finance. 3 Credits.

Mathematical and statistical tools fundamental to financial analysis; measuring returns and risk, probability models, statistical inference, regression analysis, all with applications to finance.

FIN 671. Corporate Finance and Valuation. 3 Credits.

Application of financial principles to problems of valuation, capital budgeting, and financial policy. Prereq: FIN 612.

FIN 673. Advanced Topics in Corporate Finance. 3 Credits.

Cases dealing with financial analysis, working-capital management, valuation, and firm investment and financing decisions. Prereq: completion of first-year M.B.A. core.

FIN 675. Fixed Income Securities. 3 Credits.

Theoretical, empirical, and institutional aspects of fixed-income securities and their derivatives; application of these tools to managerial decisions in other contexts. Prereq: completion of first-year MBA core.

FIN 683. Concepts of Investments. 3 Credits.

Securities markets; risk-return characteristics of investment media; concepts of security analysis; investment and portfolio strategies of individual and institutional investors. Prereq: completion of first-year M.B.A. core.

FIN 687. Hedge Funds. 3 Credits.

Institutional features and trading strategies of the hedge fund industry; developing trading ideas, evaluating based on historical data or financial statements, and analyzing risk-return tradeoff.

Prereq: FIN 683.

Management

Anne Parmigiani, Department Head
Undergraduate Advising Office
203 Peterson Hall

Department of Management courses prepare students for the challenges of managerial responsibility in private and public organizations. They are useful for students who want to develop general management skills that can be applied in a variety of contexts, ranging from new business startups to global businesses. Management courses also serve students who are concentrating in other areas of business and who recognize the importance of developing management and leadership skills to enhance their chances for career advancement. Courses focus on such critical management and leadership skills as launching new business ventures, negotiation and conflict resolution, managing in dynamic and changing environments, and international management.

The entrepreneurship concentration prepares students for careers in entrepreneurially driven firms. Examples include new and rapidly growing firms, technology-oriented firms, and family businesses. Special attention is given to venture creation, the unique problems encountered by firms that are growing, and the way sound business principles and strategies can be adapted to fit this environment.

Faculty

Eric Boggs, instructor; director, honors program. BA, 2001, Lewis and Clark College; MA, 2010, Pacific; MS, 2011, Oregon. (2017)

Ryan Cabinte, instructor. BA, 1996, Yale; JD, 2001, Boston; MBA, 2010, Presidio Graduate School. (2017)

Neil Chinn, instructor (communications and leadership, business strategy, human resource management). BA, 1973, Leicester; certificate of higher education, 1974, Loughborough; MS, 1979, MBA, 1992, Oregon. (2013)

Allan G. Cochrane, instructor (entrepreneurship, venture planning, leadership development). BS, 1970, Roberts Wesleyan. (2008)

Michael Crooke, Avamere Professor of Practice. BS, MBA, Humboldt State; PhD, 2008, Claremont Graduate. (2012)

Thomas L. Durant, senior instructor (global business management; market, product, and technology development). BS, 1972, MBA, 1974, Southern California; MA, 2006, George Fox Evangelical Seminary. (2010)

David Dusseau, senior instructor. BS, 1975, Ohio State; MBA, 1985, PhD, 1992, Oregon. (1984)

David Garten, instructor. BS, 1982, Trinity College; MS, 1984, Rensselaer Polytechnic Institute; MBA, 1987, Massachusetts Institute of Technology. (2009)

Kate A. Harmon, instructor (entrepreneurship, venture planning); undergraduate program manager, Lundquist Center for Entrepreneurship. BFA, BA, 1993, MFA, 1997, Ohio. (2015)

Ralph A. Heidl, associate professor (collaborative networks, innovation management). MS, 1994, MS, 2000, Pennsylvania State; PhD, 2010, Washington (Seattle). (2015)

Elizabeth Hjelm, senior instructor, Edwin E. and June Woldt Cone Professor of Marketing (benchmarking and best practice, financial process analysis and redesign). BA, 1980, Notre Dame; MMgmt, 1982, Northwestern. (2003)

Charles Kalnbach, senior instructor (generations in the workplace, Myers-Briggs type indicator). BA, 1991, Thomas Edison State; MS, 1995, Indiana, Bloomington; EdD, 2008, Nova Southeastern. (2003)

Lauren Lanahan, assistant professor (innovation, business policy, entrepreneurship). BA, 2006, Reed College; MA, 2013, PhD, 2015, North Carolina, Chapel Hill. (2015)

Nathan Lillegard, instructor (early-stage finance and operations, new venture development); program manager, Lundquist Center for Entrepreneurship. BA, 1998, MBA, 2006, Oregon. (2012)

Reut Livne-Tarandach, assistant professor (compassion, organizational change processes, creativity). BA, 2000, Ben-Gurion; MSc, 2004, Technion–Israel Institute of Technology; PhD, 2012, Boston College. (2012)

Izabel Loinaz, instructor (greening sports and events); director, Center for Sustainable Business Practices. BA, 1997, San Francisco State; MBA, 2012, Presidio Graduate School. (2015)

Farhad Malekafzali, instructor. PhD, 1994, Wisconsin-Madison. (2012)

Mohan Nair, instructor. BS, 1980, MS, 1982, Oregon. (2015)

Andrew Joel Nelson, associate professor (commercialization of university research, diffusion networks and network analysis); Randall C. Papé Chair in Entrepreneurship and Innovation; academic director, Lundquist Center for Entrepreneurship; associate vice president, entrepreneurship and innovation. BA, 1998, Stanford; MSc, 2000, Oxford; PhD, 2007, Stanford. (2008)

Anne Parmigiani, Tykeson Professor (firm capabilities, interfirm relationships). BS, 1987, MBA, 1996, Pennsylvania State; PhD, 2003, Michigan, Ann Arbor. (2004)

David Preston, instructor. BA, 1977, Kalamazoo College; MBA, 1983, Chicago; PhD, 1997, Oregon. (2013)

Michael V. Russo, professor (corporate policy and strategy, environmental management); academic director, Center for Sustainable Business Practices. BS, 1979, Columbia; MS, 1980, Stanford; MBA, 1986, PhD, 1989, California, Berkeley. (1989)

Ronald Severson, senior instructor (cross-cultural negotiation, cultural studies). BA, 1979, Willamette; MA, 1987, Oregon; PhD, 1999, Utah. (1996)

Joshua Skov, instructor (life-cycle assessment, clean energy finance, carbon accounting). BA, 1992, Yale; MA, 1994, Washington (Seattle); MA, 1997, California, Berkeley. (2009)

William H. Starbuck, courtesy professor in residence (decision-making, organizational learning). AB, 1956, Harvard; MS, 1959, PhD, 1964, Carnegie Institute of Technology. (2005)

Tina Starr, senior instructor (business management, expatriates). BSc, 2000, Derby; MSc, 2001, PhD, 2006, Nottingham. (2011)

Jeffrey J. Stolle, senior instructor (ethics, critical thinking). BA, 1990, St. Thomas (Minnesota); MA, 1994, Vanderbilt; PhD, 2001, Oregon. (2007)

David T. Wagner, associate professor (mood and emotion, sleep and work); coordinator, doctoral program. BS, 2002, MAcc, 2004, Brigham Young; PhD, 2009, Michigan State. (2014)

Ed Warnock, instructor. BS, 1968, Arizona; MA, 1993, Antioch. (2011)

Nicole L. Wilson, instructor (personality, individual differences, self-regulation). BA, 1999, MS, 2001, Oregon; PhD, 2008, Washington (Seattle). (2015)

Peter A. Younkin, assistant professor. BA, 1999, Columbia; PhD, 2010, California, Berkeley. (2018)

Kate P. Zipay, assistant professor. BS, 2008, Florida State; MAcc, 2009, South Florida; PhD, 2018, Georgia. (2018)

Emeriti

Warren B. Brown, professor emeritus. BS, 1955, Colorado; MS, 1957, Stanford; MS, 1959, PhD, 1962, Carnegie-Mellon. (1967)

Alan Downing Meyer, professor emeritus. BA, 1968, MBA, 1970, Washington (Seattle); PhD, 1978, California, Berkeley. (2009)

Peter K. Mills, professor emeritus. BS, 1970, MBA, 1971, California State, Long Beach; PhD, 1978, Stockholm; PhD, 1980, California, Irvine. (1995)

Richard T. Mowday, professor emeritus. BS, 1970, San Jose; MS, 1972, PhD, 1975, California, Irvine. (1977)

Richard M. Steers, professor emeritus. BA, 1967, Whittier; MBA, 1968, Southern California; PhD, 1973, California, Irvine. (1975)

James R. Terborg, professor emeritus; James H. Warsaw Academic Director, James H. Warsaw Sports Marketing Center. BA, 1970, Calvin; MS, 1972, Eastern Michigan; PhD, 1975, Purdue. (1980)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts: Business Administration**
- **Bachelor of Science: Business Administration**
- **Concentration in Entrepreneurship**
- **Minors**

Undergraduate Programs

Academic Requirements

To earn an undergraduate degree in the Lundquist College of Business, a student must be an admitted major in good academic standing with the college and the university. Two sets of requirements must be completed: general university requirements and college requirements.

The college is firmly committed to an undergraduate degree program in business based on a solid foundation in the arts and sciences. Students may not earn two majors in the Lundquist College of Business; in other words, a student who has an undergraduate degree in business administration cannot earn another undergraduate degree from the college. See the **Bachelor's Degree Requirements** section of this

catalog for specific requirements for bachelor's degrees and for general-education and university requirements.

Students must satisfy the upper-division business core and major requirements in effect when they are admitted as majors.

For a more detailed explanation of requirements for majors, students should pick up the undergraduate degree programs handout in the Advising Office.

Business Premajor Admission

New students planning to earn a bachelor's degree in the Lundquist College of Business typically enter the university as business premajors. Transfer students and university students from other majors may become business premajors by submitting a Request for Addition or Deletion Major form, available in the Advising Office. Students who seek premajor status in business should meet with an advisor in the college if their GPA is below 3.00. Business premajors typically are not eligible to take most 300- and 400-level business courses. Business premajor status does not guarantee admission to the accounting or business administration major.

Admitted business premajors typically spend the first two years fulfilling general-education and premajor requirements.

Premajor Requirements

- **Junior Standing.** Course work of 90 or more credits must be complete.
- **Cumulative GPA Requirement.** Guaranteed admission requires a 3.00 cumulative grade point average in college course work, including transfer work. The college includes all course work when calculating the cumulative GPA for admission to the major.
- **Holistic Review.** Students who have taken all required business premajor course work but fall slightly below the minimum GPA requirements may be considered for admission under a holistic review process. For more details, interested students may visit an academic advisor in 203 Peterson Hall.
- **English Competence.** International students must have a Test of English as a Foreign Language (TOEFL) score of at least 575 (paper-based test), 233 (computer-based test), 89 (internet-based test), an International English Language Testing System (IELTS) score of 7.0, or have completed the Academic English for International Students (AEIS) program.

First-Year Direct Admission

Direct admission is only offered to first-year students who are entering in the fall term and list their intended major as business administration. The University of Oregon considers a number of factors when making direct admissions decisions, including high school GPA, strength of academic course work, test scores, and ability to enhance the diversity of the university. Students selected for direct admission will need to complete the lower-division course requirements but will not need to apply to the major like other students interested in business administration or accounting.

Business Premajor Courses

Premajor core business courses must be taken at the University of Oregon.

In addition, international students are required to take Academic English for International Students (AEIS) courses or produce English language

proficiency test scores (575 on the TOEFL paper-based test, 89 on the TOEFL internet-based test, or 7.0 in the IELTS).

Code	Title	Credits
Core Courses ¹		
BA 101	Introduction to Business	4
ACTG 211	Introduction to Accounting I	4
ACTG 213	Introduction to Accounting II	4
EC 201	Introduction to Economic Analysis: Microeconomics	4
EC 202	Introduction to Economic Analysis: Macroeconomics	4
Additional Courses ²		
BA 240	Managing Business Information	4
MATH 241	Calculus for Business and Social Science I	4
MATH 243	Introduction to Methods of Probability and Statistics	4
Select one of the following:		8
WR 121 & WR 122	College Composition I and College Composition II	
WR 121 & WR 123	College Composition I and College Composition III	
Total Credits		40

¹ A 3.00 cumulative GPA (including both UO and transfer course work) and a minimum grade of C– in core courses are required for guaranteed admission to the major. Premajor requirements must be taken for letter grades. The university limits retaking of courses in which a P or mid-C or better is earned; a petition is required. When repeating a core course, only the second grade is used in calculating the core GPA. Core courses may be repeated only once (including marks of W, N, F, D, C–).

² Must be taken for letter grades and passed with grades of C– or better.

Application to the Major

Students seeking admission through the standard pathway must submit a formal application for admission to the major one term prior to enrolling in upper-division business courses. Typically this takes place in the term they are completing their lower-division requirements. To be eligible for admission as a major, a student must apply before the term deadline. Applications are due the first week of the term for admission the following term. Applications are not accepted during summer session. Students who are completing their final term of business premajor requirements may submit applications.

The following documents are required for admission:

1. Completed application form (<https://business.uoregon.edu/ug/apply/major>)
2. Academic transcripts or proof of enrollment
3. A cover letter and résumé
4. Short answer essays

Bachelor of Arts in Business Administration Degree Requirements

Upper-Division Core

Code	Title	Credits

Definitions, Limitations, and Policies

Transfer Students

The sequential nature of this program requires careful academic planning. Students who want to transfer to the college are encouraged to meet with an advisor in the Lundquist College of Business early in their academic careers. Students are admitted to the university as business premajors. Once admitted, they may apply for major status in accordance with the procedure described. Applications are due the first Friday of the term for admission the following term.

Second Bachelor's Degree

A student who has a bachelor's or master's degree in a field of business administration may not earn a second bachelor's degree in business. Students who have earned a nonbusiness degree and want a second degree in a field of business must be admitted to the university as postbaccalaureate nongraduate students. Second-degree candidates must meet the same admission requirements and follow the same application process described.

Students retain business premajor status until admission requirements are completed or waived because of completed course work. Second-degree students must complete the same upper-division requirements as first-degree candidates. The Second Bachelor's Degree section of this catalog, under **Bachelor's Degree Requirements**, lists university requirements for a second bachelor's degree; the Undergraduate Advising office has information about Lundquist College requirements.

Residence Requirement

Students must complete a minimum of 44 upper-division credits in regularly scheduled Lundquist College of Business courses. With the department head's approval, credits may be transferred from other accredited institutions, independent study, or approved courses in other departments. Accounting majors must complete all upper-division accounting courses at the University of Oregon.

Grading

Premajor required courses and upper-division courses must be taken for letter grades and passed with grades of C– or better. See the **Registration and Academic Policies** section of this catalog for an explanation of the university's grading systems.

Upper-Division Courses

Courses for the minor are open to nonmajors, and courses for the certificate in international business communication are open to students whose native language is not English. Only admitted majors in the Lundquist College of Business may enroll in all other 300- and 400-level business courses.

Continuous Progress

Students who do not attend the university for an extended period of time after being admitted as a major may be required to reapply for admission and fulfill current major requirements if the *UO Catalog* for the last year of attendance has expired. See Catalog Expiration and Requirements Policies in the **Reader's Guide to the Catalog** (p. 3).

Business Administration Minor

All professions and organizations, public and private, operate according to business principles. Earning a minor in business administration prepares students to participate in organizational conversations and become leaders within their future professions. The minor in

business administration is open to students from all majors other than business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in business administration online at the college's website, where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Twelve upper-division credits must be taken in the Lundquist College of Business. Upper-division business courses must be taken for letter grades. Students must earn a C– or better in all courses taken for a letter grade to fulfill minor requirements. When minor requirements have been completed and notification of application for a degree has been received from the Office of the Registrar, the student is cleared for the minor.

Code	Title	Credits
BA 101	Introduction to Business ¹	4
BA 215	Accounting: Language of Business Decisions ²	4
BA 315	Economy, Industry, and Competitive Analysis	4
BA 316	Management: Creating Value through People	4
BA 317	Marketing: Creating Value for Customers	4
BA 318 or FIN 316	Finance: Creating Value through Capital ³ Financial Management	4
Total Credits		24

¹ Must be taken before the other required minor courses.

² Must be taken before Finance: Creating Value through Capital (BA 318).

³ Financial Management (FIN 316) may be substituted by economics majors who have maintained a 3.00 GPA.

Entrepreneurship Minor

The minor in entrepreneurship is intended for nonbusiness students who want to learn about innovation processes and the managerial and leadership skills required to create a new venture. The entrepreneurship minor gives students the opportunity to envision, develop, test, and build a for-profit or nonprofit venture working within an interdisciplinary framework of exploration and self-discovery. The minor in entrepreneurship is open to students from all majors except business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in entrepreneurship online at the college's website (<https://business.uoregon.edu/ug/minors/entrepreneurship>), where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Twelve upper-division credits must be taken in the Lundquist College of Business. Upper-division business courses must be taken for letter grades. Students must earn a C– or better in all courses taken for a letter grade to fulfill minor requirements. When minor requirements have been completed and notification of application for a degree has been received from the Office of the Registrar, the student is cleared for the minor.

ACTG 340	Accounting for Entrepreneurs	4
Two elective courses from an approved list		8
Total Credits		24

¹ Must be taken before the other required minor courses

Sports Business Minor

The sports business minor develops skills in teamwork, writing, and oral communications with an emphasis on providing core business competencies to those pursuing sports industry–related careers. The minor is intended to provide baseline business skills and knowledge to students who are not intending to pursue a sports business career per se, but rather are pursuing sports-related professional paths in which business acumen is a supporting skill (e.g., sports journalist, sports psychologist, sportswear designer). The minor in sports business is open to students from all majors except business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in sports business online at the college's website (<https://business.uoregon.edu/ug/minors/sports-business>), where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Twelve upper-division credits must be taken in the Lundquist College of Business. Upper-division business courses must be taken for letter grades. Students must earn a C– or better in all courses taken for a letter grade to fulfill minor requirements. When minor requirements have been completed and notification of application for a degree has been received from the Office of the Registrar, the student is cleared for the minor.

The Charles H. Lundquist College of Business MBA degree embodies the college’s emphasis on interdisciplinary study, experiential learning, research excellence, and a supportive learning environment.

True to this interdisciplinary focus, the MBA curriculum consists of five tracks: advanced strategy and leadership, innovation and entrepreneurship, finance and securities analysis, sports business, and sustainable business practices. Building on a common core of foundational courses in accounting, decision sciences, finance, management, marketing, and operations and business analytics, students choose one of these curricular tracks when applying to the program.

Four of the tracks of the MBA curriculum are aligned with the college’s centers—the Lundquist Center for Entrepreneurship, the Cameron Center for Finance and Securities Analysis, the Center for Sustainable Business Practices, and the James H. Warsaw Sports Marketing Center. The centers not only promote research collaboration among faculty members from different departments but they also facilitate student interactions with industry professionals and provide practical, real-world learning opportunities. These include internships, business planning ventures, competitions, and one- or two-term consulting projects in the second year.

Strong faculty involvement and the state-of-the art facilities of the Lillis Business Complex create an ideal learning environment. An emphasis on group work ensures that students get to know one another and their instructors well. In addition, a strong cohort model aids in developing solid working relationships and strong friendships. Finally, students may choose to enhance their international education by studying abroad in the summer on the Engaging Asia tour.

Virtually all MBA students come to the university with work experience; the average is four years. About one-third are women; two thirds hold a nonbusiness bachelor’s degree; and one-sixth are international students. The program draws students from across the United States and 12 to 15 countries.

Two years of full-time study are needed to earn the minimum of 76 credits required for the degree. See the website (<https://business.uoregon.edu/executive-mba>) for more information and admission requirements.

Accelerated Program

The accelerated master’s degree program is intensive, allowing outstanding undergraduate majors in business, economics, or students of the science, technology, engineering, and mathematics (STEM) curriculum from an accredited institution to earn an MBA degree in nine or 15 months by taking 15 courses (a minimum of 45 credits) in three or four terms. Applicants should have a strong overall academic record and significant full-time work experience. Students choose one of the five tracks listed above. See the website (<https://business.uoregon.edu/mba/degree-programs/accelerated>) for more information.

Program Requirements

- Oregon MBA application (<https://business.uoregon.edu/mba/admissions>) (statement of purpose, two professional recommendations, résumé)
- University of Oregon Graduate School application

- GMAT or GRE scores
- Transcripts
- Proof of English language proficiency (TOEFL, IELTS, PTE scores) for applicants whose native language is not English

Master of Science in Finance

302G Peterson Hall
Lillis Business Complex
541-346-8925
msfinfo@uoregon.edu

The master of science in finance is a 12-month degree program with an emphasis on valuation and asset management designed for students who recently graduated with majors in science, technology, engineering, mathematics, business, economics, or equivalent subjects.

The curriculum is designed to provide students with insights from the most advanced theoretical and empirical research in finance while attending quarterly professional development seminars. Through the UO's Cameron Center for Finance and Securities Analysis, students have the opportunity to practice securities analysis and portfolio management in a live environment with access to the Pacific Northwest's financial, banking, and investment industry.

Program Requirements

The program requires an undergraduate degree in science, technology, engineering, mathematics, business, economics, or equivalent subjects. Applications are evaluated holistically; this includes the essay, recommendations, and list of experience—not merely test scores and grades.

The following accomplishments fit the profile for a typical master of finance student:

- GMAT score of 620, GRE score of 310 (not the minimum requirements)
- grade point average of 3.20 on a four-point scale (not the minimum requirement)
- a four-year undergraduate degree

Course Requirements

Students complete the program in 12 months (four terms). The curriculum consists of six core courses plus electives, totaling a minimum of 45 credits. The plan of study for the electives is determined by the student and the program director.

Visit the college's master of science in finance website (<https://business.uoregon.edu/ms-finance>) for more information.

Oregon Executive MBA

109 NW Naito Parkway
Portland, Oregon 97209
503-412-3777
oemba@uoregon.edu (oemba@oemba.uoregon.edu)

The University of Oregon offers the two-year Oregon Executive Master of Business Administration (OEMBA) Program for employed mid- to senior-level executives. Classes are held in Portland every other week. In addition to meeting standard admission criteria, applicants to this program must have substantial managerial experience and corporate sponsorship. Courses are open only to students who apply and are admitted to this program. For more information, visit the website (<https://>

business.uoregon.edu/executive-mba). For admission criteria and deadlines, visit the admissions website (<https://business.uoregon.edu/mba/admissions>).

Master of Science in Sports Product Management

109 NW Naito Parkway
Portland, Oregon 97209
503-412-3777
uospm@uoregon.edu

The degree program leading to a master of science in sports product management is designed for experienced professionals looking to advance their careers by learning about the design and manufacture of sports-related products. Students learn from leading industry professionals in the sports and outdoor product industry, while instructors and guest speakers bring a wealth of real-world experience to the classroom. A 50-member advisory board of senior industry executives continually shape the content and direction of the program to align with industry needs. The curriculum is available online or full-time. For more information, visit the website (<https://business.uoregon.edu/spm/masters>). For admission criteria and deadlines, visit the admissions website (<https://business.uoregon.edu/spm/apply>).

Master of Science or Master of Arts

The master of arts (MA) degree in finance, management, marketing, and operations and business analytics and the master of science (MS) degree in management, marketing, and operations and business analytics are awarded exclusively to students who are enrolled in a PhD program. The MA degree requires competence in a second language. The requirements are as follows:

1. Completion of the AACSB International core areas as specified by the department in the Graduate School of Management in which the majority of specialization takes place. For students without academic preparation in business, completion of the common body of business knowledge usually amounts to satisfying the MBA core courses. The manner in which this requirement is satisfied is determined by the student in consultation with his or her program committee and subject to approval
2. Completion of a minimum of 45 graduate credits beyond the MBA core courses. These should include the following:
 - a. A minimum of 18 credits of course work in the primary area of specialization. A majority of this work should be taken in the college. However, specialization is defined by a subject of study and is not limited to courses offered by one department or by the Graduate School of Management
 - b. A minimum of 12 credits of course work in a secondary area of study either in the Graduate School of Management or in a related field
 - c. A maximum of 15 credits in electives. A maximum of 9 credits of Thesis (503) can be taken at the option of the student and the program committee. For students choosing to complete a thesis, the number of credits taken for the thesis is deducted from the required number of elective credits
 - d. A minimum of 27 graduate credits taken in the Graduate School of Management
3. Approval of the proposed program of study by a program committee of at least two faculty members. At least one faculty member must be

from the department in which the majority of specialization courses are taken:

- a. The composition of the program committee must be approved by the director of doctoral programs
 - b. An approved program of study must be submitted before any courses beyond the common body of business knowledge can be taken
4. If a thesis is undertaken, approval is required by a thesis committee of at least two faculty members. At least one faculty member must be from the department in which the majority of specialization courses is taken
- a. The composition of the thesis committee must be approved by the director of doctoral programs. The thesis committee may have different members than the program committee
 - b. A thesis proposal must be approved in writing by all members of the thesis committee and submitted to the assistant dean for graduate programs before substantial work is undertaken on the thesis
 - c. In case of disagreement between thesis committee members over the acceptability of the thesis, the issue is resolved by an ad hoc committee of at least three faculty members appointed by the head of the department in which the majority of specialization courses has been taken
5. **Computer Competence.** Details of this requirement appear under **Undergraduate Programs**

Doctoral Program

David Wagner, Program Coordinator

473 Lillis Hall
541-346-3413

Faculty research encompasses organizational change, supply-chain relationships, technology strategy, entrepreneurship, and sustainability.

The student's program must satisfy the requirements of the Graduate School and the following requirements of the Lundquist College of Business.

The doctoral program requires four to five years of work while in residence on the Eugene campus.

For more information, visit the website (<https://business.uoregon.edu/phd>).

The student's program must satisfy the requirements of the Graduate School and the following requirements of the Lundquist College of Business.

The doctoral program requires four to five years of work while in residence on the Eugene campus.

PhD Degree Requirements

Code	Title	Credits
	Nine doctoral courses ¹	
	Five or more graduate-level statistics courses ²	
	Three graduate-level economics, mathematics, or behavioral science courses ³	

¹ The department specifies the courses. At least three courses must be taken at the University of Oregon after admission to the doctoral program.

- ² Grades of mid-B or better are required; none of these courses may be taken pass/no pass. These courses may be taken outside the Lundquist College of Business. At least three courses must be completed at the university after admission to the doctoral program.
- ³ Courses in these areas of study are subject to final approval by the student's advisory committee and the director of doctoral programs. Each course used to meet this area requirement must be passed with a grade of mid-B or better, and at least two courses must be completed at the university after admission to the doctoral program.

Competence in Specialty

Students are expected to master the literature and techniques in their area of concentration, prepare to write an acceptable dissertation, and perform high-quality research. Competence is demonstrated by passing a departmental written comprehensive examination and by successfully completing one or more required research papers. The department specifies the number of required papers. To be eligible to take a comprehensive examination, students must have completed most of the course work required in the area.

Competence in Statistics and Research Methods

If the department requires an examination in statistics and research methods, it is administered and graded by a committee that includes at least two operations and business analytics faculty members appointed by the director of doctoral programs.

Examinations

Students must pass one written comprehensive examination in their area of concentration. Examinations are graded *high pass*, *pass*, or *no pass*. For examinations given in separate and predesignated parts, the grade may apply to each subpart. All grades are outright; a conditional pass is not permitted.

In the event of failure, a student may be allowed to retake a comprehensive examination or predesignated subpart one time, at the discretion of the department in which the student is majoring. Normally, the examination or predesignated subpart should be retaken during the term following the initial attempt, but it may be taken no sooner than two months after the initial attempt. Failure to pass the comprehensive examination or a subpart on the second attempt results in automatic termination from the PhD program.

Advancement to Candidacy

The student is advanced to candidacy for the PhD degree after satisfying the preceding requirements and upon recommendation by his or her advisory committee to the Lundquist College of Business and to the Graduate School. Advancement must occur no later than three years after the student's entry into the doctoral program.

Dissertation

The student must complete a dissertation embodying the results of research and showing evidence of originality and ability in independent investigation. The dissertation must show mastery of the literature and techniques, be written in creditable literary form, and make a contribution to knowledge.

The student is responsible for formation of a dissertation committee, subject to approval by the Lundquist College of Business and the Graduate School of the university. This committee includes at least three regular faculty members of the college and at least one member from outside the college. The chair of the committee serves as the student's

primary dissertation advisor. Before the dissertation topic is accepted by the dissertation committee, the student makes an oral presentation and defense of the research proposal and design. When the topic is accepted by the committee, a copy of the proposal, signed as approved by the committee, is placed in the candidate's file.

The dissertation must be completed within four years of the student's advancement to candidacy. Upon petition to and approval by the PhD program committee and the Graduate School, this period may be extended for one year. Failure to complete the dissertation within this time period invalidates the student's comprehensive examinations and advancement to candidacy. The student must successfully defend the completed dissertation in a public oral examination and defense before the dissertation committee.

Grade Point Average (GPA)

The student must maintain a cumulative GPA of 3.00 or higher in graduate courses.

Termination from Program

A student's participation in the PhD program may be terminated under one or more of the following conditions:

- failure to make satisfactory progress toward advancement to candidacy
- a GPA below 3.00 for two consecutive terms
- failure to complete a dissertation within four years after advancement to candidacy

The decision to terminate will be made by the director of the PhD program after consultation with the PhD coordinator and faculty members of the department in which the student is majoring.

A student dropped from the program is notified in writing, with reasons for termination clearly explained, and a copy of the letter is placed in the student's file. The student has the right to appeal the termination decision by submitting a petition to the senior associate dean for academic affairs.

Waivers

Waiver of any of the above requirements is permitted only in exceptional instances and with the approval of the candidate's program committee, the PhD program committee, and the director of PhD programs. Under no circumstances can requirements of the Graduate School be waived by the Lundquist College of Business.

Certificate in Global Business

Lundquist College of Business students may earn a certificate in global business; study abroad is highly recommended. In addition, two years of college-level language study or completion of a preapproved study-abroad or international internship program is required. For more information, visit the website (<https://business.uoregon.edu/ug/certificates/global-business>).

Courses

MGMT 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

MGMT 225. Introduction to Entrepreneurship. 4 Credits.

Understanding of the historical and socio-economic context of entrepreneurship and how entrepreneurial ecosystems function and grow; fundamentals of entrepreneurship and business model development.

MGMT 250. . 4 Credits.

Examination of the challenges and opportunities that the sustainability imperative presents to business. Focus on discussion of specific cases and pertinent issues to promote learning.

MGMT 311. Managing People in Organizations. 4 Credits.

Students learn the theories, empirical evidence, and best practices for managing people at work. Students cannot receive credit for both MGMT 311 and MGMT 311H.

Prereq: MATH 241, BA 308 or BA 308H

MGMT 311H. Managing People in Organizations. 4 Credits.

Students learn the theories, empirical evidence, and best practices for managing people at work. Students cannot receive credit for both MGMT 311 and MGMT 311H. Sophomore standing required.

Prereq: MATH 241, BA 308 or BA 308H

MGMT 335. Launching New Ventures. 4 Credits.

Skills, behaviors, and knowledge necessary for creating and growing new ventures. Evaluating opportunities, developing growth strategies, obtaining venture financing, intellectual property, and building a management team.

Prereq: MGMT 321.

MGMT 401. Research: [Topic]. 1-21 Credits.

Repeatable.

MGMT 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

MGMT 406. Special Problems: [Topic]. 1-4 Credits.

Repeatable.

MGMT 407. Seminar: [Topic]. 4 Credits.

Repeatable.

MGMT 409. Practicum: [Topic]. 1-21 Credits.

Repeatable.

MGMT 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes. Recent topics include Strategic Environmental Management, Technology and Innovation Management.

Prereq: MGMT 321 or MGMT 321H.

MGMT 415. Human Resources Management. 4 Credits.

Management of employee relations by an organization. Hiring and developing a productive work force in the context of the legal and competitive environment.

Prereq: MGMT 321.

MGMT 416. Organizational Development and Change Management. 4 Credits.

Organizational leaders face an accelerating pace of change in information technology, markets, and consumers. Focuses on how leaders create and sustain these organizational changes.

Prereq: BA 352, MGMT 321.

MGMT 417. Negotiation Strategies. 4 Credits.

Introduction to negotiation theory, distributive and integrative bargaining techniques, and alternative dispute resolution. Uses workshop format for in-class negotiation simulations.

Prereq: MGMT 321.

MGMT 420. Managing in a Global Economy. 4 Credits.

Economic, political and cultural challenges facing international managers. Topics include developing competitive global strategies and organizations, international negotiations, building strategic alliances, cross-cultural teams, and international staffing.

Prereq: MGMT 321 or equivalent.

MGMT 443. Life Cycle Assessment. 4 Credits.

Build foundations in technical sustainability analysis serving business strategy and operations. Learn tools and skills for firm- and product-level analysis.

Prereq: BA 101, MGMT 250.

MGMT 455. Implementing Entrepreneurial Strategies. 4 Credits.

Focuses on turning an idea into a serious business venture. Students research new business opportunities and become skilled in developing business tools and processes to carry out venture launch strategies.

Prereq: ACTG 340, MGMT 335, MKTG 445.

MGMT 503. Thesis. 1-16 Credits.

Repeatable.

MGMT 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes. Recent topics include Strategic Environmental Management, Technology and Innovation Management.

MGMT 543. Life Cycle Assessment. 4 Credits.

Build foundations in technical sustainability analysis serving business strategy and operations. Learn tools and skills for firm- and product-level analysis.

MGMT 601. Research [Topic]. 1-16 Credits.

Repeatable.

MGMT 603. Dissertation. 1-16 Credits.

Repeatable.

MGMT 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

MGMT 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

MGMT 608. Special Topics: [Topic]. 1-16 Credits.

Repeatable.

MGMT 609. Practicum: [Topic]. 1-16 Credits.

Repeatable.

MGMT 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable when the topic changes. A recent topic is Sustainable Business Development.

MGMT 612. Managing Individuals and Organizations. 3 Credits.

Design of high-performance organizations and internal systems. Analysis of team dynamics and group decision-making. Study of individual cognitive and leadership styles.

MGMT 614. Strategic Management. 3 Credits.

Analysis of industries and companies, development of competitive and cooperative strategies, analysis of the special demands of alternative social, technological, and international contexts.

MGMT 615. Leadership. 3 Credits.

Development of skills managers need to be effective leaders in organizations, including communicating, problem-solving, influencing, motivating, delegating, and resolving conflict.

MGMT 620. Managing Global Business. 3 Credits.

Focuses on the problems of operating across multiple political and cultural boundaries. Possible topics include corporate strategy, the role of multinational corporations, and international joint ventures.

MGMT 623. Negotiation. 3 Credits.

Negotiation theory including distributive and integrative bargaining techniques, economic complements, game theory, and alternative dispute resolution. Extensive in-class negotiation simulations.

MGMT 625. New Venture Planning. 3 Credits.

Students identify and research a business opportunity; develop and present a professional start-up business plan that includes market, competitor, cash flow, and financial analyses.

MGMT 635. Opportunity Recognition. 3 Credits.

Introduces the fundamentals of entrepreneurship, providing the tools necessary to successfully identify a true opportunity and to start and develop a new organization. Open only to MBA and MActg majors.

MGMT 640. Sustainable Business Development. 3 Credits.

Focuses on corporate environmental management, drawing on economic and policy models, strategic analysis, and use of business cases. Issues facing small and mid-sized companies stressed.

MGMT 641. Industrial Ecology. 3 Credits.

Takes a systems approach to the design and manufacture of products and delivery of services with minimized ecological impact.

MGMT 690. Management Proseminar. 1 Credit.

Contemporary issues in management research. Includes visiting speakers, resident faculty members, and doctoral students discussing their research.

Marketing

T. Bettina Cornwell, Department Head

Undergraduate Advising Office
203 Peterson Hall

The Department of Marketing provides undergraduates with concentration areas in marketing and sports business.

The marketing concentration provides preparation for careers in marketing management. Examples of such careers include advertising, social media, professional selling, distribution, and marketing research. Special attention is given to the contributions of the social sciences and of quantitative methods to the study of marketing. The program includes courses on marketing research and strategy, marketing communications, and consumer behavior.

The sports business concentration addresses the use of sports to market goods and services. The successful sports marketer must

understand business principles and have a strong sense of how value is created through marketing programs tied to athletes, teams, leagues, and organizations. The concentration presents a rigorous academic curriculum in such areas as sponsorship, sports law, and communications while paying close attention to industry practices and trends. Students who choose this concentration prepare for careers in team marketing, sponsor relations, event marketing, and league operations.

Faculty

Joshua T. Beck, assistant professor (business strategy, international marketing). BA, 2007, California State; MS, 2012, PhD, 2014, Washington (Seattle). (2016)

Troy H. Campbell, assistant professor (marketing communications, consumer behavior, psychology). BA, 2009, California, Irvine; PhD, 2015, Duke. (2015)

John Clithero, assistant professor. BA, 2005, Pomona College; MA, 2007, PhD, 2011, Duke. (2018)

T. Bettina Cornwell, professor (advertising, corporate sponsorship), Judy and Hugh Oliphant Chair in Sports Business; academic director, James H. Warsaw Sports Marketing Center. BA, 1981, Florida State; MBA, 1983, PhD, 1988, Texas, Austin. (2010)

Kay Crider, instructor (business law, environmental law). BA, 1986, California, Santa Barbara; JD, 1989, Illinois Institute of Technology. (2010)

Yoav Dubinsky, instructor (sports marketing, place branding, public diplomacy). BA, 2006, MA, 2008, Tel Aviv; MA, 2011, Peloponnese; PhD, 2015, Tennessee. (2018)

Joshua A. Gordon, senior instructor (strategy, consensus building); director, minors program and undergraduate sports business; undergraduate program manager, James H. Warsaw Sports Marketing Center. BA, 1995, Massachusetts, Amherst; MA, 2005, Massachusetts, Boston; JD, 2008, Suffolk. (2013)

Conor M. Henderson, assistant professor (marketing strategy). BA, 2008, Gonzaga; MS, 2010, PhD, 2013, Washington (Seattle). (2013)

Noelle Nelson, assistant professor. BS, 2006, PhD, 2012, Minnesota, Twin Cities. (2008)

Linda L. Price, professor (brand management, consumer behavior); Philip H. Knight Chair. BA, 1974, MBA, 1976, Wyoming; PhD, 1983, Texas, Austin. (2016)

Roger B. Rutan, instructor (principles of marketing), MBA, 1971, Oregon. (2013)

Leah Schneider, senior instructor (marketing communications). BA, 2005, Brigham Young; PhD, 2017, York. (2015)

Frank Veltri, instructor (consumer behavior, sports marketing, economic impact). BA, 1978, Mayville State; MA, 1984, Minnesota State, Mankato; EdD, 1997, Northern Colorado; MBA, 2007, Colorado State. (2013)

Whitney R. Wagoner, senior instructor (sports marketing, corporate sponsorship, consumer promotions); program manager, Warsaw Sports Marketing Center. BS, 1996, Oregon; MBA, 2004, New York University. (2004)

Douglas L. Wilson, Peter and Molly Powell Distinguished Senior Instructor of Marketing (business plan development, marketing plan development). BS, 1978, Oregon State; MBA, 1990, Oregon. (1994)

Hong Yuan, associate professor (behavior economics, pricing); director, Business Research Institute; coordinator, doctoral program. BS, 1997, Fudan; MA, 2001, PhD, 2005, Michigan, Ann Arbor. (2013)

Jiao Zhang, associate professor (behavior decision theory, international marketing). BS, 1997, MS, 2000, Shanghai Jiao Tong; PhD, 2006, Chicago. (2014)

Emeriti

Gerald S. Albaum, professor emeritus. BA, 1954, MBA, 1958, Washington (Seattle); PhD, 1962, Wisconsin, Madison. (1969)

Roger J. Best, professor emeritus. BSEE, 1968, California State Polytechnic; MBA, 1972, California State, Hayward; PhD, 1975, Oregon. (1980)

Michael F. Dore, instructor emeritus (marketing, advertising); director, undergraduate honors. BS, 1971, MBA, 1972, Southern California. (1996)

Anne M. Forrestel, senior instructor emeritus. BA, 1972, Williams College; MS, 1974, MBA, 1985, Michigan, Ann Arbor. (1997)

Marian Friestad, professor emerita. BA, 1981, MA, 1984, PhD, 1989, Wisconsin, Madison. (1987)

Del I. Hawkins, professor emeritus. BBA, 1966, MBA, 1967, PhD, 1969, Texas. (1970)

Dennis Howard, professor emeritus. BS, 1966, Oregon; MS, 1968, Illinois; PhD, 1974, Oregon State. (1997)

Lynn R. Kahle, professor emeritus. BA, 1973, Concordia; MA, 1974, Pacific Lutheran; PhD, 1977, Nebraska. (1983)

Mark M. Phelps, senior instructor emeritus. BS, 1972, JD, 1975, MBA, 1980, Oregon. (1979)

Peter Wright, professor emeritus. BA, 1966, North Carolina State; MBA, 1968, Virginia; PhD, 1971, Pennsylvania State. (1997)

Undergraduate Programs

Academic Requirements

To earn an undergraduate degree in the Lundquist College of Business, a student must be an admitted major in good academic standing with the college and the university. Two sets of requirements must be completed: general university requirements and college requirements.

The college is firmly committed to an undergraduate degree program in business based on a solid foundation in the arts and sciences. Students may not earn two majors in the Lundquist College of Business; in

other words, a student who has an undergraduate degree in business administration cannot earn another undergraduate degree from the college. See the **Bachelor's Degree Requirements** section of this catalog for specific requirements for bachelor's degrees and for general-education and university requirements.

Students must satisfy the upper-division business core and major requirements in effect when they are admitted as majors.

For a more detailed explanation of requirements for majors, students should pick up the undergraduate degree programs handout in the Advising Office.

Business Premajor Admission

New students planning to earn a bachelor's degree in the Lundquist College of Business typically enter the university as business premajors. Transfer students and university students from other majors may become business premajors by submitting a Request for Addition or Deletion Major form, available in the Advising Office. Students who seek premajor status in business should meet with an advisor in the college if their GPA is below 3.00. Business premajors typically are not eligible to take most 300- and 400-level business courses. Business premajor status does not guarantee admission to the accounting or business administration major.

Admitted business premajors typically spend the first two years fulfilling general-education and premajor requirements.

Premajor Requirements

- **Junior Standing.** Course work of 90 or more credits must be complete.
- **Cumulative GPA Requirement.** Guaranteed admission requires a 3.00 cumulative grade point average in college course work, including transfer work. The college includes all course work when calculating the cumulative GPA for admission to the major.
- **Holistic Review.** Students who have taken all required business premajor course work but fall slightly below the minimum GPA requirements may be considered for admission under a holistic review process. For more details, interested students may visit an academic advisor in 203 Peterson Hall.
- **English Competence.** International students must have a Test of English as a Foreign Language (TOEFL) score of at least 575 (paper-based test), 233 (computer-based test), 89 (internet-based test), an International English Language Testing System (IELTS) score of 7.0, or have completed the Academic English for International Students (AEIS) program.

First-Year Direct Admission

Direct admission is only offered to first-year students who are entering in the fall term and list their intended major as business administration. The University of Oregon considers a number of factors when making direct admissions decisions, including high school GPA, strength of academic course work, test scores, and ability to enhance the diversity of the university. Students selected for direct admission will need to complete the lower-division course requirements but will not need to apply to the major like other students interested in business administration or accounting.

Business Premajor Courses

Premajor core business courses must be taken at the University of Oregon.

In addition, international students are required to take Academic English for International Students (AEIS) courses or produce English language proficiency test scores (575 on the TOEFL paper-based test, 89 on the TOEFL internet-based test, or 7.0 in the IELTS).

Code	Title	Credits
Core Courses ¹

EC 202	Introduction to Economic Analysis: Macroeconomics	4
Additional Courses ²		
BA 240	Managing Business Information	4
MATH 241	Calculus for Business and Social Science I	4
MATH 243	Introduction to Methods of Probability and Statistics	4
Select one of the following:		8
WR 121 & WR 122	College Composition I and College Composition II	
WR 121 & WR 123	College Composition I and College Composition III	
Total Credits		40

¹ A 3.00 cumulative GPA (including both UO and transfer course work) and a minimum grade of C- in core courses are required for guaranteed admission to the major. Premajor requirements must be taken for letter grades. The university limits retaking of courses in which a P or mid-C or better is earned; a petition is required. When repeating a core course, only the second grade is used in calculating the core GPA. Core courses may be repeated only once (including marks of W, N, F, D, C-).

² Must be taken for letter grades and passed with grades of C- or better.

Application to the Major

Students seeking admission through the standard pathway must submit a formal application for admission to the major one term prior to enrolling in upper-division business courses. Typically this takes place in the term they are completing their lower-division requirements. To be eligible for admission as a major, a student must apply before the term deadline. Applications are due the first week of the term for admission the following term. Applications are not accepted during summer session. Students who are completing their final term of business premajor requirements may submit applications.

The following documents are required for admission:

1. Completed application form (<https://business.uoregon.edu/ug/apply/major>)
2. Academic transcripts or proof of enrollment
3. A cover letter and résumé
4. Short answer essays

Bachelor of Arts in Business Administration Degree Requirements

Upper-Division Core

Code	Title	Credits
BA 308	Leadership and Communication	4
BA 325	Business Law and Ethics	4
BA 453	Business Strategy and Planning	4
FIN 311	Economic Foundations of Competitive Analysis	4
FIN 316	Financial Management	4
MGMT 321		4
MKTG 311	Marketing Management	4
OBA 311	Business Analytics I	4
OBA 312	Business Analytics II	4
OBA 335	Operations Management	4
Total Credits		40

Upper-division core courses typically are completed during junior year.

Business Administration Requirements

Code	Title	Credits
Seven business courses from at least three business departments ¹		
General-education requirements		54
Nonbusiness breadth requirement courses ²		24
Global context courses ³		12
Total Credits		90

¹ Four of the courses may be taken in one concentration area. Concentrations are optional and do not appear on UO academic transcripts or diplomas.

² Courses should be an interrelated and coherent set consistent with the student's career goals. A nonbusiness minor meets this requirement, as does two years of language study. Nonbusiness breadth plans must be approved and on file in the Advising Office; assistance in planning individualized programs is available in the advising office.

³ Courses focus on international, cultural, historical, political, economic, or social issues of a geographic region and the culture of one country or region other than the student's native country. Language courses beyond the first year satisfy this requirement. Global context plans must be approved by an advisor in the Advising Office.

Concentration: Marketing

Code	Title	Credits

Definitions, Limitations, and Policies

Transfer Students

The sequential nature of this program requires careful academic planning. Students who want to transfer to the college are encouraged to meet with an advisor in the Lundquist College of Business early in their academic careers. Students are admitted to the university as business premajors. Once admitted, they may apply for major status in accordance with the procedure described. Applications are due the first Friday of the term for admission the following term.

Second Bachelor's Degree

A student who has a bachelor's or master's degree in a field of business administration may not earn a second bachelor's degree in business. Students who have earned a nonbusiness degree and want a second degree in a field of business must be admitted to the university as postbaccalaureate nongraduate students. Second-degree candidates must meet the same admission requirements and follow the same application process described.

Students retain business premajor status until admission requirements are completed or waived because of completed course work. Second-degree students must complete the same upper-division requirements as first-degree candidates. The Second Bachelor's Degree section of this catalog, under **Bachelor's Degree Requirements**, lists university requirements for a second bachelor's degree; the Undergraduate Advising office has information about Lundquist College requirements.

Residence Requirement

Students must complete a minimum of 44 upper-division credits in regularly scheduled Lundquist College of Business courses. With the department head's approval, credits may be transferred from other

accredited institutions, independent study, or approved courses in other departments. Accounting majors must complete all upper-division accounting courses at the University of Oregon.

Grading

Premajor required courses and upper-division courses must be taken for letter grades and passed with grades of C– or better. See the **Registration and Academic Policies** section of this catalog for an explanation of the university's grading systems.

Upper-Division Courses

Courses for the minor are open to nonmajors, and courses for the certificate in international business communication are open to students whose native language is not English. Only admitted majors in the Lundquist College of Business may enroll in all other 300- and 400-level business courses.

Continuous Progress

Students who do not attend the university for an extended period of time after being admitted as a major may be required to reapply for admission and fulfill current major requirements if the *UO Catalog* for the last year of attendance has expired. See Catalog Expiration and Requirements Policies in the **Reader's Guide to the Catalog** (p. 3).

Business Administration Minor

All professions and organizations, public and private, operate according to business principles. Earning a minor in business administration prepares students to participate in organizational conversations and become leaders within their future professions. The minor in business administration is open to students from all majors other than business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in business administration online at the college's website, where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Twelve upper-division credits must be taken in the Lundquist College of Business. Upper-division business courses must be taken for letter grades. Students must earn a C– or better in all courses taken for a letter grade to fulfill minor requirements. When minor requirements have been completed and notification of application for a degree has been received from the Office of the Registrar, the student is cleared for the minor.

Code	Title	Credits
BA 101	Introduction to Business ¹	4
BA 215	Accounting: Language of Business Decisions ²	4
BA 315	Economy, Industry, and Competitive Analysis	4
BA 316	Management: Creating Value through People	4
BA 317	Marketing: Creating Value for Customers	4
BA 318	Finance: Creating Value through Capital ³	4
or FIN 316	Financial Management	
Total Credits		24

- ¹ Must be taken before the other required minor courses.
- ² Must be taken before Finance: Creating Value through Capital (BA 318).
- ³ Financial Management (FIN 316) may be substituted by economics majors who have maintained a 3.00 GPA.

Entrepreneurship Minor

The minor in entrepreneurship is intended for nonbusiness students who want to learn about innovation processes and the managerial and leadership skills required to create a new venture. The entrepreneurship minor gives students the opportunity to envision, develop, test, and build a for-profit or nonprofit venture working within an interdisciplinary framework of exploration and self-discovery. The minor in entrepreneurship is open to students from all majors except business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in entrepreneurship online at the college's website (<https://business.uoregon.edu/ug/minors/entrepreneurship>), where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Twelve upper-division credits must be taken in the Lundquist College of Business. Upper-division business courses must be taken for letter grades. Students must earn a C– or better in all courses taken for a letter grade to fulfill minor requirements. When minor requirements have been completed and notification of application for a degree has been received from the Office of the Registrar, the student is cleared for the minor.

Total Credits		24

- ¹ Must be taken before the other required minor courses

Sports Business Minor

The sports business minor develops skills in teamwork, writing, and oral communications with an emphasis on providing core business competencies to those pursuing sports industry–related careers. The minor is intended to provide baseline business skills and knowledge to students who are not intending to pursue a sports business career per se, but rather are pursuing sports-related professional paths in which business acumen is a supporting skill (e.g., sports journalist, sports psychologist, sportswear designer). The minor in sports business is open to students from all majors except business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in sports business online at the college's website (<https://business.uoregon.edu/ug/minors/sports-business>), where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Twelve upper-division credits must be taken in the Lundquist College of Business. Upper-division business courses must be taken for letter grades. Students must earn a C– or better in all courses taken for a letter grade to fulfill minor requirements. When minor requirements have been completed and notification of application for a degree has been received from the Office of the Registrar, the student is cleared for the minor.

Graduate Programs

Master of Business Administration

<https://business.uoregon.edu/mba>

302 Peterson Hall
Lillis Business Complex
541-346-3306
541-346-0073 fax

The Charles H. Lundquist College of Business MBA degree embodies the college's emphasis on interdisciplinary study, experiential learning, research excellence, and a supportive learning environment.

True to this interdisciplinary focus, the MBA curriculum consists of five tracks: advanced strategy and leadership, innovation and entrepreneurship, finance and securities analysis, sports business, and sustainable business practices. Building on a common core of foundational courses in accounting, decision sciences, finance, management, marketing, and operations and business analytics, students choose one of these curricular tracks when applying to the program.

Four of the tracks of the MBA curriculum are aligned with the college's centers—the Lundquist Center for Entrepreneurship, the Cameron Center for Finance and Securities Analysis, the Center for Sustainable Business Practices, and the James H. Warsaw Sports Marketing Center. The centers not only promote research collaboration among faculty members from different departments but they also facilitate student interactions with industry professionals and provide practical, real-world learning opportunities. These include internships, business planning ventures, competitions, and one- or two-term consulting projects in the second year.

Strong faculty involvement and the state-of-the-art facilities of the Lillis Business Complex create an ideal learning environment. An emphasis on group work ensures that students get to know one another and their instructors well. In addition, a strong cohort model aids in developing solid working relationships and strong friendships. Finally, students may choose to enhance their international education by studying abroad in the summer on the Engaging Asia tour.

Virtually all MBA students come to the university with work experience; the average is four years. About one-third are women; two thirds hold a nonbusiness bachelor's degree; and one-sixth are international students. The program draws students from across the United States and 12 to 15 countries.

Two years of full-time study are needed to earn the minimum of 76 credits required for the degree. See the website (<https://business.uoregon.edu/executive-mba>) for more information and admission requirements.

Accelerated Program

The accelerated master's degree program is intensive, allowing outstanding undergraduate majors in business, economics, or students of the science, technology, engineering, and mathematics (STEM) curriculum from an accredited institution to earn an MBA degree in nine or 15 months by taking 15 courses (a minimum of 45 credits) in three or four terms. Applicants should have a strong overall academic record and significant full-time work experience. Students choose one of the five tracks listed above. See the website (<https://business.uoregon.edu/mba/degree-programs/accelerated>) for more information.

Program Requirements

- Oregon MBA application (<https://business.uoregon.edu/mba/admissions>) (statement of purpose, two professional recommendations, résumé)
- University of Oregon Graduate School application

- GMAT or GRE scores
- Transcripts
- Proof of English language proficiency (TOEFL, IELTS, PTE scores) for applicants whose native language is not English

Master of Science in Finance

302G Peterson Hall
Lillis Business Complex
541-346-8925
msinfo@uoregon.edu

The master of science in finance is a 12-month degree program with an emphasis on valuation and asset management designed for students who recently graduated with majors in science, technology, engineering, mathematics, business, economics, or equivalent subjects.

The curriculum is designed to provide students with insights from the most advanced theoretical and empirical research in finance while attending quarterly professional development seminars. Through the UO's Cameron Center for Finance and Securities Analysis, students have the opportunity to practice securities analysis and portfolio management in a live environment with access to the Pacific Northwest's financial, banking, and investment industry.

Program Requirements

The program requires an undergraduate degree in science, technology, engineering, mathematics, business, economics, or equivalent subjects. Applications are evaluated holistically; this includes the essay, recommendations, and list of experience—not merely test scores and grades.

The following accomplishments fit the profile for a typical master of finance student:

- GMAT score of 620, GRE score of 310 (not the minimum requirements)
- grade point average of 3.20 on a four-point scale (not the minimum requirement)
- a four-year undergraduate degree

Course Requirements

Students complete the program in 12 months (four terms). The curriculum consists of six core courses plus electives, totaling a minimum of 45 credits. The plan of study for the electives is determined by the student and the program director.

Visit the college's master of science in finance website (<https://business.uoregon.edu/ms-finance>) for more information.

Oregon Executive MBA

109 NW Naito Parkway
Portland, Oregon 97209
503-412-3777
oemba@uoregon.edu (oemba@oemba.uoregon.edu)

The University of Oregon offers the two-year Oregon Executive Master of Business Administration (OEMBA) Program for employed mid- to senior-level executives. Classes are held in Portland every other week. In addition to meeting standard admission criteria, applicants to this program must have substantial managerial experience and corporate sponsorship. Courses are open only to students who apply and are admitted to this program. For more information, visit the website (<https://>

business.uoregon.edu/executive-mba). For admission criteria and deadlines, visit the admissions website (<https://business.uoregon.edu/mba/admissions>).

Master of Science in Sports Product Management

109 NW Naito Parkway
Portland, Oregon 97209
503-412-3777
uospm@uoregon.edu

The degree program leading to a master of science in sports product management is designed for experienced professionals looking to advance their careers by learning about the design and manufacture of sports-related products. Students learn from leading industry professionals in the sports and outdoor product industry, while instructors and guest speakers bring a wealth of real-world experience to the classroom. A 50-member advisory board of senior industry executives continually shape the content and direction of the program to align with industry needs. The curriculum is available online or full-time. For more information, visit the website (<https://business.uoregon.edu/spm/masters>). For admission criteria and deadlines, visit the admissions website (<https://business.uoregon.edu/spm/apply>).

Master of Science or Master of Arts

The master of arts (MA) degree in finance, management, marketing, and operations and business analytics and the master of science (MS) degree in management, marketing, and operations and business analytics are awarded exclusively to students who are enrolled in a PhD program. The MA degree requires competence in a second language. The requirements are as follows:

1. Completion of the AACSB International core areas as specified by the department in the Graduate School of Management in which the majority of specialization takes place. For students without academic preparation in business, completion of the common body of business knowledge usually amounts to satisfying the MBA core courses. The manner in which this requirement is satisfied is determined by the student in consultation with his or her program committee and subject to approval
2. Completion of a minimum of 45 graduate credits beyond the MBA core courses. These should include the following:
 - a. A minimum of 18 credits of course work in the primary area of specialization. A majority of this work should be taken in the college. However, specialization is defined by a subject of study and is not limited to courses offered by one department or by the Graduate School of Management
 - b. A minimum of 12 credits of course work in a secondary area of study either in the Graduate School of Management or in a related field
 - c. A maximum of 15 credits in electives. A maximum of 9 credits of Thesis (503) can be taken at the option of the student and the program committee. For students choosing to complete a thesis, the number of credits taken for the thesis is deducted from the required number of elective credits
 - d. A minimum of 27 graduate credits taken in the Graduate School of Management
3. Approval of the proposed program of study by a program committee of at least two faculty members. At least one faculty member must be

from the department in which the majority of specialization courses are taken:

- a. The composition of the program committee must be approved by the director of doctoral programs
 - b. An approved program of study must be submitted before any courses beyond the common body of business knowledge can be taken
4. If a thesis is undertaken, approval is required by a thesis committee of at least two faculty members. At least one faculty member must be from the department in which the majority of specialization courses is taken
 - a. The composition of the thesis committee must be approved by the director of doctoral programs. The thesis committee may have different members than the program committee
 - b. A thesis proposal must be approved in writing by all members of the thesis committee and submitted to the assistant dean for graduate programs before substantial work is undertaken on the thesis
 - c. In case of disagreement between thesis committee members over the acceptability of the thesis, the issue is resolved by an ad hoc committee of at least three faculty members appointed by the head of the department in which the majority of specialization courses has been taken
 5. **Computer Competence.** Details of this requirement appear under **Undergraduate Programs**

Doctoral Programs

Hong Yuan, Program Coordinator
477 Lillis
541-346-3196

Interdisciplinary training is provided in consumer behavior (topics include judgment and decision-making, affect and emotion, values and lifestyles, social identification, and consumer response to deceptive marketing practices) or marketing strategy (topics include advertising, public policy, satisfaction and service recovery, sports marketing and corporate sponsorship, and marketer-consumer coproduction).

The student's program must satisfy the requirements of the Graduate School and the following requirements of the Lundquist College of Business.

The doctoral program requires four to five years of work while in residence on the Eugene campus.

For more information, visit the website (<https://business.uoregon.edu/phd/concentrations/marketing>).

The student's program must satisfy the requirements of the Graduate School and the following requirements of the Lundquist College of Business.

The doctoral program requires four to five years of work while in residence on the Eugene campus.

	Five or more graduate-level statistics courses ²	

Three graduate-level economics, mathematics, or behavioral science courses³

- ¹ The department specifies the courses. At least three courses must be taken at the University of Oregon after admission to the doctoral program.
- ² Grades of mid-B or better are required; none of these courses may be taken pass/no pass. These courses may be taken outside the Lundquist College of Business. At least three courses must be completed at the university after admission to the doctoral program.
- ³ Courses in these areas of study are subject to final approval by the student's advisory committee and the director of doctoral programs. Each course used to meet this area requirement must be passed with a grade of mid-B or better, and at least two courses must be completed at the university after admission to the doctoral program.

Competence in Specialty

Students are expected to master the literature and techniques in their area of concentration, prepare to write an acceptable dissertation, and perform high-quality research. Competence is demonstrated by passing a departmental written comprehensive examination and by successfully completing one or more required research papers. The department specifies the number of required papers. To be eligible to take a comprehensive examination, students must have completed most of the course work required in the area.

Competence in Statistics and Research Methods

If the department requires an examination in statistics and research methods, it is administered and graded by a committee that includes at least two operations and business analytics faculty members appointed by the director of doctoral programs.

Examinations

Students must pass one written comprehensive examination in their area of concentration. Examinations are graded *high pass*, *pass*, or *no pass*. For examinations given in separate and predesignated parts, the grade may apply to each subpart. All grades are outright; a conditional pass is not permitted.

In the event of failure, a student may be allowed to retake a comprehensive examination or predesignated subpart one time, at the discretion of the department in which the student is majoring. Normally, the examination or predesignated subpart should be retaken during the term following the initial attempt, but it may be taken no sooner than two months after the initial attempt. Failure to pass the comprehensive examination or a subpart on the second attempt results in automatic termination from the PhD program.

Advancement to Candidacy

The student is advanced to candidacy for the PhD degree after satisfying the preceding requirements and upon recommendation by his or her advisory committee to the Lundquist College of Business and to the Graduate School. Advancement must occur no later than three years after the student's entry into the doctoral program.

Dissertation

The student must complete a dissertation embodying the results of research and showing evidence of originality and ability in independent investigation. The dissertation must show mastery of the literature and

techniques, be written in creditable literary form, and make a contribution to knowledge.

The student is responsible for formation of a dissertation committee, subject to approval by the Lundquist College of Business and the Graduate School of the university. This committee includes at least three regular faculty members of the college and at least one member from outside the college. The chair of the committee serves as the student's primary dissertation advisor. Before the dissertation topic is accepted by the dissertation committee, the student makes an oral presentation and defense of the research proposal and design. When the topic is accepted by the committee, a copy of the proposal, signed as approved by the committee, is placed in the candidate's file.

The dissertation must be completed within four years of the student's advancement to candidacy. Upon petition to and approval by the PhD program committee and the Graduate School, this period may be extended for one year. Failure to complete the dissertation within this time period invalidates the student's comprehensive examinations and advancement to candidacy. The student must successfully defend the completed dissertation in a public oral examination and defense before the dissertation committee.

Grade Point Average (GPA)

The student must maintain a cumulative GPA of 3.00 or higher in graduate courses.

Termination from Program

A student's participation in the PhD program may be terminated under one or more of the following conditions:

- failure to make satisfactory progress toward advancement to candidacy
- a GPA below 3.00 for two consecutive terms
- failure to complete a dissertation within four years after advancement to candidacy

The decision to terminate will be made by the director of the PhD program after consultation with the PhD coordinator and faculty members of the department in which the student is majoring.

A student dropped from the program is notified in writing, with reasons for termination clearly explained, and a copy of the letter is placed in the student's file. The student has the right to appeal the termination decision by submitting a petition to the senior associate dean for academic affairs.

Waivers

Waiver of any of the above requirements is permitted only in exceptional instances and with the approval of the candidate's program committee, the PhD program committee, and the director of PhD programs. Under no circumstances can requirements of the Graduate School be waived by the Lundquist College of Business.

Marketing Courses

MKTG 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable when the topic changes.

MKTG 311. Marketing Management. 4 Credits.

Product, price, promotion, and distribution decisions in consumer and industrial markets. Market segmentation, product positioning for goods and services. Marketing strategy and management. Product life cycles. Students cannot receive credit for both MKTG 311 and MKTG 311H. Prereq: BA 240, BA 308.

MKTG 311H. Marketing Management. 4 Credits.

Explores marketing strategy and tactics for profit and nonprofit organizations including start-ups and global firms. Uses cases and projects; requires intense student participation. Students cannot receive credit for both MKTG 311 and MKTG 311H. Prereq: open only to students in the LCB honors program.

MKTG 390. Marketing Research. 4 Credits.

Design, implementation, analysis, interpretation, and reporting of research for marketing decisions. Hands-on experience with techniques for data collection, statistical data analysis, and communication of results. Prereq: MKTG 311.

MKTG 401. Research: [Topic]. 1-21 Credits.

Repeatable.

MKTG 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

MKTG 406. Special Problems: [Topic]. 1-4 Credits.

Repeatable.

MKTG 407. Seminar: [Topic]. 4 Credits.

Repeatable.

MKTG 409. Practicum: [Topic]. 1-21 Credits.

Repeatable.

MKTG 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes. Recent topics include Marketing and Sustainability, Sales Management and Personal Selling.

MKTG 420. Marketing Communications. 4 Credits.

Advertising, sales promotions, public relations, and personal selling. Emerging communication media. Legal regulations and ethical considerations in mass media advertising. Media planning and promotional budgets. Prereq: MKTG 311.

MKTG 435. Consumer Behavior. 4 Credits.

Applications of social science concepts to the understanding of consumers and to the optimal delivery of products and services. Prereq: MKTG 311.

MKTG 445. Entrepreneurial Marketing. 4 Credits.

Techniques for analyzing and developing new markets. Pricing, communicating, and distributing new products or services with limited resources. Developing marketing plans for new ventures. Prereq: MKTG 311.

MKTG 470. International Marketing. 4 Credits.

Analysis and development of marketing strategy and tactics for multinational and global markets. Prereq: one from BA 317, MKTG 311, 311H.

MKTG 490. Marketing Strategy. 4 Credits.

Capstone marketing course. Primary focus on developing and implementing marketing strategies and determining their impact on customer satisfaction and profitability. Prereq: MKTG 390; MKTG 420 or SBUS 452.

MKTG 503. Thesis. 1-16 Credits.

Repeatable.

MKTG 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes. A recent topic includes Marketing and Sustainability.

MKTG 601. Research: [Topic]. 1-16 Credits.

Repeatable.

MKTG 603. Dissertation. 1-16 Credits.

Repeatable.

MKTG 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

MKTG 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

MKTG 608. Special Topics: [Topic]. 1-12 Credits.

Repeatable.

MKTG 609. Practicum: [Topic]. 1-16 Credits.

Repeatable.

MKTG 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable when the topic changes. Recent topics include New Product Development, Brand Strategy.

MKTG 612. Marketing Management. 3 Credits.

Marketing Management addresses market analysis and segmentation, targeting, and positioning. Emphasis is on marketing strategies designed to deliver superior customer value and achieve organizational objectives.

MKTG 660. Marketing Research. 3 Credits.

Marketing research as a tool for decision-making. Planning research projects; design, measurement, experimental and nonexperimental techniques, analysis and interpretation of data; reporting research results. Prereq: completion of first-year MBA core.

MKTG 665. Marketing Strategy. 3 Credits.

Relationship between marketing and other functional areas of a business. Emphasis on case analysis as a means of acquiring both planning and operational skills. Prereq: completion of first-year MBA core.

MKTG 687. Theory and Research in Marketing Management. 3 Credits.

Application of marketing concepts and of economics, management science, and behavioral science to the management of the product, price, promotion, and distribution variables. Prereq: doctoral standing.

MKTG 689. Theory and Research in Consumer Behavior. 3 Credits.

The applicability of behavioral theories and methodologies to the understanding of the consumption process. Prereq: doctoral standing.

Sports Business Courses

SBUS 199. Special Studies: [Topic]. 1-4 Credits.

Repeatable. Recent topics include Sports, Business, and Society.

SBUS 250. Sports Business and Society. 4 Credits.

This course provides an interdisciplinary treatment of the intersection of sports business and society. It reviews the broader sociology of sport and the critical role sport has played on issues of gender and race both domestically and globally. Prereq: BA 101.

SBUS 401. Research: [Topic]. 1-4 Credits.

Repeatable.

SBUS 405. Readings and Conference: [Topic]. 1-4 Credits.

Repeatable.

SBUS 406. Special Problems: [Topic]. 4 Credits.

Repeatable.

SBUS 407. Seminar: [Topic]. 4 Credits.

Repeatable.

SBUS 409. Practicum: [Topic]. 1-4 Credits.

Repeatable.

SBUS 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

Prereq: MKTG 311/MKTG 311H or BA 317

SBUS 450. Sports Marketing. 4 Credits.

Essentials of effective sports marketing. Includes research, segmentation, product development, pricing, licensing, and communication channels such as advertising, sales promotion, and publicity.

Prereq: MKTG 311.

SBUS 452. Sports Sponsorship. 4 Credits.

Detailed consideration of the relationship between sports and corporate sponsorship programs. Focuses on alignment marketing, sponsor value, and sponsorship evaluation.

Prereq: MKTG 311 or 311H.

SBUS 453. Law and Sports Business. 4 Credits.

Core legal principles across the sports business spectrum to improve risk and strategic management capabilities, competitive advantage, and critical negotiations.

Prereq: MKTG 311 or 311H.

SBUS 455. Financing Sports Business. 4 Credits.

Revenue sources for sports organizations. Includes conventional sources (e.g., tax support, bonds, ticket, media, concession sales) and innovations (e.g., initial public offerings, seat licenses, naming rights).

Prereq: MKTG 311 or 311H.

SBUS 456. Sports Brand Management. 4 Credits.

An integrative course that supports skills development for success in managing sports-related businesses and brands. It utilizes critical thinking, creative imagining and professional writing in developing capabilities used in businesses aligned with or in sports.

Prereq: MGMT 321 or BA 316 and MKTG 311 or BA 317.

SBUS 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

SBUS 601. Research: [Topic]. 1-4 Credits.

Repeatable.

SBUS 605. Reading: [Topic]. 1-4 Credits.

Repeatable.

SBUS 607. Seminar: [Topic]. 1-4 Credits.

Repeatable.

SBUS 608. Special Topics: [Topic]. 1-4 Credits.

Repeatable.

SBUS 609. Practicum: [Topic]. 1-9 Credits.

Repeatable.

SBUS 610. Experimental Course: [Topic]. 3 Credits.

Repeatable. A recent topic is Sports Product Branding, Product Line Management.

SBUS 645. Sports Product. 3 Credits.

Examines the companies and organizations of the international sports product industry: manufacturing innovation, company management, branding, retail and wholesale.

SBUS 650. Marketing Sports Properties. 3 Credits.

Examines essentials of effective sports marketing. Includes product or property development, legal aspects, segmentation, pricing, and communication channels (e.g., broadcast media).

Prereq: completion of first-year M.B.A. core.

SBUS 652. Sports Sponsorship Alliances. 3 Credits.

Detailed consideration of the relation between sports, law, and corporate sponsorship programs. Focuses on alignment marketing issues, strategic communication through sponsorship, sponsor value, and sponsorship valuation.

Prereq: completion of first-year MBA core.

SBUS 653. Legal Aspects of Sports Business. 3 Credits.

Examines social responsibility and legal concepts in sports management including constitutional regulatory powers, individual participation rights, drug testing, antitrust, labor rights, intellectual property rights, sponsorships, product and event liability.

SBUS 655. Economic Aspects of Sports. 3 Credits.

Comprehensive coverage of traditional and innovative revenue methods available to sports organizations from public and private sources.

Detailed consideration of venue-based income sources (e.g., premium seating, permanent seat licenses).

Prereq: completion of first-year MBA core.

Operations and Business Analytics

Michael Pangburn, Department Head

Undergraduate Advising Office

203 Peterson Hall

The undergraduate curriculum in the Department of Operations and Business Analytics is designed for students who want to prepare for a career in statistics, production and operations management, information systems, or a management career with a strong emphasis in these areas.

The Department of Operations and Business Analytics offers an undergraduate concentration in information systems and operations management. These courses introduce the major concepts and techniques of analytic decision-making, information technology, supply-chain operations, and e-business. To support these topics, the department also offers courses in statistics.

Faculty

Eren B. Çil, associate professor (game theory, queueing theory); coordinator, doctoral program. BS, 2004, Middle Eastern Technical; MS, 2006, Koç; PhD, 2010, Northwestern. (2010)

Yue Fang, associate professor (financial econometrics, forecasting, time series analysis). BA, 1984, MA, 1987, Tsinghua; MS, 1994, PhD, 1996, Massachusetts Institute of Technology. (1996)

Erik Ford, instructor (information technology). BS, 2013, MBA, 2015, Oregon. (2015)

Xing Hu, assistant professor (revenue management, dynamic pricing). BS, 2006, Peking (Beijing); MPhil, 2008, PhD, 2012, New York. (2011)

Ming Jin, instructor. PhD, 2016, Utah. (2017)

Nagesh N. Murthy, Roger Engemann Professor in Business Administration (call center industry, health-care operations). BE, 1982,

MMS, 1983, Birla Institute of Technology and Science; MS, 1988, MA, 1994, PhD, 1997, Ohio State. (2003)

Michael S. Pangburn, Ehrman V. Giustina Professor (retail operations). BS, 1990, Virginia Polytechnic Institute and State; MS, 1993, PhD, 1997, Rochester. (2002)

Pradeep Pendem, assistant professor. BE, 2006, Andhra; MTech, 2008, Indian Statistical Institute; MS, 2015, PhD, 2018, North Carolina, Chapel Hill. (2018)

Saeed Piri, assistant professor (business and data analytics, machine learning). BS, 2008, Amirkabir University of Technology; MS, 2011, Sharif University of Technology; PhD, 2017, Oklahoma State. (2018)

Zhixi Wan, associate professor (operations management, strategic sourcing and procurement). BS, 2003, Tsinghua; PhD, 2009, Michigan. (2014)

Wenbo Wu, assistant professor (statistical analysis, business analytics). BS, 2007, Texas, Austin; MS, 2010, Central Florida; PhD, 2015, Georgia. (2015)

Zhibin "Ben" Yang, associate professor (operations management, supply-chain risk management). BS, 1994, Southwest Jiaotong; MS, 2002, Arizona State; PhD, 2009, Michigan. (2009)

Fang Yin, senior instructor (business value of IT, electronic commerce). BA, 1992, Peking (Beijing); PhD, 2002, Texas, Austin. (2008)

Peng "John" Zhang, instructor. BS, 1999, Shenyang Medical College; MBA, 2008, Indiana Wesleyan; PhD, 2017, Florida International. (2017)

Yinchu Zhu, assistant professor (econometrics, dimension reduction, big data analysis). BA, 2009, Zhongnan University of Economics and Law; MS, 2011, Bocconi; MA, 2014, PhD, 2017, California, San Diego. (2017)

Emeriti

Sergio G. Koreisha, professor emeritus. BA, 1974, ME, 1975, California; DBA, 1980. Harvard. (1980)

James E. Reinmuth, professor emeritus. BA, 1963, Washington, Seattle; MS, 1965, PhD, 1969, Oregon State. (1967)

Larry E. Richards, associate professor emeritus. BA, 1962, MBA, 1963, Washington (Seattle); PhD, 1969, California, Los Angeles. (1966)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts: Business Administration**
- **Bachelor of Science: Business Administration**
- **Minors**

Undergraduate Programs

Academic Requirements

To earn an undergraduate degree in the Lundquist College of Business, a student must be an admitted major in good academic standing with the college and the university. Two sets of requirements must be completed: general university requirements and college requirements.

The college is firmly committed to an undergraduate degree program in business based on a solid foundation in the arts and sciences. Students may not earn two majors in the Lundquist College of Business; in

other words, a student who has an undergraduate degree in business administration cannot earn another undergraduate degree from the college. See the **Bachelor's Degree Requirements** section of this catalog for specific requirements for bachelor's degrees and for general-education and university requirements.

Students must satisfy the upper-division business core and major requirements in effect when they are admitted as majors.

For a more detailed explanation of requirements for majors, students should pick up the undergraduate degree programs handout in the Advising Office.

Business Premajor Admission

New students planning to earn a bachelor's degree in the Lundquist College of Business typically enter the university as business premajors. Transfer students and university students from other majors may become business premajors by submitting a Request for Addition or Deletion Major form, available in the Advising Office. Students who seek premajor status in business should meet with an advisor in the college if their GPA is below 3.00. Business premajors typically are not eligible to take most 300- and 400-level business courses. Business premajor status does not guarantee admission to the accounting or business administration major.

Admitted business premajors typically spend the first two years fulfilling general-education and premajor requirements.

Premajor Requirements

- **Junior Standing.** Course work of 90 or more credits must be complete.
- **Cumulative GPA Requirement.** Guaranteed admission requires a 3.00 cumulative grade point average in college course work, including transfer work. The college includes all course work when calculating the cumulative GPA for admission to the major.
- **Holistic Review.** Students who have taken all required business premajor course work but fall slightly below the minimum GPA requirements may be considered for admission under a holistic review process. For more details, interested students may visit an academic advisor in 203 Peterson Hall.
- **English Competence.** International students must have a Test of English as a Foreign Language (TOEFL) score of at least 575 (paper-based test), 233 (computer-based test), 89 (internet-based test), an International English Language Testing System (IELTS) score of 7.0, or have completed the Academic English for International Students (AEIS) program.

First-Year Direct Admission

Direct admission is only offered to first-year students who are entering in the fall term and list their intended major as business administration. The University of Oregon considers a number of factors when making direct admissions decisions, including high school GPA, strength of academic course work, test scores, and ability to enhance the diversity of the university. Students selected for direct admission will need to complete the lower-division course requirements but will not need to apply to the major like other students interested in business administration or accounting.

Business Premajor Courses

Premajor core business courses must be taken at the University of Oregon.

In addition, international students are required to take Academic English for International Students (AEIS) courses or produce English language proficiency test scores (575 on the TOEFL paper-based test, 89 on the TOEFL internet-based test, or 7.0 in the IELTS).

Code	Title	Credits
Core Courses ¹		
BA 101	Introduction to Business	4
ACTG 211	Introduction to Accounting I	4
ACTG 213	Introduction to Accounting II	4
EC 201	Introduction to Economic Analysis: Microeconomics	4
EC 202	Introduction to Economic Analysis: Macroeconomics	4
Additional Courses ²		
BA 240	Managing Business Information	4
MATH 241	Calculus for Business and Social Science I	4
MATH 243	Introduction to Methods of Probability and Statistics	4
Select one of the following:		8
WR 121 & WR 122	College Composition I and College Composition II	
WR 121 & WR 123	College Composition I and College Composition III	
Total Credits		40

¹ A 3.00 cumulative GPA (including both UO and transfer course work) and a minimum grade of C– in core courses are required for guaranteed admission to the major. Premajor requirements must be taken for letter grades. The university limits retaking of courses in which a P or mid-C or better is earned; a petition is required. When repeating a core course, only the second grade is used in calculating the core GPA. Core courses may be repeated only once (including marks of W, N, F, D, C–).

² Must be taken for letter grades and passed with grades of C– or better.

Application to the Major

Students seeking admission through the standard pathway must submit a formal application for admission to the major one term prior to enrolling in upper-division business courses. Typically this takes place in the term they are completing their lower-division requirements. To be eligible for admission as a major, a student must apply before the term deadline. Applications are due the first week of the term for admission the following term. Applications are not accepted during summer session. Students who are completing their final term of business premajor requirements may submit applications.

The following documents are required for admission:

1. Completed application form (<https://business.uoregon.edu/ug/apply/major>)
2. Academic transcripts or proof of enrollment
3. A cover letter and résumé
4. Short answer essays

Bachelor of Arts in Business Administration Degree Requirements

Upper-Division Core

Code	Title	Credits

The 400-level courses are typically taken in the senior year.

Definitions, Limitations, and Policies

Transfer Students

The sequential nature of this program requires careful academic planning. Students who want to transfer to the college are encouraged to meet with an advisor in the Lundquist College of Business early in their academic careers. Students are admitted to the university as business premajors. Once admitted, they may apply for major status in accordance with the procedure described. Applications are due the first Friday of the term for admission the following term.

Second Bachelor's Degree

A student who has a bachelor's or master's degree in a field of business administration may not earn a second bachelor's degree in business. Students who have earned a nonbusiness degree and want a second degree in a field of business must be admitted to the university as postbaccalaureate nongraduate students. Second-degree candidates must meet the same admission requirements and follow the same application process described.

Students retain business premajor status until admission requirements are completed or waived because of completed course work. Second-degree students must complete the same upper-division requirements as first-degree candidates. The Second Bachelor's Degree section of this catalog, under **Bachelor's Degree Requirements**, lists university requirements for a second bachelor's degree; the Undergraduate Advising office has information about Lundquist College requirements.

Residence Requirement

Students must complete a minimum of 44 upper-division credits in regularly scheduled Lundquist College of Business courses. With the department head's approval, credits may be transferred from other accredited institutions, independent study, or approved courses in other departments. Accounting majors must complete all upper-division accounting courses at the University of Oregon.

Grading

Premajor required courses and upper-division courses must be taken for letter grades and passed with grades of C– or better. See the **Registration and Academic Policies** section of this catalog for an explanation of the university's grading systems.

Upper-Division Courses

Courses for the minor are open to nonmajors, and courses for the certificate in international business communication are open to students whose native language is not English. Only admitted majors in the Lundquist College of Business may enroll in all other 300- and 400-level business courses.

Continuous Progress

Students who do not attend the university for an extended period of time after being admitted as a major may be required to reapply for admission and fulfill current major requirements if the *UO Catalog* for the last year

of attendance has expired. See Catalog Expiration and Requirements Policies in the **Reader's Guide to the Catalog** (p. 3).

Business Administration Minor

All professions and organizations, public and private, operate according to business principles. Earning a minor in business administration prepares students to participate in organizational conversations and become leaders within their future professions. The minor in business administration is open to students from all majors other than business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in business administration online at the college's website, where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Twelve upper-division credits must be taken in the Lundquist College of Business. Upper-division business courses must be taken for letter grades. Students must earn a C– or better in all courses taken for a letter grade to fulfill minor requirements. When minor requirements have been completed and notification of application for a degree has been received from the Office of the Registrar, the student is cleared for the minor.

Code	Title	Credits
BA 101	Introduction to Business ¹	4
BA 215	Accounting: Language of Business Decisions ²	4
BA 315	Economy, Industry, and Competitive Analysis	4
BA 316	Management: Creating Value through People	4
BA 317	Marketing: Creating Value for Customers	4
BA 318 or FIN 316	Finance: Creating Value through Capital ³ Financial Management	4
Total Credits		24

¹ Must be taken before the other required minor courses.

² Must be taken before Finance: Creating Value through Capital (BA 318).

³ Financial Management (FIN 316) may be substituted by economics majors who have maintained a 3.00 GPA.

Entrepreneurship Minor

The minor in entrepreneurship is intended for nonbusiness students who want to learn about innovation processes and the managerial and leadership skills required to create a new venture. The entrepreneurship minor gives students the opportunity to envision, develop, test, and build a for-profit or nonprofit venture working within an interdisciplinary framework of exploration and self-discovery. The minor in entrepreneurship is open to students from all majors except business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in entrepreneurship online at the college's website (<https://business.uoregon.edu/ug/minors/entrepreneurship>),

where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Twelve upper-division credits must be taken in the Lundquist College of Business. Upper-division business courses must be taken for letter grades. Students must earn a C– or better in all courses taken for a letter grade to fulfill minor requirements. When minor requirements have been completed and notification of application for a degree has been received from the Office of the Registrar, the student is cleared for the minor.

Sports Business Minor

The sports business minor develops skills in teamwork, writing, and oral communications with an emphasis on providing core business competencies to those pursuing sports industry–related careers. The minor is intended to provide baseline business skills and knowledge to students who are not intending to pursue a sports business career per se, but rather are pursuing sports-related professional paths in which business acumen is a supporting skill (e.g., sports journalist, sports psychologist, sportswear designer). The minor in sports business is open to students from all majors except business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in sports business online at the college's website (<https://business.uoregon.edu/ug/minors/sports-business>), where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Graduate Programs

Master of Business Administration

<https://business.uoregon.edu/mba>

302 Peterson Hall
Lillis Business Complex
541-346-3306
541-346-0073 fax

The Charles H. Lundquist College of Business MBA degree embodies the college's emphasis on interdisciplinary study, experiential learning, research excellence, and a supportive learning environment.

True to this interdisciplinary focus, the MBA curriculum consists of five tracks: advanced strategy and leadership, innovation and entrepreneurship, finance and securities analysis, sports business, and sustainable business practices. Building on a common core of foundational courses in accounting, decision sciences, finance, management, marketing, and operations and business analytics, students choose one of these curricular tracks when applying to the program.

Four of the tracks of the MBA curriculum are aligned with the college's centers—the Lundquist Center for Entrepreneurship, the Cameron Center for Finance and Securities Analysis, the Center for Sustainable Business Practices, and the James H. Warsaw Sports Marketing Center. The centers not only promote research collaboration among faculty members from different departments but they also facilitate student interactions with industry professionals and provide practical, real-world learning opportunities. These include internships, business planning ventures, competitions, and one- or two-term consulting projects in the second year.

Strong faculty involvement and the state-of-the-art facilities of the Lillis Business Complex create an ideal learning environment. An emphasis on group work ensures that students get to know one another and their instructors well. In addition, a strong cohort model aids in developing solid working relationships and strong friendships. Finally, students may choose to enhance their international education by studying abroad in the summer on the Engaging Asia tour.

Virtually all MBA students come to the university with work experience; the average is four years. About one-third are women; two thirds hold a nonbusiness bachelor's degree; and one-sixth are international students. The program draws students from across the United States and 12 to 15 countries.

Two years of full-time study are needed to earn the minimum of 76 credits required for the degree. See the website (<https://business.uoregon.edu/executive-mba>) for more information and admission requirements.

Accelerated Program

The accelerated master's degree program is intensive, allowing outstanding undergraduate majors in business, economics, or students of the science, technology, engineering, and mathematics (STEM) curriculum from an accredited institution to earn an MBA degree in nine or 15 months by taking 15 courses (a minimum of 45 credits) in three or four terms. Applicants should have a strong overall academic record and significant full-time work experience. Students choose one of the five tracks listed above. See the website (<https://business.uoregon.edu/mba/degree-programs/accelerated>) for more information.

Program Requirements

- Oregon MBA application (<https://business.uoregon.edu/mba/admissions>) (statement of purpose, two professional recommendations, résumé)
- University of Oregon Graduate School application

- GMAT or GRE scores
- Transcripts
- Proof of English language proficiency (TOEFL, IELTS, PTE scores) for applicants whose native language is not English

Master of Science in Finance

302G Peterson Hall
Lillis Business Complex
541-346-8925
msfinfo@uoregon.edu

The master of science in finance is a 12-month degree program with an emphasis on valuation and asset management designed for students who recently graduated with majors in science, technology, engineering, mathematics, business, economics, or equivalent subjects.

The curriculum is designed to provide students with insights from the most advanced theoretical and empirical research in finance while attending quarterly professional development seminars. Through the UO's Cameron Center for Finance and Securities Analysis, students have the opportunity to practice securities analysis and portfolio management in a live environment with access to the Pacific Northwest's financial, banking, and investment industry.

Program Requirements

The program requires an undergraduate degree in science, technology, engineering, mathematics, business, economics, or equivalent subjects. Applications are evaluated holistically; this includes the essay, recommendations, and list of experience—not merely test scores and grades.

The following accomplishments fit the profile for a typical master of finance student:

- GMAT score of 620, GRE score of 310 (not the minimum requirements)
- grade point average of 3.20 on a four-point scale (not the minimum requirement)
- a four-year undergraduate degree

Course Requirements

Students complete the program in 12 months (four terms). The curriculum consists of six core courses plus electives, totaling a minimum of 45 credits. The plan of study for the electives is determined by the student and the program director.

Visit the college's master of science in finance website (<https://business.uoregon.edu/ms-finance>) for more information.

Oregon Executive MBA

109 NW Naito Parkway
Portland, Oregon 97209
503-412-3777
oemba@uoregon.edu (oemba@oemba.uoregon.edu)

The University of Oregon offers the two-year Oregon Executive Master of Business Administration (OEMBA) Program for employed mid- to senior-level executives. Classes are held in Portland every other week. In addition to meeting standard admission criteria, applicants to this program must have substantial managerial experience and corporate sponsorship. Courses are open only to students who apply and are admitted to this program. For more information, visit the website (<https://>

business.uoregon.edu/executive-mba). For admission criteria and deadlines, visit the admissions website (<https://business.uoregon.edu/mba/admissions>).

Master of Science in Sports Product Management

109 NW Naito Parkway
Portland, Oregon 97209
503-412-3777
uospm@uoregon.edu

The degree program leading to a master of science in sports product management is designed for experienced professionals looking to advance their careers by learning about the design and manufacture of sports-related products. Students learn from leading industry professionals in the sports and outdoor product industry, while instructors and guest speakers bring a wealth of real-world experience to the classroom. A 50-member advisory board of senior industry executives continually shape the content and direction of the program to align with industry needs. The curriculum is available online or full-time. For more information, visit the website (<https://business.uoregon.edu/spm/masters>). For admission criteria and deadlines, visit the admissions website (<https://business.uoregon.edu/spm/apply>).

Master of Science or Master of Arts

The master of arts (MA) degree in finance, management, marketing, and operations and business analytics and the master of science (MS) degree in management, marketing, and operations and business analytics are awarded exclusively to students who are enrolled in a PhD program. The MA degree requires competence in a second language. The requirements are as follows:

1. Completion of the AACSB International core areas as specified by the department in the Graduate School of Management in which the majority of specialization takes place. For students without academic preparation in business, completion of the common body of business knowledge usually amounts to satisfying the MBA core courses. The manner in which this requirement is satisfied is determined by the student in consultation with his or her program committee and subject to approval
2. Completion of a minimum of 45 graduate credits beyond the MBA core courses. These should include the following:
 - a. A minimum of 18 credits of course work in the primary area of specialization. A majority of this work should be taken in the college. However, specialization is defined by a subject of study and is not limited to courses offered by one department or by the Graduate School of Management
 - b. A minimum of 12 credits of course work in a secondary area of study either in the Graduate School of Management or in a related field
 - c. A maximum of 15 credits in electives. A maximum of 9 credits of Thesis (503) can be taken at the option of the student and the program committee. For students choosing to complete a thesis, the number of credits taken for the thesis is deducted from the required number of elective credits
 - d. A minimum of 27 graduate credits taken in the Graduate School of Management
3. Approval of the proposed program of study by a program committee of at least two faculty members. At least one faculty member must be

from the department in which the majority of specialization courses are taken:

- a. The composition of the program committee must be approved by the director of doctoral programs
 - b. An approved program of study must be submitted before any courses beyond the common body of business knowledge can be taken
4. If a thesis is undertaken, approval is required by a thesis committee of at least two faculty members. At least one faculty member must be from the department in which the majority of specialization courses is taken
- a. The composition of the thesis committee must be approved by the director of doctoral programs. The thesis committee may have different members than the program committee
 - b. A thesis proposal must be approved in writing by all members of the thesis committee and submitted to the assistant dean for graduate programs before substantial work is undertaken on the thesis
 - c. In case of disagreement between thesis committee members over the acceptability of the thesis, the issue is resolved by an ad hoc committee of at least three faculty members appointed by the head of the department in which the majority of specialization courses has been taken
5. **Computer Competence.** Details of this requirement appear under **Undergraduate Programs**

Doctoral Programs

Eren B. Çil, Program Coordinator

483 Lillis
541-346-8252

The emphasis of the PhD in operations and business analytics is on supply-chain coordination and risk management, operations-marketing interface and retail operations, sustainable operations and supply-chain management, service operations, strategic pricing, and revenue management.

The student's program must satisfy the requirements of the Graduate School and the following requirements of the Lundquist College of Business.

The doctoral program typically requires four years of postmaster's degree work while in residence on the Eugene campus.

For more information, visit the website (<https://business.uoregon.edu/phd/concentrations/operations-management>).

PhD Degree Requirements

Code	Title	Credits
Core Courses ¹		
	Three econometrics and advanced statistics-probability courses	
	Four optimization method courses	
	Three foundations of economic analysis courses	
	Two advanced mathematical tool courses	
Supporting Courses		
	Four courses from among accounting, finance, marketing, statistics, operations management, microeconomics, and linear algebra ²	

¹ Students are required to take at least twelve core courses passed with grades of B– or better; none of these courses may be taken pass/no pass. They may be taken outside the Lundquist College subject to the approval of the faculty advisor. At least eight courses must be completed at the UO after admission to the doctoral program.

² Courses must be passed with a grade of mid-B or better. At least two courses must be completed at the UO after admission to the doctoral program.

Advancement to Candidacy

Students are advanced to candidacy for the PhD degree after satisfying the preceding requirements and upon recommendation by their advisory committee to the Lundquist College of Business and to the Graduate School. Advancement must occur no later than three years after the student's entry into the doctoral program.

Examinations

Students must pass one written comprehensive examination in their primary area. Examinations are graded high pass, pass, or no pass. For examinations given in separate and predesignated parts, the grade may apply to each subpart. All grades are outright; a conditional pass is not permitted.

In the event of failure, a student may be allowed to retake a comprehensive examination or predesignated subpart one time, at the discretion of the department in which the student is majoring. Typically, the examination or predesignated subpart should be retaken during the term following the initial attempt, but it may be taken no sooner than two months after the initial attempt. Failure to pass the comprehensive examination or a subpart on the second attempt results in automatic termination from the PhD program.

Dissertation

The student must complete a dissertation embodying the results of research and showing evidence of originality and ability in independent investigation. The dissertation must show mastery of the literature and techniques, be written in creditable literary form, and make a contribution to knowledge.

The student is responsible for formation of a dissertation committee, subject to approval by the Lundquist College of Business and the Graduate School of the university. This committee includes at least three regular faculty members of the college and at least one member from outside the college. The chair of the committee serves as the student's primary dissertation advisor. Before the dissertation topic is accepted by the dissertation committee, the student makes a public oral presentation and defense of the research proposal and design. When the topic is accepted by the committee, a copy of the proposal, signed as approved by the committee, is placed in the candidate's file.

The dissertation must be completed within four years of the student's advancement to candidacy. Upon petition to and approval by the PhD program committee and the Graduate School, this period may be extended for one year. Failure to complete the dissertation within this time period invalidates the student's comprehensive examinations and advancement to candidacy. The student must successfully defend the completed dissertation in a public oral examination and defense before the dissertation committee.

Grade Point Average (GPA)

The student must maintain a cumulative GPA of 3.00 or higher in graduate courses.

Termination from Program

A student's participation in the PhD program may be terminated under one or more of the following conditions:

- failure to make satisfactory progress toward advancement to candidacy
- a GPA below 3.00 for two consecutive terms
- failure to complete a dissertation within four years after advancement to candidacy

The decision to terminate will be made by the director of the PhD program after consultation with the PhD coordinator and faculty members of the department in which the student is majoring.

A student dropped from the program is notified in writing, with reasons for termination clearly explained, and a copy of the letter is placed in the student's file. The student has the right to appeal the termination decision by submitting a petition to the senior associate dean for academic affairs.

Waivers

Waiver of any of the above requirements is permitted only in exceptional instances and with the approval of the candidate's program committee, the PhD program committee, and the director of PhD programs. Under no circumstances can requirements of the Graduate School be waived by the Lundquist College of Business.

Certificate in Global Business

Lundquist College of Business students may earn a certificate in global business; study abroad is highly recommended. In addition, two years of college-level language study or completion of a preapproved study-abroad or international internship program is required. For more information, visit the website (<https://business.uoregon.edu/ug/certificates/global-business>).

Courses

OBA 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable when the topic changes.

OBA 311. Business Analytics I. 4 Credits.

Explores standard protocols for describing and modeling business information and processes; techniques for designing management information systems; criteria for analyzing firms' implementations of information technology. Students cannot receive credit for both OBA 311 and OBA 311H. Sophomore standing required.

Prereq: C- or better in BA 101, BA 240, EC 201, MATH 241, MATH 243, WR 121.

OBA 311H. Business Analytics I. 4 Credits.

Explores standard protocols for describing and modeling business information and processes; techniques for designing management information systems; criteria for analyzing firms' implementations of information technology. Students cannot receive credit for both OBA 311 and OBA 311H. Sophomore standing required.

Prereq: C- or better in BA 101, BA 240, EC 201, MATH 241, MATH 243, WR 121. Open only to students in the LCB honors program.

OBA 312. Business Analytics II. 4 Credits.

Computer-aided business applications of hypothesis testing, simple linear regression. Introduction to multiple regression and nonparametric techniques. Blocked and completely randomized one- and two-factor experimental designs. Students cannot receive credit for both OBA 312 and OBA 312H. Sophomore standing required.

Prereq: C- or better in BA 101, BA 240, EC 201, MATH 241, MATH 243, WR 121.

OBA 312H. Business Analytics II. 4 Credits.

Computer-aided business applications of hypothesis testing, simple linear regression. Introduction to multiple regression and nonparametric techniques. Blocked and completely randomized one- and two-factor experimental designs. Students cannot receive credit for both OBA 312 and OBA 312H.

Prereq: Open only to students in the LCB honors program. C# or better in BA 101, BA 240, EC 201, WR 121, MATH 241, and MATH 243.

OBA 335. Operations Management. 4 Credits.

Concepts and applications of operations management. Use of information technology in operations. Topics include forecasting, quality, supply chain management, information systems in operations management, and planning and scheduling. Students cannot receive credit for both OBA 335 and OBA 335H.

Prereq: C- or better in BA 101, BA 240, EC 201, MATH 241, MATH 243, WR 121.

OBA 335H. Operations Management. 4 Credits.

Concepts and applications of operations management. Use of information technology in operations. Topics include forecasting, quality, supply chain management, information systems in operations management, and planning and scheduling. Students cannot receive credit for both OBA 335 and OBA 335H. Sophomore standing required.

Prereq: BA 101, BA 240, EC 201, MATH 241, MATH 243. Open only to students in the LCB honors program.

OBA 401. Research: [Topic]. 1-21 Credits.

Repeatable.

OBA 403. Thesis. 1-6 Credits.

Repeatable.

OBA 405. Reading and Conference: [Topic]. 1-3 Credits.

Repeatable.

OBA 406. Special Problems: [Topic]. 1-4 Credits.

Repeatable.

OBA 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

OBA 409. Practicum: [Topic]. 1-6 Credits.

Repeatable.

OBA 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes. Recent topics include Service Operations, Business Analytics, Analyzing Big Data.

Prereq: OBA 311/OBA 311H/340/340H, and OBA 312/OBA 312H/330/330H, and OBA 335/OBA 335H

OBA 433. Information Analysis for Managerial Decisions. 4 Credits.

Leveraging information to manage risk and improve decisions; data-driven approaches for discovering business trends and strategic opportunities, including techniques for data-mining and analyzing empirical data.

Prereq: OBA 330.

OBA 444. Business Database Management Systems. 4 Credits.

Techniques for structuring and storing business data; primary focus on relational database theory, with applied skills for business users, including data warehouses, reporting, and normalization.

Prereq: OBA 340 or OBA 340H.

OBA 466. Project and Operations Management Models. 4 Credits.

Frameworks and solutions for managing complex projects and operations; implementing optimal strategies for producing profitable new products and services in the competitive global business environment.

Prereq: OBA 335 or 335H.

OBA 477. Supply-Chain Operations and Information. 4 Credits.

Strategic and tactical issues pertaining to the distribution and delivery of products and services. Methodologies and systems for designing, tracking, and managing complex global operations.

Prereq: OBA 335 or 335H.

OBA 488. E-Business. 4 Credits.

Fundamental principles of electronic business; effect of e-business on business strategies, processes, customers, and suppliers; assessing the impact of e-business technologies on firm performance.

Prereq: OBA 340/311 or 340/311H or CIT 382.

OBA 503. Thesis. 1-16 Credits.

Repeatable.

OBA 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes. Recent topics include Service Operations, Business Analytics, Analyzing Big Data.

OBA 533. Information Analysis for Managerial Decisions. 4 Credits.

Leveraging information to manage risk and improve decisions; data-driven approaches for discovering business trends and strategic opportunities, including techniques for data-mining and analyzing empirical data.

Prereq: all MBA core courses.

OBA 544. Business Database Management Systems. 4 Credits.

Techniques for structuring and storing business data; primary focus on relational database theory, with applied skills for business users, including data warehouses, reporting, and normalization.

Prereq: all MBA core courses.

OBA 566. Project and Operations Management Models. 4 Credits.

Frameworks and solutions for managing complex projects and operations; implementing optimal strategies for producing profitable new products and services in the competitive global business environment.

Prereq: all MBA core courses.

OBA 577. Supply-Chain Operations and Information. 4 Credits.

Strategic and tactical issues pertaining to the distribution and delivery of products and services. Methodologies and systems for designing, tracking, and managing complex global operations.

Prereq: all MBA core courses.

OBA 588. E-Business. 4 Credits.

Fundamental principles of electronic business; effect of e-business on business strategies, processes, customers, and suppliers; assessing the impact of e-business technologies on firm performance.

Prereq: all MBA core courses.

OBA 601. Research: [Topic]. 1-16 Credits.

Repeatable.

OBA 603. Dissertation. 1-16 Credits.

Repeatable.

OBA 605. Reading and Conference: [Topic]. 1-3 Credits.

Repeatable.

OBA 607. Seminar: [Topic]. 1-3 Credits.

Repeatable.

OBA 608. Special Topics: [Topic]. 1-12 Credits.

Repeatable.

OBA 609. Practicum: [Topic]. 1-16 Credits.

Repeatable.

OBA 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

OBA 612. Quantitative Methods for Managers. 3 Credits.

Concepts and techniques of analytic decision making, sampling and statistical inference, and regression analysis.

OBA 613. Operations Management. 3 Credits.

Overview of the managerial issues associated with production and delivery of goods and services. Includes the use of quantitative modeling and several case studies in operations.

College of Design

Laura Vandenburg, Interim Dean

541-346-3631

198 Lawrence Hall

Founded in 1914, the College of Design is a collaborative community dedicated to environmental sustainability, civic responsibility, creativity and innovation, international understanding, and interdisciplinary education. The college (formerly known as the School of Architecture and Allied Arts) has degree programs in Eugene and Portland. Its goal is to provide students with the skills and mentorship needed to tackle complex global challenges in the 21st century.

The college comprises three schools and one independent department:

- School of Architecture and Environment
- School of Art and Design
- School of Planning, Public Policy and Management
- Department of the History of Art and Architecture

Programs

Undergraduate students may major in architecture; art (including nine media areas); art and technology; art history; interior architecture; landscape architecture; planning, public policy and management; and product design. In addition, the college offers minors in architecture, art, art history, historic preservation, interior architecture, landscape architecture, multimedia, nonprofit administration, and planning, public policy and management.

Graduate programs offered include architecture, art, art history, community and regional planning, historic preservation, interior architecture, landscape architecture, nonprofit management, public administration, and sports product design.

In addition, the college offers advanced study opportunities in architecture, historic preservation, product design, and sports product design at the University of Oregon in Portland, located at the historic White Stag Block. Research initiatives in urban design, housing, historic preservation, energy studies, and design are led by faculty members in partnership with area professionals, governmental leaders, and nonprofit agencies.

Admission

Admission to the major or the minor, degree requirements, and course offerings are described in the department sections of the website. Freshman and transfer students must meet University of Oregon requirements for admission to College of Design departments and programs. Work submitted for transfer credit must be approved by the major department. Please note that some majors have several application cycles a year and some invite current students to apply to the major on a rolling admission cycle.

Student Services

The Student Services office helps students in the College of Design to develop career goals and job-search strategies. The office collaborates with both administrative and academic units to provide comprehensive career-advising services including job counseling, professional mentoring, group presentations, workshops, job fairs, and several career symposiums.

Technology and Facilities

Students in the College of Design learn to explore new ideas through a combination of traditional methods and experimental techniques. The college provides access to a full array of computing applications through its instructional and research laboratories located in Eugene and Portland. A technical staff maintains these resources as well as shared large-scale color plotters and high-resolution printers. Technical support is available through Information Services, College of Design Technology Services, and informal peer consulting. Lecture rooms, studios, classrooms, and review rooms are networked (wired and wireless) to support instructional technology on Windows and Macintosh operating system workstations. The university provides server accounts for e-mail and web pages and maintains a high-speed computer network.

Facilities include classrooms, studio spaces, fabrication laboratories, workshops, galleries, the Design Library, and the Urban Farm.

Research, Scholarship, and Creative Work

Faculty members in the architecture, design, and planning fields are active in professional practices, design competitions, and theoretical studies. Faculty members in the arts participate nationally and internationally in exhibitions of their creative work.

The College of Design faculty participates in many of the university's interdisciplinary research centers, institutes, and initiatives including the Center for Art Research, Center for Latino and Latin American Studies, Fuller Center for Productive Landscapes, Institute for Health in the Built Environment, Institute for Policy Research and Engagement, Sustainable Cities Initiative, and Urbanism Next, among others.

Premajors and Nonmajors

Many courses are open to majors outside the College of Design or to students who have not yet declared a major. The college offers a range of general-education, group-satisfying courses as well as courses that satisfy multicultural requirements. In addition, students may access art and art and technology studio offerings as nonmajors, provided the appropriate course prerequisites have been completed. These courses include the following:

College of Design

Code	Title	Credits
DSGN 321	Inclusive Urbanism	4

Department of Architecture

Code	Title	Credits
ARCH 201	Introduction to Architecture	4

Department of Art

Code	Title	Credits
ART 101	Understanding Contemporary Art	4
ART 111	The Artist Experience	4
ART 115	Surface, Space, and Time	4
ART 233	Drawing I	4

Arts and Administration Program

Code	Title	Credits
AAD 250	Art and Human Values	4
AAD 251	The Arts and Visual Literacy	4

AAD 252	Art and Gender	4
AAD 301	Understanding Arts and Creative Sectors	4

Department of the History of Art and Architecture

Code	Title	Credits
ARH 101	Global Masterpieces: Monuments in Context	4
ARH 204–206	History of Western Art I-III	12
ARH 208	History of Chinese Art	4
ARH 209	History of Japanese Art	4
ARH 210	Contemporary Asian Art and Architecture	4
ARH 314–315	History of Western Architecture I-II	8
ARH 322	Ancient Greek Art & Architecture	4
ARH 323	Roman Art & Architecture	4
ARH 351	19th-Century Art	4
ARH 353	Modern Art, 1880–1950	4
ARH 354	Contemporary Art	4
ARH 358	History of Design	4
ARH 359	History of Photography	4
ARH 387	Chinese Buddhist Art	4

Department of Landscape Architecture

Code	Title	Credits
LA 260	Understanding Landscapes	4
LA 333	Photography and Environmental Values	4
LA 375	Contemporary American Landscape	4

School of Planning, Public Policy and Management

Code	Title	Credits
PPPM 201	Introduction to Public Policy	4
PPPM 202	Healthy Communities	4
PPPM 205	Introduction to City Planning	4
PPPM 280	Introduction to the Nonprofit Sector	4
PPPM 340	Climate-Change Policy	4

Department of Product Design

Code	Title	Credits
PD 101	Introduction to Product Design	4

Courses

DSGN 196. Field Studies: [Topic]. 1-2 Credits.
Repeatable.

DSGN 198. Workshop: [Topic]. 1-2 Credits.
Repeatable.

DSGN 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

DSGN 321. Inclusive Urbanism. 4 Credits.

Investigates the relationship between social-economic inclusion and the physical form of cities.

DSGN 399. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

DSGN 401. Research: [Topic]. 1-21 Credits.
Repeatable.

DSGN 404. Internship: [Topic]. 1-12 Credits.
Repeatable when topics change.

DSGN 405. Reading and Conference: [Topic]. 1-21 Credits.
Repeatable.

DSGN 406. Special Problems: [Topic]. 1-21 Credits.
Repeatable.

DSGN 407. Seminar: [Topic]. 1-5 Credits.
Repeatable.

DSGN 408. Workshop: [Topic]. 1-21 Credits.
Repeatable when topics change.

DSGN 409. Practicum: [Topic]. 1-5 Credits.
Repeatable when topics change.

DSGN 410. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

DSGN 425. Reflective Practice. 2 Credits.

Use of research in developing professional vision statements, portfolios, and synthesis papers that reflect on academic, internship, practicum, or field experiences. Identifies possibilities for future professional trajectories.

DSGN 507. Seminar: [Topic]. 1-5 Credits.
Repeatable.

DSGN 508. Workshop: [Topic]. 1-21 Credits.
Repeatable when topics change.

DSGN 510. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

DSGN 604. Internship: [Topic]. 1-12 Credits.
Repeatable.

DSGN 605. Reading and Conference: [Topic]. 1-16 Credits.
Repeatable.

DSGN 606. Special Problems: [Topic]. 1-16 Credits.
Repeatable.

DSGN 608. Workshop: [Topic]. 1-16 Credits.
Repeatable.

DSGN 609. Practicum: [Topic]. 1-5 Credits.
Repeatable when topics change.

Architecture

Nancy Cheng, Department Head

The Study of Architecture

Architectural Education

Students of architecture learn how to make physical changes to their surroundings that enhance the quality of the built environment and their community's experience of life. Within this broad purpose, architectural study and practice include the tasks of providing shelter and environmental protection, providing appropriate settings for human activities, and creating forms that are aesthetically pleasing and supportive of social well-being. In the context of rapid urbanization, climate change, transforming economies, emerging technologies, growing inequalities, and other challenges, the potential impact and value of architectural design has never been greater.

Because interdisciplinary collaboration is key to the practice of architecture, the Department of Architecture shares classes and facilities with the Interior Architecture Program and the Department of Landscape Architecture in Eugene and the Historic Preservation Program in Portland, all units within the College of Design's School of Architecture and Environment.

A central part of education in the field of architecture is the design studio, where students learn by doing—hands-on application of knowledge and skills toward the design of buildings. This type of learning is demanding, and students are expected to stay motivated and work independently and responsibly toward program and course objectives. In the design studio, continuous evaluation and response are the basic learning modes.

The department sets high standards for student performance. Advanced students often work together in courses and as collaborators with faculty members in research investigations through independent-study courses.

Preparation

Architecture is an inclusive art, bringing together a variety of disciplines. Students should prepare themselves in the following fields:

1. Social sciences
2. Natural sciences
3. Humanities
4. Fine arts

Students are also encouraged to travel and broaden their experiences related to environmental design.

Guest Instructors, Lecturers, and Critics

The Department of Architecture has an extensive program of visiting instructors, lecturers, and critics who are brought to the school each year. The program includes the Pietro Belluschi Distinguished Visiting Professor in Architectural Design.

Careers

Although most students prepare for professional registration and internship with practicing architects, others choose careers in allied fields such as construction management, environmental policy development, urban and community planning, architectural programming, and facilities management.

Accreditation

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which

is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the bachelor of architecture, the master of architecture, and the doctor of architecture. Doctor of architecture and master of architecture degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

At the University of Oregon, both the bachelor of architecture (BArch) and the master of architecture (MArch) degree programs are accredited by NAAB. The next accreditation review for these programs is 2021.

The postprofessional master of science in architecture (MS) degree program and the PhD degree program are not accredited. Admission to these programs is restricted to applicants who already hold a NAAB-accredited degree or the international equivalent.

The Architecture Curriculum

The professional curriculum in architecture has two principal objectives:

1. broad inquiry into the integrative nature of environmental design and
2. a comprehensive professional education that develops the ability to design built environments ranging from intimate personal spaces to cities.

Curriculum requirements are published in the *UO Catalog* and in the department's online curriculum guides, which include sample course sequences. Grading policies, an explanation of how students' progress is monitored through the program, and other advising information is available through the online Student Handbook. Academic advising is offered through the College of Design's Student Services and the School of Architecture and Environment's professional advisor. Students are encouraged to consult their advisor for specific information.

Professional Curriculum

The professional curriculum of the bachelor of architecture (BArch) program and the master of architecture (MArch) programs, Track I and Track II, include required architectural design studios and architectural subject courses. In addition, each program's curriculum is supplemented by professional electives.

Architectural Design

The architectural design studio is a social and interactive workplace where students work cooperatively with their peers under the guidance of faculty members with frequent input from practicing architects and experts as well as representatives of communities served by the studio's design explorations. Through design projects, students learn to respond to complex environmental and cultural contexts through the exploration of architectural form. Introductory studios emphasize creativity, design communication skills, and critical thinking fundamental to the design process; intermediate studios emphasize integration of architectural subjects with design; advanced studios emphasize comprehensive integration of these elements. Student performance in all design studios is graded on a pass/no pass basis and evaluated through final reviews, written evaluations, and exit interviews with faculty members.

Design credit may be earned only through participation in design studios. BArch and MArch Track I students are required to complete 64 design studio credits. MArch Track II students are required to complete 40 design studio credits.

Architectural Subjects

Subject courses develop theory, knowledge, and skills in architecture and related disciplines, with an emphasis on learning architectural subjects in the context of design. This course work develops design skills and examines the influences of place, human activity, spatial order, structure, construction, environmental control, professional practice, and history on the practice of architecture.

Residence Requirements

For transfer students to earn the bachelor of architecture or master of architecture degree, the following minimum course work must be successfully completed in residence:

Code	Title	Credits
ARCH 485/585	Advanced Architectural Design I	8
ARCH 486/586	Advanced Architectural Design II	8
	Design: two additional terms of architectural design	12
	Architecture subjects	30
	Upper-division, writing-intensive, general electives that delve into the literature of academic subjects outside the subject areas of architecture and interior architecture (undergraduates only)	16

Leave of Absence

University Policy

Graduate students should see the Continuous Enrollment statement in the **Graduate School** section of this catalog. Undergraduate students should contact the UO admissions office to learn how withdrawal from the university affects residency status.

Departmental Policy

Undergraduate and graduate students may interrupt the course of study for various reasons. In order for the department to plan for maximum use of resources, students must file a leave-of-absence form with the department indicating the expected date of return. Leave-of-absence status is renewable. Undergraduates may accumulate up to a total of two years of leave; they must file a departmental leave-of-absence agreement and submit a reenrollment card to the Office of the Registrar. Graduate students may accumulate up to a total of one year of leave; they must file a Graduate School leave-of-absence form, available online, and a departmental agreement, available on the department website. If the limits on accumulated leave are exceeded or the leave-of-absence terms of agreement are not met, major status may be revoked. Students who do not file a leave-of-absence agreement form with the department cannot be guaranteed access to design studio courses the year they return.

Computer Literacy Requirement

Introductory architecture courses presume knowledge of computer operations, general-use software, and Internet communications. Students lacking preparation may draw on resources at the College of Design Technology Services, the University Teaching and Learning Center, the Library and Learning Commons, or Information Technology services. By the end of their first year in the bachelor's or master's program, students are expected to have achieved basic literacy in computer graphics as an integrated tool for architectural design—diagramming, two-dimensional drawing, image processing, three-dimensional modeling, accurate sun casting, parametric modeling, and presentation methods. Students must have an awareness of building information modeling, digital fabrication,

building performance analysis software, and geographic information systems.

Students are required to have a high-speed laptop computer and a specified complement of software. Each year the department reviews its software and hardware recommendations. Minimum hardware specifications and software requirements (<https://blogs.uoregon.edu/designtech>) are posted on the department website.

Mathematics and Physics Literacy Requirement

Students are required to pass a diagnostic examination to show that they have a working knowledge of prerequisite math and physics subjects prior to enrolling in Structural Behavior (ARCH 461) or Structural Behavior (ARCH 561). Students who do not take (or do not pass) the examination are required to take a weeklong review course offered during the week prior to the start of fall term. In some cases, based on examination results, students may only be required to attend certain days of the review course.

Off-Campus Study

Students may participate in off-campus study programs hosted by the Department of Architecture, the Historic Preservation Program, the Department of Landscape Architecture, and Global Education Oregon.

Portland, Oregon

The department maintains an extension of its NAAB-accredited professional and postprofessional graduate programs at the University of Oregon in Portland, where advanced graduate and undergraduate architecture students may study. Students in the master of science or master of architecture Track II programs may complete all studies in residence in Portland or take courses in Eugene and Portland.

The University of Oregon's Portland facility, housed in the historic White Stag Block, includes studio spaces, classrooms, a fabrication shop, a computing lab, review rooms, and a library. Portland students also have access to the resources on the Eugene campus, including scholarships and financial aid. Through provisions of the Oregon University System, students in Portland may enroll in courses and use libraries at other state-system universities.

Portland is an ideal laboratory for the exploration and study of real problems in urban design and architecture. Civic and regional issues are actively studied and tested in the design studios, in courses, and through research opportunities. The school maintains strong ties with Portland's professional community of architects, planners, and developers. Additional enrichment is provided through the department's sponsorship of professional and public events. Students may take advantage of Portland's status as a major center for architectural and interior design services by seeking practicum experience or internships in local firms and organizations. The program provides interested students with opportunities to contribute to urban design projects for government agencies and nonprofit organizations in the Portland area. More information is available through the department's offices in Portland or Eugene and the department website.

Rome, Italy

The Department of Architecture and the Department of the History of Art and Architecture offer an interdisciplinary summer program in Rome, housed in the historic center of the city. Students experience the layers of history and vibrant design culture through the art, architecture and urban design of the city. Rome serves as the laboratory for courses in the areas of architectural design, media, art history, and architectural

history. Students live in apartments within walking distance of the facility. Architecture majors who have successfully completed at least four design studios are eligible to take the studio component.

Vancouver, British Columbia

This architecture and urban design program offered in the spring and based on Granville Island—one of the “world’s great public spaces”—in the heart of this multicultural, dynamic metropolis and seaport. Emily Carr University of Art and Design is the host institution for the program, with design studio and support facilities located in their Granville Island buildings. Student housing is located in Vancouver’s colorful West End and at Jericho Beach, along the West Point Grey waterfront. Students follow an integrated, design-based curriculum of four coordinated courses: an architectural design studio, a kinetic architecture seminar, an urban design and programming seminar, and an advanced 3-D digital modeling course.

Vicenza, Italy

This architecture program, offered in the spring, is based in the town of Vicenza in the Veneto region of Italy. The program is housed in the heart of Vicenza, where students have access to studio and seminar spaces, a library, and student lounge. The curriculum includes studio, media, and seminar courses that examine historic and contemporary regional architecture. This curriculum is designed for advanced architecture, interior architecture, and landscape architecture majors.

Barcelona, Spain

This summer urban design program in the Catalan city of Barcelona offers students insight into the measurement and design of urban relationships. Students use sensors and mapping to understand cities from the scale of human experience, integrating existing and newly acquired data sets to inform design insights. These methods are supported by interaction with local experts in planning, urban ecology, architecture, robotic engineering, transit, and landscape architecture. Cultural context is provided through trips to Granada to study different neighborhoods and the Alhambra. In Barcelona, students live, work, and research in the city’s newly planned three-by-three-block, pedestrian-friendly *Superilles*, designed to create a refuge from air pollution, traffic congestion, and sound pollution.

Stuttgart, Germany

A small number of Oregon students change places for a semester with students in the architecture programs at the University of Stuttgart, one of the strongest technical universities in Germany. BArch students in their third or fourth year and MArch Track I and II students who have a full year of study remaining after the exchange year are eligible. German language proficiency is required, except for specific international programs.

Tokyo, Japan

Students may spend an exchange semester studying architecture in Tokyo, Japan, at Meiji University, one of the most prominent private institutions in Japan. Graduate students enroll in English-taught courses in the International Program in Architecture and Urban Design. Undergraduate students enroll in courses taught in Japanese. Several classes of Meiji architecture students have visited the University of Oregon for short-term collaborations.

Danish International Studies Program

Architecture and interior architecture students travel to Copenhagen to participate in programs focused on architecture and urban design or

furniture design. Summer, fall, and academic-year options are offered. Credits are automatically transferred and financial aid is available. Instruction is in English.

Hong Kong, China

Students may participate in a semester-long exchange program at the University of Hong Kong, where English instruction makes Asia accessible. Students study the challenges of an ultradense metropolis and experience futuristic skyscrapers and public transit.

National University of Singapore

With its Malay, Chinese, Indian, and Western cultural influences, Singapore provides a wealth of architectural diversity. Architectural styles range from traditional Chinese temples to ultramodern buildings. This exchange program allows you to take courses (taught in English) in design and other fields at one of the top universities in the Asia-Pacific Region.

Registering for Study-Abroad Courses

Students in University of Oregon study-abroad programs enroll in courses with subject codes that are unique to individual programs. Upon completion of a program, the credits earned are transferred to fulfill the appropriate degree requirements. See Study Abroad (p. 969) in the **Supplementary Academic Programming** section of this catalog for more information.

Faculty

Kyu-Ho Ahn, associate professor (interior architecture). BFA, 1992, Hong-Ik; MFA, Iowa State. NCIDQ certificate. (2008)

Juli Brode, senior instructor.

G. Z. Brown, professor (design, environmental control systems, effect of energy and material conservation on architectural form). BA, 1964, MA, 1966, Michigan State; MBA, 1971, Akron; MArch, 1974, Yale; reg. architect, Oregon; fellow, American Institute of Architects. (1977)

Virginia Cartwright, associate professor (design, Finnish architecture, lighting). AB, 1975, California, Berkeley; MArch, 1981, Oregon. (1986)

Nancy Yen-Wen Cheng, associate professor (design, digital media). BA, 1983, Yale; MArch, 1990, Harvard; reg. architect, Massachusetts (inactive); NCARB certificate. (1996)

Donald B. Corner, professor (design, construction systems, housing production). BA, 1970, Dartmouth College; MArch, 1974, California, Berkeley; reg. architect, Massachusetts. (1979)

Howard Davis, professor (design, urban vernacular architecture, culturally sustainable urban districts); director, graduate studies. BS, 1968, Cooper Union; MS, 1970, Northwestern; MArch, 1974, California, Berkeley; Association of Collegiate Schools of Architecture Distinguished Professor. (1986)

Mark Donofrio, associate professor (design, structures, interdisciplinary design). BA, 2004, Illinois, Chicago; MArch, 2006, Illinois, Urbana-Champaign; reg. architect, Illinois. (2010)

Stephen F. Duff, associate professor (design; structures, construction, and design-build; naval architecture). BA, 1985, Washington (Seattle); MArch, 1988, MS, 1993, California, Berkeley. (1994)

Ihab Elzeyadi, professor (design, environmental control systems). BArch, 1988, Graduate Diploma in Architectural Engineering, 1990, Ain Shams University; MS, 1996, Pennsylvania State; PhD, 2001, Wisconsin, Milwaukee; reg. architect, reg. engineer, Egypt. (2001)

Michael E. Fifield, professor (design, housing, urban design). BA, 1973, California, Berkeley; MArch, 1980, California, Los Angeles; reg. architect, Oregon, Arizona, Idaho; NCARB certificate; fellow, American Institute of Architects; member, American Institute of Certified Planners. (1998)

Gerald Gast, associate professor (urban and architectural design, urban studies). BArch, 1967, MArch, 1969, Illinois; reg. architect, California. (1994)

Donald Genasci, professor (history and theory, architecture and urban design). BArch, 1963, Oregon; Dipl. in Urban Design, 1965, Architecture Association; MA, 1974, Essex; reg. architect, Oregon, NCARB certificate; Architects' Registration Council of the United Kingdom. (1977)

Mark Gillem, professor (urban design, social and cultural factors in design). BArch, 1989, Kansas; MArch, 1996, PhD, 2004, California, Berkeley; reg. architect, California, South Dakota; NCARB certificate; member, American Institute of Architects, American Institute of Certified Planners. (2005)

James W. Givens, senior instructor (design, design theory and process). BArch, 1985, MArch, 1989, Oregon. (1986)

Esther Hagenlocher, associate professor (architecture, interior architecture). Certificate of Profession—Cabinet Maker, 1987, Technical College, Stuttgart; DiplIng, 1994, State Academy of Art and Design, Stuttgart; MArch, 1998, University College, London; reg. architect, Germany (inactive). (2004)

Peter A. Keyes, associate professor (design, housing research and building technology, community design). AB, 1978, Harvard; MArch, 1983, Columbia; reg. architect, New York (inactive). (1990)

Solmaz Mohammadzadeh Kive, assistant professor (interior, history and theory). MArch, 2005, Shahid Beheshti; MArch, 2010, McGill; reg. architect, Tehran. (2017)

Alison G. Kwok, professor (design, environmental control systems). BA, 1977, Knox; MEd, 1980, Hawaii; MArch, 1990, PhD, 1997, California, Berkeley; reg. architect, California, Oregon; NCARB certificate; certified passive house consultant. (1998)

Nico Larco, professor (design, urban design, suburban development). BA, BArch, 1996, Cornell; MArch, MCUP, 2001, California, Berkeley; reg. architect, Massachusetts, NCARB certificate. (2005)

Erin Moore, associate professor (design, technology, media). BA, 1996, Smith; MArch, 2003, California, Berkeley; reg. architect, Arizona; NCARB certificate. (2008)

Brook Muller, associate professor (design theory, environmentally responsive architecture); associate dean for academic affairs. BA, 1987, Brown; MArch, 1992, Oregon. (2004)

Hans Joachim Neis, associate professor (urban and architectural design and theory). DiplIng, Darmstadt, 1976; MArch, 1979, MCP, 1980, PhD, 1989, California, Berkeley; reg. architect, urban designer, Germany. (2000)

Kevin Nute, professor (design history and theory, time-sensitive buildings). BA, 1981, BArch, 1985, Nottingham; PhD, 1993, Cambridge. (2000)

Otto P. Poticha, adjunct associate professor (design, architectural practice, community involvement in physical change). BS, 1958, Cincinnati; reg. architect, California, Colorado, Illinois (inactive), New Mexico, Oregon, Virginia (inactive), Washington, Washington, D.C. (inactive); NCARB certificate; fellow, American Institute of Architects. (1962)

Siobhan Rockcastle, assistant professor (design, lighting, environmental psychology); director, Baker Lighting Laboratory. BArch, 2008, Cornell; SMArchS, 2011, Massachusetts Institute of Technology; PhD, 2017, École polytechnique fédérale de Lausanne. (2017)

John S. Rowell, associate professor (design, construction, building enclosure). BS, 1984, British Columbia; MArch, 1990, Oregon; reg. architect, Washington, Oregon, California; NCARB certificate; member, American Institute of Architects. (1996)

Judith E. Sheine, professor (design, history and theory, housing). AB, 1975, Brown; MArch, 1979, Princeton; reg. architect, California. (2012)

Philip Speranza, associate professor (design, design communications). BS, 1997, Virginia; MArch, 2002, Columbia; reg. architect, California, New York. (2011)

Robert L. Thallon, associate professor (design, media, construction). BA, 1966, California, Berkeley; MArch, 1973, Oregon; reg. architect, Oregon, California. (1979)

Roxi Thoren, associate professor. See **Landscape Architecture**.

James T. Tice, professor (urban design, architectural history and theory). BArch, 1968, MArch, 1970, Cornell; reg. architect, California. (1990)

Glenda Fravel Utsey, associate professor (design, site-specific process and skill development, settlement patterns). BArch, 1971, MLA, 1977, Oregon. (1981)

Kevin G. Van Den Wymelenberg, professor; director, Energy Studies in Buildings Laboratory. BS, 2000, Wisconsin, Milwaukee; MArch, 2002, PhD, 2012, Washington (Seattle). (2015)

Daisy-O'lice Ida Williams, associate professor (design, design communications); BS, 2002, MArch, 2005, Florida A&M. (2011)

Jenny Young, professor (design, programming, health-care facilities). BA, 1970, Vassar; MArch, 1974, California, Berkeley; reg. architect, Oregon. (1982)

Linda K. Zimmer, associate professor (design, media, behavioral factors). BIArch, 1982, Kansas State; MIArch, 1990, Oregon; NCIDQ certificate; member, Institute of Business Designers. (1990)

Edward Allen, courtesy professor (technical teaching program). BArch, 1962, Minnesota; MArch, 1964, California, Berkeley; reg. architect, Massachusetts. (2001)

Emeriti

Wilmot G. Gilland, professor emeritus. AB, 1955, MFA, 1960, Princeton; reg. architect, California, Oregon; Fellow, American Institute of Architects. (1969)

Arthur W. Hawn, professor emeritus. BA, 1961, MA, 1964, Washington State; Fellow, Interior Design Educators Council. (1967)

Earl E. Moursund, professor emeritus. BS, 1949, Texas; MArch, 1951, Cranbrook Academy of Art; reg. architect, Texas. (1955)

Gary W. Moye, associate professor emeritus. BArch, 1967, Oregon; MArch, 1968, Pennsylvania; reg. architect, Pennsylvania, New York, Oregon. (1976)

Donald L. Peting, associate professor emeritus; assistant dean, architecture and allied arts. BArch, 1962, Illinois; MArch, 1963, California, Berkeley; reg. architect, Oregon, Washington. (1963)

James A. Pettinari, professor emeritus. BArch, 1966, Minnesota; MArch, 1970, Pennsylvania; reg. architect, Minnesota; NCARB certificate. (1975)

Guntis Plesums, professor emeritus. BArch, 1961, Minnesota; MArch, 1964, Massachusetts Institute of Technology; reg. architect, Oregon, New York. (1969)

John S. Reynolds, professor emeritus. BArch, 1962, Illinois; MArch, 1967, Massachusetts Institute of Technology; reg. architect, Oregon; fellow, American Institute of Architects; Association of Collegiate Schools of Architecture Distinguished Professor. (1967)

Michael D. Utsey, associate professor emeritus. BArch, 1967, Texas; MEvD, 1971, Yale; reg. architect, Oregon. (1967)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Architecture** (p. 647)
- **Minor** (p. 648)

Undergraduate Studies

Undergraduate programs include the bachelor of architecture (BArch) degree and the minor in architecture. The five-year professional BArch degree program is highly structured the first two years and more flexible the last three. This flexibility allows each student to establish a study sequence according to individual interests and needs. Transfer students should be aware that an accelerated program is normally possible only for students who transfer from an NAAB-accredited architecture program.

Prospective applicants who have a four-year undergraduate degree in any field must apply to the graduate program (see Graduate Admission).

Major Requirements: 231 credits

The bachelor's degree program includes requirements for a liberal education.

General-Education Requirements for Professional School Majors

Code	Title	Credits
Select one of the following:		8
WR 121 & WR 122	College Composition I and College Composition II	
WR 121 & WR 123	College Composition I and College Composition III	
General-Education Electives		
ARH 314	History of World Architecture I	4
ARH 315	History of World Architecture II	4
Select one approved group-satisfying arts and letters course		4
Select three approved group-satisfying social science courses		12
PHYS 201 & PHYS 202	General Physics and General Physics	8
Select one approved group-satisfying science course		4
Additional Requirements		
Elective courses outside the ARCH or IARC subject codes ^{1,2}		16
Select two courses that satisfy multicultural requirements from different categories, if not met in other courses ³		9
Total Credits		69

¹ Art history (ARH) courses at the 300 level or above taken beyond the art history requirement (see footnote 2) may be applied toward the upper-division, general-education elective requirements.

² These courses delve into the literature of academic subjects outside the subject areas of architecture and interior architecture. The upper-division electives may not be courses in service, weekend seminar, human development, or leisure studies. They must be taken in residence at the University of Oregon.

³ Some general-education electives may fulfill multicultural requirements.

Professional BArch Requirements: 144 credits

Code	Title	Credits
Introductory Architectural Design Studios		
ARCH 283 & ARCH 284	Architectural Design I and Architectural Design II	12
ARCH 383 & ARCH 384	Architectural Design III and Architectural Design IV	12
Intermediate Architectural Design Studios		
ARCH 484	Architectural Design (repeatable studio for all professional-degree students; BArch students must complete four terms of ARCH 484) ¹	24
Advanced Architectural Design Studios		
ARCH 485 & ARCH 486	Advanced Architectural Design I and Advanced Architectural Design II	16
General Theory		
ARCH 201	Introduction to Architecture	4
Architectural Design Theory and Practice		
ARCH 202	Design Skills	3
ARCH 222	Introduction to Architectural Computer Graphics	4

ARCH 423	Media for Design Development: [Topic]	3

Building Technology		
ARCH 461	Structural Behavior	4
ARCH 462	Wood and Steel Building Systems	4
ARCH 470	Building Construction	4
ARCH 471	Building Enclosure	4
ARCH 491	Environmental Control Systems I	8
& ARCH 492	and Environmental Control Systems II	
Approved advanced technology course ²		4
Professional Practice		
ARCH 417	Context of the Architectural Profession	4
Architectural History		
ARH 314	History of World Architecture I	4
ARH 315	History of World Architecture II	4
Two additional architectural history courses taught either in the Department of the History of Art and Architecture or the School of Architecture and Environment ³		8
Subject Area Electives ⁴		6
Total Credits		144

¹ One may be Interior Design (IARC 484) or Site Planning and Design (LA 489).

² Approved advanced technology courses vary by term; visit department website for full list.

³ Approved architectural history courses vary by term; visit department website for full list.

⁴ Approved subject area electives vary by term; visit department website for full list. One 3-credit (minimum) subject area elective must be an approved design arts course (not technology or media).

A sample plan for the bachelor of architecture degree (<http://architecture.uoregon.edu/programs/b.arch>) is available on the department website.

Minor Requirements: 26 credits

Code	Title	Credits
ARCH 201	Introduction to Architecture	4
ARCH 484	Architectural Design (only required for interior architecture and landscape architecture majors) ¹	6
Electives (see table below; any students outside of interior architecture and landscape architecture must take 22 credits of electives)		16
Total Credits		26

¹ ARCH 484 Architectural Design is a course that may not be taken by students outside of the Department of Architecture, with the exception of landscape architecture students.

Electives

Code	Title	Credits
DSGN 321	Inclusive Urbanism	4
ARCH 407	Seminar: [Topic] (Renaissance Architecture)	1-6
ARCH 407	Seminar: [Topic] (Sustainable Urbanism)	1-6
ARCH 409	Practicum: [Topic] (Off-Campus Experience)	1-6
ARCH 430	Architectural Contexts: Place and Culture	4
ARCH 439	Minimal Dwelling	3
ARCH 440	Human Context of Design	4
ARCH 450	Spatial Composition	4
ARCH 491	Environmental Control Systems I	4
ARCH 492	Environmental Control Systems II	4

It is possible to take other architecture courses and apply them to the minor with the permission of the instructor.

Undergraduates who are enrolled in any major may apply to the minor. Completed applications including a statement of support from the student's major advisor are submitted to the Department of Architecture office. Applicants must make an appointment with the architecture advisor to discuss their plan of study. Because the department's first obligation is to its majors, it cannot guarantee availability of courses for minors. Minors may register if space is available after the needs of majors have been met. Space for enrollment in the minor program is limited.

Undergraduate Admission

Interest in the program exceeds the capacity of the department. Approximately equal numbers of first-year and transfer (including change-of-major) applicants are admitted to the first year of the bachelor of architecture program each year. A smaller number of applicants from other NAAB-accredited or recognized programs are admitted as advanced transfer students. Prospective students should review application requirements posted online during the fall, well before application deadlines (see Application Deadlines in the **Admissions** section of this catalog). January 15 is the deadline for completion of both the department and university applications. Admission notices for fall term are e-mailed around April 1.

Admission to the BArch major program is through a selective review that focuses on three attributes: creative potential, academic capability, and potential for contribution to the program through diversity of background, experience, maturity, or demonstrated motivation. Students are expected to submit specific materials supporting each of these attributes (academic records, essays, recommendations, and a portfolio of creative work). Applicants need not have prior course work in building design, but they are encouraged to seek a broad foundation in the visual arts (e.g., drawing, painting, sculpture, graphic design). Experience with crafts and construction may also demonstrate evidence of creative potential.

Prospective applicants may find information about the program and application requirements on the department website (<http://architecture.uoregon.edu>).

- **Master of Architecture** (p. 649)
- **Master of Science** (p. 650)
- **Doctor of Philosophy** (p. 650)

- **Certificate in Ecological Design** (p. 652)
- **Certificate in Technical Teaching in Architecture** (p. 652)

Graduate Studies

There are three graduate degree programs in architecture: the professional master of architecture (MArch) degree, the postprofessional master of science in architecture (MS) degree, and the doctor of philosophy (PhD) degree. Graduate certificate programs (<http://architecture.uoregon.edu/programs/certificates>) sponsored by the department include ecological design, museum studies, new media and culture, Oregon leadership in sustainability, and technical teaching in architecture. Students interested in pursuing a concurrent master's degree in interior architecture (<http://architecture.uoregon.edu/programs/concurrent>) may find information about the combined degree requirements and application procedures on the Department of Architecture website.

Students enrolled in the master of science degree program must take a minimum of 45 graduate credits, of which 30 must be in architecture and 9 must be at the 600 level. The PhD degree program consists of a minimum of 66 graduate-level credits, including at least 50 credits in the Department of Architecture. These degree programs do not have a graded-credit requirement, although students who enroll for graded credits must maintain a 3.00 minimum GPA. Additional requirements for each program are listed below.

Professional Master of Architecture Degree Requirements

The professional, NAAB-accredited master of architecture (MArch) degree program prepares students for careers in architectural practice and careers in allied professions that contribute to shaping the built environment.

The department offers two tracks of study, both of which lead to the MArch degree. Track I typically takes ten terms to complete and requires 144 credits. Track II is a six-term advanced placement program that requires approximately 87 credits (the exact number determined on the basis of individual evaluation of prior course work at the time of admission).

Track I students typically complete all or most of the MArch degree program requirements at the University of Oregon, and begin the program the summer before their first full academic year of study. Students with bachelor's degrees (BA, BS) other than a preprofessional degree in architecture must apply to the Track I program.

Students with degrees in related design disciplines (e.g., landscape architecture, interior architecture, environmental design, or architecture degrees from programs at schools that are not accredited) may be given advanced standing, up to a maximum of three terms of studio credit for equivalent prior studio work. Track I students may apply to transfer to Portland after completing the introductory design studio sequence in Eugene.

Track II is for applicants who have a four-year preprofessional degree in architecture from an institution where the four-year degree is part of a "four plus two" NAAB-accredited degree program. Students admitted into Track II begin their studies fall term. Applicants who have a four-year preprofessional degree in an environmental design discipline and an equivalent amount of professional studio and course work may be considered for Track II. Track II students must fulfill the same

professional curriculum requirements as the Track I program, but are admitted with advanced standing in studio and subject-area courses. The extent of this advanced standing is determined by the department before beginning the program. This preliminary evaluation of course waivers is provisional, pending satisfactory completion of three terms in residence.

MArch Track I

Code	Title	Credits
Introductory Architectural Design Studios		
ARCH 680 & ARCH 681 & ARCH 682	Introductory Graduate Design and Introductory Graduate Design and Introductory Graduate Design	18

	Approved 500- or 600-level courses in architecture or allied fields	16
Total Credits		144

¹ LA 589 Site Planning and Design, IARC 584 Interior Design, or IARC 586 Furniture Design may be substituted for one of the required ARCH 584 Architectural Design studios.

² Students must take at least one course in each of the following historical periods: ancient, Renaissance, and modern.

Of the required 144 credits, 15 credits must be applied to an advanced study cluster (<http://architecture.uoregon.edu/current/m.arch-cluster>) or 16 credits must be applied to a specialization or 12 credits must be applied to one of the department's graduate certificate programs. Students who complete a concurrent master's degree in an allied

field may be exempt from this requirement. This work may include an independent research project.

MArch Track I Sample Plan of Study

MArch Track II

Code	Title	Credits

	Approved 500- or 600-level courses in allied fields	
Total Credits		100

¹ LA 589 Site Planning and Design, IARC 584 Interior Design, or IARC 586 Furniture Design may be substituted for one of the required ARCH 584 Architectural Design studios.

² Students must take at least one course in each of the following historical periods: ancient, Renaissance, and modern.

Of the required 87 credits done in residence, 15 credits must be applied to an advanced study cluster (<http://architecture.uoregon.edu/current/m.arch-cluster>) or 16 credits must be applied to a specialization or 12 credits must be applied to one of the department's graduate certificate programs. Students who complete a concurrent master's degree in an allied field may be exempt from this requirement. This work may include an independent research project.

Students admitted into the Track II program are expected to have completed professional courses in building technology, architectural history, architectural design, and other subject areas in their undergraduate degree program. Students with insufficient preparation may be admitted with deficiencies. Satisfaction of the specific deficiencies

may require additional course work for the degree. Students intending to enroll in the Track II program in Portland may be required to fulfill deficiencies on the Eugene campus before they may commence study in Portland.

MArch Track II Sample Plan of Study (<https://cpb-us-e1.wpmucdn.com/blogs.uoregon.edu/dist/e/14815/files/2017/07/Track-II-Architecture-Final-2kok9nw.pdf>)

Postprofessional Master of Science Degree Requirements

The master of science degree program provides an opportunity for advanced study and contribution to knowledge in the field through the thesis. It leads to the master of science in architecture (MS) as a postprofessional degree and applicants must have, or expect to complete, a professional degree in architecture to be eligible for the MS program. Students complete a minimum of four terms in residence and are required to complete 9 credits in ARCH 503 Thesis or Terminal Project (ARCH 619). Students in this program are expected to develop an individual research topic in one or more of the following areas of faculty research:

1. Building environments: quality, function and aesthetics
2. Sustainable cities and settlements, livable communities, urban design, housing design
3. Green technologies, high-performance envelopes, net-zero buildings, eco-districts
4. Craft and fabrication: green building materials and products
5. Behavioral factors: cultural, social, and economic sustainability
6. Raising levels of occupant and community member perception, performance, and health
7. Design modeling, simulations, and communications
8. Architectural and urban history, preservation, adaptive reuse

The postprofessional MS curriculum focuses on individual research that draws from professional and general university courses and consultation with the student's advisor and thesis committee. For more information about the thesis, see the **Graduate School** section of this catalog.

Doctor of Philosophy Requirements

The PhD degree program focuses on sustainable design, addressing the needs of the profession as society faces the environmental impact of its cities. It prepares students for careers at universities and other institutions engaged in research related to sustainable design, such as national research laboratories, industry research and development, public agencies, and nongovernment organizations. PhD students address research topics that encompass spatial, environmental, historical, social, political, technical, and economic factors. In addition to a rigorous understanding of building performance, aspects of sustainable community development, and broader social processes and policies, each student is expected to demonstrate an understanding of theory and research in a related focus area. Completion of the program requires demonstrated excellence through original contributions to the field. Depending on background and research goals, students can expect to complete the degree in three to six years, with four to five years being most typical. There is a minimum residency of two years of full-time graduate work at the Eugene campus.

The program supports advanced study in the following areas:

- Design and policy for sustainable cities and livable communities
- Design for climate change and adaptation
- Cultural, social, and economic sustainability
- Net-zero building and eco-district design
- Resource forecasting and simulation of place and building performance
- Energy-efficient, adaptive reuse of existing buildings
- Indoor environmental quality and occupant health
- High-performance building envelopes and green technologies
- Life-cycle building analysis design and modeling

Students are required to satisfy university PhD requirements explained in the **Graduate School** section of this catalog and on the Graduate School website. Degree requirements include the following:

- Five required theory and research courses that address qualitative and quantitative studies of environmental and building design and the planning processes that shape them
- 4 credits of supervised college teaching
- Additional course work in two focus areas, one within the department and one in a different department or program to develop knowledge of a second discipline that supports the student's research (e.g., anthropology, architectural history, biology, ecology, education, landscape architecture, planning theory, urban geography). Courses are selected in consultation with a faculty advisor
- A written comprehensive exam followed by an oral comprehensive exam upon completion of course work, typically at the end of the second year. After the student has passed both the written and oral comprehensive exams, he or she will be advanced to candidacy
- A dissertation proposal typically submitted the term following the comprehensive exams, but at least within three terms of the exams. The student forms a dissertation committee that must approve the proposal following a scheduled public proposal presentation and before undertaking the dissertation
- A public presentation and defense of the dissertation research followed by final approval by the dissertation committee

The required 84 credits are distributed as follows:

Doctor of Philosophy Degree Requirements

Code	Title	Credits
Research and Investigation ¹		
ARCH 601	Research: [Topic]	8

³ A minimum of 16 graduate credits required.

⁴ A minimum of 18 credits required.

Graduate Admission

MArch Admission

The master of architecture degree allows students to complete a professional degree leading to licensure. Students with a nonrelevant undergraduate degree are eligible for the three-year master of architecture Track I degree. The program is studio-based, with a full complement of professional courses and opportunities to focus on an area of special interest. Students may take advantage of numerous on- and off-campus opportunities for expanding their academic experience. An array of foreign-study programs and internships are offered, in addition to various opportunities to work directly with communities.

Prospective applicants may find information about the program tracks and application requirements on the department website (<https://archenvironment.uoregon.edu/architecture/apply/MArch>).

PhD Admission

Students interested in applying to the PhD program (<https://archenvironment.uoregon.edu/architecture/grad/phd>) in the Department of Architecture are encouraged to contact prospective advisors to discuss research interests. Before applying, prospective students should review additional information about the PhD program, including a typical course of study, the PhD Handbook (https://archenvironment.uoregon.edu/sites/archenvironment1.uoregon.edu/files/uo_arch_phd_handbook_8_september_20172.pdf), and funding (<https://archenvironment.uoregon.edu/architecture/grad/funding>). Admission to the PhD degree program is through a highly selective review that focuses on the applicants' prior academic and professional preparation and their demonstrated potential to make original research contributions and contribute to the teaching and research mission of the department. Prospective doctoral students must have earned a professional master of architecture degree, a postprofessional graduate degree in architecture, or a professional degree in architecture and a graduate degree in a related field.

Students admitted to the program must already hold either a master's degree in architecture from an accredited program or have an accredited professional degree in architecture and a master's degree in a related field. A current architectural license and design practice may be applied in lieu of a professional degree in architecture; however, a master's degree in a related field would still be required in this scenario.

Prospective applicants may find information about the program and application requirements on the department website (<https://archenvironment.uoregon.edu/architecture/apply/phd>).

Graduate Employee and Research Appointments

A number of graduate employee teaching or research fellowships (GEs) are available to well-qualified graduate students. MS or MArch Track II applicants with previous education in architecture or an allied field

are encouraged to apply for GE positions. MArch Track I students are typically selected in the second or third year of their degree program. Information about the GE application process is available on the department and Graduate School websites.

- **Certificate in Museum Studies**
- **Certificate in New Media and Culture**

Certificate in Ecological Design

The certificate in ecological design is an interdisciplinary program focused on the development of a practical framework for the integration of the built environment with local and regional natural systems. It is available to all graduate students within the College of Design. Participating students develop an in-depth understanding of the relationships between ecological processes, issues of cultural and social sustainability, and urban development and form, as well as how allied design and planning disciplines approach these relationships.

Students must complete a minimum of 24 credits in approved ecological design subject courses. Of these, 11–12 credits must come from a list of foundation courses; 12–13 additional credits are selected by students from a list of approved electives. A maximum of 12 credits may be counted for both the certificate and a graduate degree program, but required courses for the degree will not satisfy certificate electives. For most architecture and interior architecture students, this certificate requires 12 credits in addition to their degree requirements. Some students may need to complete prerequisites to develop subject proficiency for approved electives. More information on course requirements and application to the certificate program may be found online, aaa.uoregon.edu/certificates/ecological-design.

Certificate in Technical Teaching in Architecture

The Technical Teaching Certificate program prepares graduate students in the fields of architecture and interior architecture for teaching positions on building technology in academic and professional settings. Building technology includes subjects such as structural design, construction materials and processes, and environmental control systems. Students investigate curricula, tools, and strategies for teaching and concentrate on improving their comprehensive knowledge of the technical subjects. It is designed for graduate students enrolled in the postprofessional MS programs in architecture and interior architecture, but graduate students in the professional MArch Track I and II programs may apply. Individuals who hold a master's degree and at least one professional degree in architecture or interior architecture may apply to this certificate program without being concurrently enrolled in a master's program at the University of Oregon.

Certificate candidates must demonstrate advanced proficiency in at least one technical subject area (structures, construction, or environmental control) and have the background necessary to teach at the introductory level in the other two. This requirement may be fulfilled by submitting a portfolio documenting professional experience or prior course work to the technology faculty, or it can be met by completing a sequence of advanced courses. A minimum of 24 credits is required for the certificate. A maximum of 12 credits may be counted for both the certificate and a graduate degree program, but required courses for the degree will not satisfy certificate electives.

More information on course requirements and application to the certificate program may be found online, architecture.uoregon.edu/programs/techteaching.

Courses

ARCH 196. Field Studies: [Topic]. 1-3 Credits.

Repeatable.

ARCH 198. Workshop: [Topic]. 1-3 Credits.

Repeatable.

ARCH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ARCH 201. Introduction to Architecture. 4 Credits.

Offers a structure of principles for making places for people. Examines places, design procedures, and the use of architectural principles in general.

ARCH 202. Design Skills. 3 Credits.

Introduction to basic design processes, methods, and media.

Prereq: ARCH 201 or IARC 204; coreq: ARCH 283.

ARCH 222. Introduction to Architectural Computer Graphics. 4 Credits.

Introduces basic skills and literacy with the computer for architectural illustration, drafting, and design.

Prereq: ARCH 202.

ARCH 283. Architectural Design I. 6 Credits.

Design studio projects and exercises introducing fundamental concepts and considerations in environmental design. Teaches knowledge and skills needed in subsequent studios and professional course work.

Sequence with ARCH 284.

Prereq: ARCH 201 or IARC 204; coreq: ARCH 202.

ARCH 284. Architectural Design II. 6 Credits.

Design studio projects and exercises introducing fundamental concepts and considerations in environmental design. Teaches knowledge and skills needed in subsequent studios and professional course work.

Sequence with ARCH 283.

Prereq: ARCH 202, 283; coreq: ARCH 222.

ARCH 383. Architectural Design III. 6 Credits.

Studio projects. Integration of issues of context, activity support, spatial order, construction, structure, and environmental control. Emphasis on schematic concept formation and subsequent architectural development.

Sequence with ARCH 384.

Prereq: ARCH 284.

ARCH 384. Architectural Design IV. 6 Credits.

Studio projects. Integration of issues of context, activity support, spatial order, construction, structure, and environmental control. Emphasis on schematic concept formation and subsequent architectural development.

Sequence with ARCH 383.

Prereq: ARCH 383 and 222.

ARCH 399. Special Studies: [Topic]. 1-6 Credits.

Repeatable.

ARCH 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

Repeatable.

ARCH 403. Thesis. 1-9 Credits.

Repeatable.

ARCH 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARCH 406. Special Problems: [Topic]. 1-6 Credits.

Repeatable.

ARCH 407. Seminar: [Topic]. 1-6 Credits.

Repeatable.

ARCH 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARCH 409. Practicum: [Topic]. 1-6 Credits.

Repeatable.

ARCH 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARCH 417. Context of the Architectural Profession. 4 Credits.

Introduction to the professional practice of architecture and related careers. Examines the professional, legal, and regulatory environment; firm organization and management; marketing; contractual issues; and the construction process.

Prereq: ARCH 484 or IARC 484 or LA 489.

ARCH 423. Media for Design Development: [Topic]. 3 Credits.

Instruction in media for design process. Techniques for problem and context analysis, generating concepts, developing form, and testing proposals. Subject emphasis varies with instructor. Repeatable.

Prereq: ARCH 202.

ARCH 424. Advanced Design-Development Media: [Topic]. 3 Credits.

Advanced instruction in specific media techniques for architectural analysis and design. Subject emphasis varies with instructor. Repeatable.

Prereq: ARCH 423.

ARCH 430. Architectural Contexts: Place and Culture. 4 Credits.

How the design of buildings interacts with physical and cultural contexts of human traditions, landscape, settlements, cities, and suburbs. Historical and contemporary examples.

Prereq: ARCH 284 or architectural minor status.

ARCH 431. Community Design. 3 Credits.

Multidisciplinary examination of the history, theory, and practice in the design and development of meaningful and sustainable neighborhoods. Special focus selected by faculty. Open to all majors. Offered alternate years.

Prereq: junior standing.

ARCH 435. Principles of Urban Design. 4 Credits.

Introduction to theory and practice of urban design, comparative studies of neighborhood conservation, central city regeneration, growth policies and prospects for restructuring cities, metropolitan regions.

ARCH 436. Theory of Urban Design I. 3 Credits.

Examines the cultural and formal ideas that underlie American and European urban design. Ancient Greek to 1700.

Prereq: ARCH 430.

ARCH 437. Theory of Urban Design II. 3 Credits.

Examines the cultural and formal ideas that underlie American and European urban design. 1700 to the present.

ARCH 438. Housing Prototypes. 3 Credits.

An examination of modern housing prototypes (1920s to the present) with an emphasis on understanding the many and varied factors involved in the production of quality housing. Open to all majors.

Prereq: Junior standing.

ARCH 439. Minimal Dwelling. 3 Credits.

Examination of the design of small dwelling units for a variety of users.

Offered alternate years.

Prereq: junior standing.

ARCH 440. Human Context of Design. 4 Credits.

Theoretical principles, case studies, and technical skills for assessing user needs, developing building programs, applying research findings to design, and evaluating performance of the built environment.

Prereq: ARCH 284 or architectural minor status.

ARCH 450. Spatial Composition. 4 Credits.

Architectural space as a means to measure existence and expand awareness. Focus on compositional principles in architecture and methods for analyzing and generating spatial organizations.

Prereq: ARCH 284 or architectural minor status.

ARCH 457. The Facade. 3 Credits.

Ideas related to facade as primary surface of architectural representation. Emphasizes the facade as a mediator between internal and external building needs.

Prereq: ARCH 450.

ARCH 458. Types and Typology. 3 Credits.

Critical introduction to theory of typology that categorizes urban and architectural forms by formal characteristics and cultural meaning.

Lectures cover basic concepts, historical development, and case studies.

Prereq: ARCH 384, 450.

ARCH 461. Structural Behavior. 4 Credits.

Develops a basic understanding of structural systems or elements and their implications for architectural form. Lectures, laboratories, and case studies investigate structure in historical and contemporary buildings.

Prereq: PHYS 201, 202; passing score on diagnostic examination.

ARCH 462. Wood and Steel Building Systems. 4 Credits.

Historical development of materials. Analyzes elements, connections, and systems of wood, steel, and concrete structures from the perspective of construction process, spatial and structural design.

Prereq: ARCH 461.

ARCH 470. Building Construction. 4 Credits.

Provide an understanding of the basic materials and methods of architecture with emphasis on the design, construction and performance of primary structure.

Prereq: ARCH 284 or architectural minor status.

ARCH 471. Building Enclosure. 4 Credits.

Selection, design, detailing, and performance evaluation of building envelopes: wood, metals, glass, concrete, and masonry veneers and roofing.

Prereq: ARCH 462, 470, 491.

ARCH 476. Residential Construction. 4 Credits.

Provides an understanding of basic materials and methods of North American residential construction with emphasis on design and construction of the wood light frame. Offered alternate years.

Prereq: ARCH 484

ARCH 480. Supervised Design Teaching. 1-3 Credits.

Supervised assistance with desk critiques and tasks related to studio teaching. Written application required. Repeatable for a maximum of 3 credits.

Prereq: ARCH 384.

ARCH 484. Architectural Design. 6 Credits.

Design projects requiring comprehensive and integrative study over a wide range of project options. Individual criticism, group discussions, lectures and seminars by visiting specialists, public review of projects. Repeatable.

Prereq: ARCH 384.

ARCH 485. Advanced Architectural Design I. 8 Credits.

In-depth work on complex design projects and design development beyond that normally possible in intermediate studios. Sequence.

Prereq: 24 credits in ARCH 484.

ARCH 486. Advanced Architectural Design II. 8 Credits.

In-depth work on complex design projects and design development beyond that normally possible in intermediate studios.

Prereq: ARCH 485.

ARCH 491. Environmental Control Systems I. 4 Credits.

Influence of energy source, climate, heating, cooling, lighting, acoustics, and water and waste systems on design of buildings and sites. Architectural and mechanical means to manipulate thermal environment. Sequence.

Prereq: ARCH 284 or architecture minor status.

ARCH 492. Environmental Control Systems II. 4 Credits.

Influence of energy source, climate, heating, cooling, lighting, acoustics, and water and waste systems on design of buildings and sites. Implications of lighting, acoustics, and water and waste for architectural design.

Prereq: ARCH 284 or architecture minor status.

ARCH 493M. Passive Cooling. 4 Credits.

Conceptual and quantitative investigations of passive cooling design and performance, including precedents, shading, natural ventilation, evaporative cooling, use of thermal mass, radiant cooling assisted by cold night skies, and control scheduling, supported by field investigations and introductory energy modeling. Multilisted with ENVS 493M.

Prereq: ARCH 491.

ARCH 494M. Passive Heating. 4 Credits.

Conceptual and quantitative investigations of passive solar heating design and performance, including precedents, solar resource evaluation, glazing selection and orientation, thermal mass materials and positioning, movable insulation, and control scheduling, supported by solar site surveys and modeling in EnergyPlus. Multilisted with ENVS 494M.

Prereq: ARCH 491 or Instructor Approval

ARCH 495. Daylighting. 3 Credits.

"Daylighting"—increasing the energy efficiency of a building by maximizing the amount of daylight versus electric light—as an element in architectural design. Models and photography used to study behavior of light. Case studies and prediction techniques.

Prereq: ARCH 492.

ARCH 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ARCH 503. Thesis. 1-9 Credits.

Repeatable.

ARCH 507. Seminar: [Topic]. 1-6 Credits.

Repeatable.

ARCH 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARCH 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARCH 517. Context of the Architectural Profession. 4 Credits.

Introduction to the professional practice of architecture and related careers. Examines the professional, legal, and regulatory environment; firm organization and management; marketing; contractual issues; and the construction process.

ARCH 523. Media for Design Development: [Topic]. 3 Credits.

Instruction in media for design process. Techniques for problem and context analysis, generating concepts, developing form, and testing proposals. Subject emphasis varies with instructor. Repeatable.

Prereq: ARCH 611.

ARCH 524. Advanced Design-Development Media: [Topic]. 3 Credits.

Advanced instruction in specific media techniques for architectural analysis and design. Subject emphasis varies with instructor. Repeatable.

Prereq: ARCH 423/523.

ARCH 530. Architectural Contexts: Place and Culture. 4 Credits.

How the design of buildings interacts with physical and cultural contexts of human traditions, landscape, settlements, cities, and suburbs. Historical and contemporary examples.

Prereq: ARCH 680 or 683.

ARCH 531. Community Design. 3 Credits.

Multidisciplinary examination of the history, theory, and practice in the design and development of meaningful and sustainable neighborhoods. Special focus selected by faculty. Open to all majors. Offered alternate years.

ARCH 535. Principles of Urban Design. 4 Credits.

Introduction to theory and practice of urban design, comparative studies of neighborhood conservation, central city regeneration, growth policies and prospects for restructuring cities, metropolitan regions.

ARCH 536. Theory of Urban Design I. 3 Credits.

Examines the cultural and formal ideas that underlie American and European urban design. Ancient Greek to 1700.

ARCH 537. Theory of Urban Design II. 3 Credits.

Examines the cultural and formal ideas that underlie American and European urban design. 1700 to the present.

ARCH 538. Housing Prototypes. 3 Credits.

An examination of modern housing prototypes (1920s to the present) with an emphasis on understanding the many and varied factors involved in the production of quality housing. Open to all majors.

ARCH 539. Minimal Dwelling. 3 Credits.

Examination of the design of small dwelling units for a variety of users. Offered alternate years.

ARCH 540. Human Context of Design. 4 Credits.

Theoretical principles, case studies, and technical skills for assessing user needs, developing building programs, applying research findings to design, and evaluating performance of the built environment.

Prereq: ARCH 680 or 683.

ARCH 550. Spatial Composition. 4 Credits.

Architectural space as a means to measure existence and expand awareness. Focus on compositional principles in architecture and methods for analyzing and generating spatial organizations.

Prereq: ARCH 680.

ARCH 557. The Facade. 3 Credits.

Ideas related to facade as primary surface of architectural representation. Emphasizes the facade as a mediator between internal and external building needs.

Prereq: ARCH 450/550.

ARCH 558. Types and Typology. 3 Credits.

Critical introduction to theory of typology that categorizes urban and architectural forms by formal characteristics and cultural meaning. Lectures cover basic concepts, historical development, and case studies. Prereq: ARCH 550 and 682 or 683.

ARCH 561. Structural Behavior. 4 Credits.

Developes basic understanding of structural systems or elements and their implications for architectural form. Lectures, laboratories, and case studies investigate structure in historical and contemporary buildings. Prereq: passing score on diagnostic examination.

ARCH 562. Wood and Steel Building Systems. 4 Credits.

Historical development of materials. Analyzes elements, connections, and systems of wood, steel, and concrete structures from the perspective of construction process, spatial and structural design. Prereq: ARCH 461 or 561.

ARCH 570. Building Construction. 4 Credits.

Provide an understanding of the basic materials and methods of architecture with emphasis on the design, construction and performance of primary structure. Prereq: ARCH 680.

ARCH 571. Building Enclosure. 4 Credits.

Selection, design, detailing, and performance evaluation of building envelopes: wood, metals, glass, concrete, and masonry veneers and roofing. ARCH 562, 570, 591.

ARCH 576. Residential Construction. 4 Credits.

Provides an understanding of basic materials and methods of North American residential construction with emphasis on design and construction of the wood light frame. Offered alternate years.

ARCH 580. Supervised Design Teaching. 1-3 Credits.

Supervised assistance with desk critiques and tasks related to studio teaching. Written application required. Repeatable for a maximum of 3 credits. Prereq: ARCH 681 or 683.

ARCH 584. Architectural Design. 6 Credits.

Repeatable. Design projects requiring comprehensive and integrative study over a wide range of project options. Individual criticism, group discussions, lectures and seminars by visiting specialists, public review of projects. Prereq: ARCH 682 or 683.

ARCH 585. Advanced Architectural Design I. 8 Credits.

In-depth work on complex design projects and design development beyond that normally possible in intermediate studios. Sequence. Prereq: 30 credits in ARCH 484/584.

ARCH 586. Advanced Architectural Design II. 8 Credits.

In-depth work on complex design projects and design development beyond that normally possible in intermediate studios. Prereq: ARCH 485/585.

ARCH 591. Environmental Control Systems I. 4 Credits.

Influence of energy source, climate, heating, cooling, lighting, acoustics, and water and waste systems on design of buildings and sites. Architectural and mechanical means to manipulate thermal environment. Sequence. ARCH 680 or 683.

ARCH 592. Environmental Control Systems II. 4 Credits.

Influence of energy source, climate, heating, cooling, lighting, acoustics, and water and waste systems on design of buildings and sites. Implications of lighting, acoustics, and water and waste for architectural design. ARCH 680 or 683.

ARCH 593M. Passive Cooling. 4 Credits.

Conceptual and quantitative investigations of passive cooling design and performance, including precedents, shading, natural ventilation, evaporative cooling, use of thermal mass, radiant cooling assisted by cold night skies, and control scheduling, supported by field investigations and introductory energy modeling. Multilisted with ENV5 593M. Prereq: ARCH 591.

ARCH 594M. Passive Heating. 4 Credits.

Conceptual and quantitative investigations of passive solar heating design and performance, including precedents, solar resource evaluation, glazing selection and orientation, thermal mass materials and positioning, movable insulation, and control scheduling, supported by solar site surveys and modeling in EnergyPlus. Multilisted with ENV5 594M. Prereq: ARCH 591 or Instructor Approval

ARCH 595. Daylighting. 3 Credits.

"Daylighting"—increasing the energy efficiency of a building by maximizing the amount of daylight versus electric light—as an element in architectural design. Models and photography used to study behavior of light. Case studies and prediction techniques. Prereq: ARCH 492 or 592.

ARCH 600M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ARCH 601. Research: [Topic]. 1-6 Credits.

Repeatable.

ARCH 602. Supervised College Teaching. 1-6 Credits.

Repeatable.

ARCH 603. Dissertation. 1-9 Credits.

Repeatable.

ARCH 605. Reading and Conference: [Topic]. 1-8 Credits.

Repeatable.

ARCH 606. Special Problems: [Topic]. 1-6 Credits.

Repeatable.

ARCH 607. Seminar: [Topic]. 1-6 Credits.

Repeatable.

ARCH 608. Colloquium: [Topic]. 1-6 Credits.

Repeatable.

ARCH 609. Practicum: [Topic]. 1-6 Credits.

Repeatable.

ARCH 610. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARCH 611. Graduate Design Process. 3 Credits.

Foundation knowledge, concepts, and skills fundamental to design process and media subject areas.

ARCH 617. Built Environment Design and Theory. 4 Credits.

Investigation of design processes, planning, and construction of buildings and communities.

Prereq: conditional MArch or PhD standing.

ARCH 619. Terminal Project. 1-9 Credits.

Repeatable.

ARCH 620. Research Methods in Sustainable Design. 2-6 Credits.

Research methods to assess the design of buildings and communities; discussions include defining research themes, hypotheses, and developing thesis proposals.

Prereq: conditional MArch or PhD standing.

ARCH 633. History of Sustainable Design. 4 Credits.

History and theory of sustainable design practices; the evolution of codes and standards related to building design; perspectives and implementation strategies by leading ecological practitioners.

Prereq: conditional MArch or PhD standing.

ARCH 661. Teaching Technical Subjects in Architecture. 1-3 Credits.

Covers techniques for effective teaching. Focuses on one or more standard building-technology courses in architecture and interior architecture. Repeatable thrice for maximum of 12 credits.

ARCH 678. Advanced Research in Sustainable Design. 2-6 Credits.

Quantitative and qualitative techniques used in validating the design practice and research covering analytic approaches, including research design, surveys, case-study research, measurement, evaluation, and data presentation.

Prereq: conditional MArch or PhD standing.

ARCH 680. Introductory Graduate Design. 6 Credits.

Design projects and exercises intended to familiarize the student with fundamental concepts of environmental design. Emphasis on developing graphic skills and the capability for visual thinking that are essential to advanced studios. Sequence.

ARCH 681. Introductory Graduate Design. 6 Credits.

Design projects and exercises intended to familiarize the student with fundamental concepts of environmental design. Emphasis on developing graphic skills and the capability for visual thinking that are essential to advanced studios. Sequence.

Prereq: ARCH 680.

ARCH 682. Introductory Graduate Design. 6 Credits.

Design projects and exercises intended to familiarize the student with fundamental concepts of environmental design. Emphasis on developing graphic skills and the capability for visual thinking that are essential to advanced studios.

Prereq: ARCH 681.

ARCH 683. Graduate Architectural Design: Track II. 6 Credits.

Design to expand perception and response to issues in architectural design. Design as exploration of fundamental theoretical ideas. Studio projects require comprehensiveness and integrative study. Repeatable.

ARCH 695. Advanced Dissertation Proposal Development. 4-6 Credits.

Directed study for the development of dissertation proposals. Approval of faculty advisor required. Repeatable twice for a maximum of 18 credits based on development of proposal for dissertation.

Prereq: PhD standing.

Art

Department Head

541-346-3610

164 Lawrence Hall

5232 University of Oregon

Eugene, Oregon 97403-5232

artuo@uoregon.edu

The Department of Art curriculum approaches studio visual art through a broad range of media practices—ceramics, digital arts, drawing, fibers,

metalsmithing and jewelry, painting, photography, printmaking, and sculpture. The department encourages breadth and interdisciplinary investigation, as well as depth and discipline within media, emphasizing the development of the material skills and understanding of art-making processes as well as a conceptual and critical understanding of the context of art. As actively practicing artists themselves, faculty members offer students an introduction to the compelling challenges, questions, and rewards of artistic practice.

Three bachelor's degrees are offered by the department. A four-year program leads to the bachelor of arts (BA) or bachelor of science (BS) degree with a major in art or art and technology. The professional baccalaureate degree, the bachelor of fine arts (BFA), requires an additional fifth year of studio-intensive work. Students major in art or art and technology. At the graduate level, the master of fine arts (MFA) is the terminal professional degree in art.

In addition, students may access art studio offerings as nonmajors, provided they complete the appropriate course prerequisites. The department offers two courses that serve the larger university community as arts-and-letters group-satisfying courses.

Arts and Letters Group Courses

Code	Title	Credits
ART 101	Understanding Contemporary Art	4
ART 111	The Artist Experience	4

Faculty

Jonathan Bagby, instructor of practice (art). BA, 2009, Tennessee; MFA, 2014, Oregon. (2014)

Marissa Benedict, instructor (fibers). BFA, 2007, Rhode Island School of Design; MFA, 2011, School of the Art Institute of Chicago. (2016)

Carla Bengtson, Ann Swindells Chair in the School of Architecture and Allied Arts; professor (painting). BFA, 1980, Tyler School of Art; MFA, 1983, Yale. (1995)

Michael Bray, senior instructor (art and technology). BA, 1997, Illinois, Urbana-Champaign; MFA, 2008, Oregon. (2008)

Rebecca Childers, senior instructor (printmaking). BA, 1987, Cornell College; MFA, 1995, Iowa. (2002)

Isami Ching, senior instructor (foundations, art and technology). BA, 1994, Dartmouth College; BFA, 1998, Massachusetts College of Art and Design; MFA, 2002, Columbia. (2008)

Colleen Choquette-Raphael, senior instructor (photography). BA, 1991, BFA, 1992, Oregon; MFA, 1996, Washington (Seattle). (1997)

Jovencio de la Paz, assistant professor (fibers). BFA, 2008, School of the Art Institute of Chicago; MFA, 2012, Cranbrook Academy of Art. (2015)

Tannaz Farsi, associate professor (sculpture). BFA, 2004, West Virginia; MFA, 2007, Ohio. (2008)

Brian Gillis, professor (ceramics). BA, 2000, Humboldt State; MFA, 2002, Alfred. (2008)

Charles Hall, instructor (art and technology). BA, 1989, Oregon. (2010)

Colin Ives, associate professor (art and technology). BA, 1987, Cornell College; MA, 1992, MFA, 1994, Iowa. (2002)

Ron Jude, professor (photography). BFA, 1988, Boise State; MFA, 1992, Louisiana State. (2015)

Anya Kivarkis, associate professor (metalsmithing and jewelry). BFA, 1999, Illinois, Urbana-Champaign; MFA, 2004, State University of New York, New Paltz. (2004)

Sylvan Lionni, assistant professor (painting, drawing). BFA, 1995, School of Visual Arts; MFA, 1998, Bard College. (2011)

Charlene Liu, associate professor (printmaking); associate department head. BA, 1997, Brandeis; MFA, 2003, Columbia. (2007)

Euan Macdonald, professor of practice (art and technology). Honors degree in fine arts, 1988, Toronto; MA, European Graduate School. (2013)

Christopher Michlig, associate professor (foundations); director, graduate program. BA, 1999, Oregon; MFA, 2007, Art Center College of Design. (2013)

Donald L. Morgan, associate professor (foundations). BFA, 1993, Oregon; MFA, 2001, Art Center College of Design. (2008)

John Park, senior instructor (art and technology). BA, 2003, Oregon; MFA, 2006, State University of New York, Buffalo. (2007)

Jan Reaves, senior instructor (drawing, painting). BA, 1970, MFA, 1983, Oregon. (2000)

David Rueter, assistant professor (art and technology). BA, 2009, Oberlin College; MFA, 2013, School of the Art Institute of Chicago.

Jack T. Ryan, professor (foundations). BFA, 1992, Oregon; MFA, 2000, Georgia. (2008)

Michael Salter, professor (art and technology). BFA, 1991, Miami; MFA, 1994, North Carolina, Chapel Hill. (2005)

James Schauer, senior instructor (foundations). BFA, 1999, Montana State; MFA, 2002, Oregon. (2003)

Stacy Jo Scott, assistant professor (ceramics, digital fabrication). BFA, 2010, Oregon; MFA, 2012, Cranbrook. (2017)

Rick Silva, associate professor (art and technology). BFA, 2001, MFA, 2007, Colorado, Boulder. (2013)

Jessica Swanson, senior instructor (ceramics). BA, 1996, Whitman College; MFA, 2002, School of the Art Institute of Chicago. (2010)

Ying Tan, associate professor (art and technology). BA, 1983, Teacher's University, Shandong, China; MAEd, 1987, Georgia State. (1996)

Laura Vandenburg, professor (painting). BS, 1984, DVM, 1988, California, Davis; MFA, 1993, Hunter. (1998)

Kathleen E. Wagle, professor (metalsmithing, jewelry). BS, 1975, Portland State; MFA, 1981, Arizona State. (1994)

Tyrras Warren, senior instructor (art and technology, foundations). BA, 1998, BFA, 1998, Texas Christian; MFA, 2008, Oregon. (2009)

Amanda Wojick, professor (sculpture). BA, 1995, Colgate; MFA, 1999, Alfred; MFA, 2000, Bard. (2001)

Emeriti

Laura J. Alpert, associate professor emerita. BA, 1968, Stanford; MFA, 1971, Oregon. (1979)

Ronald J. Graff, associate professor emeritus. BFA, 1973, Kansas City Art Institute; MFA, 1975, Yale. (1981)

R. Craig Hickman, professor emeritus. BS, 1971, Portland State; MFA, 1981, Washington (Seattle). (1984)

Robert C. James, professor emeritus. BA, 1952, California, Los Angeles; MFA, 1955, Cranbrook Academy of Art. (1955)

George Kokis, professor emeritus. BFA, 1955, MFA, 1961, Alfred. (1973)

Sana Krusoe, associate professor emerita. BA, 1968, Occidental; MFA, 1987, Claremont Graduate. (1990)

Kenneth R. O'Connell, professor emeritus. BS, 1966, MFA, 1972, Oregon. (1977)

Kenneth H. Paul, associate professor emeritus. BA, 1961, MA, 1965, Wyoming. (1970)

Barbara Setsu Pickett, associate professor emerita. BS, 1971, Portland State. (1975)

Dan Powell, associate professor emeritus. BA, 1973, MA, 1977, Central Washington; MFA, 1980, Illinois. (1987)

Margaret Prentice, associate professor emerita. BFA, 1967, Arizona, Tucson; MFA, 1980, Colorado, Boulder. (1986)

Terri Warpinski, professor emerita. BA, 1979, Wisconsin, Green Bay; MFA, 1983, Iowa. (1984)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts: Art**

Undergraduate Studies

Advising and Program Planning

The department stresses the importance of interdisciplinary programs as well as concentrated study. Each student is encouraged to select a faculty advisor in the first year. It is critical to the development of a worthwhile program that the advisor be familiar with and sympathetic to the student's direction and capabilities. The importance of program planning cannot be overemphasized.

Major in Art

The bachelor of arts or bachelor of science degree with a major in art is a liberal arts degree focusing on studio art practice. The curriculum is designed to train students to think critically, communicate clearly, and work creatively. Students develop an understanding of materials and tools, formal possibilities, technical skills, critical inquiry, and ways of seeing, as well as fluency in visual languages and the articulation of meaning. They gain an understanding of the larger context of art through courses in art history and theory, opportunities to study abroad, and lectures by visiting artists.

The curriculum includes course work in eight media areas—painting, sculpture, printmaking, digital media, photography, ceramics, fibers, and metalsmithing and jewelry. While all art majors share the basic requirements such as the core foundations courses and art history, students have the flexibility to pursue more advanced course work in the areas of primary interest to them.

Application to the Major

Students apply directly to the Department of Art for admission as majors to the BA, BS, and fifth-year BFA degree programs. Write or call the department or visit the department's website for an application form. Admission screening takes place on an ongoing basis.

Bachelor's Degree Requirements

Whether studying for a bachelor of arts, bachelor of science, or bachelor of fine arts degree, all art majors complete a series of foundations courses called core studios, which are prerequisite to 200-level studio courses. This three-course structure includes an intensive studio investigation of techniques, methods, and concepts common to all areas of studio practice, emphasizing processes of experimentation, a range of technology, and translations between two-dimensional, three-dimensional, and time-based media. The core sequence includes ART 115, 116, and 233.

Bachelor of Arts: Art

Code	Title	Credits
ART 101 or ART 111	Understanding Contemporary Art The Artist Experience	4
ART 115	Surface, Space, and Time ¹	4
ART 116	Core Interdisciplinary Laboratory ¹	4
ART 233	Drawing I ¹	4
ARTD 250 or ARTD 251 or ARTD 252	Print Media Digital Arts Time-Based Digital Arts Interactive Digital Arts	4
ART 333	Drawing II	4
One 200-level or higher course in two different curricular media areas within the department		8
Three art history (ARH) courses		12
Upper-division art studio credits ²		24
Total Credits		68

¹ Students must pass the core studio courses with a P or C– or better.

² At least 24 credits of studio work must be completed in residence; 12 of these credits must be upper division.

Bachelor of Science: Art

Code	Title	Credits
ART 101 or ART 111	Understanding Contemporary Art The Artist Experience	4
ART 115	Surface, Space, and Time ¹	4
ART 116	Core Interdisciplinary Laboratory ¹	4
ART 233	Drawing I ¹	4
ARTD 250 or ARTD 251 or ARTD 252	Print Media Digital Arts Time-Based Digital Arts Interactive Digital Arts	4
ART 333	Drawing II	4
One 200-level or higher course in two different curricular media areas within the department		8
Three art history (ARH) courses		12
Upper-division art studio credits ²		24
Total Credits		68

¹ Students must pass the core studio courses with a P or C– or better.

² At least 24 credits of studio work must be completed in residence; 12 of these credits must be upper division.

Bachelor of Fine Arts: Art

The bachelor of fine arts degree is a professional baccalaureate degree requiring an additional fifth year of studio-intensive, independent work. Students apply for admission for the BFA in a particular media area in the last term of their fourth year of study. Students who are working across more than one media area may earn their degree in art, with sponsorship from faculty members in more than one media area. The application process is competitive and includes a portfolio review. Students who have completed a comparable four-year degree in art at another institution may be admitted to the BFA program. Such candidates must satisfy the university's 45-credit residence requirement.

Students must complete the five-year program with a total of 108 credits in art (a total of 220 university credits).

Three art history (ARH) courses		12
Upper-division art studio credits ²		24
Departmental Requirements for BFA in Art		
Three art history courses (ARH)		12

ARTS 409	Terminal Creative Project B.F.A. (or a Terminal Creative Project B.F.A. from ARTC, ARTF, ARTM, ARTO, ARTP, or ARTR)	6
ART 412	BFA Critique	3
ARTS 490	Issues and Practices in Sculpture (or one term of Issues and Practices chosen from ARTC, ARTF, ARTM, ARTO, ARTP, or ARTR)	3
Upper-division studio credits selected from advanced methodologies courses and independent studies		16
Total Credits		108

¹ Students must pass the core studios with a P or C– or better.

² At least 24 credits of studio work must be completed in residence; 12 of these credits must be upper division.

Major in Art and Technology

The bachelor of arts or bachelor of science degree with a major in art and technology is a liberal arts degree focusing on digital media in studio art practice. The curriculum broadly encompasses print media, time-based media, and interactivity, grounded in the history and practice of visual art and communication. Through studios, laboratories, and art history and theory courses, students gain an understanding of technical skills, visual design, theory, and the articulation of meaning. The program emphasizes creative thinking, visual communication, experimentation, and innovation.

Art and technology majors share a foundation in core studios and art history with other art majors. This connection to the history and practice of visual communication is a strength of the program.

Computers in the Curriculum

A digital tools application is at the core of the art and technology program. Although campus computer laboratories and facilities are available to students, they are heavily used, and access is limited. Students are required to purchase or have unlimited access to a personal computer. Refer to the A&AA computing services website (<http://aaa.uoregon.edu/tech/purchasing>) for equipment purchase.

Application to the Major

Students should prepare themselves for study in the broad and inclusive field of digital arts by developing a wide range of interests and skills that might include fine arts, music, computer science, writing, literature, games, popular culture, theater, journalism, and media theory and criticism. Foundation courses—Print Media Digital Arts (ARTD 250), Time-Based Digital Arts (ARTD 251) Interactive Digital Arts (ARTD 252)—provide opportunities to develop general skills and portfolio materials for application to the major.

The major in art and technology is an intensive, limited-enrollment program. Acceptance is competitive and based on documented evidence of potential to excel in the field. Admission screening takes place on a rolling basis and requires review of a portfolio of visual materials submitted by each applicant. These portfolios should display promise and creativity, but need not demonstrate extensive experience. Applications that don't include visual materials are not reviewed.

Complete a four-year program and a minimum of 180 credits, including satisfaction of general-university requirements for a BA or BS degree.

Students apply directly to the art and technology program for admission as majors. The postmark deadline for applications is February 1 for fall term admission. Write or call the Department of Art, or visit the department website for application instructions.

Bachelor's Degree Requirements

All art majors, regardless of degree, complete a series of foundations courses called core studios, which are prerequisite to 200-level studio courses. This three-course structure includes an intensive studio investigation of techniques, methods, and concepts common to all areas of studio practice, emphasizing processes of experimentation, a range of technology, and translations between two-dimensional, three-dimensional, and time-based media. The core sequence includes ART 115, 116, and 233.

Bachelor of Fine Arts: Art and Technology

The bachelor of fine arts degree with a major in art and technology is a professional baccalaureate degree requiring an additional fifth year of studio-intensive, independent work. Students enrolled in the digital arts BFA are in residence at the University of Oregon in Portland as they develop the body of work for their BFA terminal project.

Students apply to the fifth-year BFA program in their senior year as they are completing requirements for the BA or BS. The application process is competitive and includes a portfolio review. Students who have completed a comparable four-year degree in art at another institution

may be admitted to the BFA program. Such candidates must satisfy the university's 45-credit residence requirement.

Students must complete the five-year program with a total of 118 credits in digital arts (a total of 220 university credits), including satisfaction of the requirements listed above and general-university requirements for the BA or BS degree.

⁴ Three terms of course

Minor Requirements

Minor in Art

The minor requires 40 credits. Course work must be taken in at least two departmental curricular areas, excluding courses taken to fulfill the core studios requirements.

Students are encouraged to declare the minor at least three terms before graduating. At the time the minor is declared, a departmental advisor may be assigned to help the student develop an individualized program.

- **Master of Fine Arts: Art**

Graduate Studies

The department offers the master of fine arts (MFA) degree in art with concentrations in ceramics, digital arts, fibers, metalsmithing and jewelry, painting, photography, printmaking, and sculpture.

The graduate program seeks to prepare students for serious artistic practice. The objectives for students are not only to arrive at an accomplished body of work, but also to develop the practices and critical-thinking skills necessary to develop and sustain the work beyond school.

The program focuses on individual studio practice, the cultivation of a visual language, material process, and conceptual approach relevant to each student's intentions and sensibility. Students are challenged to devise strategies of experimentation and research and to cultivate an ability to articulate ideas and critical responses to work. As part of a larger community, students are expected to have a significant understanding of the historical frameworks and the contemporary discourse of art.

The MFA curriculum is designed to provide both interdisciplinary discourse and disciplinary depth. MFA students have much of their course work in common through classes such as Graduate Critique (ART 612), theory and history seminars, and special topics courses. Graduate review and thesis committees are made up of faculty members across the range of media concentrations. Through media-centered Issues and Practices seminars and independent studies, students also have opportunities to concentrate on particular areas of specialization. Specialized facilities and equipment are available in the eight media areas that compose the department—digital arts, sculpture, photography, ceramics, jewelry and metalsmithing, painting, printmaking, and fibers.

MFA Requirements

Code	Title	Credits
ART 612	Graduate Critique ¹	15
	Two graduate-level art history (ARH) courses; one must be contemporary history	8
	One art theory and criticism seminar	4
	One writing course	3

ARTS 590	Issues and Practices in Sculpture (or Issues and Practices chosen from ARTC, ARTD, ARTF, ARTM, ARTO, ARTP, or ARTR) ²	9
ARTS 609	Terminal Creative Project MFA (or Terminal Creative Project M.F.A. chosen from ARTC, ARTD, ARTF, ARTM, ARTO, ARTP, or ARTR)	18
ART 614	Graduate Studio ³	24
Additional art credits		9
Total Credits		90

¹ Five courses

² One course each year

³ Six courses in first two years

A minimum of 24 credits must be graded with a grade of mid-B or better.

Additional Requirements

- Participation in at least two graduate reviews—one prior to reclassification to graduate master's candidacy and a second prior to the MFA exhibition
- Public exhibition of the MFA thesis and final review with the terminal project committee
- Terminal creative project report

Residency Requirements

Nine consecutive terms of full-time enrollment, not including summer session, is the minimum residence requirement. Under special circumstances, an official University of Oregon leave of absence may be requested.

Formal Procedures

Application and Admission

Students applying to the master of fine arts program in the Department of Art are asked to list areas of concentration. You may list one or multiple media areas. At different stages of the admissions process, applications are reviewed by the full faculty and by faculty members specific to your areas of concentration.

Because the principal requirement is that of residence, which may not be waived, graduate transfer credits are not accepted.

Applicants must have a bachelor's degree and are expected to possess a high level of proficiency in their chosen media and a strong commitment to their work and artistic intentions. In their application, candidates should demonstrate an understanding of creative practice in the context of historical and conceptual frameworks. See the department website for specific application requirements and process.

Conditional Status

Applicants accepted by the Graduate School are given conditional admission to study for the MFA degree. Until or unless an entering student requests a specific graduate advisor, one faculty member designated by the department serves as the advisor to conditionally admitted students.

Conditional status of a candidate can be reviewed for reclassification to graduate master's after completion of at least two of the required core courses, one graduate review, at least 30 credits of course work

toward the MFA degree, and course work to remedy any background deficiencies. Faculty members from the department conduct a review of the student's academic program in spring term. Following this review, the student's advisor relays a progress report to the student and determines if the student is eligible to change classification to graduate master status.

Terminal Project and Advisor

After reclassification, the student selects a terminal project advisor from the faculty. With this advisor, the candidate selects a terminal project committee of three faculty members. A faculty member from outside the department may serve on the committee. The committee meets with the student for the project proposal, at least one progress report, and the terminal review.

Through these meetings, the committee oversees the development of the terminal project in the final year. The terminal project includes a public exhibition, a written report, and a final review by the committee.

The MFA degree is officially granted after the candidate has fulfilled all requirements, including submission to the department of a project report in a form appropriate to the nature of the project and suitable for binding for use in the Architecture and Allied Arts Library.

Art Courses

ART 101. Understanding Contemporary Art. 4 Credits.

Critical exploration of concepts surrounding and defining the experience of understanding contemporary art. Students are guided by instructors through issues relating to their work and disciplines.

ART 111. The Artist Experience. 4 Credits.

Critical exploration of concepts surrounding and defining contemporary art through the examination of the individual studio practice of members of the art faculty.

ART 115. Surface, Space, and Time. 4 Credits.

Introduces interdisciplinary media processes, critical theory, formal communication design, color theory, skills in objective evaluation and critique, and how materials, processes, and context establish meaning.

ART 116. Core Interdisciplinary Laboratory. 4 Credits.

Rigorous studio projects in the core studio sequence stressing interdisciplinary media transitions and the interrelatedness of conceptual and formal concerns.

Prereq: ART 115.

ART 198. Technical Workshop: [Topic]. 1-3 Credits.

Possible topics include Beginning Woodworking, Book Arts, Professional Practices. Repeatable when change of topic for maximum of 15 credits.

ART 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ART 233. Drawing I. 4 Credits.

Repeatable. Introduction to basic drawing concepts and practices.

ART 333. Drawing II. 4 Credits.

Emphasizes synthesis of ideas and approaches, complex subjects, investigation, and expression while building on previous drawing skills. Sequence with ART 233.

Prereq: ART 115, 116, 233.

ART 381. Letterpress. 4 Credits.

Experiments with lead and wooden type as related to graphic composition and communication. Repeatable ten times for a maximum of 44 credits.

Prereq: ART 115, 116, 233.

ART 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ART 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ART 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ART 406. Special Problems: [Topic]. 1-8 Credits.

Repeatable.

ART 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ART 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ART 409. Terminal Creative Project B.F.A. 1-12 Credits.

Repeatable.

ART 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ART 412. BFA Critique. 3 Credits.

Repeatable. Interdisciplinary critique and discussion course for B.F.A. students. Prereq: B.F.A. standing. Repeatable with change of subject.

ART 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ART 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ART 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ART 601. Research: [Topic]. 1-12 Credits.

Repeatable.

ART 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

ART 604. Internship: [Topic]. 1-12 Credits.

Repeatable.

ART 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ART 606. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

ART 607. Seminar: [Topic]. 1-4 Credits.

Repeatable. Topics change every term. If link to syllabus is not available, contact instructor by e-mail.

ART 608. Colloquium: [Topic]. 1-8 Credits.

Repeatable.

ART 609. Terminal Creative Project MFA. 1-12 Credits.

Repeatable.

ART 610. . 1-6 Credits.**ART 612. Graduate Critique. 3 Credits.**

Repeatable. Interdisciplinary critique and discussion course for MFA students. Repeatable five times for a maximum of 18 credits.

ART 614. Graduate Studio. 4 Credits.

Repeatable. Students engage in a rigorous studio practice through independent production, experimentation, and research. Faculty mentors instruct in rotation. Repeatable five times for a maximum of 24 credits.

Art: Ceramics Courses**ARTC 199. Special Studies: [Topic]. 1-5 Credits.**

Repeatable.

ARTC 255. Introduction to Ceramics. 4 Credits.

Specific skills focus each term. Subjects includes processes related to design development, forming and fabrication, firing methods, glazing.

Prereq: ART 115, 116, 233.

ARTC 354. Industrial Ceramics. 4 Credits.

Intermediate-level course focusing on skill development pertinent to ceramics industry. Emphasis on material, tools, techniques, and history. Repeatable three times for a maximum of 16 credits.

Prereq: ART 115, ART 116; one from ART 233, PD 223.

ARTC 355. Intermediate Ceramics: [Topic]. 4-5 Credits.

Advanced processes and concepts. Areas of technical focus include slip casting, glaze and decorator surface embellishment, architectural ceramic, low fire, and raku. Repeatable twice for a maximum of 12 credits.

Prereq: ARTC 255.

ARTC 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTC 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTC 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTC 406. Special Problems: [Topic]. 1-8 Credits.

Repeatable.

ARTC 407. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTC 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTC 409. Terminal Creative Project B.F.A.. 1-12 Credits.

Repeatable.

ARTC 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTC 455. Advanced Ceramics. 4 Credits.

Students will be exposed to a range of ceramic histories, technical processes, conceptual frameworks, and professional practices to develop an artistic practice. Repeatable ten times for a maximum of 44 credits.

Prereq: ARTC 255, ARTC 354, ARTC 355.

ARTC 490. Issues and Practices in Ceramics. 3-5 Credits.

Intensive critique, discussion, readings, and presentations.

Prereq: B.F.A. standing only

ARTC 507. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTC 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTC 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTC 555. Advanced Ceramics. 4 Credits.

Students will be exposed to a range of ceramic histories, technical processes, conceptual frameworks, and professional practices to develop an artistic practice. Repeatable ten times for a maximum of 44 credits.

ARTC 590. Issues and Practices in Ceramics. 3-5 Credits.

Intensive critique, discussion, readings, and presentations.

ARTC 601. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTC 604. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTC 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTC 606. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

ARTC 607. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTC 608. Colloquium: [Topic]. 1-8 Credits.

Repeatable.

ARTC 609. Terminal Creative Project MFA. 1-12 Credits.

Repeatable.

ARTC 610. . 1-6 Credits.**Art: Digital Arts Courses****ARTD 198. Technical Workshop: [Topic]. 1-3 Credits.**

Possible topics include DreamWeaver, InDesign, PhotoShop. Repeatable when change of topic for maximum of 15 credits.

ARTD 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ARTD 250. Print Media Digital Arts. 4 Credits.

Examines application of print media in contemporary visual culture; explores its use in a fine art context. Introduces digital drawing, digital photo editing, and typographic layout to visually communicate expressive concepts. Laboratories, lectures.

ARTD 251. Time-Based Digital Arts. 4 Credits.

Explores the notion of time as a medium in relation to contemporary art through which concepts of sequence, narration, scoring, and motion are expressed. Laboratories, lectures.

ARTD 252. Interactive Digital Arts. 4 Credits.

Introduces resources that the computer offers the artist. Concentrates on animation, interaction, and the web as expressive mediums. Laboratories, lectures.

ARTD 256. Introduction to Production. 4 Credits.

Traditional camera, sound, and lighting techniques in production; nonlinear editing; and key theoretical, historical, and aesthetic approaches to video art.

Prereq: J 201, ENG 260; two from ENG 265, 266, 267.

ARTD 350. Digital Drawing. 4 Credits.

Applies technology as a drawing medium to communicate concepts visually. The entire creative process is researched in an experimental studio environment.

Prereq: ART 115, 116, 233, ARTD 250.

ARTD 360. Digital Imaging. 4 Credits.

Intermediate-level focus on the proper preparation and presentation of digital images for use in print and on screen. Covers color theory.

Prereq: ART 115, 116, 233, ARTD 250.

ARTD 361. Introduction to Animation. 4 Credits.

Introduction to principles of animation, timing, sequence; key frames, in-betweens, and metamorphosis. Uses various methods to record and edit animation tests.

Prereq: ART 115, 116, 233 & ARTD 251 or ENG 260, J 201; two from ENG 265, 266, 267; one from ARTD 256, CINE 270, J 208.

ARTD 362. Digital Letterform. 4 Credits.

Concepts in the history, use, and appreciation of digital typography. Considers issues in communicative power of type and situations where it functions as message.

Prereq: ART 115, 116, 233, ARTD 250, 251, 252, 350.

ARTD 370. Digital Interactivity. 4 Credits.

Students will learn programming to interactive artworks. This class will include how to program microcontrollers and use electronics to create responsive and expressive interactive systems. Repeatable once for a maximum of 8 credits.

Prereq: ARTD 252, ART 115, ART 116, ART 233.

ARTD 378. Computational Aesthetics. 5 Credits.

Introduces screen-based programming and data navigation; use of motion, duration, and time-based interaction as a means of artistic expression. Students build navigational structures and explore stochastic principles in developing an individual approach to interactivity. Repeatable once for a maximum of 10 credits.

Prereq: ART 115, ART 116, ART 233, ARTD 252.

ARTD 379. Introduction to Video Art. 4 Credits.

Intermediate video-audio production and nonlinear editing, including camera, sound, and lighting techniques. Key theoretical, historical, and aesthetic approaches to time-based art in video and sound are surveyed.

Prereq: ART 115, 116, 233 & ARTD 251 or ENG 260, J 201; two from ENG 265, 266, 267; one from ARTD 256, CINE 270, J 208.

ARTD 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTD 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTD 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTD 406. Special Problems: [Topic]. 1-8 Credits.

Repeatable.

ARTD 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTD 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTD 409. Terminal Creative Project B.F.A.. 1-12 Credits.

Repeatable.

ARTD 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTD 412. Experimental Animation. 5 Credits.

Intermediate to advanced students explore personal creative practice and experiment with film, video, and computer animation techniques. Integrates readings, screening, and discussion with production.

Prereq: ARTD 361.

ARTD 413. Emerging Technologies. 5 Credits.

Explores use of emerging technologies in art. Create works using emerging technologies and techniques and explore contemporary artworks, philosophies, and cultural trends.

Prereq: ARTD 370, 378 or 416.

ARTD 415. Video Art: Experimental Film. 4 Credits.

Repeatable. Video and sound art practices, from conceptual deconstructions of the film-video apparatus to self-reflexive socio-political and/or cultural critique, are examined through short format and video installation. Repeatable once for a maximum of 8 credits.

ARTD 416. Programming for Artists. 4 Credits.

Introduces students to the basics of computer programming within an art context. Topics include interaction design, web development, and physical computing programming. Repeatable once for a maximum of 8 credits.

Prereq: ART 115, ART 116, ART 233, ARTD 252.

ARTD 463. Communication Design. 4 Credits.

Repeatable. Explores the communication of ideas and information through visual means. Introduces design process and principles, visual language, and the art of problem solving in visual communication. Repeatable once for maximum of 8 credits.

Prereq: ARTD 350.

ARTD 471. 3-D Computer Imaging. 5 Credits.

Repeatable. Introduces 3-D computer graphic arts: 3-D digital space and form, model building, scene composition, surface properties, lighting, and rendering 3-D images. Repeatable once for maximum of 10 credits.

Prereq: ARTD 350 or 361.

ARTD 472. 3-D Computer Animation. 5 Credits.

Repeatable. Introduces 3-D computer animation arts. Includes time and space in the digital 3-D environment, animation concepts and techniques in 3-D space, production techniques for various multimedia applications. Repeatable once for maximum of 10 credits.

Prereq: ARTD 471.

ARTD 490. Issues and Practices in Digital Arts. 1-5 Credits.

Intensive critique, discussion, readings, and presentations.

Prereq: B.F.A. standing.

ARTD 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTD 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTD 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTD 512. Experimental Animation. 5 Credits.

Intermediate to advanced students explore personal creative practice and experiment with film, video, and computer animation techniques. Integrates readings, screening, and discussion with production.

Prereq: ARTD 361, 395 or equivalent.

ARTD 513. Emerging Technologies. 5 Credits.

Explores use of emerging technologies in art. Create works using emerging technologies and techniques and explore contemporary artworks, philosophies, and cultural trends.

Prereq: ARTD 378 or 4/516.

ARTD 515. Video Art: Experimental Film. 4 Credits.

Repeatable. Video and sound art practices, from conceptual deconstructions of the film-video apparatus to self-reflexive socio-political and/or cultural critique, are examined through short format and video installation. Repeatable once for a maximum of 8 credits.

ARTD 516. Programming for Artists. 4 Credits.

Introduces students to the basics of computer programming within an art context. Topics include interaction design, web development, and physical computing programming. Repeatable once for a maximum of 8 credits.

ARTD 563. Communication Design. 4 Credits.

Repeatable. Explores the communication of ideas and information through visual means. Introduces design process and principles, visual language, and the art of problem solving in visual communication.

Repeatable once for maximum of 8 credits.

Prereq: ARTD 362, 394 or equivalent.

ARTD 571. 3-D Computer Imaging. 5 Credits.

Repeatable. Introduces 3-D computer graphic arts: 3-D digital space and form, model building, scene composition, surface properties, lighting, and rendering 3-D images. Repeatable once for maximum of 10 credits.

ARTD 572. 3-D Computer Animation. 5 Credits.

Repeatable. Introduces 3-D computer animation arts. Includes time and space in the digital 3-D environment, animation concepts and techniques in 3-D space, production techniques for various multimedia applications. Repeatable once for maximum of 10 credits.

Prereq: ARTD 4/571.

ARTD 601. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTD 604. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTD 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTD 606. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

ARTD 607. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTD 608. Colloquium: [Topic]. 1-8 Credits.

Repeatable.

ARTD 609. Terminal Creative Project MFA. 1-12 Credits.

Repeatable.

ARTD 610. . 1-6 Credits.**Art: Fibers Courses****ARTF 199. Special Studies: [Topic]. 1-5 Credits.**

Repeatable.

ARTF 270. Introduction to Fibers: [Topic]. 4 Credits.

Skills and conceptual concerns of fibers, pertaining to structural textile forms and embellished or manipulated surfaces. Introduces historical and contemporary work through slides and lectures. Repeatable twice for a maximum of 12 credits.

Prereq: ART 115, ART 116, ART 233.

ARTF 368. Textile Printing. 4 Credits.

Repeatable. Introduction to screen-printing process for fabric and alternative substrates. Textile history, the relevance of printing, and related ideas of decoration, repetition, and appropriation are explored. Repeatable five times for a maximum of 24 credits.

Prereq: ARTF 270.

ARTF 369. Woven Structures. 4 Credits.

Repeatable. Introduction to floor-loom hand weaving. Traditional and experimental use of materials, techniques, and structures are used to understand weaving as a cross-disciplinary practice. Repeatable five times for a maximum of 24 credits.

Prereq: ARTF 270.

ARTF 370. Stitchwork Strategies. 4 Credits.

Exploration of stitch techniques, including embroidery, beading, applique, collage, piecing, and quilting. Topics include public versus private, language and narrative, and dimensional forms. Repeatable three times for a maximum of 16 credits.

Prereq: ARTF 270.

ARTF 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTF 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTF 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTF 406. Special Problems: [Topic]. 1-8 Credits.

Repeatable.

ARTF 407. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTF 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTF 409. Terminal Creative Project B.F.A.. 1-12 Credits.

Repeatable.

ARTF 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTF 456. Advanced Fibers: [Topic]. 3-5 Credits.

Repeatable. Develops individual studio practice through exploration of contemporary issues in textile-based processes and expansion of the rhetoric of craft.

Prereq: one course from ARTF 267, 268, 269, 270; ARTF 368 or 369.

ARTF 507. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTF 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTF 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTF 556. Advanced Fibers: [Topic]. 3-5 Credits.

Repeatable. Develops individual studio practice through exploration of contemporary issues in textile-based processes and expansion of the rhetoric of craft.

ARTF 601. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTF 604. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTF 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTF 606. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

ARTF 607. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTF 608. Colloquium: [Topic]. 1-8 Credits.

Repeatable.

ARTF 609. Terminal Creative Project MFA. 1-12 Credits.

Repeatable.

ARTF 610. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

Art: Metalsmithing and Jewelry Courses**ARTM 199. Special Studies: [Topic]. 1-5 Credits.**

Repeatable.

ARTM 257. Introduction to Jewelry and Metalsmithing. 4 Credits.

Repeatable. Explores developing and constructing jewelry and objects rooted in material culture. Introduces historical and contemporary work through image presentations, lectures, and independent research.

Repeatable with change of course content.

Prereq: Art 115, 116, 233

ARTM 357. Metalsmithing and Jewelry: [Topic]. 3-5 Credits.

Repeatable. Further exploration of techniques related to conceptual problems. Content varies by term with a focus on individual processes: hollowware, forging, connections, casting, aluminum anodizing, enameling, stone setting.

Prereq: ARTM 257.

ARTM 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTM 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTM 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTM 406. Special Problems: [Topic]. 1-8 Credits.

Repeatable.

ARTM 407. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTM 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTM 409. Terminal Creative Project B.F.A. 1-12 Credits.

Repeatable.

ARTM 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTM 457. Metalsmithing and Jewelry: [Topic]. 3-5 Credits.

Repeatable. Emphasis on creative work. Advanced investigation of techniques and process. Content varies by term related to process focus. Includes hollow-ware, forging, connections, casting, aluminum anodizing, enameling, stone setting.

Prereq: ARTM 357.

ARTM 459. Advanced Metalsmithing and Jewelry. 3-5 Credits.

Repeatable. Emphasis on individual creative development. Various conceptual problems.

Prereq: ARTM 357.

ARTM 490. Issues and Practices in Metals. 3-5 Credits.

Intensive critique, discussion, readings, and presentations.

Prereq: B.F.A. standing only

ARTM 507. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTM 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTM 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTM 557. Metalsmithing and Jewelry: [Topic]. 3-5 Credits.

Repeatable. Emphasis on creative work. Advanced investigation of techniques and process. Content varies by term related to process focus. Includes hollow-ware, forging, connections, casting, aluminum anodizing, enameling, stone setting.
Prereq: ARTM 357 or equivalent.

ARTM 559. Advanced Metalsmithing and Jewelry. 3-5 Credits.

Repeatable. Emphasis on individual creative development. Various conceptual problems.
Prereq: ARTM 357.

ARTM 590. Issues and Practices in Metals. 3-5 Credits.

Intensive critique, discussion, readings, and presentations.
Prereq: M.F.A. standing only

ARTM 601. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTM 604. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTM 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTM 606. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

ARTM 607. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTM 608. Colloquium: [Topic]. 1-8 Credits.

Repeatable.

ARTM 609. Terminal Creative Project MFA. 1-12 Credits.

Repeatable.

ARTM 610. . 1-6 Credits.**Art: Painting Courses****ARTP 199. Special Studies: [Topic]. 1-5 Credits.**

Repeatable.

ARTP 281. Introductory Painting I. 4 Credits.

Basic visual elements and their application to painting as a means of expression. Incorporates traditional subject matter: still life, landscape, figure.
Prereq: ART 115, 116, 233.

ARTP 381. Introductory Painting II. 4 Credits.

Integrates concepts and approaches introduced in Introductory Painting I (ARTP 281) to develop more individual and complex strategies of form and meaning. Sequence with ARTP 281.
Prereq: ARTP 281.

ARTP 390. Intermediate and Advanced Painting. 4 Credits.

Repeatable. Advanced painting concepts and technical processes. Independent initiative is encouraged. Repeatable twice for a total of 12 credits.
Prereq: ARTP 381.

ARTP 391. Intermediate and Advanced Drawing. 4 Credits.

Repeatable. Continued study in observation related to visual and spatial phenomena. Repeatable twice for a total of 12 credits.
Prereq: ART 333.

ARTP 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTP 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTP 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTP 406. Special Problems: [Topic]. 1-8 Credits.

Repeatable.

ARTP 407. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTP 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTP 409. Terminal Creative Project B.F.A.. 1-12 Credits.

Repeatable.

ARTP 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTP 481. Advanced Painting Practice. 4 Credits.

Repeatable. Pursuit of individual creative practice and forming the critical intelligence necessary to develop as an artist. Sequence: ARTP 281, 381, 390.
Prereq: two terms ARTP 390.

ARTP 507. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTP 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTP 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTP 601. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTP 604. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTP 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTP 606. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

ARTP 607. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTP 608. Colloquium: [Topic]. 1-8 Credits.

Repeatable.

ARTP 609. Terminal Creative Project MFA. 1-12 Credits.

Repeatable.

ARTP 610. . 1-6 Credits.**Art: Photography Courses****ARTO 199. Special Studies: [Topic]. 1-5 Credits.**

Repeatable.

ARTO 250. Introduction to Photography. 4 Credits.

Covers basic elements of photography using a DSLR camera and provides a broad-based understanding of photographic practice in a fine art context. Sequence with ARTO 350. Repeatable once for a maximum of 8 credits.
Prereq: ART 115, ART 116, ART 233.

ARTO 350. Film and Darkroom. 4 Credits.

Technical and aesthetic consideration of black-and-white analog photography. Basics of camera, film development, and photographic print controls in the darkroom. Sequence with ARTO 250. Repeatable once for a maximum of 8 credits.
Prereq: ARTO 250.

ARTO 351. Constructed Image Photography. 4 Credits.
Repeatable. Explores processes and concepts extending beyond the single photographic image. Narrative and formal strategies in manipulation and sequencing, exploring the materiality of the photograph. Studio course. Repeatable once for a maximum of 8 credits.

ARTO 352. Creative Large-Format Photography. 4 Credits.
Repeatable. Introduces large-format cameras and their aesthetic possibilities. Four-by-five and eight-by-ten view cameras provided. Includes camera use, film and development, printing skills. Repeatable once for maximum of 8 credits.
Prereq: ARTO 350.

ARTO 401. Research: [Topic]. 1-12 Credits.
Repeatable.

ARTO 404. Internship: [Topic]. 1-12 Credits.
Repeatable.

ARTO 405. Reading and Conference: [Topic]. 1-6 Credits.
Repeatable.

ARTO 406. Special Problems: [Topic]. 1-8 Credits.
Repeatable.

ARTO 407. Seminar: [Topic]. 1-4 Credits.
Repeatable.

ARTO 408. Workshop: [Topic]. 1-6 Credits.
Repeatable.

ARTO 409. Terminal Creative Project B.F.A.. 1-12 Credits.
Repeatable.

ARTO 410. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

ARTO 450. Digital Photography II. 4 Credits.
Repeatable. Addresses advanced methods in a digital workflow and the role of photography in contemporary art practice through various constructed, aesthetic, and conceptual approaches. Repeatable once for a maximum of 8 credits.
Prereq: ARTO 250.

ARTO 455. Conceptual Strategies in Photography. 4 Credits.
Repeatable. Studies the 1960s conceptual art movement and its influence on contemporary photography practice: open-ended projects respond to various conceptual frameworks. Repeatable once for a maximum of 8 credits.
Prereq: ARTO 250.

ARTO 476. Alternative Photographic Processes. 4 Credits.
Repeatable. Combines painterly concerns with printmaking ideas and photographic principles in a mixed-media approach to contemporary image-making through historic and antiquated processes. Studio course. Repeatable once for a maximum of 8 credits.
Prereq: ARTO 350; one course from ARTO 351, ARTO 352.

ARTO 484. Advanced Photography: [Topic]. 4 Credits.
Repeatable. Investigates photographic practice and philosophy through readings and discussion; students engage in personal studio practice and class critiques. Repeatable once for maximum of 8 credits.
Prereq: ARTO 450.

ARTO 490. Issues and Practices in Photography. 3-5 Credits.
Intensive critique, discussion, readings, and presentations.
Prereq: B.F.A. standing only

ARTO 507. Seminar: [Topic]. 1-4 Credits.
Repeatable.

ARTO 508. Workshop: [Topic]. 1-6 Credits.
Repeatable.

ARTO 510. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

ARTO 550. Digital Photography II. 4 Credits.
Repeatable. Addresses advanced methods in a digital workflow and the role of photography in contemporary art practice through various constructed, aesthetic, and conceptual approaches. Repeatable once for a maximum of 8 credits.

ARTO 555. Conceptual Strategies in Photography. 4 Credits.
Repeatable. Studies the 1960s conceptual art movement and its influence on contemporary photography practice: open-ended projects respond to various conceptual frameworks. Repeatable once for a maximum of 8 credits.

ARTO 576. Alternative Photographic Processes. 4 Credits.
Repeatable. Combines painterly concerns with printmaking ideas and photographic principles in a mixed-media approach to contemporary image-making through historic and antiquated processes. Studio course. Repeatable once for a maximum of 8 credits.

ARTO 584. Advanced Photography: [Topic]. 4 Credits.
Repeatable. Investigates photographic practice and philosophy through readings and discussion; students engage in personal studio practice and class critiques. Repeatable once for maximum of 8 credits.
Prereq: ARTO 352; ARTO 353 or 4/554.

ARTO 590. Issues and Practices in Photography. 3-5 Credits.
Intensive critique, discussion, readings, and presentations.
Prereq: M.F.A. standing only

ARTO 601. Research: [Topic]. 1-12 Credits.
Repeatable.

ARTO 604. Internship: [Topic]. 1-12 Credits.
Repeatable.

ARTO 605. Reading and Conference: [Topic]. 1-6 Credits.
Repeatable.

ARTO 606. Special Problems: [Topic]. 1-12 Credits.
Repeatable.

ARTO 607. Seminar: [Topic]. 1-4 Credits.
Repeatable.

ARTO 608. Colloquium: [Topic]. 1-8 Credits.
Repeatable.

ARTO 609. Terminal Creative Project MFA. 1-12 Credits.
Repeatable.

ARTO 610. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

Art: Printmaking Courses

ARTR 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

ARTR 245. Introduction to Printmaking. 4 Credits.
Introduction to printmaking methodologies. Explores the unique print, multiples, and variable edition; techniques may include monotype, linocut, collagraph, etching, and screen print.
Prereq: ART 115, 116, 233.

ARTR 346. Relief. 4 Credits.

Creative exploration of graphic and conceptual possibilities through woodcut and related relief printing methods; techniques include block cutting, registration, single and multicolor printing. Repeatable once for a maximum of 8 credits.

Prereq: ARTR 245.

ARTR 347. Intaglio. 4 Credits.

Techniques of etching, drypoint, engraving, aquatint, soft ground, lift ground, white ground, embossment, relief plate printing. Emphasizes personal imagery development. Repeatable once for a maximum of 8 credits.

Prereq: ARTR 245.

ARTR 348. Screen Printing. 4 Credits.

Creative exploration of graphic and conceptual possibilities through screen printing; techniques include registration, color, edition printing, and stencil-making using hand-drawn, photographic, and digital methods. Repeatable once for a maximum of 8 credits.

Prereq: ARTR 245.

ARTR 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTR 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTR 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTR 406. Special Problems: [Topic]. 1-8 Credits.

Repeatable.

ARTR 407. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTR 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTR 409. Terminal Creative Project B.F.A.. 1-12 Credits.

Repeatable.

ARTR 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTR 446. Intermediate and Advanced Printmaking. 4 Credits.

Repeatable. Further exploration of printmaking techniques and concepts with an emphasis on creating a body of work; includes research, discussion, readings, and critiques.

Prereq: two terms from ARTR 245, 346, 347, 348, 349.

ARTR 490. Issues and Practices in Printmaking. 3-5 Credits.

Intensive critique, discussion, readings, and presentations.

Prereq: B.F.A. standing.

ARTR 507. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTR 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTR 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTR 546. Intermediate and Advanced Printmaking. 4-6 Credits.

Further exploration of techniques and concepts with emphasis on discussion and creative work. Content varies by term and may include color methods, chine collé, monoprints.

Repeatable. Prereq: ARTR 346 or 347 or equivalent.

ARTR 601. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTR 604. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTR 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTR 606. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

ARTR 607. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTR 608. Colloquium: [Topic]. 1-8 Credits.

Repeatable.

ARTR 609. Terminal Creative Project MFA. 1-12 Credits.

Repeatable.

ARTR 610. . 1-6 Credits.**Art: Sculpture Courses****ARTS 199. Special Studies: [Topic]. 1-5 Credits.**

Repeatable.

ARTS 288. Sculpture I: Mixed Media. 3-5 Credits.

Investigation of 3-D forms in space using a range of processes.

Repeatable when topic changes.

Prereq: ART 115, 116, 233.

ARTS 393. Sculpture II: [Topic]. 3-5 Credits.

Integration of concepts and materials in sculpture; investigation of individual methodology. Topics vary by term: wood, moldmaking, steel. Reading, presentation on issues and artists. Repeatable when topic changes.

Prereq: ARTS 288.

ARTS 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTS 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTS 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTS 406. Special Problems: [Topic]. 1-8 Credits.

Repeatable.

ARTS 407. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTS 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTS 409. Terminal Creative Project B.F.A.. 1-12 Credits.

Repeatable.

ARTS 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTS 490. Issues and Practices in Sculpture. 3-5 Credits.

Intensive critique, discussion, readings, and presentations.

Prereq: B.F.A. standing.

ARTS 491. Methodologies: [Topic]. 4 Credits.

Explores conceptually driven topics in sculpture such as formless, assemblage, and new landscapes. Sequence with ARTS 288, 393, 493. Repeatable twice for a maximum of 12 credits.

Prereq: ARTS 393.

ARTS 493. Advanced Sculpture. 4 Credits.

Designed for students who have completed several upper-division sculpture courses. Individual and group critiques; development and articulation of individual voice. Repeatable once for a maximum of 8 credits.

Prereq: ARTS 288, ARTS 393.

ARTS 507. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTS 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTS 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTS 590. Issues and Practices in Sculpture. 3-5 Credits.

Intensive critique, discussion, readings, and presentations.

Prereq: M.F.A. standing.

ARTS 591. Methodologies: [Topic]. 4 Credits.

Explores conceptually driven topics in sculpture such as formless, assemblage, and new landscapes. Repeatable twice for a maximum of 12 credits.

ARTS 601. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTS 604. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTS 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTS 606. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

ARTS 607. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTS 608. Colloquium: [Topic]. 1-8 Credits.

Repeatable.

ARTS 609. Terminal Creative Project MFA. 1-12 Credits.

Repeatable.

ARTS 610. . 1-6 Credits.

Historic Preservation

Chad Randl, Interim Program Director

503-412-3718

70 NW Couch Street, Floor 4R

Portland, Oregon 97209

The University of Oregon's Historic Preservation Program is best described as having broad cultural concerns with a technical emphasis. Attention is given to historic places, buildings, and landscapes in terms of their specific forms, materials, construction, and use. The cultural and theoretical context in which they were developed is addressed, as is the impact of time upon their materials, meanings, and needs. The technologies, interpretations, and means for sustaining the presence of historic places in the future are also emphasized.

Students gain an understanding of historic resources and the processes for their preservation. This includes core courses in research methods, preservation history and theory, architectural history, and the economic, legal, and administrative processes of preservation. Students choose from three focal areas:

1. sustainable preservation theory, design, and technology
2. cultural resource management
3. resource identification and evaluation

Other focal areas are feasible but must be approved in advance by the submission of a curriculum plan by the student by the second term of the student's first year.

Courses are augmented by fieldwork in the urban, suburban, and rural areas of the region. Oregon contains Native American sites, rural buildings and landscapes developed by U.S. and European immigrant pioneers from the 1830s, as well as urban development since the 1840s. More recent transformations of the landscape by various ethnic groups and technological innovations are also explored. Extensive instructional use of the region takes place through an emphasis on the cultural and technical aspects of vernacular resources, field trips, participation in projects at the university, and through local community groups. There is also frequent involvement with the area's professionals, officials, and agencies concerned with historic resources.

Recent opportunities for experience include window restoration and traditional earth construction workshops, documentation for a Historic American Buildings Survey for the Alaska Regional Office of the National Park Service, U.S. Department of the Interior; a preservation field guide for the community of Ebey's Landing National Historical Reserve; a condition assessment and stabilization of Gilbert's Cabin in North Cascades National Park; a condition assessment of Frank Lloyd Wright's Usonian Gordon House in Silverton, Oregon; the documentation of the Finney House frontier cabin in Nevada City, Montana; the limestone roof replacement on a late sixteenth-century stone cottage on the island of Drvenik Veli, Croatia; and the reconstruction of the Ferry House porch in Ebey's Landing National Historical Reserve, Whidbey Island, Washington.

In addition to providing hands-on training in what might be considered mainstream preservation activities, the program emphasizes the importance of cultural conservation including issues of diversity, identity, and community development. This includes a concern not only for how various ethnic groups shaped buildings and landscapes in the distant past, but how similar settings are reproduced by cultural groups in the present. Individual research efforts by students are augmented by visiting lecturers, such as those by Boyd Pratt, Jean Carroon, and Gunny Harboe.

Beyond completing core and focal area courses, each student is required to complete individualized study, including reading and thesis research, a summer internship, and a thesis or terminal project. Some former students have chosen to develop specialties and concurrent master's degrees in closely related fields such as architecture, landscape architecture, and planning, public policy and management; others have created more unique combinations with studies in museums, economic development, and Russian, East European, and Eurasian studies. Besides encouraging students to develop an individualized course of study, the program is characterized by students who exhibit self-motivation and individual initiative. These traits, which are not only expected but are also necessary for successful completion of the program, contribute to the professional growth of students. Graduates of the Historic Preservation Program are employed in preservation-related fields over a wide geographic area. Some choose to pursue work in the private sector as specialists in architectural offices or as consultants. Others serve in the public sector with municipal planning departments, state historic preservation offices, or federal cultural resources divisions.

Some graduates choose to work with nonprofit agencies, while others select careers in preservation and restoration.

Faculty

Christopher Bell, instructor (historic preservation). BA, 1998, Williams; MS, 2005, Oregon. (2009)

James Buckley, associate professor; Venerable Chair in Historic Preservation. BA, 1982, Yale; MCRP, 1986, PhD, 2000, California, Berkeley. (2016)

Elizabeth Carter, instructor (historic preservation). BA, 1988, MS, 1994, Oregon. (2005)

Eric L. Eisemann, instructor (legal issues). BA, 1974, Knox; MA, 1980, Western Kentucky; JD, 1994, Lewis and Clark. (1984)

Kingston Heath, professor (historic preservation). BA, 1968, Lake Forest; MA, 1975, Chicago; MA, 1978, PhD, 1985, Brown. (2003)

Rick Minor, courtesy adjunct instructor (archaeology). BA, 1972, California State, Fullerton; MA, 1973, PhD, 1983, Oregon. (2009)

Suzana Radivojevic, adjunct instructor (wood science). BScFE, 1997, Belgrade; PhD, 2006, Toronto. (2013)

Kirk Ranzetta, instructor (historic preservation, planning). BA, 1994, Mary Washington; MA, 1996, PhD, 2006, Delaware. (2006)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Howard Davis, architecture

Keith Eggener, history of art and architecture

Mark Eischeid, landscape architecture

Mark Gillem, architecture

Maile Hutterer, history of art and architecture

Renee A. Irvin, planning, public policy and management

Robert L. Thallon, architecture

Jenny Young, architecture

- **Minor**

Undergraduate Studies

Important note: *The Historic Preservation Program is not currently accepting new undergraduate minors during the restructuring of the School of Architecture and Allied Arts into the College of Design.*

Historic preservation is an inherently interdisciplinary field. The minor is particularly well-suited for students studying anthropology, architecture, history, the history of art and architecture, landscape architecture, and planning, public policy and management. Undergraduate students, no matter their major, are eligible to enroll in the minor, however.

The interdisciplinary minor in historic preservation requires a minimum of 27 credits as described below. The lowest accepted passing grade for courses used to complete the undergraduate minor in historic

preservation is a C– or better. Some courses required for the minor are only offered every other year.

Minor Program

Code	Title	Credits
Core Courses		
AAAP 411	Introduction to Historic Preservation	3
Select three of the following:		12
AAAP 408	Workshop: [Topic] (Pacific Northwest Field School)	
AAAP 415	Transportation and Preservation	
AAAP 421	American Architecture from a Preservation Perspective I	
AAAP 422	American Architecture from a Preservation Perspective II	
AAAP 423	American Architecture from a Preservation Perspective III	
AAAP 435	Historical Archaeology in Preservation	
AAAP 441	Legal Issues in Historic Preservation	
AAAP 451	Historic Survey and Inventory Methodology	
OXEU 488	Overseas Experimental Program: Europe	
Related Courses		
Select courses from the following:		12
AAAP 431	National Register Nomination	
AAD 429	Museum Education	
AAD 462	Cultural Policy	
ANTH 449	Cultural Resource Management	
ANTH 450	The Anthropology Museum	
ARCH 430	Architectural Contexts: Place and Culture	
ARCH 440	Human Context of Design	
ARCH 470	Building Construction	
ARH 465	American Architecture II	
ARH 466	American Architecture III	
GEOG 471	North American Historical Landscapes	
GEOG 481	GIScience I	
LA 375	Contemporary American Landscape	
PPPM 422	Grant Proposal Writing	
PPPM 432	Justice and Urban Revitalization	
PPPM 442	Sustainable Urban Development	
PPPM 448	Collaboration	
PPPM 452	Public Participation in Diverse Communities	
PPPM 480	Nonprofit Management I	
PPPM 481	Fundraising for Nonprofit Organizations	
Total Credits		27

Courses from other university departments may be substituted with approval of the program director.

To declare the minor, please complete the undergraduate minor intent form (<http://hp.uoregon.edu/sites/hp.uoregon.edu/files/downloads/HP%20Minor%20Intent%20Form%202013.pdf>) and schedule an advising appointment with the program director, James Buckley (jbuckley@uoregon.edu), to clarify your goals for enrolling in the program

and map out your curriculum. Once complete, submit your signed intent form to the program office.

- **Master of Science**

Graduate Studies

The program offers a master of science (MS) degree in historic preservation. Although no particular training is preferred, students whose backgrounds are primarily in historic preservation, architecture, landscape architecture, and architectural history are most prepared for this program. Course work includes training in the social sciences, preservation theory and law, the characteristics of historic buildings and landscapes, historic building technology, and the procedures for evaluating and recording historic sites and buildings.

The program is administered by the Historic Preservation Committee, an interdepartmental committee in the School of Architecture and Environment.

Admission

Applications to the graduate program should contain the following:

1. Completed online application and fee
2. Biographical summary
3. Educational and professional summary
4. Statement of intent
5. Selected examples of written material, graphic work, or both
6. Official transcripts of all college work
7. Three letters of recommendation, preferably from academic or professional sources

Students whose first language is not English must submit Test of English as a Foreign Language (TOEFL) scores of at least 88.

Students who want to participate in the program through the Western Regional Graduate Program (WRGP) should inquire at the historic preservation office or the Graduate School.

General university regulations about graduate admission are described in the **Graduate School** section of this catalog.

The application deadline is January 15 for admission the following fall term. Requests for more information and application materials should be directed to the office staff of the Historic Preservation Program at hispres@uoregon.edu. Information is also available on the program website.

Master of Science Requirements

The MS degree in historic preservation requires 73 credits in five areas: historic preservation core courses, architectural history core courses, focal area courses, approved electives, and individualized study courses, which include thesis or terminal project, research, and an internship. Students choose one of three focal areas in which to specialize—sustainable preservation theory, design, and technology; cultural resource management; or resource identification and evaluation.

Code	Title	Credits
Historic Preservation Core		
AAAP 508	Workshop: [Topic] (Pacific Northwest Field School)	2

AAAP 511	Introduction to Historic Preservation	3
AAAP 531	National Register Nomination	3
AAAP 541	Legal Issues in Historic Preservation	3
or AAAP 515	Transportation and Preservation	
AAAP 551	Historic Survey and Inventory Methodology	3
AAAP 610	Experimental Course: [Topic] (Thesis Proposal)	3

Architectural History Core

Select two of the following: ¹ 8

AAAP 521	American Architecture from a Preservation Perspective I	
AAAP 522	American Architecture from a Preservation Perspective II	
AAAP 523	American Architecture from a Preservation Perspective III	

Select one additional course (from the approved list) about the history of architecture, landscape architecture, interior architecture, or the history of building construction ¹ 4

Focal Area

Courses (see Focal Areas section below) 18

Electives

Courses in other focal areas, from approved list of courses, or in other departments with advisor approval 7

Individualized Study ²

AAAP 601	Research: [Topic]	2
AAAP 609	Practicum: [Topic] (Internship I)	2
AAAP 607	Seminar: [Topic] (Internship II)	3
AAAP 503	Thesis ³	12
or AAAP 611	Terminal Project	

Total Credits 73

¹ Courses must be taken for a letter grade.

² An internship is included in the Individualized Study requirements.

³ Before enrolling in Thesis (AAAP 503) or Terminal Project (AAAP 611), the student must develop a project proposal and have it approved by a committee of two or more members, at least one of whom must be University of Oregon faculty members. When the thesis or terminal project nears completion, the student must present the results of the project to faculty members and students and gain final approval of the project's documentation from the faculty committee. Requirements for the final presentation are listed in the current graduate program guide.

Focal Areas

The three focal areas described in this section reflect the particular interest areas and professional careers that are traditionally sought by program graduates. To focus their studies, students select courses from one of the three areas. Those who want to pursue a broader range of interests may select courses from more than one of the focal areas and develop an approved alternative focal area. It is the student's responsibility to construct such an alternative focal area and present it to the program director for approval no later than the second quarter of the first year of study. A full list of courses for each focal area are available on the program website: hp.uoregon.edu/master-science-degree-requirements.

- **Sustainable Preservation Theory, Design, and Technology.** Focusing on the practice of preservation, emphasis is placed on the skills needed to research, plan, and direct the restoration and adaptive reuse of buildings, places, and landscapes as well as to determine the appropriate levels of treatment.
- **Cultural Resource Management.** Embodied in historic preservation is the management of cultural resources. This focal area provides the legal, planning, and management skills needed for individuals to work within organizations that support efforts to manage cultural resources in both the public and private sectors.
- **Resource Identification and Evaluation.** This focal area reveals the insights and investigative tools for archival and cultural resource research to establish the history and context of buildings, interior spaces, and landscapes that determined settlement, organization, and a sense of place.

Courses

AAAP 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

AAAP 406. Special Problems: [Topic]. 1-6 Credits.

Repeatable when topic changes.

AAAP 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

AAAP 408. Workshop: [Topic]. 1-5 Credits.

Repeatable.

AAAP 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Current topics are American Building Construction, American Architecture from a Preservation Perspective, Research Methods.

AAAP 411. Introduction to Historic Preservation. 3 Credits.

History, evolution, modern concepts, and professional techniques of historic preservation.

AAAP 415. Transportation and Preservation. 3 Credits.

Addresses compliance issues with preservation laws relating to transportation development. Includes understanding processes and negotiating needs of the resource with the needs of transportation authorities.

AAAP 421. American Architecture from a Preservation Perspective I. 4 Credits.

American built environment from the colonial era to the federal period. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 422. American Architecture from a Preservation Perspective II. 4 Credits.

American built environment from the federal period to 1893. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 423. American Architecture from a Preservation Perspective III. 4 Credits.

American built environment from 1893 to the present. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 431. National Register Nomination. 3 Credits.

Provides information and instruction on all aspects of the National Register program and process. Facilitates completion of registration form. Prereq: AAAP 411.

AAAP 435. Historical Archaeology in Preservation. 3 Credits.

Explores the interrelationships between historical archaeology and historic preservation, two fields linked together by common interests in documentation, identification, interpretation, and preservation of heritage resources.

AAAP 438. Building Pathology: Wood. 4 Credits.

Examines scientific fundamentals of material wood properties in building construction and the application of that knowledge to preservation of wood in historic buildings.

AAAP 441. Legal Issues in Historic Preservation. 3 Credits.

Examines constitutional, statutory, and common law affecting historic preservation. Covers First Amendment, eminent domain, due process, police powers, regulatory "takings," and aesthetic zoning.

AAAP 451. Historic Survey and Inventory Methodology. 3 Credits.

Examines how historic inventories help communities plan for wise use of historic resources. Includes complete reconnaissance and survey documentation for historic properties and development of historic context statement.

AAAP 503. Thesis. 1-12 Credits.

Repeatable.

AAAP 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

AAAP 508. Workshop: [Topic]. 1-5 Credits.

Repeatable.

AAAP 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Current topics are American Building Construction, American Architecture from a Preservation Perspective, Research Methods.

AAAP 511. Introduction to Historic Preservation. 3 Credits.

History, evolution, modern concepts, and professional techniques of historic preservation.

AAAP 515. Transportation and Preservation. 3 Credits.

Addresses compliance issues with preservation laws relating to transportation development. Includes understanding processes and negotiating needs of the resource with the needs of transportation authorities.

AAAP 521. American Architecture from a Preservation Perspective I. 4 Credits.

American built environment from the colonial era to the federal period. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 522. American Architecture from a Preservation Perspective II. 4 Credits.

American built environment from the federal period to 1893. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 523. American Architecture from a Preservation Perspective III. 4 Credits.

American built environment from 1893 to the present. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 531. National Register Nomination. 3 Credits.

Provides information and instruction on all aspects of the National Register program and process. Facilitates completion of registration form. Prereq: AAAP 511.

AAAP 535. Historical Archaeology in Preservation. 3 Credits.

Explores the interrelationships between historical archaeology and historic preservation, two fields linked together by common interests in documentation, identification, interpretation, and preservation of heritage resources.

AAAP 538. Building Pathology: Wood. 4 Credits.

Examines scientific fundamentals of material wood properties in building construction and the application of that knowledge to preservation of wood in historic buildings.

AAAP 541. Legal Issues in Historic Preservation. 3 Credits.

Examines constitutional, statutory, and common law affecting historic preservation. Covers First Amendment, eminent domain, due process, police powers, regulatory "takings," and aesthetic zoning.

AAAP 551. Historic Survey and Inventory Methodology. 3 Credits.

Examines how historic inventories help communities plan for wise use of historic resources. Includes complete reconnaissance and survey documentation for historic properties and development of historic context statement.

AAAP 601. Research: [Topic]. 1-6 Credits.

Repeatable.

AAAP 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

AAAP 604. Internship: [Topic]. 1-9 Credits.

Repeatable.

AAAP 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

AAAP 606. Special Problems: [Topic]. 1-6 Credits.

Repeatable.

AAAP 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

AAAP 608. Workshop: [Topic]. 1-5 Credits.

Repeatable.

AAAP 609. Practicum: [Topic]. 1-6 Credits.

Repeatable.

AAAP 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

AAAP 611. Terminal Project. 1-12 Credits.

Repeatable.

History of Art and Architecture

Kate Mondloch, Department Head

541-346-3675
237D Lawrence Hall
5229 University of Oregon
Eugene, Oregon 97403-5229

The Department of the History of Art and Architecture offers study in the principal art and architectural traditions of Asia, the Americas, Europe, and the Mediterranean. Courses are appropriate for students interested in history, art, and the larger cultural context of society. They are also suitable for students intending to concentrate on the practice of art or environmental design. The undergraduate program prepares students for graduate studies in art history; it also leads to opportunities in the business world, art museums, and galleries. The graduate program

emphasizes both breadth and depth, and it is characterized by close working relationships between students and the faculty.

Students explore global history, culture, and society through art and architecture from antiquity to the present day. Trained to celebrate the broad spectrum of human creativity and expression, art history students are natural ambassadors of pluralism and tolerance, developing skills in appreciating visual and material culture to make them true global citizens—ideally equipped to correlate historical events and concerns with important contemporary and international phenomena.

The history of art and architecture program at Oregon is comprehensive in scope. Students learn at least one ancient or modern language associated with their main area of interest, and courses examine cultural production from around the globe. The department trains students to become guardians and advocates for culture and the arts within Oregon, the United States, and the world.

Because of this rigorous training in critical thinking and communication, art history is not merely a preprofessional major for future art historians. An art history degree prepares students to embark on an array of professional careers, including those in business, education, law, private and nonprofit organizations, professional writing, and publishing. More specialized careers include art-based professions in museums, galleries, archives, and cultural institutes.

Financial Assistance

The department offers a number of awards and scholarships for undergraduate and graduate students in art history:

- Amy and Ross Kari Scholarship in Art History
- Mr. and Mrs. Eric G. Clarke Scholarship in Oriental Art
- Gloria T. Lee Graduate Scholarship in Art History
- Gloria T. Lee Scholarship in Art History
- Ina McClung Art Scholarship Award
- Sponenburgh Endowment for the History of Aesthetics of Sculpture
- Marian C. Donnelly Award in Art History (Book Award)
- Marion Dean Ross Award in Architectural History (Book Award)
- Ellen Johnston-Laing Award in Asian Art (Book Award)

Support for travel is available through the Marian C. Donnelly Student Award, the Graduate Travel Award, the Alice Wingwall Award, and the Amy and Ross Kari Travel Grant. Students may also seek scholarship aid through the College of Design and the university's financial aid office.

Faculty

Nina Amstutz, assistant professor (18th- and 19th-century art). BA, 2004, MA 2008, PhD, 2013, Toronto. (2014)

Derek Burdette, assistant professor (Latin American art). BA, 2004, Northern Arizona; MA, 2007, PhD, 2012, Tulane. (2016)

Joyce Cheng, associate professor (modern art). BA, 2001, Northwestern; MA, 2003, PhD, 2009, Chicago. (2009)

Keith Eggner, Marion Dean Ross Distinguished Professor in Architectural History (architectural history). BA, 1985, Portland State; MA, 1989, Washington (Seattle); MA, 1993, Stanford; PhD, 1995, Stanford. (2013)

James Harper, associate professor (Renaissance and baroque art). BA, 1987, Trinity; PhD, 1998, Pennsylvania. (2000)

Maile Hutterer, assistant professor (medieval art and architecture). BA, 2004, California, Santa Barbara; PhD, 2011, New York University. (2014)

Charles H. Lachman, associate professor (Asian art). AB, 1971, Temple; MA, 1974, McMaster; PhD, 1985, Toronto. (1992)

Jenny Lin, associate professor (contemporary Asian art). BA, 2003, MA, 2007, Brown; PhD, 2012, California, Los Angeles. (2012)

Kate Mondloch, professor (contemporary art). BS, 1994, Georgetown; MA, 2000, PhD, 2005, California, Los Angeles. (2005)

Emily Scott, assistant professor (history of art and architecture and environmental studies); BA, Bryn Mawr; PhD, 2010, California, Los Angeles. (2018)

Kristen Seaman, assistant professor. MA, 2009, PhD, 2009, California, Berkeley. (2015)

Akiko Walley, Maude I. Kerns Professor of Asian Art; associate professor (Japanese art). BA, 1998, MA, 2001, Aoyama Gakuin; AM, 2004, PhD, 2009, Harvard. (2009)

Emeriti

Jeffrey M. Hurwit, professor emeritus. AB, MA, 1971, Brown; MPhil, 1972, PhD, 1975, Yale. (1980)

Esther Jacobson-Tepfer, professor emerita. BA, 1962, MA, 1964, PhD, 1970, Chicago. (1966)

Andrew Morrogh, associate professor emeritus. BA, 1966, Jesus College, Oxford; MA, 1973, PhD, 1983, Courtauld Institute, University of London. (1993)

Kathleen D. Nicholson, professor emerita. BA, 1969, Connecticut; MA, 1971, PhD, 1977, Pennsylvania. (1995)

Leland M. Roth, professor emeritus. BArch, 1966, Illinois; MPhil, 1970, PhD, 1973, Yale. (1978)

W. Sherwin Simmons, professor emeritus. BA, 1967, Yale; MA, 1975, PhD, 1979, Johns Hopkins. (1973)

Richard A. Sundt, associate professor emeritus. BA, 1967, Indiana; MA, 1973, PhD, 1981, Wisconsin, Madison. (1982)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Arts
- Art History Minor

Undergraduate Studies

The major combines the study of art and architectural history, leading to the bachelor of arts (BA) degree. The department regularly offers courses on art, architecture, and visual culture from the following time periods and regions:

- Ancient
- Medieval
- Early Modern

- Modern and Contemporary
- East Asian (Chinese and Japanese)
- European
- North American and Latin American
- Mediterranean (Greek, Roman, Near East) and Middle Eastern
- Recent courses in other areas of focus including Indian, Korean, African, and Islamic traditions

Declaring the Art History Major

Students may declare the major online (<https://design.uoregon.edu/arthistory/apply/major>) and should consult with the Student Services office in the College of Design for guidance on departmental and university-wide requirements. Majors must take art history courses for letter grades and pass them with a C– or better.

Bachelor of Arts Degree Requirements

Majors in art history are required to complete the language requirement as described under the university's bachelor of arts requirements (<http://catalog.uoregon.edu/bachelorrequirements>).

French, German, and Italian are the most commonly used languages in Western art history research; Chinese and Japanese are essential for most areas of East Asian art history. Because these languages are required for advanced research and graduate study in art history as well as other humanistic disciplines, majors are urged to choose one of them to satisfy the BA requirement. Substitution of other languages may be appropriate to a field of interest. Students are urged to consult with their advisors when selecting a language for study.

Code	Title	Credits
General Requirements		
	Studio art (e.g., drawing, sculpture, or design)	4
	Two years of a second language to satisfy BA degree requirements	27
ARH 300	Critical Approaches to Art-Historical Study	4
	Choose four of the following survey courses:	16
ARH 204	History of Western Art I	
ARH 205	History of Western Art II	
ARH 206	History of Western Art III	
ARH 208	History of Chinese Art	
ARH 209	History of Japanese Art	
ARH 210	Contemporary Asian Art and Architecture	
ARH 211	Survey of Latin American Arts	
ARH 314	History of World Architecture I	
ARH 315	History of World Architecture II	
	Eight upper-division lecture and seminar courses ¹	32

¹ Choose any 300- and 400-level courses with the exception of History of World Architecture I (ARH 314) and History of World Architecture II (ARH 315). Four of the eight courses must be at the 400 level. Of the eight required upper-division courses, two courses must be taken in any three of the following four chronological breadth areas: ancient, medieval, early modern, modern-contemporary. The remaining two courses are electives and may be taken in any area. At least four of the eight required upper-division courses must be taken in residence at the University of Oregon.

Declaring the Art History Minor

Students may declare the minor online (<https://design.uoregon.edu/arthistory/apply/minor>) and should consult with the Student Services office in the College of Design for guidance on departmental and university-wide requirements. Majors must take art history courses for letter grades and pass them with a C– or better.

Minor Requirements

Three lower-division and four upper-division art history courses (totaling 26 credits minimum) are required to complete the minor. At least 20 credits must be completed in residence at the University of Oregon (nontransfer courses), and all art and architectural history courses (subject code ARH) required for the minor must be passed with letter grades of C– or better.

Lower-division courses include any 100- or 200-level ARH courses as well as History of World Architecture I (ARH 314) and History of World Architecture II (ARH 315). Upper-division courses include any 300- or 400-level ARH courses (with the exception of ARH 314 and 315).

Honors Program

Majors in the history of art and architecture department may enroll in the department’s honors essay program if they have

1. completed two lower-division and four upper-division art history courses (one of which must be taken in residence at the University of Oregon)
2. completed Critical Approaches to Art-Historical Study (ARH 300) with a grade of A– or better
3. an average GPA of 3.50 or higher in art history courses
4. submitted the departmental honors enrollment form (available online) to the director of undergraduate studies, indicating the support of a faculty advisor

Students are urged to present a first draft of the essay to the faculty advisor six weeks before the end of the term, and a final draft must be submitted two weeks before the end of the same term.

The honors essay must demonstrate the student's ability to formulate a significant research problem. The essay should have approximately 20–25 pages of text, not including notes, bibliography, and illustrations. A copy of the honors essay is deposited in departmental files.

Honors candidates who maintain a 3.50 GPA in all courses required for the art history major are awarded departmental honors upon the approval of their essay by the faculty advisor.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Art History

Course	Title	Credits	Milestones
First Year			
Fall			
WR 121	College Composition I	4	
First term of first-year second-language sequence		4	

Lower-division art history course (subject code ARH)	May be "double-dipped" as a general-education course in arts and letters	4	
General-education course in social science (first subject)	At least two courses on the same subject are required	4	
Credits		16	
Winter			
WR 122 or WR 123	College Composition II or College Composition III	WR 123 recommen for art history majors	4
Second term of first-year second-language sequence		4	
General-education course in social science (first subject)	At least two courses on the same subject are required	4	
General-education course in science (first subject)	At least two courses on the same subject are required	4	
Credits		16	
Spring			
Third term of first-year second-language sequence		4	
Lower-division ARH course	May also satisfy international cultures multicultural course requiremer	4	
General-education course in social science (second subject)	At least one course on a different subject is required	4	

General-education course in science (first subject)	At least two courses on the same subject are required	4
Credits		16
Total Credits		48

Course Title Credits Milestones

Second Year

Fall

First term of second-year second-language sequence		4
Lower-division ARH course		4
General-education course in social science (on any subject)		4
General-education course in science (second subject)	At least one course on a different subject is required	4
Credits		16

Winter

Second term of second-year second-language sequence		4
Lower-division ARH course		4
General-education course in arts and letters (first subject)	At least two courses on the same subject are required; cannot have ARH subject code	4
General-education course in science (on any subject)		4
Credits		16

Spring

Third term of second-year second-language sequence	Complete language requirement	4
--	-------------------------------	---

300-level ARH course (except ARH 314 or 315)	Apply for art history major at beginning of term; begin taking upper-division ARH courses; consider applying for Gloria Tovar Lee Scholarship	4
--	---	---

General-education course in arts and letters (first subject)	At least two courses on the same subject are required; cannot have ARH subject code	4
General-education course in arts and letters (on any subject)	Cannot have ARH subject code	4
Credits		16
Total Credits		48

Course Title Credits Milestones

Third Year

Fall

Art studio course		Complete art history studio requirement	4
ARH 300	Critical Approaches to Art-Historical Study	Offered fall term only; consider applying for travel-research grants	4

Elective course			4
Credits			16

Winter

400-level ARH course	Some 300- and 400-level ARH courses may satisfy identity, pluralism, and tolerance multicultural course requiremer	4
Upper-division elective courses		8
Elective course		4
Credits		16

Spring

Upper-division elective course		4
400-level ARH course	This term, consider applying for book prizes and/or Gloria Tovar Lee Scholarship; consider applying to honors program	4
Upper-division elective course		4
Elective course		4
Credits		16
Total Credits		48

Course	Title	Credits	Milestones
Fourth Year			
Fall			
	300- or 400-level ARH course	4	
	400-level ARH course	4	This term, consider applying for travel-research awards; also consider applying for book prizes (spring deadline)
	Upper-division elective course	4	
	Elective course	4	
	Credits	16	

Winter

Upper-division ARH course	Complete upper-division requiremer	4
400-level ARH course	Complete 400-level requirement; students working on honors essays may consider taking a 400-level reading credit with their honors essay advisor	4
Upper-division elective course		4
Elective course		4
Credits		16

Spring

Upper-division elective course	Complete 180 minimum credits and 62 upper-division credits; complete honors essay (if relevant)	4
Credits		4
Total Credits		36

- **Master of Arts** (p. 682)
- **Doctor of Philosophy**

Graduate Studies

The Department of the History of Art and Architecture offers programs leading to the master of arts (MA) and the doctor of philosophy (PhD) degrees in art history. Applications to the graduate program are considered once a year (beginning on January 15) for the following fall term. Applications and supporting documents, including Graduate Record Examinations scores, must be received by January 15.

Master of Arts Requirements

Candidates for the MA degree must complete 45 credits in courses approved by the student's advisor, as well as satisfy the general requirements of the Graduate School for residence. Of the 45 credits,

a minimum of 36 must be graduate credits in research-based courses, taken for a letter grade.

1. Thesis (ARH 503) or a terminal project, 9 credits
2. **Graduate Seminar Requirements and First-Year Seminar Series.** Of the 36 graduate credits required, 16 must be in graduate seminars, including 4 credits in Graduate Studies in Art History (ARH 611), 8 credits in Seminar: [Topic] (ARH 607), and at least 4 credits (excluding ARH 611) in a course or courses led by your primary advisor
3. **Electives.** A minimum of 12 credits of elective courses; a maximum of 8 credits may be taken outside of the department with an advisor's permission
4. **Distribution Requirement.** Students must undertake course work in three of four historic areas: prehistoric-ancient, medieval, early modern, and modern-contemporary. Students may petition to apply a thematic or non-period-specific course toward the distribution requirement by demonstrating substantial work in the appropriate area. While it is not a requirement, students are strongly recommended to pursue both Western and non-Western courses to fulfill their distribution and elective requirements
5. **Foreign Language Requirement.** The department requires that MA degree candidates demonstrate reading proficiency in at least one foreign language. The chosen language must be approved by the student's advisor and should be relevant to the student's scholarly interests. Language proficiency is typically demonstrated in one of several ways:
 - by passing a written language exam given by the department;
 - by providing an official transcript from the University of Oregon or elsewhere that shows satisfactory completion of the second or third year of the language, as determined by the student's primary advisor;
 - by presenting evidence of having achieved equivalent results on a standardized foreign-language placement test.

The foreign language requirement may be waived for a student who has completed a high school or higher degree that employed the target language as the primary language of instruction. Students who expect to pursue a PhD should also acquire a research capability in additional languages, as appropriate to the student's area of study, as soon as possible in their academic program.

Additional information regarding the MA is available from the Department of the History of Art and Architecture office or on the website.

Doctor of Philosophy Requirements

To fulfill the requirements for the PhD, students are expected to take a total of 72 credits, selected in consultation with the student's advisor. Of the 72 credits, at least 36 credits must be in ARH courses and taken for a letter grade. Of the 36 graduate credits required, a minimum of 12 must be in graduate seminars (600 level), including Graduate Studies in Art History (ARH 611). Students are required to complete all required course work before taking their field exams. Credits earned in Reading and Conference: [Topic] (ARH 605) or Dissertation (ARH 603) cannot count toward the 36 credits required.

Students are expected to declare a major field of study by spring term of their first year. Students are required to take a minimum of 12 credits in their major field and at least 8 credits in their minor field at the graduate level (500 or 600 level) prior to taking their field exams.

Students entering the PhD program with an MA in hand may petition to waive some course work requirements to more quickly progress through the program. University policy specifies that at least one full-time academic year—the residency year—must be completed following admission into the doctoral program. During this year of residency, the student is expected to make progress toward the degree by completing course credits and satisfying doctoral degree requirements. The residency year consists of three consecutive terms of full-time UO course work toward the degree, with a minimum of 9 completed graduate credits a term. Courses in Research: [Topic] (ARH 601), Reading and Conference: [Topic] (ARH 605), and other individualized study options may be a part of the 9 credits, but the majority of the year of residency is expected to consist of regular graduate course work.

Foreign Language Requirement

Students should acquire a research capability in two foreign languages appropriate to the student's area of study as soon as possible in their academic program, unless otherwise approved by the student's advisor.

Advancement to Candidacy

Students are required to complete all required course work before taking their field exams. Students are officially advanced to candidacy in the PhD program upon completion of two written field exams: one in a major field in art and architectural history and one in a minor field in art and architectural history or another discipline with departmental approval. The department offers field examinations in the following categories:

- Greek
- Roman
- Latin American
- North American
- Medieval
- Renaissance and Baroque
- Modern
- Contemporary
- Chinese
- Japanese

Additional information regarding the PhD is available from the Department of the History of Art and Architecture office or on the website.

Courses

ARH 101. Global Masterpieces: Monuments in Context. 4 Credits.

Introduction to art and architectural history through examination of thirteen key sites from around the world. Themes include religion, politics, domesticity, and modernity.

ARH 150. Introduction to Visual Culture. 4 Credits.

This course introduces to students to a wide variety of methods for looking at and analyzing images and objects of visual culture, drawing on concepts and methods from art history, anthropology, archaeology, and media studies.

ARH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ARH 204. History of Western Art I. 4 Credits.

Historical survey of visual arts. Selected works of painting, sculpture, architecture, and other arts studied in relation to the ancient cultures producing them.

ARH 205. History of Western Art II. 4 Credits.

Historical survey of visual arts. Selected works of painting, sculpture, architecture, and other arts studied in relation to the medieval to early Renaissance cultures producing them.

ARH 206. History of Western Art III. 4 Credits.

Historical survey of visual arts. Selected works of painting, sculpture, architecture, and other arts studied in relation to the Renaissance to modern cultures producing them.

ARH 208. History of Chinese Art. 4 Credits.

Historical survey of the visual arts of China. Selected works of painting, sculpture, architecture, and other arts studied in relation to the culture in which they were produced.

ARH 209. History of Japanese Art. 4 Credits.

Historical survey of the visual arts of Japan. Selected works of painting, sculpture, architecture, and other arts studied in relation to the culture in which they were produced.

ARH 210. Contemporary Asian Art and Architecture. 4 Credits.

Broad survey of modern and contemporary Asian art, architecture, and film.

ARH 211. Survey of Latin American Arts. 4 Credits.

Overview of the rich tradition of visual arts within Latin America from the pre-Columbian period, through the art of the Spanish viceroyalties, to the contemporary artistic landscape.

ARH 300. Critical Approaches to Art-Historical Study. 4 Credits.

Methodologies used to study art history (historic, iconographic, formal). Materials drawn from Asian and Western artistic traditions; bibliography, oral presentations, and papers.
Prereq: junior standing, major status.

ARH 314. History of World Architecture I. 4 Credits.

Survey of global architectural developments from prehistory to the Middle Ages. Series with ARH 315.

ARH 315. History of World Architecture II. 4 Credits.

Survey of global architectural developments from c. 1400 to the present. Series with ARH 314.

ARH 316. Gothic Architecture. 4 Credits.

A specialized survey of Gothic architecture in western Europe (c. 1140 to c. 1500). This course gives special consideration to the constructional and structural developments of the Gothic period, but will also consider architecture in relationship to social, religious, and economic practices.

ARH 317. Romanesque Architecture. 4 Credits.

Examines Romanesque architecture through the lens of pilgrimage, a major cultural force in the Middle Ages.

ARH 322. Ancient Greek Art & Architecture. 4 Credits.

This course is a survey of the art and architecture of the ancient Greek world, encompassing works throughout the ancient Mediterranean and Near East from the Bronze Age through the Hellenistic period.

ARH 323. Roman Art & Architecture. 4 Credits.

This course is a survey of the art and architecture of Republican and Imperial Rome, encompassing works throughout the ancient Mediterranean and Near East.

ARH 325. Islamic Art & Architecture. 4 Credits.

This course is a survey of visual culture from the Islamic world, beginning with its origins in the seventh century CE.

ARH 326. The Acropolis of Athens. 4 Credits.

The principal architectural and sculptural monuments of the Athenian Acropolis. Emphasis on works from the Age of Pericles. Selected literary texts read in translation.

ARH 327. Medieval Art. 4 Credits.

Introduction to the most important monuments of the Middle Ages, spanning the fourth through the 15th centuries with the primary focus on Western Europe and Byzantium.

ARH 341. Italian Renaissance Art. 4 Credits.

Painting and sculpture of the Renaissance and mannerist periods analyzed in terms of style, iconography, theory, patronage, and social context.

ARH 343. Northern Renaissance Art. 4 Credits.

Painting and graphic arts in the Netherlands, Germany, and France in the 15th and 16th centuries. Van Eyck, Durer, Holbein, other leading artists. Harper.

ARH 344. Northern Baroque Art. 4 Credits.

North Netherlandish, Flemish, and French art of the late 16th and 17th centuries. Changes in patrons, markets, and meaning for art. Rembrandt, Vermeer, Rubens, Poussin, other leading artists.

ARH 348. Rome in Age of Bernini. 4 Credits.

Painting, sculpture, architecture, urbanism in 17th-century Rome with special reference to Bernini, the dominant figure. Patronage and society in the city of the popes.

ARH 350. History of Manga. 4 Credits.

Survey of the history of Manga (Japanese comics) from the 19th Century to the present.

ARH 351. 19th-Century Art. 4 Credits.

Introduction to artistic movements in Europe from 1780 to the 1880s including neoclassicism, romanticism, realism, and impressionism.

ARH 352. Art of the Enlightenment. 4 Credits.

Explores European art of the 18th century. Lectures cover major movements—rococo, chinoiserie, neoclassicism, early romanticism—in the context of changing social values, the scientific revolution, secularization, and globalization.

ARH 353. Modern Art, 1880–1950. 1-4 Credits.

Modern art from postimpressionism to abstract expressionism in relation to intellectual and historical developments. Series with ARH 354.

ARH 354. Contemporary Art. 4 Credits.

Survey of contemporary art in the West from 1945 to the present in relation to historical, social, cultural, and political concerns.

ARH 358. History of Design. 4 Credits.

Design from the late 18th century to the present—considered in relation to social, political, and technological developments.

ARH 359. History of Photography. 4 Credits.

Photography from the early 19th-century to the present, aesthetics of the medium, its relationship to painting and the graphic arts, and its social role.

ARH 372. Arts of Colonial Latin America. 4 Credits.

This course examines the role of art and architecture in colonial Latin America (ca. 1492- 19th century).

ARH 373. 20th Century Latin American Art. 4 Credits.

Examines art and architecture across 20th-century Latin America, with special emphasis on the formation and expression of ethnic, cultural, regional, and national identity through them.

ARH 387. Chinese Buddhist Art. 4 Credits.

Introduction to selective aspects of the history of Buddhist art in China. Emphasis on sculpture and painting.

ARH 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable. Offerings vary from year to year and reflect the interests of faculty members.

ARH 401. Research: [Topic]. 1-5 Credits.

Repeatable.

ARH 403. Thesis. 1-6 Credits.

Repeatable.

Prereq: ARH 401; major standing.

ARH 404. Internship: [Topic]. 1-5 Credits.

Repeatable.

ARH 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

ARH 406. Field Studies: [Topic]. 1-5 Credits.

Repeatable.

ARH 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ARH 408. Workshop: [Topic]. 1-5 Credits.

Repeatable.

ARH 409. Practicum: [Topic]. 1-9 Credits.

Repeatable.

ARH 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Offerings vary from year to year and reflect the interests of faculty members.

ARH 425. Medieval Art and Architecture: [Topic]. 4 Credits.

An in-depth study of a discrete theme within the field of medieval art and architecture. Themes will vary from year to year and will reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits when the topic changes.

ARH 440. Museology. 4 Credits.

This course covers the history and theory of museums. Through readings, written assignments, lecture and classroom discussion we engage issues of museum ethics, the role of museums in society, and curatorial practice. The scope includes art museums as well as other types of museums.

Prereq: Enrollment in the Museum Studies Certificate Program, the Art History Graduate Program, Art History Major or the Art History Minor.

ARH 450. Romanticism in the Visual Arts. 4 Credits.

The course offers an overview of the diverse artists and interests of the Romantic Movement in European art, while critically examining Romanticism as a period term.

ARH 451. Studies in 19th-Century Art: [Topic]. 4 Credits.

Focuses on a specific area, movement, period or issue in visual art of the long 19th century (c. 1770–1914). Repeatable once for a total of 8 credits.

ARH 453. Modern Art: [Topic]. 4 Credits.

This courses focuses on a specific area, movement, period or issue in modern art (c. 1880-1950), specifically a geographical area, movement such as Bauhaus or Dada, or on seminal artist of modernism and the avant-garde.

ARH 457. Contemporary Art: [Topic]. 4 Credits.

Topics are unified by their emphasis on the historical, socio-cultural, political, and theoretical conditions associated with art since 1945. Offerings vary from year to year and reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits.

ARH 462. Modern Architecture. 4 Credits.

Examines modern architecture from 1885 to 1965, and the discourse surrounding it. Emphasis on the meanings and manifestations of modernity as these evolved in Europe, the US, and around the world. Series with ARH 461.

Prereq: ARH 206, ARH 315.

ARH 465. American Architecture II. 4 Credits.

Major developments in American architecture, 1800–1900. Includes the rediscovery of national symbols, the impact of industry, and the national focus on the single-family residence.

Prereq: ARH 206 or ARH 315.

ARH 466. American Architecture III. 4 Credits.

Major developments in American architecture, 1885 to the present. Emphasizes academicism, the impact of international modernism, and the rediscovery of eclectic symbolism.

Prereq: ARH 206 or ARH 315.

ARH 471. Latin American Art History: [Topic]. 4 Credits.

Topics related to arts of Latin America from the Pre-Columbian period to the present. Offerings vary from year to year and reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits.

ARH 481. Chinese Art: [Topic]. 4 Credits.

Topics are unified by their emphasis on the historical, socio-cultural, political, and theoretical conditions associated with Chinese art. Offerings vary from year to year and reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits.

ARH 485. Japanese Art: [Topic]. 4 Credits.

Explores the issues surrounding material cultures of Japan from prehistoric to contemporary periods. Repeatable twice for a maximum of 12 credits when the topic changes.

ARH 488. Japanese Prints. 4 Credits.

The woodblock print in Japan as part of the cultural, social, and political conditions.

ARH 503. Thesis. 1-9 Credits.

Repeatable.

ARH 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ARH 508. Workshop: [Topic]. 1-5 Credits.

Repeatable.

ARH 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Offerings vary from year to year and reflect the interests of faculty members.

ARH 525. Medieval Art and Architecture: [Topic]. 4 Credits.

An in-depth study of a discrete theme within the field of medieval art and architecture. Themes will vary from year to year and will reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits when the topic changes.

ARH 540. Museology. 4 Credits.

This course covers the history and theory of museums. Through readings, written assignments, lecture and classroom discussion we engage issues of museum ethics, the role of museums in society, and curatorial practice. The scope includes art museums as well as other types of museums.

Prereq: Enrollment in the Museum Studies Certificate Program, the Art History Graduate Program, Art History Major or the Art History Minor.

ARH 550. Romanticism in the Visual Arts. 4 Credits.

The course offers an overview of the diverse artists and interests of the Romantic Movement in European art, while critically examining Romanticism as a period term.

ARH 551. Studies in 19th-Century Art: [Topic]. 4 Credits.

Focuses on a specific area, movement, period or issue in visual art of the long 19th century (c. 1770–1914). Repeatable once for a total of 8 credits.

ARH 553. Modern Art: [Topic]. 4 Credits.

This courses focuses on a specific area, movement, period or issue in modern art (c. 1880-1950), specifically a geographical area, movement such as Bauhaus or Dada, or on seminal artist of modernism and the avant-garde.

ARH 557. Contemporary Art: [Topic]. 4 Credits.

Topics are unified by their emphasis on the historical, socio-cultural, political, and theoretical conditions associated with art since 1945. Offerings vary from year to year and reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits.

ARH 562. Modern Architecture. 4 Credits.

Examines modern architecture from 1885 to 1965, and the discourse surrounding it. Emphasis on the meanings and manifestations of modernity as these evolved in Europe, the US, and around the world.

ARH 565. American Architecture II. 4 Credits.

Major developments in American architecture, 1800–1900. Includes the rediscovery of national symbols, the impact of industry, and the national focus on the single-family residence.

ARH 566. American Architecture III. 4 Credits.

Major developments in American architecture, 1885 to the present. Emphasizes academicism, the impact of international modernism, and the rediscovery of eclectic symbolism.

ARH 581. Chinese Art: [Topic]. 4 Credits.

Topics are unified by their emphasis on the historical, socio-cultural, political, and theoretical conditions associated with Chinese art. Offerings vary from year to year and reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits.

ARH 585. Japanese Art: [Topic]. 4 Credits.

Explores the issues surrounding material cultures of Japan from prehistoric to contemporary periods. Repeatable twice for a maximum of 12 credits when the topic changes.

ARH 588. Japanese Prints. 4 Credits.

The woodblock print in Japan as part of the cultural, social, and political conditions.

ARH 601. Research: [Topic]. 1-5 Credits.

Repeatable.

ARH 603. Dissertation. 1-9 Credits.

Repeatable.

ARH 604. Internship: [Topic]. 1-9 Credits.

Repeatable.

ARH 605. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

ARH 606. Special Problems: [Topic]. 1-5 Credits.

Repeatable.

ARH 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Departmental offerings vary from year to year and reflect the specialized interests of faculty members.

ARH 608. Workshop: [Topic]. 1-5 Credits.

Repeatable.

ARH 609. Practicum: [Topic]. 1-9 Credits.

Repeatable.

ARH 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ARH 611. Graduate Studies in Art History. 4 Credits.

Introduction to bibliographic resources research methodology, and critical issues in art history.

Prereq: major standing.

ARH 614. Terminal Project. 1-12 Credits.

Student-directed research and writing intended to culminate in the production of a master's level project under the supervision of a faculty member.

Interior Architecture

Linda K. Zimmer, Department Head

541-346-3656

210 Lawrence Hall

1206 University of Oregon

Eugene, Oregon 97403-1206

The Department of Interior Architecture provides a comprehensive professional design education within a unique interdisciplinary structure. By integrating subject-area course work with studio design exploration, the program prepares students to act as independent problem-solvers and valuable design-team members.

Shared course work with architecture in the early stages of the undergraduate or graduate curricula provides an interdisciplinary context for study and learning, leading to advanced courses and studies that explore theory, technology, and practice.

Central to the department is the design studio, where students gain experience with the design of interior spaces and elements and focus on the issues and conditions related to adapting existing sites and buildings. Topical intermediate studios concentrate on specific design issues, human factors, and building types. Specialized intermediate studios focus on the programming, design, and fabrication of furniture, and on construction documents that illustrate a small design project. A final independent two-term comprehensive project caps the design studio experience.

Preparation

High school and college students interested in interior architecture should prepare themselves by taking courses in the following subjects:

1. Fine arts
2. Social sciences

3. Sciences
4. Humanities

Students are encouraged to travel in order to broaden their experiences related to environmental design.

Design Camp

The College of Design offers a summer career exploration program for college-bound students at the school's facilities in the White Stag Block in downtown Portland. Students explore architecture, product design, and the digital arts in the city and in the studio. Information about Design Camp (<https://aaa.uoregon.edu/portland/design-camp-2014>) may be obtained on the website or by calling the College of Design in Portland.

Careers

Most students prepare for entering professional practice with architecture and interior design firms. Other opportunities exist in related areas such as lighting design, furniture design, facilities and space planning, sales or product marketing, branding and environmental design, exhibition design, and other activities related to the designed environment.

Accreditation

Undergraduate and graduate professional-degree curricula in interior architecture are accredited by the Council for Interior Design Accreditation (CIDA). At the University of Oregon, the bachelor of interior architecture and the master of interior architecture degree programs are accredited by CIDA. The postprofessional master of science in interior architecture (MS) program is not accredited. Admission to the MS program is restricted to applicants who already hold a CIDA-accredited degree or the international equivalent. The interior architecture department is also accredited by the National Association of Schools of Art and Design (NASAD).

Internship, Certification, and Licensure

State laws governing interior design registration and licensure vary widely. In those states that have adopted legislation, a professional degree from a CIDA-accredited program is the preferred prerequisite. Candidates must pass an examination established by the National Council of Interior Design Qualification (NCIDQ) to become licensed as interior designers in those states with licensing or certification. Rules vary from state to state but typically two years of professional experience are required prior to taking the exam. Students should visit the websites of the CIDA, NASAD, or NCIDQ for further information about accreditation and licensure.

The Interior Architecture Curriculum

The professional curriculum in interior architecture has two principal objectives:

1. Broad inquiry into the integrative nature of environmental design
2. A comprehensive professional education that develops the ability to design interior environments ranging from intimate personal spaces to large-scale facilities in a variety of site contexts

Curriculum requirements are published in the *UO Catalog* and in the department's *Advising Handbook*, which includes sample course sequences, grading policies, an explanation of how student progress is monitored through the program, and other advising information. Each student is assigned a faculty advisor and encouraged to consult that

advisor for specific information. In addition, a departmental advisor is available for degree checks and other academic advising.

Professional Curriculum

The professional curriculum for the bachelor of interior architecture program and the master of interior architecture program include required design studios, subject area courses, and professional electives.

Architectural and Interior Design Studios

The architectural and interior design studios are social and interactive environments where students work cooperatively with their peers under the guidance of faculty members with frequent input from practicing interior designers, architects, and related-field experts as well as representatives of communities served by the studio's design explorations. Students learn to respond to complex environmental and cultural contexts through design studio projects that explore interior space within a variety of site contexts. Introductory studios emphasize creativity, design communication skills, and critical thinking fundamental to the design process; intermediate studios emphasize integration of interior architecture subjects with critical design issues; advanced studios emphasize the comprehensive integration of these elements. Student performance in all design studios is graded on a pass/no pass basis and evaluated through written evaluations and exit interviews with faculty members.

Interior Architecture Subjects

Subject area course work develops theory, knowledge, and skills in interior architecture and related design disciplines, with an emphasis on learning interior architecture content in the context of design. This course work develops design skills and examines the influences of place, human activity, spatial order, structure, construction, environmental control, professional practice, and history on the practice of interior design.

Residence Requirements

For transfer students to earn the bachelor of interior architecture (BIArch) or professional master of interior architecture (MIArch) degree, the following minimum course work must be successfully completed in residence:

Code	Title	Credits
IARC 488/588	Interior Design Comprehensive Project I	8
IARC 489/589	Interior Design Comprehensive Project II	8
Interior architecture design courses		12
Interior architecture courses		30
Upper-division, writing-intensive general electives ¹		12
Total Credits		70

¹ Courses that delve into the literature of academic subjects outside the subject areas of architecture (ARCH) and interior architecture (IARC).

Leave of Absence

See policy statement in the **Architecture** section of this catalog.

Computer Literacy Requirement

Introductory architecture courses presume a knowledge of computer operations, general-use software, and Internet communications. Students lacking preparation may draw on resources at A&AA Technology Services, the University Teaching and Learning Center, the Library and

Learning Commons, or Information Technology services. By the end of their first year in the bachelor's or master's program, students are expected to have achieved basic literacy in computer graphics as an integrated tool for architectural design—diagramming, two-dimensional drawing, image processing, three-dimensional modeling, accurate sun casting, parametric modeling, and presentation methods. Students must have an awareness of building information modeling, digital fabrication, building performance analysis software, and geographic information systems.

Students are required to have a high-speed laptop computer and a specified complement of software. Each year the department reviews its software and hardware recommendations. Minimum hardware specifications and software requirements are posted on the department website.

Off-Campus Study

Students may participate in off-campus and international study programs hosted by the Department of Architecture, the Historic Preservation Program, the Department of Landscape Architecture, and the Office of International Affairs. See the **Architecture** section of this catalog for more information.

Faculty

Kyu-Ho Ahn, associate professor. See **Architecture**.

Virginia Cartwright, associate professor. See **Architecture**.

Solmaz Mohammadzadeh Kive, assistant professor. See **Architecture**.

Esther Hagenlocher, associate professor. See **Architecture**.

Linda K. Zimmer, associate professor. See **Architecture**.

- **Bachelor of Interior Architecture** (p. 688)
- **Minor in Interior Architecture**

Undergraduate Studies

The undergraduate programs in interior architecture consist of the bachelor of interior architecture (BIArch) degree and a minor in interior architecture. The curriculum of the five-year professional BIArch degree program is highly structured the first two years and more flexible the last three. This flexibility allows each student to establish a study sequence according to individual interests and needs. Transfer students should be aware that an accelerated program is normally possible only for students who transfer from an accredited interior architecture or interior design program.

Prospective applicants who have a four-year undergraduate degree in any field must apply to the graduate program (see Graduate Admission).

Major Requirements: 225 credits

University requirements include group-satisfying requirements and general electives. They are intended to ensure each student receives an education rich in the liberal arts tradition. Undergraduate students should complete most of the general-education and group-satisfying requirements prior to entry into their first intermediate design studio.

Please see the department website for a complete description of these requirements.

Required Courses

Code	Title	Credits
Design Studios		
ARCH 283 & ARCH 284	Architectural Design I and Architectural Design II	12
ARCH 383	Architectural Design III	6
IARC 484	Interior Design ^{1,2}	24
IARC 486	Furniture Design	6
IARC 487	Working Drawings	6
IARC 488 & IARC 489	Interior Design Comprehensive Project I and Interior Design Comprehensive Project II	16
General Theory		
IARC 204	Understanding Contemporary Interiors	4
Design Media		
ARCH 202	Design Skills	3
ARCH 222	Introduction to Architectural Computer Graphics	4
ARCH 423	Media for Design Development: [Topic]	3
Design Arts		
ARCH 440	Human Context of Design	4
IARC 444	Furniture: Theory and Analysis	3
IARC 445	Comprehensive Project Preparation	3
IARC 447	Color Theory and Application for the Built Environment	3
ARCH 450	Spatial Composition	4
Design Technology		
ARCH 470	Building Construction	4
IARC 471	Interior Construction Elements	3
IARC 472	Interior Finishes and Design Application	3
IARC 473	Working Drawings in Interior Architecture	4
ARCH 492	Environmental Control Systems II	4
IARC 492	Electric Lighting	3
Professional Context		
ARCH 417	Context of the Architectural Profession	4
History of Art, Architecture, and Interior Design		
IARC 474	History of Interior Architecture I	3
IARC 475	History of Interior Architecture II	3
IARC 476	History of Interior Architecture III	3
	Two additional architectural history courses taught in the Department of the History of Art and Architecture or the School of Architecture and Environment	8
Electives		
	300- or 400-level ARCH or IARC courses	6
	Approved 300- or 400-level courses in allied fields	7
	Total Credits	156

¹ Repeatable studio, to be taken four times.

² Site Planning and Design (LA 489)/Site Planning and Design (LA 589) or Architectural Design (ARCH 484)/Architectural Design (ARCH 584) may be substituted.

BIArch Sample Plan of Study

Most students graduate in the spring term of their fifth year. However, students who enter the program with a year or more of required university credits may be able to accelerate through the curriculum and graduate in spring of their fourth year.

First Year

Fall		Credits
WR 121	College Composition I	4
IARC 204	Understanding Contemporary Interiors	4
ARH 314	History of World Architecture I	4
Social science course		4
Winter		
WR 122 or 123	College Composition II	4
ARCH 202	Design Skills	3
ARCH 283	Architectural Design I	6
Science course		4
Spring		
ARCH 222	Introduction to Architectural Computer Graphics	4
ARCH 284	Architectural Design II	6
Architectural history elective		4
Second Year		
Fall		
ARCH 383	Architectural Design III	6
ARCH 450	Spatial Composition	4
ARCH 470	Building Construction	4
Winter

Arts and letters course		4

Multicultural requirement		4
Spring		
IARC 489	Interior Design Comprehensive Project II	8
Upper-division general-education elective		4
Total Credits:		223

¹ General-education and subject area electives can be taken any term and in any order.

Minor Requirements: 26 credits

Code	Title	Credits
Subject Area (Nonstudio) Requirements		
IARC 204	Understanding Contemporary Interiors	4
	One intermediate studio is required for programs within the School of Architecture and Environment	6
Subject Area Electives ²		16-22
IARC 407	Seminar: [Topic]	
ARCH 440	Human Context of Design	
IARC 444	Furniture: Theory and Analysis	
IARC 447	Color Theory and Application for the Built Environment	
IARC 471	Interior Construction Elements ¹	
IARC 472	Interior Finishes and Design Application ¹	
IARC 473	Working Drawings in Interior Architecture ¹	
IARC 474	History of Interior Architecture I	
IARC 475	History of Interior Architecture II	
IARC 476	History of Interior Architecture III	
IARC 492	Electric Lighting ¹	
Total Credits		29

¹ Course may not be taken by students outside of the Department of Architecture, with the exception of landscape architecture students.

² For students majoring in the Department of Architecture, 16 elective credits are required; for all others, 22 are required.

Undergraduates who are enrolled in any major can apply to the minor. Completed applications including supporting academic records are submitted to the Department of Architecture office. Applicants are notified when their applications have been approved. Because the department's first obligation is to its majors, it cannot guarantee availability of courses for minors. Minors may register if space is available after the needs of majors have been met. Enrollment in the minor program is limited. If the department is unable to accommodate additional minor students, it may suspend admittance to the minor program until space becomes available.

Undergraduate Admission

Grounded in a unique multidisciplinary structure, the Department of Interior Architecture offers a comprehensive accredited professional interior design curriculum. Students are prepared to act as independent interior designers; collaborative experiences teach them to be valuable team members in today's complex and dynamic design atmosphere.

Interest in the program exceeds the capacity of the department. Approximately equal numbers of first-year and transfer (including change-of-major) applicants are admitted to the first year of the bachelor of architecture program each year. A smaller number of applicants from other CIDA-accredited or -recognized programs are admitted as advanced transfer students. Prospective applicants to the BIArch degree program or the minor in interior architecture may find information about the program and application requirements on the department website.

- **Master of Interior Architecture** (p. 690)
- **Master of Science in Interior Architecture** (p. 692)

Graduate Studies

There are two graduate degree programs in interior architecture: the professional master of interior architecture (MIArch) degree and the postprofessional master of science in interior architecture (MS) degree.

Students interested in pursuing a concurrent master's degree in architecture and interior architecture may find information about the combined program requirements and application procedures on the Department of Interior Architecture website.

Professional Master of Interior Architecture Degree Requirements

The professional, CIDA-accredited master of interior architecture (MIArch) degree program prepares students for careers in interior design practice and careers in allied professions that contribute to shaping the built environment.

The department offers two tracks of study. Track I typically takes 10 terms to complete. Track II is a six-term advanced placement program.

Track I

Students enrolled in the MIArch Track I program must complete the following:

Code	Title	Credits
Design Studios		
IARC 584	Interior Design (four terms)	24
IARC 586	Furniture Design	6
IARC 587	Working Drawings	6
IARC 588 & IARC 589	Interior Design Comprehensive Project I and Interior Design Comprehensive Project II	16
ARCH 680	Introductory Graduate Design	6
ARCH 681	Introductory Graduate Design	6
Media and Process Skills		
ARCH 611	Graduate Design Process	3
	Architectural computing course	2
Intermediate Media		
ARCH 523	Media for Design Development: [Topic]	3
Design Arts		
ARCH 540	Human Context of Design	4
IARC 545	Comprehensive Project Preparation	3
IARC 547	Color Theory and Application for the Built Environment	3
ARCH 550	Spatial Composition	4

Furniture		
IARC 544	Furniture: Theory and Analysis	3
Design Technology		
ARCH 570	Building Construction	4
IARC 571	Interior Construction Elements	3
IARC 572	Interior Finishes and Design Application	3
IARC 573	Working Drawings in Interior Architecture	4
ARCH 592	Environmental Control Systems II	4
IARC 592	Electric Lighting	3
Professional Practice		
ARCH 517	Context of the Architectural Profession	4
Architectural History		
IARC 574	History of Interior Architecture I	3
IARC 575	History of Interior Architecture II	3
IARC 576	History of Interior Architecture III	3
	One additional architectural history course taught in the Department of the History of Art and Architecture or the School of Architecture and Environment	4
	Course in 20th-century architectural history	4
Subject Area Electives		16
Seminar		6
Total Credits		153

Track I students typically complete all or most of the MIArch degree requirements at the University of Oregon, and begin the program the summer before their first full academic year of study. Students with bachelor's degrees (BA, BS) other than a preprofessional degree in interior design, interior architecture, or architecture must apply to the Track I program.

MIArch Track I Sample Plan of Study

	Credits
Summer	
ARCH 611	3
ARCH 680	6
Course in 20th-century architectural history	3

& IARC 575	and History of Interior Architecture II	
& IARC 576	and History of Interior Architecture III	
	One additional architectural history courses taught in the Department of the History of Art and Architecture or the School of Architecture and Environment	4
	Course in 20th-century architectural history	4
Subject Area Electives ¹		16
	Seminar	6
Total Credits		126

¹ Subject area electives and seminars may be taken any term and in any order; one 3-credit (minimum) subject area elective must be an approved design arts course (not technology or media).

Applicants who have a four-year preprofessional degree in an environmental design discipline (interior architecture, interior design, or architecture) and an equivalent amount of professional studio and course work may be considered for Track II. Students admitted into Track II begin their studies fall term. Track II students must fulfill the same professional curriculum requirements as those in the Track I program, but are admitted with advanced standing in studio and subject-area courses. Transfer credit may be given to students who have had academic experience in an interior architecture or design program accredited by the Council for Interior Design Accreditation, or an architecture program accredited by the National Architectural Accrediting Board (NAAB). The extent of this advanced standing is determined in consultation with the department academic advisor before beginning the program, and the student's advanced standing is reevaluated at intervals. This preliminary evaluation of transfer credit is provisional, pending satisfactory completion of three terms in residence.

Track II students may receive credit for up to four previously taken design studios and up to 50 credits of subject-area courses. Students usually

complete a minimum of six terms and the approximately 87 credits in residence.

Postprofessional Master of Science Degree Requirements

The postprofessional program is for individuals with an undergraduate professional degree in architecture or interior architecture. This degree provides an opportunity for advanced study and contribution to knowledge in the field through the thesis. The course of study prepares students for careers in research, teaching, consulting, and further graduate study. Students also gain a greater understanding of the relationship between the discipline and the profession while working closely with faculty mentors helping to guide their individual research.

Prospective applicants may find information about the program and application requirements on the department website.

Graduate Admission

Admission to the professional MIArch and postprofessional MS graduate degree programs is through a selective review that focuses on three attributes: creative capability, academic capability, and potential contribution to the program through diversity of background, experience, or demonstrated motivation. Applications include a résumé, a biographical statement, a statement of interest in the field of interior architecture, a portfolio of creative work, three letters of recommendation, and official transcripts from all postsecondary educational institutions attended. Applicants must take the Graduate Record Examinations (GRE) so that the scores, a required component of the application, can be reported by the application deadline. Applicants whose first language is not English must also submit scores from the Test of English as a Foreign Language (TOEFL) of at least 575 (paper-based) or 90 (Internet-based). Applications must be postmarked by the first Monday after January 1 for applicants to be considered for admission the subsequent fall term (or summer session for MIArch students). Notifications of results are mailed by April 1.

Prospective applicants to the MIArch and MS degree programs may find information about the application requirements on the department website.

Graduate Teaching and Research Fellowships

A number of graduate employment (GE) opportunities are available to well-qualified graduate students. MS or MIArch Track II applicants with previous education in interior architecture or an allied field are encouraged to apply for GTF positions. MIArch Track I students are generally selected in the second or third year of their degree program. Information about the GE application process is available on the Department of Architecture and Graduate School websites.

Courses

IARC 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

IARC 204. Understanding Contemporary Interiors. 4 Credits.
Introduction to the theory of interior architecture. Design criteria explored through illustrated lectures and projects involving analysis of space.

IARC 401. Research: [Topic]. 1-6 Credits.
Repeatable.

IARC 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

IARC 406. Special Problems: [Topic]. 1-6 Credits.

Repeatable.

IARC 407. Seminar: [Topic]. 1-6 Credits.

Repeatable.

IARC 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

IARC 409. Practicum: [Topic]. 1-6 Credits.

Repeatable.

IARC 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

IARC 444. Furniture: Theory and Analysis. 3 Credits.

Analysis of furniture and cabinetry from a theoretical and practical standpoint. Emphasis on use within architectural space as well as free standing elements. Introduction to structure, construction, and construction installation drawings.

PD 323 or ARCH 484 or IARC 484 or interior architecture minor status.

IARC 445. Comprehensive Project Preparation. 3 Credits.

Formulation of individual design projects for IARC 488/588, 489/589.

Development of project issues and documentation of context, site, and building information; includes research, case studies, and programming.

Prereq: IARC 473, 484.

IARC 447. Color Theory and Application for the Built Environment. 3 Credits.

Use of color in the built environment including principal color systems, methods of color harmony, effects of visual phenomena, and various psychological, cultural, and historic implications.

Prereq: PD 350 or ARCH 484 or IARC 484 or interior architecture minor status.

IARC 471. Interior Construction Elements. 3 Credits.

The properties and detailing of materials used in interior design construction. Code issues that affect interior construction field trips to supply sources and projects.

ARCH 470.

IARC 472. Interior Finishes and Design Application. 3 Credits.

The properties, manufacture, application, and code issues, and ecological considerations of interior finish materials. Field trips to supply sources.

ARCH 470

IARC 473. Working Drawings in Interior Architecture. 4 Credits.

Preparation of working drawings for a small, sustainable interior architecture design project.

Prereq: ARCH 462, 484 or IARC 471, 472, 484

IARC 474. History of Interior Architecture I. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 475. History of Interior Architecture II. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 476. History of Interior Architecture III. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 484. Interior Design. 6 Credits.

Repeatable. A series of creative projects in interior design; intensive analysis of design; methods of problem solving; individual criticism, review of design projects; group discussion and field trips.

Prereq: ARCH 383 or IARC 383.

IARC 486. Furniture Design. 6 Credits.

Projects in design and construction of custom furniture, preparation of detailed shop drawings, shop procedure.

Prereq: IARC 444; IARC 484 or ARCH 484.

IARC 487. Working Drawings. 6 Credits.

Focuses on the design of a small, sustainable interior architecture design project and the production of a set of working drawings.

Prereq: ARCH 462, 484 or IARC 471, 472, 484; coreq: IARC 473.

IARC 488. Interior Design Comprehensive Project I. 8 Credits.

Student-initiated studies in interior design for the terminal project.

Emphasis on comprehensive and integrative study.

Prereq: IARC 445.

IARC 489. Interior Design Comprehensive Project II. 8 Credits.

Student-initiated studies in interior design for the terminal project.

Emphasis on comprehensive and integrative study.

Prereq: IARC 488

IARC 492. Electric Lighting. 3 Credits.

Principles of lighting with focus on integration of electric illumination and space. Design for lighting, calculations, and available systems and sources tested through models and drawings.

Prereq: ARCH 484/584 or IARC 484/584; ARCH 492/592.

IARC 503. Thesis. 1-6 Credits.

Repeatable.

IARC 507. Seminar: [Topic]. 1-6 Credits.

Repeatable.

IARC 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

IARC 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

IARC 544. Furniture: Theory and Analysis. 3 Credits.

Analysis of furniture and cabinetry from a theoretical and practical standpoint. Emphasis on use within architectural space as well as free standing elements. Introduction to structure, construction, and construction installation drawings.

IARC 484 or ARCH 584

IARC 545. Comprehensive Project Preparation. 3 Credits.

Formulation of individual design projects for IARC 488/588, 489/589.

Development of project issues and documentation of context, site, and building information; includes research, case studies, and programming.

Prereq: IARC 573, 584.

IARC 547. Color Theory and Application for the Built Environment. 3 Credits.

Use of color in the built environment including principal color systems, methods of color harmony, effects of visual phenomena, and various psychological, cultural, and historic implications.

Prereq: ARCH 584 or IARC 584.

IARC 571. Interior Construction Elements. 3 Credits.

The properties and detailing of materials used in interior design construction. Code issues that affect interior construction field trips to supply sources and projects.

Prereq: ARCH 570

IARC 572. Interior Finishes and Design Application. 3 Credits.

The properties, manufacture, application, and code issues, and ecological considerations of interior finish materials. Field trips to supply sources.

ARCH 570

IARC 573. Working Drawings in Interior Architecture. 4 Credits.

Preparation of working drawings for a small, sustainable interior architecture design project.

Prereq: ARCH 562, 584 or IARC 571, 572, 584.

IARC 574. History of Interior Architecture I. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 575. History of Interior Architecture II. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 576. History of Interior Architecture III. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 584. Interior Design. 6 Credits.

Repeatable. A series of creative projects in interior design; intensive analysis of design; methods of problem solving; individual criticism, review of design projects; group discussion and field trips.

Prereq: ARCH 681.

IARC 586. Furniture Design. 6 Credits.

Projects in design and construction of custom furniture, preparation of detailed shop drawings, shop procedure.

Prereq: IARC 444/544; ARCH 484/584 or IARC 484/584.

IARC 587. Working Drawings. 6 Credits.

Focuses on the design of a small, sustainable interior architecture design project and the production of a set of working drawings.

Prereq: ARCH 562, 584 or IARC 571, 572, 584; coreq: IARC 573.

IARC 588. Interior Design Comprehensive Project I. 8 Credits.

Student-initiated studies in interior design for the terminal project.

Emphasis on comprehensive and integrative study.

Prereq: 36 credits in IARC design studios.

IARC 589. Interior Design Comprehensive Project II. 8 Credits.

Student-initiated studies in interior design for the terminal project.

Emphasis on comprehensive and integrative study.

Prereq: IARC 588.

IARC 592. Electric Lighting. 3 Credits.

Principles of lighting with focus on integration of electric illumination and space. Design for lighting, calculations, and available systems and sources tested through models and drawings.

Prereq: ARCH 484/584 or IARC 484/584; ARCH 492/592.

IARC 600M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

IARC 601. Research: [Topic]. 1-6 Credits.

Repeatable.

IARC 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

IARC 606. Special Problems: [Topic]. 1-6 Credits.

Repeatable.

IARC 607. Seminar: [Topic]. 1-6 Credits.

Repeatable.

IARC 608. Workshop: [Topic]. 1-6 Credits.

Repeatable.

IARC 609. Practicum: [Topic]. 1-6 Credits.

Repeatable.

IARC 610. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

IARC 611. Terminal Project. 1-9 Credits.

Repeatable.

Landscape Architecture

Roxi Thoren, Department Head

541-346-3641

210 Lawrence Hall

archinfo@uoregon.edu (landarch@uoregon.edu)

Landscape architecture is an environmental design and planning profession of broad scope concerned with the creation, protection, restoration, and management of landscapes. Landscape architecture is founded on an awareness of our deep connections to the natural world and how people and their work are part of the web of life. The profession is deeply attentive to how places serve human needs and support sustainable and resilient cities and other landscapes. A healthy society rests on a commitment to sound landscape design, planning, and conservation that respects the land, its processes, its integrity—and that of human-ecological processes, helping to fulfill human potential.

Both a science and an art, landscape architecture involves creative decision-making based on scientific knowledge of natural processes coupled with awareness of historical, cultural, and social dynamics. The profession also makes intensive use of technologies for landscape construction and environmental management—digital graphics, geographic information systems, and computer-aided design. These are applied to making richly supportive places for people and ecosystems that are beautiful and healthy, responding to human needs and to local natural and socioeconomic systems.

As a profession, landscape architecture includes design at many scales, including ecologically based planning activities, transformation of urban and rural landscapes, service to disadvantaged communities, and design of parks and gardens. As an academic discipline, it provides opportunities for personal development through environmental problem-solving, graphic and oral communication, and project-oriented study in which small groups of students work with instructors to address pressing contemporary problems through detailed development of land and sites.

Preparation

Students planning to major in landscape architecture should prepare by beginning studies in the following areas:

Environmental Awareness. Courses in ecology, biology, botany, geology, environmental science, and geography help begin the process of understanding the complex interrelationships and interdependencies of people and the environment.

Human Behavior. Courses in art history, anthropology, sociology, history, government, psychology, political science, cultural geography, and related subjects help explain human needs, values, attitudes, and activities, and are useful in preparing for the design of physical places.

Visual Language Skills. Courses in drawing, painting, photography, film, design, art history, and related subjects help develop perceptual skills,

cultural understanding, and the ability to explore and communicate ideas graphically.

Careers

Graduates of the landscape architecture program continue on to a wide range of careers. Most students prepare for professional licensure, with about half working in landscape architectural design firms and the other half working for government agencies including national parks, regional and local park systems, and city and regional planning offices. Others choose careers in allied fields such as environmental analysis and ecological restoration, construction management, environmental policy development, or urban and community planning.

Accreditation

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The Landscape Architectural Accrediting Board (LAAB), which is the sole agency authorized to accredit US professional degree programs in landscape architecture, recognizes three types of degrees: the bachelor of science in landscape architecture, the bachelor of landscape architecture, and the master of landscape architecture.

At the University of Oregon, both the bachelor of landscape architecture (BLA) and the master of landscape architecture (MLA) degrees are accredited by LAAB. Graduates are eligible to begin taking the Landscape Architect Registration Examination (LARE) upon graduation in most states.

The postprofessional master of landscape architecture degree program and the PhD degree program are not accredited. Admission to these programs is restricted to applicants who already hold an LAAB-accredited degree or the international equivalent.

Curriculum Structure

The landscape architecture curriculum consists of the following interrelated areas: design and planning studios, core subject areas, and electives.

Design and planning studios. Studio courses focus on the development and communication of solutions to site, neighborhood, city, transportation, watershed, and regional environmental and social problems. Students work closely with an instructor to analyze and create specific landscape design and planning proposals. This area addresses the physical implications of site constraints and opportunities, client needs, and environmental and social considerations.

Core subject areas. Five subject areas are essential foundations for the design studios: landscape architecture technologies, plant materials, landscape analysis and planning, the history and theory of landscape architecture, and landscape architectural media. Required course work in history, theory, media, and technologies includes electives to allow each student to tailor an individualized educational program with the help of an advisor.

Electives. Subject area electives provide personal choice in selecting additional course work related to the degree, to develop both breadth in understanding of the physical, social, and artistic implications of landscape architecture, as well as depth in areas of student interest, including advanced technologies, ecosystem structure, social

and environmental justice, climate-change resilience, healthy built environments, ecological urbanism, and vegetated architecture.

Computers in the Curriculum

Digital tools are necessary for landscape architects. The department requires all students to have unlimited access to their own personal computer. Because of the professional application of complex graphic programs and large data files for most course work, the department's computer requirements exceed the average user's computing needs. See the College of Design's *Student Computer Purchasing Guide* for recommended specifications and departmental requirements.

Off-Campus Study

Students may participate in off-campus study programs hosted by the Department of Landscape Architecture, the Department of Architecture, the Historic Preservation Program, and Global Education Oregon.

Overlook Field School. Students earn University of Oregon credits while living and learning for four weeks at Overlook, a 400-acre property in northeastern Pennsylvania designed by the Olmsted Brothers firm in the early 20th century, and currently being reimaged by the fourth-generation owners and Nelson Byrd Woltz landscape architects. The summer field school at Overlook offers students a unique opportunity to live, study, and create on an evolving cultural landscape. With faculty members and a visiting artist in residence, students examine the enduring connections among landscape, culture, and production. The fully funded program includes multiday site visits to New York and Philadelphia. Weekly activities include design charrettes, fieldwork, seminars, expert speakers, and site visits to regional cultural and productive sites.

APRU Design Field School. The program is held in conjunction with the annual conference of the Association of Pacific Rim Universities (APRU) Sustainable Cities and Landscapes research hub. Past conferences have included Portland, Oregon, Hong Kong, and Sydney, Australia. The 2018 Design Field School ran parallel to the main conference and brought together students from participating universities to explore issues of modernization and its impact on the sustainability of some of Southeast Asia's most remarkable natural landscapes and urban communities, including the sprawling urban metropolis of Surabaya in East Java, the rich volcanic landscapes of East Java, the cultural splendor of the island of Bali, and high-rise, high-density urban living in Hong Kong.

Rome, Italy. The Department of Architecture and the Department of the History of Art and Architecture offer an interdisciplinary summer program in Rome, housed in the historic center of the city. Students experience the layers of history and vibrant design culture through the art, architecture, and urban design of the city. Rome serves as the laboratory for courses in the areas of design, media, art history, and architectural history. Students live in apartments within walking distance of the facility.

Barcelona, Spain. This urban design summer program in Barcelona offers students insight into the measurement and design of urban relationships. Students use sensors and mapping to understand cities from the scale of human experience, integrating existing and newly acquired data sets to inform design insights. These methods are supported by interaction with local experts in planning, urban ecology, architecture, robotic engineering, transit, and landscape architecture. Cultural context is provided through trips to Granada to study different neighborhoods and the Alhambra. In Barcelona, students live, work, and research in the city's newly planned, pedestrian-friendly three-by-three-

block, Superilles, designed to create a refuge from traffic congestion and air and sound pollution.

Danish International Studies Program. School of Architecture and Environment students travel to Copenhagen to participate in the program; summer, fall, and academic-year options are offered. Credits are automatically transferred, and financial aid is available. Instruction is in English.

Hong Kong, China. A short-term summer program and a semester exchange program are offered at the University of Hong Kong, where English instruction makes Asia accessible. Students study the challenges of an ultradense metropolis and experience futuristic skyscrapers and public transit.

Faculty

Jacques Abelman, assistant professor (social justice, landscape infrastructure, food systems). BA, 1996, Amherst College; MA, 2002, University of the Arts, London; MLA, 2014, Amsterdam Academy of Architecture; reg. landscape architect, Netherlands. (2016)

Elisabeth Chan, associate professor (design representation, design theory). BA, 1993, Hampshire; MLA, 2000, Cornell. (2001)

Arica Duhrkoop-Galas, instructor (plants, planting design, landscape construction). BA, 1998, Portland State; CE, 1999, Cambridge; MLA, 2005, Oregon; reg. landscape architect, Oregon. (2010)

Mark Eischeid, assistant professor (landscape history, design theory, critical practice). BS, 1994, Stanford; MLA, 2000, California, Berkeley; MFA, 2010, Edinburgh; reg. landscape architect, California. (2014)

Chris Enright, instructor (landscape planning, landscape analysis, geographic information systems). BA, 1984, California, Santa Barbara; BLA, 2003, MLA 2006, PhD, 2013, Oregon. (2013)

Michael Geffel, visiting professor (design processes, design experiments, construction techniques). BS, 2006, Oregon; MLA, 2013, Virginia. (2017)

David Hulse, Philip H. Knight Professor (alternative futures analysis, river restoration and management, landscape ecology). BSLA, 1981, Colorado State; MLA, 1984, Harvard. (1985)

Bart Johnson, professor (climate change adaptation, ecological restoration, urban ecosystems). BS, 1987, Cornell; MLA, 1992, PhD, 1995, Georgia. (1995)

Harper Keeler, instructor (civic agriculture, landscape biodynamics, urban farm director). BLA, 1995; MLA 2011, Oregon. (2010)

Yekang Ko, assistant professor (urban sustainability, energy landscapes, climate-responsive design). BS, 2005, Korea; PhD, 2012, California, Berkeley (2016)

Jun Hak Lee, instructor (geographic information systems, data visualization). BS, 1999, MS, 2001, Korea; PhD, 2010, California, Berkeley. (2016)

Dennis "Whitey" Lueck, instructor (horticulture, field studies, landscape biodynamics). BS, 1974, Pennsylvania State; MS, MA, 1980, Oregon State. (2005)

Robert G. Ribe, professor (landscape planning and analysis, visual resource management, landscape economics). BS, 1977, California,

Riverside; MSLA, 1981, MA, 1987, PhD, 1990, Wisconsin; Fellow, American Society of Landscape Architects. (1988)

Kory Russel, acting assistant professor (water, container-based sanitation, informal settlements). BS, 2003, MES, 2005, Taylor; MS, 2012, Stanford. (2016)

Brad Stangeland, instructor (landscape construction, computer-aided design, professional practice). BLA, 1983, Oregon; reg. landscape architect, Oregon. (2003)

Roxi Thoren, associate professor (productive landscapes, cultural identity, design theory). BA, 1996, Wellesley; MArch, 2001, MLA, 2002, Virginia. (2004)

Emeriti

Jerome Diethelm, professor emeritus. BArch, 1962, Washington (Seattle); MLA, 1964, Harvard; reg. architect and landscape architect, Oregon. (1970)

Kenneth I. Helphand, professor emeritus. BA, 1968, Brandeis; MLA, 1972, Harvard; Fellow, American Society of Landscape Architects. (1974)

Robert Z. Melnick, professor emeritus. BA, 1970, Bard; MLA, 1975, State University of New York, College of Environmental Science and Forestry; Fellow, American Society of Landscape Architects. (1982)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Landscape Architecture**
- **Minor**

Undergraduate Studies

The curriculum in landscape architecture leads to a professional degree of bachelor of landscape architecture (BLA). The five-year program, accredited by the Landscape Architecture Accreditation Board, combines general preparation in the arts and sciences with a focus on environmental-design studies. The program prepares students for professional careers in the arts and sciences with a core of design studio course work and curricular areas in land analysis, land planning, ecological systems, and planting design. The program's goal is to produce a visually literate, technically skilled, ecologically knowledgeable, and socially responsible designers who will be innovators and leaders in solving the difficult problems of the built environment into the future.

The curriculum is structured on a sequence of 10 design studios, advancing through design fundamentals to advanced research studios and leading to an independent capstone environmental design project. Core curricular areas support the development of design skills, and electives allow each student to develop expertise in topics such as ecological restoration and design, ecological urbanism, climate-change-resilient design, environmental justice, landscape aesthetics, healthy built environments, natural resource analysis and planning, urban design, food systems and urban agriculture, landscape history and preservation, and environmental design research methods.

Bachelor of Landscape Architecture

Requirements for the BLA degree (including university requirements) total 220 credits. Courses required for the major must be passed with a grade of

at least C– or P or P*. Studio courses are pass/no pass only; students must pass each studio to progress to the next studio level.

Core Requirements for Professional School Majors

Code	Title	Credits
Written English		
WR 121	College Composition I	4
WR 122	College Composition II	4
or WR 123	College Composition III	
Electives		
LA 260	Understanding Landscapes	4
	Select two approved group-satisfying arts and letters courses	8
	Select three approved group-satisfying social science courses	12
	Select three approved group-satisfying science courses ¹	12
	Select one course from the United States: Difference, Inequality, and Agency list	4
	Select one course from the Global Perspectives list	4
Total Credits		52

¹ One of the three *may* satisfy the BLA basic ecology or natural systems course requirement.

Professional Bachelor of Landscape Architecture Requirements

Code	Title	Credits
Landscape Architecture Design Studios		
LA 289	Landscape Architectural Design (two studios)	12
LA 439	Landscape Architectural Design and Process (three studios)	18
LA 489	Site Planning and Design (three studios)	18
LA 490	Comprehensive Project Preparation	3
LA 494	Land Planning and Design	6
LA 499	Comprehensive Project	8
Landscape Architecture Technology and Practice		
LA 366	Landscape Technologies II	4
LA 462	Professional Practice of Landscape Architecture	2
	Landscape technology elective course ¹	4
Plants		
LA 326	Plants: Fall	4
LA 327	Plants: Winter	4
	Basic ecology or natural systems course ²	4
Landscape Analysis and Planning		
LA 413	Analyzing Landscape Systems	4
LA 440	Introduction to Landscape Planning Analysis	4
LA 441	Principles of Applied Ecology	4
History and Theory of Landscape Architecture		
LA 260	Understanding Landscapes	4
LA 474	History of Landscape Architecture I	4
LA 475	History of Landscape Architecture II	4
	Landscape theory elective course ³	4

Landscape Architecture Media

LA 350	Landscape Media	4
or ARCH 202	Design Skills	
LA 352	Digital Landscape Media	2
or ARCH 222	Introduction to Architectural Computer Graphics	
LA 417	Computer-Aided Landscape Design	2
	Advanced landscape media elective course ⁴	4
Electives ⁵		40
Total Credits		167

- ¹ Examples include Computers in Landscape Architecture (LA 415) and Landscape Technology Topics (LA 459).
- ² The department maintains a list of approved basic ecology courses that serve as a prerequisite to Principles of Applied Ecology (LA 441).
- ³ The department maintains a list of approved landscape theory electives. These include: Landscape Architectural Theory: [Topic] (LA 472), Architectural Contexts: Place and Culture (ARCH 430), and Human Context of Design (ARCH 440). ARCH and LA 407 or 410 courses with design theory content and other elective courses must be approved by your advisor.
- ⁴ The department maintains a list of approved advanced landscape media electives. These include Workshop: [Topic] (LA 408), Experimental Course: [Topic] (LA 410) (Advanced Computer-Aided Drafting), Advanced Landscape Media (LA 450), and Media for Design Development: [Topic] (ARCH 423). ARCH and LA 410 courses with advanced media content and other elective courses must be approved by your advisor.
- ⁵ The department will accept all courses from College of Design departments (ARCH, ARH, ART, DSGN, HP, IARCH, LA, PD, PPPM), the Environmental Studies Program, and the Department of Geography as electives. Electives from all other departments must be at the 200-level or above. No more than 12 credits at the 100-level may count towards the BLA degree. Typically, at least one-half of the electives are landscape architecture courses, but the subject areas and courses are determined on a case-by-case basis with the student's advisor. Students develop their full set of electives in consultation with an advisor to support educational objectives and career goals in relation to landscape architecture.

Landscape Architecture Premajor

UO students interested in landscape architecture should first declare as a premajor. Current UO students may change their premajor to landscape architecture at any time during their undergraduate years. Landscape architecture premajors receive departmental advising, priority registration, and departmental communications. The department also offers scholarships and funded field studies opportunities exclusively for such students.

Premajor Advising. Landscape architecture premajors are strongly encouraged to meet with the BLA director or the School of Architecture and Environment advisor in 210 Lawrence Hall to receive assistance with applications, gain information about the program, or check on their academic progress and completion of premajor requirements.

Listserver for Premajors. Once students declare the premajor, their UO email addresses are added to the landscape architecture undergraduate listserver, which is used for sharing important departmental information and posts that may be of interest to undergraduate premajors and majors.

Applications. Students in the premajor or landscape architecture minor, or UO applicants with evidence of design background, may apply to the BLA degree at any time prior to entering Landscape Architectural Design and Process (LA 439) studios, which are restricted to BLA students.

UO applicants with little or no design background should enter the premajor.

Current School of Architecture and Environment majors (architecture, interior architecture) in good-standing (2.50 minimum GPA), may enter the BLA program without a formal application. These students should discuss their degree plan with the BLA director, who will confirm enrollment with the School of Architecture and Environment advising staff.

Students who wish to enter the BLA program must meet the requirements below, complete lower-division course work, and complete a separate application to the BLA prior to entering the Landscape Architectural Design and Process (LA 439) studios.

- Cumulative UO GPA of 2.50 or better
- Requirements listed below must be passed with at least a C– or P or P*.
- Satisfactory completion of the following:
 - Lower-division core courses: Understanding Landscapes (LA 260) or Introduction to Landscape Architecture (LA 227)
 - Introductory design studios Landscape Architectural Design (LA 289) **or** Architectural Design I (ARCH 283) and Architectural Design II (ARCH 284)
 - Introductory media courses Landscape Media (LA 350) and Digital Landscape Media (LA 352) **or** Design Skills (ARCH 202) and Introduction to Architectural Computer Graphics (ARCH 222)
- Satisfactory completion of one basic ecology or natural systems course

Applications may be submitted prior to completion of the premajor requirements. The department admits students fall, winter, and spring terms. Admission to the BLA is effective the following term. The deadline to apply falls on the Friday of the fourth week.

To be considered for admission to the major, students must complete and submit the following materials through the online SlideRoom applicant tracking system:

- Application form
- Landscape architecture premajor checklist, available as a PDF on the department website or in hard-copy form in 210 Lawrence Hall
- Portfolio of design and art work, completed in the Landscape Architectural Design (LA 289) studios, Landscape Media (LA 350) or Digital Landscape Media (LA 352) media courses, or elsewhere

Prospective applicants may find information about the program and application requirements on the department website.

Minor in Landscape Architecture

To earn a minor in landscape architecture, students file a declaration form with the program director. Once admitted, students remain in contact with the director for personalized advising.

Minor candidates are given preference on course waiting lists over nondepartmental students. Students in the minor should inform

instructors when asking permission to enroll. To declare the minor, complete the following:

1. Obtain the Undergraduate Minor Declaration Form from the School of Architecture and Environment office, 210 Lawrence Hall. The form includes a curriculum worksheet with the requirements listed below.
2. Meet with the program director to discuss when courses are offered, which topics courses or seminars will be offered to fulfill minor requirements, and to develop a curricular plan.
3. Return the completed and signed form to the department office.

Minor Requirements (26 credits)

Code	Title	Credits
LA 260	Understanding Landscapes	4
LA 413	Analyzing Landscape Systems	4
	One subject area course in plants from list below	4
	One subject area course in history and theory from list below	4
	Elective courses	10
	Total Credits	26

Subject Areas

Code	Title	Credits
Plants		
LA 326	Plants: Fall	4
LA 327	Plants: Winter	4
LA 328	Spring Plants	4
LA 337	Landscape Field Work: [Topic] (any plants topic)	1-4
LA 390	Urban Farm	2-4
History and Theory		
LA 199	Special Studies: [Topic] (Design for a Sustainable World)	4
LA 407	Seminar: [Topic] (Landscape Architecture Theory)	4
LA 474	History of Landscape Architecture I	4

Elective Courses

Any landscape architecture (LA) courses; Urban Farm (LA 390) may be repeated if taken during different terms

Studio Options ¹

¹ Architecture nonmajors may take Landscape Architectural Design (LA 289), which is offered every winter. Architecture and interior architecture majors may take a landscape architecture studio that is at their appropriate level of work in the major. Students should consult with their minor advisor, the landscape architecture studio instructor, and the Department of Architecture to determine which studio is appropriate *before* enrolling in the studio.

Five-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in five years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Landscape Architecture

Course	Title	Credits	Milestones
First Year

- **Master of Landscape Architecture** (p. 701) (**first professional master's**)
- **Master of Landscape Architecture** (p. 702) (**postprofessional master's**)
- **Doctor of Philosophy**

Graduate Studies

The department offers master's and doctoral degrees in landscape architecture.

The three-year professional master of landscape architecture degree (MLA) is accredited by the Landscape Architecture Accreditation Board. The MLA prepares students for professional careers in environmental design with a core in design studio course work and curricular areas in land analysis, land planning, ecological systems, and planting design. The program's goal is to produce visually literate, technically skilled, ecologically knowledgeable, and socially responsible designers—innovators and leaders in solving the difficult problems of the built environment.

The curriculum is structured on a sequence of 10 design studios, advancing through design fundamentals to advanced research studios and leading to an independent capstone research project. Core curricular areas support the development of design skills, and elective courses allow each student to develop expertise in topics such as ecological restoration and design, ecological urbanism, climate-change-resilient design, environmental justice, landscape aesthetics, healthy built environments, natural resource analysis and planning, urban design, food systems and urban agriculture, landscape history and preservation, and environmental design research methods.

The doctoral program in landscape architecture offers opportunities for advanced study and scholarship across a range of spatial scales and cultural contexts. Students in the program pursue varied topics related to their interests and to clusters of faculty expertise. Current clusters include

- critical history, theory, and practice
- ecology, infrastructure, and social justice
- productive landscapes

Master of Landscape Architecture

The professional master of landscape architecture (MLA) degree program, accredited by the Landscape Architectural Accreditation Board, prepares students for careers in landscape architectural practice and careers in allied professions that contribute to shaping the built environment.

The department offers two tracks of study, both of which lead to the MLA. The first professional MLA typically takes ten terms to complete and requires 140 credits. The postprofessional MLA is a six-term advanced placement program that requires approximately 56 credits (the exact number is determined through individual evaluation of prior course work at the time of admission.)

First professional MLA students typically complete all or most of the degree program requirements at the University of Oregon and begin the program the summer before their first full academic year of study. Students with bachelor's degrees other than a professional degree in landscape architecture must apply to the first professional degree program.

Students with degrees in related design disciplines (e.g., architecture, interior architecture, environmental design, or nonaccredited landscape architecture degrees) may be given advanced standing, up to a maximum of four terms of studio credit for equivalent prior studio work. Studio placement will be based on a portfolio review; required core course work will be evaluated on a case-by-case basis.

The postprofessional MLA is for applicants who have an accredited professional degree in landscape architecture. Students admitted into the postprofessional MLA begin their studies fall term. Postprofessional students must fulfill the same professional curriculum requirements as first professional students, but are admitted with advanced standing in studio and subject-area courses. The extent of this advanced standing is determined by the department before beginning the program.

Students may enroll in joint MLA degree programs with the master of architecture (MArch) and master of community and regional planning (MCRP) programs with integrated and coordinated degree requirements. Arrangements may be made through academic advisors in the two departments.

Research and Master's Project. Students take two courses in research methods and project development and one mentored research development course. A faculty member serves as a project chair. The MLA project is completed in the final year during a two-term master's clinic studio. This independent project of high academic standard presents original work that contributes to the body of knowledge in landscape architecture and/or demonstrates an advanced capacity to solve design and planning problems through critical inquiry and strong problem-solving analysis. The topic may be selected from a range of theoretical to practical design issues. Projects must include a written component, which sets out the problem, goals and objectives, methodology, findings, and conclusions of the project.

Area of Concentration. The area of concentration courses represent a focused inquiry in advanced topics that master's students undertake while forming and developing their master's projects. When students begin the MLA program, they should consult their departmental advisor

to begin planning their area of concentration course work and receive approval for course selection. At the time when a student is assigned a master's project advisor, responsibility for course approval shifts to this person. At any time students may consult with other members of the departmental faculty who might help them craft their area of concentration. To be approved, an area of concentration must be graduate-level (a 500- or 600-level course number) and must be demonstrably related to the student's master's project topic and supportive of the project's development. See an advisor for more information.

LA 620	Landscape Research Methods I	2
LA 621	Landscape Research Methods II	2
LA 699	Master's Project ¹	16
or LA 503	Thesis	
Area of Concentration Electives		
Four courses approved by advisor		16
Total Credits		144

¹ The department maintains a list of approved landscape theory electives. These include Landscape Architectural Theory: [Topic] (LA 572), Introduction to Landscape Architecture Theory (LA 617), Architectural Contexts: Place and Culture (ARCH 530), and Human Context of Design (ARCH 540). ARCH and LA 507 and 510 courses with a design theory content and other elective courses must be approved by your advisor.

² The department maintains a list of approved advanced landscape media electives. These include Workshop: [Topic] (LA 508), Experimental Course: [Topic] (LA 510) (Advanced Computer-Aided Drafting), Advanced Landscape Media (LA 550), and Media for Design Development: [Topic] (ARCH 523). ARCH and LA 510 courses with advanced media content and other elective courses must be approved by your advisor.

³ Before enrolling in Master's Project (LA 699), students must obtain department approval of a project or thesis proposal from their landscape architecture master's project advisor.

Postprofessional Master's Program

The two-year graduate program leading to the master of landscape architecture (MLA) degree is intended for students prepared to do advanced work in the field. Students entering the postprofessional MLA program must have a professionally accredited bachelor's degree in landscape architecture. Students are typically interested in pursuing an advanced independent research project with an interest in an academic career.

Students with professional landscape architecture degrees typically spend two years in residence satisfying course requirements.

Required course work includes one design and planning studio [Land Planning and Design (LA 594)], one course in landscape analysis and planning [Introduction to Landscape Planning Analysis (LA 540)], one course in history, literature, and theory, Landscape Research Methods I (LA 620), Landscape Research Methods II (LA 621), and mentored research with a faculty member. In addition, students must complete five courses (20 credits) in an area of concentration.

Postprofessional Master's Curriculum

Total Credits		56

¹ Courses used to satisfy analysis, research, and theory requirements above may not be used to satisfy area of concentration requirements.

² Before enrolling in Master's Project (LA 699), students must obtain department approval of a project or thesis proposal from their landscape architecture master's project advisor.

³ Completed during the second year.

Admission

Prospective applicants to the MLA degree programs may find information about the program and application requirements on the department website (<https://archenvironment.uoregon.edu/landarch/apply/mla>).

Doctor of Philosophy Degree

The doctoral program in landscape architecture offers opportunities for advanced study and scholarship in ecological landscape planning, sustainable urban design, and design history and theory. Landscape planning is primarily concerned with assessing large landscapes and directing their policy, management, and land-use patterns to meet social and environmental ends, while design typically addresses smaller areas in greater detail.

Because the profession is broad and diverse, the landscape architecture PhD pursues robust development of academic, analytical, creative, and integrative capabilities that can continue to grow throughout subsequent careers. Accordingly, the program emphasizes the following:

- Advanced expertise and understanding in a focused topic
- The ability to form integrative conceptual models of landscape issues, problems, and solutions
- The ability to critically analyze deficiencies in knowledge in the field and identify needs for new, original contributions
- The ability to form and investigate operationally bounded questions
- The ability to independently design and execute a complete, intensive research project
- The ability to fully document a research project with high-quality writing and illustrations

The integrative nature of landscape design as a science and an art entails development of innovative models and methods for design, education, and research. The program offers students the opportunity to develop skills as innovative educators by working with faculty members as teaching assistants, and to teach courses under faculty guidance. The close and supportive relationships among scholarship, teaching, professional growth, and artistic achievement foster excellence in design education, research, and practice. Scholars follow many routes, and the program provides substantial flexibility to tailor students' programs to individual needs.

Course of Study

Completion of the program requires demonstrated excellence through original contributions to the field. Indicators of a doctoral student's achievements are successful completion of the oral and written comprehensive exams and successful completion and defense of a dissertation that substantially advances knowledge in a chosen area of expertise.

Through a series of four required courses in landscape architecture literature, theory, and research, PhD students learn how to conduct both qualitative and quantitative studies of landscapes and the processes that shape them. After completing these core courses, advanced studies in methodology, tailored to suit career intentions, are required. Advanced methodological preparation in quantitative research occurs through statistical and spatial analysis as well as case-study analysis, design criticism, content analysis, historical interpretation, and environment-behavior observation.

The program prepares students to understand and apply appropriate methods of inquiry, and to deepen their understanding of the nature and role of rigorous scholarly inquiry in landscape architecture. Course requirements are designed to provide both depth and breadth of knowledge in landscape architecture, and to draw on the frameworks and methodologies of related disciplines that support the student's dissertation research.

Length of Program and Steps to Completion

A PhD in landscape architecture requires a minimum of three years of full-time graduate work, including one year of residency. Depending on background and research goals, students can expect to complete the degree in three to six years, with a norm of four to five years.

The student's program of study depends substantially on his or her prior degrees.

Pre-Defined Table

Degree Held	Credits to Expect to Complete for PhD
MLA or MArch	68
BLA or BArch only	80
Master's degree without professional environmental-design degree	86

Courses for the doctoral degree include design-studio experience and subject-area courses to provide a foundation in landscape architecture sufficient to support a student's goals, research, and advanced course work.

At the completion of course work, normally the end of the second year, each student submits a written comprehensive exam, followed by an oral comprehensive exam. The examination committee will consist of three faculty members, two from landscape architecture and one from an outside department or program, who will prepare and administer the written and oral comprehensive exams. Once students have passed both comprehensive exams, they will be advanced to candidacy. Each student must submit the dissertation proposal within three terms of the exams. A student then forms a dissertation committee consisting of four members, with a minimum of two from landscape architecture and at least one from another field related to the student's area of research. The dissertation committee must approve the student's written dissertation

proposal following a scheduled, public proposal presentation before the student undertakes the dissertation.

Some credit requirements may be waived or satisfied through transfer credits which must not have previously been applied to any graduate or undergraduate degree. No more than 15 credits may be transferred. Successful completion of the doctoral program is a matter of proven excellence through substantial, original contributions to the field and not the accumulation of a specific number of credits.

Requirements

A student's program of study is developed with the major professor and a second doctoral advisor.

PhD Required Courses, Work

Course List

Code	Title	Credits
Theory, Research, Investigation ¹		
LA 601	Research: [Topic]	6
LA 605	Reading and Conference: [Topic]	6
LA 617	Introduction to Landscape Architecture Theory	4
LA 620–621	Landscape Research Methods I-II	8
Doctoral colloquium		2
Outside analytic-synthetic courses ²		4-12
Electives ³		
Advanced Electives: 500-level and above landscape architecture courses in design theory, history, criticism, preservation, planning, and ecology ⁴		8-12
Supporting Courses: courses typically taken outside of landscape architecture ⁴		12
Dissertation		
LA 603	Dissertation	16
Total Credits		70

Footnotes

- ¹ A student entering with a master's degree but without a professional environmental-design degree should expect to take a minimum of 18 additional credits in landscape architecture.
- ² A student may be required to take more than 4 credits in analytic-synthetic courses in other departments.
- ³ A student entering the program with a BLA or BArch but no master's degree takes an additional 12 credits of electives.
- ⁴ Selected in consultation with major professor

Admission

Prospective applicants to the landscape architecture doctoral program may find information about the program and application requirements on the department website (<https://archenvironment.uoregon.edu/landarch/apply/phd>).

Courses

LA 196. Field Studies: [Topic]. 1-5 Credits.

Repeatable twice for a maximum of 6 credits.

LA 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LA 227. Introduction to Landscape Architecture. 2 Credits.

Exploring the background and scope of the profession: its history, ethics, goals, skills, topics, achievements, and evolving challenges in making healthy, functional, and beautiful places.

LA 260. Understanding Landscapes. 4 Credits.

Perception, description, and explanation of landscapes as environmental sets, as biophysical processes, and as cultural values.

LA 289. Landscape Architectural Design. 6 Credits.

Study of places, their use, and how they evolve. Fundamentals of environmental awareness, social factors, and small-scale site design; abstract design and elementary graphic techniques. Repeatable.

LA 326. Plants: Fall. 4 Credits.

Characteristics, identification, and design uses of deciduous trees, shrubs, vines, and ground covers. Emphasis on identification and appropriate use in landscape design.

LA 327. Plants: Winter. 4 Credits.

Characteristics, identification, and design uses of ornamental conifers and broad-leaved evergreen trees, shrubs, and ground covers.
Prereq: LA 326.

LA 328. Spring Plants. 4 Credits.

Focuses on flowering plants, their identification, design use, and ecosystem services they provide. Plant identification focuses on flowering trees and shrubs, groundcovers and perennials, with the intention of understanding how flowering plants may be used in design to support both human needs and ecosystem functions.

LA 333. Photography and Environmental Values. 4 Credits.

Explores major movements in landscape photography through the lens of cultural perceptions and policies about landscape and environment.

LA 337. Landscape Field Work: [Topic]. 1-4 Credits.

Direct examination and appraisal of the function, form, content, and composition of example landscapes in relation to ecological, cultural, legal, technical, aesthetic, and economic objectives. Repeatable twice for maximum of 12 credits.

LA 350. Landscape Media. 2-4 Credits.

Development of freehand drawing and visualization skills; exercises on line, tone, texture, and color for plan, section, and perspective drawings. Repeatable.

LA 352. Digital Landscape Media. 2-4 Credits.

Introductory survey and skill development in a range of basic computer graphic tools used in landscape architecture. Includes image processing, computer drawing, modeling, and drafting. Repeatable once for maximum of 8 credits.
Prereq: LA 350.

LA 362. Landscape Technologies I. 4 Credits.

Develops understanding of contours, contour manipulation, and site engineering methodologies in the design of places; fundamentals of inclusive design, stormwater management, earthwork, and design development.

LA 366. Landscape Technologies II. 4 Credits.

Consideration of aesthetic and engineering properties of materials and processes of landscape construction; communication of design intent through documentation including sources and costs.

LA 375. Contemporary American Landscape. 4 Credits.

Evolution of the contemporary American landscape as an expression of American culture.

LA 390. Urban Farm. 2-4 Credits.

Experimentation with food production in the city; rebuilding urban soils; farm animal-plant relationships; nutrient cycles. Cooperative food production and distribution; use of appropriate technologies. Repeatable.

LA 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LA 401. Research: [Topic]. 1-21 Credits.

Repeatable.

LA 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

LA 406. Special Problems: [Topic]. 1-21 Credits.

Repeatable.

LA 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

LA 408. Workshop: [Topic]. 1-21 Credits.

Repeatable. Concentrated programs of study on special topics. Regular offerings include Fire Ecology and Management, Landscape Design.

LA 409. Practicum: [Topic]. 1-21 Credits.

Supervised field laboratory work; clinical or in-service educational experience. Planned programs of activities and study with assured provisions for adequate supervision. Repeatable.

LA 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LA 413. Analyzing Landscape Systems. 4 Credits.

Develops skills for collecting data and understanding how landscapes function in space and time to inform good decision-making in planning and design.

Prereq: one course in geography or biology or environmental studies.

LA 415. Computers in Landscape Architecture. 4 Credits.

Repeatable. Development, application, and evaluation of computer systems for land use and site planning (e.g., geographic information systems); encoding of data, cell storage, and analysis systems.

LA 417. Computer-Aided Landscape Design. 2-4 Credits.

Understanding and use of computer-aided drafting and design technology for executing landscape design development, evaluation, and presentation tasks.

LA 423. Drawing The Landscape. 4 Credits.

Exploration of the varied ways to represent and understand the form, cultural meaning, social content, history, natural dynamics, regional context, spiritual intentions, and technical functions of urban and rural landscapes.

LA 429. Civic Agriculture. 4 Credits.

Exploring the impact and subsequent reversal of industrialized food systems through community driven production, distribution and equity methods, foodshed resiliency creation and ecologically literate agriculture practice.

LA 439. Landscape Architectural Design and Process. 6 Credits.

Intermediate problems in landscape architecture design. Relations among problem concepts, goals, design theory, communication media, and technical analysis. Repeatable four times for a total of 30 credits.

Prereq: LA 289.

LA 440. Introduction to Landscape Planning Analysis. 4 Credits.

Principles of designing land- and waterscapes for human use and settlement. Ecological, social, and economic analyses of landscapes, resources, and patterns of occupancy in the Eugene-Springfield area.

Prereq: LA 413.

LA 441. Principles of Applied Ecology. 2-6 Credits.

Application of ecological concepts to landscape design, planning, and management. Emphasis on spatially explicit problem-solving over a range of spatial and temporal scales.

Prereq: one course in ecology.

LA 450. Advanced Landscape Media. 4 Credits.

The role of media in design inquiry; development of hard-line drawing skills, diagramming, and principles of graphic design. Repeatable.

LA 459. Landscape Technology Topics. 2-4 Credits.

Intensive study of topics in landscape construction and maintenance.

Topics include irrigation, lighting, special structures, water management, and road design. Repeatable thrice for maximum of 10 credits.

LA 462. Professional Practice of Landscape Architecture. 2 Credits.

Introduces students to key aspects of professional practice, fundamental professional skills, and professional career planning. Includes licensure, legal aspects of landscape architecture, career options, business management, and project management.

LA 472. Landscape Architectural Theory: [Topic]. 4 Credits.

This course examines theories and the role of theory in landscape architecture. Each offering explores landscape theory through a different lens, including the analysis and design of landscapes, the creation of built works, and the discussion and critique of projects.

LA 474. History of Landscape Architecture I. 4 Credits.

First in a sequence covering the history of landscape architecture. Explores the history and theory of the designed landscape from the beginnings of human settlement to the 19th century.

LA 475. History of Landscape Architecture II. 4 Credits.

The second in a sequence of two classes covering the history of landscape architecture, from the 19th century to the late 20th century. Prereq: LA 474.

LA 484. Landscape Perception. 4 Credits.

Development of the human-environment relationship as it relates to landscape perception, landscape archetypes, and the development of a theoretical base for contemporary landscape design.

LA 489. Site Planning and Design. 6 Credits.

Advanced problems in landscape architecture, cultural determinants of site planning and design, design development and natural systems and processes as indicators of carrying capacity. Repeatable.

Prereq: LA 362, LA 366, LA 439.

LA 490. Comprehensive Project Preparation. 3 Credits.

Finding, describing, programming, and probing environmental opportunities and problems.

LA 494. Land Planning and Design. 6 Credits.

Problems in landscape architecture of increased cultural complexity. Land use planning, computer-aided ecological analysis of land, environmental impact, urban and new community design.

Prereq: LA 489; fifth-year standing for undergraduates.

LA 499. Comprehensive Project. 8 Credits.

Advanced planning and design projects in landscape architecture. Studio development of individually selected projects.

Prereq: LA 490.

LA 503. Thesis. 1-16 Credits.

Repeatable.

LA 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

LA 508. Workshop: [Topic]. 1-21 Credits.

Repeatable. Concentrated programs of study on special topics. Regular offerings include Fire Ecology and Management, Landscape Design.

LA 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LA 513. Analyzing Landscape Systems. 4 Credits.

Develops skills for collecting data and understanding how landscapes function in space and time to inform good decision-making in planning and design.

LA 515. Computers in Landscape Architecture. 4 Credits.

Development, application, and evaluation of computer systems for land use and site planning (e.g., geographic information systems); encoding of data, cell storage, and analysis systems. Repeatable.

LA 517. Computer-Aided Landscape Design. 2-4 Credits.

Understanding and use of computer-aided drafting and design technology for executing landscape design development, evaluation, and presentation tasks.

LA 523. Drawing The Landscape. 4 Credits.

Exploration of the varied ways to represent and understand the form, cultural meaning, social content, history, natural dynamics, regional context, spiritual intentions, and technical functions of urban and rural landscapes.

LA 529. Civic Agriculture. 4 Credits.

Exploring the impact and subsequent reversal of industrialized food systems through community driven production, distribution and equity methods, foodshed resiliency creation and ecologically literate agriculture practice.

LA 539. Landscape Architectural Design and Process. 6 Credits.

Intermediate problems in landscape architecture design. Relations among problem concepts, goals, design theory, communication media, and technical analysis. Repeatable four times for a total of 30 credits.

LA 540. Introduction to Landscape Planning Analysis. 4 Credits.

Principles of designing land- and waterscapes for human use and settlement. Ecological, social, and economic analyses of landscapes, resources, and patterns of occupancy in the Eugene-Springfield area.

Prereq: LA 513.

LA 541. Principles of Applied Ecology. 2-6 Credits.

Application of ecological concepts to landscape design, planning, and management. Emphasis on spatially explicit problem-solving over a range of spatial and temporal scales.

Prereq: one course in the natural sciences.

LA 550. Advanced Landscape Media. 4 Credits.

The role of media in design inquiry; development of hard-line drawing skills, diagramming, and principles of graphic design. Repeatable.

LA 559. Landscape Technology Topics. 2-4 Credits.

Intensive study of topics in landscape construction and maintenance.

Topics include irrigation, lighting, special structures, water management, and road design. Repeatable thrice for maximum of 10 credits.

LA 562. Professional Practice of Landscape Architecture. 2 Credits.

Introduces students to key aspects of professional practice, fundamental professional skills, and professional career planning. Includes licensure, legal aspects of landscape architecture, career options, business management, and project management.

LA 572. Landscape Architectural Theory: [Topic]. 4 Credits.

This course examines theories and the role of theory in landscape architecture. Each offering explores landscape theory through a different lens, including the analysis and design of landscapes, the creation of built works, and the discussion and critique of projects.

LA 574. History of Landscape Architecture I. 4 Credits.

First in a sequence covering the history of landscape architecture. Explores the history and theory of the designed landscape from the beginnings of human settlement to the 19th century.

LA 575. History of Landscape Architecture II. 4 Credits.

The second in a sequence of two classes covering the history of landscape architecture, from the 19th century to the late 20th century.

LA 584. Landscape Perception. 4 Credits.

Development of the human-environment relationship as it relates to landscape perception, landscape archetypes, and the development of a theoretical base for contemporary landscape design.

LA 589. Site Planning and Design. 6 Credits.

Advanced problems in landscape architecture, cultural determinants of site planning and design, design development and natural systems and processes as indicators of carrying capacity. Repeatable.

Prereq: LA 539.

LA 594. Land Planning and Design. 6 Credits.

Problems in landscape architecture of increased cultural complexity. Land-use planning, computer-aided ecological analysis of land, environmental impact, urban and new community design.

Prereq: LA 489/589.

LA 601. Research: [Topic]. 1-16 Credits.

Repeatable.

LA 602. Supervised College Teaching. 2-5 Credits.

Repeatable.

LA 603. Dissertation. 1-16 Credits.**LA 605. Reading and Conference: [Topic]. 1-16 Credits.**

Repeatable.

LA 606. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

LA 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. A recent topic is Introduction to Landscape Literature.

LA 608. Workshop: [Topic]. 1-16 Credits.

Repeatable. Intensive study combining practical projects with instruction on special topics related to landscape problems.

LA 609. Practicum: [Topic]. 1-16 Credits.

Repeatable. Supervised field laboratory work; clinical or in-service educational experience. Planned programs of activities and study with assured provisions for adequate supervision.

LA 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LA 617. Introduction to Landscape Architecture Theory. 4 Credits.

Survey and critique of the theoretical frameworks for landscape architecture.

LA 620. Landscape Research Methods I. 2-4 Credits.

Contemporary research issues and strategies. Theories, approaches, and techniques applicable to topics and problems in landscape architecture. Sequence with LA 621.

LA 621. Landscape Research Methods II. 2-4 Credits.

Contemporary research issues and strategies. Theories, approaches, and techniques applicable to topics and problems in landscape architecture. Sequence with LA 620.

Prereq: LA 620.

LA 699. Master's Project. 2-10 Credits.

Student-directed and executed performance and communication of original research or project work to demonstrate advanced mastery of landscape architecture. Repeatable.

Museum Studies

Certificate in Museum Studies

Graduate students in architecture and interior architecture who are interested in museum and exhibit design can apply to this 28-credit certificate program based on courses offered at the Eugene campus. Information about the program is available online (<https://design.uoregon.edu/arhistory/grad/certificates/museum-studies>).

New Media and Culture

Certificate in New Media and Culture

This multidisciplinary program offers exposure to an array of approaches to the study of contemporary new media topics such as social media, digital surveillance, gaming culture, and the social significance of data analytics through review of the history, theory, criticism, aesthetics, and production of new media technologies. Students blend scholarly research on new media topics with practical experience creating content using digital research tools.

The certificate program is open to graduate students in any UO department or program. Requirements include completion of six graduate-level, new media–related courses, five of which are electives chosen from a flexible menu of offerings across campus, designed to fit seamlessly into students' course requirements for their home department. For more information, including course offerings for the coming year, visit the certificate website. (<http://newmediaculture.uoregon.edu>)

Planning, Public Policy and Management

Richard D. Margerum, Head of School

541-346-3635

119 Hendricks Hall

1209 University of Oregon

Eugene, Oregon 97403-1209

Mission Statement

The School of Planning, Public Policy and Management (PPPM) prepares future public leaders, creates and disseminates new knowledge, and assists communities and organizations in solving society's most pressing issues. The school's faculty and administration is dedicated to

- the highest standards of scholarship
- informed theory and empirical evidence
- engaging the civic community—public, private, and nonprofit—in democratic processes addressing economic, environmental, and social issues

- seeking good ideas and approaches from around the world and testing their transferability from one area of the globe to another
- building on the existing strengths of communities and organizations to increase their capacity to take advantage of opportunities and respond effectively to challenges
- work that ranges from local to international
- ecological, social, and economic sustainability

Faculty

Lisa Abia-Smith, senior instructor (art and special populations, art and museum education, arts in health care); director, educational outreach, Jordan Schnitzer Museum of Art. BA, 1989, St. Mary's College of California; MA, 1992, John F. Kennedy. (1997)

John Arroyo, assistant professor (urban studies, community development, inclusive urbanism). BA, 2002, Southern California; MCP, 2010, Cornell; PhD, 2018, Massachusetts Institute of Technology. (2018)

Doug Blandy, professor (art and community service, art and special populations). BS, 1974, Ohio; MA, 1979, PhD, 1983, Ohio State. (1987)

Anne Brown, assistant professor (transportation planning, mobility). BA, 2010, Macalester; MURP, 2014, California, Los Angeles. (2018)

Robert J. Choquette, senior instructor (strategic planning, project management); graduate programs coordinator. BS, 1982, MUP, 1991, Oregon. (1991)

Ben Clark, associate professor (public management, crowdsourcing, local government management). BA, 1999, Indiana, Bloomington; MPA, 2000, Syracuse; PhD, 2009, Georgia. (2016)

Renee A. Irvin, associate professor (nonprofit and philanthropic sector economics, wealth policy). BA, 1984, Oregon; MA, 1991, PhD, 1998, Washington (Seattle). (2001)

Grant Jacobsen, associate professor (environmental economics and policy, energy efficiency, renewable energy). BA, 2005, College of William and Mary; MA, 2006, PhD, 2010, California, Santa Barbara. (2010)

Saurabh Lall, assistant professor (social enterprise, impact investing, nonprofit management). BA, 2004, Mumbai; MPP, 2007, PhD, 2015, George Washington. (2016)

Patricia Lambert, professor (performing arts, cultural policy). BM, 1990, Indiana; MA, 1997, Webster; MAS, 1998, International Center for Culture and Management; PhD, 2004, Ohio State. (2003)

Laura Leete, associate professor (poverty and social policy, work-force policy, nonprofit economics). BA, 1982, California, Berkeley; MA, 1988, PhD, 1992, Harvard. (2007)

Rebecca C. Lewis, associate professor (land-use policy, sustainable development, state and local finance). BA, 2006, Kentucky; MPP, 2008, PhD, 2011, Maryland, College Park. (2013)

Richard D. Margerum, professor (environmental planning and management, planning processes, conflict management). BA, 1987, Wittenberg; MCP, 1989, Cincinnati; MS, 1992, PhD, 1995, Wisconsin, Madison. (2001)

Dyana Mason, assistant professor (nonprofit management, charitable giving, public management). BA, 1993, Southern California; MBA, 2010, William and Mary; PhD, 2014, Southern California. (2014)

Jessica Matthiesen, senior instructor (nonprofit management, program development, public service); director, undergraduate program and internship. BS, 1997, MPA, 2009, Oregon. (2012)

José Meléndez, assistant professor (civic engagement, designing participatory processes, Latino immigrants). BA, 2001, Oberlin; MEd, 2009; PhD, 2016, Illinois, Chicago. (2018)

Nicole S. Ngo, assistant professor (health economics, environmental policy, urban sustainability). BA, BS, 2006, California, Irvine; MA, 2010, PhD, 2013, Columbia. (2013)

Robert G. Parker, instructor (land use and growth management, economic development). BS, 1986, Colorado State; MUP, 1989, Oregon. (1989)

Eleonora Redaelli, associate professor. Laurea, 1997, Università degli Studi di Milano; DMA, 2000, Conservatorio di Musica Giuseppe Verdi; PhD, 2008, Ohio State. (2014)

Gerardo Sandoval, associate professor (economic and community development, urban revitalization, immigrant neighborhoods). BS, 2000, California, Davis; MCP, 2002, PhD, 2007, California, Berkeley. (2010)

Marc Schlossberg, professor (geographic information systems, social planning, transportation planning). BBA, 1987, Texas, Austin; MUP, 1995, San Jose State; PhD, 2001, Michigan. (2001)

Julie Voelker-Morris, senior instructor. BA, 1996, Augustana College; MS, 2002, Oregon. (2014)

Yizhao Yang, associate professor (environmental planning, sustainable living design and analysis, geographic information systems). BArch, 1995, Tianjin; MS, 1998, Tsinghua; MRP, 2001, PhD, 2007, Cornell. (2006)

- **Nonprofit Administration Minor**

Undergraduate Studies

The undergraduate program provides an interdisciplinary liberal arts education that prepares students for work in the fields of planning, policy, and public and nonprofit administration. Through course work that integrates theory and practice, the curriculum focuses on the ways governments, nonprofit organizations, and other institutions solve public problems. Students explore the economic, social, and environmental characteristics of communities and systems of governance to determine effective ways to advance the public's goals. The curriculum helps students develop knowledge of core issues related to planning and public policy as well as more in-depth knowledge in a chosen field of interest. Emphasis is placed on developing skills in research; verbal, written, and digital communication; and working in group settings.

Preparation

A broad liberal arts background, the development of analytical skills, and community volunteer and leadership experiences are excellent preparation for the PPPM major. Premajors should consider course work or experience in English, public speaking, economics, political science, sociology, computer science, mathematics, and volunteer work.

Careers

The bachelor of arts (BA) or bachelor of science (BS) degree in planning, public policy and management prepares graduates for entry-level positions in government agencies and nonprofit organizations. In addition, the degree provides a broad interdisciplinary, professional background and a sound basis for graduate study in fields such as urban planning, public policy and management, business, law, journalism, and nonprofit administration.

Admission Requirements

Students should apply for admission in the term prior to achieving junior class standing (90–105 credits). Strong applicants will be considered before this level on a case-by-case basis. Students **must** apply to the major before earning 30 credits in PPPM major courses. Preference in admission is given to applicants who have:

- a grade point average (GPA) of 3.00 or better
- some experience—paid or volunteer—in public service
- fulfilled a majority of the university general-education requirements

The school strongly encourages applicants from diverse backgrounds, regardless of race, age, gender identity, sexual orientation, religion, or ability, and recognizes that affirmative action and equal opportunity begin with the development of professionals who represent a broad array of ideas and cultures.

Prior to applying for admission to the major, students should take Introduction to Economic Analysis: Microeconomics (EC 201) and at least one of the following three courses: Introduction to Public Policy (PPPM 201), Introduction to City Planning (PPPM 205), or Introduction to the Nonprofit Sector (PPPM 280).

Students are encouraged to declare the PPPM premajor to receive correspondence about upcoming courses and opportunities, advising services, and access to courses with reserved spaces for PPPM students.

Admission Procedures

The school accepts applications for admission to the major fall, winter, and spring terms. Admission to the major is effective the following term. The deadline to apply falls on the Monday of the fourth week. To be considered for admission, students must submit the following materials:

1. Completed application form, available as a PDF on the school website
2. Brief résumé of education and volunteer history
3. Personal statement describing interest in public service, career goals, and how the major in PPPM will help achieve those goals. This statement should be limited to two typed, double-spaced pages
4. Transcripts from all colleges and universities attended

Bachelor of Arts Degree Requirements

Code	Title	Credits
Core Courses ¹		
PPPM 201	Introduction to Public Policy	4
PPPM 205	Introduction to City Planning	4
PPPM 280	Introduction to the Nonprofit Sector	4
PPPM 413	Quantitative Methods	4
PPPM 415	Policy and Planning Analysis	4
PPPM 434	Urban Geographic Information Systems	4
PPPM 494	Practice of Leadership and Change	4
Field of Interest		
PPPM electives ²		32
Total Credits		60

¹ PPPM majors must take core courses for letter grades and pass them with grades of C– or better.

² Up to 12 credits of Internship: [Topic] (PPPM 404) may count toward fulfilling this requirement. All electives must be upper division.

Bachelor of Science Degree Requirements

Code	Title	Credits
Core Courses ¹		
PPPM 201	Introduction to Public Policy	4
PPPM 205	Introduction to City Planning	4
PPPM 280	Introduction to the Nonprofit Sector	4
PPPM 413	Quantitative Methods	4
PPPM 415	Policy and Planning Analysis	4
PPPM 434	Urban Geographic Information Systems	4
PPPM 494	Practice of Leadership and Change	4
Field of Interest		
PPPM electives ²		32
Total Credits		60

¹ PPPM majors must take core courses for letter grades and pass them with grades of C– or better.

² Up to 12 credits of Internship: [Topic] (PPPM 404) may count toward fulfilling this requirement. All electives must be upper division.

Students should expect extensive writing, analysis, and collaborative projects as part of their education in PPPM. For more information, contact the PPPM undergraduate advisor.

Fields of Interest

Students are encouraged to work with an undergraduate academic advisor to identify electives in one or more fields of interest.

Fields of interest may include the following:

- arts and cultural leadership
- environment and sustainability
- equity and social justice
- nonprofit administration
- public leadership and management

- social and health policy
- urban planning and development

Internship

Internships are optional but highly recommended for all PPPM students as a way to explore and clarify their interests and career goals, apply academic learning, develop new skills, and network with professionals. These career-building experiences help prepare students for fellowships, professional positions, or further academic study. Up to 12 credits of Internship: [Topic] (PPPM 404) may be applied to the field of interest.

Thesis and Honors Program

Students may pursue an undergraduate thesis in PPPM if they are accepted in the honors program, or if they are enrolled in the Clark Honors College. Students may not pursue the thesis option without prior approval; interested students should contact a PPPM undergraduate advisor early in their junior year for more information. Students must have a 3.75 GPA to be considered for the honors program; a thesis is required.

Minors

Planning, Public Policy and Management Minor

The planning, public policy and management minor complements majors in the humanities or social sciences—anthropology, geography, political science, or economics, for example. It provides a professional context in which to apply the knowledge, theories, and methods of the student's major discipline. Students pursuing the minor are introduced to a broad overview of issues in urban and regional planning, public policy and public management, and nonprofit administration. The minor enhances any student's undergraduate education with preparation for a variety of professional occupations and graduate study.

Students may declare the minor in planning, public policy and management at any time by meeting with the PPPM undergraduate advisor. Materials for declaring the minor are available in the school office and on the website.

Code	Title	Credits
PPPM 201	Introduction to Public Policy ¹	4
PPPM 205	Introduction to City Planning ¹	4
PPPM 280	Introduction to the Nonprofit Sector ¹	4
PPPM 415	Policy and Planning Analysis ¹	4
PPPM electives ²		12
Total Credits		28

¹ Must be taken for letter grades and passed with grades of C– or better.

² As much as 8 credits of Internship: [Topic] (PPPM 404) may be used toward fulfilling this requirement. All electives must be upper-division.

Nonprofit Administration Minor

The School of Planning, Public Policy and Management offers a minor of special value to students interested in a career in the nonprofit sector. Through the minor, students can enhance their undergraduate education to include preparation for occupations and graduate study in nonprofit administration. The nonprofit sector is one of the fastest-growing employment sectors in the country, creating a high demand for

graduates with specialized skills to work for these diverse and exciting organizations.

Students may declare the minor in nonprofit administration at any time by meeting with a PPPM undergraduate advisor. Materials for declaring the minor are available in the school office or on the website. Core courses must be taken for letter grades and passed with grades of C- or better, unless offered pass/no pass only.

Code	Title	Credits
PPPM 280	Introduction to the Nonprofit Sector	4
PPPM 422	Grant Proposal Writing	1
PPPM 480	Nonprofit Management I	4
PPPM 481	Fundraising for Nonprofit Organizations	4
PPPM 484	Public and Nonprofit Financial Management	4
Upper-division electives ¹		8
Total Credits		25

¹ A list of approved courses are available in the school office. Only preapproved elective courses satisfy this requirement. See a PPPM undergraduate advisor for more information.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- **Master of Community and Regional Planning**
- **Master of Nonprofit Management**
- **Master of Public Administration**
- **Graduate Certificate in Arts Management**
- **Graduate Certificate in Nonprofit Management**

Graduate Studies

Programs for the master of community and regional planning (MCRP) degree, the master of nonprofit management (MNM), and the master of public administration (MPA) require two years for completion. The MCRP degree is accredited nationally by the Planning Accreditation Board. The MPA is accredited nationally by the Network of Schools of Public Policy, Affairs, and Administration. The department also offers a 24-credit graduate certificate in nonprofit management.

The interdisciplinary and eclectic fields of planning, public policy, and public and nonprofit management are concerned with systematically shaping the future. Professionals in the field are involved in analysis, preparation of recommendations, and implementation of policies and programs that affect public facilities and services and the quality of community life. These professionals assume responsibility for planning, policy, and management in community and regional development, natural resources, economic development, social sciences, land use, transportation, arts, and other fields.

Planning, public policy, and public and nonprofit management graduates have a comprehensive understanding of economic, environmental, fiscal, physical, political, and social characteristics of a community. Graduates are expected to provide leadership and to otherwise participate effectively in efforts to enhance the capacity of communities to deal creatively with change.

Financial Aid

Approximately 40 percent of the department's students receive some financial assistance (e.g., graduate employment, work-study assistance, or research stipends). Graduate employment positions (GE) are offered to approximately 20 students each year. Each fellowship includes a stipend and a waiver of tuition and fees for one or more terms. Graduate students also may work on planning and public policy projects through the Community Planning Workshop. Each year, five to 15 students receive stipends for research on contracts developed and administered in the workshop. Research and GE appointments typically are not offered until the student has been in a PPPM program for at least one term.

Graduate students are eligible for fellowship awards granted by federal agencies and privately endowed foundations and loans from university and federal student loan programs. Information about grants and loans may be obtained from the Office of Student Financial Aid and Scholarships.

Applicants to PPPM programs are strongly urged to apply for university financial assistance before February of the year of application in order to be eligible for work-study and other assistance offered by the student financial aid office.

The University of Oregon offers Diversity Excellence Scholarships for graduate students who are United States citizens or

permanent residents. For more information, visit the Center for Multicultural Academic Excellence (http://financialaid.uoregon.edu/diversity_excellence_scholarship) website.

Community and Regional Planning

The master of community and regional planning (MCRP) program trains policy-oriented planners for leadership positions in planning and planning-related organizations. The field of planning is concerned with rational and sensitive guidance of community and regional change. Planners are responsible for identifying and clarifying the nature and effect of planning problems, formulating potential solutions to these problems, and assisting in the implementation of alternative policies.

To realize these objectives, the planner must draw on the skills and insights of many professions and disciplines. The planner must have a basic understanding of the cultural, economic, social, political, and physical characteristics of a community.

Entering students should be prepared to become involved in and committed to resolving important social, economic, environmental, political, and cultural problems. Courses in and outside the department provide students with an integrated understanding of planning, public policy, and public management as well as specific skills needed for a chosen professional area.

Oregon is an especially fruitful laboratory in which to study planning. The state has an international reputation as a source of innovative approaches to addressing planning issues.

Students select a set of courses in consultation with their advisors that focus their elective work on an area of special interest. The program has exceptional strengths in community and regional development, environmental planning, land use and sustainable development, and social planning. In addition, the department's strengths in nonprofit management, local government management, and budget and finance are of interest to many students in the field of planning.

The program has strong ties with other programs on campus. Students often pursue concurrent degrees in planning and environmental studies, landscape architecture, business, economics, geography, international studies, or public administration. See *Concurrent Master's Degrees* (p. 722) in this section.

Preparation

Students are strongly encouraged to complete a thorough social science undergraduate program including courses in economics, sociology, geography, and history. Work experience, particularly if related to planning, is valuable, as are writing and public speaking skills. Courses in the natural sciences, policy sciences, environmental design, or analytic methods are helpful as background for advanced graduate work in a concentration area of interest to the student.

Students must complete either an advanced undergraduate or a graduate-level introductory course in statistics as a pre- or corequisite to Planning Analysis I (PPPM 613). No credit toward the MCRP degree is allowed for the statistics course. The requirement is waived for students with equivalent courses or work experience. Entering students are urged to satisfy this requirement before enrolling in the program.

Students may file petitions to transfer up to 15 graduate credits taken prior to admission to the planning program. Such petitions must be submitted during the first term in the program.

Juniors and seniors who anticipate applying for admission are encouraged to seek advice at the department office.

Careers

Graduates with an MCRP degree find employment in public, private, and nonprofit sectors. In the public sector, three kinds of agencies provide career opportunities: local land-use and zoning agencies; agencies for housing, social services, community renewal, parks, transportation, and other community facilities; and agencies for economic development and natural resource management. In the private sector, graduates are typically employed by consulting planners, private developers, and other firms requiring research and analysis skills. Graduates are also employed by such nonprofit organizations as environmental and advocacy groups, community development organizations, and research firms.

Application Procedures

Importance is placed on the student's preference for and ability to undertake self-directed educational activity.

Because there are more than sixty-five accredited graduate programs in planning in the United States, the department's admissions committee emphasizes the selection of candidates who present clear and specific reasons for choosing to pursue their graduate work in planning at the University of Oregon.

Application Materials

1. Graduate Admission Application, available online—follow the instructions on the department's website
2. A résumé
3. A statement, prepared by the applicant, explaining why admission to the UO planning program is sought and what the applicant's expectations are from the field
4. At least three letters of recommendation from people familiar with the applicant's ability to pursue graduate-level studies in planning
5. Transcripts from all the colleges and universities attended, including evidence of completion of an undergraduate degree from an accredited college or university
6. Graduate Record Examinations (GRE) scores are optional. If submitted, they are considered along with other application materials
7. Applicants whose native language is not English must supply results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) examination. The minimum acceptable TOEFL score for admission is 575 (paper-based test) or 88 (Internet-based test); the minimum acceptable IELTS exam score is 7.0. The results of the examination should be sent to the Office of Admissions, 1217 University of Oregon, Eugene OR 97403-1217

Applications are accepted beginning September 15 for admission fall term a year later. The deadline for receipt of the application to the program is February 1. Applicants are notified of admission decisions early in March. For more information, call or write the department.

The Planning Curriculum

A total of 72 credits beyond the bachelor's degree is required for the MCRP degree. Core courses must be taken for letter grades, unless offered pass/no pass only.

Students are expected to enroll for six terms with an average course load of 12 credits a term. During the summer, students are encouraged to engage in planning work. The planning program offers research stipends

and course credit for qualified applicants who take part in research conducted by the Community Planning Workshop. Planning internships are also available; some provide compensation.

Master of Community and Regional Planning Requirements

PPPM 548	Collaboration	
Field of interest electives selected from list of suggested courses in consultation with advisor		25
PPPM 609	Terminal Project	4
Total Credits		73

Community Planning Workshop

A distinctive feature of the planning graduate curriculum is the Community Planning Workshop, an applied research and service program that is required for first-year students. Students work on six month planning projects in small teams supervised by program faculty members and second year graduate students in planning. Clients have included federal, state, county, and local governments as well as nonprofit organizations.

Projects typically focus on issues of immediate environmental, social, and economic importance to the client group and the general public. Recent project topics include

- Citizen involvement in planning process
- Housing needs analysis
- Land-use planning
- Natural hazards mitigation
- Program evaluation
- Strategic plans for communities and regions
- Tourism and recreational development
- Watershed planning

Each year, first-year graduate students enrolled in Community Planning Workshop (PPPM 625) and Community Planning Workshop (PPPM 626) complete five to 10 planning projects. Final written reports, prepared by each student team, provide evidence of the students' expertise and ability to conduct planning research and to prepare and present high-quality professional reports. After completing Community Planning Workshop (PPPM 625) and Community Planning Workshop (PPPM 626), selected students may continue to engage in planning research projects for

compensation. The popularity of the program with students—and with government and private-sector clients—has enabled the Community Planning Workshop to provide research support for five to 15 students a year.

Federal grants and support from a variety of state agencies have helped the Community Planning Workshop become one of the most successful community planning assistance programs in the nation. Projects have received numerous state and national awards.

Nonprofit Management

The master of nonprofit management (MNM) is a professional degree designed to train students to lead nonprofit organizations. Due to the growth of the nonprofit sector over the past three decades in the US and the growth of nongovernmental organizations internationally, the sector has professionalized. People currently working in the nonprofit sector and others seeking to switch to or enter the nonprofit sector now seek master's-level training to advance their careers, specializing specifically in the administration of nonprofit organizations.

Critical skills for nonprofit administration are common to all nonprofit fields, including handling financial management challenges and tax-exempt reporting structures, raising funds from individual donors and institutions, and managing a mission-oriented workforce.

Unique Aspects of the Program

The program melds relevant best-practice elements from the business and government sectors with the management imperatives of the nonprofit and philanthropic sectors. Woven into the course work are opportunities to obtain practical experience at nonprofit organizations, so that participants in the program have significant administrative experience upon graduating. Examples include the review and consultation portion of the Fundraising for Nonprofit Organizations (PPPM 581) course, the nine-month board membership required for the Nonprofit Board Governance (PPPM 687) course, and the projects student teams complete for nonprofit organizations in the Nonprofit Consultancy (PPPM 688) course.

Students may combine the master of nonprofit management with another graduate degree from within the department or from other academic units across campus. In most cases, a student is able to obtain two master's degrees within three years. The normal time to completion for the master of nonprofit management degree is six terms (two years).

Application Procedures

To be eligible for the master of nonprofit management, an applicant must hold a bachelor's degree. The department strongly encourages applications from people of all backgrounds, and is dedicated to fostering a diverse academic environment.

Applications for admission are due February 1 for students entering the program in the following fall. In exceptional cases, students may be admitted at other times of the year. The online application requires the following (please follow the detailed checklist available on the department website):

- Official transcripts from undergraduate college or university, and from graduate study, if applicable
- GRE or GMAT scores (optional)
- TOEFL or IELTS scores for nonnative English speakers
- A personal statement, two to three pages in length, describing your motivation and preparation for entering or furthering a career in the

nonprofit sector, and providing a hypothetical blueprint for the next twenty years of your career

- Comprehensive employment and education résumé
- Three recommendation letters, with one or more of the letters by a faculty member
- University of Oregon online graduate admission application

Nonprofit Curriculum

After completion of the core curriculum (33 credits focusing on financial, management, and revenue-development skills), students complete an internship and 20 credits of concentration electives. Students complete a management-based capstone sequence that culminates in successful completion of a consulting project for a nonprofit organization. The two-year program takes 68 credits to complete.

Master of Nonprofit Management Requirements

PPPM 633	Public Management	

PPPM 685	Social Enterprise
Total Credits	70

- ¹ Completing a nonprofit internship (3 credits) is highly recommended for all MNM students, and required for those with fewer than two years of relevant professional experience.
- ² Courses must be approved by an advisor and should focus on a specific field of interest such as policy, community development planning, environmental sustainability, international development, marketing and development, arts management, public advocacy, and education and social services. More options for course work may be found online (<https://pppm.uoregon.edu/grad/master-of-nonprofit-management>).

Public Administration

The master of public administration (MPA) is a two-year program for people interested in public service careers that address the critical social, economic, and environmental issues of our time. The curriculum is designed to provide a combination of academic theory, analytic skills, and real-world applications so that students become effective and creative leaders in public service.

A central focus of the program is to prepare students to become evidence-based policymakers, analysts, and managers. Evidence-based policymaking—the idea that the formulation of policy and its implementation should be based on evidence of effectiveness—has gained widespread acceptance in the policy community, both in the United States and abroad, and requires a closer connection between research and practice. It requires that researchers ask policy-relevant questions and conduct meaningful and timely analyses that support the decision-making process; conversely, it requires that policymakers, managers, and leaders think critically about research and integrate appropriate evidence in the implementation and formulation of policy and practice.

Recent graduates work as advisors, policy analysts, and strategic planners in all levels of government, in Oregon, throughout the US, and around the globe. Their work addresses the full range of social issues, from improving health-care access, increasing government efficiency, and responsiveness to creating new governmental structures in developing democracies. Graduates also work in a broad range of nonprofit organizations, for instance, as executive staff members in social service, arts, and environmental organizations.

The State of Oregon is an exciting place to study public administration. As a "laboratory of democracy," it has a long and distinguished record of policy innovation. Most recently, Oregon has been on the forefront of advances in land-use, health-care, and environmental policy.

Unique Aspects of the Program

The size of the program means that master's students at the University of Oregon receive a tremendous amount of individual attention, particularly in the second year when they conduct a team-based policy research project. The close, collegial working relationships between students and instructors means that faculty members are often able to help students attain relevant alumni contacts, internships, and job opportunities.

Since the department also houses a master's degree program in community and regional planning (MCRP), master of public administration students benefit from additional faculty and planning-related course offerings. In particular, students are invited in their first

year to enroll in a two-term, field-based course—Community Planning Workshop (PPPM 625)—in which students consult on a topical issue for a local government or nonprofit agency in Oregon.

Students interested in a career in nonprofits can earn a certificate in nonprofit management concurrently with their master of public administration. The certificate program offers innovative courses including one on board governance, in which students serve on a nonprofit board, and another on philanthropy, in which students award a \$15,000 grant to a local agency. As an alternate, students may complete both the MPA and MNM degrees concurrently. See a member of the department staff for application procedures for concurrent programs.

Oregon is known for its progressive policymaking, from the Bottle Bill, to vote-by-mail, to current efforts in health-care reform. Students find policymakers and public managers unusually accessible for consultation in Oregon.

The program prepares participants to become effective, creative leaders in the public and nonprofit sectors. The curriculum provides a combination of substantive knowledge, analytic skills, and professional experience that primes students for careers as evidence-based policymakers, analysts, or managers.

Application Procedures

To be eligible for the graduate program in public administration, an applicant must hold a bachelor's degree.

Submit the following documents, which must be received by February 1:

1. Graduate Admission Application, available online—follow the instructions on the department's website
2. Comprehensive employment and education résumé
3. A two-page, typed statement of purpose that clearly describes the applicant's reasons for pursuing graduate study in the program at Oregon, his or her professional goals and objectives, and professional work experience
4. Transcripts of grades in courses taken for the bachelor's degree and of any other college-level work. They should be sent directly by the institution that awarded the course credits
5. Three letters of recommendation; two may be from academic sources
6. The Graduate Record Examination is highly recommended for admission
7. Applicants whose native language is not English must supply results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) examination. The minimum acceptable TOEFL score for admission is 575 (paper-based test) or 88 (Internet-based test); the minimum acceptable IELTS exam score is 7.0. The results of the examination should be sent to the Office of Admissions, 1217 University of Oregon, Eugene OR 97403-1217

Students are selected for the program based on a combination of their undergraduate academic performance, intellectual aptitude, commitment to public service, and written statement. The deadline for receipt of fall term admission is February 1. In exceptional cases, students may be admitted at other times of the year.

The department strongly encourages applications from people of all backgrounds, and is dedicated to fostering a diverse academic environment. This, we believe, will help prepare better future public leaders.

Master of Public Administration Requirements

Code	Title	Credits
Core Courses ¹		
PPPM 618	Public Sector Theory	4
PPPM 628	Public Sector Economics	4
PPPM 629	Public Budget Administration	4

PPPM 684	Public and Nonprofit Financial Management	4
Field of Interest		
Courses in selected field of interest ²		24
Internship		
PPPM 623	Professional Development	1
PPPM 604	Internship: [Topic] ³	3
Applied Research Project		
PPPM 638–639	MPA Capstone Applied Research Project I–II	10
Total Credits		72

¹ Must be taken for letter grades.

² Interest areas may include: policy, public management, nonprofit management, planning, environmental policy, or other field of interest. A list of potential courses for each field of interest is available on the department’s website. Students who would like to develop their own field of interest are able to do so in consultation with a faculty advisor. Recent graduates have created customized fields of interest in food sufficiency, health policy, and international development.

³ Completing an internship (3 credits) is highly recommended for all MPA students, and required for those with fewer than two years of relevant professional experience.

The master of public administration (MPA) program provides students with two key opportunities to synthesize classroom learning and apply their research skills to current policy and management issues. At the start of the second year, students engage in a policy project intended to simulate the real-world environment where analysts and managers are given short time frames to research a topic that they know little or nothing about. Over forty-eight hours, students read relevant policy and research documents, write a memo detailing the evidence base and key issues, and give an oral presentation. The project takes place the week before fall courses begin, and incoming first-year students have the opportunity to view the presentations as part of their orientation to the program. This component of the curriculum is a signature event and rite of passage each fall.

Students also enroll in a two-term project sequence that serves as the synthesizing capstone of the curriculum. Over winter and spring terms of the second year of study, students work on real-world or simulated real-world projects that require conducting in-depth needs assessments, evaluations, cost-benefit analyses, or other applied research. A faculty member works closely with student groups on these projects over the two terms. Past projects have included a survey for

a state commission to gauge attitudes among key shareholders on potential policy change, an analysis of administrative data on the impact of a postpolicy implementation on Oregonians, and an examination of three potential communities for a nonprofit’s expansion.

Graduate Certificate in Arts Management

The 24-credit graduate certificate in arts management is available to graduate students enrolled in the School of Planning, Public Policy and Management as well as other master’s and doctoral students across campus, and as a standalone graduate certificate program. Arts management typically refers to the business and programmatic management of arts organizations in the nonprofit or public sectors, including orchestras, opera companies, presenting organizations, museums, theaters, dance companies, arts councils, and service organizations. Arts managers may also be found in for-profit organizations in such areas as artist management, recording, art galleries, film, and television.

The program of study is designed to develop students’ knowledge and competencies in cultural policy, cultural planning, and arts management in an individualized program of study. Additional credits are drawn from other specialized course offerings related to the student’s area of interest in arts management, selected from courses offered through the PPPM school as well as from other academic units on campus. The graduate certificate in arts management is suitable for students from a range of fields, including art history, art, anthropology, music, nonprofit management, planning, public policy, theater arts, dance, and folklore.

Of the 24 credits total required for the program, 16 are from four required core courses:

Code	Title	Credits
AAD 550	Art in Society	4
AAD 551	Community Cultural Development	4
AAD 562	Cultural Policy	4
AAD 612	Cultural Administration	4
Electives ¹

AAD 510	Experimental Course: [Topic] (Access, Lifelong Learning in the Arts)	
AAD 510	Experimental Course: [Topic] (Museum Practice)	
AAD 520	Event Management	
AAD 521	Cultural Programming	
AAD 529	Museum Education	
AAD 571	Performing Arts Management	
PPPM 581	Fundraising for Nonprofit Organizations	

¹ This is a list of sample courses. With program director approval, elective credits for the certificate may also be taken in other departments.

Graduate Certificate in Nonprofit Management

The graduate certificate in nonprofit management prepares students for leadership in the nonprofit sector. The focused curriculum develops specific skills that are critical for success in managing nonprofit organizations.

Phenomenal growth in assets and activities of the nonprofit sector over the past two decades have led to career opportunities in the many areas of the nonprofit sector, including cultural and arts organizations, education, health care, human services, international development, and advocacy organizations. Nonprofit enterprise has broadened with developing sources of funding, and the complexities of its management require professional skills specific to the nonprofit sector.

Requirements

Code	Title	Credits
Core Courses		
PPPM 522	Grant Proposal Writing	1
PPPM 581	Fundraising for Nonprofit Organizations	4
PPPM 680	Managing Nonprofit Organizations	4
PPPM 681	Nonprofit Financial Management	4
Internship and Electives ¹		
Select three or more credits of elective course work from the following:		5
PPPM 587	Impact Philanthropy	
PPPM 685	Social Enterprise	
PPPM 686	Nonprofit 48-Hour Charrette	
PPPM 687	Nonprofit Board Governance	
PPPM 688	Nonprofit Consultancy	
AAD 520	Event Management	
AAD 571	Performing Arts Management	
AAD 612	Cultural Administration	
PPPM 604	Internship: [Topic] ²	6
Total Credits		24

¹ Elective credits may be taken in other departments. Information about the many nonprofit elective courses or waiver of required courses is available from the program director.

² Students wishing to complete the certificate must complete an internship and 5 elective credits **or** take 11 credits of nonprofit-relevant elective courses. Students who have no significant work experience in the nonprofit sector are strongly recommended to complete an internship by enrolling in 6 credits of Internship: [Topic] (PPPM 604).

Core courses must be taken for letter grades unless offered P/N only.

Admission

Graduate students from any UO department may apply for admission and add the certificate to their degree programs. Students who hold a bachelor's degree from an accredited university may apply to complete the certificate as a standalone program. Applications are reviewed for admission four times a year. Complete information about admission to the program is available on the nonprofit management certificate section of the department's website.

Concurrent Master's Degrees

Students may participate in a concurrent master's degree program. The fields of planning, public policy administration, and nonprofit management draw on knowledge and expertise from other areas such as business, law, economics, political science, environmental studies, geography, landscape architecture, and architecture. Through the concurrent degree program, students enroll in two master's programs simultaneously in order to complete requirements for both degrees with three years of

course work. Students interested in this option should seek program advice from a member of the faculty. Students must be admitted to both programs and make special arrangements with both program directors.

Institute for Policy Research and Engagement

The Institute for Policy Research and Engagement (formerly the Community Service Center) at the University of Oregon is an interdisciplinary institute that assists Oregon communities by providing planning and technical assistance to help solve local issues and improve the quality of life for Oregon residents. The role of the institute is to link the skills, expertise, and innovation of higher education with the economic development and environmental needs of communities and regions in the state, thereby providing service to Oregon and learning opportunities to the students involved.

Through the institute's programs, students gain important service and professional experience by helping to solve community and regional problems in addition to establishing relationships and strengthening partnerships between faculty members and students, community representatives, state and local agencies, and nonprofit organizations.

The institute oversees several programs:

- Community Planning Workshop
- Resource Assistance for Rural Environments
- Oregon Partnership for Disaster Resilience

Resource Assistance for Rural Environments (RARE)

The Americorps program, RARE, trains graduate-level students, then places them for a year in rural communities, where they help improve economic and environmental conditions. Qualified students receive a monthly stipend and an educational award of \$5,550 when they finish their service. Members do not need to be matriculated students. More information about this program is available on the department website.

The Oregon Partnership for Disaster Resilience (OPDR)

The partnership promotes risk reduction and mitigation activities around the state through local plan development support, research and technical resource development, training, and capacity building, offering service-learning opportunities to graduate students in planning, policy, environmental studies, and other university programs. The partnership coordinates three program areas: the Oregon Predisaster Mitigation Program; the Disaster-Resilient University Program, including the UO Integrated Emergency Management Program; and the Long-Term Postdisaster Recovery Planning initiative.

Courses

PPPM 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

PPPM 201. Introduction to Public Policy. 4 Credits.

Overview of professional public service and the planning and management of public issues. Focuses on the goals of public services within their economic, social, and political contexts.

PPPM 202. Healthy Communities. 4 Credits.

Historical relationships of public policy, planning, and public health; how public policies can promote health; relationship of planning and policies to inequalities in health outcomes.

PPPM 205. Introduction to City Planning. 4 Credits.

Introduction to planning, using urban issues as lenses to explore transportation, housing, environment, and social equity as critical elements shaping where and how people live.

PPPM 280. Introduction to the Nonprofit Sector. 4 Credits.

Overview of the nonprofit sector includes its origin, growth, oversight, and varied elements. Examines theory and research into the effectiveness of nonprofit strategies and structures.

PPPM 325. Community Leadership and Change. 4 Credits.

Explores sustainable change at the community level by examining local systems and institutions: transportation, social influences, environment, housing, and the economy.

PPPM 327. Global Leadership and Change. 4 Credits.

Explores the role of leadership in global social, economic, and ecological sustainability. Considers population, consumption, technology, diversity, scale, nonviolent change, and community.

PPPM 331. Environmental Management. 4 Credits.

Introduction to environmental management. Focuses on solutions to problems in managing population, pollution, and resources.

PPPM 340. Climate-Change Policy. 4 Credits.

Overview of climate-change policy; topics include cap and trade, carbon tax, fuel efficiency standards, biofuel standards, and renewable portfolio standards.

PPPM 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PPPM 401. Research: [Topic]. 1-21 Credits.

Repeatable.

PPPM 403. Thesis. 1-12 Credits.

Repeatable.

PPPM 404. Internship: [Topic]. 1-12 Credits.

Supervised work experience that offers students opportunities to explore and clarify career goals, apply academic learning, enhance and learn new skills, gain experience, and network with professionals. Repeatable. Prereq: PPPM 412.

PPPM 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

PPPM 406. Special Problems: [Topic]. 1-21 Credits.

Repeatable.

PPPM 407. Seminar: [Topic]. 1-5 Credits.**PPPM 408. Workshop: [Topic]. 1-21 Credits.**

Repeatable.

PPPM 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Trial courses are taught under these numbers. See the online class schedule for current titles.

PPPM 412. Internship and Professional Development. 1 Credit.

Introduction to the department's internship program and career development. Includes overview of professionalism and effective communication, resume and cover letter writing, and interviewing and networking skills.

PPPM 413. Quantitative Methods. 4 Credits.

Introduction to the use of quantitative techniques to answer planning, public policy and management related questions.

PPPM 415. Policy and Planning Analysis. 4 Credits.

Applied problem-solving in the public policy and planning process. Examines the theoretical and methodological underpinnings of policy and planning analysis.

Prereq: EC 201.

PPPM 418. Introduction to Public Law. 4 Credits.

Administrative law, including introduction to legal research, for public administrators. Administrative procedures, implementation of policy through administrative law, judicial review, and practical applications in public agencies.

PPPM 422. Grant Proposal Writing. 1 Credit.

Introduction to the process of preparing grant applications and material for funded research.

PPPM 425. Project Management. 4 Credits.

Application of specific techniques that lead to projects being completed on time, within budget, and with appropriate quality.

PPPM 426. Strategic Planning for Management. 4 Credits.

Process of strategic planning for communities, government agencies, and nonprofit organizations.

PPPM 432. Justice and Urban Revitalization. 4 Credits.

Examines the political, economic, institutional and social forces that affect the long-term vitality of cities and communities and how those factors relate to community redevelopment. Emphasis is given on how to revitalize low-income multicultural communities.

PPPM 434. Urban Geographic Information Systems. 4 Credits.

Introduction to geographic information systems in areas of environmental, demographic, suitability, and transportation-related research.

PPPM 438. Transportation Issues in Planning: [Topic]. 4 Credits.

Introduction to the social implications of various transportation-related policies and practices. Repeatable for a maximum of 8 credits.

PPPM 440. Land-Use Planning and Policy. 4 Credits.

Land use planning processes and policy tools that US governments employ to manage and control land development, especially those considered to support a community's efforts to pursue sustainable urbanization.

PPPM 442. Sustainable Urban Development. 4 Credits.

Introduces issues revolving around cities as the nexus for environmental challenges, including land-use planning, transportation planning, community and neighborhood design, and green buildings.

PPPM 443. Natural Resource Policy. 4 Credits.

Aspects of population and resource systems. Poses questions about population trends, policy, and optimum size; analyzes methods for determining resource availability and flows.

PPPM 444. Environmental Policy. 4 Credits.

Overview of policies related to the environment: examines the design and effectiveness of specific policies.

PPPM 445. Green Cities. 4 Credits.

Examines the history and future of the interface between urban growth and environmental concerns, and the technological, social, and political forces that continue to shape it.

PPPM 446. Socioeconomic Development Planning. 4 Credits.

Planning for responsible economic and social development. Policy problems and issues in providing a stable economic base and social and economic well-being while avoiding environmental degradation.

PPPM 448. Collaboration. 4 Credits.

Explores theory and practice of collaboration. Presents a variety of collaboration settings with a focus on environmental and natural resource management.

PPPM 452. Public Participation in Diverse Communities. 4 Credits.

Review of community engagement strategies and tools for encouraging public participation in low income and ethnically diverse communities. Prereq: PPPM 432.

PPPM 460. Health Policy. 4 Credits.

Introduction to the key health policy issues of access, cost, quality, and racial and ethnic disparities.

PPPM 465. Program Evaluation. 4 Credits.

Introduction to the design and implementation of program evaluations.

PPPM 472. Creative Placemaking. 4 Credits.

This course provides an overview of the relationship between the arts and community development.

PPPM 480. Nonprofit Management I. 4 Credits.

How to manage nonprofit organizations for superior performance in a humane, responsive, and responsible manner. Distinctive characteristics of nonprofit organizations. Prereq: PPPM 280.

PPPM 481. Fundraising for Nonprofit Organizations. 4 Credits.

Introduction to fundraising for nonprofit organizations. Annual giving, major gifts, planned giving, and campaigns.

PPPM 483. Volunteer Resource Management. 2 Credits.

This course provides an overview of the role of volunteers in community organizations and serves as a comprehensive introduction to effective practices in volunteer resource management.

PPPM 484. Public and Nonprofit Financial Management. 4 Credits.

Introduction to financial management for public agencies and nonprofit organizations. Topics include budget processes, financial statements, financial resource management (taxes, donations, grants), expenditure systems, and capital project analysis.

PPPM 486. Philanthropy and Grant Making. 2 Credits.

History, economics, and practice of philanthropy and grant making in the United States. Students study philanthropy from a multidisciplinary perspective and finish the quarter by awarding a \$15,000 grant to a nonprofit organization of their choice.

PPPM 487. Impact Philanthropy. 4 Credits.

Introduction to impact philanthropy and related topics. Evidence-based philanthropy, venture philanthropy, impact investing, social impact bonds, impact measurement, and policy environment.

PPPM 488. Nonprofit Legal Issues. 4 Credits.

This course introduces legal issues for administration of nonprofit organizations. Topics include formation and types of organizations, board of directors duties, regulation of nonprofits, risk management, employee and volunteer law, lobbying, charitable solicitation, and laws on discrimination and accommodation.

PPPM 494. Practice of Leadership and Change. 4 Credits.

Examines the principles and practices of leadership and change in communities and organizations through discussions with community leaders and personal reflection. Prereq: major status, senior standing preferred.

PPPM 495. Advanced Urban Geographic Information Systems. 4 Credits.

Acquiring advanced skills of using Geographic Information Systems (GIS) for community mapping and spatial analysis. Prereq: PPPM 434 or other intro GIS class.

PPPM 503. Thesis. 1-16 Credits.

Repeatable.

PPPM 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

PPPM 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

PPPM 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Trial courses are taught under these numbers. See the online class schedule for current titles.

PPPM 518. Introduction to Public Law. 4 Credits.

Administrative law, including introduction to legal research, for public administrators. Administrative procedures, implementation of policy through administrative law, judicial review, and practical applications in public agencies.

PPPM 522. Grant Proposal Writing. 1 Credit.

Introduction to the process of preparing grant applications and material for funded research.

PPPM 525. Project Management. 4 Credits.

Application of specific techniques that lead to projects being completed on time, within budget, and with appropriate quality.

PPPM 526. Strategic Planning for Management. 4 Credits.

Process of strategic planning for communities, government agencies, and nonprofit organizations.

PPPM 532. Justice and Urban Revitalization. 4 Credits.

Examines the political, economic, institutional and social forces that affect the long-term vitality of cities and communities and how those factors relate to community redevelopment. Emphasis is given on how to revitalize low-income multicultural communities.

PPPM 534. Urban Geographic Information Systems. 4 Credits.

Introduction to geographic information systems in areas of environmental, demographic, suitability, and transportation-related research.

PPPM 538. Transportation Issues in Planning: [Topic]. 4 Credits.

Introduction to the social implications of various transportation-related policies and practices. Repeatable for a maximum of 8 credits.

PPPM 542. Sustainable Urban Development. 4 Credits.

Introduces issues evolving around cities as the nexus for environmental challenges, including land-use planning, transportation planning, community and neighborhood design, and green buildings.

PPPM 543. Natural Resource Policy. 4 Credits.

Aspects of population and resource systems. Poses questions about population trends, policy, and optimum size; analyzes methods for determining resource availability and flows.

PPPM 544. Environmental Policy. 4 Credits.

Overview of policies related to the environment: examines the design and effectiveness of specific policies.

PPPM 546. Socioeconomic Development Planning. 4 Credits.

Planning for responsible economic and social development. Policy problems and issues in providing a stable economic base and social and economic well-being while avoiding environmental degradation.

PPPM 548. Collaboration. 4 Credits.

Explores theory and practice of collaboration. Presents a variety of collaboration settings with a focus on environmental and natural resource management.

PPPM 552. Public Participation in Diverse Communities. 4 Credits.

Review of community engagement strategies and tools for encouraging public participation in low income and ethnically diverse communities. Prereq: PPPM 532.

PPPM 560. Health Policy. 4 Credits.

Introduction to the key health policy issues of access, cost, quality, and racial and ethnic disparities.

PPPM 565. Program Evaluation. 4 Credits.

Introduction to the design and implementation of program evaluations.

PPPM 572. Creative Placemaking. 4 Credits.

This course provides an overview of the relationship between the arts and community development.

PPPM 581. Fundraising for Nonprofit Organizations. 4 Credits.

Introduction to fundraising for nonprofit organizations. Annual giving, major gifts, planned giving, and campaigns.

PPPM 583. Volunteer Resource Management. 2 Credits.

This course provides an overview of the role of volunteers in community organizations and serves as a comprehensive introduction to effective practices in volunteer resource management.

PPPM 586. Philanthropy and Grant Making. 2 Credits.

History, economics, and practice of philanthropy and grant making in the United States. Students study philanthropy from a multidisciplinary perspective and finish the quarter by awarding a \$15,000 grant to a nonprofit organization of their choice.

PPPM 587. Impact Philanthropy. 4 Credits.

Introduction to impact philanthropy and related topics. Evidence-based philanthropy, venture philanthropy, impact investing, social impact bonds, impact measurement, and policy environment.

PPPM 588. Nonprofit Legal Issues. 4 Credits.

This course introduces legal issues for administration of nonprofit organizations. Topics include formation and types of organizations, board of directors duties, regulation of nonprofits, risk management, employee and volunteer law, lobbying, charitable solicitation, and laws on discrimination and accommodation.

PPPM 595. Advanced Urban Geographic Information Systems. 4 Credits.

Acquiring advanced skills of using Geographic Information Systems (GIS) for community mapping and spatial analysis.

PPPM 601. Research: [Topic]. 1-16 Credits.

Repeatable.

PPPM 604. Internship: [Topic]. 1-10 Credits.

Supervised work experience that offers students opportunities to explore and clarify career goals, apply academic learning, enhance and learn new skills, gain experience, and network with professionals. Repeatable.

PPPM 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

PPPM 606. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

PPPM 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

PPPM 608. Workshop: [Topic]. 1-16 Credits.

Repeatable. A recent topic is Community Planning.

PPPM 609. Terminal Project. 1-16 Credits.

Repeatable.

PPPM 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PPPM 611. Introduction to Planning Practice. 4 Credits.

Explores the concepts and functions of the planning process as they relate to the social, economic, political, and environmental aspects of communities and regions.

PPPM 612. Legal Issues in Planning. 4 Credits.

Federal and state legal relationships, the role of the courts in reviewing public sector decision-making, sources of the law, issues in land-use regulation, and basic legal research skills.

PPPM 613. Planning Analysis I. 5 Credits.

Data sources and methods of data collection including surveys; descriptive and multivariate analysis; computer applications; selected analytic models, population projections, cost-benefit analysis.

PPPM 616. Planning Theory and Ethics. 4 Credits.

Logic of the planning process; the relationship of planning to the political process and to rational decision making in governance.

PPPM 617. Human Settlements. 4 Credits.

Historical development of cities and the ways in which city and regional contexts influence economic, social, and political processes.

PPPM 618. Public Sector Theory. 4 Credits.

Overview of the core concepts, theories, and practices that provide the foundation for the field of public policy and management.

PPPM 623. Professional Development. 1 Credit.

Articulating preliminary career goals and mapping the necessary steps to accomplish these goals.

PPPM 625. Community Planning Workshop. 5 Credits.

First in a two-term sequence of planning and problem-solving courses. Students working in teams conduct research and develop solutions to planning problems for a client community. Sequence with PPPM 626.

PPPM 626. Community Planning Workshop. 5 Credits.

Last in a two-term sequence of planning and problem-solving courses. Students working in teams conduct research and develop solutions to planning problems for a client community. Sequence with PPPM 625. Prereq: PPPM 625.

PPPM 628. Public Sector Economics. 4 Credits.

Reasons for governmental intervention and analysis of revenue sources available to governments. Includes discussion of various taxes, intergovernmental transfer policies, and user fees.

PPPM 629. Public Budget Administration. 4 Credits.

Resource allocation through the budget process. Analysis of budget systems, service costing, and citizen participation in the budget process.

PPPM 633. Public Management. 4 Credits.

Theory and practice of public service management; leadership and organizational capacity building, including key management activities for developing effective public service organizations.

PPPM 636. Public Policy Analysis. 4 Credits.

Techniques in the policymaking process. Determining the impact of policies, comparing alternatives, determining the likelihood that a policy will be adopted and effectively implemented.

Prereq: PPPM 628 or equivalent.

PPPM 637. MPA Policy Analysis Project. 1 Credit.

Students team to produce a professionally oriented policy analysis memorandum and presentation on an assigned topic in a 48-hour period.
Prereq: PPPM 636.

PPPM 638. MPA Capstone Applied Research Project I. 5 Credits.

Team prepare applied research projects for client organizations using analytical and managerial skills to solve problems in public policy analysis or public management. Sequence with PPPM 639.
Prereq: PPPM 618, 629, 633, 636, 657, 684.

PPPM 639. MPA Capstone Applied Research Project II. 5 Credits.

Teams prepare applied research projects for client organizations using analytical and management skills to solve problems in public policy analysis or public management. Sequence with PPPM 638.
Prereq: PPPM 638.

PPPM 646. Planning for Growth Management. 4 Credits.

Examines motivations for managing growth. Surveys regulatory and incentive-based approaches to growth management at the state, regional, and local level.

PPPM 656. Quantitative Methods. 5 Credits.

Develops skills in quantitative analysis. Emphasizes selecting appropriate analysis procedures and properly interpreting and reporting results.

PPPM 657. Research Methods in Public Policy and Management. 4 Credits.

Survey of research methods used in the analysis of public policy issues. Emphasis is on determining the appropriate methodology for a given research question.
Prereq: PPPM 656.

PPPM 663. Professional Development II. 1 Credit.

Pre-professional students practice the habits of professionals in the field. Build skills in metacognition and reflection, inclusion and diversity, and personal investment in life long learning and inquiry. Sequence with PPPM 623. Repeatable once for maximum of 2 credits.

PPPM 680. Managing Nonprofit Organizations. 4 Credits.

Principles of effective management of nonprofit organizations. Governance, strategy, legal structure and standards, and volunteer administration.

PPPM 681. Nonprofit Financial Management. 4 Credits.

Fundamentals of managing nonprofit revenues and expenses, budgeting, fund stewardship, endowment investment and payout, event and service pricing, capital project decision making, and internal control procedures.

PPPM 684. Public and Nonprofit Financial Management. 4 Credits.

Financial management overview for public agencies and nonprofits, including budget processes, financial statements, resource management, expenditure systems, capital project analysis, and internal management control processes.

PPPM 685. Social Enterprise. 4 Credits.

Introduction to social enterprises and their ecosystem. Earned revenue and social business models, social performance management, balancing financial and social objectives, funding landscape, policy environment, and taking social enterprises to scale.

PPPM 686. Nonprofit 48-Hour Charrette. 1 Credit.

Requires students to complete a management memo on an assigned topic. Work is completed within a 48-hour period, mimicking the high-stakes, deadline-intensive schedule characterizing professional work in the nonprofit sector.

PPPM 687. Nonprofit Board Governance. 1 Credit.

Students serve on governing boards of nonprofit organizations for one year: fall, winter, and spring terms.

PPPM 688. Nonprofit Consultancy. 4 Credits.

Student teams complete projects for nonprofit organizations, assessing organizational needs and capacity, evaluating alternative strategies, and recommending solutions for organizational success.

Product Design

Trygve Faste, Department Head

541-346-6891
251E Lawrence Hall
5282 University of Oregon
Eugene, Oregon 97403-5232

The Department of Product Design rigorously explores the invention, production, and use of products. It integrates the theories and applied practices in the design, art, and architecture disciplines, creating collaborative opportunities across campus with the business school and the anthropology and chemistry departments. The critical research and design work produced by students and faculty members has an impact on both the local and international design communities.

The program exposes and expands on the significance of materials in products, helping students develop an understanding of how aspects of sustainability and ergonomics, tactile and visual aesthetics, and structural integrity can influence their choices in materials.

Overview

The department offers a bachelor of arts (BA) or bachelor of science (BS) degree in product design on the Eugene campus, and a bachelor of fine arts (BFA) degree in product design in Portland. The BA and BS degrees are four-year liberal arts programs designed to prepare students for the BFA program in product design. Students enrolled in either degree option share a foundation in design, graphics, drawing, and art history with majors in both architecture and art.

Eugene

Students studying for the bachelor's degree in product design are well-equipped with computer and digital-imaging labs, new digital computer-controlled mill, laser cutter, wood shop, digital loom, metals and ceramics shops, large-format printing facility, and other specialized art studios in Lawrence Hall and the Northsite studio complex. The Eugene campus has strong undergraduate and graduate degree programs in architecture, art, ceramics, digital arts, fibers, interior architecture, metalsmithing and jewelry, painting, photography, printmaking, and sculpture. In addition, students have access to other university resources, such as the architecture and allied arts and main libraries, Student Recreation Center, Erb Memorial Union, and Craft Center.

Portland

Students pursuing the fifth-year product design BFA degree work at the university's new facility in Portland's Old Town Historic District. The White Stag Block houses studio facilities, digital fusion laboratory, classrooms, library, exhibit and research spaces, and work areas for students and faculty members. An integrated shop and an output center for two- and three-dimensional computer numerical controlled production are available. Product design students benefit by interacting with students of other professional disciplines, such as digital arts and architecture. An internship component of the BFA program gives students access to

design professionals and direct experience at leading Northwest design companies.

Preparation

High school and college students interested in product design should prepare themselves by taking courses in the following subjects:

- Fine arts and design (e.g., drawing, painting, sculpture, two- and three-dimensional design, fiber arts, metal arts, ceramics, drafting, art history, architecture, furniture or interior design)
- Social sciences (e.g., sociology, psychology, cultural anthropology)
- Sciences and mathematics (e.g., physics, algebra, geometry)
- Humanities (e.g., literature, writing)

To better understand the professional field, prospective students may plan to visit and discuss opportunities with local designers and firms practicing product design.

Product design students are required to own a laptop computer. If students purchase recommended equipment, they are eligible for technical support from our computing staff. Recommended systems are listed on the program's website. Purchase of a digital camera to record studio work and use for classroom assignments is strongly advised.

Faculty

John Arndt, associate professor (product design). BFA, 1997, Alfred; MDes, 2006, Design Academy Eindhoven. (2008)

Wonhee Jeong Arndt, associate professor. BFA, 2002, Kookmin; MDes, 2006, Design Academy Eindhoven. (2014)

Elizabeth Esponnette, associate professor (product design). BS, 2010, Cornell; MFA, 2015, Stanford. (2015)

Trygve Faste, associate professor (product design). BA, 1997, Whitman College; MFA, 2004, Cranbrook Academy of Art. (2010)

Kiersten Muenchinger, Tim and Mary Boyle Chair in Material and Product Studies; associate professor (product design). BA, 1993, Dartmouth College; MS, 1998, Stanford. (2008)

Erdem Selek, associate professor (product design). BID, 2004, Middle East Technical; MA, 2007, Ecole Supérieure d'Art et de Design; MS, 2008, Istanbul Technical. (2015)

Hale Selek, associate professor (product design). BID, 2004, Middle East Technical; MA, 2007, Ecole Supérieure d'Art et de Design; MS, 2008, Istanbul Technical. (2015)

Susan Sokolowski, associate professor (sports product design). BFA, 1990, Fashion Institute of Technology; MA, 1997, Cornell; PhD, 1999, Minnesota, Twin Cities. (2015)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts in Product Design** (p.)
- **Bachelor of Science in Product Design** (p. 728)
- **Bachelor of Fine Arts in Product Design** (p. 728)

Undergraduate Studies

Application for Product Design Major

The major in product design is an intensive, limited-enrollment program. Acceptance is competitive and based on documented evidence of potential to excel in the field. Admission screening takes place once a year and requires review of a portfolio of visual materials submitted by each applicant. These portfolios should display promise and creativity, but need not demonstrate extensive experience in design or product-related projects. Applications that don't include visual materials are not reviewed.

Students apply directly to the department for admission as majors. The postmark deadline for applications is January 15 for fall term admission. Visit the program website for the application form and instructions.

BFA Application

Admission to the bachelor of fine arts program requires an application that includes a portfolio review of the student's work, usually in the last term of the fourth year of study. Students who have completed a comparable four-year degree in material and product studies at another institution may be admitted to the fifth-year BFA program. Such BFA candidates must satisfy the university's 45-credit residence requirement. Students accepted to the BFA program from schools other than the University of Oregon should speak with an advisor to determine how their credits will transfer. Prerequisites may require the student to spend more than one year in the program.

Bachelor of Arts in Product Design Requirements

Students must complete a minimum of 180 credits, which include general-university requirements for a bachelor of arts or bachelor of science degree.

Code	Title	Credits
Core Courses		
ART 115	Surface, Space, and Time	4
ART 116	Core Interdisciplinary Laboratory	4
IARC 204	Understanding Contemporary Interiors	4
PD 223	Beginning Design Drawing	4
PD 240	Designers' Tools	4

Graduate Studies

The Department of Product Design offers a master of science degree in sports product design, a two-year program based in Portland, Oregon. (Change opening page as well)

The master of science in sports product design prepares designers to be key members and leaders of multidisciplinary development teams within the more than 700 sports product companies located in Oregon and beyond. The program focuses on innovation methods, design tailored for the athlete, product sustainability, and sports product marketing and branding through the study of sports-specific design techniques, human physiology, biomechanics, and sports psychology.

Credits Milestones Students who graduate from this program will be capable of making strong contributions to the sports design culture of Oregon and the world at large.

Master of Science in Sports Product Design

The MS in sports product design is a two-year program intended for students already equipped with conceptual problem-solving abilities, knowledge of materials and production, strategies for emotional product resonance and relevance, and entrepreneurial skills (typically, but not always, acquired in an undergraduate program in product design or its equivalent).

Degree Requirements

The curriculum is divided into three categories:

1. core content (42 credits)
2. core-related content (10 credits)
3. elective content (6 or more credits)

The **core content** comprises a series of applied studio courses and one content-based course, structured to increase knowledge and skills through immersion in the design process in conjunction with sports product professionals.

Code	Title	Credits
SPD 650	Sports Product Materials and Manufacturing	3
SPD 684	Research Methodology and Innovation Process Studio	6
SPD 685	Sports Product Design Studio I	6
SPD 686	Sports Product Design Studio II	6
SPD 687	Sports Product Design Studio III	6
SPD 688	Innovative Project Strategy Development Studio	6
SPD 689	Collaborative Creation and Launch Studio	9

The **core-related content** comprises three courses in related disciplines intended to build the necessary understanding of human performance and business practices related to the sports product industry.

Code	Title	Credits
HPHY 631	Human Performance and Sports Products	3
J 626	Strategic Marketing Communication	4
SBUS 645	Sports Product	3

Students are also required to take at least six credits of **elective content** from the options below.

Code	Title	Credits
ACTG 662	Strategic Cost Management	4
J 621	Foundations of Strategic Communication	4
J 624	Strategic Communication: [Topic]	2
MGMT 614	Strategic Management	3
MGMT 625	New Venture Planning	3
MGMT 641	Industrial Ecology	3

Professional Connections

Industry partners for sports product design provide special opportunities for students, fulfilling a number of critical roles as part of the learning

environment of this program: instructors, advisors, guest reviewers, lecturers, mentors. Some examples of recent partners include Intel, Leatherman, Logitech, Nike, and Under Armour.

Admission

Incoming students must have completed an undergraduate degree and demonstrate a combination of education and relevant experience to begin work immediately designing products manually and digitally. This is typically demonstrated through formal transcripts, but applicants are also required to submit the following:

- A 300-word personal statement describing the applicant's interest in sports product design and how they see design influencing their life and the world around them
- A portfolio of creative work (a maximum of 20 pages and 5 megabytes) showcasing problem-solving in the design process, drawing and prototyping skills, and storytelling, serving as a demonstration of the candidate's design abilities
- Three letters of recommendation from faculty members outside of the UO Department of Product Design

Applications are reviewed beginning on January 15 of each year and undergo rolling review for admission until the cohort is complete. Incoming students begin the fall term immediately after acceptance.

Product Design Courses

PD 101. Introduction to Product Design. 4 Credits.

This course is an introduction to the Product Design profession and its cultural relevance. Lectures, reading and projects convey theory (critical thinking), designers (history), design methods (CAD, drawing, building), and storytelling (documentation / presentation) to give a foundation in product innovation, creation, and portfolio generation.

PD 198. Workshop: [Topic]. 1-12 Credits.

Repeatable.

PD 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PD 223. Beginning Design Drawing. 4 Credits.

Focuses on perspective, line weight, construction with primary shapes, and shading in the creation of three-dimensional objects.

PD 240. Designers' Tools. 4 Credits.

Quick model-making and additive, subtractive, and mold-using fabrication methods are applied in the creation of products in three separate projects.

Prereq: ART 115

PD 301. Introduction to Design Studio. 4 Credits.

Students observe and design solutions for problems on campus in three team-based projects.

Prereq: Pre- or coreq: PD 370.

PD 302. Introduction to Design Studio II. 4 Credits.

Integrate 2D and 3D communication and presentation skills to develop project-based design solutions.

PD 323. Design Drawing. 4 Credits.

Introduces specific techniques in drawing and modeling objects and their spatial context; the demonstration and implementation of various media and types of drawing. Repeatable once for a maximum of 8 credits.

Prereq: ART 115, PD 223.

PD 330. Introduction to Computer Assisted Design & Production. 4 Credits.

Introduction to computer-assisted design (CAD) in which students learn virtual design and physical manufacturing relationships and techniques.

PD 340. Design for Use. 4 Credits.

Provides the basic theoretical underpinnings for considering the socio-cultural background and design of products. Lectures and readings present main issues; discussions complete conceptual principals.

Prereq: PD 350.

PD 350. Objects and Impacts. 4 Credits.

Explores how design influences and is influenced by materials and manufacturing processes. Lectures, readings, and discussions present sustainability, aesthetic, and functional aspects of product design.

Prereq: PD 370.

PD 360. Object Culture. 4 Credits.

Promotes a greater understanding of the material world and how everyday objects define culture.

PD 370. Design Process. 4 Credits.

Introduces design processes, from theoretical to professional, using readings, guest lectures, and experimental new structures.

PD 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PD 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

PD 401. Research: [Topic]. 1-12 Credits.

Repeatable with change of topic.

PD 404. Internship: [Topic]. 1-12 Credits.

Repeatable with change of topic.

PD 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable with change of topic.

Prereq: instructor's permission.

PD 406. Special Problems: [Topic]. 1-8 Credits.

Repeatable with change of topic.

Prereq: instructor's permission.

PD 407. Seminar: [Topic]. 1-4 Credits.

PD 408. Workshop: [Topic]. 1-6 Credits.

Repeatable with change of topic.

PD 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

PD 430. Computer-Assisted Design and Production. 4 Credits.

Meshes virtual design and physical design as students work on projects using shop tools and computer-aided design and manufacturing software and equipment.

Prereq: ART 115, ART 116, PD 223.

PD 440. Advanced Designers' Tools. 4 Credits.

Designing a production line for twenty identical items.

Prereq: PD 340.

PD 483. Senior Studio I. 4 Credits.

Design studio focuses on personal questions that are explored through active design development. Questions may relate to issues of user interface, sustainability, or societal problems. Sequence with PD 484, PD 485. Repeatable twice for a maximum of 12 credits.

Prereq: PD 240, PD 323, PD 340, PD 350, PD 370

PD 484. Senior Studio II. 4 Credits.

Design studio focuses on global questions explored through active development. Questions may relate to issues of user interface, sustainability, or societal problems. Only for seniors with declared major status in architecture, art, interior architecture, or product design. Sequence with PD 483, 485. Repeatable twice for a maximum of 12 credits.

Pre- or coreq: PD 240, PD 323, PD 340, PD 350, PD 370, PD 430, PD 483; senior standing in product design.

PD 485. Senior Studio III. 4 Credits.

Design studio focuses on corporate questions that are explored through active design development. Questions may relate to issues of user interface, sustainability, or societal problems. Sequence with PD 483, 484. Repeatable twice for a maximum of 12 credits.

Pre- or coreq: PD 240, PD 323, PD 340, PD 350, PD 370, PD 430, PD 483, PD 484; senior standing in product design.

PD 486. BFA Studio I. 6 Credits.

Explores problems that stress design development through innovation and the responsibility to solve complex societal, functional, and aesthetic issues. Seminar component fosters theoretical, professional, and creative discussion.

PD 487. BFA Studio II. 6 Credits.

Second course in series of interactive studios in which students engage in independent project-based learning. Sequence with PD 486, PD 488.

Prereq: PD 486, BFA standing.

PD 488. BFA Studio III. 6 Credits.

Third course in series of interactive studio in which students engage in independent project-based learning. Sequence with PD 486, PD 487.

Prereq: PD 487, BFA standing.

Sports Product Design Courses

SPD 601. Research: [Topic]. 1-6 Credits.

Repeatable.

SPD 604. Internship: [Topic]. 1-6 Credits.

Repeatable.

SPD 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

SPD 606. Special Problems: [Topic]. 1-6 Credits.

Repeatable.

SPD 608. Workshop: [Topic]. 1-9 Credits.

Repeatable.

SPD 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SPD 650. Sports Product Materials and Manufacturing. 3 Credits.

Explores the materials science, manufacturing, and sustainability theories applied in sports product design.

Prereq: SPD 684.

SPD 684. Research Methodology and Innovation Process Studio. 6 Credits.

Focuses on the design theories and methodologies used to design innovative sports products.

SPD 685. Sports Product Design Studio I. 6 Credits.

Explores the theories and creative problem-solving methods used to design solutions for sports soft goods. Theories of human thermoregulation, hydroprotection, support, aerodynamics, wearable technology, and kinematics.

Prereq: SPD 684.

SPD 686. Sports Product Design Studio II. 6 Credits.

Explores the theories and creative problem-solving methods used to design solutions for sports footwear. Mechanical theories of cushioning, stability, support, traction, and slipping-sliding.

Prereq: SPD 650, SPD 685.

SPD 687. Sports Product Design Studio III. 6 Credits.

Explores the theories and creative problem-solving methods used to design solutions for sports hard goods. Performance theories are considered to generate creative solutions.

Prereq: SPD 650, SPD 686.

SPD 688. Innovative Project Strategy Development Studio. 6 Credits.

First of a two-term capstone studio that critically examines the alignment of design, materials, science, sustainability, research, and business theories to create an innovative sports product design opportunity.

Prereq: SPD 650, SPD 687.

SPD 689. Collaborative Creation and Launch Studio. 9 Credits.

Second of a two-term capstone studio that critically examines the alignment of design, materials, science, research, and business theories to create an innovative sports product design opportunity.

Prereq: SPD 688.

College of Education

R. W. Kamphaus, Dean

541-346-1601
130 HEDCO Education Building
1215 University of Oregon
Eugene, Oregon 97403-1215

Preparing Educators in the 21st Century

The College of Education's academic majors are organized into four departments: counseling psychology and human services; educational methodology, policy, and leadership; education studies; and special education and clinical sciences.

The college offers undergraduate, master's, and doctoral degrees and preparation for licensure, programs that link instruction to current research findings and pedagogical practices and to the needs of the educational community, ensuring students are prepared for collaborative practice in the field of education. Students become active learners as they accumulate an understanding of disciplinary content and develop professional knowledge and skills that prepare them for careers in education or the social services. Surveys of graduates from the College of Education indicate that the overwhelming majority are successful in securing employment or continuing their professional preparation in their chosen field.

With school, community, and clinical partners, the college's nationally prominent teaching and research faculty offers opportunities for student practicum and field-based experiences in professional settings where effective policy and practice is created and then implemented.

Academic, research, and outreach service units provide integrated and cross-disciplinary learning experiences that help students acclimate to their professions, develop initial competence, acquire advanced proficiency, and become practicing professionals and scholars.

The College of Education is ranked by *US News and World Report* as one of the nation's top colleges of education (14th nationally in the 2018 rankings). Its scholarship, teaching, and practical learning opportunities offer students a respectful and affirming climate, a culture of belonging, and an inclusive learning environment.

Admission

The College of Education follows university policy in its admission procedures as described in the **Admissions** and **Graduate School** sections of this catalog. Students who transfer from other institutions must meet university entrance requirements. Programs in the College of Education have additional requirements for admission and limits on the number of students admitted to the major or licensure programs. Prospective students are urged to check admission requirements for their desired programs. Some require field placements in community settings and require background checks as part of the admissions process.

Financial Assistance

Scholarships

Scholarships are available for undergraduate and graduate students. Application requirements and procedures may be requested from Andrea Olson, Office of the Dean; telephone 541-346-5943; e-mail coescholarships@uoregon.edu.

Stipends and Fellowships

Stipends and fellowships frequently are awarded to graduate students. Both forms of assistance may cover most of the cost of tuition and provide a monthly cash payment. Information on graduate employee positions is available on the college website.

Information about financial assistance is listed in the application materials for each major and on the College of Education's website. Application deadlines should be followed to receive consideration for aid. Information about university scholarships and loan programs is available from the Office of Student Financial Aid and Scholarships, 260 Oregon Hall.

Dismissal

Some majors and specializations in the College of Education require field placements in community settings such as public schools, community preschools, mental health clinics, correctional institutions, and welfare programs. Many placements are with vulnerable groups such as young children, juvenile offenders, or individuals with disabilities or mental health, adjustment, or learning problems. During these placements students interact with professionals and often are recipients of confidential or sensitive information. Consequently, it is imperative that College of Education students adhere to high ethical and moral standards. The University of Oregon and each major in the College of Education has written ethical standards or a code of conduct for its students. In an instance where evidence exists that a student may have violated the university's conduct code or a program's written ethical standards or code of conduct, the student will immediately be removed from the field placement until the matter is resolved. A student found to be in violation may be terminated from the College of Education and not permitted to reenter.

Academic Programs

Associate Dean

130 HEDCO Education Building

The College of Education offers accredited bachelor's, master's, and doctoral degrees and professional-development programs. Often, in concert with an academic degree, majors offer programs leading to state licensure for employment in Oregon public schools. These licenses are conferred by the state Teacher Standards and Practices Commission (TSPC), the agency authorized by the Oregon Legislative Assembly to issue licenses for teaching, personnel service, or administration in public schools. The TSPC issues appropriate licenses to applicants upon the university's recommendation that they have successfully completed the relevant licensure program. The State of Oregon has reciprocal administrative, teaching, and personnel service license agreements with most other states and Puerto Rico. Students who receive a license from the State of Oregon will most likely find the application process for a license in another state easier, especially if the licensing standards are similar. Information about licensure is available from the college's student academic services.

The following list enumerates the degree, licensure, and endorsement programs offered by the College of Education. Information about a specific program may be found under the relevant area of concentration in this section of the catalog.

Undergraduate Programs

- Bachelor's degree: communication disorders and sciences, educational foundations, family and human services

- Minor: special education
- Certificates: educational foundations—secondary, special education

Graduate Programs

- Master's degree: communication disorders and sciences; counseling, family, and human services; couples and family therapy; prevention science; curriculum and teacher education; curriculum and teaching; educational leadership; school psychology; special education
- Doctoral degree: communication disorders and sciences, counseling psychology, prevention science, critical and sociocultural studies in education, educational leadership, school psychology, special education, special education: rehabilitation
- Specializations: quantitative research methods, Spanish language psychological service and research

Licensure Preparation

State of Oregon licensure: preliminary teaching license, preliminary administrator license, professional administrator license, preliminary school psychology license

Endorsements

Advanced mathematics, biology, chemistry—elementary multiple subjects, English for speakers of other languages, English language arts, integrated science, foundational English language arts, foundational mathematics, foundational science, foundational social studies, integrated science, music, physics, reading intervention, social studies, special education—early Intervention, special education—generalist (K–12), world language: Chinese, world language: French, world language: German, world language: Japanese, world language: Latin (*currently not accepting students*), world language: Russian (*currently not accepting students*), world language: Spanish

Research and Outreach Services

Leslie Leve, Associate Dean

541-346-9601

130 HEDCO Education Building

<https://education.uoregon.edu/research>

The nationally recognized research and outreach units of the College of Education provide a comprehensive, research-intensive environment for undergraduate, licensure, master's, and doctoral students. The research units foster fundamental and applied research that faculty members integrate into the college's curriculum. The outreach units offer schools and community agencies access to faculty research and expertise and provide field-based opportunities in which students learn to use research-based knowledge to improve the effectiveness of services, practices, and policies.

Behavioral Research and Teaching

Gerald Tindal and Julie Alonzo, Codirectors

541-346-3535

175 Lorry I. Lokey Education Building

www.brtprojects.org (<http://www.brtprojects.org>)

Behavioral Research and Teaching combines curriculum-based measurement with effective teaching practices to develop, study, and disseminate empirically based educational programs for students who are at risk of failure in school and in the community. Research and professional development activities and projects focus on (1) curriculum-based measurement and large-scale testing; (2) response-to-intervention

methods in educating students with disabilities; (3) behavioral and instructional consultation; and (4) systems change and school reform. Opportunities for research and personnel preparation are available for graduate students.

Center for Educational Policy Research

David T. Conley, Director

<https://education.uoregon.edu/rou/center-educational-policy-research>

Staff members at the Center for Educational Policy Research help Oregon educators, district administrators, and policymakers promote a seamless transition for students as they move from Oregon high schools to Oregon institutions of higher education. The center develops policy tools and promotes strategies that help organizations understand complex issues, analyze trends, and nurture new policy ideas. The center also designs online tools with staff members at its sister center, the Educational Policy Improvement Center, to help Oregon institutions promote college and career readiness for Oregon students.

Center for Equity Promotion

Charles Martinez, Director

541-346-8904

1600 Millrace Drive, Suite 355

ceqp.uoregon.edu

The Center for Equity Promotion is dedicated to working with communities to better understand and support the positive development of children and families, particularly those who are underserved by education, health, and social service systems. The center focuses on populations with the greatest burden of health and education disparities related to adverse social and economic conditions. The center's research informs culturally specific prevention science, intervention, and policy efforts that build on community strengths.

Center for the Prevention of Abuse and Neglect

Jeff Todahl and Phyllis Barkhurst, Codirectors

541-346-0919

1244 Walnut Street

<https://education.uoregon.edu/rou/center-prevention-abuse-and-neglect>

The Center for the Prevention of Abuse and Neglect is a research and outreach unit designed to coordinate, facilitate, and measure a collective impact violence prevention initiative, with an emphasis on significant reduction in child abuse and neglect in Lane County, Oregon. The center applies public health concerns, prevention theory, and implementation science toward the development of strategies to attain community-level change.

The goals of the center include the following:

1. Develop, implement, and evaluate a place-based, community-generated theory of change for child abuse and neglect
2. Develop and implement a countywide, population-level measurement protocol for child-abuse prevention and a statewide measurement system for the prevalence of child abuse
3. Provide technical assistance expertise and training on child-abuse prevention for other communities in the United States

4. Provide research and evaluation services to private foundations and units of government to test the efficacy of statewide prevention strategies

Center on Human Development University Center for Excellence in Developmental Disabilities

Christopher Murray, Director

541-346-3591

901 E. 18th Ave.

[www.uocedd.org \(https://education.uoregon.edu/rou/center-prevention-abuse-and-neglect\)](https://education.uoregon.edu/rou/center-prevention-abuse-and-neglect)

The center assists in improving the quality of life for persons with developmental disabilities and their families. The Center on Human Development is home to the University Center for Excellence in Developmental Disabilities, part of a national network of 67 university-based centers that share a vision for a nation in which all Americans, including those with disabilities, participate fully in their communities. The center's scientists and staff members engage in research, teaching, and outreach designed to improve the lives of individuals with disabilities, their families, and their communities.

Center on Teaching and Learning

Hank Fien, Director

541-346-3562

ctl.uoregon.edu

The center is a community of scholars who conduct and disseminate research that focuses on the solutions to serious but practical problems in school systems. It seeks to advance the understanding and use of the most rigorous scientific evidence and research-based practices to prevent the academic difficulties that many school-aged children experience. The primary focus of research is the role of curriculum, instruction, and assessment as individual elements that affect student advancement in school systems.

Early Childhood Coordination Agency for Referrals, Evaluations, and Services

Judy Newman and Valerie Taylor Close, Codirectors

541-346-2578

299 E. 18th Ave.

earlychildhoodcares.uoregon.edu

Early Childhood Coordination Agency for Referrals, Evaluations, and Services (Early Childhood CARES) provides early intervention and early childhood special education services to eligible, birth-to-five-year-old children in Lane County. These services may include a combination of specially designed instruction in community or specialized preschools, parent education, speech therapy, physical and occupational therapy, vision and hearing services, and consultation for autism or challenging behaviors. Practicum opportunities are available for undergraduate and graduate students who are interested in working with young children, in preschools and parent-toddler programs.

Early Intervention Program

Jane Squires, Director

541-346-0807

139 Clinical Services Building

eip.uoregon.edu

Faculty members, training research efforts, and products of the Early Intervention Program have had a major impact on the fields of early intervention, early childhood special education, and early childhood education. The program's goal is to expand and improve educational and therapeutic services for infants and young children who are at risk and disabled and for their families. Underlying this purpose is the assumption that improving and expanding services that help children become independent and productive benefits not only the individual but society as a whole.

Educational and Community Supports

Kent McIntosh, Director

541-346-2340

141 Lokey Education Building

<https://ecs.uoregon.edu>

Educational and Community Supports was established in 1972 as a research unit within the College of Education. Its purpose is to develop, validate, and implement practices that result in positive, durable, measurable change in the lives of individuals with disabilities and their families. Federal- and state-funded projects within the unit support research, teaching, information systems, and state-level technical assistance. Positive behavior support, secondary education and transition, adult services, and systems change are areas of content focus.

Institute on Violence and Destructive Behavior

Jeffrey R. Sprague, Director

541-346-3592

Clinical Services Building, Third Floor

ivdb.uoregon.edu

The mission of the Institute on Violence and Destructive Behavior is to help schools and social service agencies address violence and destructive behavior in schools and beyond their boundaries. The goal is to ensure safety and facilitate the academic achievement and healthy social development of children and youth. Faculty members conduct original research, provide staff training, disseminate knowledge and best practices, and integrate research findings into College of Education academic courses. They also consult with agencies concerned with public safety and youth violence prevention.

The institute has developed evidence-based assessment tools and interventions to address factors associated with violence, dropout frequency, and delinquency, tools used by professionals in schools, mental health facilities, and correctional settings. The institute was approved as a center of excellence by the Oregon State Board of Higher Education in 1995 and receives support for its activities through competitively awarded federal grants.

IntoCareers

Curtis Fuhrman, Director

541-346-2374

99 W 10th Ave., Suite 399

[intocareers.org \(http://intocareers.org\)](http://intocareers.org)

IntoCareers develops and supports the Career Information System, which provides content, multimedia, curriculum, and Internet applications that assist people in making informed career choices. IntoCareers licenses its products to state entities such as education agencies, offices of postsecondary education, and departments of labor. These entities

create localized versions of the Career Information System to support career development programs in their respective states.

Oregon Career Information System

Laura McCoid, Director

541-346-3872 or 800-495-1266

Baker Downtown Center

328 East Broadway

oregoncis.uoregon.edu

The Oregon Career Information System, a state-based resource, helps Oregonians make career decisions and successful transitions throughout their lives. Established in 1971, it was the first state-based career information delivery system in the nation. Administered by the College of Education, the Oregon Career Information System is a self-supporting, fee-based consortium. It uses the Internet to present comprehensive information about occupations and industries, postsecondary programs and schools, and financial aid, connecting career options to the paths for reaching them. Its software and materials are used in schools, colleges, work-force agencies, and private businesses to support the career development of their students, clients, and employees. The staff provides field leadership and training to professionals involved in career development programs and services. Work-study positions and internships are available for undergraduate and graduate students.

Secondary Special Education and Transition Program

Deanne Unruh, Director

541-346-3585

201 Clinical Services Building

<https://education.uoregon.edu/rou/secondary-special-education-and-transition-program>

Secondary Special Education and Transition is a multidisciplinary research unit dedicated to developing further scientific understanding of adolescents and young adults with disabilities and other high-risk behaviors. Faculty members conduct research, technical assistance, and outreach activities to develop and implement research-based transition services that assist young people in developing the knowledge and skills to succeed in fulfilling their desired adult roles, including meaningful employment, completion of postsecondary education or training programs, and living independently in the community. Research is conducted in collaboration with state departments of education, schools, service agencies, parents, and youth.

Facilities, Organizations, and Services

HEDCO Clinic

Lalla Pudewell, Clinic Manager

541-346-0923

170 HEDCO Education Building

1655 Alder Street

<https://education.uoregon.edu/admin-unit/hedco-clinic>

The HEDCO Clinic is a multidisciplinary training clinic within the College of Education, staffed by a team of faculty scientists, therapists, and psychologists who provide comprehensive, research-based services in the areas of autism, speech-language-hearing, cognitive and language abilities after brain injury, mental health counseling, and academics and teaching. It offers clients state-of-the-art services that faculty researchers and clinicians have developed, providing students with opportunities

to apply evidence-based interventions with intensive instruction and supervision in an integrated health-care setting.

Learning Commons

Ken Loge, Coordinator

541-346-7616

110 HEDCO Education Building

<https://education.uoregon.edu/admin-unit/learning-commons>

The Learning Commons is designed for student collaboration and study, providing centralized technology support and services for members of the faculty and staff. Facilities include color and black-and-white printing, document scanning, wall-mounted displays for connecting personal laptops, and study spaces that may be reserved for private or small-group use. Two study rooms can be reserved for groups of as many as ten, with four smaller study rooms that can serve two or three or be used simply for individual study. The main space has a variety of seating for groups or individuals, with a total seating capacity of seventy. Laptops can be connected to five large, wall-mounted flat panel displays for group project work. Thirty desktop computers with Macintosh and Windows operating systems include a variety of software, and the area includes high-speed wireless connectivity. Laptops and adapters can be checked out at the front desk for use in the Learning Commons or in College of Education classes. Both black-and-white and color printing is available using Duck Bucks, and documents can be scanned at no cost using the scanning workstation. Student staff members provide technology help for students when needed.

Student Academic Services

Associate Dean

130 HEDCO Education Building

Student Academic Services offers academic advising and tutoring referrals; information on degree and licensure requirements, academic programs, and university policies and procedures; and information on resources available to students. In addition, Student Academic Services maintains student records and collaborates with educator licensing and accreditation entities at state and federal levels to ensure the College of Education is in compliance with policies and procedures that permit students to receive the appropriate degree and license.

Courses

EDUC 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Exploring Careers in Education.

EDUC 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

EDUC 406. Special Problems: [Topic]. 1-16 Credits.

Repeatable. Recent topics include Peer Advising Experience.

EDUC 407. Seminar: [Topic]. 1-5 Credits.

EDUC 602. Supervised College Teaching. 1-5 Credits.
(R)

EDUC 605. Reading and Conference: [Topic]. 1-16 Credits.
Repeatable.

EDUC 606. Special Problems: [Topic]. 1-16 Credits.
Repeatable.

EDUC 607. Seminar: [Topic]. 1-5 Credits.
Repeatable. Recent topics include Advanced Professional Practices.

EDUC 609. Practicum: [Topic]. 1-16 Credits.
Repeatable.

EDUC 610. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

EDUC 611. Survey of Educational Research Methods. 3 Credits.
Survey of qualitative, quantitative, and single-subject research methods. Students develop competence in using published research to inform decision-making in various settings.

EDUC 612. Social Science Research Design. 3 Credits.
Overview of qualitative, quantitative, and single-subject research methods. Emphasis on introducing students to considerations, issues, and techniques of social science research design.

EDUC 614. Educational Statistics. 3 Credits.
Foundations of statistical methods for research producers. Covers sampling methods, descriptive statistics, standard scores, distributions, estimation, statistical significance testing, T tests, correlation, Pearson's chi-square test, power, effect size.
Prereq: EDUC 612.

EDUC 616. Philosophical Foundations of Social Science. 4 Credits.
This course examines the philosophical assumptions that underlie various research methodologies in the human and social sciences. It additionally introduces beginning doctoral students to the work of a variety of professors in the College of Education.

EDUC 620. Program Evaluation I. 3 Credits.
Focuses on small-scale evaluations, particularly in the field of education and human services. Students plan and design an evaluation.
Prereq: EDUC 640.

EDUC 621. Program Evaluation II. 3 Credits.
Implementation and completion of the evaluation design defined in Program Evaluation I.
Prereq: EDUC 620.

EDUC 630. Qualitative Methodology I: Interpretivist Inquiry. 4 Credits.
Examines the history of qualitative research in the study of human experience, emphasizing interpretive approaches to qualitative research that retain the regulative ideal of objectivity.

EDUC 632. Qualitative Methodology II: Postcritical Inquiry. 4 Credits.
Explores the epistemic limits of representing human experience, and the political and ethical implications for researchers beginning with Marx.
Pre- or coreq: EDUC 630.

EDUC 634. Qualitative Methodology III: Posthumanist Inquiry. 4 Credits.
Examines theoretical influences on qualitative research beginning with those associated with the linguistic turn, then critiquing the linguistic turn, and ending with the ontological turn.
Pre- or coreq: EDUC 630, EDUC 632.

EDUC 636. Advanced Qualitative Methodology: New Materialisms. 4 Credits.

Examines contemporary theoretical explorations prompted by "the new materialisms" and how questions of ontology and materiality produce considerations of agency, data, subjectivity, voice, and analysis.
Pre- or coreq: EDUC 630, EDUC 632, EDUC 634

EDUC 640. Applied Statistical Design and Analysis. 3 Credits.
Factor analysis of variance, planned comparisons, post hoc tests, trend analysis, effect size and strength of association measures, repeated measures designs.
Prereq: EDUC 614.

EDUC 642. Multiple Regression in Educational Research. 3 Credits.
Application and use of multiple regression in educational research. Topics include bivariate regression, multiple regression with continuous and categorical independent variables.
Prereq: EDUC 640.

EDUC 644. Applied Multivariate Statistics. 3 Credits.
Advanced statistical techniques including covariance analyses, discriminant function analysis, multivariate analysis of variance, principal components analysis, exploratory factor analysis.
Prereq: EDUC 640.

EDUC 646. Advanced Research Design. 3 Credits.
Provides a deeper understanding of educational research with an emphasis on principles of research designs and their use in applied research. Offered alternate years.
Prereq: EDUC 640.

EDUC 650. Single-Subject Research Methods I. 3 Credits.
Basic single-subject design strategies and general procedures as well as issues related to conducting and analyzing single-subject research in applied settings. Sequence with EDUC 652.
Prereq: EDUC 614.

EDUC 652. Single-Subject Research Methods II. 3 Credits.
Critical evaluation of single-subject and group-analysis research designs; elaboration on critical topics in single-subject methodology. Sequence with EDUC 652.
Prereq: EDUC 650.

EDUC 654. Advanced Applied Behavior Analysis. 3 Credits.
Doctoral-level seminar designed to provide skills, practice, and knowledge in advanced methods and theory of applied behavior analysis.
Prereq: EDUC 652.

EDUC 656. Advanced Analysis of Single-Case Research. 3 Credits.
Focuses on application of statistical and meta-analytic strategies for analyzing single-case research. Sequence with EDUC 650, 652, 654. Offered alternate years.
Prereq: EDUC 650. One course in structural equation modeling or hierarchical linear modeling is recommended preparation.

Counseling Psychology and Human Services

Elizabeth Stormshak, Department Head

541-346-0909

541-346-6778 fax

240 HEDCO Education Building

Programs in the Department of Counseling Psychology and Human Services educate and train professionals in counseling psychology, couples and family therapy, prevention science, and family and human

services. Students are trained to effectively identify, prevent, and treat psychological and public health problems in children, adolescents, adults, and families. At the doctoral level, students extend scientific knowledge through research in collaboration with faculty mentors. Field placements, practicum placements, and internships at all levels of training provide students with opportunities to practice in schools, community agencies, and clinical and research settings under the supervision of faculty members, agency personnel, and collaborating scholars.

Faculty

Tiffany Brown, senior lecturer (self-harm, family dynamics of addiction, collegiate recovery communities). BS, 2002, MEd, 2005, Oregon; PhD, 2009, Texas Tech. (2011)

Elizabeth Budd, assistant professor (early chronic disease prevention, physical activity and healthy eating promotion, adolescent and community health). BS, 2005, Santa Clara; MPH, 2009, Saint Louis; PhD, 2016, Washington (St. Louis). (2016)

Krista Chronister, professor (domestic violence, career counseling, community intervention). BS, 1996, Florida; MS, 2000, PhD, 2003, Oregon. (2003)

Jessica Cronce, associate professor (health and risk behaviors among young adults, individual-focused prevention). BS, 1999, Washington (Seattle); MS, 2005, MPhil, 2006, PhD, 2009, Yale. (2015)

Nichole Kelly, assistant professor (obesity prevention and adolescent health, eating disorders, health promotion). BS, 2004, Virginia; PhD, 2013, Virginia Commonwealth. (2016)

Shoshana D. Kerewsky, senior lecturer (ethics; international services; lesbian, gay, bisexual, and transgender issues). BA, 1983, Swarthmore; MA, 1990, Lesley; PsyD, 1998, Antioch, New England. (1996)

Atika Khurana, associate professor (adolescent development and risk-taking, self-regulation and executive functions, family and ecological influences). BS, 2003, MS, 2005, Punjab; PhD, 2009, Ohio State. (2012)

Jean Kjellstrand, assistant professor (corrections-involved families, positive youth development, reentry and preventive interventions). BA, 1989, Carleton College; MSW, 1991, Wisconsin, Madison; PhD, 2009, Portland State. (2014)

Leslie Leve, professor (foster care, adoption, prevention science). BA, 1990, California, Santa Cruz; MS, 1991, PhD, 1995, Oregon. (2013)

Deanna Linville, associate professor (eating disorders and obesity intervention, couples issues). BA, 1997, MS, 2000, PhD, 2003, Virginia Polytechnic Institute and State University. (2003)

Benedict T. McWhirter, professor (adolescents at risk, college student development, connectedness). BA, 1986, Notre Dame; MC, 1988, PhD, 1992, Arizona State. (1997)

Ellen Hawley McWhirter, Ann Swindells Professor in Counseling Psychology (adolescent career development, empowerment, Latino youth academic success). BA, 1983, Notre Dame; MC, 1988, PhD, 1992, Arizona State. (1997)

Elizabeth Skowron, professor (early adversity and neurobehavioral systems of self-regulation in children and parents, differentiation of self, family interventions). BA, 1988, Ohio State; MS, 1991, PhD, 1995, State University of New York, Albany. (2012)

Tasia Smith, assistant professor (health disparities, prevention of obesity and depression, adolescence). BA, 2008, North Carolina, Chapel Hill; MS, 2010, North Carolina, Greensboro; PhD, 2016, Florida. (2016)

Elizabeth A. Stormshak, Philip H. Knight Chair; professor (prevention of delinquency, conduct problems, peer rejection). BA, 1988, Washington (Seattle); MS, 1992, PhD, 1995, Pennsylvania State. (1996)

Surendra Subramani, senior instructor (multicultural education and cross-cultural training, leadership and management, sociology of comparative education); diversity coordinator. BS, 1986, Oregon; MBA, 1993, Oregon State; PhD, 2000, Oregon. (2004)

Emily Tanner-Smith, associate professor (applied research methodology, meta-analysis, substance use and addiction). BS, 2003, Belmont; MA, 2007, PhD, 2009, Vanderbilt. (2017)

Jeff Todahl, associate professor (child abuse and neglect prevention, intimate partner violence, community engagement). BA, 1985, Western Washington; MS, 1989, Seattle Pacific; PhD, 1995, Florida State. (1999)

Karrie P. Walters, senior instructor (human services, child and family interventions, prevention and social justice). BA, 1996, North Texas; MA, 2001, Minnesota, Twin Cities; PhD, 2010, Oregon. (2010)

Courtesy

Joseph Arpaia, courtesy assistant professor (clinical hypnosis, autonomic nervous system, mediation and psychotherapy). BS, 1982, California Institute of Technology; MD, 1990, California, Irvine. (2005)

Philip A. Fisher, professor. See **Psychology**.

Richard D. Freund, courtesy assistant professor (research methods, community college counseling, cognitive therapy). BA, 1966, Brown; PhD, 1971, Stanford. (1975)

Lauren Lindstrom, professor (career development, youth with disabilities, gender equity). BS, 1985, MS, 1991, PhD, 2000, Oregon. (2000)

Emeriti

Henry F. Dizney, professor emeritus. BS, 1954, Southeast Missouri State; MEd, 1955, Wayne State; PhD, 1959, Iowa. (1967)

Gordon A. Dudley, associate professor emeritus. BA, 1956, Kalamazoo; MA, 1959, Colorado; EdD, 1971, Harvard. (1967)

Sally Fullerton, professor emerita. BS, 1956, Oregon State; MA, 1960, Cornell; PhD, 1970, Oregon. (1970)

Weston H. Morrill, professor emeritus. BS, 1960, MS, 1961, Brigham Young; PhD, 1966, Missouri, Columbia. (1990)

Janet Moursund, associate professor emerita. BA, 1958, Knox; MS, 1961, PhD, 1963, Wisconsin, Madison. (1967)

Anita Runyan, associate professor emerita. BS, 1956, Pacific Union; MS, 1968, PhD, 1972, Oregon. (1972)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Science**
- **Bachelor of Education**

Undergraduate Studies

Family and Human Services

Jessica Cronce, Major Director
340 HEDCO Education Building
541-346-2519

The family and human services major leads to a bachelor of arts (BA), bachelor of science (BS), or bachelor of education (BEd) degree. It is designed for students who want to help children, youth, adults, and families learn effective ways to meet the challenges in their lives. Participants gain a broad understanding of learning and development, prevention and intervention, professional communication, and agency policies and practices through a combination of course work and field experiences in human service agencies, preparing students to assume a variety of professional roles serving individuals and families in community, school, and other settings.

Careers

Graduates find work as entry-level professionals in a variety of community services and governmental agencies, and many pursue graduate work in disciplines such as counseling psychology, couple and family therapy, prevention science, education, special education, early intervention, agency management and leadership, social work, human development, and family studies.

Application Deadline

Students must formally apply to enter the family and human services major and are admitted on a competitive basis. Specific information about the admission deadline may be found on the College of Education website (<https://education.uoregon.edu/family-and-human-services/admissions-0>).

Admission Requirements

At the time of application, students should have

1. Completed 50–55 credits, with a cumulative GPA of 2.50
2. Demonstrated satisfactory progress toward completion of the university writing requirement and at least 8 credits in each of the general-education groups: arts and letters, social science, and science
3. Demonstrated competence in family and human services premajor core courses
4. Demonstrated experience (paid, volunteer, or credit) with children, youth, adults, and/or families

Those conditionally accepted into the major will be required to meet stated requirements to be fully admitted into the program. Most students begin the program the fall of their junior year of college.

Premajor Core

Completion of all premajor core courses is a prerequisite for admission to the major. These core courses present various theories of community service, education, and societal issues relevant to developing professionals in the human services. Through core courses, students develop strategies for working with people based on research and practice, and learn how to use evaluation information to meet the needs of clients.

Professional Studies

Professional studies courses provide the foundational knowledge and skills necessary to practice as an entry-level human services professional. Topics include ethics, professional writing, research methods, public health, agency administration, and individual, group, and community prevention and intervention strategies and related helping skills, including case management.

Field Experiences

Students participate in supervised activities in public and private human services agencies and organizations. Typically, students gain field experience at three different agencies in junior year and have two or three terms of field experience at the same agency in senior year. A capstone project is completed in connection with field experience in the senior year.

Bachelor of Arts Degree Requirements

or FHS 494	Senior Professional Practices and Issues	
FHS 495	Senior Professional Practices and Issues	3
Equity and Diversity and Professional Depth ¹		8-9
Field Experiences		
FHS 406	Special Problems: [Topic] (Beginning Field Studies I,II,III)	6
FHS 406	Special Problems: [Topic] (Advanced Field Studies I,II)	6
FHS 407	Seminar: [Topic] (Junior-Senior Supervision Issues) ²	5-6
FHS 496	Senior Project Proposal	1
FHS 497	Senior Project	2
Total Credits		67-69

¹ Students must successfully complete a minimum of 4 credits in one or more courses that explicitly addresses the subject of **equity and diversity**, the purpose of which is to increase awareness of aspects of human diversity, equity, and social justice that are relevant to work in the human services. In addition, students must complete a minimum of 4 credits in one or more courses from one of the following three categories:

1. **Research.** Courses in this category must provide training in research methodology, statistics, grant writing, or application of these skills to advance work in the human services.
2. **Prevention and intervention.** Courses in this category must address approaches to prevention and intervention relevant to careers in the human services or behaviors that are the focus of prevention and intervention in this context.
3. **Organization and public policy.** Courses in this category must address organizational structures or public policy processes relevant to work in the human services.

A list of courses offered by the university that meet the definitions above will be prepared each year and made available to students.

² Students are required to enroll in Seminar: [Topic] (FHS 407) for each term enrolled in Special Problems: [Topic] (FHS 406). A minimum of 5 credits are required to graduate.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

In addition to required course work, those working toward all degrees listed below must participate in work or volunteer experiences related to human services and maintain a cumulative grade point average (GPA) of 2.50 or better.

- Master of Education
- Doctor of Philosophy in Counseling Psychology
- Doctor of Philosophy in Prevention Science

Graduate Studies

The department offers master's degrees with majors in counseling, family, and human services, couples and family therapy, and prevention science. The department also offers doctoral degrees with majors in counseling psychology and prevention science. The department's faculty also provides courses for other College of Education and university programs.

Master's Degrees in Counseling, Family, and Human Services

The counseling, family, and human services major leads to a master of arts (MA), master of science (MS), or master of education (MEd) degree, awarded to doctoral students on their path to completing the doctoral degree. The program does not accept independent masters' students.

Master of Arts Degree Requirements

Code	Title	Credits
	Psychological foundations	15
	Research competencies	20
	Practitioner competencies	54
	Professional competencies	7
	Elective courses and seminars	18
	Total Credits	114

Additional Requirement

The candidate must demonstrate proficiency in a second language.

Master of Science Degree Requirements

Code	Title	Credits
	Psychological foundations	15
	Research competencies	20
	Practitioner competencies	54
	Professional competencies	7
	Elective courses and seminars	18
	Total Credits	114

The MA and MS degrees are earned by enrolled doctoral candidates who meet the requirements as they complete a PhD degree. Some graduate courses taken at another accredited institution may be applied to the requirements.

Master's Degrees in Prevention Science

Atika Khurana, Program Director

369 HEDCO Education Building

541-346-5540

The prevention science major leads to a master of science (MS) or master of education (MEd) degree.

Program Goals and Competencies

Goals

- **Goal 1.** Graduates describe theoretical models, risk and protective factors, preventive interventions (especially evidence-based ones), and implementation practices related to prevention programs and policies for diverse populations
- **Goal 2.** Graduates understand and adhere to the standards of knowledge for prevention science, including best practices in research design and methods, data analysis, interpretation, dissemination and rigorous ethical practice
- **Goal 3.** Graduates commit to multicultural competence and enhancing human welfare in their scholarly work related to prevention science
- **Goal 4.** Graduates display professionalism in their relationships with faculty and staff members, peers, and community partners in diverse settings

Competencies

Learning objectives for the prevention science graduate programs focus on preparing students to achieve the following set of minimum competencies that accompany the stated program goals:

- **Competency 1.** Students describe the origins, foundations, and standards of prevention science (Goal 2)
- **Competency 2.** Students design and carry out theoretically grounded research studies that contribute to the literature on risk and protective factors, and identify their mechanisms of influence associated with behavioral health outcomes across the lifespan (Goal 1, 2, 3)
- **Competency 3.** Students demonstrate knowledge of evidence-based preventive interventions and policies and understand how to apply prevention science theories to the design, implementation, and evaluation of preventive interventions (Goal 1, 2, 3, 4)
- **Competency 4.** Students integrate knowledge of research design, quantitative methods, data analysis, and multimethod, multiagent assessment methods commonly used in prevention science into their research activities (Goal 2)
- **Competency 5.** Students demonstrate skill in disseminating their work to diverse audiences via formal academic presentations, instructional activities, and professional or academic writing (Goal 1, 2, 3, 4)
- **Competency 6.** Students demonstrate awareness and understanding of diversity and contextual issues such as culture, identity, ethnicity, gender, sexual orientation, disability, marginalization, poverty, inequality, and religion in their research, applied activities, and professional behavior (Goal 1, 3, 4)

- **Competency 7.** Students indicate a commitment to continuous learning and professional development by establishing and maintaining effective professional relationships with faculty members, research and teaching supervisors, collaborators, participants, agency personnel, peers, and staff, and being responsive to constructive feedback (Goal 4)
- **Competency 8.** Students demonstrate honesty, personal responsibility, and knowledge and appropriate application of relevant ethical and legal codes related to prevention science (e.g., American Psychological Association ethical standards) (Goal 4)

Application and Admission

Students are admitted to start fall term only. Prospective applicants may find detailed admission policies and procedures on the UO prevention science website (<https://education.uoregon.edu/program/prevention-science>). The closing date for receipt of completed applications is posted on the website for entry the following fall term.

Applicants are evaluated on the following:

1. Academic record
2. Graduate Record Examinations (GRE) general test scores (for MS students only)
3. Related research and work experiences
4. Statement of purpose in seeking admission
5. Letters of recommendation
6. Interview—in-person, telephone, or video—with a member of the program faculty

Only completed applications are reviewed. Applicants must gather the requested supporting materials and submit them as indicated on the application portal. MEd students complete a capstone project and MS students complete a research paper as part of their graduate training.

Master of Science

The two-year MS degree in prevention science is intended for students who have completed a bachelor's degree in a prevention science–related discipline or have human development, psychology, education, or prevention science experience, and an interest in advanced training in statistics-methodology and research beyond what is offered in the one-year MEd program. Students applying to the MS are likely to have clearly defined academic goals and seek more in-depth scientific and methodological training in prevention science and program evaluation. This masters' degree option provides greater opportunities for students to develop long-term collaborations in research centers and with faculty members in the College of Education, but does not require the commitment involved in completing the PhD.

Requirements

Code	Title	Credits
	Seven courses in psychological foundations	22
	Five courses in research methods and statistics	20
	Research courses	14
	Elective courses	9
	Total Credits	65

Master of Education

The one-year MEd degree in prevention science is primarily intended for

- students who have completed a bachelor's degree in a prevention science–related discipline or have human development, psychology, education, or prevention science experience, are currently working in the profession, and wish to enhance their education to improve their career opportunities in the field
- students who wish to refocus their education from a nonscience or noneducation bachelor's background, such as a humanities undergraduate degree, to gain training and skill development relevant to prevention science, program evaluation, and research in the human services professions for future career or academic study interests
- students who are considering pursuing doctoral study or additional applied master's training and wish to improve their content knowledge and research skills to make themselves more competitive for other, more advanced graduate programs

Requirements

Code	Title	Credits
	Four courses in psychological foundations	12
	Three courses in research methods and statistics	12
	Elective courses	15
	Additional courses	6
	Total Credits	45

Couples and Family Therapy

Deanna Linville-Knobelspiesse, Program Director

240 HEDCO Education Building

541-346-0921

This two-year program trains students as professional family therapists in preparation for state licensure. This intensive training combines a strong theoretical base in systemic therapy with applied clinical experience. Students learn how to provide culturally sensitive and responsive therapeutic services and collaborate with providers from other disciplines across a variety of health-care settings.

The clinical practicum includes 500 client contact hours with 200 hours in relational systems (50 percent with couples or families) and 80 hours of individual and group supervision. Supervision at the Center for Healthy Relationships involves live observation, participation in reflecting teams, and feedback on audiovisual recordings of therapy sessions. In addition, students see clients at community agencies, clinics, and therapist practices. The Couples and Family Therapy Program is one of two programs in Oregon to be accredited by the Commission on Accreditation for Marriage and Family Therapy Education and approved by the Oregon Board of Licensed Professional Counselors and Therapists. Students of the program also have the option to complete a research project and formal thesis as well as the Spanish language specialization in addition to the standard program of courses.

Application and Admission

Detailed admission policies and procedures for the couples and family therapy specialization are available on the couples and family therapy website. Students are admitted fall term only. Completed applications must be received by the deadline published on the website for the

following fall term. Only completed applications are reviewed for admission. Applicants are evaluated on the following:

1. Quality of work
2. Graduate Record Examinations (GRE) or Millers Analogies Test (MAT) scores
3. Related work, background, or experience
4. Résumé with statement of purpose
5. Diversity essay response
6. Three letters of recommendation
7. An interview

Notices about disposition of applications are mailed by April 15.

Applicants must pass a criminal background check before they may enroll.

Code	Title	Credits

Doctoral Degree in Counseling Psychology

Benedict T. McWhirter, Program Director

240 HEDCO Education Building
541-346-2443

The doctoral program is the only counseling psychology program in the Pacific Northwest that is accredited by the American Psychological Association Commission on Accreditation (750 First Street NE, Washington, DC 20002-4242, 202-336-5979), and it is recognized as acceptable for licensure by the Oregon Board of Psychologist Examiners. The program has been accredited since 1955.

Earning a doctoral degree in counseling psychology typically requires five to six years of study beyond the bachelor's degree. This period includes a one-year, full-time, supervised predoctoral internship. Students must complete a PhD dissertation that demonstrates a high standard of scholarship and the ability to conduct independent, original research. Students may enter the program with a bachelor's or a master's degree.

The program follows an ecological model of training embedded in the scientist-practitioner tradition. Students learn to use evidence-based preventive and remedial intervention strategies for working with individuals, children, families, and groups within their many contexts. This includes training in culturally sensitive assessment and intervention strategies designed to increase understanding and effect change at all levels. Students engage in critical reflection on the science and practice of health service psychology and social justice advocacy as core to their training.

The doctoral program prepares health service psychologists specializing in counseling psychology who can make a significant contribution to the field through scholarly research and professional practice. Students participate in integrated classroom, practicum, and fieldwork activities in research, prevention, and intervention with children and adults, families, groups, and communities. Training experience may be had

at the UO Counseling Center, Oregon State University Counseling and Psychological Services, Lane Community College Counseling Department, UO Prevention Science Institute, and in community agencies or nonprofit research centers.

Graduates are prepared to work as researchers, practitioners, and educators in research institutions, institutions of higher education, medical settings, managed and integrated health-care organizations, community college and university counseling centers, community mental health centers, juvenile corrections agencies, human resources departments in business, and career counseling agencies.

PhD Requirements

Code	Title	Credits
	Courses in psychological foundations and discipline-specific knowledge	24
	Courses in research methods, design, statistics, and measurement	48
CPSY 603	Dissertation	18
	Practitioner competencies	57
	Professional competencies	12
	Additional courses	6
	Total Credits	165

Application and Admission

Students are admitted fall term only. Prospective applicants may find detailed admission policies and procedures on the counseling psychology website (<https://education.uoregon.edu/program/prevention-science>). The closing date for receipt of completed applications is posted on the website for entry the following fall term. Notices about the disposition of applications are e-mailed by April 15.

Applicants are evaluated on the following:

1. Academic record
2. Graduate Record Examinations (GRE) general test scores
3. Related work, research, and life experiences
4. Statement of purpose in seeking admission
5. Letters of recommendation
6. An interview

Only completed applications are reviewed. The application process is online only; see the website for procedures.

Graduate training includes research training, completion of a predissertation research project, and completion of a dissertation as well as practicum and internship placements in which students work with children and adults, families, groups, and communities.

Doctoral Degree in Prevention Science

Atika Khurana, Program Director

369 HEDCO Education Building
541-346-5540

The doctoral program leads to a doctor of philosophy (PhD) degree in prevention science. This research-intensive degree program can be completed in four years, with students earning an MS en route to the PhD. This program is intended for students who have completed a bachelor's or master's degree in a prevention science–related discipline or have significant human development, psychology, social science,

education, or prevention science experience. Students must complete a PhD dissertation that demonstrates a high standard of scholarship and the ability to conduct independent, original research.

Program Goals and Competencies

Goals

- **Goal 1.** Graduates describe theoretical models, risk and protective factors, preventive interventions (especially evidence-based ones), and implementation practices related to prevention programs and policies for diverse populations
- **Goal 2.** Graduates understand and adhere to the standards of knowledge for prevention science, including best practices in research design and methods, data analysis, interpretation, dissemination and rigorous ethical practice
- **Goal 3.** Graduates commit to multicultural competence and enhancing human welfare in their scholarly work related to prevention science
- **Goal 4.** Graduates display professionalism in their relationships with faculty and staff members, peers, and community partners in diverse settings

Competencies

Learning objectives for the prevention science graduate programs focus on preparing students to achieve the following set of minimum competencies that accompany the stated program goals:

- **Competency 1.** Students describe the origins, foundations, and standards of prevention science (Goal 2)
- **Competency 2.** Students design and carry out theoretically grounded research studies that contribute to the literature on risk and protective factors, and identify their mechanisms of influence associated with behavioral health outcomes across the lifespan (Goal 1, 2, 3)
- **Competency 3.** Students demonstrate knowledge of evidence-based preventive interventions and policies and understand how to apply prevention science theories to the design, implementation, and evaluation of preventive interventions (Goal 1, 2, 3, 4)
- **Competency 4.** Students integrate knowledge of research design, quantitative methods, data analysis, and multimethod, multiagent assessment methods commonly used in prevention science into their research activities (Goal 2)
- **Competency 5.** Students demonstrate skill in disseminating their work to diverse audiences via formal academic presentations, instructional activities, and professional or academic writing (Goal 1, 2, 3, 4)
- **Competency 6.** Students demonstrate awareness and understanding of diversity and contextual issues such as culture, identity, ethnicity, gender, sexual orientation, disability, marginalization, poverty, inequality, and religion in their research, applied activities, and professional behavior (Goal 1, 3, 4)
- **Competency 7.** Students indicate a commitment to continuous learning and professional development by establishing and maintaining effective professional relationships with faculty members, research and teaching supervisors, collaborators, participants, agency personnel, peers, and staff, and being responsive to constructive feedback (Goal 4)
- **Competency 8.** Students demonstrate honesty, personal responsibility, and knowledge and appropriate application of relevant ethical and legal codes related to prevention science (e.g., American Psychological Association ethical standards) (Goal 4)

The course work lays a solid foundation for students interested in careers in academia or local, state, or national prevention and public health agencies.

PhD Requirements

Code	Title	Credits
	Nine courses in psychological foundations	30
	Eight courses in doctoral-level research methods and statistics	32
	Research	4
	Specialty area courses	9
	Dissertation course	18
	Research seminar	8
	Grant-writing course	3
	Supervised college teaching course	1
	Total Credits	105

Application and Admission

Students are admitted fall term only. Prospective applicants may find detailed admission policies and procedures on the prevention science website (<https://education.uoregon.edu/program/prevention-science>). The closing date for receipt of completed applications is posted on the website for entry the following fall term.

Applicants are evaluated on the following:

1. Academic record
2. Graduate Record Examinations (GRE) general test scores
3. Prevention-related research and work experiences
4. Statement of purpose in seeking admission
5. Letters of recommendation
6. Interview—in-person, telephone, or video—with a member of the program faculty

Only completed applications are reviewed. Applicants must gather the requested supporting papers and submit them with the application forms as one package. Graduate training includes completion of a research paper and a dissertation.

Specialization in Spanish Language Psychological Service and Research

Ellen McWhirter, Director

240 HEDCO Education Building
541-346-2443

The 16-credit Spanish language psychological service and research specialization addresses the deficit in family-centered prevention services for the Spanish-speaking Latino community. It is open to students enrolled in the accredited graduate programs of counseling psychology, couples and family therapy, and school psychology who also meet the eligibility criteria. The specialization provides students with skills to support the provision of culturally relevant mental health services and research in Spanish for Latino populations. It is designed to enhance preexisting linguistic and multicultural competencies and increase cultural understanding of US Spanish-speaking populations. Students critically assess the unique social, historical, political, and cultural contexts that shape the experiences of Latinos in the United States, with particular attention to conditions of social injustice and inequity, and how such

conditions influence the health and well-being of Latino Spanish-speaking communities.

Eligibility for this specialization includes maintaining good standing in one of the three specified College of Education graduate programs focused on mental health services, approval from the student's advisor and the director of the specialization, and preexisting competencies in Spanish.

Requirements

Code	Title	Credits
CPSY 612	Professional Ethics	3
CPSY 615	Counseling Diverse Populations	4
CPSY 626	Psychological Services for Latinos	2
CPSY 508	Workshop: [Topic] (Topics in Latino Mental Health)	3
CPSY 609	Practicum: [Topic] (three terms)	3
CPSY 609 or CFT 609 or SPSY 609	Practicum: [Topic] ¹	1
Total Credits		16

¹ A practicum or externship in the student's major in which the student performs clinical work with Spanish-speaking clients.

Additional Requirements

Students must participate in 20 hours (minimum) of continuous learning experiences and educational-cultural events, complete a capstone project, and maintain good standing in the departmental graduate program.

Counseling Psychology Courses

CPSY 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

CPSY 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CPSY 217. Foundations of Student Health and Well-Being. 3 Credits.

CPSY 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

CPSY 609. Practicum: [Topic]. 1-16 Credits.

Repeatable.

CPSY 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Ecological Bases of Behavior is a current topic.

CPSY 611. Ethics Discussion for Counseling Psychology. 1 Credit.

Focuses on current ethical standards of professional practice for psychologists and Oregon's legal requirements, applied to roles and settings of counseling psychologists.

CPSY 612. Professional Ethics. 3 Credits.

Ethical and legal concerns in the professional practice of psychology. Ethical theory and decision-making processes; legal aspects of client-psychologist relationships.

CPSY 613. Introduction to Counseling Psychology. 3 Credits.

Historical foundations of counseling psychology. Major theories and theorists. Counseling as an ecological and context-sensitive interactive process. Settings and roles of the profession.

CPSY 614. Theories of Counseling. 3 Credits.

Overview of selected historical and current counseling theories.

CPSY 615. Counseling Diverse Populations. 4 Credits.

Influence of gender, race, ethnicity, and other factors related to diverse populations on the identity-formation process in contemporary society. Applications to counseling psychology.

CPSY 617. Theories of Career Development. 3 Credits.

Addresses life-span career development including issues, concepts, and definitions; theories of career development and choice; intervention in strategies; and career resources in the context of a multicultural society.

CPSY 621. Lifespan Developmental Psychology. 3 Credits.

Understanding continuity and change in human development and the ways in which the development of children, adolescents, and adults can be enhanced. Repeatable once for a maximum of 6 credits.

CPSY 622. Psychological Assessment II. 4 Credits.

Selection and administration of instruments and procedures for generating personality and career assessment reports. Emphasizes the integration of assessment into the intervention planning process. Includes laboratory.

CPSY 626. Psychological Services for Latinos. 2 Credits.

Provide graduate students with content specific to carrying out human services work and research with those who are Latino and/or Spanish-speaking.

CPSY 642. Child-Family Interventions. 4 Credits.

Empirically oriented interventions with children and families, ranging from early childhood through adolescence. Integrates developmental and intervention sciences.

CPSY 645. Health Promotion and Equity. 3 Credits.

This course introduces theoretical and empirical work in prevention-focused health psychology, integrating cultural, developmental, and community psychology concepts as they pertain to health related behaviors.

CPSY 651. Advanced Individual Counseling Intervention. 3 Credits.

Focuses on applying interpersonal process and problem-management approaches to individual counseling and psychotherapy; using assessment information in treatment planning.

CPSY 654. Supervision and Consultation. 4 Credits.

Focuses on didactic knowledge of supervision theory, research, models of practice, and evidence-based practices in supervision and consultation and acquisition of supervision and consultation skills. Students refine their knowledge of supervision theory, research, and techniques and integrate these into supervision and consultation activities.

CPSY 704. Internship: [Topic]. 1-15 Credits.

Repeatable.

CPSY 706. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

CPSY 708. Special Topics: [Topic]. 1-16 Credits.

Repeatable.

CPSY 709. Practicum: [Topic]. 1-16 Credits.

Repeatable.

CFT 609. Practicum: [Topic]. 1-16 Credits.

Repeatable.

CFT 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CFT 612. Parenting Interventions. 3 Credits.

Examines evidence-based practices for parenting children and adolescents, including trauma-focused parenting strategies.

CFT 614. Child Mental Health and Diagnosis. 4 Credits.

Emphasizes the etiology, nosology, phenomenology, and diagnosis of mental health disorders in children. Examines social and cultural assumptions about "normal" versus "pathological" behavior, cognition, and emotion.

CFT 615. Introduction to Marriage Family Therapy. 3 Credits.

Surveys the distinct disciplines of marriage and family therapy.

CFT 616. Systems Theory Foundations. 3 Credits.

Surveys macro theories and their relationship to families and family therapy with emphasis on systems, communications, and ecological theories.

CFT 620. Mental Health and Diagnosis. 3 Credits.

Study of maladaptive behavior, treatment, and prevention emphasizing the integrative contributions of biological, behavior, cognitive, psychodynamic, humanist-existential, and community perspectives, including the "Diagnostic and Statistical Manual of Mental Disorders."

CFT 621. Ethics Discussion. 1 Credit.

Provides an opportunity to more fully examine and discuss ethical and legal considerations for couples and family therapists with emphasis on relational-systemic elements of ethical decision-making.

CFT 622. Relational Assessment. 1 Credit.

Examines evidence-based practices for assessment in couples therapy. Integrates systems and communication theory with emerging contextual and behavior-assessment models.

CFT 624. Group Psychotherapy. 3 Credits.

Presents basic elements of group process; includes introduction to group work, guidelines for multicultural practice, ethical and professional issues in group practice, and group leadership.

CFT 625. Violence, Trauma, and Healing. 4 Credits.

Theories and research on the acceleration and cessation of violence in the family and assessment of responses to violent family behaviors and to perpetrators, survivors, and families.

CFT 626. Relational Sex Therapy. 3 Credits.

Increases understanding and clinical abilities for working with couples; special emphasis on the role of intimacy and sexual relationships.

CFT 627. Advanced Theories in Relational Therapy. 4 Credits.

Studies theories and models of couples and family therapy; self-evaluation of clinical work. Examines integration, specifically the "metaframeworks" model, solution-focused therapy, and emotionally focused therapy.

CFT 628. Addiction and Recovery. 4 Credits.

Increases the conceptual understanding and skills of family therapists working with contemporary issues; emphasis on addictions and addiction recovery.

CFT 629. Intimate Partner Therapy. 4 Credits.

Application of systems theory to problems within relationships and their resolution. Includes research findings, assessment, motivation, change, content and process, ethics, and social-macro considerations.

CFT 630. Wellness and Spirituality. 3 Credits.

Provides an understanding of existential issues, spirituality, and wellness. Working with clients' life-cycle stages and health-stress issues; resources to promote wellness.

CFT 632. Medical Family Therapy. 4 Credits.

Introduction to the theory, fundamentals, and practical applications of medical family therapy.

Family and Human Services Courses

FHS 199. . 1-5 Credits.**FHS 213. Issues for Children and Families. 4 Credits.**

Examines issues and problems confronting children and families in modern society. Issues such as disability, poverty, health care, addictions, racism, and violence are addressed.

FHS 215. Exploring Family and Human Services. 4 Credits.

Explores the historic basis and current design of family and human services. Emphasizes services to children, youth, adults, and families.

FHS 216. Diversity in Human Services. 4 Credits.

Provides glimpses into various social groups and the rudimentary knowledge, awareness, and skills required to function effectively as a social-service worker within diverse populations.

FHS 320. Instructional Methods in Early Childhood I. 1 Credit.

Explores an array of knowledge- and evidenced-based practices that ensure excellence in teaching young children.

FHS 321. Instructional Methods in Early Childhood II. 1 Credit.

Explores communication, language, and social emotional development in young children. Teaching strategies for infants, toddlers, and preschoolers in early childhood settings that promote social communication.

FHS 322. Instructional Methods in Early Childhood III. 1 Credit.

Explores early literacy, print awareness, group reading, evaluation of children's books, and literacy for dual-language learners.

FHS 327. Organizational Issues in Human Services. 4 Credits.

Theories and policies on the organization of human services. Emphasizes the evaluation of outcomes of services for children, youth, adults, and families.

Prereq: major status.

FHS 328. Human Development in the Family Context. 4 Credits.

Examines human development within the context of the family from an evidence-based perspective. Integration of contemporary family issues experienced across the lifespan within the context of the human service profession.

Prereq: major status.

FHS 329. Youth Psychopathology in Context. 4 Credits.

Presents child and adolescent psychopathology and problems within a diagnostic framework. Topics address psychosocial issues for youth in family and cultural contexts.

FHS 330. Individual Interventions in Ecological Contexts. 4 Credits.

Introduces the concept of individual interventions within an ecological model. Provides knowledge and development of basic listening skills and how to apply these skills to individuals in diverse contexts.

Prereq: major status.

FHS 331. Group and Community Interventions. 3 Credits.

Introduces the concept of group intervention within the context of group theory and community development. Provides knowledge and development of group interventions, including group facilitation skills and curriculum development.

Prereq: FHS 330.

FHS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

FHS 401. Research: [Topic]. 1-5 Credits.

Repeatable.

FHS 420. Research in Human Services. 4 Credits.

Use of research to reform practice in human services. Trends and issues in assessment and evaluation in human services are provided.

FHS 430. Foundations in Early Childhood Education. 3 Credits.

Explores the history and theories of early education with a focus on societal factors that affect development.

FHS 431. Early Childhood and Human Services Curriculum. 3 Credits.

Explores the theoretical and historical context of primary curriculum models used in early childhood education and human service settings that serve at-risk children and families.

FHS 432. Assessment in Early Childhood Education. 3 Credits.

Explores educational, environmental, and family assessments in early childhood education and human service settings.

FHS 482. Prevention of Youth Violence. 4 Credits.

Research and practice in community interventions designed to prevent youth violence. Includes home, school, and community-based interventions.

FHS 483. Prevention of Interpersonal Violence. 4 Credits.

Examines interpersonal violence and community-based prevention using ecological, multicultural, international frameworks. Emphasizes assessment, prevention, intervention, and simultaneous occurrence of adult violence and child maltreatment.

FHS 491. Junior Professional Practices and Issues I. 3 Credits.

Examines issues and behaviors associated with being a community service professional. Includes ethical standards for professional practice. Prereq: major status.

FHS 492. Junior Professional Practices and Issues II. 3 Credits.

Examines issues and behaviors associated with being a community service professional. Includes ethical standards for professional practice. Prereq: major status.

FHS 493. Junior Professional Practices and Issues III. 3 Credits.

Examines issues and behaviors associated with being a community service professional. Includes ethical standards for professional practice. Prereq: major status.

FHS 494. Senior Professional Practices and Issues. 3 Credits.

Examines issues and behaviors associated with being a community service professional. Prereq: major status.

FHS 495. Senior Professional Practices and Issues. 3 Credits.

Examines issues and behaviors associated with being a community service professional. Prereq: major status.

FHS 496. Senior Project Proposal. 1 Credit.

Students create a written proposal outlining rationale, project description, and timelines for completing the senior project. Prereq: major status.

FHS 497. Senior Project. 1-2 Credits.

Students develop a written product or project in conjunction with faculty members and field site personnel. Prereq: FHS 496.

FHS 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

FHS 508. Workshop: [Topic]. 1-9 Credits.

Repeatable.

FHS 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PREV 631. Introduction to Prevention Science. 3 Credits.

Overview of theory, research, and practice in prevention science and health promotion, including foundational concepts, translation of theory into intervention, methodology, and implementation.

PREV 633. Contemporary Issues in Public Health. 3 Credits.

This course introduces approaches, concepts, methods, and perspectives of epidemiology as applied to current public health issues and prevention science research and practice.

PREV 634. Implementation Science. 3 Credits.

Provides a framework for examining implementation science and its application to clinical and community-based research. Prereq: CPSY 631 or CPSY 643; a graduate-level statistics course.

Educational Methodology, Policy, and Leadership

Gerald Tindal, Department Head

541-346-5171

102 Lorry I. Lokey Education Building

The curriculum leading to master's and doctoral degrees in the Department of Educational Methodology, Policy, and Leadership focuses on developing and implementing effective practices in education and social system settings.

Programs provide educational leaders, policymakers, and researchers with the skills needed to design and implement strategies that improve practices in educational organizations. Graduates are qualified for a variety of positions such as education system administrators, principals and superintendents, instructors and researchers in higher education and nonprofit settings, specialists in intervention development, implementation, and evaluation, and researchers in evaluation, management, leadership, and educational policy.

License Programs

Administrator License Preparation

541-346-2447

102 Lorry I. Lokey Education Building

Oregon requires administrators in public schools (vice principals, principals, assistant superintendents, superintendents, and other designated personnel) to hold administrative licenses. The University of Oregon offers planned programs of study leading to the preliminary and professional licenses for administrators and superintendents.

Preliminary Administrator License

The preliminary administrator licensure program prepares students for building and district administration. The preliminary administrator license may be issued to an applicant who completes the 26-credit program, earned a master's degree from an accredited college or university, and provides documentation of at least three years of successful licensed experience. Admission to the program is limited and is based on the applicant's academic work, recommendations, and professional goals. The program begins in June, and admission decisions are made in early spring. Candidates can earn a master of education (MEd) degree at the UO by taking additional course work and completing a master's project.

Professional Administrator License

This program prepares students for continuing building and program administration—preprimary through grade 12—and for school district office assignments, including superintendent positions. Students who complete the UO preliminary administrator licensure preparation program are automatically admitted to the professional administrator program upon completion of a professional administrator license application. Application can be made to the program if the applicant completed a preliminary administrator program at another institution. Applicants to the continuing program must

- have a master's degree
- hold an Oregon preliminary administrator license
- submit a completed application

Faculty

Gina Biancarosa, associate professor (adolescent literacy, struggling readers, advanced statistical methods); Ann Swindells Chair in Education. BA, 1992, Boston College; EdM, 1999, EdD, 2006, Harvard. (2009)

Michael D. Bullis, Sommerville-Knight Professor (adolescent transition to adult roles, employment programs, decision-making). BPE, 1973, MS, 1978, Purdue; PhD, 1983, Oregon. (1995)

Dave DeGarmo, research associate professor (prevention science methodology, longitudinal analysis, fathers and parenting). BA, 1987, Lock Haven; MS, 1989, PhD, 1993, Akron. (2013).

Nancy Golden, professor of practice (leadership, equity, public policy). BS, 1973, Denver; MS, 1974, PhD, 1987, Oregon. (2015)

Keith Hollenbeck, senior lecturer (administrative leadership, school assessment, curriculum and instruction). BA, 1976, Humboldt State; MS, 1981, PhD, 1996, Oregon. (1996)

David Liebowitz, assistant professor (education policy analysis, educational inequity, school leadership). BA, 1999, Columbia; EdM, 2008, 2011, EdD, 2015, Harvard. (2018)

Kathleen M. Scalise, professor (quantitative measurement and assessment, instructional technology, computer-adaptive instructional materials). BA, 1982, MA, 2004, PhD, 2004, California, Berkeley. (2005)

Joanna Smith, senior lecturer (education policy, education reform, qualitative research methods). BA, 1996, Haverford College; graduate diploma in education, 1997, Melbourne; PhD, 2004, Southern California. (2013)

Joseph Stevens, professor (educational and psychological measurement and assessment, statistical and quantitative methods). BA, 1974, MA, 1976, PhD, 1983, Arizona. (2005)

Emily Tanner-Smith, associate professor (applied research methodology, meta-analysis, substance use and addiction). BS, 2003, Belmont; MA, 2007, PhD, 2009, Vanderbilt. (2017)

Gerald Tindal, Castle-McIntosh-Knight Professor of Education (measurement and assessment, disabilities, program evaluation). BA, 1975, PhD, 1982, Minnesota. (1984)

Ilana Umansky, assistant professor (education policy analysis, quasi-experimental methods and longitudinal data analysis, English learners and immigration). BA, 1998, Wesleyan; MEd, 2003, Harvard; MA, 2012, PhD, 2014, Stanford. (2014)

Mark Van Ryzin, lecturer (social influences on adolescent development). BS, 1991, Wisconsin, Madison; MA, 2006, PhD, 2008, Minnesota, Twin Cities. (2012)

Keith Zvoch, associate professor (quantitative methods, program evaluation, statistical modeling). BS, 1992, Pittsburgh; MA, 1995, PhD, 2001, New Mexico. (2007)

Emeriti

Max G. Abbott, professor emeritus. BS, 1949, MS, 1951, Utah State; PhD, 1960, Chicago. (1966)

Keith A. Acheson, professor emeritus. BS, 1948, MS, 1951, Lewis and Clark; EdD, 1964, Stanford. (1967)

Gerald K. Bogen, professor emeritus. BA, 1959, Western Washington; MS, 1961, DEd, 1963, Oregon. (1961)

David T. Conley, professor emeritus. BA, 1972, California, Berkeley; MA, 1983, PhD, 1986, Colorado, Boulder. (1989)

C. H. Edson, associate professor emeritus. BA, 1964, California, Berkeley; MA, 1970, Oregon; PhD, 1979, Stanford. (1973)

Robert D. Gilberts, professor emeritus. BS, 1950, Wisconsin State; MS, 1955, PhD, 1961, Wisconsin, Madison. (1970)

Arthur C. Hearn, professor emeritus. AB, 1934, MA, 1937, EdD, 1949, Stanford. (1950)

Martin J. Kaufman, professor emeritus. BA, 1964, MEd, 1965, William and Mary; PhD, 1970, Texas, Austin. (1992)

John E. Lallas, professor emeritus; executive dean emeritus. BA, 1947, Washington (Seattle); BA, 1952, Western Washington; EdD, 1956, Stanford. (1957)

Roy E. Lieuallen, chancellor emeritus, Oregon University System. BS, 1940, Pacific University; MS, 1947, Oregon; EdD, 1955, Stanford. (1961)

Philip K. Piele, professor emeritus. BA, 1957, Washington State; MS, 1963, PhD, 1968, Oregon. (1967)

Richard A. Schmuck, professor emeritus. BA, 1958, MA, 1959, PhD, 1962, Michigan. (1967)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Minor in Leadership and Administrative Skills

The minor in leadership and administrative skills (LEADS) allows students to major in any subject offered at the university while also minoring in leadership, providing them with a breadth of interdisciplinary options. Students gain mastery in leading and managing within social systems, preparing undergraduates to address the leadership challenges and opportunities found in their lives and careers. They learn the skills necessary to be proactive, effectively reframing debates, reorganizing coalitions, building center-out alliances, understanding and incorporating minority positions and beliefs into leadership perspectives, and collaborating for effective decision-making within constituencies.

The requirements for the minor consist of 12 core credits and 12 elective credits.

Minor Requirements

Code	Title	Credits
Choose four from the following: ¹		12
EDLD 211	Exploring Leadership	
EDLD 311	Equity Leadership and Social Change	
EDLD 312	Effective Leadership Decision-Making	
EDLD 313	Program Evaluation for Future Leaders	
EDLD 411	Examining Leadership Effectiveness	
EDLD 412	Leading Change in Organizations	
Elective courses ²		12

¹ Courses in the program will be offered at 3 credits beginning in fall 2018. When the minor was launched in winter 2018, courses were 4 credits, not 3. Students who enrolled in the LEADS minor in 2018 and have concerns about this change should email their questions to empl@uoregon.edu.

² An extensive list of acceptable elective courses for the LEADS minor may be found online (<https://education.uoregon.edu/edl/undergraduate/minor>).

Application and Admission

Before applying to the minor program, students must be enrolled in or have already completed the first required core course, Exploring Leadership (EDLD 211), with a letter grade of at least B– or P. Students who are experiencing difficulty enrolling in the course due to scheduling may seek permission from the program advisor to waive this requirement; requests should be emailed to empl@uoregon.edu.

To declare the minor, students must complete the UO LEADS Minor Registration Form (https://oregon.qualtrics.com/jfe/form/SV_9v6lzup4ziE3q9D). Submissions are reviewed for admission to the minor at the beginning of each term.

Students interested in the minor may schedule advising appointments to discuss whether the program is appropriate for their goals and to plan a course of study by emailing empl@uoregon.edu.

- **Doctor of Education**
- **Doctor of Philosophy** (p. 756)

Graduate Studies

The department offers master of arts (MA), master of science (MS), master of education (MEd), and doctor of education (DEd) degrees with a major in educational leadership. In addition, a doctor of philosophy (PhD) degree is offered with a major in quantitative research methods in education.

Master's Degrees

The Department of Educational Methodology, Policy, and Leadership offers the master of arts (MA), master of science (MS) and master of education (MEd) degrees.

During the first term of graduate work, each student plans a program of study with the assistance of the student's advisor.

The master's degrees in educational leadership focus on two areas of emphasis. Students select one of these areas when entering the degree program:

- **Quantitative Research Methods in Education.** Prepares those pursuing careers in educational research.
- **Policy and Leadership.** For those pursuing careers such as program coordinators or college advisors in central school administration, student support services, or staff and community relations.

Students should consult the **Graduate School** section of this catalog for general university admission and degree requirements.

Doctoral Degrees

The Department of Educational Methodology, Policy, and Leadership offers two doctoral degrees—DEd and PhD. The program for the doctor of education (DEd) in educational leadership, which emphasizes the development of expertise in professional practice, is intended for individuals who want careers as administrators, staff developers, curriculum specialists, or positions at state and local offices. The program for the doctor of philosophy (PhD) in quantitative research methods in education emphasizes the development of expertise in educational research and statistical analysis, in educational organizations, in measurement and assessment, or as preparation for becoming a professor of education with a specialization in research.

The doctoral programs follow the general regulations governing graduate work at the university. Each PhD student plans a program with the guidance of a faculty advisor. In contrast, DEd students complete their program with a cohort and a fixed set of courses. This degree option may be completed concurrently with the administrator licensure program.

Doctoral Degree Requirements

A minimum of 81 graduate credits are required for the doctor of education (DEd) degree program; the doctor of philosophy (PhD) requires a minimum of 108 graduate credits. In both programs, at least 81 credits must be earned after admission to the program; 18 of these 81 credits are earned in Dissertation (EDLD 603). PhD students may request to transfer up to 21 graduate-level credits. The remaining required credits include courses in research methodology and electives.

Course Type	PhD Credits	DEd Credits
Methods	18	21
Advanced quantitative research methods	24	0
Learning community	24	0
Interdisciplinary	24	0
Seminars and institutes	0	6
Writing and communication	0	15
Content, policy, leadership, equity	0	21
Dissertation	18	18
Total Minimum Credits	108	81

For the PhD, a 21-credit maximum of transfer credit is allowed.

Residency

Three consecutive terms of full-time study (graduate credits) must be completed to meet graduate school residency requirements.

Application and Admission

The department follows general university policy in its admission procedures. Students who transfer to the university from other institutions must meet UO entrance requirements. Information about admission to graduate study is available from the department student services coordinator and on the College of Education's website. Information about licensure and degree programs may be obtained from the director of graduate studies.

Graduate Specialization in Quantitative Research Methods

The graduate specialization in quantitative research methods is designed primarily for doctoral students who have chosen quantitative methods as their primary research tradition in the College of Education. Doctoral students in other colleges and programs may be eligible but should confirm with the sponsoring department, the Department of Educational Methodology, Policy, and Leadership. The specialization is a rigorous training program in advanced quantitative research methods designed to prepare PhD students, with a competitive focus on quantitative research methods, for research and scholarship careers in education and the social sciences. Students take a minimum of 20 credits (five 4-credit courses) from among the department's advanced quantitative methods course offerings, building critical expertise in quantitative methodology including applied educational statistics and research design. The course requirements include a two-course sequence in at least one advanced quantitative method and three additional quantitative methods courses.

Courses

EDLD 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable. Topics include 21st-Century Leadership, Peer Mentoring.

EDLD 211. Exploring Leadership. 3 Credits.

Understanding the context of leadership for the common good and for change in educational and social systems; establishing basic skill-building in project management fundamentals to promote effective leadership.

EDLD 311. Equity Leadership and Social Change. 3 Credits.

Provides foundational exposure to current scholarship and practice in approaches that promote equity and inclusion within professional educational and social service settings.

EDLD 312. Effective Leadership Decision-Making. 3 Credits.

Introduces basic concepts of evidence-based decision-making. Addresses theoretical frameworks for decision-making, statistical applications, common decision-making errors, and ways to involve diverse individuals and groups in making decisions.

Prereq: EDLD 211.

EDLD 313. Program Evaluation for Future Leaders. 3 Credits.

Introduction to evaluation theory and evaluation research design; potential uses and limitations of program evaluation in the public and private sector through study, discussion, and application of course materials.

Prereq: EDLD 211.

EDLD 401. Research: [Topic]. 1-18 Credits.

Repeatable

EDLD 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

EDLD 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

EDLD 407. Seminar: [Topic]. 1-4 Credits.

Repeatable. Topics include Human Services, Peer Health Education.

EDLD 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

EDLD 409. Practicum: [Topic]. 1-12 Credits.

Repeatable. Topics include Advanced Peer Support, International Educational Leadership.

EDLD 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

EDLD 411. Examining Leadership Effectiveness. 3 Credits.

The purpose of this course is to instruct students in the LEADS minor on practices of professional development in the leadership process, including how to apply best practices in teaching and learning to teams and organizations. This course is part of the LEADS (Leadership +Administrative Skills) minor for undergraduate students, but may be taken by any UO undergraduate student. While other LEADS courses require first completing EDLD 211, this course does not require EDLD 211 as a prerequisite.

EDLD 412. Leading Change in Organizations. 3 Credits.

Development of skills for leading change within an organization: planning, managing, enacting, surviving, and evaluating personal and organizational change.

Prereq: EDLD 211.

EDLD 503. Thesis. 1-16 Credits.

Repeatable.

EDLD 507. Seminar: [Topic]. 1-4 Credits.

Repeatable. Topics include Human Services, Peer Health Education.

EDLD 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

EDLD 510. Experimental Course: [Topic]. 1-4 Credits.
Repeatable.

EDLD 601. Research: [Topic]. 1-16 Credits.
Repeatable.

EDLD 602. Supervised College Teaching. 1-5 Credits.
Repeatable.

EDLD 603. Dissertation. 1-16 Credits.
Repeatable.

EDLD 604. Internship: [Topic]. 1-12 Credits.
Repeatable.

EDLD 605. Reading and Conference: [Topic]. 1-16 Credits.
Repeatable.

EDLD 606. Field Studies: [Topic]. 1-16 Credits.
Repeatable.

EDLD 607. Seminar: [Topic]. 1-6 Credits.
Repeatable.

EDLD 608. Workshop: [Topic]. 1-16 Credits.
Repeatable.

EDLD 609. Practicum: [Topic]. 1-16 Credits.
Repeatable.

EDLD 610. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

EDLD 623. Cultural Adaptation of Evidence-Based Practices. 3 Credits.

This course is designed to provide an advanced foundation in models and methods for the cultural adaptation of evidenced-based prevention and treatment practices in school, community, and family settings.

EDLD 624. Leading for Equity. 3 Credits.

This course is designed to provide advanced exposure to current research and practice in leading for equity and inclusion within professional educational settings and a strong conceptual foundation in leadership.

EDLD 625. Survey and Questionnaire Design. 3 Credits.

Students gain practical experience in the collection and analysis of social science information through the design of surveys and questionnaires.

EDLD 626. Social-Cultural Foundations of Education. 4 Credits.

Examines education in US society from sociological, cultural, and structural perspectives with a focus on inequity and the intersecting roles of race, language, class, gender, and ability-disability.

EDLD 628. Hierarchical Linear Models I. 3 Credits.

Introduction to multilevel modeling and hierarchical data structures, random and fixed effects, intercepts and slopes as outcomes models, estimation, centering, and the use and interpretation of HLM statistical software. Sequence with EDLD 629.

Prereq: EDUC 642.

EDLD 629. Hierarchical Linear Models II. 3 Credits.

This course will include advanced topics in multilevel modeling and hierarchical data structures, including longitudinal and categorical data analysis, estimation methods, missing data and multiple imputation, and the use and interpretation of different HLM statistical software packages, including HLM, R, and Mplus. Sequence with EDLD 628.

Prereq: EDLD 628.

EDLD 631. Meeting the Needs of English Learners. 3 Credits.

Reviews historical and current approaches to meeting the needs of English learners in the US. Focuses on federal, state, and local policies supporting acquisition of English.

EDLD 632. Educational Policy Analysis. 3 Credits.

The purpose of this course is to introduce graduate students to the craft of education policy analysis.

EDLD 633. Structural Equation Modeling I. 3 Credits.

Theory, application, and interpretation of structural equation modeling techniques. Includes covariance structures, path diagrams, path analysis, model identification, estimation, and testing. Sequence with EDLD 634. Prereq: EDUC 642; EDUC 644 recommended.

EDLD 634. Structural Equation Modeling II. 3 Credits.

Emphasis on structural and latent variable models, including cross-validation, mean structures, comparing groups and models, latent growth-curve analyses. Sequence with EDLD 633. Offered alternate years. Prereq: EDLD 633.

EDLD 638. Advanced School Law. 3 Credits.

Overview of legal issues in school board–superintendent relations, media relations, personnel evaluation practices, student and employee rights, collective bargaining, contract management, and official complaints.

EDLD 643. Evidence-Based Decision Making. 3 Credits.

Introduces basic concepts of evidence-based decision-making.

EDLD 644. Learning Organization. 3 Credits.

Four theories of organizational learning are explored: structural frame, human resource, political, and symbolic.

EDLD 647. Professional Issues in Education I. 1 Credit.

Examines the relationship between scholarship, planned programs of study, preparation for comprehensive exams, master's project, and dissertation.

EDLD 648. Professional Issues in Education II. 2 Credits.

This course focuses on (a) the varied threats to validity in applied education research and (b) the elements of a cogent written argument as applied to academic education research.

Prereq: EDLD 647.

EDLD 659. Scholarly Writing. 3 Credits.

Develops proficiency in preparing technical reports, dissertations, grant applications, and literature syntheses to communicate educational programs, processes, and results.

EDLD 661. Item Response Theory I. 3 Credits.

Theory and application of item response measurement models. Participation outcomes include knowledge of IRT models, terminology, and resources. Emphasis on popular models and underlying assumptions.

EDLD 663. Measurement & Assessment: Research. 3 Credits.

Covers applied knowledge in measurement and assessment with an emphasis on use of measures for research purposes.

EDLD 667. Advanced Measurement Assessment. 3 Credits.

Advanced foundation in educational measurement and assessment; emphasis on scale development and psychometric evaluation techniques. Introduction to methodological approaches to develop and evaluate scales designed for educational and applied research settings. Prereq: EDLD 560 or equivalent.

EDLD 675. School Finance. 3 Credits.

Overview of school finance concepts, Oregon's school financing system, political and legal considerations, taxation, state distribution formulas, school finance reform, the federal role in education.

EDLD 677. PhD Research Seminar. 3 Credits.

The primary purpose of this course is to induct doctoral students into the practice of educational research and provide them a base for a career as a faculty member at an institution of higher education or a member of a research institute.

EDLD 678. PhD Teaching Seminar. 3 Credits.

Facilitates the development of skills that make for successful teaching and the preparation of a teaching statement for submission with job applications. Repeatable twice for a maximum of 9 credits.

EDLD 683. State and Local Policy Development in Education. 3 Credits.

This course introduces students to the education policy process at the state and local levels. The course is designed for students who seek to become more sophisticated in their ability to read critically about, understand, and interpret the policy process.

EDLD 684. Master's Project Proposal. 1 Credit.

Clarifying research topics and identifying data sources and interpretation for the master's project under the guidance of faculty advisor.

EDLD 685. Master's Project. 1-6 Credits.

Culminating activity for students seeking a master's degree. Working under the guidance of assigned faculty advisor to complete the master's project.

EDLD 692. Research Writing. 3 Credits.

Provides structure and guidance to complete the methods section of a dissertation proposal. The nature and scope of the dissertation methods will be determined by a range of factors, including the advisor's guidance, the data to be used, and the scope of the study.

EDLD 694. Dissertation Preparation. 3 Credits.

This course is designed to support students in preparing their a dissertation using the APA guidelines for publications in education/social sciences, the standards for measurement systems used in dissertations, and the standard four chapter format: introduction, methods, results, conclusions. Sequence with EDLD 699.

Prereq: EDLD 699.

EDLD 696. Professional Writing I: Foundations in Professional Writing. 3 Credits.

Covers foundational knowledge of the American Psychological Association's (APA) writing style as well as how to synthesize research for academic purposes.

EDLD 697. Professional Writing II: Organization. 3 Credits.

Explores the types of writing required of the three doctor of education (DEd) dissertation options: scholarly article, policy analysis, and grant proposal.

Prereq: EDLD 696.

EDLD 698. Professional Writing III: Literature Review. 3 Credits.

Students write a review of research manuscripts on a professional topic and continue to learn the nuances of APA writing style.

Prereq: EDLD 697.

EDLD 699. Dissertation Methods Apprenticeship. 3 Credits.

Provides doctoral students in the DEd program a structured opportunity to complete their dissertation proposal and a PowerPoint presentation on their respective proposals.

EDLD 708. Workshop: [Topic]. 1-16 Credits.

Repeatable.

EDLD 709. Practicum: [Topic]. 1-16 Credits.

Repeatable.

EDLD 710. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

Education Studies

Edward M. Olivos, Department Head

541-346-3404

124 Lorry I. Lokey Education Building

License and degree programs in the Department of Education Studies prepare professionals to work in education. For teaching in elementary grade levels (K–5), the undergraduate major in educational foundations leads to a bachelor of arts (BA) or bachelor of science (BS) degree in educational foundations. Undergraduates may also earn a certificate in education foundations—secondary. For teaching in secondary grade levels (6–12), the certificate in educational foundations—secondary is intended to complement the subject area major.

The master's-level programs include

1. a degree in curriculum and teaching with a specialization in elementary multiple subjects education or secondary education, which includes a recommendation for a state-approved teaching license and a master of education (MEd) degree
2. a program in curriculum and teacher education for those already holding a teaching license and are seeking a master of science (MS) degree
3. add-on endorsements for licensed teachers in English for speakers of other languages and multicultural, multilingual reading

The doctoral degree program leads to a doctor of philosophy degree (PhD) in critical and sociocultural studies in education.

Faculty

Joanna Goode, professor (computer science education, urban education, educational equity and inclusion). BS 1997, MEd, 1998, PhD, 2004, California, Los Angeles. (2005)

Jeanne Nagayama Hall, senior instructor (elementary education, educational psychology, freshman mentoring); undergraduate field experience coordinator; faculty director, freshman multicultural scholars academic residential community. BA, 1978, Azusa Pacific; MEd, 1984, Washington (Seattle). (2002)

Julie Heffernan, senior lecturer (sexuality and gender studies in education, social studies and language arts curriculum, educational equity and inclusion); graduate director, UO Teach. BA, 1990, MEd, 2004, PhD, 2010, Oregon (2013)

Jenefer Husman, associate professor (educational psychology). BS, 1992, Evergreen State College; MA, 1996, PhD, 1998, Texas, Austin. (2016)

Michelle Jacob, professor (Indigenous studies in education, health, gender and decolonization). BA, 1998, MA, 2001, California State, San Marcos; PhD, 2004, California, Santa Barbara. (2016)

Abby Lane, instructor (bilingual education, English language learners, migrant education). BA, 1983, California State, Northridge; MEd, 1992, Oregon. (2000)

Audrey Lucero, associate professor (literacy, bilingualism, dual-language schooling), BA, BS, 1996, Boston; MIT, 2002, Seattle; PhD, 2011, Washington (Seattle). (2011)

Lisa A. Mazzei, professor (qualitative research methodology, curriculum theory, whiteness studies). BA, 1983, Marshall; MA, 1984, PhD, 1996, Ohio State. (2012)

Edward M. Olivos, associate professor (bilingual education, Latinos and education, teacher preparation). BA, 1991, MA, 1997, PhD, 2003, San Diego State. (2007)

Robin Patterson, instructor (elementary education, high school special and alternate education, school administration); mid-high practicum placement coordinator. BA, 1982, Oregon College of Education; MEd, 1984, Western Oregon State. (2014)

Jerry L. Rosiek, professor (qualitative research methods, teacher education, critical race theory in education research). BA, 1987, BS, 1988, Texas A & M; PhD, 1997, Stanford. (2005)

Jennifer Ruef, assistant professor (mathematics education, equity, inclusion and social justice). BS, 1990, MS, 2005, Wisconsin, Madison; PhD, 2016, Stanford. (2016)

Leilani Sabzalian, assistant professor (indigenous studies in education, teacher education, elementary social studies). BA, 2001, MEd, 2002, PhD, 2015, Oregon. (2017)

Alison Schmitke, senior lecturer (social foundations of education, social studies curriculum, sports education); director, undergraduate degree program. BA, 1994, Willamette; MEd, 1996, Portland State; PhD, 2008, Alabama. (2006)

Sarah Stapleton, assistant professor (food and environmental justice, social contexts of science and environmental education). BA, 2001, Sweet Briar College; EdM, 2005, Harvard; PhD, 2015, Michigan State. (2015)

Kara Whipple, instructor (special education, social justice and conflict resolution in educational systems). BS, 2000, Delaware; MEd, 2006, MS, 2012, Oregon. (2013)

Emeriti

Juliet "Jill" A. Baxter, associate professor emerita. AB, 1975, MA, 1986, PhD, 1987, Stanford; MA, 1977, Minnesota. (2002)

Edna P. DeHaven, professor emerita. BS, 1951, Oregon College of Education; MEd, 1962, PhD, 1969, Oregon. (1969)

Gary W. Ferrington, senior instructor emeritus. BS, 1964, Portland State; MS, 1967, Southern California. (1967)

M. D. "Mark" Gall, professor emeritus. BA, 1963, MEd, 1963, Harvard; PhD, 1968, California, Berkeley. (1975)

Judith K. Grosenick, professor emerita. BS, 1964, Wisconsin, Oshkosh; MS, 1966, PhD, 1968 Kansas. (1984)

William H. Harris, associate professor emeritus. BA, 1949, Willamette; BS, 1951, MS, 1953, Eastern Oregon; DEd, 1967, Oregon. (1969)

Ray E. Hull, professor emeritus. BS, 1958, MS, 1962, Oregon State; DEd, 1969, Oregon. (1970)

William E. Lamon, associate professor emeritus. BS, 1964, San Francisco; MS, 1965, California State; PhD, 1968, California, Berkeley. (1972)

David G. Moursund, professor emeritus. BA, 1958, Oregon; MS, 1960, PhD, 1963, Wisconsin, Madison. (1967)

Ione F. Pierron, associate professor emerita of librarianship. BA, 1936, Puget Sound; MA, 1955, Minnesota; MS, 1960, Oregon. (1948)

Mildred C. Robeck, professor emerita. BA, 1951, MEd, 1954, PhD, 1958, Washington (Seattle). (1967)

John E. Suttle, professor emeritus. BS, 1948, Texas; MEd, 1952, Colorado; EdD, 1960, Texas. (1959)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Studies

Educational Foundations

The purpose of the educational foundations major is to prepare future professionals in education and related fields: critical thinkers, well-informed about theory and practice, who possess the knowledge and skills to be agents of change in economically, racially, culturally, and linguistically diverse communities. The program focuses on content preparation and provides students with a sophisticated understanding of the intersections of multiple disciplines within larger historical and contemporary themes.

The two-year program, completed during the junior and senior years, prepares undergraduate students for admission into master's-level teacher certification programs or other Graduate School programs such as social work or psychology. The educational foundations major does not result in a teaching license.

Major Requirements

Students planning to major in educational foundations enter the university as education premajors. Transfer students and university students from other majors may become premajors by submitting a Request for Addition or Deletion Major form, available online. Premajors are not eligible to take most 300- and 400-level education courses. Premajor status does not guarantee admission to the educational foundations major.

The major is designed as a two-year program completed during the undergraduate junior and senior year. The major requires core courses in five areas: learning, teaching, and assessment; curriculum theory; technology and education; literacy; and equality of opportunity. Additional courses are required in mathematics, science, and a variety of other subjects, including reading, art, music, and physical education.

¹ Course may be repeated twice in conjunction with registering for an Equal Opportunity course.

Application and Admission

Students must submit a formal application for admission to the major. Application to the major is made before beginning the junior year of study and may be made only during winter term of each academic year. Seniors who transfer from another university or change their major may be admitted but are not guaranteed graduation within one year. Application materials and directions are available on the College of Education website.

Certificate in Educational Foundations—Secondary

UO undergraduates who are preparing for careers as middle or high school teachers major in the subject area they will teach. The certificate in educational foundations—secondary is designed to complement the subject area preparation of undergraduates planning to be middle or high school teachers. The certificate gives future secondary teachers an advantage by giving them the opportunity to develop the knowledge and skills necessary for teaching in the classroom before they enroll in Graduate School. This preprofessional certificate prepares highly competitive students for admission into graduate teacher education programs or other graduate programs in Oregon and around the country.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Graduate Studies

Master of Education in Curriculum and Teaching

Students pursuing a master of education degree (MEd) are admitted to the curriculum and teaching major through the K–12 licensure program, UO Teach, which emphasizes the sociocultural context of teaching and learning, culturally sustaining pedagogy, and supportive learning communities. Completion of the program leads to a teaching license and a master of education degree (MEd) in curriculum and teaching.

The UO Teach program offers general-education specializations in elementary multiple subjects and middle-high school education in the following content endorsement areas:

1. English language arts
2. Social science
3. Science education (biology, chemistry, physics, or integrated general science)
4. Mathematics (advanced and foundational)
5. World languages (French, German, Japanese, Mandarin Chinese, and Spanish)

To ensure all graduates are trained to teach culturally and linguistically diverse youth, both specializations include embedded preparation for the English for Speakers of Other Languages (ESOL) endorsement.

UO Teach is a four-term, full-time program, though students may be accepted for a two-year, part-time program. The graduate program begins in June, preparing students for 34 weeks of progressive field experience in local schools, starting in the fall. It is a cohort-based program (students are taught as a community rather than as individuals) in which students explore approaches to teaching and learning that advance equity and access, value individual student’s strengths, facilitate critical thinking, and reflect culturally responsive methods and practices that serve all learners. Study plans are based on endorsement area sequential courses.

Upon successful completion of related course work, field placement, and licensure requirements, candidates are eligible to apply for a Teacher Standards and Practices Commission Oregon teaching license. The preliminary teaching licenses and subsequent renewals and out-of-state transfers require a College of Education recommendation.

More information on the program is available at the website (<https://education.uoregon.edu/uoteach>).

Application and Admission

The program is competitive, with limited enrollment. Admission criteria include a bachelor’s degree with required content preparation, a 3.00 grade point average (GPA), demonstrated working experience with school-age youth, passing subject-area test scores for Oregon Educator Licensure Assessments (ORELA), a commitment to working with diverse populations, and strong communication skills. See the website for application details.

Master of Science in Curriculum and Teacher Education

Code	Title	Credits
Core Courses		
	Foundations of education courses	8
	Teacher professionalism courses	8
	Research methodology courses	8
Specialization Courses		
	Program courses	16
	Electives	16
Total Credits		56

This program is designed for those who already hold a teaching license but want to build on their knowledge by adding a master’s degree. Study plans are individualized based on an applicant’s educational pursuits. The program accepts applicants on an annual basis. Interested applicants may access the application from October through January 30; the program begins summer session, in June.

Enrollment is limited. Program admission is based on grade point average, recommendations, need in the field, and the results of an interview. See the website (<https://education.uoregon.edu/program/curriculum-and-teachers-education>) for application details.

Application and Admissions

Enrollment is limited. Program admission is based on grade point average, recommendations, need in the field, and the interview. See the website (<https://education.uoregon.edu/program/curriculum-and-teachers-education>) for application details.

English for Speakers of Other Languages (ESOL) Endorsement

English learners and emerging bilinguals face linguistic and cultural barriers when acquiring context knowledge in a mainstream classroom. The add-on endorsements in ESOL and ESOL–bilingual education prepare educators to serve students who enter the public school system with a native language other than English. In addition, this endorsement equips teachers with an awareness of the challenges students face in developing English language proficiency and content simultaneously, and how effective use of culturally relevant materials and teaching strategies can help to counteract this challenge.

Licensed teachers who complete the ESOL program demonstrate the following:

- proficiency in planning, delivery, and assessment of English language development instruction

- knowledge of effective inclusive language development program models
- ability to serve as a resource to classroom teachers to ensure a student's successful transition from an English language development program to mainstream classrooms
- ability to serve as an advocate for emerging bilinguals who supports equity and access in educational settings

ESOL Endorsement Requirements

Code	Title	Credits
Courses		16
Practicum		3
Total Credits		19

The program for the ESOL endorsement requires satisfactory completion of 19 credits, including four courses and a practicum. This endorsement allows licensed teachers to become ESOL specialists.

Students who have completed an ESOL endorsement and are proficient in another language may add the bilingual endorsement by passing the appropriate Oregon Educator Licensure Assessments—National Evaluation Series language test. No course work is necessary for the bilingual endorsement.

Reading Endorsement Requirements

Code	Title	Credits
Courses		16
Practicum		3
Total Credits		19

The reading endorsement is an option available to those who already hold an Oregon teaching license and want to become reading interventionists. The program has a multilingual-multicultural emphasis that offers a linguistically and culturally inclusive approach to literacy education, including attention to the needs of speakers of other languages and nonstandard English. Students complete six courses and a practicum for a total of 27 credits.

The program is designed to provide educators with the fundamental skills and knowledge they need to

- provide intensive, research-based reading intervention to individuals and small groups of children in a classroom setting
- understand student literacy learning and assessment from a variety of disciplinary perspectives, including behavioral, cognitive, linguistic, social-psychological, and cultural
- develop, administer, and interpret a variety of reading-skill assessments
- understand the politics, policies, and practical realities associated with language and literacy in education settings and how these issues affect students

Students complete five courses and a practicum for a total of 19 credits.

Application and Admissions

Applicants must hold a teaching license. Students are admitted on a rolling basis but typically begin the program in summer or fall. For application information and deadlines, visit the website (<https://education.uoregon.edu/program/reading-endorsement>).

Licensure

Licensure programs of the Department of Education Studies meet the requirements for the Oregon Teacher Standards and Practices Commission for a preliminary teacher license in elementary multiple subjects and middle or high school education content areas. Endorsements are available in ESOL and ESOL-bilingual specialization and reading.

Doctor of Philosophy in Critical and Sociocultural Studies in Education

The University of Oregon doctor of philosophy degree (PhD) in critical and sociocultural studies in education is designed to prepare scholars who intend to be active in the professional research association in their field, publish research in peer-reviewed journals and academic presses, secure positions as faculty members at research universities or research centers, or work at state and federal agencies.

The program provides a comprehensive approach to educational research that considers the consequences of contemporary schooling systems while developing alternatives to current practices that result in systemic change. To provide concentrated faculty support and mentorship for each student, only a small cohort of seven to ten students are accepted every other year, with admission in the fall of odd-numbered years.

The course of study includes a strong foundation in both qualitative and quantitative research methodologies. Students also choose a set of courses from two of the following areas to focus their studies:

- cultural and linguistic context of schools
- psychological studies in education
- social context of education
- teacher education

In addition, students complete a supervised research apprenticeship in the second year of study and devise a set of cognate courses in consultation with an advisor.

Admission

The program is small—fewer than 10 students are typically admitted every two years. Applications are accepted from early fall through mid-January for admission in odd-numbered years. The next cohort will be admitted for fall 2019. Application details are available online (<https://education.uoregon.edu/csse>).

Courses

EDST 111. Educational Issues and Problems. 4 Credits.

Examines specific issues and problems confronting educators. Compares and contrasts different approaches to the ways in which society defines and deals with educational issues and problems.

EDST 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

EDST 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

EDST 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable. A recent topic is Exploring Educational Studies.

EDST 220. Beginning Applications in Educational Technology. 4 Credits.

Development of skills and exploration of computer applications useful for communicating in an educational setting.

EDST 225. School and Representation in Film. 4 Credits.

Examines popular culture's influence on schools and teachers along with the various mediating factors such as race, ethnicity, social class, gender, sexuality, religion, and nationality.

EDST 231. Teaching in the 21st Century. 4 Credits.

Exploration of who teachers are and what teachers do in urban, suburban, and rural school settings.

EDST 331. Autobiography of Schooling. 4 Credits.

Through critical autobiographies, case studies, readings and application activities, students examine and reflect on life in classrooms.

EDST 332. Learning, Teaching, and Assessment I. 3 Credits.

Students move beyond their own critical autobiographies of life in classrooms into various disciplinary literatures on learning, teaching, and assessment.

Prereq: EDST 331; coreq: EDST 338.

EDST 333. Learning, Teaching, and Assessment II. 3 Credits.

Focus on specific school subjects that provide a context for examining the basic assumptions underlying teaching, learning, and assessment.

Prereq: EDST 332; coreq: EDST 339.

EDST 338. Observation: Learning, Teaching, Assessment I. 1 Credit.

Students focus on listening to children to better understand how they make sense of school subjects.

Pre- or coreq: EDST 332.

EDST 339. Observation: Learning, Teaching, Assessment II. 1 Credit.

Focuses on developing skills in observation of learning, teaching, and assessments.

Coreq: EDST 333.

EDST 342. Curriculum Studies I. 4 Credits.

Examines basic assumptions underlying curriculum in specific subject areas.

EDST 343. Curriculum Studies II. 4 Credits.

Examines basic assumptions underlying curriculum development in K-12 schools.

Prereq: EDST 342.

EDST 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Exploring Educational Studies, IDEA Reading.

EDST 401. Research: [Topic]. 1-18 Credits.

Repeatable.

EDST 402. Supervised College Teaching. 1-6 Credits.

Repeatable.

EDST 404. Internship: [Topic]. 1-18 Credits.

Repeatable.

EDST 405. Reading and Conference: [Topic]. 1-18 Credits.

Repeatable.

EDST 406. Special Problems: [Topic]. 1-16 Credits.

Repeatable. Recent topics include Educational Foundations.

EDST 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Professional Practices, Education for Minority Students, Reading in the Upper Elementary Grades.

EDST 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

EDST 409. Practicum: [Topic]. 1-18 Credits.

Repeatable. Topics include Integrated Licensure I, II, III.

EDST 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Topics include Foundations of Education, Science and Health Methods, Social Studies and Language Arts Methods.

EDST 411. Childhood Studies. 3 Credits.

Examines child development from within the context of specific development and ecological theories.

EDST 420. Living in a Stratified Society. 4 Credits.

Examines the stratification of wealth, status, and opportunity for advancement in our society.

EDST 422. Technology Education. 4 Credits.

Examines educational technology, including the theoretical, methodological, practical, and policy issues that influence the field.

Prereq: EDST 220.

EDST 440. Physical Education for Diverse Learners. 3 Credits.

Provides a variety of physical education and fitness activities appropriate for children with diverse abilities.

EDST 450. Equal Opportunity: Food and Schools. 3 Credits.

This course focuses on a topic that has typically been omitted from education courses and programs: food. Through this course, we will be thinking about the ways that food intersects with schools, and the implications of this for formal and informal educators.

Prereq: EDST 420 Living in a Stratified Society (4)Co-registered requirement: EDST 458 Equal Opportunity: Field Experience (1, repeatable). All EO courses have this course as a co-registered requirement. Graduate students are not required to complete EDST 558; it is an option.

EDST 451. Equal Opportunity: Ecojustice and Education. 3 Credits.

Examines ways that schools, implicitly and explicitly, teach about the environment and human relationships to the environment.

Prereq: EDST 420; coreq: EDST 458.

EDST 452. Equal Opportunity: Poverty. 3 Credits.

Examines the way poverty structures and mediates educational experiences and influences the educational achievement of students.

Prereq: EDST 420.

EDST 453. Equal Opportunity: Racism. 3 Credits.

Examines the historical development of the concept of race and its role in legitimizing colonization, genocide, and extreme maldistributions of wealth.

Prereq: EDST 420.

EDST 454. Equal Opportunity: Patriarchy. 3 Credits.

Examines the way gender affects educational experiences and influences the educational achievement of students.

Prereq: EDST 420.

EDST 455. Equal Opportunity: Homophobia. 3 Credits.

Examines the way sexuality and sexual identity influence the educational experiences of students.

Prereq: EDST 420. Coreq: EDST 458.

EDST 456. Equal Opportunity: Decolonization. 3 Credits.

Examines educational institutions and their continuing part in larger social processes of colonization and cultural genocide.

Prereq: EDST 420.

EDST 457. Equal Opportunity: Diaspora and Immigration. 3 Credits.

Examines the way educational institutions have responded to human migration generally and to immigrant students specifically.

Prereq: EDST 420

EDST 458. Observation: Equal Opportunity I. 1 Credit.

Engages students in the analysis of specific dimensions of educational opportunity in the field. Repeatable twice for a maximum of 3 credits.

Prereq: EDST 420; coreq: one from EDST 451, 452, 453, 454, 455, 456, 457.

EDST 463. Foundations of Reading. 4 Credits.

Introduction to the various theoretical dimensions of reading and writing that form the foundation for understanding and teaching the complex texts children encounter today.

EDST 464. Multicultural Literacy. 4 Credits.

Introduces preservice teachers to literature written from ethnic, linguistic, social, and cultural perspectives and draws connections to broader cultural, social, historical, economic, and political contexts.

EDST 471. Foundations of Algebra Learning. 4 Credits.

Focuses on the principles underlying the teaching and learning of algebra. Sequence with EDST 472.

EDST 472. Foundations of Geometry Learning. 4 Credits.

Focuses on the principles underlying the teaching and learning of geometry. Sequence with EDST 471.

Prereq: EDST 471.

EDST 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Professional Practices, Education for Minority Students, Reading in the Upper Elementary Grades.

EDST 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

EDST 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Topics include Foundations of Education, Science and Health Methods, Social Studies and Language Arts Methods.

EDST 522. Technology Education. 4 Credits.

Examines educational technology, including the theoretical, methodological, practical, and policy issues that influence the field.

EDST 550. Equal Opportunity: Food and Schools. 3 Credits.

This course focuses on a topic that has typically been omitted from education courses and programs: food. Through this course, we will be thinking about the ways that food intersects with schools, and the implications of this for formal and informal educators.

Optional Coreq: EDST 558

EDST 551. Equal Opportunity: Ecojustice and Education. 3 Credits.

Examines ways that schools, implicitly and explicitly, teach about the environment and human relationships to the environment.

Coreq: EDST 558.

EDST 552. Equal Opportunity: Poverty. 3 Credits.

Examines the way poverty structures and mediates educational experiences and influences the educational achievement of students.

EDST 553. Equal Opportunity: Racism. 3 Credits.

Examines the historical development of the concept of race and its role in legitimizing colonization, genocide, and extreme maldistributions of wealth.

EDST 554. Equal Opportunity: Patriarchy. 3 Credits.

Examines the way gender affects educational experiences and influences the educational achievement of students.

EDST 555. Equal Opportunity: Homophobia. 3 Credits.

Examines the way sexuality and sexual identity influence the educational experiences of students.

EDST 556. Equal Opportunity: Decolonization. 3 Credits.

Examines educational institutions and their continuing part in larger social processes of colonization and cultural genocide.

EDST 557. Equal Opportunity: Diaspora and Immigration. 3 Credits.

Examines the way educational institutions have responded to human migration generally and to immigrant students specifically.

EDST 558. Observation: Equal Opportunity I. 1 Credit.

Engages students in the analysis of specific dimensions of educational opportunity in the field.

EDST 571. Foundations of Algebra Learning. 4 Credits.

Focuses on the principles underlying the teaching and learning of algebra. Sequence with EDST 572.

EDST 572. Foundations of Geometry Learning. 4 Credits.

Focuses on the principles underlying the teaching and learning of geometry. Sequence with EDST 571.

Prereq: EDST 571.

EDST 601. Research: [Topic]. 1-16 Credits.

Repeatable.

EDST 602. Supervised College Teaching. 1-9 Credits.

Repeatable.

EDST 603. Dissertation. 1-16 Credits.

Repeatable.

EDST 605. Reading & Conference: [Topic]. 1-9 Credits.

Repeatable.

EDST 606. Field Studies: [Topic]. 1-9 Credits.

Repeatable.

EDST 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

EDST 608. Workshop: [Topic]. 1-5 Credits.

Repeatable.

EDST 609. Practicum: [Topic]. 1-16 Credits.

Repeatable.

EDST 610. Experimental Course. 1-5 Credits.

Repeatable.

EDST 612. Foundations of Teaching and Learning. 3 Credits.

Provides students with the psychological foundations of teaching and learning.

EDST 614. Cultural Context of Education. 4 Credits.

Examines the cultural foundations of educational practice through a critical review of four decades of ethnographic research on school and student culture.

EDST 616. Language, Power, and Education. 4 Credits.

Examines the politics, policies, and practical realities associated with language and literacy in educational settings and how these issues affect all students to some degree.

EDST 618. Methods ESOL: Teaching English Language Development, K–12. 3 Credits.

Examines best practices of delivering English-language development in light of federal and state standards, including teaching methods, technology, and parental involvement.

EDST 619. Methods: Teaching for Literacy. 4 Credits.

Prepares middle and high school teachers who are expected to teach specific content areas and literacy strategies as part of a reading endorsement. Offered as needed.

EDST 620. Curricular Controversies: Math and Literacy. 4 Credits.

Focuses on the debates that influence, and in some cases overshadow, the teaching of mathematics and literacy from kindergarten to grade 12. Sequence with EDST 621, 640

EDST 621. Methods: Representing Mathematical Concepts. 4 Credits.

Students deepen their content knowledge, widen their understanding of student conceptualizations of mathematics, and reflect on their own mathematics instructional practices. Sequence with EDST 620, 622, 625, 626.

EDST 622. Methods: Mathematical Problem-Solving Curriculum. 4 Credits.

Prepares students to view mathematics as a problem-solving field rather than a set of discrete skills and operational rules. Sequence with EDST 620, 621, 625, 626.

Prereq: EDST 621.

EDST 623. Methods: Representing Science Concepts. 4 Credits.

Examines why science is taught, what science subjects need to be taught, and how science is learned. Sequence with EDST 620, 624, 625, 626.

EDST 624. Methods: Scientific Problem-Solving Curriculum. 4 Credits.

Presents science as a problem-solving field rather than a set of discrete facts and concepts. Introduces scientific literacy as the aim of science teaching. Sequence with EDST 620, 623, 625, 626.

Prereq: EDST 623.

EDST 627. Mgmt: Introduction to Supportive Learning Communities. 1 Credit.

Introduces the teacher candidate to the necessary components for creating supportive and successful classroom communities, including interaction between motivation, "classroom management," and teacher-student relationships. Sequence with EDST 628.

EDST 628. Mgmt: Creating Supportive Classroom Communities. 3 Credits.

Builds on EDST 627 by providing specific research, experience, and strategies for developing classroom environments where student behaviors are focused on learning. Sequence with EDST 627.

Prereq: EDST 627.

EDST 630. Humanities Curriculum and Cultural Conflict. 4 Credits.

Examines the epistemology and conceptions of education that underlie the humanities curriculum at the secondary level. Sequence with EDST 631, 632 (or 633, 634 or 635, 636); 637; 638.

EDST 631. Methods ELA: Representing Literature to Young People. 4 Credits.

Examines why literature is taught and the way teachers represent literary works to students. Sequence with EDST 630, 632, 637, 638.

EDST 632. Methods: Engaging Students in Writing. 4 Credits.

Overview of strategies and tools for engaging students in the writing process. Emphasis on genres of writing and use of technology to enhance student writing. Sequence with EDST 630, 631, 637, 638.

Prereq: EDST 631.

EDST 633. Methods: Representing Second-Language Concepts. 4 Credits.

Provides a research-based foundation for planning, teaching, assessing, and managing second-language learning for the great diversity of students encountered in middle and high school. Sequence with EDST 630, 634, 637, 638.

EDST 634. Methods: Second-Language Conversation and Composition. 4 Credits.

Advanced teaching methodologies, techniques, and skills to effectively promote proficiency and fluency in second languages. Sequence with EDST 630, 633, 637, 638.

Prereq: EDST 633.

EDST 635. Methods: Representing Social Studies Concepts. 4 Credits.

Examines why social studies is taught and the way teachers represent social studies concepts to students. Sequence with EDST 630, 636, 637, 638.

EDST 636. Methods: Social Studies Inquiry and Analysis. 4 Credits.

Explores the theory and practice of teaching social studies as a specialized form of inquiry. Sequence with EDST 630, 635, 637, 638.

Prereq: EDST 635.

EDST 638. Methods ESOL: English Language Learners Pedagogy Humanities. 4 Credits.

Examines a variety of research-based instructional and assessment strategies that support English language learners in meeting the curricular mandates of mainstream language arts and social studies courses. Sequence with EDST 630; 631, 632 (or 633, 634 or 635, 636); 637.

EDST 640. Methods: Constructing Meaning through Literacy. 4 Credits.

Provides concepts and strategies used in teaching children to read. Focuses in particular on instruction for beginning and intermediate readers and writers. Sequence with EDST 641.

EDST 641. Methods: Developing Thoughtful Literary Practices. 4 Credits.

Examines the teaching of reading as a practice filled with cultural meaning, placing reading education in its wider social and cultural context.

EDST 642. Methods: Humanities Pedagogy. 4 Credits.

Explores the application of language arts and social studies methods and strategies for future elementary school practitioners.

EDST 643. Methods: Teaching Mathematics-Facts and Inquiry. 4 Credits.

Focuses on four areas of instruction crucial to becoming a skillful beginning teacher of mathematics. Sequence with EDST 644.

EDST 644. Methods: Teaching Mathematics-Inquiry in Context. 4 Credits.

Investigates techniques and strategies used to effectively teach mathematics and assess students. Sequence with EDST 643.

Prereq: EDST 643.

EDST 645. Methods: Teaching Science-Detail and Discovery. 4 Credits.

Emphasizes science as a process of contemplating, exploring, and raising questions about the world in elementary classrooms.

EDST 646. Methods ESOL: Eng Lang Learners Pedagogy Elementary Classrm. 4 Credits.

Examines a variety of research-based instructional and assessment strategies that support English language learners in meeting the mandates of elementary-level curriculum.

EDST 650. Teacher Education: Policy and Practice. 4 Credits.

Explores the work of contemporary scholars who are attempting to bridge the division between policy and practice in teacher education. Offered alternate years.

EDST 652. Teacher Education: Analyzing Foundational Concepts. 4 Credits.

Examines foundational concepts that shape research and practice in teacher education. Offered alternate years.

EDST 654. Learning and Motivational Sciences. 4 Credits.

Survey of the learning and motivational sciences for advanced graduate students. Offered alternate years.

EDST 660. Urban Schools: History and Politics. 4 Credits.

Examines the historical, economic, political, legal, and social context of contemporary urban schooling systems. Offered alternate years.

EDST 661. Sociology: From Reproduction to Resistance. 4 Credits.

Focuses on the ways schools reproduce, reinforce, and challenge prevailing social, economic, and political relationships. Offered alternate years.

EDST 662. Curriculum Theory: Contesting Educational Content. 4 Credits.

Survey of the history of curriculum theory, the subfield that asks the fundamental question, what is worth teaching? Offered alternate years.

EDST 663. Education and Immigration. 4 Credits.

Examines the way educational institutions have responded to human migration generally and to immigrant students, with an emphasis on bilingual education policy. Offered alternate years.

EDST 666. Thesis Writing. 4 Credits.

Seminar for doctoral students who have advanced to candidacy. Emphasis is on support through the dissertation proposal writing process. Repeatable as needed.

EDST 667. Grant Writing: Finding Funders. 4 Credits.

Provides graduate students with the knowledge and skills needed to write successful grant proposals for research, professional development, and curriculum development projects.

EDST 670. Philosophy of Research. 4 Credits.

Examines the philosophical assumptions that underlie various research methodologies in the human and social sciences.

EDST 673. Advanced Qualitative Methodology: Arts-Based Approaches. 4 Credits.

Examines contemporary reflexive social science research writing, focusing on experimentations with the form used by researchers to communicate insights about human affairs.

Pre- or coreq: EDUC 630, EDUC 632, EDUC 634.

Special Education and Clinical Sciences

Laura Lee McIntyre, Department Head

541-346-1638

541-346-0683 fax

340 HEDCO Education Building

Through teaching, research, and service, the Department of Special Education and Clinical Sciences seeks to improve the quality of education, employment, and community living for children and adults with special needs and their families. The department has three graduate majors: communication disorders and sciences, school psychology, and special education. The department also offers an undergraduate degree in communication disorders and sciences as well as a minor in special education.

Faculty

Richard W. Albin, senior research associate with title of associate professor (research design, programming and instruction, instructional technology). BA, 1969, Rochester; MA, 1973, Illinois; PhD, 1986, Oregon. (1986)

Franklin Bender, clinical assistant professor; clinical supervisor. BS, 1993, MS, 1996, Portland State; MS, 2014, Oregon. (2015)

Ben Clarke, associate professor (math assessment and intervention; school psychology). BS, 1997, Wabash; MA, 2001, PhD, 2002, Oregon (2016).

Jantina Clifford, senior lecturer (developmental screening, instrumental development, personnel preparation). BA, 1985, MA, 1988, MS, 1999, PhD, 2006, Oregon. (2006)

Lauren Cczyk, assistant professor (early language development, Spanish-English dual language development, caregiver-influenced language development). BA, 2004, George Washington; MS, 2007, Arizona State; PhD, year unknown, Temple. (2016)

Stephanie De Anda, acting assistant professor (early language acquisition, bilingualism, language intervention). BS, 2011, California, San Diego. (2017)

Lillian Duran, associate professor. BA, 1995, Antioch College; MA, 1999, George Washington; PhD, 2008, Minnesota, Twin Cities. (2015)

Jessica L. Fanning, associate clinical professor; clinic supervisor. BA, 1989, MA, 1996, Colorado, Boulder; PhD, 2007, Oregon. (2010)

Hank Fien, associate professor (academic intervention and prevention, instructional design, research design). BA, 1992, Glassboro State College; MS, 2002, PhD, 2004, Oregon. (2015)

K. Brigid Flannery, senior research associate with title of associate professor (teacher training, transition issues). BA, 1975, Marian; MEd, 1978, Illinois, Urbana-Champaign; PhD, 1992, Oregon. (1989)

Jeanine Geisler, clinical assistant professor; clinical supervisor. BS, 2007, MS, 2009, Indiana University of Pennsylvania. (2015)

Nicole R. Giuliani, assistant professor (cognitive and affective science, translational neuroscience, obesity prevention), BA, 2003, Pennsylvania; PhD, 2011, Stanford (2016).

Roland H. Good III, associate professor (psychoeducational assessment, multivariate statistics). BS, 1977, MS, 1981, PhD, 1985, Pennsylvania State. (1988)

Beth Harn, associate professor (learning disabilities, assessment, instructional design). BA, 1991, MS, 1994, California State, Fresno; PhD, 2000, Oregon. (2006)

Lisa Hellemn, lecturer (teacher training, supervision); practicum coordinator. BMusEd, 1986, Willamette; PhD, 1991, Oregon. (1993)

Johanna Larson, Mitchell Child-Directed Speech Sign Language Professor; instructor (American Sign Language). BA, 1984, California State, Northridge; MS 2004, Idaho State. (1999)

Sylvia Linan-Thompson, associate professor (learning disabilities, English learners, literacy). BS, 1988, Texas, Austin. MS, 1992, Miami. PhD, 1999, Texas, Austin. (2015)

Wendy Machalicek, associate professor (low-incidence disabilities, autism, early intervention). BS, 2000, North Texas; MEd, 2004, PhD, 2008, Texas, Austin. (2011)

Katie Mason, instructor; clinic supervisor (speech-language pathology). BA, 2003, MS, 2005, Oregon. (2012)

Kent McIntosh, professor (behavior management, research design, applied behavior analysis); director, educational and community supports. BA, 1997, Duke; MS, 2003, PhD, 2005, Oregon. (2012)

Laura Lee McIntyre, professor (developmental disabilities, early intervention, home-school collaboration). BA, 1997, La Sierra; MA, 2000, PhD, 2003, California, Riverside. (2009)

Karen McLaughlin, senior lecturer (anatomy and physiology, aphasia, family advocacy). BA, 1991, Colorado, Boulder; MA, 1996, PhD, 2001, Oregon. (2000)

Jennifer Meyer, associate clinical professor; director, clinic education. BS, 2000, MS, 2002, Southern Illinois. (2010)

Heather Moore, senior lecturer; clinical supervisor. BS, 1992, James Madison; MA, 1997, Georgia; PhD, 2005, Arizona State. (2007)

Christopher J. Murray, professor (secondary special education and transition). BA, 1989, University of Maryland, College Park; MEd, 1992, Howard; PhD, 1998, Washington (Seattle). (2006)

Marilyn A. Nippold, professor (language development and disorders in school-age children and adolescents). BA, 1972, California, Los Angeles; MA, 1976, California State, Long Beach; PhD, 1982, Purdue. (1982)

Elise Peltier, clinical associate professor; clinic supervisor. BA, 1998, Oregon; MS, 2008, Northern Arizona. (2012)

John R. Seeley, professor (emotional and behavioral disorders). BS, 1985, MS, 1991, PhD, 2001, Oregon. (2015)

Stephanie Shire, assistant professor (early intervention, autism spectrum disorders, community-based intervention). BA, 2008, MEd, 2010, Alberta; MA, 2013, PhD, 2013, California, Los Angeles. (2017)

Samantha Shune, assistant professor. (dysphagia, aging). BA, 2005, Michigan, Ann Arbor; MA, 2007, Ohio State; PhD, 2014, Iowa. (2014)

McKay Moore Sohlberg, HEDCO Professor in Communication Disorders and Sciences (cognitive rehabilitation, traumatic brain injury). BA, 1982, Stanford; MS, 1984, PhD, 1990, Washington (Seattle). (1995)

Jane Squires, senior research associate with title of professor (infant development, program evaluation, assessment). BA, 1971, Stanford; MA, 1973, Saint Mary's; PhD, 1988, Oregon. (1988)

Deanne Unruh, research associate (secondary special education and transition, high-risk adolescents, program evaluation). BS, 1985, MS, 1991, Kansas; PhD, 2001, Oregon. (2001)

Valentino Vasquez, instructor (American Sign Language). BA, 1997, MA, 1998, Northern Colorado. (2011)

Angela J. Whalen, clinical associate professor (professional practices in school psychology, clinical supervision, educational assessment and intervention). BA, 1996, St. Thomas; PhD, 2002, Oregon. (2003)

Courtesy

Mallory A. Brown, courtesy research associate (school psychology). BA, 2009, Arizona State; MS, 2013, PhD, 2014, Oregon. (2015)

Matthew H. Kim, courtesy research associate (school psychology, developmental psychology). BA, 2008, New York; MS, 2013, PhD, 2015, Michigan. (2015)

Emeriti

Barbara D. Bateman, professor emerita. BS, 1954, Washington (Seattle); MA, 1958, San Francisco State; PhD, 1962, Illinois; JD, 1976, Oregon. (1966)

Diane D. Bricker, professor emerita. BA, 1959, Ohio State; MS, 1965, Oregon; PhD, 1970, George Peabody. (1978)

Ned J. Christensen, professor emeritus. BA, 1954, MA, 1955, Brigham Young; PhD, 1959, Pennsylvania State. (1962)

Russell M. Gersten, professor emeritus. BA, 1967, Brandeis; PhD, 1978, Oregon. (1977)

Elizabeth G. Glover, assistant professor emerita. BS, 1959, Tufts; MS, 1963, EdD, 1974, North Carolina, Greensboro. (1964)

Robert H. Horner, professor emeritus. BA, 1971, Stanford; MS, 1975, Washington State; PhD, 1978, Oregon. (1976)

Kenneth Viegas, associate professor emeritus. BS, 1956, Oregon; MSW, 1963, California, Berkeley. (1967)

Hill M. Walker, professor emeritus. BA, 1962, Eastern Oregon; MA, 1964, PhD, 1967, Oregon. (1966)

Ruth Waugh, professor emerita. BS, 1957, Southern Oregon State; MS, 1963, PhD, 1971, Oregon. (1963)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Studies

Communication Disorders and Sciences Major

Karen McLaughlin, Director, Undergraduate Studies

541-346-2480
kdurany@uoregon.edu

The undergraduate program for communication disorders and sciences includes courses in basic processes of speech, language, and hearing as well as courses that survey speech, language, and hearing disorders that affect communication across the life span. The undergraduate program prepares students for graduate training in speech pathology or audiology. It also prepares students to work in other fields where knowledge of speech, language, and communication is important, such as early intervention and special education.

Students may earn a bachelor of science (BS) or bachelor of arts (BA) degree with a major in communication disorders and sciences. Both degrees require 60 credits in communication disorders and sciences and related courses and 16 credits in required science and statistics courses. Students must earn a C– or better or P in required courses.

Course work in the major focuses on acquiring knowledge in the following areas:

- anatomical-physiological bases of speech, language, and hearing
- acoustic properties of sound and speech production
- role of biology, cognition, environment, and culture in language acquisition
- development of speech and language
- speech, language, and hearing disorders across the life span
- assessment and treatment procedures for individuals with speech, language, and hearing disorders
- professional issues in speech-language-pathology and audiology

The following program plans contain specific, required major courses in addition to sample courses a student may select to meet other major and university requirements.

Bachelor of Art Requirements

Code	Title	Credits
LING 150	Structure of English Words	4
CDS 201	Communication Disorders in Society and Media	4
CDS 430	Speech Pathology-Audiology as Professions	2
CDS 431	Beginning Clinical Methods	3
CDS 442	Anatomy and Physiology of Speech Mechanism	4
CDS 444	Clinical Phonetics and Phonology	4
CDS 450	Introduction to Language Development	4

Students must meet with the department's undergraduate advisor to develop an academic program plan and ensure that general university requirements and communication disorders and sciences prerequisites are met. Beginning fall term of their junior year, students must follow the program plan of courses in their prescribed sequence. Students who fail to do so will likely delay their graduation date.

The minor in special education is for students who plan to pursue a career teaching in general or special education, are interested in working in nonschool settings with individuals who have disabilities, or want to study issues concerning people with special needs. The minor consists of a core of required course work and electives. Some of these credits

can be applied toward meeting the requirements for an Oregon special educator teaching license.

The requirements for the minor consist of 7 core credits and 17 elective credits. Electives provide students with a breadth of interdisciplinary options. Students may plan a course of study that introduces them to the field of special education and prepares them to begin a licensure program, focusing on classroom settings and specific instructional skills and strategies for teaching students with disabilities. Other major course work such as English, comparative literature, law, journalism, architecture, arts administration, business, or planning, public policy and management may be augmented by completing minor course work focused on broad issues concerning people with disabilities. The option provides an enhanced understanding of perspectives on disability and issues in each student's chosen profession.

Minor Requirements

Code	Title	Credits
Required course credits		7
Electives ¹		17
Total Credits		24

¹ Elective credits will depend on the option chosen.

Application and Admission

Before applying to the minor program, students must complete at least 1 credit of Field Studies: [Topic] (SPED 406) (or have a Petition to Waiver form on file with the minor coordinator), Seminar: [Topic] (SPED 407), and Foundations of Disability I (SPED 411) with a minimum grade of B- or P. Students apply to the department and are assigned a minor advisor, who helps plan a course of study. Applications are available online (https://oregon.qualtrics.com/jfe/form/SV_6tJ9NcbIWGF9E9f).

Certificate in Special Education

Elisa Jamgochian, Program Coordinator
340 HEDCO Education Building
ejamgoch@uoregon.edu
541-346-5185

The department offers a certificate in special education for students who are interested in a career in public education, human services and social work, or a related field. This certificate is designed to provide foundational knowledge about the field of special education and would benefit students interested in a career in supporting students with disabilities in public school, agency, or community settings. The certificate has an emphasis on developing skills and knowledge in three areas: foundations of disability, instructional methods for students with disabilities, and behavioral and social emotional supports for students with disabilities.

The certificate is available to all students interested in working with students and families with disabilities but does not replace formal teacher licensure programs that are available through graduate study at the University of Oregon. Completion of the certificate will, however, waive *some* of the prerequisites for students who enter the graduate special education program, providing certificate recipients an option for an accelerated pathway to licensure in special education and a master's degree.

The certificate requires 31 400-level course credits.

Courses must be taken for a letter grade unless only offered pass/no pass. Graded courses must be passed with a grade of B- or better so

that students are sufficiently prepared to be successful in completing the required practicum experience. If a student receives a grade lower than a B–, the certificate advisor and clinical supervisor will meet to determine if the student has the skills and knowledge to complete the required practicum experience, Practicum: [Topic] (SPED 409).

Students completing this certificate cannot also obtain the minor in special education.

Admissions and Application

Before applying to the certificate program, students must complete at least 1 credit of Field Studies: [Topic] (SPED 406) (or have a Petition to Waiver form on file with the minor coordinator), Seminar: [Topic] (SPED 407), and Foundations of Disability I (SPED 411) with a minimum grade of B– or P.

Applications are available online. Students are asked to submit a professional goal statement, character questionnaire, and two letters of recommendation along with their application. An initial interview and advising meeting with the program coordinator is also required. Admitted students must have a signed program plan and verification of a background check from the Teacher Standards and Practices Commission on file with the coordinator.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Communication Disorders and Sciences

Course	Title	Credits	Milestones

Graduate Studies

Communication Disorders and Sciences

McKay Moore Sohlberg, Program Director

541-346-2586

541-346-6778 fax

HEDCO Education Building, Second Floor

cds@uoregon.edu

education.uoregon.edu/CDS

The graduate program offers master's and doctoral degrees in communication disorders and sciences. The master's program offers all of the courses and clinical experiences required for the American Speech-Language-Hearing Association Certificate of Clinical Competence. The program also offers course work and clinical experiences required to obtain an Oregon teaching license to work in the public schools. The doctoral program emphasizes advanced scholarship in a specialized area of speech-language pathology.

Accreditation

The master's degree program in speech-language pathology is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association (ASHA).

Master's Degree

McKay Moore Sohlberg, Program Director

541-346-2586

541-346-6778 fax

HEDCO Education Building, Second Floor

The master's degree program provides students with the opportunity to acquire and apply knowledge, skills, and competencies necessary for work with individuals of all ages and of varying social, cultural, linguistic, and economic backgrounds who have cognitive communication and/or swallowing disorders.

The communication disorders and sciences degree leads to a master of arts (MA) or master of science (MS) degree. A planned program for the master's degree must be filed with the department secretary.

Students who have fulfilled the undergraduate prerequisites typically spend two fall-through-spring academic years and one summer session completing the degree as a full-time student. Every student completes an evidence-based practice project, equivalent to a master's thesis,

that integrates research and applied clinical experience. A minimum cumulative GPA of 3.00 is required for students to maintain good standing in the program and for graduation.

Application and Admission

On the average, the communication disorders and sciences program admits 30 master's degree applicants each year. Applicants should have a minimum overall GPA of 3.00 with a 3.50 GPA in their major. The Graduate Record Examination is required for admission.

Students for whom English is not a native language must pass the Test of English as a Foreign Language (TOEFL) with a score of 600 or above for the paper version or a score of 100 or above for the Internet-based version. International students who plan to participate in clinical practicums and work toward national certification by the American Speech-Language-Hearing Association must pass the Speaking Proficiency English Assessment Kit (SPEAK) test with a score of 50.

Applications for admission are available online at the communication disorders and sciences website. Application materials must be received by January 15 for entry the following September.

Master of Arts Degree Requirements

Code	Title	Credits
CDS 606	Special Problems: [Topic]	1-3
CDS 607	Seminar: [Topic]	1
CDS 608	Workshop: [Topic] (Evidence-Based Project Research)	3
CDS 609	Practicum: [Topic] (Externship)	1-15

ASHA Requirements

In addition to the core master's degree requirements, additional course work may be needed to fulfill ASHA certification requirements. Of the 50 credits, 36 must be taken at the graduate level.

Doctoral Degree

McKay Moore Sohlberg, Program Director

541-346-2586

541-346-6778 fax

HEDCO Education Building, Second Floor

The doctoral degree (PhD) in communication disorders and sciences emphasizes advanced knowledge, scholarship, leadership, and clinical competence in the areas of speech-language acquisition, speech-language pathology, and assessment and intervention strategies. The doctoral degree program is designed to meet the needs of students from various backgrounds and to train future scholars in the profession.

Doctoral Degree Requirements

Code	Title	Credits
	Dissertation research	18
	Courses in primary area of specialization	21
	Courses in collateral or secondary area	9
	Research methodology	24
	Other required courses	6
Total Credits		78

Options for primary area of specialization include child and adolescent language, early language, swallowing, cognitive rehabilitation, and multicultural issues. The collateral or secondary area may involve courses in more than one academic department. Examples of collateral areas are neuropsychology, linguistics, or developmental psychology. Doctoral students must choose an area of research interest (e.g., single-subject or quantitative methodologies). Other requirements are detailed in the *Doctoral Program Handbook*, available through the program office.

Application and Admission

Students should have a GPA of at least 3.50 and have taken the Graduate Record Examination. Most applicants have a master's degree and their certificate of clinical competence upon admission.

Applications for admission are available online at the Communication Disorders and Sciences website. Application materials must be received by January 15 for entry the following September.

Upon admission and in consultation with the student, an academic advisor is selected, taking into account the student's personal and professional goals. This advisor chairs the student's program committee.

Special Education

John Seeley, Program Director

358 HEDCO Education Building

541-346-3005

jseeley@uoregon.edu

Master's and doctoral degrees are offered under the special education major. The master's specializations include early intervention—early childhood and kindergarten through 12th grade, cross-categorical. The doctoral focus includes emphases in positive behavior support, emotional and behavior disorders, autism and other intellectual and developmental disabilities, learning disabilities, early intervention, English learners, and secondary-transition services.

Graduates attain positions in the United States and abroad working in community- and family-based programs; teaching young children; conducting individual and group intervention programs; managing residential living centers; coordinating in-service training programs; consulting with teachers about educating children with disabilities in general-education classrooms and school settings; conducting research; serving in higher-education faculty positions; working in the administration of special-education programs; and delivering best practices in collaboration with a variety of professions in a range of settings.

Students earn initial teaching credentials in licensure and endorsement programs but can also pursue the master's degree to enhance their skills as early interventionists, special education teachers, or consultants; to work in adult service programs for people with disabilities; or to prepare for the doctoral program.

The doctoral program in special education prepares individuals for research and teaching positions in higher education, research positions with private foundations, administrative positions in school districts and other state educational agencies, and consultation positions in professional education.

Master's Degree

Students may work toward a master of arts (MA), master of science (MS), or master of education (MEd) degree in several areas of special education. For the MA degree the candidate must demonstrate proficiency in a second language. For the MEd degree the candidate must have a valid teaching license and have completed at least one year of successful classroom teaching in the United States.

The program of study leading to the master's degree requires a minimum of 45 credits of graduate work. The program of study includes required core courses, associated field studies, electives, and a terminal project.

Doctoral Degree

The department offers doctor of education (DEd) and doctor of philosophy (PhD) degrees with advanced training in preparation for leadership positions in special education. The program requires approximately 90 credits beyond the master's degree and is designed for full-time students. Typically, students complete the program in four years. Financial assistance is awarded based on the applicant's qualifications. The program uses a cohort model, which students begin fall term.

Applications for Admission

Admissions information and application materials are available on the department's website. Materials also may be requested by telephone, mail, e-mail, or in person from the department office. Master's and doctoral students are admitted fall term. Applications must be received by early December for doctoral applicants and by early May for master's applicants. Priority deadline for application review of master's applicants is early February. See the website for specific program deadlines.

School Psychology

Ben Clarke, Program Director
375 HEDCO Education Building
clarkeb@uoregon.edu
541-346-2156

<https://education.uoregon.edu/program/school-psychology>

The nationally recognized school psychology program offers master's and doctoral degrees and provides service courses to other College of Education and university programs. The doctoral program is accredited by the American Psychological Association Commission on Accreditation (750 First Street NE, Washington, DC 20002-4242, 202-336-5979) and both the MS and PhD programs have approval from the National Association of School Psychologists. Both the master's and doctoral programs are approved by the Oregon Teacher Standards and Practices Commission for the education and licensure of school psychologists in the state.

The program's focus is prevention and early intervention. It prepares psychologists as leaders and innovators who can identify, assess, and remedy the social and educational problems of children and adults. Students are trained to be scientists and practitioners from an ecological, data-oriented perspective.

Each student's program of study is tailored to allow development of individual strengths and interests. Master's and doctoral students take course work in the following general areas: psychological and educational foundations of school psychology: psychometrics, assessment, and research; methods of school-based intervention; professional school psychology; application of research skills; and practicum experiences. Every student must complete a one-year, full-time internship. Doctoral students also complete a supervised college teaching experience.

Graduates of the school psychology program find positions in the United States and abroad, in schools and in other settings. These positions include teaching and providing services at infant, preschool, school-age, and adult levels; conducting individual and group intervention programs; coordinating in-service training programs; consulting with teachers about educating children with disabilities and other at-risk students; conducting research, teaching, and coordinating school psychology training programs in colleges and universities; working in the administration of special education programs; and delivering a range of

psychological and educational services in collaboration with a variety of professionals.

Master's Degree

The master's degree program in school psychology requires a minimum of 92 credits, and typically takes three years to complete, including a sequence of supervised field experiences, practicums, and a 1,200-hour internship. The master's program is approved by the National Association of School Psychologists and the Oregon Teacher Standards and Practices Commission. Graduates of this program meet State of Oregon licensure requirements and are eligible for the nationally certified school psychologist credential offered by the National Association of School Psychologists.

Code	Title	Credits
	Psychological and educational foundations	8
	Measurement and assessment	14
	Statistics and research (course work, participation in a research team, and dissertation research)	11
	Practice of school psychology (teaching, supervision, and practicum experience)	37
	School psychology practicum or internship	22
	Total Credits	92

Doctoral Degree

The doctoral program includes an individualized plan of study with 160 credits minimum, culminating in an original research dissertation, a predoctoral internship, and the doctor of philosophy (PhD) degree. Students may enter the doctoral program with or without a master's degree. Prior graduate course work may reduce the amount of time needed to finish the doctoral program.

The program prepares students to qualify for licensure as a professional psychologist through the state board of psychologist examiners, as well as state certification or licensure as a school psychologist in Oregon and most other states. Students who complete this program are eligible for the nationally certified school psychologist credential offered by the National Association of School Psychologists.

Code	Title	Credits
	Psychological and educational foundations	33
	Measurement and assessment	16
	Statistics and research (course work, participation in a research team, and dissertation research)	49
	Practice of school psychology (teaching, supervision, and practicum experience)	40
	School psychology practicum or internship	22
	Total Credits	160

Application and Admission

Prospective applicants may request detailed admission policies and procedures and applications for admission from the department's student services coordinator, or find them on the program's website. Students are admitted for fall term only.

Applicants are evaluated on

- academic record
- letters of recommendation

- previous related work or experiences
- a statement of purpose in seeking admission
- an interview
- Graduate Record Examinations (GRE) general test scores

Applications and supplemental materials are submitted online. Completed applications must be received by December 15. After initial file screening, finalists will be selected and invited for interviews.

Licensure Programs

The Department of Special Education and Clinical Sciences' licensure programs in early intervention, school psychology, and special education meet requirements of the Oregon Teacher Standards and Practices Commission. The communication disorders program meets the requirements for licensure as a speech pathologist in Oregon. These licenses prepare individuals to work with the full range of students with disabilities from birth through high school. The program prepares graduates to work in direct and indirect roles with students with disabilities in homes, schools, and community-based programs.

Communication Disorders

McKay Moore Sohlberg, Major Director
541-346-2586
541-346-6778 fax
HEDCO Education Building, Second Floor

Early Intervention–Early Childhood Special Education Licensure and Endorsement

Jantina Clifford, Program Coordinator
541-346-2599
jantinac@uoregon.edu

The early intervention special education endorsement program prepares professionals to work with children who have mild to severe disabilities ranging from birth through primary school. The program integrates didactic course work with practical experience. Full-time students can complete the program in four to six terms.

Special Education Licensure

Elisa Jamgochian, Program Coordinator
ejamgoch@uoregon.edu
541-346-5185

The two-year special education licensure and endorsement program prepares preservice or in-service teachers to work with students with disabilities ages three to 21 in a variety of settings, including early childhood–elementary, middle, and high schools. Graduates of the program are prepared to apply for an initial special education teaching license and endorsement across these multiple levels.

The program is designed for

- Individuals who hold a bachelor's degree in any area but want to pursue initial licensure in special education while concurrently completing a master's degree
- Individuals who currently hold a teaching license but want to pursue an add-on special education endorsement

- Individuals pursuing a master's program in an area other than special education who want to combine that degree with course work and experiences in special education

The program prepares professionals to help children and youth with disabilities succeed through rigorous course work and practicum experiences on topics including characteristics of learners and services, advanced assessment techniques, evidence-based approaches to designing and delivering instruction, effective classroom- and behavior-management techniques, collaborative practices, and transition services.

Admissions and Application

The application may be completed on the Graduate School website (https://gradweb.uoregon.edu/online_app/application/guidelines1.asp). This process includes a statement of professional goals and experience, a statement articulating experience working with individuals with disabilities, résumé, letters of recommendation, and transcripts.

Licensing Process

Upon completion of program requirements, graduates of the program are eligible to apply to the Oregon Teacher Standards and Practices Commission for their initial teaching license and/or an endorsement in K–12 special education.

American Sign Language Courses

ASL 101. First-Year American Sign Language. 5 Credits.

Study of basic grammatical structure and vocabulary of American Sign Language, expressive and receptive finger-spelling, and introduction to American deaf culture.

Prereq: WR 122 or WR 123 or HC 221H or HC 231H.

ASL 102. First-Year American Sign Language. 5 Credits.

Increased receptive and expressive communication skills in ASL, and study of cultural values and behavioral rules of the deaf community.

Prereq: C- or better or P in ASL 101 or equivalent.

ASL 103. First-Year American Sign Language. 5 Credits.

Concentration on understanding and acquiring advanced conversational proficiency. Emphasis on ASL classifiers. Continued study of deaf culture as a linguistic minority.

Prereq: C- or better or P in ASL 102 or equivalent.

ASL 201. Second-Year American Sign Language. 4 Credits.

Applied conversational use of ASL through literature, narratives, poetry, and plays. Explores various underlying metaphors found in ASL literature.

Prereq: C- or better or P in ASL 103 or equivalent.

ASL 202. Second-Year American Sign Language. 4 Credits.

Emphasis on more abstract and challenging conversational and narrative ranges. Lab and readings cover historical aspects of deaf community and culture.

Prereq: C- or better or P in ASL 201 or equivalent.

ASL 203. Second-Year American Sign Language. 4 Credits.

Further emphasis on more abstract and challenging conversational and narrative ranges. Explores broader political and social activities of international deaf community.

Prereq: C- or better or P in ASL 202 or equivalent.

ASL 301. American Deaf Culture. 4 Credits.

Study of the relationship between small groups and dominant culture in the United States. Explore issues of language, culture, self-representation, identity, and social structure.

ASL 399. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

Communication Disorders and Sciences Courses

CDS 201. Communication Disorders in Society and Media. 4 Credits.
Survey of communication disorders and differences, comparing individual and social-cultural perspectives through popular media and real case examples.
Prereq: WR 121.

CDS 401. Research: [Topic]. 1-12 Credits.
Repeatable.

CDS 405. Reading and Conference: [Topic]. 1-3 Credits.
Repeatable.

CDS 407. Seminar: [Topic]. 1-3 Credits.
Repeatable.

CDS 409. Practicum: [Topic]. 1-7 Credits.
Repeatable.

CDS 410. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

CDS 430. Speech Pathology-Audiology as Professions. 2 Credits.
Introduces the broad dimensions of the speech-language pathology and audiology professions. Begins undergraduate process of acquiring observation hours required for graduate school. Sequence with CDS 431.

CDS 431. Beginning Clinical Methods. 3 Credits.
Focuses on basic methods for assessment and intervention within an evidence-based framework. Includes fifteen hours of guided observation. Sequence with CDS 430.
Prereq: CDS 430.

CDS 442. Anatomy and Physiology of Speech Mechanism. 4 Credits.
Study of anatomy, physiology, and neurology of speech and language processes.

CDS 443. Acoustics of Speech. 4 Credits.
Acoustic measurement and analysis of sound production and reception in human communication.

CDS 444. Clinical Phonetics and Phonology. 4 Credits.
Focuses on sounds and symbols of American English, foreign accents, and dialects using broad and narrow transcription methods. Presents speech production, distinctive features, and basics of phonology.
Prereq: CDS 442, 450.

CDS 446. Services for Deaf Students. 3 Credits.
Provides understanding of deaf and hard-of-hearing students' educational experiences and includes the cultural, linguistic, social, and pedagogical factors contributing to successful service provision.

CDS 450. Introduction to Language Development. 4 Credits.
Primary focus on the development of phonology, morphology, syntax, semantics, pragmatics, and literacy.
Prereq: LING 150 and WR 122 or 123.

CDS 451. Later Language Development. 4 Credits.
Designed to promote an in-depth study of language development in school-age children, adolescents, and young adults (ages 6–20 years).
Prereq: CDS 450.

CDS 455. Child and Adolescent Development. 4 Credits.
Covers theories, norms, and concepts related to child and adolescent development. Geared toward allied health professionals and educators working in a variety of settings.

CDS 457. Fundamentals of Audiology. 4 Credits.
Anatomy and physiology of hearing and vestibular systems; causes, types, and symptomatologies of hearing impairment.

CDS 458. Audiology Disorders and Treatment. 4 Credits.
Pure tone, speech and impedance audiometry. Special tests, difficult-to-test populations, and central auditory processing. Audiogram interpretation and report writing.
Prereq: CDS 457/557.

CDS 460. Developmental Disorders in Communication. 4 Credits.
Explores growth and developmental disorders that cause or contribute to child and adult speech, language, and fluency impairments.
Prereq: CDS 450.

CDS 462. Acquired Disorders of Communication. 4 Credits.
Explores neurologic disorders that cause or contribute to child and adult speech, language, and voice impairments.
Prereq: CDS 470.

CDS 470. Neuroscience of Speech and Language. 4 Credits.
Foundation in normal neuroanatomy and neurophysiology and the clinical signs observed with nervous-system damage.
Prereq: CDS 442.

CDS 503. Thesis. 1-15 Credits.
Repeatable.

CDS 507. Seminar: [Topic]. 1-3 Credits.
Repeatable.

CDS 510. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

CDS 542. Anatomy and Physiology of Speech Mechanism. 4 Credits.
Study of anatomy, physiology, and neurology of speech and language processes.

CDS 543. Acoustics of Speech. 4 Credits.
Acoustic measurement and analysis of sound production and reception in human communication.

CDS 544. Clinical Phonetics and Phonology. 4 Credits.
Focuses on sounds and symbols of American English, foreign accents, and dialects using broad and narrow transcription methods. Presents speech production, distinctive features, and basics of phonology.

CDS 550. Introduction to Language Development. 4 Credits.
Primary focus on the development of phonology, morphology, syntax, semantics, pragmatics, and literacy.

CDS 551. Later Language Development. 4 Credits.
Designed to promote an in-depth study of language development in school-age children, adolescents, and young adults (ages 6–20 years).

CDS 557. Fundamentals of Audiology. 4 Credits.
Anatomy and physiology of hearing and vestibular systems; causes, types, and symptomatologies of hearing impairment.

CDS 558. Audiology Disorders and Treatment. 4 Credits.
Pure tone, speech and impedance audiometry. Special tests, difficult-to-test populations, and central auditory processing. Audiogram interpretation and report writing.

CDS 560. Developmental Disorders in Communication. 4 Credits.
Explores growth and developmental disorders that cause or contribute to child and adult speech, language, and fluency impairments.

CDS 562. Acquired Disorders of Communication. 4 Credits.
Explores neurologic disorders that cause or contribute to child and adult speech, language, and voice impairments.

CDS 570. Neuroscience of Speech and Language. 4 Credits.

Foundation in normal neuroanatomy and neurophysiology and the clinical signs observed with nervous-system damage.

Prereq: CDS 542.

CDS 601. Research: [Topic]. 1-9 Credits.

Repeatable.

CDS 602. Supervised College Teaching. 1-9 Credits.

Repeatable.

CDS 603. Dissertation. 1-16 Credits.

Repeatable.

CDS 605. Reading and Conference: [Topic]. 1-3 Credits.

Repeatable.

CDS 606. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

CDS 607. Seminar: [Topic]. 1-3 Credits.

Repeatable. Topics include Multicultural Issues in Communication Disorders and Sciences, Dysphagia, Professional Ethics.

CDS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

CDS 609. Practicum: [Topic]. 1-16 Credits.

Repeatable.

CDS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CDS 611. Clinical Methods. 1 Credit.

Provides methodology behind the sound clinical practices and fundamentals of the UO Speech-Language-Hearing Center operations. Prepares students to begin working with clients.

CDS 625. Final Full-Time Practicum. 1-15 Credits.

Diagnostic and treatment experience in the public school setting. Repeatable once for maximum of 30 credits.

CDS 627. Fluency Disorders. 2 Credits.

This course is designed to provide students with a foundation in the diagnosis and treatment of fluency disorders across the lifespan, with an emphasis on developmental stuttering.

CDS 631. Cultural-Linguistic Diversity for Clinicians : [Topic]. 1-3 Credits.

Topics include Multicultural Issues in Communication Disorders and Sciences, Dysphagia, Professional Ethics. Repeatable once for a maximum of 6 credits.

CDS 632. Dual Language Development. 1 Credit.

Discussion-based seminar designed to enhance knowledge of the processes and features of typical and atypical dual language development in children's earliest years of life (infancy to preschool). Focus is on dual language acquisition by children from Spanish-English language backgrounds in the context of the US. Sequence with CDS 633

CDS 633. Practice with Dual Language Learners. 1 Credit.

Discussion-based seminar designed to further foundational knowledge of dual language assessment and intervention as it relates to the practice of speech-language pathology. Focus is on assessment and intervention with dual language learners ages 0-5 from Spanish-speaking language backgrounds in the context of the US. Sequence with CDS 632.

Prereq: CDS 632

CDS 649. Feeding and Swallowing Disorders. 4 Credits.

Nature and characteristics of feeding and swallowing; methods of evaluation and management of feeding and swallowing in adults and children.

CDS 651. School-Age Language Disorders. 4 Credits.

Presents normal language development and language disorders in school-age children and adolescents. Emphasizes contributions from linguistics, psychology, education, and learning theory.

CDS 652. Speech Sound Disorders. 4 Credits.

Causes and consequences of phonological disorders; principles and procedures for assessment and intervention.

CDS 654. Management of Adult Language Disorders. 4 Credits.

Provides a foundation in diagnosis and treatment of adult neurogenic language disorders, concentrating on aphasia and the cognitive-linguistic changes associated with dementia.

CDS 656. Voice Science and Disorders. 3 Credits.

Anatomy and physiology of vocal mechanism; diagnostic and therapeutic approaches for various voice disorders.

CDS 657. Augmentative Procedures for Communication Disorders. 2 Credits.

Recent advancements in design, development, and use of systems supplemental to vocal speech and language.

CDS 660. Motor Speech Disorders. 3 Credits.

Advanced study of speech disorders associated with lesions of central and peripheral nervous systems.

CDS 663. Management of Acquired Cognitive Disorders. 4 Credits.

Examines current theory and practice in cognitive rehabilitation. Reviews models and tools for treating attention, memory, and dysexecutive syndromes.

Prereq: CDS 662.

CDS 665. Language Disorders in Children. 4 Credits.

Child language disorders and related topics, including principles of assessment and intervention, cultural awareness and sensitivity, clinical application, and working with families.

CDS 706. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

CDS 707. Seminar: [Topic]. 1-5 Credits.

Repeatable.

CDS 708. Workshop: [Topic]. 1-16 Credits.

Repeatable.

CDS 709. Practicum: [Topic]. 1-16 Credits.

Repeatable.

CDS 710. Experimental Course [Topic]. 1-5 Credits.

Repeatable.

School Psychology Courses**SPSY 401. Research: [Topic]. 1-12 Credits.**

Repeatable.

SPSY 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

SPSY 406. Special Problems: [Topic]. 1-21 Credits.

Repeatable.

SPSY 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

SPSY 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

SPSY 409. Practicum: [Topic]. 1-21 Credits.

Repeatable.

SPSY 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SPSY 503. Thesis. 1-16 Credits.

Repeatable.

SPSY 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

SPSY 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

SPSY 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SPSY 601. Research: [Topic]. 1-16 Credits.

Repeatable.

SPSY 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

SPSY 603. Dissertation. 1-16 Credits.

Repeatable.

SPSY 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

SPSY 606. Field Studies: [Topic]. 1-9 Credits.

Repeatable.

SPSY 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

SPSY 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

SPSY 609. Practicum: [Topic]. 1-16 Credits.

Repeatable.

SPSY 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SPSY 617. Tests and Measurements in Education. 4 Credits.

Introduction to measurement. Provides a theoretical and practical basis for evaluating and using the wide range of test and measurement data in educational research.

Prereq: undergraduate statistics or educational psychology course or equivalent.

SPSY 626. Final Supervised Field Experience. 1-15 Credits.

Repeatable. Limited to students in school psychology program for basic endorsement for an Oregon license.

SPSY 630. Introduction to Consultation. 3-4 Credits.

Provides students with basic knowledge and skills in the area of school-based consultation.

SPSY 631. Academic and Behavioral Interventions. 4 Credits.

The overall goal for this course is for students to demonstrate a solid understanding of the conceptual, theoretical, and empirical bases for school-based, multi-tiered systems of academic and behavior support.

SPSY 632. Advanced Consultation. 4 Credits.

Develops and refines competencies in school-based consultation, and provides opportunities for students to practice consultation skills.

SPSY 650. Developmental Psychopathology. 4 Credits.

Overview of developmental psychopathology, with emphasis on childhood, adolescence, and early adulthood. Covers phenomenology, etiology, development, classification systems, and prognosis of major psychological disorders.

SPSY 651. Cognitive-Affective Aspects of Behavior. 4-5 Credits.

Examination of cognitive and affective foundations of human behavior. Emphasis on reciprocal influences of cognition and emotion. Selected topics in attention, language, memory, thinking, reasoning. Offered alternate years.

SPSY 652. Biological Aspects of Behavior. 4-5 Credits.

Provides the appropriate background for students to meet biological psychology course work requirement for board licensure as a psychologist.

SPSY 661. Principles and Practices in School Psychology. 4 Credits.

Theory, role, and function of school psychology in its relation to learning and the school setting.

SPSY 662. Foundations of Clinical Supervision. 3 Credits.

Introduction to theory and practice of clinical supervision. Overview of supervision models, factors affecting the supervision relationship, supervision and evaluation techniques, legal and ethical considerations.

SPSY 663. Professional Ethics. 3 Credits.

Focuses on the study of current ethical standards of professional practice for school psychologists and behavior analysts.

SPSY 671. Behavioral Assessment. 4 Credits.

Principles, techniques, and conceptual and practical issues in behavioral assessment; applied aspects include data gathering and interpretation as well as report writing.

SPSY 672. Intellectual Assessment. 4 Credits.

Covers individual assessment of learning aptitude. Includes administering, scoring, and interpreting intelligence tests as well as report writing. Reviews theories of intelligence.

SPSY 674. Educational Assessment. 4 Credits.

Methods of educational assessment designed to develop and evaluate instructional interventions; topics include systematic observations, curriculum-based assessment, and teacher interviews.

SPSY 704. Internship: [Topic]. 1-15 Credits.

Repeatable.

SPSY 706. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

SPSY 709. Practicum: [Topic]. 1-16 Credits.

Repeatable.

Special Education Courses

SPED 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

SPED 401. Research: [Topic]. 1-12 Credits.

Repeatable.

SPED 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

SPED 406. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

SPED 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics include Collaborative Team, Introduction to Talented and Gifted, Introduction to Developmental Disabilities.

SPED 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

SPED 409. Practicum: [Topic]. 1-21 Credits.

Repeatable. Recent topics include Special Education, Talented and Gifted.

SPED 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SPED 411. Foundations of Disability I. 3 Credits.

Categorical and cross-categorical survey of information about exceptional children and youths. Topics include history, etiology, identification, classification, legislation, alternate program delivery systems.

SPED 412. Foundations of Disability II. 3 Credits.

Overview of special education and disability studies; social construction of disability; personal perspectives; societal imagery concerning disability.

SPED 422. Special Education Mathematics Instruction. 4 Credits.

Systematic instruction of mathematics skills for students with disabilities: assessment, planning, curriculum modification, diagnosis and remediation of persistent error patterns, evaluation.

SPED 426. Behavior and Classroom Management. 4 Credits.

Provides behavior management procedures for a variety of educational environments. Emphasizes functional assessment-based behavior support planning, classroom management, and principles of applied behavior analysis.

SPED 431. Introduction to Learning Disabilities. 3 Credits.

Introduces major topics, issues, and trends in learning disabilities. Addresses the history, definitions, etiologies, theories, characteristics, instructional interventions, and service-delivery models.

SPED 432. Introduction to Behavioral Disorders. 3 Credits.

Introduces the characteristics and education of children and youth who have emotional and behavioral disorders.

Prereq: SPED 411.

SPED 436. Advanced Behavior and Classroom Management. 3 Credits.

Emphasizes functional assessment-based behavior support planning, individual education plans (IEPs), and effective behavior support systems for a variety of educational environments.

Prereq: SPED 426.

SPED 440. Early Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for preschool- to early elementary-aged students with disabilities. Sequence with SPED 441, 442, 443.

SPED 441. Intermediate Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for late elementary- to middle school-aged students with disabilities. Sequence with SPED 440, 442, 443.

Prereq: SPED 440.

SPED 442. Adolescent Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for middle school- and high school-aged students with disabilities. Sequence with SPED 440, 441, 443.

Prereq: SPED 441.

SPED 443. Supporting Students with Low-Incidence Disability. 4 Credits.

Provides skills on how to plan, coordinate, deliver, and evaluate evidence-based instruction for students with low-incidence disabilities. Sequence with SPED 440, 441, 442.

Prereq: SPED 442.

SPED 488. Professional Practices: [Topic]. 1-3 Credits.

Helps students critically assess their fieldwork and integrate fieldwork and course work in the wider context of the school experience. Repeatable twice.

Coreq: SPED 406 or 409.

SPED 503. Thesis. 1-9 Credits.

Repeatable.

SPED 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics include Collaborative Team, Introduction to Talented and Gifted, Introduction to Developmental Disabilities.

SPED 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

SPED 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SPED 511. Foundations of Disability I. 3 Credits.

Categorical and cross-categorical survey of information about exceptional children and youths. Topics include history, etiology, identification, classification, legislation, alternate program delivery systems.

SPED 512. Foundations of Disability II. 3 Credits.

Overview of special education and disability studies; social construction of disability; personal perspectives; societal imagery concerning disability.

SPED 522. Special Education Mathematics Instruction. 4 Credits.

Systematic instruction of mathematics skills for students with disabilities: assessment, planning, curriculum modification, diagnosis and remediation of persistent error patterns, evaluation.

SPED 526. Behavior and Classroom Management. 4 Credits.

Provides behavior management procedures for a variety of educational environments. Emphasizes functional assessment-based behavior support planning, classroom management, and principles of applied behavior analysis.

SPED 531. Introduction to Learning Disabilities. 3 Credits.

Introduces major topics, issues, and trends in learning disabilities. Addresses the history, definitions, etiologies, theories, characteristics, instructional interventions, and service-delivery models.

SPED 532. Introduction to Behavioral Disorders. 3 Credits.

Introduces the characteristics and education of children and youth who have emotional and behavioral disorders.

Prereq: SPED 411/511.

SPED 536. Advanced Behavior and Classroom Management. 3 Credits.

Emphasizes functional assessment-based behavior support planning, individual education plans (IEPs), and effective behavior support systems for a variety of educational environments.

Prereq: SPED 426/526.

SPED 540. Early Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for preschool- to early elementary-aged students with disabilities. Sequence with SPED 541, 542, 543.

SPED 541. Intermediate Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for late elementary- to middle school-aged students with disabilities. Sequence with SPED 540, 542, 543.

Prereq: SPED 540.

SPED 542. Adolescent Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for middle school- and high school-aged students with disabilities. Sequence with SPED 540, 541, 543.

Prereq: SPED 541.

SPED 543. Supporting Students with Low-Incidence Disability. 4 Credits.

Provides skills on how to plan, coordinate, deliver, and evaluate evidence-based instruction for students with low-incidence disabilities. Sequence with SPED 540, 541, 542.
Prereq: SPED 542.

SPED 588. Professional Practices: [Topic]. 1-3 Credits.

Helps students critically assess their fieldwork and integrate fieldwork and course work in the wider context of the school experience. Repeatable.
Coreq: SPED 606 or 609.

SPED 601. Research: [Topic]. 1-6 Credits.

Repeatable.

SPED 602. Supervised College Teaching. 1-9 Credits.

Repeatable.

SPED 603. Dissertation. 1-16 Credits.

Repeatable.

SPED 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

SPED 606. Field Studies: [Topic]. 1-6 Credits.

Repeatable.

SPED 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Advanced Applied Behavioral Analysis, Doctoral Orientation, Program Evaluation, Project Aim.

SPED 608. Workshop: [Topic]. 1-10 Credits.

Repeatable.

SPED 609. Practicum: [Topic]. 1-16 Credits.

Repeatable. Topics include Classroom Consultation; College Teaching; Elementary I,II; Program Evaluation; Research.

SPED 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SPED 622. History of Special Education and Disability. 3 Credits.

Historical context for contemporary issues in understanding and supporting the lives of people with disabilities and their families.

SPED 625. Final Supervised Field Experience. 1-15 Credits.**SPED 626. Grant Writing. 1-3 Credits.**

Provides structure and guidance in developing a grant proposal.

SPED 628. Law and Special Education. 3 Credits.

Knowledge of current case law and legislation, sensitivity to legal issues, application to legal principles related to special education services in school settings.

SPED 632. Collaborative Educational Planning. 3 Credits.

Collaborating to identify unique needs of individuals with disabilities and establish legally correct, educationally useful IEPs, and to use knowledge of effective interventions to meet needs.

Prereq: SPED 628 or equivalent.

SPED 633. Transition Planning and Instruction I. 3 Credits.

Focuses on preparing youth for postsecondary education and training. Development of skills for using assessment-planning and content-instruction strategies to assist students with disabilities. Sequence with SPED 634.

SPED 634. . 3 Credits.

Focuses on strategies for improving employment and independent-living skills; using individualized assessment and planning strategies, curriculum and instructional strategies, and program delivery to assist students with disabilities. Sequence with SPED 633.

SPED 655. Supervised Field Experience. 3-9 Credits.

Repeatable. Provides practical experience in teaching students with disabilities in a public-school setting under the direction of cooperating teachers and university supervisors.

SPED 660. Design of Instruction. 4 Credits.

Design, development, and evaluation of instructional materials for children with disabilities. Emphasis on analysis and construction of instructional sequences for various learning tasks.

SPED 680. Foundations in Early Childhood and Early Intervention. 3 Credits.

Conceptual underpinnings and practical application of an approach to early intervention that links assessment, intervention, and evaluation.

SPED 681. Family-Guided Early Intervention. 3 Credits.

Covers procedures for family assessment, intervention, and evaluation. Addresses adult communication and management strategies.

SPED 682. Assessment and Evaluation. 3 Credits.

Presents assessment and evaluation materials used in early intervention programs and provides methods for using these materials.

SPED 683. Curriculum in Early Childhood and Early Intervention. 3 Credits.

Presents curricular materials covering development from birth to six years. Discusses procedures for use and modification.

SPED 684. Applications of a Linked System I. 2 Credits.

Provides opportunities for students to implement activities in a linked approach to early intervention services; foundation for an understanding of the components of a linked system. Sequence with SPED 685.

SPED 685. Applications of a Linked System II. 1 Credit.

Examines the components of a linked system, how they influence one another, and how they are implemented within a best-practices model for early intervention—early childhood special education. Sequence with SPED 684.

Prereq: SPED 684.

SPED 686. Autism in Early Intervention. 2-3 Credits.

Information is given regarding the etiology of autism, diagnostic/evaluation procedures and current evidence-based strategies for supporting young children with autism spectrum disorder and their families.

SPED 687. Early Intervention Methods I. 1-3 Credits.

Provides practical information for conducting program-relevant assessments using curriculum-based assessment tools and for developing individualized family service plans.

SPED 688. Early Intervention Methods II. 1-3 Credits.

Provides opportunity to develop effective intervention skills to use with young children who are at risk and disabled and with their families.

SPED 689. Early Intervention Methods III. 1-2 Credits.

Focuses on advanced methods in early intervention, including special handling and management techniques.

SPED 690. Early Intervention Methods IV. 1-2 Credits.

Develops advanced intervention skills to use with young children who are at risk and disabled and with their families.

SPED 706. Special Problems: [Topic]. 1-6 Credits.

Repeatable.

SPED 707. Seminar: [Topic]. 1-5 Credits.

Repeatable.

SPED 708. Workshop: [Topic]. 1-6 Credits.

Repeatable.

SPED 709. Practicum: [Topic]. 1-6 Credits.
Repeatable.

School of Journalism and Communication

Juan-Carlos Molleda, Dean

217 Allen Hall
1275 University of Oregon
Eugene, Oregon 97403-1275

The School of Journalism and Communication offers programs leading to bachelor's, master's, and doctoral degrees.

Undergraduate students major in the following: journalism, journalism: advertising, journalism: media studies, or journalism: public relations. The school also offers a minor in media studies and participates in four interdisciplinary programs: the major in cinema studies, the major in general social science, the certificate in film studies, and the minor in multimedia.

Master's degree majors are advertising and brand responsibility, journalism, media studies, multimedia journalism, and strategic communication.

The doctoral program in media studies develops scholars and teachers who can critically examine questions of communication and society from many perspectives.

The school, which started as a department in 1912 and became a professional school in 1916, is one of the oldest journalism schools in the United States and one of the most broadly conceived. It is accredited by the national Accrediting Council on Education in Journalism and Mass Communications.

The school's faculty members are scholars and researchers who combine academic background with professional experience in their teaching fields. Among them are copywriters, designers, and advertising agency executives; newspaper reporters and editors; public relations executives; broadcast journalists and documentarians; communication researchers; photojournalists; magazine writers and editors; Pulitzer Prize winners and Page Legacy Scholars; *New York Times* columnists; and award-winning researchers. The faculty's influence extends beyond the university campus through scholarly and professional publication, consulting, creative design, documentary filmmaking, radio and multimedia production, and textbooks and trade books in such areas as advertising, language skills, ethics, literary nonfiction, international public relations, information gathering, media criticism and history, reporting, visual communication, political communication, public relations writing, graphic arts, magazine writing, and public broadcasting.

The school's George S. Turnbull Portland Center at the White Stag Block offers a gateway to the state's media center. Academic programs include the Portland-based master's degree programs in multimedia journalism and strategic communication, public lectures, Internet programs, regional and national academic conferences, and professional development programs. The Turnbull Center is also home to the school's scholastic journalism outreach coordinator and executive director of the Northwest Scholastic Press. Current information on the center's programs is available on the school's website (<http://journalism.uoregon.edu>).

The school also has the Portland Experience, a yearlong program offering internships in media and communication fields that can

provide students with valuable professional experience in the Portland metropolitan area.

General Information

The School of Journalism and Communication occupies Eric W. Allen Hall, named in memory of the school's first dean. Allen Hall underwent a major renovation in 2012 that updated all facilities and added 18,000 square feet of space. Included in the renovation is an open and collaborative digital commons that provides students with 24-hour access to the school's computer labs during academic terms. Fully equipped laboratories support writing, editing, design, video and audio, digital photography, mobile media, and web production. The school's Carolyn S. Chambers Electronic Media Center houses video and audio production facilities, and the Student Services Center supports academic-, internship-, and career-advising services for journalism and communication students. Seminars, meetings, and special events are held in the Hall of Achievement, which honors more than fifty distinguished alumni and faculty members of the school. The atrium is filled with course-related activities, student meetings, and special events throughout the year. The school receives the newspaper services of the Associated Press. Knight Library, the main branch of the university's library system, houses an extensive collection of the literature of journalism and communication.

Diversity and Freedom of Expression

The goal of building greater social, political, cultural, economic, and intellectual diversity among students and members of the faculty and staff as well as in our curriculum, public scholarship, and communities is central to the school's mission: to prepare professional communicators, critical thinkers, and responsible citizens for a global society. The promotion and practice of freedom of expression and intellectual inquiry across an evolving media environment are integral to the school's long and proud tradition of academic excellence. Discrimination of any kind, disrespect for others, or inequity in educational opportunity are unacceptable.

Code of Conduct

Students enrolled in the School of Journalism and Communication as well as its faculty, staff, and administrators are expected to meet the highest standards of conduct as defined in the school and university codes of conduct and relevant professional codes of ethics. The school reserves the right to deny admission or graduation of a student found to be in violation of these codes.

Minor in Multimedia

Through the multimedia minor, undergraduates study print, time-based, and interactive digital arts; web programming, digital imaging, writing for multimedia, and digital audio and sound design. The interdisciplinary program spans the School of Art and Design, Department of Computer and Information Science, School of Journalism and Communication, and the School of Music and Dance.

More information is available in the Minor in Multimedia section of this catalog under the Department of Art (p. 656).

Certificate in Film Studies

School of Journalism and Communication courses on media production and industries, film history, music, genres, and other topics emphasizing

the aesthetic aspects of film may be applied to the requirements for the certificate in film studies.

More information is available in the Cinema Studies Program (p. 134) section of this catalog under the **College of Arts and Sciences**.

General Social Science Major

Courses from the School of Journalism and Communication and other professional schools can apply to the multidisciplinary major in general social science.

More information is available in the General Social Science Program (p. 285) section of this catalog under the **College of Arts and Sciences**.

Digital Technical Services

Students have access to technical support for computer issues at the help desk in 319 Allen Hall. In 113 Allen Hall, video and photo production equipment is available for checkout to students enrolled in designated courses in those areas.

The School of Journalism and Communication expects students to have regular and reliable access to a laptop computer. Instructors specify technology expectations on the first day of class, in the class syllabus, or both. Some instructors require a laptop for the entire class or just part of the class; some require that no laptops be present in class.

Scholarships

More than \$500,000 in scholarships, ranging from \$300 to \$10,000, are offered by the School of Journalism and Communication with the support of endowments and contributions. Applications are available on the school's website.

Undergraduate Student Services

Information about undergraduate admission and degree requirements, advising materials, sample programs, internships, and careers is available on the school's website. The office of the director of student services is in 134 Allen Hall.

Graduate Programs Manager

Information about graduate admission and degree requirements is available on the school's website. The office of the graduate programs manager is 214A Allen Hall.

Faculty

Jesse Abdenour, assistant professor (news processes and production, documentary, investigative journalism). BS, 1999, Ohio; MA, 2010, Arkansas; PhD, 2015, North Carolina. (2015)

Shan Anderson, senior instructor (advertising, digital publishing, visual design). BFA, 1991, Oregon. (2014)

Steven Asbury, instructor (visual communications, design, advertising). BS, 1997, Oregon. (2014)

Thomas H. Bivins, John L. Hulteng Chair in Media Ethics and Responsibility; professor (communication ethics, communication history). BA, 1974, MFA, 1976, Alaska, Anchorage; PhD, 1982, Oregon. (1985)

Marquis E. Blaine, professor of practice (multimedia journalism, feature writing). BJ, 1993, Missouri, Columbia; MS, 2000, Oregon. (2003)

Charles Butler, instructor (magazines, narrative nonfiction, sports journalism). BA, 1985, MS, 1999, Columbia. (2016)

Carl R. Bybee, associate professor (communication and democracy, cultural studies, communication studies). BA, 1973, MA, 1976, PhD, 1978, Wisconsin, Madison. (1982)

Christopher Chávez, associate professor (advertising, popular culture, media studies and globalization). BS, 1993, California State Polytechnic, Pomona; MA, 1995, MA, 2006, PhD, 2009, Southern California. (2012)

Dayna Chatman, assistant professor (race, gender, and media; television studies; social media). BA, 2005, Saint Mary's College of California; MA, 2012, Illinois, Chicago; MA, 2013, PhD, 2016, Southern California. (2018)

Amanda Cote, assistant professor (media studies, identity, game studies). BA, 2010, Virginia; PhD, 2016, Michigan, Ann Arbor. (2018)

Patricia A. Curtin, professor (international public relations, research methods, culture and identity); associate dean, undergraduate affairs. AB, 1977, Earlham College; MA, 1991, PhD, 1996, Georgia. (2006)

Nicole Smith Dahmen, associate professor (visual communication). BGS, 1997, MMC, 2001, Louisiana State; PhD, 2007, North Carolina, Chapel Hill. (2014)

Donna Davis, associate professor (strategic communication, public relations, virtual worlds); director, Strategic Communication Program. BA, 1981, MS, 2005, PhD, 2010, Florida. (2011)

Andrew DeVigal, professor of practice (media innovation, community engagement, experience design); Chair in Journalism Innovation and Civic Engagement. BS, 1993, San Francisco. (2014)

Troy R. Elias, assistant professor (advertising, race and ethnicity, information and communication technology). BS, 2004, Claflin; MA, 2006, PhD, 2009, Ohio State. (2014)

Maxwell Foxman, assistant professor (game studies, gamification, immersive media). BA, 2007, Columbia; MA, 2012, New York; MPhil, 2015, PhD, 2018, Columbia. (2018)

Timothy W. Gleason, professor (communication ethics, communication law, news-editorial). BA, 1980, State University of New York, Empire State; MA, 1983, PhD, 1986, Washington (Seattle). (1987)

Lisa Heyamoto, senior instructor (feature writing, multimedia journalism, magazine production); coordinator, Gateway to Media Program. BA, 2001, Washington (Seattle); MS, 2011, Oregon. (2012)

Torsten Kjellstrand, professor of practice (photojournalism, multimedia and visual journalism). BA, 1984, Carleton College; MA, 1997, Missouri, Columbia. (2013)

David Koranda, professor of practice (advertising campaigns, media planning, strategic planning). BA, 1970, Wilkes; BS, 1978, Oregon. (2001)

Kathryn Kuttis, instructor (cultural and media studies, visual design, representation). BA, 1995, Drew; MLA, 2010, Oregon. (2014)

Peter D. Laufer, James N. Wallace Chair of Journalism: News-Editorial; professor (long-form journalism, radio journalism, international journalism). MA, 1986, American; PhD, 2009, Leeds Metropolitan. (2010)

Regina Lawrence, professor (political communication, civic engagement, journalism innovation); director, George S. Turnbull Portland Center and Agora Journalism Center. MA, Colorado, 1996; PhD, Washington, 1996. (2015)

Taeho Lee, assistant professor (strategic communication, communication ethics, media law). BA, 2005, Seoul National; JD, 2009, Emory; PhD, 2017, North Carolina, Chapel Hill. (2017)

Seth C. Lewis, Shirley Papé Chair in Emerging Media; associate professor. BS, 2002, Brigham Young; MBA, 2005, Barry; PhD, 2010, Texas, Austin. (2016)

Ed Madison, associate professor (multimedia journalism, digital publishing, media entrepreneurship). BS, 1979, Emerson College; PhD, 2012, Oregon. (2012)

Scott R. Maier, professor (investigative journalism, computer-assisted reporting, quantitative methods); director, journalism area. BA, 1977, Oberlin; MA, 1989, Southern California; PhD, 2000, North Carolina, Chapel Hill. (2000)

David Markowitz, assistant professor (language, deception, computational social science). BSc, 2010, MSc, 2015, Cornell; PhD, 2018, Stanford. (2018)

Gabriela Martinez, professor (electronic media, international communication, Latin American studies); director, Journalism Master's Program. BA, 1999, MA, 2000, San Francisco State; PhD, 2005, Oregon. (2005)

Kelli I. Matthews, senior instructor (public relations, strategic communication, social media). BA, 2001, MA, 2004, Oregon. (2011)

Tom McDonnell, instructor (advertising). BS, 1982, Oregon. (2014)

Debra L. Merskin, professor (communication studies; gender, race, and media; media and society). BA, 1983, South Florida, Tampa; MLA, 1989, South Florida, St. Petersburg; PhD, 1993, Syracuse. (1993)

Todd Milbourn, instructor (investigative reporting, journalism innovation, news literacy). BA, 2001, Minnesota, Minneapolis; MBA, 2014, Oregon. (2016)

Daniel L. Miller, associate professor (video production, documentary film and video). BS, 1983, MS, 1986, PhD, 1994, Oregon. (2001)

Juan-Carlos Molleda, professor; Edwin L. Artzt Dean. BS, 1990, Zulia; MS, 1997, Radford; PhD, 2000, South Carolina. (2016)

Daniel D. "Dan" Morrison, senior instructor (photojournalism, multimedia and visual journalism). BA, 1984, MPA, 1994, Texas, Austin. (2010)

Deborah K. Morrison, Carolyn Silva Chambers Distinguished Professor in Advertising (advertising and brand creativity, creative process, social responsibility); director, Advertising Area. BJ, 1978, Sam Houston State; MA, 1984, PhD, 1988, Texas, Austin. (2006)

Dean E. Mundy, associate professor (public relations, media framing). BA, 1996, MA, 2006, PhD, 2010, North Carolina, Chapel Hill. (2014)

Courtney Munther, instructor (nonprofit communication, fundraising, strategic public relations writing). BA, 2004, Smith; MA, 2012, Nebraska, Lincoln. (2014)

Seungahn Nah, professor (political communication, journalism sociology, global communication); associate dean, graduate affairs. BA, 1997, MA, 1999, Yonsei; PhD, 2006, Wisconsin, Madison. (2017).

Julianne H. Newton, professor (visual communication, photojournalism, communication ethics). BA, 1970, Baylor; MA, 1983, PhD, 1991, Texas, Austin. (2000)

Sylvester Senyo Ofori-Parku, assistant professor (consumer insights and strategy, corporate sustainability, consumer behavior). BA, 2003, Cape Coast; MA, 2010, Ghana; PhD, 2015, Oregon. (2017)

Sung J. Park, senior instructor (photojournalism, multimedia journalism). BS, 1991, MFA, 2010, Syracuse. (2010)

Donnalyn Pompper, professor (public relations, corporate social responsibility, critical race and feminist studies). BA, 1983, Rowan; MJ, 1994, PhD, 2001, Temple. (2017)

Wes Pope, associate professor (multimedia journalism). BA, 1996, Washington (Seattle); MA, 2010, Syracuse. (2012)

Damian Radcliffe, Carolyn S. Chambers Professor in Journalism; professor of practice (community journalism, trends in social media and technology, media business models). BA, 1998, MA, 2009, Oxford. (2015)

John T. Russial, associate professor (news-editorial, organizational change, technology studies). BA, 1973, Lehigh; MA, 1975, Syracuse; PhD, 1989, Temple. (1992)

Biswarup "Bish" Sen, associate professor (communication studies, global media, television studies). BA, 1975, St. Xavier's College, Kolkata; MA, 1982, Ohio State; PhD, 1990, Illinois, Urbana-Champaign. (2010)

Autumn Shafer, assistant professor (health communication, communication campaign testing and evaluation, media psychology). BA, 2000, MA, 2003, Washington State; PhD, 2011, North Carolina, Chapel Hill. (2015)

Kim Sheehan, professor (advertising, consumer research and behavior, sustainability communication); coordinator, Honors Program. BS, 1980, Northwestern; MBA, 1993, Boston University; PhD, 1998, Tennessee, Knoxville. (1998)

Lori Shontz, senior instructor (writing and reporting, sports journalism, community engagement). BS, 1991, MEd 2013, Pennsylvania State. (2014)

Hollie Smith, assistant professor (science and environmental communication). BS, 2007, Southern Utah; MA, 2010, Washington State; PhD, 2014, Maine. (2018)

Gretchen Soderlund, associate professor (media history, gender and media). BA, 1993, Virginia Commonwealth; PhD, 2002, Illinois, Urbana-Champaign. (2013)

H. Leslie Steeves, professor (diversity and media, development communication and social change); senior associate dean, academic affairs. BS, 1971, Vermont; MS, 1974, PhD, 1980, Wisconsin, Madison. (1987)

Brent Walth, assistant professor (journalism). BS, 1984, Oregon; MFA, 2012, Warren Wilson College. (2007)

Janet Wasko, Philip H. Knight Chair; professor (communication studies, political economy of communication); director, media studies. BA, 1973, MA, 1974, California State; PhD, 1980, Illinois. (1986)

Kyu Ho Youm, Jonathan Marshall First Amendment Chair; professor (communication law, international law, news-editorial). BA, 1980, Konkuk; MA, 1982, PhD, 1985, Southern Illinois; MSL, 1998, Yale; MSt, 2006, Oxford. (2002)

Emeriti

Charles F. Frazer, professor emeritus. AB, 1968, Rutgers; MA, 1972, Fairfield; PhD, 1976, Illinois. (1990)

Lauren J. Kessler, professor emerita. BSJ, 1971, Northwestern; MS, 1975, Oregon; PhD, 1980, Washington (Seattle). (1980)

Ann C. Maxwell, associate professor emerita. BA, 1973, MA, 1975, California State, Fullerton; PhD, 2008, Pacifica Graduate Institute. (1986)

Duncan L. McDonald, professor emeritus. BS, 1966, Ohio; MS, 1972, Oregon. (1975)

Karl J. Nestvold, professor emeritus. BS, 1954, Wyoming; MS, 1960, Oregon; PhD, 1972, Texas, Austin. (1961)

Jon Palfreman, professor emeritus. BS, 1971, University College, London; MS, 1972, Sussex; PhD, 2005, Glamorgan. (2006)

Stephen E. Ponder, associate professor emeritus. B.A., 1964, Washington (Seattle); MA, 1975, George Washington; PhD, 1985, Washington (Seattle). (1985)

Deanna M. Robinson, professor emerita. BA, 1964, MA, 1972, PhD, 1974, Oregon. (1976)

William E. Ryan II, associate professor emeritus. BA, 1964, Loras; MA, 1975, EdD, 1991, South Dakota. (1987)

Ronald E. Sherriffs, professor emeritus. BA, 1955, MA, 1957, San Jose State; PhD, 1964, Southern California. (1965)

James R. Upshaw, professor emeritus. BA, 1962, San Diego State. (1992)

William B. Willingham, associate professor emeritus. AB, 1957, MA, 1963, Indiana. (1965)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Communication Ethics

Graduate Certificate in Communication Ethics

Any student who is unconditionally admitted to the Graduate School may earn a certificate in communication ethics as an enhancement to a graduate degree. However, the certificate may be of particular interest to the journalism school's graduate students.

The certificate program is designed to provide students with the ability to apply and teach both theoretical and applied ethical decision-making strategies covering a variety of media—from print and broadcast journalism to advertising and public relations, including both message

construction and the multiple delivery systems associated with the modern mass media (print, broadcast, electronic, and digital).

Students should be able to fulfill the program requirements within a two-year period, normally in conjunction with their primary graduate emphasis.

Communication Ethics Graduate Certificate Requirements

Code	Title	Credits
J 644		4
Select three of the following: ¹		12
J 512	Issues in Communication Studies: [Topic]	
J 596	Communication Ethics and Law: [Topic]	
J 646	Political Economy of Communication	
J 648	Cultural Approaches to Communication	
J 649	International Communication	
Approved courses in other departments ²		8
Other journalism or outside courses ^{3,4}		4
Total Credits		28

- Students, particularly at the doctoral level, are encouraged to make the 600-level courses a priority. The following list represents courses that have been identified as having a strong or exclusive focus in communication ethics, including topics highly relevant to ethics study.
 - Issues in Communication Studies: [Topic] (J 512) (Communication and Democracy)
 - Communication Ethics and Law: [Topic] (J 596) (Ethics of Strategic Communication; Persuasion and Ethics; Photo Fiction; Visual Truth)
 - Political Economy of Communication (J 646)
 - Cultural Approaches to Communication (J 648)
 - International Communication (J 649)
- Approved courses are decided in consultation with the student's certificate advisor and are based on relevance to the particular interest area of the student (e.g., political communication, environmental communication, philosophy). The advisor consults with the course instructor before approving a course. Ultimately, program coherence is gained through the core offerings in the school, but may be greatly enhanced through careful choices of outside course work. In most cases, courses in the philosophy department are encouraged as outside choices.
- No more than 4 credits of Reading and Conference: [Topic] (J 605) may be applied to the certificate.
- All students pursuing the communication ethics certificate (except PhD students in journalism) must take Mass Communication and Society (J 611). However, it does not count toward the 28 credits required for the graduate certificate.

Additional Requirement

Course work must be taken for letter grades.

The required journalism courses from which students select two courses are generally taught at least once a year. Substitutions may occur if courses are not available. Other, relevant courses may also be substituted for courses on this list as they are developed or are considered germane to an individual student's program.

Application

For more information on the program and application procedure, contact Tom Bivins, John L. Hulteng Chair in Media Ethics and Responsibility, 541-346-3740, tbivins@uoregon.edu.

Journalism

The University of Oregon undergraduate program is based on the premise that the best professional communicator is broadly educated. In accordance with national accrediting standards, students must take at least 104 credits in courses outside the School of Journalism and Communication. A maximum of 76 credits in the 180-credit undergraduate program may be in journalism and communication courses. Students learn about media practice and effects. They study the role of the media in society, the history of journalism, visual communication, the ethics of media practices, the economics of the media, new media technologies, international communication, diversity in the media, and the legal and social responsibilities of the media.

In addition, undergraduates take three courses that provide a broad background in fundamental skills and concepts: Gateway to Media (J 211) (8 credits), Writing for Communicators (J 212) (4 credits), and Fact or Fiction (J 213) (4 credits). These courses immerse students in writing for varied platforms and styles, ground them in the fundamentals of digital storytelling development and delivery, and aid them in developing critical thinking skills, providing majors with a foundational set of competencies before they move on to more specialized courses in their major areas of study.

Majors are required to minor in a field outside of the School of Journalism and Communication. Preparation in a second field is a valuable addition to a student's education and enhances employability.

Many students are active in campus affairs, working for the campus newspaper; the university's radio station; the student-run advertising, design, video, and public relations agencies; the award-winning *Flux* and *Ethos* magazines; television and online programs; and alternative and online publications, including *OR Magazine*, the first student-produced iPad publication. The school also encourages them to participate in UO chapters of Ed on Campus, Ad Society, National Broadcasting Society, National Press Photographers Association, Public Relations Student Society of America, Society of Professional Journalists, and such national venues as the One Club for Art and Copy. Internships are encouraged and available at newspapers, magazines, broadcast stations, advertising agencies, public relations offices, nonprofit organizations, government offices, video production firms, online publications, and public policy offices.

The best preparation for journalism majors is a broad college-preparatory program with emphasis on language skills, English literature, economics, history, and the political and social sciences. Prospective students also benefit from the study of mathematics, statistics, computer applications, and second languages.

Community college students planning to transfer to the School of Journalism and Communication should concentrate on college-transfer courses that fulfill university requirements. Almost all professional courses are taken at the School of Journalism and Communication. Advising material is available to community college students online.

- Bachelor of Arts
- Bachelor of Science

Undergraduate Studies

The role of the school's undergraduate program is to provide students with the creative, critical, and problem-solving skills they need to become ethical, professional communicators and critical media consumers.

Premajor Admission

New students planning to major in journalism enter the university as premajors and do not need to meet special admission requirements beyond the general university requirements.

Each premajor is assigned to a journalism and communication advisor who assists in planning programs, answering questions, and tracking progress toward admission as a major and toward graduation. Students should check with an advisor at least once a year to ensure that requirements are being met. In addition, students will be assigned a faculty advisor, who will guide them through the portfolio process. The director of student services for the school supervises undergraduate academic advising.

A university student in another major may switch to a journalism premajor online on the School of Journalism and Communication website. To become a premajor, a student must have a minimum cumulative grade point average (GPA) of 2.00 for all work at the University of Oregon.

Premajor Program

Students must complete the school's premajor core curriculum, and earn grades of C or better:

Code	Title	Credits
J 100	Media Professions	2
J 101	Grammar for Communicators	2
J 201	Media and Society	4
Total Credits		8

Admission as a Major

Admission to the School of Journalism and Communication is competitive. The faculty considers applications from premajor students who have

- completed 24 or more graded credits of course work at the University of Oregon, earning a cumulative UO GPA of at least 2.90
- completed College Composition I (WR 121) and College Composition II (WR 122) or College Composition III (WR 123) with grades of P or C– or better
- completed the school's premajor core curriculum

A student's GPA is a major factor in the admissions decision. Students with a GPA of 3.25 or higher are guaranteed admission to the major.

Applicants with grade point averages between 2.90 and 3.24 are evaluated and judged competitively by an admissions committee as applications are received. The admissions committee considers the requirements listed above and other materials that applicants submit, including a personal statement, letters of recommendation, and a portfolio. Students with a GPA below 2.90 may petition the committee for admission. The committee has the option of waiving any of the requirements listed above if evidence of a candidate's high potential for success in the major is presented and approved.

Transfer Students

Students transferring to the University of Oregon School of Journalism and Communication enter as premajors. They apply to the University of Oregon Office of Admissions and are accepted as premajors if they meet the university's general standards for admission. To be admitted to major status, transfer students must meet the school's requirements for admission as a major (p. 790).

Transfer Credit

The School of Journalism and Communication accepts journalism credits earned at other colleges and universities as follows:

1. Credits earned at schools of journalism accredited by the Accrediting Council on Education in Journalism and Mass Communications are accepted for journalism credit and may fulfill specific course requirements
2. Journalism credits may be accepted from unaccredited journalism programs, but they may not be used to meet specific course requirements. They do count toward the 76-credit limit set by national accrediting standards
3. Regardless of the number of credits transferred, students must take at least 27 credits of journalism in residence to earn a degree from the University of Oregon
4. Students may not take more than 76 credits in journalism courses out of the 180 total credits required for a bachelor's degree. They may, however, add credits to the 180-credit total to accommodate extra journalism credits (e.g., take 186 credits to accommodate as many as 82 credits in journalism)
5. The school accepts equivalent courses taught at other colleges to meet the Media and Society (J 201) requirement for application to be a major, and may accept equivalent courses to meet other core requirements if approved by the associate dean for undergraduate affairs

Transfer students who want to discuss the transfer policy may consult the associate dean, director of student services, or the advisors in the Student Services Center.

The school offers course work leading to bachelor of arts (BA) and bachelor of science (BS) degrees. Major requirements are the same for each. Differences between the two degrees are explained under Requirements for Bachelor of Arts and Bachelor of Science in the **Bachelor's Degree Requirements** (<http://catalog.uoregon.edu/bachelorrequirements>) section of this catalog.

General Studies Requirements		
Literature courses ^{3,4}		16
History courses ⁴		8
Economics courses ⁴		8
General studies courses in three other subject codes within the College of Arts and Sciences ⁴		24
Total Credits		116

¹ Courses are "pathway" courses that are approved by the advisor. The pathway is an individual course plan that reflects a student's professional goals and career objectives.

² Students must take two 300-level and two 400-level context courses, such as ethics, history, law, diversity, or international communication.

³ Courses include the following:

- Literature courses taught by the Department of English and the Department of Comparative Literature. Courses in rhetoric, grammar, and cinema or television production do not count toward this requirement.
- Literature courses taught in English translation by foreign-language departments or the Department of Classics or courses that are cross-listed for major credit by these departments
- Introduction to the Humanities I (HUM 101), Introduction to the Humanities II (HUM 102), Introduction to the Humanities III (HUM 103)

One of the following categories may be used to satisfy 8 credits of this requirement:

- Courses taught in a second language that are part of a student's language program of study. Foreign-language courses used to fulfill the university's bachelor of arts requirement and writing courses used to fulfill the university composition requirement may not be used to fulfill the general-studies courses requirement.
- Courses treating film or television as literature that have significant reading and writing components.

⁴ Courses numbered 196, 198, 199, 399–406, or 408–410 may not be used to fulfill these requirements. In addition to the literature, history, and economics block requirements, journalism students must complete three additional blocks. Each block consists of 8 credits of a subject offered by the College of Arts and Sciences. Eligible subjects codes are AEIS, AFR, ANTH, ARB, ASIA, ASL, ASTR, BI, CAS, CH, CHN, CINE, CIS, CIT, CLAS, COLT, CRWR, DANE, EALL, EC, ENG, ENVS, ES, EURO, FINN, FLR, FR, GEOG, GEOL, GER, GRK, HBRW, HC, HIST, HPHY, HUM, INTL, ITAL, JDST, JPN, KRN, LAS, LAT, LING, LT, MATH, MDVL, NORW, PHIL, PHYS, PORT, PS, PSY, REES, REL, RL, RUSS, SCAN, SOC, SPAN, SWAH, SWED, TA, WGS, WR.

The additional blocks *can* overlap with the following requirements:

- Courses taken to fulfill the university's arts and letters, social science, and science group-satisfying requirements (unless the course is also being used for journalism requirements in literature, history or economics)
- Courses taken toward the UO bachelor of science requirement
- Minor and second major course work in the College of Arts and Sciences
- Electives in the College of Arts and Sciences

The additional blocks *cannot* overlap with the following requirements:

- First- and second-year foreign language (if used for the bachelor of arts degree)
- Writing composition (WR) classes used for the UO writing requirement
- Courses used for the literature, history, or economics requirements in journalism

This requirement and the potential for overlap with other requirements can be very complicated and highly individualized. Please speak with your academic advisor to learn about your options.

One of the following categories may be used to satisfy 8 credits of this requirement:

- Courses taught in a second language that are part of a student's language program of study. Foreign-language courses used to fulfill the university's bachelor of arts requirement and writing courses used to fulfill the university composition requirement may not be used to fulfill the general-studies courses requirement.
- Courses treating film or television as literature that have significant reading and writing components.

⁴ Courses numbered 196, 198, 199, 399–406, or 408–410 may not be used to fulfill these requirements. In addition to the literature, history, and economics block requirements, journalism students must complete three additional blocks. Each block consists of 8 credits of a subject offered by the College of Arts and Sciences. Eligible subjects codes are AEIS, AFR, ANTH, ARB, ASIA, ASL, ASTR, BI, CAS, CH, CHN, CINE, CIS, CIT, CLAS, COLT, CRWR, DANE, EALL, EC, ENG, ENVS, ES, EURO, FINN, FLR, FR, GEOG, GEOL, GER, GRK, HBRW, HC, HIST, HPHY, HUM, INTL, ITAL, JDST, JPN, KRN, LAS, LAT, LING, LT, MATH, MDVL, NORW, PHIL, PHYS, PORT, PS, PSY, REES, REL, RL, RUSS, SCAN, SOC, SPAN, SWAH, SWED, TA, WGS, WR.

The additional blocks *can* overlap with the following requirements:

- Courses taken to fulfill the university's arts and letters, social science, and science group-satisfying requirements (unless the course is also being used for journalism requirements in literature, history or economics)
- Courses taken toward the UO bachelor of science requirement
- Minor and second major course work in the College of Arts and Sciences
- Electives in the College of Arts and Sciences

The additional blocks *cannot* overlap with the following requirements:

- First- and second-year foreign language (if used for the bachelor of arts degree)
- Writing composition (WR) classes used for the UO writing requirement
- Courses used for the literature, history, or economics requirements in journalism

This requirement and the potential for overlap with other requirements can be very complicated and highly individualized. Please speak with your academic advisor to learn about your options.

Additional Requirements

- Satisfactory completion of a minimum of 60 credits and a maximum of 76 credits in journalism, of which at least 27 must be taken at the University of Oregon School of Journalism and Communication and at least 24 must be upper division
- Satisfactory completion of at least 104 credits in academic fields other than journalism. A student who graduates with 180 credits must count no more than 76 credits (including transfer credits) in journalism toward the degree
- Students must take a minimum of 20 upper-division credits in journalism, including prerequisites
- Majors and premajors must take all school courses for letter grades unless a course is only offered pass/no pass (P/N). All graded

journalism courses taken to satisfy the major must be passed with a grade of mid-C or better

- A cumulative GPA of 2.70 or better in courses taken in the School of Journalism and Communication at the time of graduation

Internship

A major may earn no more than 9 credits in Internship: [Topic] (J 404).

Honors Program

The honors program provides high-achieving students the opportunity to develop analytic, creative, critical thinking and research skills in small-group, discussion-oriented courses. The program develops a small multidisciplinary community of communications scholars from all the majors within the School of Journalism and Communication.

Students take three honors courses focusing on media theory, research, or issues, which partially fulfill the context course requirement. In addition, students complete an original piece of scholarship or creative work in the senior year.

The program targets journalism majors entering their junior year who have a minimum 3.50 cumulative UO GPA. Applications are accepted each spring for the following year's cohort. Clark Honors College students are eligible to apply. More information is available on the school's website.

Second Bachelor's Degree

Students who already have a bachelor's degree and want to earn a second bachelor's degree in the School of Journalism and Communication may apply for premajor status through the university's Office of Admissions. Upon fulfilling the requirements for application for admission, they may apply for major status. Students must complete all of the school's requirements for graduation including the school's arts and sciences requirement and university requirements for the BA or BS. Credits, including transfer credits, earned for the first bachelor's degree may count toward meeting the requirements as long as they conform to the transfer-credit policy outlined previously.

Four-Year Degree Plan

Requirements for the School of Journalism and Communication are complex, and students are strongly encouraged to consult with an advisor in the school's Student Services Center to ensure accurate interpretation of requirements and timely degree completion. For more information on student services and academic requirements, visit the website (<http://journalism.uoregon.edu/students/undergrad/academic-requirements>).

- **Master of Arts in Journalism**
- **Master of Science in Journalism**
- **Master's Degree in Advertising and Brand Responsibility**
- **Master's Degree in Multimedia Journalism** (p.)

Graduate Studies

The master of arts (MA) and master of science (MS) programs at the University of Oregon School of Journalism and Communication seek to expose students to a wide range of ideas concerning the structure, function, and role of the media in society.

The professional journalism master's program offers a twelve- to fifteen-month program designed for those holding bachelor's degrees but who have little or no academic or professional journalistic or media

background. Graduate students in this program acquire professional skills.

The master's program in advertising and brand responsibility is a one-year graduate program designed to prepare students to guide strong brands in areas such as sustainability, privacy and data protection, social justice, and diversity.

The Portland-based multimedia journalism master's program, offered evenings and weekends, is designed to prepare experienced journalists with the skills needed for multimedia storytelling and for the entrepreneurial imperatives of the contemporary media business environment.

The Portland-based strategic communication master's program, offered evenings and weekends, provides advanced conceptual and tactical skills for working professionals in industries such as public relations, advertising, marketing communication, and corporate communication.

Information about and applications for graduate programs are available on the School of Journalism and Communication website.

Financial Assistance

The school provides a number of graduate scholarships and graduate employee (GE) opportunities. Scholarships range from \$500 to \$15,000. Graduate employees assist faculty members with teaching, research, and administrative responsibilities. Please note that GE positions are only open to media studies students.

International Students

A firm mastery of English, including American mass-communication idiom, is necessary for success at the graduate level. International students who lack such mastery are required to attend courses at the American English Institute on campus before participating in the graduate program. Though these courses do not carry graduate credit, they qualify to meet students' visa requirements. The best time to enroll in the institute's courses is the summer session preceding the first term in the graduate program.

Admission Requirements

Admission to the graduate program is granted for fall term for media studies, multimedia journalism, and strategic communication; summer session for the Eugene-based professional master's degree in journalism. Application materials are the same for the master's and the doctoral programs. Applicants to the master's programs must have received a BS or BA or equivalent prior to the first term of enrollment; applicants to the doctoral program must have received an MA or MS or equivalent. To be considered for admission, an applicant must submit the following:

1. Official transcripts from all institutions where undergraduate and graduate work was completed. The minimum undergraduate GPA for admission is 3.00. In exceptional cases, an applicant with a lower GPA may be admitted conditionally
2. *Optional:* Official Graduate Record Examination (GRE) scores no more than five years old
3. A 750- to 1,000-word essay describing the applicant's academic and career goals
4. An up-to-date résumé or curriculum vitae
5. A portfolio, string book, clips, or other evidence of relevant professional work or evidence of scholarly writing and research. Doctoral applicants may include a copy of a master's thesis
6. Three letters of recommendation—preferably two from academic sources
7. International students must also submit documentation for
 - a. Either a Test of English as a Foreign Language (TOEFL) score of 100 or better or an International English Language Testing System (IELTS) score of 7 or better
 - b. A score on the Test of Spoken English (TSE). A minimum score is not required for the TSE

Application deadlines

- Doctoral program: January 1
- Media studies master's degree: February 1
- Journalism master's degree: September 30, December 30, and March 30
- Advertising and brand responsibility master's degree: February 15
- Strategic communication master's degree (Portland): November 15, February 15, and April 30
- Multimedia journalism master's degree (Portland): November 15, February 15, and April 30
- Admission to the graduate program is granted for fall term (summer session for professional master's program students in the Eugene-based journalism **only**; designate summer session as the start date on your application for admission)

Advising

An advisor is appointed for each graduate student in the school by the program director.

Course programs for graduate students are planned individually in consultation with advisors. Graduate students should meet with their advisors at least once a term.

Requirements for Graduation

A graduate student in the School of Journalism and Communication cannot elect the pass/no pass (P/N) option for a graduate course offered by the school unless that course is offered P/N only.

Master's Degree in Journalism

The Eugene-based professional master's degree in journalism is designed for students who have little or no academic or professional background in communication media and who want to acquire professional skills. Participants earn either an MA or an MS degree with a major in journalism. The master's programs in journalism: magazine and journalism: news-editorial are inactive at this time. Journalism graduate students may opt to specialize in science and/or environmental reporting; see the school's website for more information.

Master’s Degree in Advertising and Brand Responsibility

This Eugene-based program leads to a master of arts or master of science degree in advertising and brand responsibility. This one-year, full-time program operates on the idea that successful brands in the 21st century must be authentic and committed to the common good and the benefit of society. Diverse brands such as Nike, Patagonia, Cheerios, and Yoplait have successfully addressed social issues while building brand equity by recognizing the power of persuasive communication in making the world a better place.

Course work examines the theory and practice of persuasive communication and brand responsibility; students participate in a three-term seminar that trains students in best practices in planning, brand management, and creative marketing. The course of study concludes with a professional project in which students develop a campaign, a research paper, or some other effort on brand responsibility under the guidance of an advisor.

Applicants should have an interest in the field and some background, either professional or academic, in advertising, public relations, marketing, or strategic communication.

Candidates for this degree must earn at least 46 credits with a cumulative GPA of 3.00 or better. Courses that do not carry graduate credit are not included in the GPA.

See the School of Journalism and Communication website for more detailed and up-to-date information about application requirements, the curriculum, and final project options.

Master’s Degree Requirements

Code	Title	Credits
J 557	Curiosity for Strategists	4

J 611	Mass Communication and Society	4
Electives chosen in consultation with an advisor ²		12
Total Credits		46

- ¹ Yearlong course.
- ² Electives include courses in green brand strategy, writing design concepts, quantitative and qualitative methods, "ideasmithing," interactive media, and courses taught as part of the strategic communication master’s program such as Introduction to Strategic Communication Marketing (J 616), Strategic Communication Management (J 618), or Strategic Communication: [Topic] (J 624).

Additional Requirements

A master of arts degree requires second-year foreign language proficiency. See the Graduate School website for details.

Master's Degree in Multimedia Journalism

This program is based at the School of Journalism and Communication's George S. Turnbull Portland Center and leads to a master of arts or master of science degree in multimedia journalism. Offered evenings and weekends, it is designed to prepare journalists with the skills needed for multimedia storytelling and for the entrepreneurial imperatives of the contemporary media business environment.

Contemporary journalists must have the fundamental skills and values of the field as well as the ability to tell stories across multiple distribution channels (emerging digital platforms as well as print and broadcast) and to understand the business environment of the new and constantly evolving media world. Tomorrow’s journalist must be both collaborative and independent—comfortable working both inside and outside of traditional organizational structures.

The program consists of a core of required 4-credit journalism and communication courses complemented by 2-credit, shorter-term workshop courses and graduate-level course work in an approved area of content outside of journalism and multimedia. The course of study concludes with a professional project that allows the student to report and produce a professional-quality multimedia project under the guidance of

an advisor. To prepare for the project, students take a minimum of four terms (including one required summer session course).

Successful applicants typically have professional experience as well as strong academic credentials. Candidates for this MA or MS degree must earn at least 48 credits with a cumulative GPA of 3.00 or better. Courses that do not carry graduate credit are not included in the GPA.

See the School of Journalism and Communication website for more detailed and up-to-date information about application requirements, the curriculum, and final project options.

Master's Degree Requirements

Code	Title	Credits
J 596	Communication Ethics and Law: [Topic]	4

J 638	Story and Commerce	4
J 608	Workshop: [Topic] ¹	2
J 609	Terminal Project	6
Other courses chosen in consultation with advisor		20
Electives ²		8
Total Credits		48

¹ Students must complete at least one professional development workshop. We encourage students to take additional workshops for a more enriching experience. Workshops vary from term to term and may include topics such as Visualizing Information; Audio Storytelling; Story in Stills; and Innovation, Science, and Story.

² Students may take elective courses from a variety of disciplines. Electives should be chosen in consultation with your advisor. At least 8 elective credits are required.

Additional Requirements

A master of arts degree requires second-year foreign language proficiency. See the Graduate School website for details.

Courses

J 100. Media Professions. 2 Credits.

Introduction to dynamic media and communication professions, opportunities, and issues, as well as to majors in journalism and communication.

J 101. Grammar for Communicators. 2 Credits.

Intensive review of grammar, word use, spelling, and principles of clear, concise writing. Introduction to media style. Premajor status required.

J 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

J 198. Colloquium: [Topic]. 1-2 Credits.

Repeatable.

J 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 201. Media and Society. 4 Credits.

Introduction to the critical examination of the roles of media in society.

J 208. Introduction to Documentary Production. 4 Credits.

Introduction to the theory and practice of documentary production. Focuses on aesthetics, technology, research, and writing fundamentals of documentary making, covering preproduction, production and postproduction. Cinema studies majors only.
Prereq: J 201, CINE 260M or ENG 260M; two from CINE 265, 266, 267.

J 211. Gateway to Media. 8 Credits.

Integrates critical thinking, creative thinking, and basic skills for nonfiction storytelling through words, photos, audio, and video. Majors only.
Prereq: J 100, J 101, J 201.

J 212. Writing for Communicators. 4 Credits.

Course builds on what was learned Grammar for Communicators course (J 101) to help students develop the ability to write for a variety of professional platforms and to achieve the appropriate strategic purpose.
Prereq: J 100, J 101, J 201.

J 213. Fact or Fiction. 4 Credits.

This course helps students grapple with information in the digital age to evaluate how media professional develop notions of truth, ethics, and transparency. It covers information credibility, social media algorithms, and data and numerical literacy.
Prereq: J 100, J 101, J 201.

J 314. Introduction to Media Studies. 4 Credits.

Presents a historical overview of the study of media, with in-depth discussion of primary theoretical approaches and their application to the current media environment. Majors only.
Prereq: J 201 with a grade of mid-C or better.

J 315H. Honors Media Theory and Research. 4 Credits.

Foundation course for honors program. Introduction to seminal theories in communication; overview of methodologies used in the study of theories. Acceptance into School of Journalism and Communication honors program required for enrollment.

J 320. Gender, Media, and Diversity. 4 Credits.

Critical study of the media with regard to gender, race, ethnicity, and other social divisions. Ramification and possible mechanisms of change.
Prereq: J 201 with a grade of mid-C or better.

J 331. Digital Video Production. 4 Credits.

Introduction to techniques of single-camera field video production. Journalism and cinema studies majors only.
Prereq: J 205 and J 206 or J 211 with a grade of mid-C or better, or J 208 with a grade of mid-C or better.

J 333. Writing for Multimedia. 4 Credits.

Introduction to the process and practice of writing for multimedia, including print, audio-video, computer-assisted presentation, web-based applications, and striking the balance between word and image. Journalism majors or multimedia minor standing only.
Prereq: ARTD 250, 251, 252.

J 340. Principles of Advertising. 4 Credits.

Role of advertising in the distribution of goods and services; the advertising agency; the campaign; research and testing; the selection of media: print, electronic, outdoor advertising, direct mailing. Not for journalism: advertising majors.

J 342. The Creative Strategist. 4 Credits.

Creative approaches to ideation and strategic thinking for all advertising specialties. Emphasis on creative process, generative techniques, teamwork, career planning, industry trends. Journalism: advertising majors only.
Prereq: J 205 and J 206 or J 211.

J 350. Principles of Public Relations. 4 Credits.

Overview of public relations practice in a diverse global society, including theory, career opportunities, history, communication forms and channels, and legal and ethical concerns.

J 352. Strategic Writing and Media Relations. 4 Credits.

Writing-intensive lab; students produce strategic, theory-based content for multiple media platforms using various journalistic styles and storytelling skills and incorporating ethical media-relations practices. Prereq: J 205 and J 206 and J 350, or J211 and J 350 with a grade of mid-C or better.

J 361. Reporting I. 4 Credits.

News gathering and writing. Extensive writing in class and outside of class in a variety of forms: news, features, interviews, multimedia scripts. Journalism majors only.

Prereq: J 205 and J 206, or J 211 with a grade of mid-C or better.

J 365. Photojournalism. 4 Credits.

Visual reporting techniques, with emphasis on practice, law, and ethics of photojournalism and photographic communication. Laboratory and portfolio-intensive. Majors only.

Prereq: J 205 and J 206, or J 211 with a grade of mid-C or better.

J 371. Feature Writing I. 4 Credits.

Introduction to feature writing for print and online media; marketing your ideas and stories. Journalism majors only.

Prereq: J 361 with a grade of mid-C or better.

J 385. Communication Law. 4 Credits.

Legal aspects of the media: constitutional freedom of expression, news gathering, access to public records, libel, privacy, copyright, advertising, electronic media regulation, and antitrust.

Prereq: J 201 with a grade of mid-C or better.

J 387. Media History. 4 Credits.

The changing structure and character of the media in the United States.

Prereq: J 201 with a grade of mid-C or better.

J 396. International Communication. 4 Credits.

National and cultural differences in media and information systems, global news and information flows, implications of rapid technological change, and communication and information policies.

Prereq: J 201 with a grade of mid-C or better.

J 397. Media Ethics. 4 Credits.

Ethical problems in the media: privacy, violence, pornography, truth-telling, objectivity, media codes, public interest, media accountability.

Prereq: J 201 with a grade of mid-C or better.

J 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 401. Research: [Topic]. 1-9 Credits.

Repeatable.

J 403. Thesis. 1-9 Credits.

Repeatable.

J 404. Internship: [Topic]. 1-9 Credits.

Repeatable for maximum of 9 credits.

J 405. Reading and Conference: [Topic]. 1-9 Credits.

Repeatable.

J 406. Special Problems: [Topic]. 1-9 Credits.

Repeatable.

J 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 409. Practicum: [Topic]. 1-4 Credits.

Repeatable.

J 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 411M.

Prereq: J 201 with a grade of mid-C or better.

J 412. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Repeatable when topic changes. Majors only.

Prereq: J 201 with a grade of mid-C or better.

J 413. Communication Studies Capstone. 4 Credits.

Draws on skills and knowledge learned in other communications studies and related courses to demonstrate competence in broad areas of research.

Prereq: J 314 for 4 credits with grade of mid-C or better.

J 416. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and communication studies minors only.

Prereq: J 201 with grade of mid-C or better.

J 421. Documentary Production. 4 Credits.

Workshop in preparation, shooting, and postproduction of the short documentary. Journalism and cinema studies majors only.

Prereq: J 331 with a grade of mid-C or better.

J 424H. Honors Theory and Research: [Topic]. 4 Credits.

Uses a variety of theories and methods to closely examine and analyze contemporary problems and situations in media and communications.

Acceptance into School of Journalism and Communication honors program required for enrollment. Repeatable once when topic changes for a maximum of 8 credits.

J 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews.

Multilisted with ANTH 427M/527M. Sequence with J 428M/528M. Offered alternate years.

J 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M/528M. Sequence with J 427M/527M. Offered alternate years.

Prereq: J 427M.

J 432. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

Prereq: J 331, J 361 with a grade of mid-C or better.

J 434. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 331, J 361, J 432 with a grade of mid-C or better.

J 436. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.
Prereq: J 361 with a mid-C or better.

J 443. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools. Journalism: advertising majors only.
Prereq: J 207, 342 with a grade of mid-C or better.

J 444. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.
Prereq: J 205 and J 206 and J 342, or J 211 and J342 with a grade of mid-C or better.

J 448. Advertising Campaigns. 4 Credits.

Seniors produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.
Prereq: three from J 443/543, 444/544, 457/557, 458/558, 459/559, 460/560 with a grade of mid-C or better.

J 449. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 452. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.
Prereq: J 352 with a grade of mid-C or better.

J 453. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.
Prereq- J 352 with a grade of mid-C or better

J 454. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.
Prereq: J 452, J 453; J 494 with a grade of mid-C or better.

J 457. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.
Prereq: J 205, 206, 207, 342 with a grade of mid-C or better.

J 458. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.
Prereq: J 205 and 206 and 342, or J 211 and 342, with a grade of mid-C or better.

J 459. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. For Journalism: advertising majors only.
Prereq: J 205, 206, 207, 342 with a grade of mid-C or better.

J 460. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.
Prereq: J 205 and J 206 and 342, or J211 and J 342, with a grade of mid-C or better.

J 461. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.
Prereq: J 361 or equivalent with a grade of mid-C or better.

J 462. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.
Prereq: J 361 with a grade of mid-C or better.

J 463. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable.
Prereq: J 361 with a grade of mid-C or better.

J 466. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.
Prereq: J 365 with a grade of mid-C or better.

J 467. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors and minors only; cinema studies majors for approved topics. Repeatable twice for a maximum of 12 credits when topic changes.
Prereq: J 201 with a grade of mid-C or better.

J 468. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.
Prereq: J 461 with a grade of mid-C or better.

J 469. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 472. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.
Prereq: J 361, J 371 with a grade of mid-C or better.

J 473. Feature Editing. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.
Prereq: J 361, J 371 with a grade of mid-C or better.

J 475. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

Prereq: J 361 with a grade of mid-C or better.

J 480. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 483. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

Prereq: J 361 with a grade of mid-C or better.

J 494. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

Prereq: J 342 or J 350.

J 495. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Majors and minors only. Repeatable when topic changes for a maximum of 12 credits.

Prereq: J 201 with a grade of mid-C or better.

J 496. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Repeatable when topic changes. Majors and minors only.

Prereq: J 201 with a grade of mid-C or better.

J 503. Thesis. 1-9 Credits.

Repeatable.

J 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 511M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 511M.

J 512. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Repeatable when topic changes. Majors only.

J 516. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and communication studies minors only.

J 521. Documentary Production. 4 Credits.

Workshop in preparation, shooting, and postproduction of the short documentary. Journalism and cinema studies majors only.

J 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 427M/527M. Sequence with J 428M/528M. Offered alternate years.

J 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M/528M. Sequence with J 427M/527M. Offered alternate years.

Prereq: J 527M.

J 532. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

J 534. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 532 with a grade of mid-C or better.

J 536. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

J 543. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools.

Journalism: advertising majors only.

J 544. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

J 548. Advertising Campaigns. 4 Credits.

Graduate students produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 443/543, 444/544, 456/556, 457/557, 458/558, 459/559, 460/560.

J 549. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 552. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

J 553. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

J 554. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 552, J 553; one from J 594, J 595.

J 557. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

J 558. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

J 559. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. Journalism: advertising majors only.

J 560. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 561. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

J 562. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

J 563. Specialized Reporting. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only.

J 566. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 567. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors only. Repeatable twice for a maximum of 12 credits when topic changes.

J 568. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.

Prereq: J 561 with a grade of mid-C or better.

J 569. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 572. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 573. Feature Editing. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 575. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

J 580. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 583. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

J 594. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

J 595. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Journalism majors only. Repeatable when topic changes for a maximum of 12 credits.

J 596. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Repeatable when topic changes. Majors only.

J 601. Research: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 602. Supervised College Teaching. 1-5 Credits.

Repeatable for maximum of 5 credits.

J 603. Dissertation. 1-16 Credits.

Course may be repeated 25 times for credit after the initial instance.

J 604. Internship: [Topic]. 1-6 Credits.

Repeatable for maximum of 12 credits.

J 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 606. Special Problems: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

J 608. Workshop: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 609. Terminal Project. 1-6 Credits.

Repeatable for maximum of 6 credits.

J 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

J 611. Mass Communication and Society. 4 Credits.

Review of the literature of mass communication. Introduction to graduate study in journalism and communication.

J 612. Media Theory I. 5 Credits.

First in a three-part sequence introducing students to media theory, focusing on the social scientific tradition. Sequence with J 613, J 614.

J 613. Media Theory II. 5 Credits.

Second in a three-part sequence introducing students to media theory, focusing on critical approaches. Sequence with J 612, J 614.

Prereq: J 612.

J 614. Media Theory III. 5 Credits.

Third in a three-part sequence introducing students to media theory, focusing on contemporary theoretical perspectives. Series with J 612, J 613.

Prereq: J 613.

J 616. Introduction to Strategic Communication Marketing. 4 Credits.

Discussion of fundamental marketing concepts from the perspective of the manager. Analysis of complex marketing challenges in research, segmentation, targeting, pricing, distribution, and branding.

J 617. Strategic Communication Theory and Research: [Topic]. 4 Credits.

Theory, research, and practice of strategic communication. Topics may include relationship management, risk communication, identity and culture, and social media theory. Repeatable when topic changes for a maximum of 20 credits.

Prereq: graduate standing.

J 618. Strategic Communication Management. 4 Credits.

Elements of managing and leading organizations; examination of key issues faced by leaders. Topics include leadership theory, leading change, dealing with conflict, and performance and strategic management.

J 619. Teaching and the Professional Life. 4 Credits.

Explores teaching strategies, curriculum development, and other aspects of academic professional life in journalism and communication.

J 621. Foundations of Strategic Communication. 4 Credits.

Reviews major theories, models, and practices in strategic communications. Theoretical topics include media effects and persuasion as applied to public relations, advertising, and other strategic communication.

J 623. Creativity in Strategic Communication. 4 Credits.

Explores the use of creative conceptual thinking as part of the strategic basis in successful communication campaigns.

J 624. Strategic Communication: [Topic]. 2 Credits.

Explores problems and specialized skills needed in strategic communication management. Examples include crisis communication, creativity in business, corporate social responsibility. Repeatable with change in topic.

J 626. Strategic Marketing Communication. 4 Credits.

Examination, evaluation, and integration of advertising, public relations, sales promotion, direct marketing, social media, sponsorship and events, packaging, customer service, and personal selling.

J 627. Foundations of Multimedia Journalism. 4 Credits.

Serves as a foundation of theory and technique, with an introduction to storytelling forms, technical production skills, and the visual language. Students will learn how to use the tools of the trade so that they can communicate effectively with other multimedia journalists.

J 628. Multimedia Journalism Practices. 4 Credits.

Building on the J 627 course, students create a narrative video project that focuses on visual storytelling, character development, and present-tense storytelling.

J 638. Story and Commerce. 4 Credits.

Explores the changing face of narrative journalism as it investigates the new commercial opportunities for the professional journalist. Taught once or more per academic year.

J 641. Qualitative Research Methods. 4 Credits.

Introduces qualitative research methods including traditional historical inquiry, oral history, ethnography, and participant observation.

J 642. Quantitative Research Methods. 4 Credits.

Introduces and analyzes quantitative research methods in terms of design, measurement, inference, and validity. Focuses on conceptualization in communication research.

J 643. Proseminar II. 5 Credits.

Seminar participants demonstrate competence in broad families of social research by drawing on skills and knowledge obtained in J 612, J 613, J 614, J 641, and J 642.

Prereq: J 612, J 613, J 614, J 641, J 642.

J 646. Political Economy of Communication. 4 Credits.

Introduction to the political economy of communication. Includes such issues as ownership and control patterns; the role of the state; labor; intellectual property rights; and international markets.

J 648. Cultural Approaches to Communication. 4 Credits.

Examination of communication and mediated communication as cultural processes in the production and reproduction of social systems.

J 649. International Communication. 4 Credits.

Examines global communication structures and processes and their consequences. Topics include new technologies, news and information organizations, cross-cultural uses of Western media, and information policies.

J 654. Reporting within Communities. 4 Credits.

Students explore and practice emerging "community-first" concepts of journalism and reporting to identify the needs of the communities served, codesigning processes and solutions to keep them engaged.

J 656. Producing the Story. 4 Credits.

Students work collaboratively to create a compelling, ethical work of journalism with impact, applying all aspects of community engagement, reporting, storytelling, and production skills learned in previous terms.

J 660. Advanced Research Methods: [Topic]. 4 Credits.

Explores specific qualitative or quantitative communication research methods. Topics may include discourse analysis, oral history, historical methods, legal methods, content analysis, and survey methods.

Repeatable when topic changes.

Prereq: J 641 or J 642, depending on topic.

Journalism: Advertising

The University of Oregon undergraduate program is based on the premise that the best professional communicator is broadly educated. In accordance with national accrediting standards, students must take at least 104 credits in courses outside the School of Journalism and Communication. A maximum of 76 credits in the 180-credit undergraduate program may be in journalism and communication courses. Students learn about media practice and effects. They study the role of the media in society, the history of journalism, visual communication, the ethics of media practices, the economics of the media, new media technologies, international communication, diversity in the media, and the legal and social responsibilities of the media.

In addition, undergraduates take three courses that provide a broad background in fundamental skills and concepts: Gateway to Media

(J 211) (8 credits), Writing for Communicators (J 212) (4 credits), and Fact or Fiction (J 213) (4 credits). These courses immerse students in writing for varied platforms and styles, ground them in the fundamentals of digital storytelling development and delivery, and aid them in developing critical thinking skills, providing majors with a foundational set of competencies before they move on to more specialized courses in their major areas of study.

Majors are required to minor in a field outside of the School of Journalism and Communication. Preparation in a second field is a valuable addition to a student's education and enhances employability.

Many students are active in campus affairs, working for the campus newspaper; the university's radio station; the student-run advertising, design, video, and public relations agencies; the award-winning *Flux* and *Ethos* magazines; television and online programs; and alternative and online publications, including *OR Magazine*, the first student-produced iPad publication. The school also encourages them to participate in UO chapters of Ed on Campus, Ad Society, National Broadcasting Society, National Press Photographers Association, Public Relations Student Society of America, Society of Professional Journalists, and such national venues as the One Club for Art and Copy. Internships are encouraged and available at newspapers, magazines, broadcast stations, advertising agencies, public relations offices, nonprofit organizations, government offices, video production firms, online publications, and public policy offices.

The best preparation for journalism majors is a broad college-preparatory program with emphasis on language skills, English literature, economics, history, and the political and social sciences. Prospective students also benefit from the study of mathematics, statistics, computer applications, and second languages.

Community college students planning to transfer to the School of Journalism and Communication should concentrate on college-transfer courses that fulfill university requirements. Almost all professional courses are taken at the School of Journalism and Communication. Advising material is available to community college students online.

- Bachelor of Arts
- Bachelor of Science

Undergraduate Studies

The role of the school's undergraduate program is to provide students with the creative, critical, and problem-solving skills they need to become ethical, professional communicators and critical media consumers.

Premajor Admission

New students planning to major in journalism enter the university as premajors and do not need to meet special admission requirements beyond the general university requirements.

Each premajor is assigned to a journalism and communication advisor who assists in planning programs, answering questions, and tracking progress toward admission as a major and toward graduation. Students should check with an advisor at least once a year to ensure that requirements are being met. In addition, students will be assigned a faculty advisor, who will guide them through the portfolio process. The director of student services for the school supervises undergraduate academic advising.

A university student in another major may switch to a journalism premajor online on the School of Journalism and Communication website. To become a premajor, a student must have a minimum cumulative grade point average (GPA) of 2.00 for all work at the University of Oregon.

Premajor Program

Students must complete the school's premajor core curriculum, and earn grades of C or better:

Code	Title	Credits
J 100	Media Professions	2
J 101	Grammar for Communicators	2
J 201	Media and Society	4
Total Credits		8

Admission as a Major

Admission to the School of Journalism and Communication is competitive. The faculty considers applications from premajor students who have

- completed 24 or more graded credits of course work at the University of Oregon, earning a cumulative UO GPA of at least 2.90
- completed College Composition I (WR 121) and College Composition II (WR 122) or College Composition III (WR 123) with grades of P or C– or better
- completed the school's premajor core curriculum

A student's GPA is a major factor in the admissions decision. Students with a GPA of 3.25 or higher are guaranteed admission to the major.

Applicants with grade point averages between 2.90 and 3.24 are evaluated and judged competitively by an admissions committee as applications are received. The admissions committee considers the requirements listed above and other materials that applicants submit, including a personal statement, letters of recommendation, and a portfolio. Students with a GPA below 2.90 may petition the committee for admission. The committee has the option of waiving any of the requirements listed above if evidence of a candidate's high potential for success in the major is presented and approved.

Transfer Students

Students transferring to the University of Oregon School of Journalism and Communication enter as premajors. They apply to the University of Oregon Office of Admissions and are accepted as premajors if they meet the university's general standards for admission. To be admitted to major status, transfer students must meet the school's requirements for admission as a major (p. 802).

Transfer Credit

The School of Journalism and Communication accepts journalism credits earned at other colleges and universities as follows:

1. Credits earned at schools of journalism accredited by the Accrediting Council on Education in Journalism and Mass Communications are accepted for journalism credit and may fulfill specific course requirements
2. Journalism credits may be accepted from unaccredited journalism programs, but they may not be used to meet specific course requirements. They do count toward the 76-credit limit set by national accrediting standards

3. Regardless of the number of credits transferred, students must take at least 27 credits of journalism in residence to earn a degree from the University of Oregon
4. Students may not take more than 76 credits in journalism courses out of the 180 total credits required for a bachelor's degree. They may, however, add credits to the 180-credit total to accommodate extra journalism credits (e.g., take 186 credits to accommodate as many as 82 credits in journalism)
5. The school accepts equivalent courses taught at other colleges to meet the Media and Society (J 201) requirement for application to be a major, and may accept equivalent courses to meet other core requirements if approved by the associate dean for undergraduate affairs

Transfer students who want to discuss the transfer policy may consult the associate dean, director of student services, or the advisors in the Student Services Center.

The school offers course work leading to bachelor of arts (BA) and bachelor of science (BS) degrees. Major requirements are the same for each. Differences between the two degrees are explained under Requirements for Bachelor of Arts and Bachelor of Science in the **Bachelor's Degree Requirements** (<http://catalog.uoregon.edu/bachelorrequirements>) section of this catalog.

Bachelor of Arts in Journalism: Advertising Degree Requirements

Code	Title	Credits
Journalism Premajor Requirements		
J 100	Media Professions	2
J 101	Grammar for Communicators	2
J 201	Media and Society	4
Journalism: Advertising Major Requirements		
J 211	Gateway to Media	8
J 212	Writing for Communicators	4
J 213	Fact or Fiction	4
J 342	The Creative Strategist	4
Select three of the following:		12
J 443	Advertising Media Planning	
J 444	Agency Account Management	
J 457	Curiosity for Strategists	
J 458	Writing Design Concepts	
J 459	Branding and Content	
J 460	Brand Development: [Topic]	
J 448	Advertising Campaigns	4
or J 449	Advanced Advertising Campaigns	
Select two of the following: ¹		8
J 320	Gender, Media, and Diversity	
J 385	Communication Law	
J 387	Media History	
J 396	International Communication	
J 397	Media Ethics	
Select two of the following: ¹		8
J 412	Issues in Communication Studies: [Topic]	
J 467	Issues in International Communication: [Topic]	

J 495	Research Methods: [Topic]	
J 496	Communication Ethics and Law: [Topic]	
General Studies Requirements		
Literature courses ^{2,3}		16
History courses ³		8
Economics courses ³		8
General studies courses in three other subject codes within the College of Arts and Sciences ³		24
Total Credits		116

¹ Students must take two 300-level and two 400-level context courses, such as ethics, history, law, diversity, or international communication.

² Courses include the following:

- Literature courses taught by the Department of English and the Department of Comparative Literature. Courses in rhetoric, grammar, and cinema or television production do not count toward this requirement.
- Literature courses taught in English translation by foreign-language departments or the Department of Classics or courses that are cross-listed for major credit by these departments
- Introduction to the Humanities I-III (HUM 101–103)

One of the following categories may be used to satisfy 8 credits of this requirement:

- Courses taught in a second language that are part of a student's language program of study. Foreign-language courses used to fulfill the university's bachelor of arts requirement and writing courses used to fulfill the university composition requirement may not be used to fulfill the general-studies courses requirement.
- Courses treating film or television as literature that have significant reading and writing components.

³ Courses numbered 196, 198, 199, 399–406, or 408–410 may not be used to fulfill these requirements. In addition to the literature, history, and economics block requirements, journalism students must complete three additional blocks. Each block consists of 8 credits of a subject offered by the College of Arts and Sciences. Eligible subjects codes are AEIS, AFR, ANTH, ARB, ASIA, ASL, ASTR, BI, CAS, CH, CHN, CINE, CIS, CIT, CLAS, COLT, CRWR, DANE, EALL, EC, ENG, ENVS, ES, EURO, FINN, FLR, FR, GEOG, GEOL, GER, GRK, HBRW, HC, HIST, HPHY, HUM, INTL, ITAL, JDST, JPN, KRN, LAS, LAT, LING, LT, MATH, MDVL, NORW, PHIL, PHYS, PORT, PS, PSY, REES, REL, RL, RUSS, SCAN, SOC, SPAN, SWAH, SWED, TA, WGS, WR.

The additional blocks *can* overlap with the following requirements:

- Courses taken to fulfill the university's arts and letters, social science, and science group-satisfying requirements (unless the course is also being used for journalism requirements in literature, history or economics)
- Courses taken toward the UO bachelor of science requirement
- Minor and second major course work in the College of Arts and Sciences
- Electives in the College of Arts and Sciences

The additional blocks *cannot* overlap with the following requirements:

- First- and second-year foreign language (if used for the bachelor of arts degree)
- Writing composition (WR) classes used for the UO writing requirement
- Courses used for the literature, history, or economics requirements in journalism

This requirement and the potential for overlap with other requirements can be very complicated and highly individualized. Please speak with your academic advisor to learn about your options.

Portfolio development seminars and workshops are recommended for all advertising students.

The additional blocks *cannot* overlap with the following requirements:

- First- and second-year foreign language (if used for the bachelor of arts degree)
- Writing composition (WR) classes used for the UO writing requirement
- Courses used for the literature, history, or economics requirements in journalism

This requirement and the potential for overlap with other requirements can be very complicated and highly individualized. Please speak with your academic advisor to learn about your options.

Portfolio development seminars and workshops are recommended for all advertising students.

Additional Requirements

- Satisfactory completion of a minimum of 60 credits and a maximum of 76 credits in journalism, of which at least 27 must be taken at the University of Oregon School of Journalism and Communication and at least 24 must be upper division
- Satisfactory completion of at least 104 credits in academic fields other than journalism. A student who graduates with 180 credits must count no more than 76 credits (including transfer credits) in journalism toward the degree
- Students must take a minimum of 20 upper-division credits in journalism: advertising, including prerequisites

- Majors and premajors must take all school courses for letter grades unless a course is only offered pass/no pass (P/N). All graded journalism courses taken to satisfy the major must be passed with a grade of mid-C or better
- A cumulative GPA of 2.70 or better in courses taken in the School of Journalism and Communication at the time of graduation

Internship

A major may earn no more than 9 credits in Internship: [Topic] (J 404).

Honors Program

The honors program provides high-achieving students the opportunity to develop analytic, creative, critical thinking and research skills in small-group, discussion-oriented courses. The program develops a small multidisciplinary community of communications scholars from all the majors within the School of Journalism and Communication.

Students take three honors courses focusing on media theory, research, or issues, which partially fulfill the context course requirement. In addition, students complete an original piece of scholarship or creative work in the senior year.

The program targets journalism majors entering their junior year who have a minimum 3.50 cumulative UO GPA. Applications are accepted each spring for the following year's cohort. Clark Honors College students are eligible to apply. More information is available on the school's website.

Second Bachelor's Degree

Students who already have a bachelor's degree and want to earn a second bachelor's degree in the School of Journalism and Communication may apply for premajor status through the university's Office of Admissions. Upon fulfilling the requirements for application for admission, they may apply for major status. Students must complete all of the school's requirements for graduation including the school's arts and sciences requirement and university requirements for the BA or BS. Credits, including transfer credits, earned for the first bachelor's degree may count toward meeting the requirements as long as they conform to the transfer-credit policy outlined previously.

Courses

J 100. Media Professions. 2 Credits.

Introduction to dynamic media and communication professions, opportunities, and issues, as well as to majors in journalism and communication.

J 101. Grammar for Communicators. 2 Credits.

Intensive review of grammar, word use, spelling, and principles of clear, concise writing. Introduction to media style. Premajor status required.

J 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

J 198. Colloquium: [Topic]. 1-2 Credits.

Repeatable.

J 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 201. Media and Society. 4 Credits.

Introduction to the critical examination of the roles of media in society.

J 208. Introduction to Documentary Production. 4 Credits.

Introduction to the theory and practice of documentary production. Focuses on aesthetics, technology, research, and writing fundamentals of documentary making, covering preproduction, production and postproduction. Cinema studies majors only. Prereq: J 201, CINE 260M or ENG 260M; two from CINE 265, 266, 267.

J 211. Gateway to Media. 8 Credits.

Integrates critical thinking, creative thinking, and basic skills for nonfiction storytelling through words, photos, audio, and video. Majors only. Prereq: J 100, J 101, J 201.

J 212. Writing for Communicators. 4 Credits.

Course builds on what was learned Grammar for Communicators course (J 101) to help students develop the ability to write for a variety of professional platforms and to achieve the appropriate strategic purpose. Prereq: J 100, J 101, J 201.

J 213. Fact or Fiction. 4 Credits.

This course helps students grapple with information in the digital age to evaluate how media professionals develop notions of truth, ethics, and transparency. It covers information credibility, social media algorithms, and data and numerical literacy. Prereq: J 100, J 101, J 201.

J 314. Introduction to Media Studies. 4 Credits.

Presents a historical overview of the study of media, with in-depth discussion of primary theoretical approaches and their application to the current media environment. Majors only. Prereq: J 201 with a grade of mid-C or better.

J 315H. Honors Media Theory and Research. 4 Credits.

Foundation course for honors program. Introduction to seminal theories in communication; overview of methodologies used in the study of theories. Acceptance into School of Journalism and Communication honors program required for enrollment.

J 320. Gender, Media, and Diversity. 4 Credits.

Critical study of the media with regard to gender, race, ethnicity, and other social divisions. Ramification and possible mechanisms of change. Prereq: J 201 with a grade of mid-C or better.

J 331. Digital Video Production. 4 Credits.

Introduction to techniques of single-camera field video production. Journalism and cinema studies majors only. Prereq: J 205 and J 206 or J 211 with a grade of mid-C or better, or J 208 with a grade of mid-C or better.

J 333. Writing for Multimedia. 4 Credits.

Introduction to the process and practice of writing for multimedia, including print, audio-video, computer-assisted presentation, web-based applications, and striking the balance between word and image. Journalism majors or multimedia minor standing only. Prereq: ARTD 250, 251, 252.

J 340. Principles of Advertising. 4 Credits.

Role of advertising in the distribution of goods and services; the advertising agency; the campaign; research and testing; the selection of media: print, electronic, outdoor advertising, direct mailing. Not for journalism: advertising majors.

J 342. The Creative Strategist. 4 Credits.

Creative approaches to ideation and strategic thinking for all advertising specialties. Emphasis on creative process, generative techniques, teamwork, career planning, industry trends. Journalism: advertising majors only. Prereq: J 205 and J 206 or J 211.

J 350. Principles of Public Relations. 4 Credits.

Overview of public relations practice in a diverse global society, including theory, career opportunities, history, communication forms and channels, and legal and ethical concerns.

J 352. Strategic Writing and Media Relations. 4 Credits.

Writing-intensive lab; students produce strategic, theory-based content for multiple media platforms using various journalistic styles and storytelling skills and incorporating ethical media-relations practices. Prereq: J 205 and J 206 and J 350, or J211 and J 350 with a grade of mid-C or better.

J 361. Reporting I. 4 Credits.

News gathering and writing. Extensive writing in class and outside of class in a variety of forms: news, features, interviews, multimedia scripts. Journalism majors only.

Prereq: J 205 and J 206, or J 211 with a grade of mid-C or better.

J 365. Photojournalism. 4 Credits.

Visual reporting techniques, with emphasis on practice, law, and ethics of photojournalism and photographic communication. Laboratory and portfolio-intensive. Majors only.

Prereq: J 205 and J 206, or J 211 with a grade of mid-C or better.

J 371. Feature Writing I. 4 Credits.

Introduction to feature writing for print and online media; marketing your ideas and stories. Journalism majors only.

Prereq: J 361 with a grade of mid-C or better.

J 385. Communication Law. 4 Credits.

Legal aspects of the media: constitutional freedom of expression, news gathering, access to public records, libel, privacy, copyright, advertising, electronic media regulation, and antitrust.

Prereq: J 201 with a grade of mid-C or better.

J 387. Media History. 4 Credits.

The changing structure and character of the media in the United States.

Prereq: J 201 with a grade of mid-C or better.

J 396. International Communication. 4 Credits.

National and cultural differences in media and information systems, global news and information flows, implications of rapid technological change, and communication and information policies.

Prereq: J 201 with a grade of mid-C or better.

J 397. Media Ethics. 4 Credits.

Ethical problems in the media: privacy, violence, pornography, truth-telling, objectivity, media codes, public interest, media accountability.

Prereq: J 201 with a grade of mid-C or better.

J 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 401. Research: [Topic]. 1-9 Credits.

Repeatable.

J 403. Thesis. 1-9 Credits.

Repeatable.

J 404. Internship: [Topic]. 1-9 Credits.

Repeatable for maximum of 9 credits.

J 405. Reading and Conference: [Topic]. 1-9 Credits.

Repeatable.

J 406. Special Problems: [Topic]. 1-9 Credits.

Repeatable.

J 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 409. Practicum: [Topic]. 1-4 Credits.

Repeatable.

J 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 411M.

Prereq: J 201 with a grade of mid-C or better.

J 412. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Repeatable when topic changes. Majors only.

Prereq: J 201 with a grade of mid-C or better.

J 413. Communication Studies Capstone. 4 Credits.

Draws on skills and knowledge learned in other communications studies and related courses to demonstrate competence in broad areas of research.

Prereq: J 314 for 4 credits with grade of mid-C or better.

J 416. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and communication studies minors only.

Prereq: J 201 with grade of mid-C or better.

J 421. Documentary Production. 4 Credits.

Workshop in preparation, shooting, and postproduction of the short documentary. Journalism and cinema studies majors only.

Prereq: J 331 with a grade of mid-C or better.

J 424H. Honors Theory and Research: [Topic]. 4 Credits.

Uses a variety of theories and methods to closely examine and analyze contemporary problems and situations in media and communications.

Acceptance into School of Journalism and Communication honors program required for enrollment. Repeatable once when topic changes for a maximum of 8 credits.

J 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews.

Multilisted with ANTH 427M/527M. Sequence with J 428M/528M. Offered alternate years.

J 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M/528M. Sequence with J 427M/527M. Offered alternate years.

Prereq: J 427M.

J 432. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

Prereq: J 331, J 361 with a grade of mid-C or better.

J 434. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 331, J 361, J 432 with a grade of mid-C or better.

J 436. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.
Prereq: J 361 with a mid-C or better.

J 443. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools. Journalism: advertising majors only.
Prereq: J 207, 342 with a grade of mid-C or better.

J 444. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.
Prereq: J 205 and J 206 and J 342, or J 211 and J342 with a grade of mid-C or better.

J 448. Advertising Campaigns. 4 Credits.

Seniors produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.
Prereq: three from J 443/543, 444/544, 457/557, 458/558, 459/559, 460/560 with a grade of mid-C or better.

J 449. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 452. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.
Prereq: J 352 with a grade of mid-C or better.

J 453. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.
Prereq- J 352 with a grade of mid-C or better

J 454. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.
Prereq: J 452, J 453; J 494 with a grade of mid-C or better.

J 457. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.
Prereq: J 205, 206, 207, 342 with a grade of mid-C or better.

J 458. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.
Prereq: J 205 and 206 and 342, or J 211 and 342, with a grade of mid-C or better.

J 459. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. For Journalism: advertising majors only.
Prereq: J 205, 206, 207, 342 with a grade of mid-C or better.

J 460. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.
Prereq: J 205 and J 206 and 342, or J211 and J 342, with a grade of mid-C or better.

J 461. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.
Prereq: J 361 or equivalent with a grade of mid-C or better.

J 462. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.
Prereq: J 361 with a grade of mid-C or better.

J 463. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable.
Prereq: J 361 with a grade of mid-C or better.

J 466. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.
Prereq: J 365 with a grade of mid-C or better.

J 467. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors and minors only; cinema studies majors for approved topics. Repeatable twice for a maximum of 12 credits when topic changes.
Prereq: J 201 with a grade of mid-C or better.

J 468. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.
Prereq: J 461 with a grade of mid-C or better.

J 469. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 472. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.
Prereq: J 361, J 371 with a grade of mid-C or better.

J 473. Feature Editing. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.
Prereq: J 361, J 371 with a grade of mid-C or better.

J 475. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

Prereq: J 361 with a grade of mid-C or better.

J 480. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 483. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

Prereq: J 361 with a grade of mid-C or better.

J 494. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

Prereq: J 342 or J 350.

J 495. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Majors and minors only. Repeatable when topic changes for a maximum of 12 credits.

Prereq: J 201 with a grade of mid-C or better.

J 496. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Repeatable when topic changes. Majors and minors only.

Prereq: J 201 with a grade of mid-C or better.

J 503. Thesis. 1-9 Credits.

Repeatable.

J 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 511M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 511M.

J 512. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Repeatable when topic changes. Majors only.

J 516. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and communication studies minors only.

J 521. Documentary Production. 4 Credits.

Workshop in preparation, shooting, and postproduction of the short documentary. Journalism and cinema studies majors only.

J 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 427M/527M. Sequence with J 428M/528M. Offered alternate years.

J 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M/528M. Sequence with J 427M/527M. Offered alternate years.

Prereq: J 527M.

J 532. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

J 534. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 532 with a grade of mid-C or better.

J 536. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

J 543. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools.

Journalism: advertising majors only.

J 544. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

J 548. Advertising Campaigns. 4 Credits.

Graduate students produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 443/543, 444/544, 456/556, 457/557, 458/558, 459/559, 460/560.

J 549. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 552. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

J 553. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

J 554. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 552, J 553; one from J 594, J 595.

J 557. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

J 558. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

J 559. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. Journalism: advertising majors only.

J 560. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 561. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

J 562. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

J 563. Specialized Reporting. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only.

J 566. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 567. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors only. Repeatable twice for a maximum of 12 credits when topic changes.

J 568. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.

Prereq: J 561 with a grade of mid-C or better.

J 569. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 572. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 573. Feature Editing. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 575. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

J 580. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 583. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

J 594. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

J 595. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Journalism majors only. Repeatable when topic changes for a maximum of 12 credits.

J 596. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Repeatable when topic changes. Majors only.

J 601. Research: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 602. Supervised College Teaching. 1-5 Credits.

Repeatable for maximum of 5 credits.

J 603. Dissertation. 1-16 Credits.

Course may be repeated 25 times for credit after the initial instance.

J 604. Internship: [Topic]. 1-6 Credits.

Repeatable for maximum of 12 credits.

J 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 606. Special Problems: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

J 608. Workshop: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 609. Terminal Project. 1-6 Credits.

Repeatable for maximum of 6 credits.

J 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

J 611. Mass Communication and Society. 4 Credits.

Review of the literature of mass communication. Introduction to graduate study in journalism and communication.

J 612. Media Theory I. 5 Credits.

First in a three-part sequence introducing students to media theory, focusing on the social scientific tradition. Sequence with J 613, J 614.

J 613. Media Theory II. 5 Credits.

Second in a three-part sequence introducing students to media theory, focusing on critical approaches. Sequence with J 612, J 614.

Prereq: J 612.

J 614. Media Theory III. 5 Credits.

Third in a three-part sequence introducing students to media theory, focusing on contemporary theoretical perspectives. Series with J 612, J 613.

Prereq: J 613.

J 616. Introduction to Strategic Communication Marketing. 4 Credits.

Discussion of fundamental marketing concepts from the perspective of the manager. Analysis of complex marketing challenges in research, segmentation, targeting, pricing, distribution, and branding.

J 617. Strategic Communication Theory and Research: [Topic]. 4 Credits.

Theory, research, and practice of strategic communication. Topics may include relationship management, risk communication, identity and culture, and social media theory. Repeatable when topic changes for a maximum of 20 credits.

Prereq: graduate standing.

J 618. Strategic Communication Management. 4 Credits.

Elements of managing and leading organizations; examination of key issues faced by leaders. Topics include leadership theory, leading change, dealing with conflict, and performance and strategic management.

J 619. Teaching and the Professional Life. 4 Credits.

Explores teaching strategies, curriculum development, and other aspects of academic professional life in journalism and communication.

J 621. Foundations of Strategic Communication. 4 Credits.

Reviews major theories, models, and practices in strategic communications. Theoretical topics include media effects and persuasion as applied to public relations, advertising, and other strategic communication.

J 623. Creativity in Strategic Communication. 4 Credits.

Explores the use of creative conceptual thinking as part of the strategic basis in successful communication campaigns.

J 624. Strategic Communication: [Topic]. 2 Credits.

Explores problems and specialized skills needed in strategic communication management. Examples include crisis communication, creativity in business, corporate social responsibility. Repeatable with change in topic.

J 626. Strategic Marketing Communication. 4 Credits.

Examination, evaluation, and integration of advertising, public relations, sales promotion, direct marketing, social media, sponsorship and events, packaging, customer service, and personal selling.

J 627. Foundations of Multimedia Journalism. 4 Credits.

Serves as a foundation of theory and technique, with an introduction to storytelling forms, technical production skills, and the visual language. Students will learn how to use the tools of the trade so that they can communicate effectively with other multimedia journalists.

J 628. Multimedia Journalism Practices. 4 Credits.

Building on the J 627 course, students create a narrative video project that focuses on visual storytelling, character development, and present-tense storytelling.

J 638. Story and Commerce. 4 Credits.

Explores the changing face of narrative journalism as it investigates the new commercial opportunities for the professional journalist. Taught once or more per academic year.

J 641. Qualitative Research Methods. 4 Credits.

Introduces qualitative research methods including traditional historical inquiry, oral history, ethnography, and participant observation.

J 642. Quantitative Research Methods. 4 Credits.

Introduces and analyzes quantitative research methods in terms of design, measurement, inference, and validity. Focuses on conceptualization in communication research.

J 643. Proseminar II. 5 Credits.

Seminar participants demonstrate competence in broad families of social research by drawing on skills and knowledge obtained in J 612, J 613, J 614, J 641, and J 642.

Prereq: J 612, J 613, J 614, J 641, J 642.

J 646. Political Economy of Communication. 4 Credits.

Introduction to the political economy of communication. Includes such issues as ownership and control patterns; the role of the state; labor; intellectual property rights; and international markets.

J 648. Cultural Approaches to Communication. 4 Credits.

Examination of communication and mediated communication as cultural processes in the production and reproduction of social systems.

J 649. International Communication. 4 Credits.

Examines global communication structures and processes and their consequences. Topics include new technologies, news and information organizations, cross-cultural uses of Western media, and information policies.

J 654. Reporting within Communities. 4 Credits.

Students explore and practice emerging "community-first" concepts of journalism and reporting to identify the needs of the communities served, codesigning processes and solutions to keep them engaged.

J 656. Producing the Story. 4 Credits.

Students work collaboratively to create a compelling, ethical work of journalism with impact, applying all aspects of community engagement, reporting, storytelling, and production skills learned in previous terms.

J 660. Advanced Research Methods: [Topic]. 4 Credits.

Explores specific qualitative or quantitative communication research methods. Topics may include discourse analysis, oral history, historical methods, legal methods, content analysis, and survey methods.

Repeatable when topic changes.

Prereq: J 641 or J 642, depending on topic.

Journalism: Media Studies

The University of Oregon undergraduate program is based on the premise that the best professional communicator is broadly educated. In accordance with national accrediting standards, students must take at least 104 credits in courses outside the School of Journalism and Communication. A maximum of 76 credits in the 180-credit undergraduate program may be in journalism and communication courses. Students learn about media practice and effects. They study the role of the media in society, the history of journalism, visual communication, the ethics of media practices, the economics of the media, new media technologies, international communication, diversity in the media, and the legal and social responsibilities of the media.

In addition, undergraduates take three courses that provide a broad background in fundamental skills and concepts: Gateway to Media

(J 211) (8 credits), Writing for Communicators (J 212) (4 credits), and Fact or Fiction (J 213) (4 credits). These courses immerse students in writing for varied platforms and styles, ground them in the fundamentals of digital storytelling development and delivery, and aid them in developing critical thinking skills, providing majors with a foundational set of competencies before they move on to more specialized courses in their major areas of study.

Majors are required to minor in a field outside of the School of Journalism and Communication. Preparation in a second field is a valuable addition to a student's education and enhances employability.

Many students are active in campus affairs, working for the campus newspaper; the university's radio station; the student-run advertising, design, video, and public relations agencies; the award-winning *Flux* and *Ethos* magazines; television and online programs; and alternative and online publications, including *OR Magazine*, the first student-produced iPad publication. The school also encourages them to participate in UO chapters of Ed on Campus, Ad Society, National Broadcasting Society, National Press Photographers Association, Public Relations Student Society of America, Society of Professional Journalists, and such national venues as the One Club for Art and Copy. Internships are encouraged and available at newspapers, magazines, broadcast stations, advertising agencies, public relations offices, nonprofit organizations, government offices, video production firms, online publications, and public policy offices.

The best preparation for journalism majors is a broad college-preparatory program with emphasis on language skills, English literature, economics, history, and the political and social sciences. Prospective students also benefit from the study of mathematics, statistics, computer applications, and second languages.

Community college students planning to transfer to the School of Journalism and Communication should concentrate on college-transfer courses that fulfill university requirements. Almost all professional courses are taken at the School of Journalism and Communication. Advising material is available to community college students online.

- Bachelor of Arts
- Bachelor of Science

Undergraduate Studies

The role of the school's undergraduate program is to provide students with the creative, critical, and problem-solving skills they need to become ethical, professional communicators and critical media consumers.

Premajor Admission

New students planning to major in journalism enter the university as premajors and do not need to meet special admission requirements beyond the general university requirements.

Each premajor is assigned to a journalism and communication advisor who assists in planning programs, answering questions, and tracking progress toward admission as a major and toward graduation. Students should check with an advisor at least once a year to ensure that requirements are being met. In addition, students will be assigned a faculty advisor, who will guide them through the portfolio process. The director of student services for the school supervises undergraduate academic advising.

A university student in another major may switch to a journalism premajor online on the School of Journalism and Communication website. To become a premajor, a student must have a minimum cumulative grade point average (GPA) of 2.00 for all work at the University of Oregon.

Premajor Program

Students must complete the school's premajor core curriculum, and earn grades of C or better:

Code	Title	Credits
J 100	Media Professions	2
J 101	Grammar for Communicators	2
J 201	Media and Society	4
Total Credits		8

Admission as a Major

Admission to the School of Journalism and Communication is competitive. The faculty considers applications from premajor students who have

- completed 24 or more graded credits of course work at the University of Oregon, earning a cumulative UO GPA of at least 2.90
- completed College Composition I (WR 121) and College Composition II (WR 122) or College Composition III (WR 123) with grades of P or C– or better
- completed the school's premajor core curriculum

A student's GPA is a major factor in the admissions decision. Students with a GPA of 3.25 or higher are guaranteed admission to the major.

Applicants with grade point averages between 2.90 and 3.24 are evaluated and judged competitively by an admissions committee as applications are received. The admissions committee considers the requirements listed above and other materials that applicants submit, including a personal statement, letters of recommendation, and a portfolio. Students with a GPA below 2.90 may petition the committee for admission. The committee has the option of waiving any of the requirements listed above if evidence of a candidate's high potential for success in the major is presented and approved.

Transfer Students

Students transferring to the University of Oregon School of Journalism and Communication enter as premajors. They apply to the University of Oregon Office of Admissions and are accepted as premajors if they meet the university's general standards for admission. To be admitted to major status, transfer students must meet the school's requirements for admission as a major (p. 811).

Transfer Credit

The School of Journalism and Communication accepts journalism credits earned at other colleges and universities as follows:

1. Credits earned at schools of journalism accredited by the Accrediting Council on Education in Journalism and Mass Communications are accepted for journalism credit and may fulfill specific course requirements
2. Journalism credits may be accepted from unaccredited journalism programs, but they may not be used to meet specific course requirements. They do count toward the 76-credit limit set by national accrediting standards

3. Regardless of the number of credits transferred, students must take at least 27 credits of journalism in residence to earn a degree from the University of Oregon
4. Students may not take more than 76 credits in journalism courses out of the 180 total credits required for a bachelor's degree. They may, however, add credits to the 180-credit total to accommodate extra journalism credits (e.g., take 186 credits to accommodate as many as 82 credits in journalism)
5. The school accepts equivalent courses taught at other colleges to meet the Media and Society (J 201) requirement for application to be a major, and may accept equivalent courses to meet other core requirements if approved by the associate dean for undergraduate affairs

Transfer students who want to discuss the transfer policy may consult the associate dean, director of student services, or the advisors in the Student Services Center.

The school offers course work leading to bachelor of arts (BA) and bachelor of science (BS) degrees. Major requirements are the same for each. Differences between the two degrees are explained under Requirements for Bachelor of Arts and Bachelor of Science in the **Bachelor's Degree Requirements** (<http://catalog.uoregon.edu/bachelorrequirements>) section of this catalog.

Bachelor of Arts in Journalism: Media Studies Degree Requirements

Code	Title	Credits
Journalism Premajor Requirements		
J 100	Media Professions	2
J 101	Grammar for Communicators	2
J 201	Media and Society	4
Journalism: Media Studies Major Requirements		
J 211	Gateway to Media	8
J 212	Writing for Communicators	4
J 213	Fact or Fiction	4
J 314	Introduction to Media Studies	4
Select three of the following: ¹		12
J 320	Gender, Media, and Diversity	
J 385	Communication Law	
J 387	Media History	
J 396	International Communication	
J 397	Media Ethics	
Select three of the following: ¹		12
J 412	Issues in Communication Studies: [Topic]	
J 467	Issues in International Communication: [Topic]	
J 495	Research Methods: [Topic]	
J 496	Communication Ethics and Law: [Topic]	
Course approved by advisor in any form of media production		4
J 413	Communication Studies Capstone	4
General Studies Requirements²		
Literature courses ^{3,4}		16
History courses ⁴		8
Economics courses ⁴		8

General studies courses in three other subject codes within the College of Arts and Sciences⁴ 24

Total Credits 116

- ¹ Students must take three 300-level and three 400-level context courses, such as ethics, history, law, diversity, or international communication.
- ² Students must complete at least 104 nonjournalism credits.
- ³ Courses include the following:
 1. Literature courses taught by the Department of English and the Department of Comparative Literature. Courses in rhetoric, grammar, and cinema- or television-making do not count toward this requirement.
 2. Literature courses taught in English translation by foreign-language departments or the Department of Classics or courses that are cross-listed for major credit by these departments
 3. Introduction to the Humanities I-III (HUM 101–103)

One of the following categories may be used to satisfy 8 credits of this requirement:

- Courses taught in a second language that are part of a student's language program of study. Foreign-language courses used to fulfill the university's bachelor of arts requirement and writing courses used to fulfill the university composition requirement may not be used to fulfill the general-studies courses requirement.
 - Courses treating film or television as literature that have significant reading and writing components.
- ⁴ Courses numbered 196, 198, 199, 399–406, or 408–410 may not be used to fulfill these requirements. In addition to the literature, history, and economics block requirements, journalism students must complete three additional blocks. Each block consists of 8 credits of a subject offered by the College of Arts and Sciences. Eligible subjects codes are AEIS, AFR, ANTH, ARB, ASIA, ASL, ASTR, BI, CAS, CH, CHN, CINE, CIS, CIT, CLAS, COLT, CRWR, DANE, EALL, EC, ENG, ENVS, ES, EURO, FINN, FLR, FR, GEOG, GEOL, GER, GRK, HBRW, HC, HIST, HPHY, HUM, INTL, ITAL, JDST, JPN, KRN, LAS, LAT, LING, LT, MATH, MDVL, NORW, PHIL, PHYS, PORT, PS, PSY, REES, REL, RL, RUSS, SCAN, SOC, SPAN, SWAH, SWED, TA, WGS, WR.

The additional blocks *can* overlap with the following requirements:

- Courses taken to fulfill the university's arts and letters, social science, and science group-satisfying requirements (unless the course is also being used for journalism requirements in literature, history or economics)
- Courses taken toward the UO bachelor of science requirement
- Minor and second major course work in the College of Arts and Sciences
- Electives in the College of Arts and Sciences

The additional blocks *cannot* overlap with the following requirements:

- First- and second-year foreign language (if used for the bachelor of arts degree)
- Writing composition (WR) classes used for the UO writing requirement
- Courses used for the literature, history, or economics requirements in journalism

This requirement and the potential for overlap with other requirements can be very complicated and highly individualized. Please speak with your academic advisor to learn about your options.

 - Writing composition (WR) classes used for the UO writing requirement
 - Courses used for the literature, history, or economics requirements in journalism

This requirement and the potential for overlap with other requirements can be very complicated and highly individualized. Please speak with your academic advisor to learn about your options.

Additional Requirements

- Satisfactory completion of a minimum of 72 credits and a maximum of 76 credits in journalism, of which at least 27 must be taken at the University of Oregon School of Journalism and Communication and at least 40 must be upper-division
- Satisfactory completion of at least 104 credits in academic fields other than journalism. A student who graduates with 180 credits must count no more than 76 credits (including transfer credits) in journalism toward the degree. The 104 credits must include a minor or area of concentration outside of the School of Journalism and Communication
- Majors and premajors must take all school courses for letter grades unless a course is only offered pass/no pass (P/N). All graded journalism courses taken to satisfy the major must be passed with a grade of mid-C or better
- A cumulative GPA of 2.70 or better in courses taken in the School of Journalism and Communication at the time of graduation

Internship

A major may earn no more than 9 credits in Internship: [Topic] (J 404).

Honors Program

The honors program provides high-achieving students the opportunity to develop analytic, creative, critical thinking and research skills in small-group, discussion-oriented courses. The program develops a small multidisciplinary community of communications scholars from all the majors within the School of Journalism and Communication.

Students take three honors courses focusing on media theory, research, or issues, which partially fulfill the context course requirement. In addition,

students complete an original piece of scholarship or creative work in the senior year.

The program targets journalism majors entering their junior year who have a minimum 3.50 cumulative UO GPA. Applications are accepted each spring for the following year's cohort. Clark Honors College students are eligible to apply. More information is available on the school's website.

Second Bachelor's Degree

Students who already have a bachelor's degree and want to earn a second bachelor's degree in the School of Journalism and Communication may apply for premajor status through the university's Office of Admissions. Upon fulfilling the requirements for application for admission, they may apply for major status. Students must complete all of the school's requirements for graduation including the school's nonjournalism requirement and university requirements for the BA or BS. Credits, including transfer credits, earned for the first bachelor's degree may count toward meeting the requirements as long as they conform to the transfer-credit policy outlined previously.

Courses

J 100. Media Professions. 2 Credits.

Introduction to dynamic media and communication professions, opportunities, and issues, as well as to majors in journalism and communication.

J 101. Grammar for Communicators. 2 Credits.

Intensive review of grammar, word use, spelling, and principles of clear, concise writing. Introduction to media style. Premajor status required.

J 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

J 198. Colloquium: [Topic]. 1-2 Credits.

Repeatable.

J 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 201. Media and Society. 4 Credits.

Introduction to the critical examination of the roles of media in society.

J 208. Introduction to Documentary Production. 4 Credits.

Introduction to the theory and practice of documentary production. Focuses on aesthetics, technology, research, and writing fundamentals of documentary making, covering preproduction, production and postproduction. Cinema studies majors only. Prereq: J 201, CINE 260M or ENG 260M; two from CINE 265, 266, 267.

J 211. Gateway to Media. 8 Credits.

Integrates critical thinking, creative thinking, and basic skills for nonfiction storytelling through words, photos, audio, and video. Majors only. Prereq: J 100, J 101, J 201.

J 212. Writing for Communicators. 4 Credits.

Course builds on what was learned Grammar for Communicators course (J 101) to help students develop the ability to write for a variety of professional platforms and to achieve the appropriate strategic purpose. Prereq: J 100, J 101, J 201.

J 213. Fact or Fiction. 4 Credits.

This course helps students grapple with information in the digital age to evaluate how media professional develop notions of truth, ethics, and transparency. It covers information credibility, social media algorithms, and data and numerical literacy. Prereq: J 100, J 101, J 201.

J 314. Introduction to Media Studies. 4 Credits.

Presents a historical overview of the study of media, with in-depth discussion of primary theoretical approaches and their application to the current media environment. Majors only. Prereq: J 201 with a grade of mid-C or better.

J 315H. Honors Media Theory and Research. 4 Credits.

Foundation course for honors program. Introduction to seminal theories in communication; overview of methodologies used in the study of theories. Acceptance into School of Journalism and Communication honors program required for enrollment.

J 320. Gender, Media, and Diversity. 4 Credits.

Critical study of the media with regard to gender, race, ethnicity, and other social divisions. Ramification and possible mechanisms of change. Prereq: J 201 with a grade of mid-C or better.

J 331. Digital Video Production. 4 Credits.

Introduction to techniques of single-camera field video production. Journalism and cinema studies majors only. Prereq: J 205 and J 206 or J 211 with a grade of mid-C or better, or J 208 with a grade of mid-C or better.

J 333. Writing for Multimedia. 4 Credits.

Introduction to the process and practice of writing for multimedia, including print, audio-video, computer-assisted presentation, web-based applications, and striking the balance between word and image. Journalism majors or multimedia minor standing only. Prereq: ARTD 250, 251, 252.

J 340. Principles of Advertising. 4 Credits.

Role of advertising in the distribution of goods and services; the advertising agency; the campaign; research and testing; the selection of media: print, electronic, outdoor advertising, direct mailing. Not for journalism: advertising majors.

J 342. The Creative Strategist. 4 Credits.

Creative approaches to ideation and strategic thinking for all advertising specialties. Emphasis on creative process, generative techniques, teamwork, career planning, industry trends. Journalism: advertising majors only. Prereq: J 205 and J 206 or J 211.

J 350. Principles of Public Relations. 4 Credits.

Overview of public relations practice in a diverse global society, including theory, career opportunities, history, communication forms and channels, and legal and ethical concerns.

J 352. Strategic Writing and Media Relations. 4 Credits.

Writing-intensive lab; students produce strategic, theory-based content for multiple media platforms using various journalistic styles and storytelling skills and incorporating ethical media-relations practices. Prereq: J 205 and J 206 and J 350, or J211 and J 350 with a grade of mid-C or better.

J 361. Reporting I. 4 Credits.

News gathering and writing. Extensive writing in class and outside of class in a variety of forms: news, features, interviews, multimedia scripts. Journalism majors only. Prereq: J 205 and J 206, or J 211 with a grade of mid-C or better.

J 365. Photojournalism. 4 Credits.

Visual reporting techniques, with emphasis on practice, law, and ethics of photojournalism and photographic communication. Laboratory and portfolio-intensive. Majors only. Prereq: J 205 and J 206, or J 211 with a grade of mid-C or better.

J 371. Feature Writing I. 4 Credits.

Introduction to feature writing for print and online media; marketing your ideas and stories. Journalism majors only.

Prereq: J 361 with a grade of mid-C or better.

J 385. Communication Law. 4 Credits.

Legal aspects of the media: constitutional freedom of expression, news gathering, access to public records, libel, privacy, copyright, advertising, electronic media regulation, and antitrust.

Prereq: J 201 with a grade of mid-C or better.

J 387. Media History. 4 Credits.

The changing structure and character of the media in the United States.

Prereq: J 201 with a grade of mid-C or better.

J 396. International Communication. 4 Credits.

National and cultural differences in media and information systems, global news and information flows, implications of rapid technological change, and communication and information policies.

Prereq: J 201 with a grade of mid-C or better.

J 397. Media Ethics. 4 Credits.

Ethical problems in the media: privacy, violence, pornography, truth-telling, objectivity, media codes, public interest, media accountability.

Prereq: J 201 with a grade of mid-C or better.

J 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 401. Research: [Topic]. 1-9 Credits.

Repeatable.

J 403. Thesis. 1-9 Credits.

Repeatable.

J 404. Internship: [Topic]. 1-9 Credits.

Repeatable for maximum of 9 credits.

J 405. Reading and Conference: [Topic]. 1-9 Credits.

Repeatable.

J 406. Special Problems: [Topic]. 1-9 Credits.

Repeatable.

J 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 409. Practicum: [Topic]. 1-4 Credits.

Repeatable.

J 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 411M.

Prereq: J 201 with a grade of mid-C or better.

J 412. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Repeatable when topic changes. Majors only.

Prereq: J 201 with a grade of mid-C or better.

J 413. Communication Studies Capstone. 4 Credits.

Draws on skills and knowledge learned in other communications studies and related courses to demonstrate competence in broad areas of research.

Prereq: J 314 for 4 credits with grade of mid-C or better.

J 416. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and communication studies minors only.

Prereq: J 201 with grade of mid-C or better.

J 421. Documentary Production. 4 Credits.

Workshop in preparation, shooting, and postproduction of the short documentary. Journalism and cinema studies majors only.

Prereq: J 331 with a grade of mid-C or better.

J 424H. Honors Theory and Research: [Topic]. 4 Credits.

Uses a variety of theories and methods to closely examine and analyze contemporary problems and situations in media and communications.

Acceptance into School of Journalism and Communication honors program required for enrollment. Repeatable once when topic changes for a maximum of 8 credits.

J 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews.

Multilisted with ANTH 427M/527M. Sequence with J 428M/528M. Offered alternate years.

J 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M/528M. Sequence with J 427M/527M. Offered alternate years.

Prereq: J 427M.

J 432. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

Prereq: J 331, J 361 with a grade of mid-C or better.

J 434. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 331, J 361, J 432 with a grade of mid-C or better.

J 436. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

Prereq: J 361 with a mid-C or better.

J 443. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools.

Journalism: advertising majors only.

Prereq: J 207, 342 with a grade of mid-C or better.

J 444. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

Prereq: J 205 and J 206 and J 342, or J 211 and J342 with a grade of mid-C or better.

J 448. Advertising Campaigns. 4 Credits.

Seniors produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only. Prereq: three from J 443/543, 444/544, 457/557, 458/558, 459/559, 460/560 with a grade of mid-C or better.

J 449. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 452. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only. Prereq: J 352 with a grade of mid-C or better.

J 453. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only. Prereq- J 352 with a grade of mid-C or better

J 454. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only. Prereq: J 452, J 453; J 494 with a grade of mid-C or better.

J 457. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only. Prereq: J 205, 206, 207, 342 with a grade of mid-C or better.

J 458. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only. Prereq: J 205 and 206 and 342, or J 211 and 342, with a grade of mid-C or better.

J 459. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. For Journalism: advertising majors only. Prereq: J 205, 206, 207, 342 with a grade of mid-C or better.

J 460. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes. Prereq: J 205 and J 206 and 342, or J211 and J 342, with a grade of mid-C or better.

J 461. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only. Prereq: J 361 or equivalent with a grade of mid-C or better.

J 462. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only. Prereq: J 361 with a grade of mid-C or better.

J 463. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable. Prereq: J 361 with a grade of mid-C or better.

J 466. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes. Prereq: J 365 with a grade of mid-C or better.

J 467. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors and minors only; cinema studies majors for approved topics. Repeatable twice for a maximum of 12 credits when topic changes. Prereq: J 201 with a grade of mid-C or better.

J 468. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only. Prereq: J 461 with a grade of mid-C or better.

J 469. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 472. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only. Prereq: J 361, J 371 with a grade of mid-C or better.

J 473. Feature Editing. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only. Prereq: J 361, J 371 with a grade of mid-C or better.

J 475. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits. Prereq: J 361 with a grade of mid-C or better.

J 480. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 483. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only. Prereq: J 361 with a grade of mid-C or better.

J 494. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.
Prereq: J 342 or J 350.

J 495. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Majors and minors only. Repeatable when topic changes for a maximum of 12 credits.
Prereq: J 201 with a grade of mid-C or better.

J 496. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Repeatable when topic changes. Majors and minors only.
Prereq: J 201 with a grade of mid-C or better.

J 503. Thesis. 1-9 Credits.

Repeatable.

J 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 511M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 511M.

J 512. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Repeatable when topic changes. Majors only.

J 516. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and communication studies minors only.

J 521. Documentary Production. 4 Credits.

Workshop in preparation, shooting, and postproduction of the short documentary. Journalism and cinema studies majors only.

J 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 427M/527M. Sequence with J 428M/528M. Offered alternate years.

J 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M/528M. Sequence with J 427M/527M. Offered alternate years.
Prereq: J 527M.

J 532. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

J 534. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.
Prereq: J 532 with a grade of mid-C or better.

J 536. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

J 543. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools. Journalism: advertising majors only.

J 544. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

J 548. Advertising Campaigns. 4 Credits.

Graduate students produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.
Prereq: three from J 443/543, 444/544, 456/556, 457/557, 458/558, 459/559, 460/560.

J 549. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 552. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

J 553. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

J 554. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.
Prereq: J 552, J 553; one from J 594, J 595.

J 557. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

J 558. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

J 559. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. Journalism: advertising majors only.

J 560. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 561. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

J 562. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

J 563. Specialized Reporting. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only.

J 566. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 567. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors only. Repeatable twice for a maximum of 12 credits when topic changes.

J 568. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.

Prereq: J 561 with a grade of mid-C or better.

J 569. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 572. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 573. Feature Editing. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 575. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

J 580. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 583. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

J 594. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

J 595. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Journalism majors only. Repeatable when topic changes for a maximum of 12 credits.

J 596. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Repeatable when topic changes. Majors only.

J 601. Research: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 602. Supervised College Teaching. 1-5 Credits.

Repeatable for maximum of 5 credits.

J 603. Dissertation. 1-16 Credits.

Course may be repeated 25 times for credit after the initial instance.

J 604. Internship: [Topic]. 1-6 Credits.

Repeatable for maximum of 12 credits.

J 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 606. Special Problems: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

J 608. Workshop: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 609. Terminal Project. 1-6 Credits.

Repeatable for maximum of 6 credits.

J 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

J 611. Mass Communication and Society. 4 Credits.

Review of the literature of mass communication. Introduction to graduate study in journalism and communication.

J 612. Media Theory I. 5 Credits.

First in a three-part sequence introducing students to media theory, focusing on the social scientific tradition. Sequence with J 613, J 614.

J 613. Media Theory II. 5 Credits.

Second in a three-part sequence introducing students to media theory, focusing on critical approaches. Sequence with J 612, J 614.

Prereq: J 612.

J 614. Media Theory III. 5 Credits.

Third in a three-part sequence introducing students to media theory, focusing on contemporary theoretical perspectives. Series with J 612, J 613.

Prereq: J 613.

J 616. Introduction to Strategic Communication Marketing. 4 Credits.

Discussion of fundamental marketing concepts from the perspective of the manager. Analysis of complex marketing challenges in research, segmentation, targeting, pricing, distribution, and branding.

J 617. Strategic Communication Theory and Research: [Topic]. 4 Credits.

Theory, research, and practice of strategic communication. Topics may include relationship management, risk communication, identity and culture, and social media theory. Repeatable when topic changes for a maximum of 20 credits.

Prereq: graduate standing.

J 618. Strategic Communication Management. 4 Credits.

Elements of managing and leading organizations; examination of key issues faced by leaders. Topics include leadership theory, leading change, dealing with conflict, and performance and strategic management.

J 619. Teaching and the Professional Life. 4 Credits.

Explores teaching strategies, curriculum development, and other aspects of academic professional life in journalism and communication.

J 621. Foundations of Strategic Communication. 4 Credits.

Reviews major theories, models, and practices in strategic communications. Theoretical topics include media effects and persuasion as applied to public relations, advertising, and other strategic communication.

J 623. Creativity in Strategic Communication. 4 Credits.

Explores the use of creative conceptual thinking as part of the strategic basis in successful communication campaigns.

J 624. Strategic Communication: [Topic]. 2 Credits.

Explores problems and specialized skills needed in strategic communication management. Examples include crisis communication, creativity in business, corporate social responsibility. Repeatable with change in topic.

J 626. Strategic Marketing Communication. 4 Credits.

Examination, evaluation, and integration of advertising, public relations, sales promotion, direct marketing, social media, sponsorship and events, packaging, customer service, and personal selling.

J 627. Foundations of Multimedia Journalism. 4 Credits.

Serves as a foundation of theory and technique, with an introduction to storytelling forms, technical production skills, and the visual language. Students will learn how to use the tools of the trade so that they can communicate effectively with other multimedia journalists.

J 628. Multimedia Journalism Practices. 4 Credits.

Building on the J 627 course, students create a narrative video project that focuses on visual storytelling, character development, and present-tense storytelling.

J 638. Story and Commerce. 4 Credits.

Explores the changing face of narrative journalism as it investigates the new commercial opportunities for the professional journalist. Taught once or more per academic year.

J 641. Qualitative Research Methods. 4 Credits.

Introduces qualitative research methods including traditional historical inquiry, oral history, ethnography, and participant observation.

J 642. Quantitative Research Methods. 4 Credits.

Introduces and analyzes quantitative research methods in terms of design, measurement, inference, and validity. Focuses on conceptualization in communication research.

J 643. Proseminar II. 5 Credits.

Seminar participants demonstrate competence in broad families of social research by drawing on skills and knowledge obtained in J 612, J 613, J 614, J 641, and J 642.

Prereq: J 612, J 613, J 614, J 641, J 642.

J 646. Political Economy of Communication. 4 Credits.

Introduction to the political economy of communication. Includes such issues as ownership and control patterns; the role of the state; labor; intellectual property rights; and international markets.

J 648. Cultural Approaches to Communication. 4 Credits.

Examination of communication and mediated communication as cultural processes in the production and reproduction of social systems.

J 649. International Communication. 4 Credits.

Examines global communication structures and processes and their consequences. Topics include new technologies, news and information organizations, cross-cultural uses of Western media, and information policies.

J 654. Reporting within Communities. 4 Credits.

Students explore and practice emerging "community-first" concepts of journalism and reporting to identify the needs of the communities served, codesigning processes and solutions to keep them engaged.

J 656. Producing the Story. 4 Credits.

Students work collaboratively to create a compelling, ethical work of journalism with impact, applying all aspects of community engagement, reporting, storytelling, and production skills learned in previous terms.

J 660. Advanced Research Methods: [Topic]. 4 Credits.

Explores specific qualitative or quantitative communication research methods. Topics may include discourse analysis, oral history, historical methods, legal methods, content analysis, and survey methods.

Repeatable when topic changes.

Prereq: J 641 or J 642, depending on topic.

Journalism: Public Relations

The University of Oregon undergraduate program is based on the premise that the best professional communicator is broadly educated. In accordance with national accrediting standards, students must take at least 104 credits in courses outside the School of Journalism and Communication. A maximum of 76 credits in the 180-credit undergraduate program may be in journalism and communication courses. Students learn about media practice and effects. They study the role of the media in society, the history of journalism, visual communication, the ethics of media practices, the economics of the media, new media technologies, international communication, diversity in the media, and the legal and social responsibilities of the media.

In addition, undergraduates take three courses that provide a broad background in fundamental skills and concepts: Gateway to Media (J 211) (8 credits), Writing for Communicators (J 212) (4 credits), and Fact or Fiction (J 213) (4 credits). These courses immerse students in writing for varied platforms and styles, ground them in the fundamentals of digital storytelling development and delivery, and aid them in developing critical thinking skills, providing majors with a foundational set of competencies before they move on to more specialized courses in their major areas of study.

Majors are required to minor in a field outside of the School of Journalism and Communication. Preparation in a second field is a valuable addition to a student's education and enhances employability.

Many students are active in campus affairs, working for the campus newspaper; the university's radio station; the student-run advertising, design, video, and public relations agencies; the award-winning *Flux* and *Ethos* magazines; television and online programs; and alternative and online publications, including *OR Magazine*, the first student-produced iPad publication. The school also encourages them to participate in UO

chapters of Ed on Campus, Ad Society, National Broadcasting Society, National Press Photographers Association, Public Relations Student Society of America, Society of Professional Journalists, and such national venues as the One Club for Art and Copy. Internships are encouraged and available at newspapers, magazines, broadcast stations, advertising agencies, public relations offices, nonprofit organizations, government offices, video production firms, online publications, and public policy offices.

The best preparation for journalism majors is a broad college-preparatory program with emphasis on language skills, English literature, economics, history, and the political and social sciences. Prospective students also benefit from the study of mathematics, statistics, computer applications, and second languages.

Community college students planning to transfer to the School of Journalism and Communication should concentrate on college-transfer courses that fulfill university requirements. Almost all professional courses are taken at the School of Journalism and Communication. Advising material is available to community college students online.

- **Bachelor of Arts**
- **Bachelor of Science**

Undergraduate Studies

The role of the school's undergraduate program is to provide students with the creative, critical, and problem-solving skills they need to become ethical, professional communicators and critical media consumers.

Premajor Admission

New students planning to major in journalism enter the university as premajors and do not need to meet special admission requirements beyond the general university requirements.

Each premajor is assigned to a journalism and communication advisor who assists in planning programs, answering questions, and tracking progress toward admission as a major and toward graduation. Students should check with an advisor at least once a year to ensure that requirements are being met. In addition, students will be assigned a faculty advisor, who will guide them through the portfolio process. The director of student services for the school supervises undergraduate academic advising.

A university student in another major may switch to a journalism premajor online on the School of Journalism and Communication website. To become a premajor, a student must have a minimum cumulative grade point average (GPA) of 2.00 for all work at the University of Oregon.

Premajor Program

Students must complete the school's premajor core curriculum, and earn grades of C or better:

Code	Title	Credits
J 100	Media Professions	2
J 101	Grammar for Communicators	2
J 201	Media and Society	4
Total Credits		8

Admission as a Major

Admission to the School of Journalism and Communication is competitive. The faculty considers applications from premajor students who have

- completed 24 or more graded credits of course work at the University of Oregon, earning a cumulative UO GPA of at least 2.90
- completed College Composition I (WR 121) and College Composition II (WR 122) or College Composition III (WR 123) with grades of P or C– or better
- completed the school's premajor core curriculum

A student's GPA is a major factor in the admissions decision. Students with a GPA of 3.25 or higher are guaranteed admission to the major.

Applicants with grade point averages between 2.90 and 3.24 are evaluated and judged competitively by an admissions committee as applications are received. The admissions committee considers the requirements listed above and other materials that applicants submit, including a personal statement, letters of recommendation, and a portfolio. Students with a GPA below 2.90 may petition the committee for admission. The committee has the option of waiving any of the requirements listed above if evidence of a candidate's high potential for success in the major is presented and approved.

Transfer Students

Students transferring to the University of Oregon School of Journalism and Communication enter as premajors. They apply to the University of Oregon Office of Admissions and are accepted as premajors if they meet the university's general standards for admission. To be admitted to major status, transfer students must meet the school's requirements for admission as a major (p. 820).

Transfer Credit

The School of Journalism and Communication accepts journalism credits earned at other colleges and universities as follows:

1. Credits earned at schools of journalism accredited by the Accrediting Council on Education in Journalism and Mass Communications are accepted for journalism credit and may fulfill specific course requirements
2. Journalism credits may be accepted from unaccredited journalism programs, but they may not be used to meet specific course requirements. They do count toward the 76-credit limit set by national accrediting standards
3. Regardless of the number of credits transferred, students must take at least 27 credits of journalism in residence to earn a degree from the University of Oregon
4. Students may not take more than 76 credits in journalism courses out of the 180 total credits required for a bachelor's degree. They may, however, add credits to the 180-credit total to accommodate extra journalism credits (e.g., take 186 credits to accommodate as many as 82 credits in journalism)
5. The school accepts equivalent courses taught at other colleges to meet the Media and Society (J 201) requirement for application to be a major, and may accept equivalent courses to meet other core requirements if approved by the associate dean for undergraduate affairs

Transfer students who want to discuss the transfer policy may consult the associate dean, director of student services, or the advisors in the Student Services Center.

The school offers course work leading to bachelor of arts (BA) and bachelor of science (BS) degrees. Major requirements are the same for each. Differences between the two degrees are explained under Requirements for Bachelor of Arts and Bachelor of Science in the **Bachelor's Degree Requirements** section of this catalog.

Additional Requirements

- Satisfactory completion of a minimum of 60 credits and a maximum of 76 credits in journalism, of which at least 27 must be taken at the University of Oregon School of Journalism and Communication and at least 24 must be upper division
- Satisfactory completion of at least 104 credits in academic fields other than journalism. A student who graduates with 180 credits must count no more than 76 credits (including transfer credits) in journalism toward the degree
- Students must take a minimum of 20 upper-division credits in journalism: public relations, including prerequisites
- Majors and premajors must take all school courses for letter grades unless a course is only offered pass/no pass (P/N). All graded journalism courses taken to satisfy the major must be passed with a grade of mid-C or better
- A cumulative GPA of 2.70 or better in courses taken in the School of Journalism and Communication at the time of graduation

Internship

A major may earn no more than 9 credits in Internship: [Topic] (J 404).

Honors Program

The honors program provides high-achieving students the opportunity to develop analytic, creative, critical thinking and research skills in small-group, discussion-oriented courses. The program develops a small multidisciplinary community of communications scholars from all the majors within the School of Journalism and Communication.

Students take three honors courses focusing on media theory, research, or issues, which partially fulfill the context course requirement. In addition, students complete an original piece of scholarship or creative work in the senior year.

The program targets journalism majors entering their junior year who have a minimum 3.50 cumulative UO GPA. Applications are accepted each spring for the following year's cohort. Clark Honors College students are eligible to apply. More information is available on the school's website.

Second Bachelor's Degree

Students who already have a bachelor's degree and want to earn a second bachelor's degree in the School of Journalism and Communication may apply for premajor status through the university's Office of Admissions. Upon fulfilling the requirements for application for admission, they may apply for major status. Students must complete all of the school's requirements for graduation including the school's arts and sciences requirement and university requirements for the BA or BS. Credits, including transfer credits, earned for the first bachelor's degree

may count toward meeting the requirements as long as they conform to the transfer-credit policy outlined previously.

Courses

J 100. Media Professions. 2 Credits.

Introduction to dynamic media and communication professions, opportunities, and issues, as well as to majors in journalism and communication.

J 101. Grammar for Communicators. 2 Credits.

Intensive review of grammar, word use, spelling, and principles of clear, concise writing. Introduction to media style. Premajor status required.

J 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

J 198. Colloquium: [Topic]. 1-2 Credits.

Repeatable.

J 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 201. Media and Society. 4 Credits.

Introduction to the critical examination of the roles of media in society.

J 208. Introduction to Documentary Production. 4 Credits.

Introduction to the theory and practice of documentary production. Focuses on aesthetics, technology, research, and writing fundamentals of documentary making, covering preproduction, production and postproduction. Cinema studies majors only.
Prereq: J 201, CINE 260M or ENG 260M; two from CINE 265, 266, 267.

J 211. Gateway to Media. 8 Credits.

Integrates critical thinking, creative thinking, and basic skills for nonfiction storytelling through words, photos, audio, and video. Majors only.
Prereq: J 100, J 101, J 201.

J 212. Writing for Communicators. 4 Credits.

Course builds on what was learned Grammar for Communicators course (J 101) to help students develop the ability to write for a variety of professional platforms and to achieve the appropriate strategic purpose.
Prereq: J 100, J 101, J 201.

J 213. Fact or Fiction. 4 Credits.

This course helps students grapple with information in the digital age to evaluate how media professionals develop notions of truth, ethics, and transparency. It covers information credibility, social media algorithms, and data and numerical literacy.
Prereq: J 100, J 101, J 201.

J 314. Introduction to Media Studies. 4 Credits.

Presents a historical overview of the study of media, with in-depth discussion of primary theoretical approaches and their application to the current media environment. Majors only.
Prereq: J 201 with a grade of mid-C or better.

J 315H. Honors Media Theory and Research. 4 Credits.

Foundation course for honors program. Introduction to seminal theories in communication; overview of methodologies used in the study of theories. Acceptance into School of Journalism and Communication honors program required for enrollment.

J 320. Gender, Media, and Diversity. 4 Credits.

Critical study of the media with regard to gender, race, ethnicity, and other social divisions. Ramification and possible mechanisms of change.
Prereq: J 201 with a grade of mid-C or better.

J 331. Digital Video Production. 4 Credits.

Introduction to techniques of single-camera field video production. Journalism and cinema studies majors only.
Prereq: J 205 and J 206 or J 211 with a grade of mid-C or better, or J 208 with a grade of mid-C or better.

J 333. Writing for Multimedia. 4 Credits.

Introduction to the process and practice of writing for multimedia, including print, audio-video, computer-assisted presentation, web-based applications, and striking the balance between word and image. Journalism majors or multimedia minor standing only.
Prereq: ARTD 250, 251, 252.

J 340. Principles of Advertising. 4 Credits.

Role of advertising in the distribution of goods and services; the advertising agency; the campaign; research and testing; the selection of media: print, electronic, outdoor advertising, direct mailing. Not for journalism: advertising majors.

J 342. The Creative Strategist. 4 Credits.

Creative approaches to ideation and strategic thinking for all advertising specialties. Emphasis on creative process, generative techniques, teamwork, career planning, industry trends. Journalism: advertising majors only.
Prereq: J 205 and J 206 or J 211.

J 350. Principles of Public Relations. 4 Credits.

Overview of public relations practice in a diverse global society, including theory, career opportunities, history, communication forms and channels, and legal and ethical concerns.

J 352. Strategic Writing and Media Relations. 4 Credits.

Writing-intensive lab; students produce strategic, theory-based content for multiple media platforms using various journalistic styles and storytelling skills and incorporating ethical media-relations practices.
Prereq: J 205 and J 206 and J 350, or J211 and J 350 with a grade of mid-C or better.

J 361. Reporting I. 4 Credits.

News gathering and writing. Extensive writing in class and outside of class in a variety of forms: news, features, interviews, multimedia scripts. Journalism majors only.
Prereq: J 205 and J 206, or J 211 with a grade of mid-C or better.

J 365. Photojournalism. 4 Credits.

Visual reporting techniques, with emphasis on practice, law, and ethics of photojournalism and photographic communication. Laboratory and portfolio-intensive. Majors only.
Prereq: J 205 and J 206, or J 211 with a grade of mid-C or better.

J 371. Feature Writing I. 4 Credits.

Introduction to feature writing for print and online media; marketing your ideas and stories. Journalism majors only.
Prereq: J 361 with a grade of mid-C or better.

J 385. Communication Law. 4 Credits.

Legal aspects of the media: constitutional freedom of expression, news gathering, access to public records, libel, privacy, copyright, advertising, electronic media regulation, and antitrust.
Prereq: J 201 with a grade of mid-C or better.

J 387. Media History. 4 Credits.

The changing structure and character of the media in the United States.
Prereq: J 201 with a grade of mid-C or better.

J 396. International Communication. 4 Credits.

National and cultural differences in media and information systems, global news and information flows, implications of rapid technological change, and communication and information policies.

Prereq: J 201 with a grade of mid-C or better.

J 397. Media Ethics. 4 Credits.

Ethical problems in the media: privacy, violence, pornography, truth-telling, objectivity, media codes, public interest, media accountability.

Prereq: J 201 with a grade of mid-C or better.

J 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 401. Research: [Topic]. 1-9 Credits.

Repeatable.

J 403. Thesis. 1-9 Credits.

Repeatable.

J 404. Internship: [Topic]. 1-9 Credits.

Repeatable for maximum of 9 credits.

J 405. Reading and Conference: [Topic]. 1-9 Credits.

Repeatable.

J 406. Special Problems: [Topic]. 1-9 Credits.

Repeatable.

J 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 409. Practicum: [Topic]. 1-4 Credits.

Repeatable.

J 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 411M.

Prereq: J 201 with a grade of mid-C or better.

J 412. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Repeatable when topic changes. Majors only.

Prereq: J 201 with a grade of mid-C or better.

J 413. Communication Studies Capstone. 4 Credits.

Draws on skills and knowledge learned in other communications studies and related courses to demonstrate competence in broad areas of research.

Prereq: J 314 for 4 credits with grade of mid-C or better.

J 416. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and communication studies minors only.

Prereq: J 201 with grade of mid-C or better.

J 421. Documentary Production. 4 Credits.

Workshop in preparation, shooting, and postproduction of the short documentary. Journalism and cinema studies majors only.

Prereq: J 331 with a grade of mid-C or better.

J 424H. Honors Theory and Research: [Topic]. 4 Credits.

Uses a variety of theories and methods to closely examine and analyze contemporary problems and situations in media and communications.

Acceptance into School of Journalism and Communication honors program required for enrollment. Repeatable once when topic changes for a maximum of 8 credits.

J 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews.

Multilisted with ANTH 427M/527M. Sequence with J 428M/528M. Offered alternate years.

J 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M/528M. Sequence with J 427M/527M. Offered alternate years.

Prereq: J 427M.

J 432. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

Prereq: J 331, J 361 with a grade of mid-C or better.

J 434. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 331, J 361, J 432 with a grade of mid-C or better.

J 436. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

Prereq: J 361 with a mid-C or better.

J 443. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools.

Journalism: advertising majors only.

Prereq: J 207, 342 with a grade of mid-C or better.

J 444. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

Prereq: J 205 and J 206 and J 342, or J 211 and J342 with a grade of mid-C or better.

J 448. Advertising Campaigns. 4 Credits.

Seniors produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 443/543, 444/544, 457/557, 458/558, 459/559, 460/560 with a grade of mid-C or better.

J 449. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan.

Students participate in a national competition. Journalism: advertising majors only.

J 452. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

Prereq: J 352 with a grade of mid-C or better.

J 453. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

Prereq- J 352 with a grade of mid-C or better

J 454. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 452, J 453; J 494 with a grade of mid-C or better.

J 457. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

Prereq: J 205, 206, 207, 342 with a grade of mid-C or better.

J 458. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

Prereq: J 205 and 206 and 342, or J 211 and 342, with a grade of mid-C or better.

J 459. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. For Journalism: advertising majors only.

Prereq: J 205, 206, 207, 342 with a grade of mid-C or better.

J 460. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 205 and J 206 and 342, or J211 and J 342, with a grade of mid-C or better.

J 461. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

Prereq: J 361 or equivalent with a grade of mid-C or better.

J 462. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

Prereq: J 361 with a grade of mid-C or better.

J 463. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable.

Prereq: J 361 with a grade of mid-C or better.

J 466. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 365 with a grade of mid-C or better.

J 467. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors and minors only; cinema studies majors for approved topics. Repeatable twice for a maximum of 12 credits when topic changes.

Prereq: J 201 with a grade of mid-C or better.

J 468. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.

Prereq: J 461 with a grade of mid-C or better.

J 469. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 472. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

Prereq: J 361, J 371 with a grade of mid-C or better.

J 473. Feature Editing. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

Prereq: J 361, J 371 with a grade of mid-C or better.

J 475. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

Prereq: J 361 with a grade of mid-C or better.

J 480. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 483. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

Prereq: J 361 with a grade of mid-C or better.

J 494. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

Prereq: J 342 or J 350.

J 495. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Majors and minors only. Repeatable when topic changes for a maximum of 12 credits.

Prereq: J 201 with a grade of mid-C or better.

J 496. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Repeatable when topic changes. Majors and minors only.

Prereq: J 201 with a grade of mid-C or better.

J 503. Thesis. 1-9 Credits.

Repeatable.

J 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 511M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 511M.

J 512. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Repeatable when topic changes. Majors only.

J 516. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and communication studies minors only.

J 521. Documentary Production. 4 Credits.

Workshop in preparation, shooting, and postproduction of the short documentary. Journalism and cinema studies majors only.

J 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 427M/527M. Sequence with J 428M/528M. Offered alternate years.

J 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M/528M. Sequence with J 427M/527M. Offered alternate years.

Prereq: J 527M.

J 532. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

J 534. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 532 with a grade of mid-C or better.

J 536. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

J 543. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools.

Journalism: advertising majors only.

J 544. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

J 548. Advertising Campaigns. 4 Credits.

Graduate students produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 443/543, 444/544, 456/556, 457/557, 458/558, 459/559, 460/560.

J 549. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 552. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

J 553. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

J 554. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 552, J 553; one from J 594, J 595.

J 557. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

J 558. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

J 559. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. Journalism: advertising majors only.

J 560. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 561. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

J 562. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

J 563. Specialized Reporting. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only.

J 566. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 567. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors only. Repeatable twice for a maximum of 12 credits when topic changes.

J 568. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.
Prereq: J 561 with a grade of mid-C or better.

J 569. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 572. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 573. Feature Editing. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 575. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

J 580. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 583. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

J 594. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

J 595. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Journalism majors only. Repeatable when topic changes for a maximum of 12 credits.

J 596. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Repeatable when topic changes. Majors only.

J 601. Research: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 602. Supervised College Teaching. 1-5 Credits.

Repeatable for maximum of 5 credits.

J 603. Dissertation. 1-16 Credits.

Course may be repeated 25 times for credit after the initial instance.

J 604. Internship: [Topic]. 1-6 Credits.

Repeatable for maximum of 12 credits.

J 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 606. Special Problems: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

J 608. Workshop: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 609. Terminal Project. 1-6 Credits.

Repeatable for maximum of 6 credits.

J 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

J 611. Mass Communication and Society. 4 Credits.

Review of the literature of mass communication. Introduction to graduate study in journalism and communication.

J 612. Media Theory I. 5 Credits.

First in a three-part sequence introducing students to media theory, focusing on the social scientific tradition. Sequence with J 613, J 614.

J 613. Media Theory II. 5 Credits.

Second in a three-part sequence introducing students to media theory, focusing on critical approaches. Sequence with J 612, J 614.
Prereq: J 612.

J 614. Media Theory III. 5 Credits.

Third in a three-part sequence introducing students to media theory, focusing on contemporary theoretical perspectives. Series with J 612, J 613.
Prereq: J 613.

J 616. Introduction to Strategic Communication Marketing. 4 Credits.

Discussion of fundamental marketing concepts from the perspective of the manager. Analysis of complex marketing challenges in research, segmentation, targeting, pricing, distribution, and branding.

J 617. Strategic Communication Theory and Research: [Topic]. 4 Credits.

Theory, research, and practice of strategic communication. Topics may include relationship management, risk communication, identity and culture, and social media theory. Repeatable when topic changes for a maximum of 20 credits.

Prereq: graduate standing.

J 618. Strategic Communication Management. 4 Credits.

Elements of managing and leading organizations; examination of key issues faced by leaders. Topics include leadership theory, leading change, dealing with conflict, and performance and strategic management.

J 619. Teaching and the Professional Life. 4 Credits.

Explores teaching strategies, curriculum development, and other aspects of academic professional life in journalism and communication.

J 621. Foundations of Strategic Communication. 4 Credits.

Reviews major theories, models, and practices in strategic communications. Theoretical topics include media effects and persuasion as applied to public relations, advertising, and other strategic communication.

J 623. Creativity in Strategic Communication. 4 Credits.

Explores the use of creative conceptual thinking as part of the strategic basis in successful communication campaigns.

J 624. Strategic Communication: [Topic]. 2 Credits.

Explores problems and specialized skills needed in strategic communication management. Examples include crisis communication, creativity in business, corporate social responsibility. Repeatable with change in topic.

J 626. Strategic Marketing Communication. 4 Credits.

Examination, evaluation, and integration of advertising, public relations, sales promotion, direct marketing, social media, sponsorship and events, packaging, customer service, and personal selling.

J 627. Foundations of Multimedia Journalism. 4 Credits.

Serves as a foundation of theory and technique, with an introduction to storytelling forms, technical production skills, and the visual language. Students will learn how to use the tools of the trade so that they can communicate effectively with other multimedia journalists.

J 628. Multimedia Journalism Practices. 4 Credits.

Building on the J 627 course, students create a narrative video project that focuses on visual storytelling, character development, and present-tense storytelling.

J 638. Story and Commerce. 4 Credits.

Explores the changing face of narrative journalism as it investigates the new commercial opportunities for the professional journalist. Taught once or more per academic year.

J 641. Qualitative Research Methods. 4 Credits.

Introduces qualitative research methods including traditional historical inquiry, oral history, ethnography, and participant observation.

J 642. Quantitative Research Methods. 4 Credits.

Introduces and analyzes quantitative research methods in terms of design, measurement, inference, and validity. Focuses on conceptualization in communication research.

J 643. Proseminar II. 5 Credits.

Seminar participants demonstrate competence in broad families of social research by drawing on skills and knowledge obtained in J 612, J 613, J 614, J 641, and J 642.

Prereq: J 612, J 613, J 614, J 641, J 642.

J 646. Political Economy of Communication. 4 Credits.

Introduction to the political economy of communication. Includes such issues as ownership and control patterns; the role of the state; labor; intellectual property rights; and international markets.

J 648. Cultural Approaches to Communication. 4 Credits.

Examination of communication and mediated communication as cultural processes in the production and reproduction of social systems.

J 649. International Communication. 4 Credits.

Examines global communication structures and processes and their consequences. Topics include new technologies, news and information organizations, cross-cultural uses of Western media, and information policies.

J 654. Reporting within Communities. 4 Credits.

Students explore and practice emerging "community-first" concepts of journalism and reporting to identify the needs of the communities served, codesigning processes and solutions to keep them engaged.

J 656. Producing the Story. 4 Credits.

Students work collaboratively to create a compelling, ethical work of journalism with impact, applying all aspects of community engagement, reporting, storytelling, and production skills learned in previous terms.

J 660. Advanced Research Methods: [Topic]. 4 Credits.

Explores specific qualitative or quantitative communication research methods. Topics may include discourse analysis, oral history, historical methods, legal methods, content analysis, and survey methods.

Repeatable when topic changes.

Prereq: J 641 or J 642, depending on topic.

Media Studies

- Master of Arts
- Master of Science
- Doctor of Philosophy

Graduate Studies

The master of arts (MA) and master of science (MS) programs at the University of Oregon School of Journalism and Communication seek to expose students to a wide range of ideas concerning the structure, function, and role of the media in society.

The professional journalism master's program offers a twelve- to fifteen-month program designed for those holding bachelor's degrees but who have little or no academic or professional journalistic or media background. Graduate students in this program acquire professional skills.

The master's program in advertising and brand responsibility is a one-year graduate program designed to prepare students to guide strong brands in areas such as sustainability, privacy and data protection, social justice, and diversity.

The Portland-based multimedia journalism master's program, offered evenings and weekends, is designed to prepare experienced journalists with the skills needed for multimedia storytelling and for the entrepreneurial imperatives of the contemporary media business environment.

The Portland-based strategic communication master's program, offered evenings and weekends, provides advanced conceptual and tactical skills for working professionals in industries such as public relations, advertising, marketing communication, and corporate communication.

Information about and applications for graduate programs are available on the School of Journalism and Communication website.

Financial Assistance

The school provides a number of graduate scholarships and graduate employee (GE) opportunities. Scholarships range from \$500 to \$15,000. Graduate employees assist faculty members with teaching, research, and administrative responsibilities. Please note that GE positions are only open to media studies students.

International Students

A firm mastery of English, including American mass-communication idiom, is necessary for success at the graduate level. International students who lack such mastery are required to attend courses at the American English Institute on campus before participating in the graduate program. Though these courses do not carry graduate credit, they qualify to meet students' visa requirements. The best time to enroll in the institute's courses is the summer session preceding the first term in the graduate program.

Admission Requirements

Admission to the graduate program is granted for fall term for media studies, multimedia journalism, and strategic communication; summer session for the Eugene-based professional master's degree in journalism. Application materials are the same for the master's and the doctoral programs. Applicants to the master's programs must have received a BS or BA or equivalent prior to the first term of enrollment; applicants to the doctoral program must have received an MA or MS or equivalent. To be considered for admission, an applicant must submit the following:

1. Official transcripts from all institutions where undergraduate and graduate work was completed. The minimum undergraduate GPA for admission is 3.00. In exceptional cases, an applicant with a lower GPA may be admitted conditionally
2. *Optional:* Official Graduate Record Examination (GRE) scores no more than five years old
3. A 750- to 1,000-word essay describing the applicant's academic and career goals
4. An up-to-date résumé or curriculum vitae
5. A portfolio, string book, clips, or other evidence of relevant professional work or evidence of scholarly writing and research. Doctoral applicants may include a copy of a master's thesis
6. Three letters of recommendation—preferably two from academic sources
7. International students must also submit documentation for
 - a. Either a Test of English as a Foreign Language (TOEFL) score of 100 or better or an International English Language Testing System (IELTS) score of 7 or better
 - b. A score on the Test of Spoken English (TSE). A minimum score is not required for the TSE

Application deadlines

- Doctoral program: January 1
- Media studies master's degree: February 1
- Journalism master's degree: September 30, December 30, and March 30
- Advertising and brand responsibility master's degree: February 15
- Strategic communication master's degree (Portland): November 15, February 15, and April 30
- Multimedia journalism master's degree (Portland): November 15, February 15, and April 30
- Admission to the graduate program is granted for fall term (summer session for professional master's program students in the Eugene-based journalism **only**; designate summer session as the start date on your application for admission)

Advising

An advisor is appointed for each graduate student in the school by the program director.

Course programs for graduate students are planned individually in consultation with advisors. Graduate students should meet with their advisors at least once a term.

Requirements for Graduation

A graduate student in the School of Journalism and Communication cannot elect the pass/no pass (P/N) option for a graduate course offered by the school unless that course is offered P/N only.

Master's Degree Program in Media Studies

This major emphasizes communication theory and research, possibly preparatory to work for a PhD degree. An undergraduate education in journalism and communication or professional experience is required for admission. Candidates for this MA or MS degree must earn at least 46 graduate credits with a cumulative GPA of 3.00 or higher. Courses that do not carry graduate credit do not count toward the 46-credit minimum and are not considered in determining the graduate GPA.

Please note: The requirements below are under revision. Please see the School of Journalism and Communication website for the current requirements.

Master of Arts Degree Requirements

Code	Title	Credits
J 611	Mass Communication and Society ¹	4
J 612	Media Theory I	5
J 613	Media Theory II	5
J 614	Media Theory III	5
Select one of the following:		8
Option 1		
J 641	Qualitative Research Methods	
or J 642	Quantitative Research Methods	
Methodology course (inside or outside the School of Journalism and Communication)		
Option 2		
J 641	Qualitative Research Methods	
J 642	Quantitative Research Methods	
Additional 600-level conceptual courses in the School of Journalism and Communication ²		4-12
Graduate courses outside the School of Journalism and Communication ³		8-16
J 503	Thesis ⁴	6-9
or J 609	Terminal Project	

¹ Taken in the first year of graduate study.

² Subject to approval by the school's graduate affairs committee.

³ The courses chosen must be part of a consistent, related, educationally enhancing plan that has been approved by the student's advisor prior to enrollment.

⁴ Approved and supervised by a faculty committee. A written proposal, approved by the advisor and committee, is required before work is begun on either a thesis or project. A student should register for Thesis (J 503) or Terminal Project (J 609) during the terms in which the research and writing occurs.

In addition, the master of arts requires second-year foreign language proficiency. See the Graduate School website for details.

Master of Science Degree Requirements

Code	Title	Credits

Option 2		
J 641	Qualitative Research Methods	
J 642	Quantitative Research Methods	
Additional 600-level conceptual courses in the School of Journalism and Communication ²		4-12
Graduate courses outside the School of Journalism and Communication ³		8-16
J 503	Thesis ⁴	6-9
or J 609	Terminal Project	

- ¹ Taken in the first year of graduate study.
- ² Subject to approval by the school's graduate affairs committee.
- ³ The courses chosen must be part of a consistent, related, educationally enhancing plan that has been approved by the student's advisor prior to enrollment.
- ⁴ Approved and supervised by a faculty committee. A written proposal, approved by the advisor and committee, is required before work is begun on either a thesis or project. A student should register for Thesis (J 503) or Terminal Project (J 609) during the terms in which the research and writing occurs.

Students typically take five or six terms to complete the program.

The curriculum in media studies is in the process of being revised. Check the journalism school website for the most current degree requirements.

Doctoral Degree Program

The PhD degree program in media studies trains candidates to do research on a broad array of interdisciplinary questions related to communication and society. The school features course work that explores the cultural, economic, and political aspects of communication and society. Three overlapping areas of faculty and program strength are media institutions; ethics, law, and policy; and international and multicultural communication. The program emphasizes an appreciation of quantitative and qualitative methodologies and offers faculty expertise in content analysis, survey methodology, historical and legal methods, discourse analysis, ethnography, and oral history. Faculty

members in departments and schools outside the School of Journalism and Communication have complementary areas of conceptual and methodological expertise to assist in guiding doctoral research.

Doctor of Philosophy Degree

Candidates for the PhD degree in media studies typically take about 80 graduate-level credits of course work beyond the master's degree; the exact number of credits depends on the student's graduate-study experience. The program concludes with a dissertation. Specific requirements follow.

Please note: The requirements below are under revision. Please see the School of Journalism and Communication website for the current requirements.

Code	Title	Credits
J 612	Media Theory I	5
J 613	Media Theory II	5
J 614	Media Theory III	5
J 641	Qualitative Research Methods ¹	4
J 642	Quantitative Research Methods ¹	4
J 643	Proseminar II ¹	5
Courses in outside field ²		18
Two additional methods courses ³		8
At least three 600-level courses (611 and above) within the School of Journalism and Communication ⁴		12
J 619	Teaching and the Professional Life ⁵	4
J 603	Dissertation ⁶	18
Total Credits		88

- ¹ Completed within the first three terms of study.
- ² In close consultation with an academic advisor and the school's graduate studies director, each student designs an integrated outside-field component for his or her program. Because the program stresses the interconnection of communication with other disciplines, the outside field may involve more than one outside department.
- ³ Taken within or outside the school.
- ⁴ Subject to approval by the school's graduate affairs committee. J 601–610 do not count toward this requirement. In some cases, appropriate courses from outside the journalism school may count toward this requirement.
- ⁵ Appropriate teaching experiences are arranged following completion of the course.
- ⁶ A professionally central experience in the design, conduct, and dissemination of original research. It is written after the student's proposed dissertation topic is approved.

The curriculum in media studies is in the process of being revised. Check the journalism school website for the most current degree requirements.

Additional Requirements

- After course work is complete, the student, the graduate studies director, and the student's comprehensive examination committee schedule an examination that requires a synthesis of what the student has learned.
- After passing the comprehensive examination, the student writes a dissertation proposal. The proposal must be approved in writing at a meeting of the dissertation committee, usually within one term of the comprehensive exam. The committee must approve the

proposal before the student may advance to candidacy and enroll in dissertation credits.

Courses

J 100. Media Professions. 2 Credits.

Introduction to dynamic media and communication professions, opportunities, and issues, as well as to majors in journalism and communication.

J 101. Grammar for Communicators. 2 Credits.

Intensive review of grammar, word use, spelling, and principles of clear, concise writing. Introduction to media style. Premajor status required.

J 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

J 198. Colloquium: [Topic]. 1-2 Credits.

Repeatable.

J 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 201. Media and Society. 4 Credits.

Introduction to the critical examination of the roles of media in society.

J 208. Introduction to Documentary Production. 4 Credits.

Introduction to the theory and practice of documentary production. Focuses on aesthetics, technology, research, and writing fundamentals of documentary making, covering preproduction, production and postproduction. Cinema studies majors only.
Prereq: J 201, CINE 260M or ENG 260M; two from CINE 265, 266, 267.

J 211. Gateway to Media. 8 Credits.

Integrates critical thinking, creative thinking, and basic skills for nonfiction storytelling through words, photos, audio, and video. Majors only.
Prereq: J 100, J 101, J 201.

J 212. Writing for Communicators. 4 Credits.

Course builds on what was learned Grammar for Communicators course (J 101) to help students develop the ability to write for a variety of professional platforms and to achieve the appropriate strategic purpose.
Prereq: J 100, J 101, J 201.

J 213. Fact or Fiction. 4 Credits.

This course helps students grapple with information in the digital age to evaluate how media professional develop notions of truth, ethics, and transparency. It covers information credibility, social media algorithms, and data and numerical literacy.
Prereq: J 100, J 101, J 201.

J 314. Introduction to Media Studies. 4 Credits.

Presents a historical overview of the study of media, with in-depth discussion of primary theoretical approaches and their application to the current media environment. Majors only.
Prereq: J 201 with a grade of mid-C or better.

J 315H. Honors Media Theory and Research. 4 Credits.

Foundation course for honors program. Introduction to seminal theories in communication; overview of methodologies used in the study of theories. Acceptance into School of Journalism and Communication honors program required for enrollment.

J 320. Gender, Media, and Diversity. 4 Credits.

Critical study of the media with regard to gender, race, ethnicity, and other social divisions. Ramification and possible mechanisms of change.
Prereq: J 201 with a grade of mid-C or better.

J 331. Digital Video Production. 4 Credits.

Introduction to techniques of single-camera field video production. Journalism and cinema studies majors only.
Prereq: J 205 and J 206 or J 211 with a grade of mid-C or better, or J 208 with a grade of mid-C or better.

J 333. Writing for Multimedia. 4 Credits.

Introduction to the process and practice of writing for multimedia, including print, audio-video, computer-assisted presentation, web-based applications, and striking the balance between word and image. Journalism majors or multimedia minor standing only.
Prereq: ARTD 250, 251, 252.

J 340. Principles of Advertising. 4 Credits.

Role of advertising in the distribution of goods and services; the advertising agency; the campaign; research and testing; the selection of media: print, electronic, outdoor advertising, direct mailing. Not for journalism: advertising majors.

J 342. The Creative Strategist. 4 Credits.

Creative approaches to ideation and strategic thinking for all advertising specialties. Emphasis on creative process, generative techniques, teamwork, career planning, industry trends. Journalism: advertising majors only.
Prereq: J 205 and J 206 or J 211.

J 350. Principles of Public Relations. 4 Credits.

Overview of public relations practice in a diverse global society, including theory, career opportunities, history, communication forms and channels, and legal and ethical concerns.

J 352. Strategic Writing and Media Relations. 4 Credits.

Writing-intensive lab; students produce strategic, theory-based content for multiple media platforms using various journalistic styles and storytelling skills and incorporating ethical media-relations practices.
Prereq: J 205 and J 206 and J 350, or J211 and J 350 with a grade of mid-C or better.

J 361. Reporting I. 4 Credits.

News gathering and writing. Extensive writing in class and outside of class in a variety of forms: news, features, interviews, multimedia scripts. Journalism majors only.
Prereq: J 205 and J 206, or J 211 with a grade of mid-C or better.

J 365. Photojournalism. 4 Credits.

Visual reporting techniques, with emphasis on practice, law, and ethics of photojournalism and photographic communication. Laboratory and portfolio-intensive. Majors only.
Prereq: J 205 and J 206, or J 211 with a grade of mid-C or better.

J 371. Feature Writing I. 4 Credits.

Introduction to feature writing for print and online media; marketing your ideas and stories. Journalism majors only.
Prereq: J 361 with a grade of mid-C or better.

J 385. Communication Law. 4 Credits.

Legal aspects of the media: constitutional freedom of expression, news gathering, access to public records, libel, privacy, copyright, advertising, electronic media regulation, and antitrust.
Prereq: J 201 with a grade of mid-C or better.

J 387. Media History. 4 Credits.

The changing structure and character of the media in the United States.
Prereq: J 201 with a grade of mid-C or better.

J 396. International Communication. 4 Credits.

National and cultural differences in media and information systems, global news and information flows, implications of rapid technological change, and communication and information policies.

Prereq: J 201 with a grade of mid-C or better.

J 397. Media Ethics. 4 Credits.

Ethical problems in the media: privacy, violence, pornography, truth-telling, objectivity, media codes, public interest, media accountability.

Prereq: J 201 with a grade of mid-C or better.

J 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 401. Research: [Topic]. 1-9 Credits.

Repeatable.

J 403. Thesis. 1-9 Credits.

Repeatable.

J 404. Internship: [Topic]. 1-9 Credits.

Repeatable for maximum of 9 credits.

J 405. Reading and Conference: [Topic]. 1-9 Credits.

Repeatable.

J 406. Special Problems: [Topic]. 1-9 Credits.

Repeatable.

J 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 409. Practicum: [Topic]. 1-4 Credits.

Repeatable.

J 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 411M.

Prereq: J 201 with a grade of mid-C or better.

J 412. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Repeatable when topic changes. Majors only.

Prereq: J 201 with a grade of mid-C or better.

J 413. Communication Studies Capstone. 4 Credits.

Draws on skills and knowledge learned in other communications studies and related courses to demonstrate competence in broad areas of research.

Prereq: J 314 for 4 credits with grade of mid-C or better.

J 416. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and communication studies minors only.

Prereq: J 201 with grade of mid-C or better.

J 421. Documentary Production. 4 Credits.

Workshop in preparation, shooting, and postproduction of the short documentary. Journalism and cinema studies majors only.

Prereq: J 331 with a grade of mid-C or better.

J 424H. Honors Theory and Research: [Topic]. 4 Credits.

Uses a variety of theories and methods to closely examine and analyze contemporary problems and situations in media and communications.

Acceptance into School of Journalism and Communication honors program required for enrollment. Repeatable once when topic changes for a maximum of 8 credits.

J 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews.

Multilisted with ANTH 427M/527M. Sequence with J 428M/528M. Offered alternate years.

J 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M/528M. Sequence with J 427M/527M. Offered alternate years.

Prereq: J 427M.

J 432. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

Prereq: J 331, J 361 with a grade of mid-C or better.

J 434. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 331, J 361, J 432 with a grade of mid-C or better.

J 436. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

Prereq: J 361 with a mid-C or better.

J 443. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools.

Journalism: advertising majors only.

Prereq: J 207, 342 with a grade of mid-C or better.

J 444. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

Prereq: J 205 and J 206 and J 342, or J 211 and J342 with a grade of mid-C or better.

J 448. Advertising Campaigns. 4 Credits.

Seniors produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 443/543, 444/544, 457/557, 458/558, 459/559, 460/560 with a grade of mid-C or better.

J 449. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan.

Students participate in a national competition. Journalism: advertising majors only.

J 452. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

Prereq: J 352 with a grade of mid-C or better.

J 453. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

Prereq- J 352 with a grade of mid-C or better

J 454. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 452, J 453; J 494 with a grade of mid-C or better.

J 457. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

Prereq: J 205, 206, 207, 342 with a grade of mid-C or better.

J 458. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

Prereq: J 205 and 206 and 342, or J 211 and 342, with a grade of mid-C or better.

J 459. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. For Journalism: advertising majors only.

Prereq: J 205, 206, 207, 342 with a grade of mid-C or better.

J 460. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 205 and J 206 and 342, or J211 and J 342, with a grade of mid-C or better.

J 461. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

Prereq: J 361 or equivalent with a grade of mid-C or better.

J 462. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

Prereq: J 361 with a grade of mid-C or better.

J 463. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable.

Prereq: J 361 with a grade of mid-C or better.

J 466. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 365 with a grade of mid-C or better.

J 467. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors and minors only; cinema studies majors for approved topics. Repeatable twice for a maximum of 12 credits when topic changes.

Prereq: J 201 with a grade of mid-C or better.

J 468. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.

Prereq: J 461 with a grade of mid-C or better.

J 469. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 472. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

Prereq: J 361, J 371 with a grade of mid-C or better.

J 473. Feature Editing. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

Prereq: J 361, J 371 with a grade of mid-C or better.

J 475. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

Prereq: J 361 with a grade of mid-C or better.

J 480. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 483. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

Prereq: J 361 with a grade of mid-C or better.

J 494. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

Prereq: J 342 or J 350.

J 495. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Majors and minors only. Repeatable when topic changes for a maximum of 12 credits.

Prereq: J 201 with a grade of mid-C or better.

J 496. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Repeatable when topic changes. Majors and minors only.

Prereq: J 201 with a grade of mid-C or better.

J 503. Thesis. 1-9 Credits.

Repeatable.

J 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 511M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 511M.

J 512. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Repeatable when topic changes. Majors only.

J 516. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and communication studies minors only.

J 521. Documentary Production. 4 Credits.

Workshop in preparation, shooting, and postproduction of the short documentary. Journalism and cinema studies majors only.

J 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 427M/527M. Sequence with J 428M/528M. Offered alternate years.

J 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M/528M. Sequence with J 427M/527M. Offered alternate years.

Prereq: J 527M.

J 532. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

J 534. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 532 with a grade of mid-C or better.

J 536. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

J 543. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools.

Journalism: advertising majors only.

J 544. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

J 548. Advertising Campaigns. 4 Credits.

Graduate students produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 443/543, 444/544, 456/556, 457/557, 458/558, 459/559, 460/560.

J 549. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 552. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

J 553. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

J 554. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 552, J 553; one from J 594, J 595.

J 557. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

J 558. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

J 559. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. Journalism: advertising majors only.

J 560. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 561. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

J 562. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

J 563. Specialized Reporting. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only.

J 566. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 567. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors only. Repeatable twice for a maximum of 12 credits when topic changes.

J 568. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.
Prereq: J 561 with a grade of mid-C or better.

J 569. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 572. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 573. Feature Editing. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 575. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

J 580. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 583. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

J 594. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

J 595. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Journalism majors only. Repeatable when topic changes for a maximum of 12 credits.

J 596. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Repeatable when topic changes. Majors only.

J 601. Research: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 602. Supervised College Teaching. 1-5 Credits.

Repeatable for maximum of 5 credits.

J 603. Dissertation. 1-16 Credits.

Course may be repeated 25 times for credit after the initial instance.

J 604. Internship: [Topic]. 1-6 Credits.

Repeatable for maximum of 12 credits.

J 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 606. Special Problems: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

J 608. Workshop: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 609. Terminal Project. 1-6 Credits.

Repeatable for maximum of 6 credits.

J 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

J 611. Mass Communication and Society. 4 Credits.

Review of the literature of mass communication. Introduction to graduate study in journalism and communication.

J 612. Media Theory I. 5 Credits.

First in a three-part sequence introducing students to media theory, focusing on the social scientific tradition. Sequence with J 613, J 614.

J 613. Media Theory II. 5 Credits.

Second in a three-part sequence introducing students to media theory, focusing on critical approaches. Sequence with J 612, J 614.
Prereq: J 612.

J 614. Media Theory III. 5 Credits.

Third in a three-part sequence introducing students to media theory, focusing on contemporary theoretical perspectives. Series with J 612, J 613.
Prereq: J 613.

J 616. Introduction to Strategic Communication Marketing. 4 Credits.

Discussion of fundamental marketing concepts from the perspective of the manager. Analysis of complex marketing challenges in research, segmentation, targeting, pricing, distribution, and branding.

J 617. Strategic Communication Theory and Research: [Topic]. 4 Credits.

Theory, research, and practice of strategic communication. Topics may include relationship management, risk communication, identity and culture, and social media theory. Repeatable when topic changes for a maximum of 20 credits.

Prereq: graduate standing.

J 618. Strategic Communication Management. 4 Credits.

Elements of managing and leading organizations; examination of key issues faced by leaders. Topics include leadership theory, leading change, dealing with conflict, and performance and strategic management.

J 619. Teaching and the Professional Life. 4 Credits.

Explores teaching strategies, curriculum development, and other aspects of academic professional life in journalism and communication.

J 621. Foundations of Strategic Communication. 4 Credits.

Reviews major theories, models, and practices in strategic communications. Theoretical topics include media effects and persuasion as applied to public relations, advertising, and other strategic communication.

J 623. Creativity in Strategic Communication. 4 Credits.

Explores the use of creative conceptual thinking as part of the strategic basis in successful communication campaigns.

J 624. Strategic Communication: [Topic]. 2 Credits.

Explores problems and specialized skills needed in strategic communication management. Examples include crisis communication, creativity in business, corporate social responsibility. Repeatable with change in topic.

J 626. Strategic Marketing Communication. 4 Credits.

Examination, evaluation, and integration of advertising, public relations, sales promotion, direct marketing, social media, sponsorship and events, packaging, customer service, and personal selling.

J 627. Foundations of Multimedia Journalism. 4 Credits.

Serves as a foundation of theory and technique, with an introduction to storytelling forms, technical production skills, and the visual language. Students will learn how to use the tools of the trade so that they can communicate effectively with other multimedia journalists.

J 628. Multimedia Journalism Practices. 4 Credits.

Building on the J 627 course, students create a narrative video project that focuses on visual storytelling, character development, and present-tense storytelling.

J 638. Story and Commerce. 4 Credits.

Explores the changing face of narrative journalism as it investigates the new commercial opportunities for the professional journalist. Taught once or more per academic year.

J 641. Qualitative Research Methods. 4 Credits.

Introduces qualitative research methods including traditional historical inquiry, oral history, ethnography, and participant observation.

J 642. Quantitative Research Methods. 4 Credits.

Introduces and analyzes quantitative research methods in terms of design, measurement, inference, and validity. Focuses on conceptualization in communication research.

J 643. Proseminar II. 5 Credits.

Seminar participants demonstrate competence in broad families of social research by drawing on skills and knowledge obtained in J 612, J 613, J 614, J 641, and J 642.

Prereq: J 612, J 613, J 614, J 641, J 642.

J 646. Political Economy of Communication. 4 Credits.

Introduction to the political economy of communication. Includes such issues as ownership and control patterns; the role of the state; labor; intellectual property rights; and international markets.

J 648. Cultural Approaches to Communication. 4 Credits.

Examination of communication and mediated communication as cultural processes in the production and reproduction of social systems.

J 649. International Communication. 4 Credits.

Examines global communication structures and processes and their consequences. Topics include new technologies, news and information organizations, cross-cultural uses of Western media, and information policies.

J 654. Reporting within Communities. 4 Credits.

Students explore and practice emerging "community-first" concepts of journalism and reporting to identify the needs of the communities served, codesigning processes and solutions to keep them engaged.

J 656. Producing the Story. 4 Credits.

Students work collaboratively to create a compelling, ethical work of journalism with impact, applying all aspects of community engagement, reporting, storytelling, and production skills learned in previous terms.

J 660. Advanced Research Methods: [Topic]. 4 Credits.

Explores specific qualitative or quantitative communication research methods. Topics may include discourse analysis, oral history, historical methods, legal methods, content analysis, and survey methods. Repeatable when topic changes.

Prereq: J 641 or J 642, depending on topic.

Strategic Communication

The School of Journalism and Communication offers a graduate program in strategic communication based at the George S. Turnbull Portland Center. The program, offered evenings and weekends, provides advanced conceptual and tactical skills for working professionals in industries such as public relations, advertising, marketing communication, and corporate communication.

- **Master of Arts**
- **Master of Science**

Graduate Studies

The strategic communication master's degree program is designed for working professionals in the Portland area. Classes meet evenings and weekends at the George S. Turnbull Portland Center, 70 NW Couch St.—the White Stag Block in downtown Portland. Students can complete the 48-credit program in two academic years (six terms) by taking as many as 9 course credits for each of six terms, plus at least 6 credits for a final project-portfolio course. Students may also choose to complete the program on a part-time basis and extend the total time to degree.

International Students

A firm mastery of English, including American mass-communication idiom, is necessary for success at the graduate level. International students who lack such mastery are required to attend courses at the American English Institute on campus before participating in the graduate program. Though these courses do not carry graduate credit, they qualify to meet students' visa requirements. The best time to enroll in the institute's courses is the summer session preceding the first term in the graduate program.

Admission Requirements

Admission to the graduate program is granted for fall term for media studies, multimedia journalism, and strategic communication; summer session for the Eugene-based professional master's degree in journalism. Application materials are the same for the master's and the doctoral programs. Applicants to the master's programs must have received a BS or BA or equivalent prior to the first term of enrollment; applicants to the doctoral program must have received an MA or MS or equivalent. To be considered for admission, an applicant must submit the following:

1. Official transcripts from all institutions where undergraduate and graduate work was completed. The minimum undergraduate GPA

for admission is 3.00. In exceptional cases, an applicant with a lower GPA may be admitted conditionally

2. *Optional*: Official Graduate Record Examination (GRE) scores no more than five years old
3. A 750- to 1,000-word essay describing the applicant's academic and career goals
4. An up-to-date résumé
5. A portfolio, string book, clips, tapes, or other evidence of relevant professional work or evidence of scholarly writing and research. Doctoral applicants may include a copy of a master's thesis
6. Three letters of recommendation—preferably two from academic sources
7. International students must also submit documentation for
 - a. Either a Test of English as a Foreign Language (TOEFL) score of 100 or better or an International English Language Testing System (IELTS) score of 7 or better
 - b. A score on the Test of Spoken English (TSE). A minimum score is not required for the TSE

Application deadlines

- Doctoral program: January 1
- Media studies master's degree: February 1
- Journalism master's degree: Application review begins February 1
- Strategic communication master's degree (Portland): Application review begins February 1
- Multimedia journalism master's degree (Portland): Application review begins March 1
- Admission to the graduate program is granted for fall term (summer session for professional master's program students in the Eugene-based journalism *only*; designate summer session as the start date on your application for admission)
- Strategic communications, multimedia journalism, and journalism: Application review begins soon after the dates above until all available spots in the program are filled

Advising

An advisor is appointed for each graduate student in the school by the director of graduate studies.

Course programs for graduate students are planned individually in consultation with advisors. Graduate students should meet with their advisors at least once a term.

Requirements for Graduation

A graduate student in the School of Journalism and Communication cannot elect the pass/no pass (P/N) option for a graduate course offered by the school unless that course is offered P/N only.

Master's Degree Program in Strategic Communication

Successful applicants for this program typically have significant professional experience as well as strong academic credentials. Candidates for this MA or MS degree must earn at least 48 credits with a cumulative GPA of 3.00 or better. Courses that do not carry graduate credit do not count toward the graduate credit minimum and are not included in the GPA.

Master of Arts Degree Requirements

Code	Title	Credits
Strategic Communication Core		
J 621	Foundations of Strategic Communication	4

Students typically take six terms to complete the master's program.

See the School of Journalism and Communication website for more detailed and up-to-date information about application requirements, the curriculum, and final project options.

Courses

J 100. Media Professions. 2 Credits.

Introduction to dynamic media and communication professions, opportunities, and issues, as well as to majors in journalism and communication.

J 101. Grammar for Communicators. 2 Credits.

Intensive review of grammar, word use, spelling, and principles of clear, concise writing. Introduction to media style. Premajor status required.

J 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

J 198. Colloquium: [Topic]. 1-2 Credits.

Repeatable.

J 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 201. Media and Society. 4 Credits.

Introduction to the critical examination of the roles of media in society.

J 208. Introduction to Documentary Production. 4 Credits.

Introduction to the theory and practice of documentary production. Focuses on aesthetics, technology, research, and writing fundamentals of documentary making, covering preproduction, production and postproduction. Cinema studies majors only.
Prereq: J 201, CINE 260M or ENG 260M; two from CINE 265, 266, 267.

J 211. Gateway to Media. 8 Credits.

Integrates critical thinking, creative thinking, and basic skills for nonfiction storytelling through words, photos, audio, and video. Majors only.
Prereq: J 100, J 101, J 201.

J 212. Writing for Communicators. 4 Credits.

Course builds on what was learned Grammar for Communicators course (J 101) to help students develop the ability to write for a variety of professional platforms and to achieve the appropriate strategic purpose.
Prereq: J 100, J 101, J 201.

J 213. Fact or Fiction. 4 Credits.

This course helps students grapple with information in the digital age to evaluate how media professionals develop notions of truth, ethics, and transparency. It covers information credibility, social media algorithms, and data and numerical literacy.
Prereq: J 100, J 101, J 201.

J 314. Introduction to Media Studies. 4 Credits.

Presents a historical overview of the study of media, with in-depth discussion of primary theoretical approaches and their application to the current media environment. Majors only.
Prereq: J 201 with a grade of mid-C or better.

J 315H. Honors Media Theory and Research. 4 Credits.

Foundation course for honors program. Introduction to seminal theories in communication; overview of methodologies used in the study of theories. Acceptance into School of Journalism and Communication honors program required for enrollment.

J 320. Gender, Media, and Diversity. 4 Credits.

Critical study of the media with regard to gender, race, ethnicity, and other social divisions. Ramification and possible mechanisms of change.
Prereq: J 201 with a grade of mid-C or better.

J 331. Digital Video Production. 4 Credits.

Introduction to techniques of single-camera field video production. Journalism and cinema studies majors only.
Prereq: J 205 and J 206 or J 211 with a grade of mid-C or better, or J 208 with a grade of mid-C or better.

J 333. Writing for Multimedia. 4 Credits.

Introduction to the process and practice of writing for multimedia, including print, audio-video, computer-assisted presentation, web-based applications, and striking the balance between word and image. Journalism majors or multimedia minor standing only.
Prereq: ARTD 250, 251, 252.

J 340. Principles of Advertising. 4 Credits.

Role of advertising in the distribution of goods and services; the advertising agency; the campaign; research and testing; the selection of media: print, electronic, outdoor advertising, direct mailing. Not for journalism: advertising majors.

J 342. The Creative Strategist. 4 Credits.

Creative approaches to ideation and strategic thinking for all advertising specialties. Emphasis on creative process, generative techniques, teamwork, career planning, industry trends. Journalism: advertising majors only.
Prereq: J 205 and J 206 or J 211.

J 350. Principles of Public Relations. 4 Credits.

Overview of public relations practice in a diverse global society, including theory, career opportunities, history, communication forms and channels, and legal and ethical concerns.

J 352. Strategic Writing and Media Relations. 4 Credits.

Writing-intensive lab; students produce strategic, theory-based content for multiple media platforms using various journalistic styles and storytelling skills and incorporating ethical media-relations practices.
Prereq: J 205 and J 206 and J 350, or J211 and J 350 with a grade of mid-C or better.

J 361. Reporting I. 4 Credits.

News gathering and writing. Extensive writing in class and outside of class in a variety of forms: news, features, interviews, multimedia scripts. Journalism majors only.
Prereq: J 205 and J 206, or J 211 with a grade of mid-C or better.

J 365. Photojournalism. 4 Credits.

Visual reporting techniques, with emphasis on practice, law, and ethics of photojournalism and photographic communication. Laboratory and portfolio-intensive. Majors only.
Prereq: J 205 and J 206, or J 211 with a grade of mid-C or better.

J 371. Feature Writing I. 4 Credits.

Introduction to feature writing for print and online media; marketing your ideas and stories. Journalism majors only.
Prereq: J 361 with a grade of mid-C or better.

J 385. Communication Law. 4 Credits.

Legal aspects of the media: constitutional freedom of expression, news gathering, access to public records, libel, privacy, copyright, advertising, electronic media regulation, and antitrust.
Prereq: J 201 with a grade of mid-C or better.

J 387. Media History. 4 Credits.

The changing structure and character of the media in the United States.
Prereq: J 201 with a grade of mid-C or better.

J 396. International Communication. 4 Credits.

National and cultural differences in media and information systems, global news and information flows, implications of rapid technological change, and communication and information policies.

Prereq: J 201 with a grade of mid-C or better.

J 397. Media Ethics. 4 Credits.

Ethical problems in the media: privacy, violence, pornography, truth-telling, objectivity, media codes, public interest, media accountability.

Prereq: J 201 with a grade of mid-C or better.

J 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 401. Research: [Topic]. 1-9 Credits.

Repeatable.

J 403. Thesis. 1-9 Credits.

Repeatable.

J 404. Internship: [Topic]. 1-9 Credits.

Repeatable for maximum of 9 credits.

J 405. Reading and Conference: [Topic]. 1-9 Credits.

Repeatable.

J 406. Special Problems: [Topic]. 1-9 Credits.

Repeatable.

J 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 409. Practicum: [Topic]. 1-4 Credits.

Repeatable.

J 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 411M.

Prereq: J 201 with a grade of mid-C or better.

J 412. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Repeatable when topic changes. Majors only.

Prereq: J 201 with a grade of mid-C or better.

J 413. Communication Studies Capstone. 4 Credits.

Draws on skills and knowledge learned in other communications studies and related courses to demonstrate competence in broad areas of research.

Prereq: J 314 for 4 credits with grade of mid-C or better.

J 416. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and communication studies minors only.

Prereq: J 201 with grade of mid-C or better.

J 421. Documentary Production. 4 Credits.

Workshop in preparation, shooting, and postproduction of the short documentary. Journalism and cinema studies majors only.

Prereq: J 331 with a grade of mid-C or better.

J 424H. Honors Theory and Research: [Topic]. 4 Credits.

Uses a variety of theories and methods to closely examine and analyze contemporary problems and situations in media and communications.

Acceptance into School of Journalism and Communication honors program required for enrollment. Repeatable once when topic changes for a maximum of 8 credits.

J 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews.

Multilisted with ANTH 427M/527M. Sequence with J 428M/528M. Offered alternate years.

J 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M/528M. Sequence with J 427M/527M. Offered alternate years.

Prereq: J 427M.

J 432. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

Prereq: J 331, J 361 with a grade of mid-C or better.

J 434. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 331, J 361, J 432 with a grade of mid-C or better.

J 436. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

Prereq: J 361 with a mid-C or better.

J 443. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools.

Journalism: advertising majors only.

Prereq: J 207, 342 with a grade of mid-C or better.

J 444. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

Prereq: J 205 and J 206 and J 342, or J 211 and J342 with a grade of mid-C or better.

J 448. Advertising Campaigns. 4 Credits.

Seniors produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 443/543, 444/544, 457/557, 458/558, 459/559, 460/560 with a grade of mid-C or better.

J 449. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan.

Students participate in a national competition. Journalism: advertising majors only.

J 452. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

Prereq: J 352 with a grade of mid-C or better.

J 453. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

Prereq: J 352 with a grade of mid-C or better

J 454. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 452, J 453; J 494 with a grade of mid-C or better.

J 457. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

Prereq: J 205, 206, 207, 342 with a grade of mid-C or better.

J 458. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

Prereq: J 205 and 206 and 342, or J 211 and 342, with a grade of mid-C or better.

J 459. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. For Journalism: advertising majors only.

Prereq: J 205, 206, 207, 342 with a grade of mid-C or better.

J 460. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 205 and J 206 and 342, or J211 and J 342, with a grade of mid-C or better.

J 461. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

Prereq: J 361 or equivalent with a grade of mid-C or better.

J 462. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

Prereq: J 361 with a grade of mid-C or better.

J 463. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable.

Prereq: J 361 with a grade of mid-C or better.

J 466. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 365 with a grade of mid-C or better.

J 467. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors and minors only; cinema studies majors for approved topics. Repeatable twice for a maximum of 12 credits when topic changes.

Prereq: J 201 with a grade of mid-C or better.

J 468. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.

Prereq: J 461 with a grade of mid-C or better.

J 469. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 472. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

Prereq: J 361, J 371 with a grade of mid-C or better.

J 473. Feature Editing. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

Prereq: J 361, J 371 with a grade of mid-C or better.

J 475. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

Prereq: J 361 with a grade of mid-C or better.

J 480. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 483. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

Prereq: J 361 with a grade of mid-C or better.

J 494. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

Prereq: J 342 or J 350.

J 495. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Majors and minors only. Repeatable when topic changes for a maximum of 12 credits.

Prereq: J 201 with a grade of mid-C or better.

J 496. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Repeatable when topic changes. Majors and minors only.

Prereq: J 201 with a grade of mid-C or better.

J 503. Thesis. 1-9 Credits.

Repeatable.

J 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 511M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 511M.

J 512. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Repeatable when topic changes. Majors only.

J 516. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and communication studies minors only.

J 521. Documentary Production. 4 Credits.

Workshop in preparation, shooting, and postproduction of the short documentary. Journalism and cinema studies majors only.

J 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 427M/527M. Sequence with J 428M/528M. Offered alternate years.

J 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M/528M. Sequence with J 427M/527M. Offered alternate years.

Prereq: J 527M.

J 532. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

J 534. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 532 with a grade of mid-C or better.

J 536. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

J 543. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools.

Journalism: advertising majors only.

J 544. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

J 548. Advertising Campaigns. 4 Credits.

Graduate students produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 443/543, 444/544, 456/556, 457/557, 458/558, 459/559, 460/560.

J 549. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 552. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

J 553. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

J 554. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 552, J 553; one from J 594, J 595.

J 557. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

J 558. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

J 559. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. Journalism: advertising majors only.

J 560. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 561. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

J 562. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

J 563. Specialized Reporting. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only.

J 566. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 567. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors only. Repeatable twice for a maximum of 12 credits when topic changes.

J 568. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.
Prereq: J 561 with a grade of mid-C or better.

J 569. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 572. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 573. Feature Editing. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 575. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

J 580. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 583. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

J 594. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

J 595. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Journalism majors only. Repeatable when topic changes for a maximum of 12 credits.

J 596. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Repeatable when topic changes. Majors only.

J 601. Research: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 602. Supervised College Teaching. 1-5 Credits.

Repeatable for maximum of 5 credits.

J 603. Dissertation. 1-16 Credits.

Course may be repeated 25 times for credit after the initial instance.

J 604. Internship: [Topic]. 1-6 Credits.

Repeatable for maximum of 12 credits.

J 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 606. Special Problems: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

J 608. Workshop: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 609. Terminal Project. 1-6 Credits.

Repeatable for maximum of 6 credits.

J 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

J 611. Mass Communication and Society. 4 Credits.

Review of the literature of mass communication. Introduction to graduate study in journalism and communication.

J 612. Media Theory I. 5 Credits.

First in a three-part sequence introducing students to media theory, focusing on the social scientific tradition. Sequence with J 613, J 614.

J 613. Media Theory II. 5 Credits.

Second in a three-part sequence introducing students to media theory, focusing on critical approaches. Sequence with J 612, J 614.
Prereq: J 612.

J 614. Media Theory III. 5 Credits.

Third in a three-part sequence introducing students to media theory, focusing on contemporary theoretical perspectives. Series with J 612, J 613.
Prereq: J 613.

J 616. Introduction to Strategic Communication Marketing. 4 Credits.

Discussion of fundamental marketing concepts from the perspective of the manager. Analysis of complex marketing challenges in research, segmentation, targeting, pricing, distribution, and branding.

J 617. Strategic Communication Theory and Research: [Topic]. 4 Credits.

Theory, research, and practice of strategic communication. Topics may include relationship management, risk communication, identity and culture, and social media theory. Repeatable when topic changes for a maximum of 20 credits.

Prereq: graduate standing.

J 618. Strategic Communication Management. 4 Credits.

Elements of managing and leading organizations; examination of key issues faced by leaders. Topics include leadership theory, leading change, dealing with conflict, and performance and strategic management.

J 619. Teaching and the Professional Life. 4 Credits.

Explores teaching strategies, curriculum development, and other aspects of academic professional life in journalism and communication.

J 621. Foundations of Strategic Communication. 4 Credits.

Reviews major theories, models, and practices in strategic communications. Theoretical topics include media effects and persuasion as applied to public relations, advertising, and other strategic communication.

J 623. Creativity in Strategic Communication. 4 Credits.

Explores the use of creative conceptual thinking as part of the strategic basis in successful communication campaigns.

J 624. Strategic Communication: [Topic]. 2 Credits.

Explores problems and specialized skills needed in strategic communication management. Examples include crisis communication, creativity in business, corporate social responsibility. Repeatable with change in topic.

J 626. Strategic Marketing Communication. 4 Credits.

Examination, evaluation, and integration of advertising, public relations, sales promotion, direct marketing, social media, sponsorship and events, packaging, customer service, and personal selling.

J 627. Foundations of Multimedia Journalism. 4 Credits.

Serves as a foundation of theory and technique, with an introduction to storytelling forms, technical production skills, and the visual language. Students will learn how to use the tools of the trade so that they can communicate effectively with other multimedia journalists.

J 628. Multimedia Journalism Practices. 4 Credits.

Building on the J 627 course, students create a narrative video project that focuses on visual storytelling, character development, and present-tense storytelling.

J 638. Story and Commerce. 4 Credits.

Explores the changing face of narrative journalism as it investigates the new commercial opportunities for the professional journalist. Taught once or more per academic year.

J 641. Qualitative Research Methods. 4 Credits.

Introduces qualitative research methods including traditional historical inquiry, oral history, ethnography, and participant observation.

J 642. Quantitative Research Methods. 4 Credits.

Introduces and analyzes quantitative research methods in terms of design, measurement, inference, and validity. Focuses on conceptualization in communication research.

J 643. Proseminar II. 5 Credits.

Seminar participants demonstrate competence in broad families of social research by drawing on skills and knowledge obtained in J 612, J 613, J 614, J 641, and J 642.

Prereq: J 612, J 613, J 614, J 641, J 642.

J 646. Political Economy of Communication. 4 Credits.

Introduction to the political economy of communication. Includes such issues as ownership and control patterns; the role of the state; labor; intellectual property rights; and international markets.

J 648. Cultural Approaches to Communication. 4 Credits.

Examination of communication and mediated communication as cultural processes in the production and reproduction of social systems.

J 649. International Communication. 4 Credits.

Examines global communication structures and processes and their consequences. Topics include new technologies, news and information organizations, cross-cultural uses of Western media, and information policies.

J 654. Reporting within Communities. 4 Credits.

Students explore and practice emerging "community-first" concepts of journalism and reporting to identify the needs of the communities served, codesigning processes and solutions to keep them engaged.

J 656. Producing the Story. 4 Credits.

Students work collaboratively to create a compelling, ethical work of journalism with impact, applying all aspects of community engagement, reporting, storytelling, and production skills learned in previous terms.

J 660. Advanced Research Methods: [Topic]. 4 Credits.

Explores specific qualitative or quantitative communication research methods. Topics may include discourse analysis, oral history, historical methods, legal methods, content analysis, and survey methods.

Repeatable when topic changes.

Prereq: J 641 or J 642, depending on topic.

Minor in Media Studies

The minor in media studies gives students an overview of the role of the media in society.

Students with a major in the School of Journalism and Communication cannot also earn a minor in media studies.

Students who want to minor in media studies should declare the minor online, on the school's website. Students may submit petitions to apply other journalism courses to the minor. A minimum University of Oregon GPA of 2.00 is required to declare the minor.

Code	Title	Credits
J 201	Media and Society	4
J 314	Introduction to Media Studies	4
Select four of the following:		16

J 467	Issues in International Communication: [Topic] ¹	
J 495	Research Methods: [Topic] ¹	
J 496	Communication Ethics and Law: [Topic] ¹	
Total Credits		24

¹ Repeatable three times when the topic changes.

All courses must be passed with a grade of mid-C or better.

School of Law

Marcilynn Burke, Dean

541-346-3852
 541-346-3846 admissions office
 541-346-1564 fax
 105 Knight Law Center
 1221 University of Oregon
 Eugene, Oregon 97403-1221
lawadmissions@uoregon.edu

The School of Law offers a three-year, full-time professional curriculum leading to the doctor of jurisprudence (JD) degree; a two-year, full-time program leading to an interdisciplinary master's degree (MA or MS) in conflict and dispute resolution; a one-year, full-time program leading to a master of laws (LLM) with concentrations in American law, business law, conflict and dispute resolution, and environmental and natural resources law; and an undergraduate minor in legal studies.

The law school's broad-based curriculum and clinical programs prepare students for careers in almost every practice area and professional setting. Special centers and programs include appropriate dispute resolution; business law; criminal justice; environmental and natural resources law; estate planning; family, child advocacy, and elder law; intellectual property; international law; legal research and writing; the Portland program; public law and policy; sports law; tax law; and the Wayne Morse Center for Law and Politics.

The Center for Career Planning and Professional Development offers counseling, seminars, mentoring programs, and connections to UO law graduates throughout the world.

The William W. Knight Law Center offers a spacious, welcoming environment for study and community activities and includes more than 1,500 fast-Ethernet jacks and wireless access throughout the building.

The John E. Jaqua Law Library is a light-filled space occupying three floors, designed to meet the research and study needs of law students. It provides print, electronic, and video resources, and has full wireless access. Each floor of the law library contains a mix of books, tables, carrels, equipment, and study rooms. Law students can use our online catalog to order materials from the law library and from other libraries in Oregon and Washington. Attorney librarians teach students how to perform legal research in class and in the library.

UO law students run three journals and nearly 40 active student organizations, serve the public in numerous clinical programs, and organize the world's oldest and largest public interest environmental law conference, attracting more than 3,000 participants each year. In addition, the School of Law offers a wide range of options to perform pro bono work in the local community, of which UO law students have a strong tradition.

Additional information and complete descriptions of courses offered appear on the school website.

Academic Calendar for Law Students

The School of Law JD and LLM programs operate on a semester calendar. On this schedule, registration for fall and spring semesters begins the third week of April, fall semester examinations are given before the winter vacation, and the spring semester ends in mid-

May. More information about calendar dates is available online at registrar.uoregon.edu/calendars/academic.

January Term

The School of Law offers a collection of one-week intensive courses held the week before the start of the regular spring semester.

Summer Session

The School of Law offers a summer session that is open to law students who have completed at least one year of legal studies and who are in good standing at a law school accredited by the American Bar Association. Summer session is not open to beginning law students.

Clinics, Field Placements, and Simulation Courses

The law school's Clinics Program and Field Placement Program give students real-world experience with concepts learned in the classroom. The programs offer second- and third-year students access to practical work experiences that better prepare them for law practice, increasing their use to potential employers. Court-certified students are allowed to appear in court.

Students and employers alike recognize the value of experiential learning experiences during law school, and the demand for practice experience is high. Almost 85 percent of UO law students have participated in at least one clinical or field placement opportunity before they graduate.

Bankruptcy Field Placements

Students serve as judicial externs for the United States Bankruptcy Court for the District of Oregon and participate in all aspects of judicial decision-making, including researching and drafting bench memorandums and opinions, and observing oral arguments and chambers conferences. Students also have the opportunity to extern at the Office of the United States Trustee, the division of the US Department of Justice responsible for overseeing the administration of bankruptcy cases.

Business Law Clinic

Students represent small companies and entrepreneurs who need legal assistance in forming and operating their businesses. This includes a weekly seminar offering instruction in substantive law, ethical issues, and practical lawyering, with an emphasis on the skills required in drafting documents, interviewing and counseling clients, and representing clients in organizational and contractual matters.

Civil Practice Clinic and Advanced Civil Practice Clinic

Students represent low-income clients through the Lane County Legal Aid and Advocacy Center (known alternatively as the Law Center). Cases may result in a court appearance or contested case hearing, often involving social security, welfare, food stamp, public housing, or unemployment benefits.

Criminal Defense and Advanced Criminal Defense Clinic

Students conduct client and witness interviews and investigations and help defend clients in a wide range of misdemeanor prosecutions in Oregon Circuit Court through Public Defender Services of Lane County.

Criminal Justice Field Placements

Students work for public defenders, US attorneys, state attorneys, and district attorneys doing a range of work.

Criminal Prosecution Clinic and Advanced Prosecution Clinic

Students are assigned to one of several local prosecutors' offices, where they prepare and try minor criminal cases under the supervision of an attorney. In the advanced clinic, students try jury trials, prepare felony trials, respond to and argue circuit court motions, and assist felony trial lawyers with circuit court cases.

Domestic Violence Civil Clinic and Advanced Domestic Violence Civil Clinic

Students work with attorneys to provide comprehensive civil legal services to victims of domestic violence, sexual assault, and stalking while learning the skills required for client representation in litigation-based practice.

Domestic Violence Protective Order Clinic and Advanced Domestic Violence Protective Order Clinic

Students work with attorneys to provide protective order legal services to victims of domestic violence, sexual assault, and stalking while learning the skills required for client representation in litigation-based practice.

Domestic Violence Field Placements

Students are placed at the Klamath Falls Legal Aid Services of Oregon office and handle a range of issues related to the representation of domestic violence victims. The field placement exposes students to the challenges faced by low-income, rural victims of violence.

Environmental Law Clinic and Advanced Environmental Law Clinic

Working with the Western Environmental Law Center, students assist in federal court litigation representing nonprofits in enforcing federal environmental law.

Environmental Law Field Placements

Students are placed with governmental and nonprofit agencies from Oregon to Washington, DC, working on a variety of issues related to environmental regulations and compliance, energy policy, land use, and climate change.

General Field Placements

Students are placed with nonprofit organizations and governmental agencies in a variety of settings to gain practical experience in different readings of the law. Recent field placements have seen students working in civil justice, NCAA sports compliance, the Library of Congress, Oregon wineries, and political offices.

In-House Counsel Field Placements

Students are placed in corporate counsel offices to give them a window into the world of major Oregon businesses and the operations of corporate legal counsel. Students participating in the program are exposed to the roles of in-house counsel, the relationship between in-house and outside counsel, and the workings of business operations.

The substantial classroom component for both full- and part-time externs explores ethical issues faced by corporate counsel.

Judicial Field Placements

Students work for district and appellate federal courts, federal immigration court, state trial and appellate courts, and the U.S. bankruptcy courts. The judges include students in all aspects of their work, including settlement meetings, trials, and discussions in chambers. In placements with Oregon juvenile court judges, students perform research, prepare for and observe all types of hearings in juvenile delinquency and dependency cases, and work on a major law reform project under the judge's direction.

Legislative Issues Workshop

Students are involved in research, bill tracking, report writing, committee presentation, and other tasks during the biennial sessions of the Oregon Legislative Assembly.

Local Government Field Placements

Students work in city government offices and with law firms representing cities and counties on a wide range of legal issues.

Nonprofit Clinic

The nonprofit clinic is a joint venture with the UO's School of Planning, Public Policy and Management and the Master's Degree in Conflict and Dispute Resolution Program. Students learn about assessment of nonprofit organizations with assistance from experienced practitioners in the field and through practical experience working with nonprofit clients.

Tax Field Placements

Students work full- or part-time with the Office of Chief Counsel for the Internal Revenue Service in Portland. The counsel's office represents the IRS in litigation in the US Tax Court. Students research and write on tax issues involving small businesses and individuals.

Trial Practice

Students examine and develop courtroom skills in civil and criminal cases. Primary emphases are on the opening statement, direct examination, cross-examination, objections, closing argument, and voir dire of juries. Each student participates in weekly classroom exercises and in a full mock trial at the end of the semester.

Centers and Programs

Appropriate Dispute Resolution Center

Many lawyers today are more likely to participate in a settlement conference, mandatory arbitration, or mediation session than they are to argue a case in the courtroom. The law school's appropriate dispute resolution courses, trainings, and programs help students understand a wide range of dispute resolution methods so that as lawyers they may advise their clients wisely. adr.uoregon.edu

Business Law

Comprehensive business law courses contribute to the core of the law school curriculum. Practical experience is gained in classroom studies and in real-world opportunities, teaching students the relationship between law and entrepreneurship and providing students the necessary deal-making skills to become transactional lawyers. bizlaw.uoregon.edu

Criminal Justice Program

The criminal justice program prepares future lawyers with the knowledge and practical skills necessary to practice in the criminal justice system as prosecutors and attorneys for criminal defendants and parents and children in the juvenile justice and child-welfare systems. <https://law.uoregon.edu/explore/criminal-justice>

Environmental and Natural Resources Law

For more than forty years, this program's focus on public interest environmental law and its commitment to innovations in environmental legal education have made it one of the nation's oldest and most respected programs. Its faculty is involved in innovative legal scholarship that makes a global impact on environmental law. enr.uoregon.edu

Family Law, Child Advocacy Law, and Elder Law

The increasingly complex nature of family relationships requires lawyers to possess an in-depth understanding of the law that structures them. Future legal practitioners gain the knowledge and practical skills necessary to advocate for children, families, and the elderly, and also may pursue opportunities and hone their skills with the law school's Child Advocacy Project. familylaw.uoregon.edu

International Law

Globalization, extensive migration, and shifting demographics make international law a crucial component of legal education, creating an imperative to educate students prepared to practice at home and abroad. <https://law.uoregon.edu/explore/international-law>

Legal Research and Writing

This rigorous program thoroughly prepares law students for the exacting style of writing expected of individuals in a clerkship or legal practice. <https://law.uoregon.edu/explore/LRW>

Portland Program

The program creates opportunities for students to build ties with the legal and business community in Portland, Oregon. As the state's largest city, Portland is home to more than 3,000 UO School of Law alumni. The Portland Program offers field placements, courses, and symposiums. <https://law.uoregon.edu/explore/portland-program>

Public Law and Policy Program

Building on a foundation of course offerings, career planning support, and service opportunities, UO students prepare for careers in the public sector. UO law graduates accept public service positions at rates far exceeding the national average. <https://law.uoregon.edu/explore/public-law>

Sports Law

The sports law program prepares students to enter a rapidly growing and evolving field. Through traditional course work and experiences outside of the classroom, students learn about legal areas surrounding the sports industry and gain practical skills in contract negotiation, legal drafting, sponsorships, business development, labor law, and intellectual property and licensing. <https://law.uoregon.edu/explore/sports-law>

Wayne Morse Center for Law and Politics

An independent center within the law school, the Wayne Morse Center for Law and Politics organizes dynamic programs in the spirit and tradition of former U.S. senator and law school dean Wayne Morse. Senator Morse was best known for his stance against the Vietnam War

and as an advocate for civil rights, labor rights, and the rule of law. waynemorsecenter.uoregon.edu

Admission Procedures

Prelaw Preparation

The School of Law does not prescribe a prelaw curriculum. Intellectual maturity and breadth of educational background are considered more important than specific subject matter.

Details about prelaw study and law school admission criteria appear under Law, Preparatory, in the **Academic Resources** section of this catalog.

Information about the School of Law and its programs is available on its website (<https://law.uoregon.edu>). Additional information may be requested through the website or by contacting the Office of Admissions. Admissions staff members are happy to respond to inquiries regarding the admission process as well as to make arrangements for visits to the School of Law.

Requirements through the Law School Admission Council

The University of Oregon School of Law is a member of the Law School Admission Council (LSAC). To complete the application process, an applicant must register with LSAC to take the Law School Admission Test (LSAT) and participate in the Credential Assembly Service (CAS); register at www.lsac.org (<http://www.lsac.org>) or call 215-968-1001. An applicant should take the LSAT no later than February of the year in which they wish to enroll. A score from the June 2015 test administration is the oldest acceptable score for fall 2020. An applicant must submit official academic transcripts of all college-level work and postgraduate work and letters of recommendation to the LSAC. All required fees must be paid and all required documents received before the admissions committee will review an application. Applicants receive an admission decision from the Office of Admissions in a letter sent through email or the United States Postal Service between December and May.

Basic Admission Requirements

An applicant must have a bachelor's degree from an accredited college or university prior to enrolling in the School of Law. Enrollment restrictions and the large volume of applications for admission to the law school make it necessary to admit applicants who, in terms of their overall records, are the most qualified for legal studies.

In evaluating the strength of the overall record, the admissions committee considers the undergraduate grade point average (GPA), the results of the Law School Admission Test (LSAT), the personal statement, and letters of recommendation. The applicant should also submit a résumé that highlights educational background, employment, global and multicultural experience, and extracurricular activities. International applicants are required to submit results of the Test of English as a Foreign Language (TOEFL).

The admissions committee strives to annually enroll a class that is academically distinguished and reflects a rich blend of educational, economic, cultural, and professional backgrounds.

Class Profile for Fall 2018

Percentile	GPA	LSAT Score
75th	3.58	159
50th	3.38	157
25th	3.15	154

Costs and Financial Aid

Law students are classified as graduate students. Tuition and fees are payable in full as prescribed by the Office of Business Affairs. Payment of the stipulated fees entitles students enrolled for academic credit to all services maintained by the university for the benefit of students.

Tuition and Fees for JD Program

For the 2019–20 academic year, tuition and fees are \$37,886 for resident students and \$47,102 for nonresidents. See the law school website for more information. Tuition and fee schedules are subject to revision by the State Board of Higher Education.

Residence classification regulations appear in Chapter 580, Division 10, of Oregon Administrative Rules, which are quoted in the **Admissions** section of this catalog. Details governing administration of nonresident and resident policies are complex. For answers to individual questions, students are advised to consult a staff member in the university's Office of Admissions.

Total Costs

Because student living arrangements and personal spending habits vary widely, no single figure represents the cost of attending the university. Information on total 2018–19 costs for a resident student at the School of Law is available to view on the Office of Student Financial Aid and Scholarships website (http://financialaid.uoregon.edu/cost_of_attendance_law). The child-care allowance varies according to circumstance and is based on documentable costs for the period of time the student is enrolled. Transportation costs also vary.

Health insurance is optional. Costs for semester or for full twelve-month coverage are available in the office of the University Health Center.

Financial Assistance

See the **Student Financial Aid and Scholarships** section of this catalog for complete information about financial aid including loans.

Scholarships and Fellowships

Information about scholarships and financial aid is available on the school's website (<https://law.uoregon.edu/explore/JD-faq>) and at <https://law.uoregon.edu/explore/1L-fellowships> or by telephone, 541-346-3846.

The law school has a Loan Repayment Assistance Program (LRAP) to help students with large law school loans to more easily enter public service. Learn more by visiting the website (<https://law.uoregon.edu/explore/LRAP>).

Faculty

Sarah J. Adams-Schoen, assistant professor (land use, state and local government, ocean and coastal). BA, 1994, Sarah Lawrence; MSc, 1995, London School of Economics; JD, 2002, Lewis and Clark; Federal Bar for U.S. District Court, 2002; Oregon bar, 2002. (2019)

Adell L. Amos, Clayton R. Hess Professor of Law (environmental and natural resources law); associate dean, academic affairs. BA, 1995, Drury; JD, 1998, Oregon (Coif); Missouri bar, 1999. (2005)

Kristen Bell, assistant professor (criminal law, advanced appellate advocacy). BA, 2005, Stanford; PhD, 2010, North Carolina; JD, 2013, Stanford; California bar, 2014. (2018)

Carl S. Bjerre, Wallace L. and Ellen A. Kaapcke Law Professor (commercial law, contracts). BA, 1982, California, Berkeley; JD, 1988, Cornell (Coif); New York bar, 1989; Oregon bar, 2001. (1996)

John E. Bonine, Bernard B. Kliks Professor of Law (environmental law, administrative law, constitutional law). AB, 1966, Stanford; LLB, 1969, Yale; California bar, 1970; Oregon bar, 1977. (1978)

Marcilynn A. Burke, Dave Frohnmayer Chair in Leadership and Law; dean. AB, 1991, North Carolina; JD, 1995, Yale; District of Columbia bar, 1996; New York bar, 1996. (2017)

Stuart Chinn, James O. and Alfred T. Goodwin Senior Faculty Fellow, associate professor (constitutional law, legislation); associate dean, programs and research. BA, 2001, MA, 2001, JD, 2004, PhD, 2008, Yale. (2009)

Andrea Coles-Bjerre, associate professor (creditors' rights, bankruptcy, civil procedure); faculty director, business law. BA, 1984, Barnard; JD, 1987, Brooklyn Law; New York bar, 1988. (1996)

Greg Dotson, assistant professor (environmental and energy law). BA, 1991, Virginia Polytechnic Institute and State; JD, 1995, Oregon. (2016)

Michael Fakhri, associate professor (international business transactions, law and development). LLB, 2001, Queen's (Ontario); LLM, 2006, Harvard. (2010)

Caroline Forell, professor (women and the law, torts, trusts and estates). BA, 1973, JD, 1978, Iowa (Coif); Oregon bar, 1978. (1978)

Elizabeth R. Frost, senior lecturer (legal research and writing, real estate transactions). BA, 2002, Yale; JD, 2006, Michigan, Ann Arbor. (2010)

Susan N. Gary, Orlando John and Marian H. Hollis Professor of Law (trusts and estates, estate planning, nonprofit organizations). BA, 1977, Yale; JD, 1981, Columbia; Illinois bar, 1981; Oregon bar, 1989. (1992)

Ibrahim J. Gassama, Frank Nash Professor of Law (torts, international law, human rights). BA, 1980, Virginia Polytechnic; JD, 1984, Harvard; New York bar, 1985. (1991)

Erik Girvan, associate professor (civil procedure, remedies); faculty codirector, Master's Degree in Conflict and Dispute Resolution Program. BA, 1998, Alaska, Fairbanks; JD, 2002, Harvard; PhD, 2012, Minnesota, Twin Cities. (2012)

Rebekah Hanley, senior lecturer (legal research and writing, legal profession). BA, 1996, Yale; JD, 2000, California, Los Angeles. (2004)

Leslie J. Harris, Dorothy Kliks Fones Professor of Law (criminal law, family law, children and the law); faculty director, Oregon Child Advocacy Project. BA, 1973, New Mexico State; JD, 1976, New Mexico (Coif); New Mexico bar, 1976; District of Columbia bar, 1977. (1982)

Richard G. Hildreth, professor (ocean and coastal law, property, climate change law and policy); director, Ocean and Coastal Law Center. BSE,

1965, JD, 1968, Michigan (Coif); diploma in law, 1969, Oxford; diploma in law, 1973, Stockholm; California bar, 1969; Oregon bar, 1982. (1978)

Robert C. Illig, associate professor; dean's distinguished faculty fellow (business associations, mergers and acquisitions, private equity and venture capital). BA, 1991, Williams; JD, 1996, Vanderbilt; New York bar, 1997. (2004)

Tom Lining, Orlando John and Marian H. Hollis Professor of Law (ethics, criminal law, public interest law). BA, 1988, Yale; JD, 1991, Harvard; California bar, 1993; Oregon bar, 2008. (2003)

Mohsen Manesh, associate professor (advanced business law, business associations, contracts); faculty director, portland program. BS, 2003, Arkansas; JD, 2006, Georgetown. (2011)

Roberta Mann, Mr. and Mrs. L. L. Stewart Business Law Professor (tax law, property law, environmental law). BS, 1980, MBA, 1982, JD, 1987, Arizona State; LLM, 1995, Georgetown; Arizona bar, 1987; District of Columbia bar, 1989. (2008)

Megan McAlpin, senior lecturer (legal research and writing). BS, 2000, Western Oregon; JD, 2003, Willamette; Oregon bar, 2003. (2007)

Michelle McKinley, Bernard B. Kliks Professor of Law (immigration law, refugee and asylum law, international law). BA, 1985, Wellesley; MPhil, 1988, Oxford; JD, 1995, Harvard. (2007)

Michael L. Moffitt, professor (civil procedure, negotiation, appropriate dispute resolution). BA, 1991, Marietta; JD, 1994, Harvard. (2001)

Michael Musheno, professor (law and society, public policy, conflict management); faculty director, legal studies. BA, 1969, Lycoming College; MA, 1971, PhD, 1974, American.

Eric Priest, associate professor (copyright law, trademark law, property); faculty director, LL.M. program. BA, 1999, Minnesota, Twin Cities; LLM, 2005, Harvard; JD, 2002, Illinois Institute of Technology. (2009)

Ofer Raban, professor; Elmer Sahlstrom Senior Faculty Fellow (constitutional law, criminal investigation, legal interpretation). BA, 1994, City University of New York, City College; DPhil, 1994, Oxford; JD, 1999, Harvard. (2008)

Jennifer Reynolds, associate professor (dispute resolution); faculty director, Appropriate Dispute Resolution Center. AB, 1992, Chicago; MA, 1996, Texas, Austin; JD, 2008, Harvard. (2009)

Joan Rocklin, senior lecturer (legal research and writing). BA, 1993, Williams; JD, 1998, Pennsylvania (Coif); New York bar, 1998. (2001)

Suzanne E. Rowe, James L. and Ilene R. Hershner Professor in Jurisprudence; director, Legal Research and Writing Program. BA, 1983, North Carolina, Chapel Hill; JD, 1989, Columbia; California bar, 1992; District of Columbia bar, 1992. (2000)

David Schuman, professor of practice. BA, Stanford; MA, San Francisco State; JD, 1984, Oregon.

Nancy E. Shurtz, B. A. Kliks Professor of Law (taxation, estate planning, women and the law). BA, 1970, Cincinnati; JD, 1972, Ohio State; LLM, 1977, Georgetown; Ohio bar, 1973; Tennessee bar, 1973; District of Columbia bar, 1977. (1982)

Elizabeth Tippet, associate professor; faculty codirector, Master's Degree in Conflict and Dispute Resolution Program. MA, 2002, Harvard; JD, 2006, Harvard.

Merle H. Weiner, Philip H. Knight Professor (torts, family law, domestic violence). BA, 1985, Dartmouth College; LLM, 1988, Cambridge; JD, 1990, Harvard; District of Columbia bar, 1991; Maryland bar, 1991; California bar, 1993. (1998)

Mary C. Wood, Philip H. Knight Professor (Indian law, public lands, property); faculty director, Environmental and Natural Resources Law Program. BA, 1984, Washington (Seattle); JD, 1987, Stanford; Washington bar, 1989; Oregon bar, 1990. (1992)

Emeriti

Barbara Bader Aldave, professor emerita. BS, 1960, Stanford; JD, 1966, California, Berkeley (Coif); Oregon bar, 1966; Texas bar, 1982. (2000)

Donald W. Brodie, professor emeritus. BA, 1958, Washington (Seattle); LLB, 1961, New York University; Washington bar, 1961; Oregon bar, 1981. (1967)

Maurice J. Holland, professor emeritus. AB, 1958, Yale; MA, 1961, JD, 1966, LLM, 1970, PhD, 1980, Harvard; Massachusetts bar, 1963; Oregon bar, 1987. (1986)

Mary S. Lawrence, associate professor emerita. BA, 1960, MA, 1962, Michigan State; JD, 1977, Oregon; Oregon bar, 1977. (1977)

Ralph James Mooney, professor emeritus. BA, 1965, Harvard; JD, 1968, Michigan (Coif); California bar, 1968. (1972)

Margaret L. Paris, professor emerita. BA, 1981, JD, 1985 (Coif), Northwestern; Illinois bar, 1985. (1992)

Milton L. Ray, professor emeritus. BA, 1947, Rochester; JD, 1950, Chicago (Coif); Illinois bar, 1950; California bar, 1964. (1971)

Rennard Strickland, distinguished professor emeritus. BA, 1962, Northeastern State; MA, 1966, Arkansas; JD, 1965, SJD, 1970, Virginia (Coif); Creek Nation bar, 1965. (1997)

Dominick R. Vetri, professor emeritus (art law, torts, gay and lesbian legal issues). BS, ME, 1960, New Jersey Institute of Technology; JD, 1964, Pennsylvania (Coif); New Jersey bar, 1965; Oregon bar, 1977. (1967)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Minor in Legal Studies

The legal studies minor examines how law shapes and is shaped by society. It combines the analytical tools associated with legal scholarship with elements of a liberal arts education to investigate the power of the law and its potential to create social change.

Requirements for the Minor

Code	Title	Credits
	Core courses	8
	Law elective courses	8
	Elective courses in other fields	8
	Total Credits	24

Courses must be passed with grades of C– or better, with at least 12 credits earned in upper-division courses at the 300 or 400 levels. Courses taken by the student toward the minor may also count, as appropriate, to fulfill requirements for other degree programs. The legal studies minor does not count toward any other degree offered by the School of Law (JD, LLM, CRES master's).

The law elective courses are organized into two fields of interest: law in American society and law in global society. The electives include courses from the following departments and programs: education studies (EDST), ethnic studies (ES), family and human services (FHS), international studies (INTL), philosophy (PHIL), political science (PS), psychology (PSY), and sociology (SOC).

Students may petition the School of Law's legal studies faculty director for approval of another outside course related to legal studies.

- **Doctor of Jurisprudence**
- **Master of Laws**
- **Master of Arts in Conflict and Dispute Resolution** (p. 850)
- **Master of Science in Conflict and Dispute Resolution**

Degree Programs

The curriculum presents fundamental subjects of law during the first year, and the first-year program is prescribed. These required courses are designed to provide a solid foundation in legal theory, practical writing and research skills, and a theoretical and practical knowledge of the law.

All but two second- and third-year courses are elective.

Doctor of Jurisprudence

The curriculum presents fundamental subjects of law during the first year, and the first-year program is prescribed. These required courses are designed to provide a solid foundation in legal theory, practical writing and research skills, and a theoretical and practical knowledge of the law.

All but two second- and third-year courses are elective.

LAW 649	Legal Profession	3
Electives		
Law courses in area of study		50
Total Credits		85

Students who have been admitted to the School of Law, who have satisfactorily completed 85 semester credits, and who have otherwise

satisfied the requirements of the university and the School of Law are granted the JD degree provided that they

- earn a BA or BS or equivalent degree from an accredited college or university at least two years before completing work for the JD degree
- complete successfully all prescribed first-year courses
- complete successfully Constitutional Law II (LAW 644) and Legal Profession (LAW 649)
- fulfill an experiential learning requirement, a diversity course requirement, a professional planning requirement, and a writing requirement
- have been full-time law students for at least six semesters or equivalent
- earn a 2.00 cumulative University of Oregon Law School grade point average
- fulfill other requirements as may be imposed

The School of Law reserves the right to modify its curriculum and graduation requirements at any time.

Students in the School of Law may accrue up to 5 of the required 85 semester credits by successfully completing non-law graduate-level courses or seminars at the University of Oregon. These courses must be relevant to their program of legal studies and approved in advance by the associate dean for academic affairs.

Additional Requirements

A total of three years of full-time resident professional study in the University of Oregon School of Law or another law school of recognized standing is required for the JD degree. At least 55 semester hours must be completed at the University of Oregon School of Law.

Concentrations

Second- and third-year students may develop a specialty in business law, child advocacy law, criminal practice, dispute resolution, environmental and natural resources law, estate planning, family law, green business law, intellectual property law, international law, law and entrepreneurship, law and public policy, ocean and coastal law, public interest law, or tax law. A student who satisfactorily completes one of these programs earns a concentration.

Academic Excellence Program

The Academic Excellence Program is designed to help all Oregon Law students to achieve their full academic potential both in law school and on the bar exam.

For first-year students, the program offers skill building workshops to teach the fundamental skills for success in law school, tutoring sessions with Academic Choice for Excellence (ACE) tutors, and academic advising, assistance and counseling.

While the program is open to all, it can be particularly beneficial for nontraditional law students and those who are the first in their family to attend college or have been away from school for several year.

Master of Laws

The School of Law offers a degree program leading to a master of laws with concentrations in American law, business law, conflict and dispute resolution, or environmental and natural resources law. Applicants must have a JD from an accredited US law school or a law degree (e.g., LLB or bachelor of laws) from a non-U.S. program of legal education.

This program is intended to prepare a select group of postgraduate students for careers in teaching, governmental or international positions, and legal careers in private or public service.

Students who have been admitted to the School of Law master of laws (LLM) program, who have satisfactorily completed at least 24 semester credits, and who have otherwise satisfied the LLM program requirements, are granted the LLM degree provided that they

- have been full-time law students for at least two semesters
- earn a 2.00 cumulative law school grade point average
- fulfill other requirements as may be imposed

The School of Law reserves the right to modify its curriculum and graduation requirements at any time.

For the 2018–19 academic year, tuition and fees for both resident and nonresident students are \$43,482.

Master of Laws Requirements (American Law Concentration)¹

Elective courses in environmental and natural resources law (JD degree holders)		5-10
Elective courses in environmental and natural resources law (non-JD degree holders)		3-8
Total Credits		24

Additional Requirements

- Students who hold a law degree from a non-U.S. institution of higher education are required to take a 2-credit introductory course in American law and a 2-credit course in advanced persuasive legal writing as part of their degree requirements. Depending on a student's course selection and course availability, a student who is required to take these two courses may take more than 24 credits.
- LLM Seminar: Writing (LAW 780) and LLM Seminar: In Practice (LAW 781) are required for all students, providing education on topics of current concern. The students also work to improve their skills in making presentations, drafting articles, legal research, drafting transaction documents, and working collaboratively.
- Master of laws students must complete a written comprehensive paper or project in connection with one of the required concentration-specific courses or as a concentration-focused, independent-study legal research and writing course under the supervision of a faculty advisor.

Full information may be found on the program website (<https://law.uoregon.edu/programs/LLM>).

Master's Degree in Conflict and Dispute Resolution

The graduate program in conflict and dispute resolution, housed in the School of Law, offers an interdisciplinary, two-year master's degree (MA or MS) granted by the Graduate School. It is an interdisciplinary program structured to prepare a new generation of practitioners and educators to rethink traditional approaches to conflict. Students gain theory, professional skills, and supporting knowledge through a combination of course work, internship hours, and a final project. The program operates on the quarter calendar, available online (<http://registrar.uoregon.edu/calendars/academic>).

Students are admitted to the program once a year. Applicants do not need to apply to the JD program, nor are they required to have a specific educational background to be eligible. Applicants are required to apply online (<https://gradweb.uoregon.edu>) through the Graduate School system, GradWeb.

For 2019–20, first-year tuition and fees is \$24,177 for resident students and \$31,872 for nonresidents. The total cost of attendance (including estimates for housing, books, personal expenses, and transportation)

and information about scholarships may be found online (<https://law.uoregon.edu/explore/CRES-tuition-and-financial-aid>).

Master of Arts in Conflict and Dispute Resolution

Code	Title	Credits
	Core courses	33
	Elective courses	20
	Internship (320 hours)	8
	Thesis, terminal project, or course concentration	9
Total Credits		70

Master of Science in Conflict and Dispute Resolution

Code	Title	Credits
	Core courses	33
	Elective courses	20
	Internship (320 hours)	8
	Thesis, terminal project, or course concentration	9
Total Credits		70

Students who wish to obtain a master of arts degree instead of the master of science may do so by meeting one additional academic requirement: demonstrating proficiency in a second language.

The Graduate School requirements may be found online (<https://gradschool.uoregon.edu/policies-procedures/masters>).

Additional Requirements

First-year students take core courses together as a cohort. In the second year of study, degree candidates focus on completing their elective course work, their internship, and their final project.

Elective course work may come from a wide array of disciplines including business, international studies, public policy and management, philosophy, political science, psychology, and sociology, among others. There are also specific electives offered in areas such as the Israel-Palestine conflict, environmental conflict resolution, organizational conflict resolution, restorative justice, family mediation, and conflict and gender.

The internship is a key element of the educational program, providing practical experience in an area that has relevance to the student's educational and career goals. The internship requirement is flexible to allow students to complete their credits over one or more terms with one or more organizations. Opportunities may include local, regional, national, and international locales.

The thesis, terminal project, or course concentration component (the final project for the degree requirement) is sufficiently flexible in format and content to allow students to choose among a theory-based academic paper that studies an aspect of the field, a practical applied project, or a set of courses selected to build specific expertise in a given area. Successful completion of the final project requires an oral defense before the student's final project committee.

The Conflict and Dispute Resolution Program offers several concurrent degree programs: environmental studies, international studies, law, business administration, multimedia journalism, community and regional planning, nonprofit management, and public administration. Other concurrent master's or doctoral degree opportunities may be approved on a case-by-case basis. Students are also eligible to pursue a variety of

graduate certificates and specializations. For more information on these opportunities, visit <https://gradschool.uoregon.edu/academic-programs/#Graduate%20Certificate%20Programs>.

Graduate Specialization in Regional and International Conflict

The Conflict and Dispute Resolution Program partners with several other academic departments to offer a graduate specialization in regional and international conflict. This specialization provides a foundation of knowledge and skills for work in developing or postconflict countries with a focus on international development and aid, relief work, reconciliation, and community building. Participating departments include anthropology, international studies, political science, geography, and law. Detailed information may be found online (<https://law.uoregon.edu/explore/regional-and-international-conflict-specialization>).

Full information may be found on the program website (<https://law.uoregon.edu/programs/conflict-dispute-resolution-masters>) or by emailing cres@uoregon.edu or telephoning 541-346-1604.

Concurrent Degree Programs

JD/MA or JD/MS in Conflict and Dispute Resolution

The School of Law offers a concurrent degree program leading to a doctor of jurisprudence and a master of arts or master of science degree in conflict and dispute resolution. Students receive two degrees in four years rather than in the standard five, deepening their understanding of negotiation, dispute resolution, and alternative methods of settlement. Applicants must apply to and be accepted by both programs.

JD/MA in International Studies

The School of Law and the International Studies Program offer a concurrent degree program leading to a doctor of jurisprudence and a master of arts degree in international studies with a specialization in international law. Students receive two degrees in four years. Applicants must apply to and be accepted by both programs.

JD/MBA

The School of Law and the Lundquist College of Business Graduate School of Management offer a doctor of jurisprudence and master of business administration (JD/MBA) concurrent degree program. The program prepares students to use their legal skills in fields that require understanding of business principles, finance, accounting, corporate management, sports marketing, and international business. Students receive two degrees in four years rather than in the standard five. Applicants must apply to and be accepted by both schools.

JD/MA or MS in Environmental Studies

The School of Law and the Environmental Studies Program offer a concurrent degree program leading to a doctor of jurisprudence and a master of arts or a master of science in environmental studies. This program introduces students to scientific, social, and legal aspects of environmental regulation and resource development. Students receive two degrees in four years rather than in the standard five. Applicants must apply to and be accepted by both programs.

JD/MA or MS in Media Studies

The School of Law and the School of Journalism and Communication offer a concurrent degree program leading to a doctor of jurisprudence and a master of arts or master of science in media studies. The degrees

provide students with opportunities for both legal and communications internships. Applicants must apply to and be accepted by both schools.

JD/MCRP in Community and Regional Planning

The School of Law and the School of Planning, Public Policy and Management offer a concurrent degree program leading to a doctor of jurisprudence and a master of community and regional planning. The degrees provide students with opportunities for both legal and planning internships. Applicants must apply to and be accepted by both programs.

JD/MNM in Nonprofit Management

The School of Law and the School of Planning, Public Policy and Management offer concurrent degrees that provide students with professionally accredited degrees in both law and public administration, the opportunity to interact with professionals in both the legal and public administration communities, opportunities for both legal and public administration internships, and an array of course work that prepares students for a wide range of professional careers.

JD/MPA in Public Administration

The School of Law and the School of Planning, Public Policy and Management offer a concurrent degree program leading to a doctor of jurisprudence and a master of public administration. The degrees provide students with opportunities for both legal and public administration internships. Applicants must apply to and be accepted by both programs.

JD/MS in Water Resources Policy and Management

The School of Law and Oregon State University offer a concurrent degree program leading to a doctor of jurisprudence and a master of science in water resources engineering, water resources science, or water resources policy and management. Applicants must apply to and be accepted by both programs.

Conflict and Dispute Resolution Courses

CRES 101. Introduction to Conflict Resolution. 4 Credits.

Explores up-to-date conflict management theories and practical steps to communicate effectively in sensitive situations.

CRES 199. Special Studies: [Topic]. 1-4 Credits.

Repeatable.

CRES 351. Roles of a Diplomat. 2 Credits.

Students learn about diplomats and diplomatic practice in international conflict situations.

CRES 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CRES 401. Research: [Topic]. 1-4 Credits.

Repeatable.

CRES 404. . 1-4 Credits.

CRES 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CRES 415. Conflict and Gender. 4 Credits.

Focuses on the multiple relationships among conflict, violence, and gender in situations of warfare, militarization, and peacemaking.

CRES 420. Restorative Justice. 4 Credits.

Provides a critical introduction to the principles and practices of restorative justice.

CRES 430. Working Internationally: Culture and Context. 4 Credits.

The theoretical, historical, socio-political, and practical contexts of working, volunteering, doing internships and field research internationally.

CRES 435. Israel and Palestine. 4 Credits.

Examination of the Palestinian and Israeli conflict. Evolution of the political struggle with a broad look at the human side of conflict, and examination of critical negotiation issues.

CRES 440. Dialogue across Differences. 2 Credits.

Introduction to processes and facilitation of discourse and dialogue, with special emphasis on participation. Sequence with CRES 441.

CRES 441. Dialogue Across Differences II. 2 Credits.

Advanced course in dialogic processes and facilitation, with special emphasis on context. Sequence with CRES 440.

Prereq: CRES 440.

CRES 445. Conflicts of Incarceration. 4 Credits.

Issues of crime, incarceration, and justice within the Western context.

CRES 503. Thesis. 1-9 Credits.

Repeatable.

CRES 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CRES 515. Conflict and Gender. 4 Credits.

Focuses on the multiple relationships among conflict, violence, and gender in situations of warfare, militarization, and peacemaking.

CRES 520. Restorative Justice. 4 Credits.

Provides a critical introduction to the principles and practices of restorative justice.

CRES 530. Working Internationally: Culture and Context. 4 Credits.

The theoretical, historical, socio-political, and practical contexts of working, volunteering, doing internships and field research internationally.

CRES 535. Israel and Palestine. 4 Credits.

Examination of the Palestinian and Israeli conflict. Evolution of the political struggle with a broad look at the human side of conflict, and examination of critical negotiation issues.

CRES 540. Dialogue Across Differences. 1-2 Credits.

Introduction to processes and facilitation of discourse and dialogue, with special emphasis on participation. Sequence with CRES 541.

CRES 541. Dialogue Across Differences II. 2 Credits.

Advanced course in dialogic processes and facilitation, with special emphasis on context. Sequence with CRES 540.

Prereq: CRES 540.

CRES 545. Conflicts of Incarceration. 4 Credits.

Issues of crime, incarceration, and justice within the Western context.

CRES 601. Research: [Topic]. 1-9 Credits.

Repeatable.

CRES 604. Internship: [Topic]. 1-8 Credits.

Repeatable.

CRES 605. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

CRES 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

CRES 608. Workshop: [Topic]. 1-5 Credits.

Repeatable.

CRES 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CRES 611. Terminal Project. 1-9 Credits.

Repeatable.

CRES 612. Philosophy of Conflict Resolution. 4 Credits.

Study of how philosophical and theoretical frameworks influence current views and practices of conflict resolution.

CRES 613. Perspectives on Conflict Resolution. 4 Credits.

Introduction to interdisciplinary perspectives on conflict and conflict resolution. Various disciplines (including economics, psychology, and communication) views of conflict and conflict resolution.

CRES 614. Negotiation, Bargaining and Persuasion. 4 Credits.

Examines issues that pervade negotiations, including framing arguments, analyzing bargaining conditions, and crafting deals. Basic skills in negotiation, bargaining and persuasion developed through simulated negotiations.

CRES 615. Cross-Cultural Dynamics in Conflict Resolution. 4 Credits.

Provides students with an opportunity to build or enhance necessary theoretical knowledge, awareness, understanding, practical skills, and strategies for effectiveness in cross-cultural conflict resolution.

CRES 616. Mediation Skills. 4 Credits.

Develop mediation skills such as problem framing, listening, and issue identification and sequencing. Learn to diagnose problems, clarify facts and craft interventions.

CRES 617. Professionalism in Practice. 4 Credits.

Examines the legal and professional ethical constraints in the practice of conflict resolution.

CRES 618. Adjudication and Courts. 2 Credits.

Designed to familiarize students with litigation and formal legal alternatives such as arbitration. Court processes and regulations are explained.

CRES 620. Facilitation. 2 Credits.

Fundamentals of facilitating group discussions and decision-making.

CRES 625. Psychology of Conflict. 4 Credits.

Examines the psychological sources, nature, and functions of conflict, covering multiple levels of analysis relevant to intrapersonal, interpersonal, intragroup, and intergroup conflict.

CRES 629. Arbitration Survey. 1 Credit.

Exploring arbitration as a form of dispute resolution with particular relevance to employment, consumer, commercial, and large-scale disputes.

CRES 631. Managing Conflict in Organizations. 3 Credits.

Prepares students to assist in managing disputes within organization. Covers sources of conflict, common organizational processes, and analyzing and resolving organizational disputes.

CRES 632. Research Methods. 3 Credits.

Explores questions that research may encounter or raise, and how to resolve them. Considers both qualitative and quantitative research methods.

CRES 633. Professional Development Seminar. 1 Credit.

Provides incoming students with tools to be successful in the graduate program and the professional world.

CRES 650. Capstone Seminar. 1 Credit.

Provides student with opportunities to systemically consider lessons from their practicum experiences. Class sessions based on student fieldwork.

CRES 651. Academic Capstone: Course Concentration. 1 Credit.

Fulfills the course component of the course concentration final project for conflict resolution students.

Prereq: students must have completed 50 percent or more of their course concentration credits prior to the term in which they enroll in this course.

CRES 660. Environmental Conflict Resolution. 4 Credits.

Students learn and critically examine methods of environmental conflict resolution, including conflict assessment, negotiation, decision-making, adaptive management, collaboration, and public participation.

CRES 665. Family Mediation. 4 Credits.

Preparation for work-related experiences in family mediation, specifically domestic relations involving custody and parenting time.

Law Courses

LAW 101. Introduction to American Law. 4 Credits.

Surveys United States legal system: presents structure and methods of the legal system and fundamentals of several substantive areas of law.

LAW 102. Introduction to Criminal Law. 1-4 Credits.

Explores criminal law and statutes using primary and secondary sources.

LAW 103. Introduction to Criminal Investigation. 4 Credits.

Examines the constitutional limitations on police officers' authority to detain suspects, search them and their property, and interrogate them.

LAW 104. Introduction to Business Law. 4 Credits.

Examines the context of everyday commerce, shaped by contract, tort, business entity, and securities law, to uncover how the law both affects and is affected by business.

LAW 196. Field Studies: [Topic]. 1-6 Credits.

Repeatable.

LAW 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LAW 201. Introduction to Environmental Law and Policy. 4 Credits.

An introduction to environmental policy and law, with an overview of major themes and the regulatory framework. Focuses on community resilience.

LAW 202. Introduction to Public International Law. 4 Credits.

An introduction to the origins, application, and main actors in international law, international institutions, and international legal processes.

LAW 203. Controversies in Constitutional Law. 4 Credits.

In-depth examination of five to seven landmark Supreme Court cases over the course of the term, spending three to four class sessions on each case.

LAW 204. Immigration and Citizenship. 4 Credits.

Interdisciplinary study of the way in which the American legal order has constituted citizenship.

LAW 250. Introduction to Legal Research. 2 Credits.

Students investigate sources of law and sharpen analytical skills using issues arising in everyday life and scenarios requiring legal information to develop critical legal information literacy skills.

LAW 301. Youth and Social Change. 4 Credits.

Explore how adults act on youth through law, mass media, policy, and social science, while investigating youth as agents of change, acting on their own perspective of law and justice.

LAW 304. American Law and Families. 4 Credits.

Examines the family through a legal lens: the rules that affect legal relationships among family members and laws related to family property.

LAW 305. Contracts in Society. 4 Credits.

Examines business deals as tools that shape personal and social realities, including related power dynamics and the nuances and limits of language.

LAW 310. Environmental Regulation. 4 Credits.

Provides students with an understanding of laws regulating activities that affect the environment as well as the skills to analyze and apply these laws to current issues.

LAW 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LAW 401. Research: [Topic]. 1-6 Credits.

Repeatable.

LAW 403. Thesis. 1-12 Credits.

Repeatable.

LAW 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

LAW 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

LAW 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

LAW 408. Workshop: [Topic]. 1-12 Credits.

Repeatable.

LAW 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LAW 415. Human Rights, Law, and Culture. 4 Credits.

The history, theory, and practice of human rights from a global perspective.

LAW 416. Transitional Justice. 4 Credits.

Historical and theoretical overview of the conflicts and international mechanisms, with a focus on cultural, historical, and legal forces that shape postconflict peace-building efforts.

LAW 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LAW 600. Law Courses for Nonlaw Students. 1-15 Credits.

Repeatable. Generic course number for translating 600-level School of Law semester credits to term credits on academic records for nonlaw students.

LAW 601. Research: [Topic]. 1-16 Credits.

Repeatable.

LAW 605. Reading: [Topic]. 1-16 Credits.

Repeatable.

LAW 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Accounting for Lawyers, Alternative Dispute Resolution, American Legal Biography, Immigration Law, Litigation Practice and Procedure, Mediation, Negotiation, Nonprofit Organizations, Postconviction Remedies, White-Collar Crime.

LAW 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LAW 611. Contracts. 4 Credits.

Examines contractual relationships from formation through interpretation and breach to remedies and potential third-party rights. Covers the common law of contracts and Uniform Commercial Code, Article 2, which governs contracts for the sale of goods.

LAW 613. Torts. 4 Credits.

Liability for intentional and negligently caused injuries to person and property, strict liability, vicarious liability, abnormally dangerous activities, products liability, nuisance, invasion of privacy, defamation, defenses and immunities, the impact of insurance and risk distribution upon liability, accident compensation plans, damages, losses.

LAW 615. Civil Procedure. 4 Credits.

Survey of federal court organization and jurisdiction and of systems of civil procedure.

LAW 617. Property. 4 Credits.

Nature and function of private property rights. Topics may include the common law classification of estates in land; forms of concurrent ownership; landlord and tenant; adverse possession; incorporeal interests in land, easements, covenants, and servitudes; title; introduction to land use issues and judicial legislative developments in law.

LAW 618. Criminal Law. 4 Credits.

Administration of criminal law and the definition of crimes as a technique of social order with primary basic elements of criminal liability. Emphasis on sources of definitions, limitations of culpability, and defenses.

LAW 619. White-Collar Crime. 2 Credits.

For students interested in the practice of criminal law. Assists business lawyers who advise clients on the business practices that constitute criminal activity.

LAW 620. Business Associations. 4 Credits.

Surveys business relationships between the people who own, invest in, and manage businesses and the third parties who interact with or are affected by them. Starting with sole proprietorships, then turning to partnerships, corporations, and hybrids of the two, presents the structure, operation, and salient characteristics of each business form.

LAW 622. Legal Research and Writing I. 3 Credits.

Integrated instruction in legal research, analysis, and writing of legal memoranda emphasizes research strategies, problem solving, and the relationship between research strategies and analysis. Writing assignments, each progressively more difficult, are evaluated by faculty members. Offered in small sections. Includes library workshops and individual conferences.

LAW 623. Legal Research and Writing II. 3 Credits.

Building on the research, writing, and analytical skills of Legal Research and Writing I, students focus on persuasive writing as they produce trial memoranda and appellate briefs. Students present final oral arguments in a courtroom setting before a panel of three judges.

LAW 624. Advanced Legal Research. 2 Credits.

Development of skills in formulating efficient research strategies online and in print; exposure to research methods in particular areas of law.

LAW 625. Business Bankruptcy. 3 Credits.

Explores the law governing business bankruptcy; examines tools for restructuring and rehabilitating a business under Chapter 11 of the Bankruptcy Code. Topics include operating a business in bankruptcy, reshaping the estate, and negotiating and confirming a plan of reorganization.

Prereq: LAW 648.

LAW 626. Mergers and Acquisitions. 2-3 Credits.

Participants develop an understanding of how to analyze a potential acquiree and how that analysis informs and governs the drafting of the acquisition agreement and the disclosure document. Presents the germination of a transaction from financial need to executed documentation.

Prereq: LAW 620.

LAW 627. Accounting for Lawyers. 3 Credits.

Covers the accounting cycle, generally accepted accounting principles, financial statements, and common legal and accounting topics.

LAW 628. Nonprofit Organizations. 3 Credits.

Provides an overview of the theory, purposes, and regulation of nonprofit organizations. Practical skills are developed through drafting assignments.

LAW 629. Fundamentals of Loans. 1 Credit.

Covers the rights of borrowers and lenders in unsecured and secured loans in less depth than the Secured Transactions course.

LAW 630. Tax Policy. 2-3 Credits.

Explores tax policy issues including how taxes are used to create social equality. Evaluates the current tax system using the three classic goals: equity, efficiency, and simplification.

Prereq: LAW 680.

LAW 631. Real Estate Planning. 3 Credits.

Covers the planning and documentation of real estate development, financing and leasing transactions, with special emphasis on tax aspects of real estate transactions. Taught from a practical skills perspective that will appeal to practicing lawyers and other employers.

Pre- or co-req: LAW 680.

LAW 632. Sales. 2-3 Credits.

Covers contracts for the sale of goods as codified in Uniform Commercial Code Article 2; international contracts, regulation of consumer warranties, leases of goods under Article 2A.

LAW 633. Business Planning. 2,3 Credits.

Study of business life cycle from its initial organization and operation to its eventual sale and dissolution. Students draft documents for use in hypothetical transactions, compare the way partnerships and corporations deal with similar problems, and analyze the impact taxes have on business decisions.

Prereq: LAW 620, LAW 680.

LAW 634. Contract Drafting. 2 Credits.

The principles of contemporary commercial drafting, introduction to documents typically used in a variety of transactions.

LAW 635. Real Estate Transactions. 3 Credits.

Fundamentals of real estate transactions, with a focus on secured land and finance.

LAW 636. Secured Transactions. 3-4 Credits.

Examines the rules that govern borrowing and lending with collateral; buying and selling promissory notes and other debt; and related transactions that are essential to large and small transactions.

LAW 637. Trusts and Estates I. 3 Credits.

Basics of estate planning law--intestate succession, wills, will substitutes, and trusts.

Prereq: LAW 617.

LAW 638. Workers' Compensation Law. 2 Credits.

Fundamentals of workers' compensation law in Oregon and other states.

LAW 640. Children and the Law. 3 Credits.

Topics include the constitutional framework for allocating the power to make decisions about children among parents, children, and state agents; control of education; parental support duties; establishing paternity; the child welfare system; legal solutions to conflict between adolescents and their parents; and juvenile delinquency and the juvenile justice system.

LAW 641. Legislation. 3 Credits.

Covers theories of the legislative process, normative theories of statutory interpretation, and the main judicial doctrines of statutory interpretation.

LAW 642. International Business Transactions. 3 Credits.

Examines legal issues affecting international business activity; includes forms of doing business, trading of goods, commercial terms, the UN Convention on Contracts for the International Sale of Goods, financing, technology, transfers, foreign investment, and dispute resolution.

LAW 643. Constitutional Law I. 3 Credits.

Government structure and individual rights are examined in the context of the authority of courts to declare legislative acts unconstitutional. Includes congressional regulatory power under the Commerce Clause, implied limits on state regulatory power, and the substantive dimensions of due process.

LAW 644. Constitutional Law II. 3 Credits.

Guarantees of individual rights against government, especially freedom of expression and equal protection of the law.

Prereq: LAW 643.

LAW 645. Oregon Practice and Procedure. 3 Credits.

Intensive study of civil procedure in Oregon courts, and the critical evaluation of Oregon civil procedure in light of the purposes and values of a procedural system and in comparison with federal rules.

LAW 646. Federal Jurisdiction. 3 Credits.

Addresses the role of federal courts in the operation of the federal system. Includes analysis of constitutional and legislative foundations of the judicial power of the United States; jurisdiction--diversity of citizenship, federal question, jurisdictional amount, and removal; venue; federal and state court relationships; the law applied to federal courts; procedure in the federal district courts; appellate jurisdiction and procedure in courts of appeals and the Supreme Court.

LAW 647. Conflict of Laws. 3 Credits.

Students learn to evolve techniques for choosing or selecting the governing law from among the states or nations involved in a private event. Presents some aspects of federalism; jurisdiction; and the recognition, enforcement, and modification of judgments.

LAW 648. Bankruptcy. 3 Credits.

Introduction to bankruptcy law; focuses on consumer bankruptcy and contrasting creditor's rights and debtor's protections under the federal Bankruptcy Code with those under state collection law. Recommended preparation: Commercial Law (LAW 636).

LAW 649. Legal Profession. 3 Credits.

Addresses the Model Code of Professional Responsibility, the Code of Judicial Ethics, roles and functions of lawyers in society, organization and functions of the bar, provision of legal service, responsibilities in representing clients, and the future of the legal profession. It may include the review and analysis of videotaped ethical problems.

LAW 650. Interview and Counsel. 2 Credits.

Explores the client-centered approach to interviewing and counseling through readings, discussions, participatory exercises, and role-playing.

LAW 651. Trial Practice. 3 Credits.

Introduces the essential techniques and theory necessary to conduct a trial in court.

Prereq: LAW 652.

LAW 652. Evidence. 3 Credits.

Covers the structure of the adversary system; roles of judge, jury, and attorney in the fact-finding process; sufficiency of evidence; order of proof; presumptions; relevancy; judicial notice; real and documentary evidence; form and elicitation of oral testimony; impeachment and rehabilitation of witnesses; the hearsay rule and its exceptions; privileges. Addresses practical problems in the introduction of evidence and trial tactics and methods. Courtroom observations, movies, and videotapes of effective trial techniques present realistic situations.

LAW 655. Family Law. 3 Credits.

Marriage and its legal consequences, divorce and its financial consequences; establishing the parent-child relationship; child custody and child support; jurisdiction and choice of law issues at divorce; legal regulation of marriage; rights of unmarried cohabitants.

LAW 656. Elder Law. 3 Credits.

Topics include social security and pensions; health care decision-making, including the right to die, living wills, and durable powers of attorney for health care; planning for health care financing, including alternate living arrangements and financing through private resources, Medicare and Medicaid; regulation of retirement facilities and nursing homes; and protection of disabled adults through guardianships, conservatorships, and related mechanisms. Covers the basic and comprehensive writing requirements.

LAW 658. Local Government Law. 3 Credits.

Uses DeTocqueville and Madison to frame the issue of decentralization versus centralization in governmental structure. Course materials are divided into three sections: 1) vertical governmental organization--the relationships between cities and state governments and the relation of both to the federal government; 2) horizontal governmental relations--how neighboring cities deal with one another on public school funding, exclusionary zoning, regional planning, and other areas; 3) internal relationship between cities and their citizens--voting systems, when citizens can sue a city, referenda, and initiatives.

LAW 659. Labor Law. 3 Credits.

Analysis of the National Labor Relations Act and the Oregon Labor Relations Act; the right of self-organization; selection of the representative by election and by other means; unit determination; bargaining in good faith; remedies for unfair labor practices; judicial review; strikes, boycotts, and lockouts under various labor relations acts; concerted activities; and roles of courts and labor agencies.

LAW 660. Employment Law. 3 Credits.

Examines individual rights in the workplace, including federal and state statutes. Use of questionnaires, polygraph legislation, drug and other medical tests; employment discrimination (Title 7); disability discrimination; family leave statutes; and a variety of working conditions are covered, including harassment, workplace privacy, and free speech as well as the Occupational Safety and Health Act. The doctrine of at-will discharge and whistle-blower legislation are included.

LAW 661. Remedies. 3 Credits.

Remedies available for prevention of redress of civil wrongs; includes monetary damages; restitutionary remedies such as tracing, constructive trusts, equitable liens, and injunctions.

LAW 662. Jurisprudence. 3 Credits.

Topics may include examination of important conceptual theories of law--legal positivism, natural law, legal realism; the relation of law and morality; theories of justice: economic, Kantian, utilitarian; the Critical Legal Studies movement; philosophical aspects of legal issues; abortion and punishment; feminist theories of law; and moral constraints of the practice of law.

LAW 664. Administrative Law. 3 Credits.

Analysis of judicial review of administrative action, including presumptions, standing, ripeness, exhaustion, and questions of fact and law; the process of proof in adjudicatory hearings, including official notice, evidentiary considerations, and investigation; the process of decision in adjudicatory hearings, including separation of function, bias, and ex parte communication; procedural distinctions between rule making and adjudication.

LAW 665. Securities Regulation. 2-3 Credits.

Examines the federal statutes and regulations that affect the initial and secondary distribution of securities. Emphasis is placed on the Securities Act of 1933, the Securities Exchange Act of 1934, and the integrated disclosure system now largely in place.

LAW 667. Copyrights. 3 Credits.

Virtually any creative product (other than inventions) that originates with the author can be protected by copyright. Comprehensive federal copyright statute is built upon extensive judicial interpretations through case law. Considers creations, ownership, and transfer of copyright interests and the rights accorded to copyright owners to make copies and derivative works and to distribute, perform, and display the work. Addresses the basic principles of trademark law.

LAW 668. Land Use Law. 2-3 Credits.

Surveys the function, operation, and legal impact of state and local public planning and land-use control laws, ordinances, and administrative growth-control techniques; transfer of developmental rights; zoning; variances; conditional-use permits; and nonconforming uses. Considers newer state-level land-use control devices, such as state environmental impact assessment acts (e.g., in California) and statewide land-use planning laws (e.g., in Oregon).

LAW 669. Water Resources Law. 2,3 Credits.

Riparian and appropriation water law systems, federal and state power over water resources, transfer of water rights, groundwater management, public water rights, including the public trust doctrine, and environmental constraints on water use.

LAW 671. International Law. 2-3 Credits.

Justification for state actions labeled rules of law; sources and evidence of a law between states; statehood; treaties; state responsibility and authority; individuals in transnational situations; international cooperation; protection of human rights; and use of military force.

LAW 673. Patent Law and Policy. 2,3 Credits.

Developments in patent law including patentable subject matter; requirements for patentability and infringement; the process of obtaining and enforcing a patent; and contemporary controversies in patent law, such as ethical and economic objections to biotechnology and software patents.

LAW 675. Legal Writing. 1-3 Credits.

Research and writing supervised by a faculty member. Typically 2 credits, but never more than 3, are awarded for a writing project in one semester.

LAW 676. International Tax. 3 Credits.

Addresses the United States taxation of international transactions, including trade, investment, and labor, covering both out-bound (US to foreign) and inbound (foreign to US) transactions.

Prereq: LAW 680.

LAW 678. Indian Law. 2-3 Credits.

Provides students with an understanding and overview of the fundamental principles of American Indian law.

LAW 679. Ocean and Coastal Law. 3 Credits.

Surveys federal, state, and international laws governing the use and protection of ocean and coastal resources including relevant judicial decisions, administrative regulations, and management plans.

LAW 680. Federal Income Tax I. 3 Credits.

Statutory, judicial, and administrative material related to individual income tax—concepts of income, deductions, credits, tax accounting, basis, and capital gains and losses.

LAW 681. Federal Income Tax II. 3 Credits.

Tax treatment of partners and partnerships, corporations, and shareholders.

Prereq: LAW 680.

LAW 682. Estate and Gift Taxes. 2 Credits.

Analysis of the federal estate and gift tax system and its application to gratuitous transfers.

Prereq: LAW 637, LAW 680.

LAW 683. Estate Planning. 3 Credits.

Presents problems in estate analysis, planning, and execution; planning an estate from the interview stage to the drafting of wills and trusts to implement the estate plan.

Prereq: LAW 637.

LAW 684. Criminal Investigation. 3 Credits.

Examines the regulation of law enforcement investigatory practices-- searches and seizures, the eliciting of confessions, and lineups and other identification procedures. Course materials analyze various constitutional and statutory constraints on law enforcement practices, and deal extensively with landmark federal constitutional cases such as *Miranda v. Arizona*.

LAW 685. Criminal Adjudication. 3 Credits.

Examines the adjudicative part of criminal procedure; covers the decision to charge, bail and pretrial release, grand juries and preliminary hearings, discovery, pretrial motions, plea bargaining, jury trials, appeals, and former jeopardy.

LAW 687. Wildlife Law. 2 Credits.

Overview of the treatment of wildlife; international regulation; federal regulation; the national wildlife refuge system; wildlife management on U.S. Forest Service lands and lands administered by the Bureau of Land Management; fish habitat and hydroelectric development; regulation of private lands to protect species on public lands; tribal rights and wildlife; and state regulation of wildlife.

LAW 688. Hazardous Waste Law. 2 Credits.

Hazardous waste liability and regulation is moving to the forefront of environmental law as industries, governmental agencies, and citizen groups struggle with the problems of remedying contamination caused by past disposal practices and seek to prevent unsafe disposal in the future. Emphasizes the attorney's roles in compliance counseling, in environmental audits, and in negotiation between governmental agencies and regulated parties.

LAW 689. Animal Law. 2 Credits.

Examines the debate between animal rights and animal welfare, and considers legal issues concerning companion animals, farm animals, laboratory animals, wild animals, feral animals, and service animals.

LAW 690. International Environmental Law. 2,3 Credits.

Investigates treaty and customary principles of international law regarding environmental protection. Covers problems of protecting the international environmental commons, transboundary pollution, and international interest in national environmental resources.

LAW 693. Human Rights and Environment. 3 Credits.

Environmental rights, increasingly recognized as a new category of human rights as well as an application of existing rights, are both substantive and procedural. Presents recent developments in international law and national law in various countries in Europe, Africa, Asia, and the Americas. Examines international instruments, national constitutions, and legislation. Discussion includes novel international court cases that interpret and apply these rights.

LAW 694. Professional Sports Law. 2-3 Credits.

Is the NFL an illegal cartel? What rights do players and unions have? Explores the regulation of professional leagues, players, teams, coaches, and agents.

LAW 695. Amateur Sports Law. 2-3 Credits.

Are student athletes pampered or victimized? What has Title IX accomplished? What's next for the National Collegiate Athletic Association? Explores the regulation of intercollegiate and interscholastic sports.

LAW 696. Sports Licensing. 1 Credit.

A practical look into the world of sports licensing. The focus will be on examining real-world contracts and the contexts in which they were negotiated.

LAW 697. Consumer Law. 3 Credits.

Overview of major consumer protection laws and concepts, including false advertising, consumer privacy, identity theft, credit reporting, home purchases, credit disclosures, and loan regulations.

LAW 699. Antitrust Law. 2 Credits.

Overview of antitrust law in the United States, with an emphasis on current antitrust practice; recognizing, analyzing, and solving problems involving antitrust issues.

LAW 704. Internship: [Topic]. 1-12 Credits.

Repeatable. Hollywood Externship, Federal Judicial Internship.

LAW 707. Seminar: [Topic]. 1-6 Credits.

Repeatable. Recent topics are Advanced Appellate Advocacy; Interviewing and Counseling; Journal of Environmental Law and Litigation; Legislative Issues Workshop; Moot Court Board; Moot Court Competition; Law Review; Oregon Review of International Law, Trial Practice.

LAW 712. Business Law Clinic. 3 Credits.

Replicates the environment of a small law firm. Students represent small companies and entrepreneurs who need legal assistance in forming and operating their businesses. Each student assists several clients during the course of the semester under the supervision of an attorney. Includes a weekly seminar.

Prereq: LAW 620, 680.

LAW 714. Judicial Externship [Topic]. 1-12 Credits.

Externship at the Lane County Circuit Court. Students conduct research, write legal memoranda, draft opinions and generally participate in the daily operation of the court. Repeatable.

LAW 720. Disability Law. 2 Credits.

Surveys the major federal special education and disability nondiscrimination laws from a disability rights perspective.

LAW 721. Introduction to State Administrative Law. 2 Credits.

Examines Oregon's Administrative Procedure Act and Model State Administrative Procedure Act, with the added context of relevant case law.

LAW 722. Alternative Dispute Resolution Litigation Strategy. 2 Credits.

Provides knowledge, tools and skills for lawyers to settle cases, help clients make an informed decision about settlement, and identify appropriate processes.

LAW 723. Oregon Constitutional Law. 2 Credits.

This course covers provisions of the Oregon Constitution that differ from, and usually provide more rights than, the US Constitution, including equal protection, free speech, search and seizure, guaranteed remedy.
Prereq: LAW 643, LAW 644.

LAW 724. Arbitration. 3 Credits.

This course introduces students to the theory and practice of mediation. In an experiential format, students will learn how to manage the stages of a mediation process.

LAW 725. Mediation. 3 Credits.

This course introduces students to the theory and practice of mediation. In an experiential format, students will learn how to manage the stages of a mediation process.

LAW 726. International Sports Law I. 1 Credit.

An overview of the law and structure of the organizations that govern international sports, including FIFA, the International Olympic Committee, World Anti-Doping Association, and Court of Arbitration for Sport.

LAW 727. International Sports Law II. 1 Credit.

A trip to Europe during J-Term to meet with and learn from foreign sports lawyers at the International Olympic Committee, World Anti-Doping Association, Court of Arbitration for Sport, and others. Repeatable once for a maximum of 2 credits.
Prereq: LAW 726.

LAW 729. Legal Writing for the Bar. 2 Credits.

Offers a head start on bar preparation by helping students to develop and solidify the fundamental skills needed to pass the bar.

LAW 730. Intensive Writing. 2 Credits.

Introduces students to ways in which lawyers communicate and gives students the opportunity to more extensively study the mechanics of effectively communicating legal analysis.

LAW 731. Writing in Law Practice. 2 Credits.

Provides students with opportunities to develop practice-oriented writing skills in a variety of contexts.

LAW 732. Intensive Legal Writing. 3 Credits.

Students produce documents in a wide variety of practice settings, including office memoranda, contracts, and client letters. Students receive extensive feedback and opportunities to revise their work. Offered summer only.

LAW 740. Innovations in Criminal Justice. 1 Credit.

Focuses on advanced approaches to the reduction of recidivism in the federal criminal justice system. Discussion centers on the use of therapeutic jurisprudence grounded in evidence-based practice.

LAW 741. Child Development and the Law. 1 Credit.

Provides students with an overview of child development with applications for the law. Course topics span the developmental spectrum from prenatal influences through childhood.

LAW 742. Leadership Practices for Professional Success. 1 Credit.

Examines leadership theories and models. Through intensive readings, exercises, introspection, and open discussion, participants develop workable insights into their own leadership styles and how to improve them.

LAW 743. Law of Settlement. 1 Credit.

Survey of legal issues and lawyering practices associated with the private resolution of litigated cases, including confidentiality, economic incentives, and enforcement.

LAW 744. Art Law. 3 Credits.

Study of law related to the visual arts. Analyzes laws related to the creation, purchase, sale, transfer, import and export of art; protection of artist rights.

LAW 745. Race, Gender, Bias & Law. 3 Credits.

Surveys areas in which law deals with inter-group relations and the biases related to race, gender, and other social categories common to them (e.g., racial profiling, affirmative action, and employment discrimination).

LAW 749. Immigration Law and Policy. 3 Credits.

Covers statutory, constitutional, and administrative law and policy issues relating to foreign nationals and their relationship with the U.S. government.

LAW 750. Forensic Science in Criminal Law. 3 Credits.

Introduction to forensic science and criminal law. Topics include crime scene investigation, trace evidence, serology, DNA analysis, fingerprints, firearms, documents, and pathology.
Prereq: LAW 652, LAW 685.

LAW 760. Negotiation. 3 Credits.

Explores how negotiations work, what makes negotiators effective, and why negotiations fail. Focuses on analyzing and improving negotiation skills.

LAW 761. Law Journals: [Topic]. 1-3 Credits.

Welcome to law review! As you already know, working on a law review/journal is very demanding. It is also a unique opportunity in law school to develop your project management skills and work with others.

LAW 766. Domestic Violence Civil Clinic. 3 Credits.

You will provide necessary legal services to survivors of domestic violence, with an emphasis on family law. We hope to empower clients and provide holistic representation.

LAW 767. Advanced Domestic Violence Civil Clinic. 2 Credits.

You will provide necessary legal services to survivors of domestic violence, with an emphasis on family law. We hope to empower clients and provide holistic representation.
Prereq: LAW 766

LAW 768. Domestic Violence Protective Order Clinic. 3 Credits.

This course provides law students with the opportunity to learn how to effectively serve survivors of domestic violence in protective order litigation through mock exercises and real-world client representation.

LAW 769. Advanced Domestic Violence Protective Order Clinic. 2 Credits.

This course provides law students who have completed the basic clinic with additional opportunities to represent survivors of domestic violence in more complex protective order proceedings.
Prereq: LAW 768 Domestic Violence Protective Order Clinic

LAW 773. Nonprofit Clinic. 4 Credits.

In this course students, working in interdisciplinary teams, perform as consultants to several Oregon nonprofit boards of directors. Students will engage with expert consultants, executive directors, and client boards of directors and work to formulate and deliver a meaningful governance assessment to two 501(c)(3) organizations.

LAW 774. Civil Practice Clinic. 3 Credits.

You will provide legal services to indigent clients through the local legal aid office. You will gain negotiation and litigation experience, managing your own cases under instructor supervision.

LAW 775. Advanced Civil Practice Clinic. 3 Credits.

Work with Oregon Law Center to represent real clients in real cases. Gain negotiation and litigation experience managing your own cases under instructor supervision.

Prereq: LAW 774

LAW 780. LLM Seminar: Writing. 2 Credits.

Master of laws students will explore the United States legal system and legal profession through in-class workshops, legal research and writing, and oral presentations.

LAW 781. LLM Seminar: In Practice. 2 Credits.

Students studying for a master of laws (LLM) degree explore professional development topics and develop practice skills through in-class workshops, legal writing, a simulated symposium, and negotiation exercises.

LAW 782. Introduction to American Law for International LLM Students. 2 Credits.

This course is specifically designed for international students in the LLM program. The course provides foundational knowledge of US legal system necessary to fully participate in graduate legal education.

LAW 790. Tribal Courts and Tribal Law. 2 Credits.

Examines Indian law from the tribal perspective and focuses on the role of tribal lawmaking and tribal courts.

LAW 791. Contemporary Issues in American Indian Law. 2 Credits.

Provides in-depth study of current issues in American Indian law and US public policy regarding Native Americans.

LAW 792. Comparative Law of Indigenous Peoples. 2 Credits.

Examines the historical and contemporary legal and policy treatment of indigenous peoples in select countries with significant indigenous populations.

LAW 793. Environmental Law. 3 Credits.

Overview of environmental law and policy, common-law doctrines, administrative rulemaking, environmental federalism, National Environmental Policy Act, Endangered Species Act, the regulation of hazardous waste, air and water pollution.

LAW 794. Natural Resources Law. 3 Credits.

Provides a foundation in environmental law. Spans international, federal, state, and local jurisdiction, interfacing with classic environmental law (pollution statutes).

LAW 795. Public Trust Law. 2 Credits.

Explores public trust law, which originated as judge-made law and has been enshrined in many statutes and constitutions in the United States and abroad.

LAW 796. Food, Farming, and Sustainability. 3 Credits.

Examines how laws structure processes of food production, distribution, and consumption; surveys food and agricultural laws in review of broader questions of ecological sustainability and commerce.

LAW 797. Energy and the Law Seminar. 2 Credits.

Introduces students to the policies and laws governing energy in the United States. The class covers federal and state jurisdiction, renewable energy laws and policies, regulation of investor-owned utilities, public power, transmission, and the laws that govern the resources used to generate electricity.

School of Music and Dance

Sabrina Madison-Cannon, Dean

541-346-3761
 541-346-0723 fax
 121 MarAbel B. Frohnmayer Music Building
 1225 University of Oregon
 Eugene, Oregon 97403-1225

The School of Music and Dance is nationally recognized for its dedication to the highest levels of excellence in teaching, performance, and research. It is the only music school in the state of Oregon authorized to grant master's degrees in dance and doctoral degrees in music.

The School of Music and Dance began as the Department of Music in 1886, then the School of Music in 1900. It was admitted as a charter member of the National Association of Schools of Music in 1928. The school was joined in 1991 by the dance faculty—which had been offering courses at Oregon since 1911, and which established a dance major in 1959—and was renamed the School of Music and Dance in 2005. The UO music and dance departments are among the oldest west of the Mississippi.

The School of Music and Dance serves more than 500 music and dance majors, including 150 graduate students, and offers the following degrees in a wide range of options:

- bachelor of arts (BA)
- bachelor of music (BMus)
- bachelor of music in music education (BMME)
- bachelor of science (BS)
- master of arts (MA)
- master of music (MMus)
- doctor of musical arts (DMA)
- doctor of philosophy (PhD)

The ratio of students to faculty members is 8.3-to-1.

More than 250 performance programs are held annually in Eugene by UO students and faculty members, and more than 500 in the United States and abroad.

Mission Statement

The University of Oregon School of Music and Dance has a threefold mission:

- To prepare students to lead lives enriched by the arts of music and dance
- To provide comprehensive programs for those pursuing professional careers in music and dance, and a broad range of courses for those seeking a liberal arts education
- To serve as an educational and cultural resource for the University of Oregon, the local community, and the state of Oregon

Dance

Steven Chatfield, Department Head

541-346-3386

541-346-3380 fax
 161 Gerlinger Annex
 1214 University of Oregon
 Eugene, Oregon 97403-1214

The primary aim of the Department of Dance is to enrich the lives of majors, nonmajors, and the Oregon community with diverse dance experiences. Dance is explored as an art form and as one of the humanities in a liberal arts education. Study in dance as an academic discipline integrates inquiry and theory to develop skills in observation, critical thinking, problem solving, and evaluation. In addition to the academic components, dance students experience the rigorous professional discipline that is inherent in studio classes. The department emphasizes modern dance. Students may also study such idioms as ballet, contact improvisation, hip-hop, and African dance and drumming.

Regardless of a student's career goals, education in dance at the University of Oregon provides the opportunity to develop motivation and self-discipline, intellectual curiosity, and creative imagination. These attributes are essential not only for a successful career but also for experiencing a fulfilling life.

Information about performances, placement classes, performance auditions, master classes, special events, and scheduling updates is available in the department office and online (<http://music.uoregon.edu/areas-study/dance>).

Facilities

The Department of Dance has four professional dance studios for classes and activities in dance. In addition to serving as classrooms and rehearsal spaces, two studios in Gerlinger Annex convert into the M. Frances Dougherty Dance Theatre, which seats 225 people and has state-of-the-art stage equipment.

Performing Opportunities

The department offers frequent opportunities for students to perform in works by faculty members, guest artists, graduate students, and undergraduates. Performances are produced throughout the year, and any university student may participate. Participants are usually selected through auditions. Rehearsals and performances earn academic credit.

A student may earn credit and gain experience in teaching, lighting, costuming, makeup, management of productions, or a combination of these. Practicum credit is offered in dance choreography, production design, and management.

Repertory groups such as the UO Repertory Dance Company and Dema, an African dance ensemble, tour Oregon and the Northwest presenting concert performances as well as lecture-demonstrations and master classes for public schools, colleges, universities, civic organizations, and community concert series.

Collaborations with local dance groups, the Department of Theater Arts, and groups within the School of Music and Dance provide multidisciplinary performance opportunities. These activities carry academic credit.

Scholarships

The Department of Dance awards several partial scholarships yearly to incoming dance majors and to continuing dance student performers and choreographers.

Dance Oregon

A student organization partially funded by the Associated Students of the University of Oregon, Dance Oregon is open to any student interested in dance. Its general function is to enhance and enrich the dance opportunities offered through the departmental curriculum. To this end, Dance Oregon provides a variety of activities each year that are promoted on and off campus. Examples include sponsoring professional guest artists to perform, lecture, set repertory, or teach master classes, and organizing student participation in the American College Dance Association.

Dance Program for Nonmajors

A variety of dance experiences are provided for enjoyment and enrichment through the dance program. Lower-division DANC courses generally offer beginning or elementary instruction and may be repeated twice for credit. Upper-division DANC courses provide low-intermediate instruction and may be repeated twice for credit. A maximum of 12 credits in DANC courses may be applied to the total number of credits required for a bachelor's degree.

Upper-division DAN courses provide advanced instruction. See DAN course listings for credit repeatability.

Noncredit DANC and DAN studio courses may be available to members of the community through community dance; a modest instructional fee is assessed by the Department of Dance.

Faculty

Steven Chatfield, professor (modern technique, dance sciences, research, improvisation, composition). BA, 1975, MA, 1984, PhD, 1989, Colorado, Boulder. (1989)

Christian Cherry, associate professor (fundamentals of rhythm, music for dance and music in the dance studio, contact improvisation); director, graduate studies; director, music in dance. BA, 1983, Ohio Wesleyan; MM, 1993, Ohio State. (2001)

Brad Garner, associate professor (modern, jazz, and ballet technique; improvisation). BFA, 1997, Minnesota, Twin Cities; MFA, 2004, Arizona State. (2009)

Rita Honka, senior instructor (African and modern technique, African diaspora, anatomy). BS, 1989, Wayne State; MS, 1992, Oregon. (1993)

Habib Iddrisu, assistant professor (West African music, dance, performance). BA, 2002, MA, 2004, Bowling Green State; PhD, 2011, Northwestern. (2013)

Walter Kennedy, associate professor (modern and ballet technique, dance history, composition); director, undergraduate studies. BFA, 1996, California State, Long Beach; MFA, 1999, Illinois, Urbana-Champaign. (2000)

Shannon Mockli, associate professor (modern, contemporary, and ballet technique; improvisation to composition). BFA, 2003, MFA, 2008, Utah. (2008)

Emeriti

Jenifer P. Craig, associate professor emerita. BA, 1971, MA, 1973, Oregon; PhD, 1982, Southern California. (1986)

Bruno V. Madrid, senior instructor emeritus. BMus, 1955, Santo Tomas Conservatory of Music; MMus, 1963, Oregon. (1966)

Susan Zadoff, senior instructor emerita. Ballet Russe de Monte Carlo. (1976)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts**
- **Bachelor of Science**
- **Minor**

Undergraduate Studies

The Department of Dance offers curricula leading to bachelor of arts (BA) or bachelor of science (BS) degrees. The goal of the department is to provide comprehensive dance training within the liberal arts framework of the university. The serious study of dance involves intellectual, artistic, and physical development. The Department of Dance emphasizes all three areas of growth, a commitment made possible by the breadth of its curricular offerings and the depth of faculty expertise.

Facility with oral and written communication is one goal of a liberal arts education. Therefore, dance majors pursue a course of study to acquire a firm intellectual grasp of the theoretical, historical, and creative forces that shape dance as an art form.

Dance, unique in that it is also a physical form of communication, requires continual experience in its technical foundations. Students are expected and encouraged to experience a variety of forms of dance training and idioms. Production and pedagogy are also integral to the undergraduate core, because many students find careers in theater and teaching.

Goals for the Undergraduate Dance Major

1. Explore the field of dance from a liberal arts perspective
2. Explore disciplined technique and creative processes involved in the artistry of dance
3. Formulate an intellectual understanding of the historical, philosophical, and culturally significant aspects of dance
4. Develop a working knowledge of music and science as they relate to and enhance the dance experience
5. Develop an understanding of dance as a unique art form in conjunction with its relationship to other art forms and disciplines
6. Develop a level of competence in performance, creative, and theoretical aspects of dance to pursue graduate studies or other professional goals

Preparation

High school students planning to major in dance should include preparation in music, drama, art, and dance, especially modern dance.

Students transferring to the UO as dance majors after two years of college work elsewhere should have completed two terms of college-level English composition, as many of the university's general-education requirements as possible, and training in modern dance.

Careers

Career opportunities include performing in regional dance companies and teaching in community centers, fitness centers, and private studios. Business and technical theater management, dance science, dance

research, and dance journalism offer alternatives to performance and creative work.

Bachelor's Degree Program

Students eligible for admission to the university may declare dance as a major. Candidates for the bachelor's degree with a major in dance must satisfy general university requirements, select appropriate courses in related areas, and complete dance course requirements with a grade of C– or better. The faculty regularly reviews students for evidence of satisfactory progress toward fulfilling degree requirements. Students who receive grades lower than C– or I (incomplete) or Y in dance courses are placed on departmental probation and must repeat or complete the course with a minimum grade of C–. Students placed on departmental probation have one term to achieve the goals they agreed upon with their academic advisors. While students are on probation, they receive guidance to help them achieve satisfactory progress toward the degree.

Courses required for a dance major or minor must be taken for letter grades when that option is available. A grade of P must be earned in courses designated pass/no pass (P/N) only.

Advising

Students admitted as majors must meet with a dance faculty advisor prior to registration each term. These meetings inform students about prerequisites and progress toward the degree. Appointment schedules for advising are posted by each advisor. Students must have a signed advising contract in their departmental academic file before they may register each term.

University requirements for the BA and BS degrees are explained in the **Bachelor's Degree Requirements** section of this catalog.

Students transferring to the UO as dance majors after two years of college work elsewhere should have completed courses for the UO BS mathematics requirement, two terms of college-level English composition, as many of the university's general-education requirements as possible, and training in modern dance.

Honors College Program

See the **Robert Donald Clark Honors College** section of this catalog for specific honors college requirements. Departmental requirements for dance majors enrolled in the Clark Honors College include the following:

- 6 credits of independent study in choreography, technical production, or related research leading to the senior honors thesis
- Either a choreography (minimum of ten minutes) with written description and discussion or an honors essay on an approved research topic

Dance Minor

The dance minor is available to undergraduate students who want to combine an interest in dance with a major in another area of study. The minor allows students flexibility in constructing a program of courses to enhance and complement any chosen major.

Dance courses applied to the minor must be passed with grades of C– or better. Most upper-division courses have prerequisites, corequisites, or both.

Dance Minor Requirements

Dance courses applied to the minor must be passed with a grade of C– or better. Minors are encouraged to take Looking at Dance (DAN 251) as an arts and letters group-satisfying course and Anatomy of Human Movement (DAN 260) as a science group-satisfying course to enrich their understanding of dance, even though these courses do not count toward the minimum 25 credits required for the minor.

- Master's Degree with Thesis
- Master's Degree without Thesis
- Master of Fine Arts

Graduate Studies

The graduate program in dance has been temporarily suspended. No new graduate students are being accepted at this time.

The Department of Dance offers master of arts (MA) and master of science (MS) degrees in three programs—general master's degree with thesis or choreographic thesis, general master's degree without thesis, master's degree with emphasis in dance science—and the master of fine arts (MFA) degree.

The MFA program requires at least three years of study in residence. Full-time students with adequate undergraduate preparation can complete an MS or MA degree program in two years if their area of specialization is designated during the first year. Students who enter with background deficiencies or who lack a specific focus for the thesis or final project typically take more than two years to complete an MS or MA degree. Work for a master's degree must be completed within a period of seven years. This includes credits transferred from another institution and the thesis or final project.

Admission

Department Visit

Applicants for admission are strongly encouraged to visit the dance department during February or March of the preceding academic year. Participation in classes and a brief performance of choreography during the visit help the faculty evaluate applicants and serve to augment the video application. Video applications alone are acceptable in extenuating circumstances. Video applications must be in DVD format or delivered using an online service and must clearly show technical, performance, and choreographic proficiencies. For more information, call or write the department.

Application

Students seeking admission to a master's degree program should apply online through the Graduate School. Application for enrollment is open to anyone who has graduated from an accredited college or university and has a 3.00 cumulative undergraduate GPA. A student with a GPA below 3.00 may be admitted upon review of credentials. An official transcript of the student's college record must be submitted to the Graduate School. In addition, applicants must arrange for electronic submission of three letters of recommendation, a current curriculum vitae or résumé, a statement of purpose explaining their intent to pursue graduate studies in dance at the University of Oregon, and a sample of written work. A statement of purpose and sample of written work are used to evaluate writing ability. All submissions must be electronic.

International students whose native language is not English must earn scores of at least 575 on the Test of English as a Foreign Language (TOEFL) or 7.0 on the International English Language Testing System examination (IELTS).

Adequate undergraduate preparation in dance theory and technique is required for admission to graduate programs in dance. Applicants with undergraduate deficiencies should seek admission as postbaccalaureate students until the necessary courses are completed.

Deficiencies, which must be addressed at the first opportunity after entering the program, may be made up by

- passing proficiency examinations provided by the department
- presenting evidence of acceptable practical professional experience
- demonstrating ability on videotape or in person for faculty review

Graduate Employee Opportunities

Some graduate employee (GE) opportunities are available; applications are available online. Fellowship applicants are strongly urged to visit the department. Applicants who cannot visit must submit a DVD or the Internet address (URL) for a web-based video service documenting teaching skills. Videos should document a complete class; edited highlights of classes are not acceptable. Applications are reviewed beginning January 1 for the following fall term. GE offers are made by April 15. Positions remain open until filled. Graduate employees must satisfactorily complete at least 9 graduate credits each term.

Master of Fine Arts Requirements

The master of fine arts is a rigorous terminal degree. Prescribed components provide a foundation upon which each student builds an individualized degree. Flexible emphases, supported by faculty expertise, permit elective areas of study in performance, choreography, collaboration, education, history, contemporary issues, and dance science. The program emphasizes modern dance with ballet as a strong supporting area.

Goals

The MFA in dance is designed to develop

- individual creative and scholarly talents, interests, and philosophies that can be used to expand and preserve our cultural heritage
- individuals with the potential to solve contemporary problems in dance and to explore and address new questions and issues
- professional competence in the dissemination of knowledge, including the logical, verbal, and written presentation of aesthetic ideas
- scholarly competence in the organization, evaluation, and interpretation of knowledge
- professional competence as reflected in a significant body of artistic work

¹ Every term during the first year.

² Every term.

³ Complete by the end of second year winter term. These courses, approved by the major advisor, are selected from fields related to the student's research. At least 4 credits must be earned outside the department before beginning the thesis.

⁴ Electives include, but are not limited to, courses in production, technique, performance, choreography, dance sciences, dance studies, pedagogy, and collaboration.

⁵ At least 8 credit must be in course work other than dance. 4 credits must be completed by the end of the second year. These may be either graduate or undergraduate credits.

Candidates must spend at least three years in residence to complete the degree.

Upon consultation with the graduate director, students may use graduate-level work for the master's degree to correct deficiencies.

Satisfactory Progress toward a Master's Degree in Dance

1. Qualified students are admitted to the dance master's degree program with conditional master's classification. The classification is changed to unconditional master's after a student has
 - a. corrected undergraduate deficiencies
 - b. completed 12 graduate dance credits with minimum grades of B- or P

- c. achieved a technical skill equivalent to that achieved in Modern Dance Laboratory (DAN 594). Studio classes taken to prepare for 500-level DAN courses must be passed with minimum letter grades of B–
Students must achieve unconditional master’s classification before they have completed 36 credits of graduate work
- 2. Students must meet with a graduate advisor each term to draw up course advising contracts, which ensure that courses taken fulfill university and department requirements
- 3. DAN graduate courses must be passed with minimum grades of P or B– or better. Courses must be retaken at the next scheduled offering if satisfactory grades are not received. The student may be dropped from the program if a minimum grade of P or B– is not earned on the second try
- 4. Technique and core courses (except Workshop: [Topic] (DAN 508) and Workshop: [Topic] (DAN 608)) must be taken for letter grades. A minimum of 24 graduate credits must be taken for letter grades; the remaining credits may be taken pass/no pass (P/N). P is the equivalent of a B– letter grade or better
- 5. Courses in dance should be completed the first term they are offered during graduate study. Requests for exceptions are considered by the graduate director and the student’s advisor
- 6. Students must have a GPA of 3.00 or better in course work used to meet the requirements of a master’s degree
- 7. With the exception of Thesis (DAN 503), no more than one incomplete (I) may be earned each term and no more than two each year. Students have one calendar year or less to finish an incomplete, depending on the nature of the course and the instructor’s requirements

MA and MS Requirements

A minimum of 54 graduate credits must be completed for an MA or MS degree in dance; at least 30 of these credits must be earned in residence after admission to the graduate program. Candidates for the MA degree must demonstrate proficiency in one second language by submitting evidence of two years of college-level study within the previous seven years or by passing an examination at the university Testing Office, 238 University Health and Counseling Center Building.

Students must enroll in a technique course every term during their studies in residence and earn a minimum of 6 credits in 500-level DAN courses. These 6 credits must be taken for letter grades.

Students must take a minimum of 2 credits in Supervised College Teaching (DAN 602). The department recommends that these credits be earned in at least two teaching experiences, which provide opportunities to develop mentor relationships with faculty members.

A final oral thesis defense or terminal project presentation is administered by the student’s faculty committee following completion of the thesis or project.

- ¹ The department recommends that these credits be earned in at least two teaching experiences, which provide opportunities to develop mentor relationships with faculty members.
- ² Early in their programs, students should enroll in graduate-level choreography courses.
- ³ Complete by the end of winter term of the second year. These undergraduate- or graduate-level courses, approved by the major advisor, are selected from fields related to the student’s research. At least 4 credits must be earned outside the department before beginning the thesis. The prospectus for the thesis must be approved by fall term of the second year.

The thesis proposal must be approved by a committee of at least three faculty members representing fields of study related to the student’s research. The chair of the committee must be from the Department of Dance. Graduate School requirements are to be followed in the preparation and defense of the thesis. Refer to "Thesis Guidelines," available in the department office, and the *Thesis and Dissertation Style and Policy Manual*, available from the Graduate School’s website.

Certificate in Teaching Dance

The certificate in teaching dance is designed to fill a need for training dance teachers for the private dance studio industry. The focus is on evidence-based practice from venerable and contemporary theories of dance pedagogy. Intense technical training in contemporary dance forms the core of the program. These core studio-theory courses are augmented with advanced study in dance injury prevention, improvisation-composition, production, and methods of teaching. The culminating requirement of the certificate is a one-year internship as a student-teacher in a private dance studio partnering with the UO Department of Dance for this program.

The certificate is a residency program. The following courses must be taken in residence at the UO. Required course work totals 41 credits minimum and includes 34 upper-division credits, 17 of which are at the 400 level.

---------------	--	----

Dance courses applied to the certificate must be passed with a grade of C– or better. Students working toward their certificates are encouraged to take Looking at Dance (DAN 251) as an arts and letters group-satisfying course and to follow up with Evolution of Modern Dance (DAN 454). They are further encouraged to take Dance Kinesiology (DAN 360) and Music for Dancers (DAN 458), even though these courses do not count toward the minimum 42 credits required.

Introductory Dance Courses

DANC 170. Contemporary I. 1 Credit.

DANC 170 Contemporary I is the study of basic principles of dance movement with an emphasis on the elements of space, time and energy. Repeatable twice for maximum of 3 credits.

DANC 171. Contact Improvisation. 1 Credit.

Repeatable twice for maximum of 3 credits.

DANC 172. Ballet I. 1 Credit.

Repeatable twice for maximum of 3 credits.

DANC 175. Jazz I. 1 Credit.

Repeatable twice for maximum of 3 credits.

DANC 184. Ballroom I. 1 Credit.

Repeatable twice for maximum of 3 credits.

DANC 185. African Dance. 1 Credit.

Repeatable twice for maximum of 3 credits.

DANC 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Tango, Hip-Hop, Salsa, Drumming, and Swing.

DANC 270. Contemporary II. 1 Credit.

DANC 270 Contemporary II is intermediate dance training designed to build upon previously developed technical skills and artistic expression, with a focus on contemporary aesthetics. Repeatable twice for maximum of 3 credits.

Prereq: Three terms of DANC 170.

DANC 271. Dance Improvisation. 1 Credit.

Repeatable twice for maximum of 3 credits.

DANC 272. Ballet II. 1 Credit.

Repeatable twice for maximum of 3 credits.

DANC 275. Jazz II. 1 Credit.

Repeatable twice for maximum of 3 credits.

DANC 372. Ballet III. 1 Credit.

Repeatable twice for maximum of 3 credits.

DANC 375. Jazz III. 1 Credit.

Repeatable twice for maximum of 3 credits.

DANC 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Tango, Hip-Hop, Salsa, Drumming, and Swing.

Professional Dance Courses**DAN 198. Workshop: [Topic]. 1-2 Credits.**

Repeatable. Recent topics include Performance, Production Experience, Repertory.

DAN 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

DAN 241. Screendance: History and Theory. 4 Credits.

This Arts and Letters group satisfying course explores the historical, theoretical, and cultural contexts of screendance, an interdisciplinary art form at the intersection of dance, film, and new media technologies. It focuses on critical inquiries into screendance while locating that subject in a broader context.

DAN 251. Looking at Dance. 4 Credits.

Overview of dance as a cultural and aesthetic experience. Examines its meaning and impact on contemporary United States society.

DAN 252. Fundamentals of Rhythm. 3 Credits.

Essential topics in rhythm and dance; how rhythm and dance relate in various cultures with an emphasis on concert modern dance choreography; introduction to the communication of personally created movement to other dancers.

DAN 255. Dance Production I. 3 Credits.

Introduction to production planning, management, lighting, design, costuming, and publicity for the dance concert. Practical experience in Dougherty Dance Theatre.

DAN 256. Dance Somatics. 3 Credits.

Exploration of patterning in movement. Various body therapies—Bartenieff Fundamentals, ideokinesis, and body-mind centering—provide a framework for experiential investigations.

DAN 260. Anatomy of Human Movement. 4 Credits.

An introduction to scientific reasoning focusing on methodology and current research in dance anatomy and kinesiology.

DAN 294. Modern Dance Laboratory. 3 Credits.

Rigorous training in modern dance as a performing art form emphasizing use of the body as an instrument, elements of movement, and performance skills. Repeatable for a maximum of 24 credits.
Prereq: placement audition.

DAN 301. African Dance Aesthetics. 4 Credits.

Using the field of dance studies to examine African dance aesthetics in popular culture, daily media landscapes, and expressive cultures in Africa and the diaspora.

DAN 351. Dance Composition I. 3 Credits.

Introduction to creation of dance movement as a communication tool. How to select, develop, vary, and phrase dance movement. Choreography of short dance studies.
Prereq: DAN 252; DANC 271, 370 or above.

DAN 352. Dance Composition II. 3 Credits.

Compositional forms in dance. Crafting of movements into studies.
Prereq: DAN 351.

DAN 355. Dance Production II. 1-2 Credits.

Extended application of skills and procedures used in producing a concert. Practical backstage work; pre- and postconcert sessions. Repeatable eleven times for maximum of 24 credits.
Prereq: DAN 255.

DAN 360. Dance Kinesiology. 4 Credits.

Applications of anatomical, muscular, and motor control information to dance training and injury prevention.

DAN 394. Contemporary III. 3 Credits.

Intensive 5 days-a-week studio course integrating the study of contemporary dance theory and practice. Fall term focuses on music in dance, winter on dance in culture, and spring term focuses on science and somatics in dance. Repeatable seven times for a maximum of 24 credits.
Prereq: 3 terms of DANC 270, placement audition or instructor approval.

DAN 396. Ballet Laboratory. 2 Credits.

Dance technique in the ballet idiom. Repeatable for maximum of 24 credits.
Prereq: placement audition.

DAN 401. Research: [Topic]. 1-4 Credits.

Repeatable.

DAN 403. Thesis. 1-12 Credits.

Repeatable.

DAN 404. Internship: [Topic]. 1-4 Credits.

Apprenticeship under the guidance of a supervising teacher in areas such as teaching, arts management, administration, and dance production. Repeatable twice when topic changes for maximum of 12 credits.
Prereq: Junior standing.

DAN 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

DAN 406. Special Problems: [Topic]. 1-21 Credits.

Repeatable.

DAN 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Choreographic Analysis, Contemporary Issues. Repeatable when topic changes.

DAN 408. Workshop: [Topic]. 1-21 Credits.

Repeatable. Topics include rehearsal and performance for department-sponsored events.
Prereq: Audition for performance experiences.

DAN 409. Practicum: [Topic]. 1-21 Credits.

Repeatable. Current topics are Choreography, Production Design, and Management.

DAN 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Current topics include Neuromuscular Bases of Dance, Topics in Technique, Composition III.

DAN 411. Senior Project. 3 Credits.**DAN 412. Student Dance Concert. 1-6 Credits.**

Students apply ideas learned about concert choreography, production, and management. In a cooperative venture, students produce dance works in Dougherty Dance Theatre. Repeatable for maximum of 24 credits.
Prereq: DAN 255, 352.

DAN 452. Dance Composition III. 3 Credits.

Advanced skills in dance composition to engage critical creative processes for the development of substantial choreographies. Repeatable once for a maximum of 6 credits. Sequence with DAN 351, DAN 352.
Prereq: DAN 352.

DAN 453. Ballet from the Courts to Balanchine. 3 Credits.

Social and theater dance forms of Western cultures from the Middle Ages through 18th-century ballet into the era of contemporary art. Offered alternate years.
Prereq: DAN 251.

DAN 454. Evolution of Modern Dance. 3 Credits.

Influences of leading dance artists; directions in concert and theater forms in the 20th century; emphasis on dance in the United States. Offered alternate years.
Prereq: DAN 251.

DAN 458. Music for Dancers. 3 Credits.

Surveys musical form, style, and expressive content as it relates to dance. Examines the interrelationship of elements of music and dance in significant works from around the world.
Prereq: DAN 252.

DAN 481. Repertory Dance Company: Rehearsal. 1-12 Credits.

Creating and rehearsing new or existing material in preparation for the spring tour. Repeatable four times.
Prereq: audition or application; coreq: DANC 300 level or above in ballet and modern.

DAN 482. Repertory Dance Company: Touring. 1-12 Credits.

Lecture-demonstrations and formal performances of repertory learned in winter rehearsals. Repeatable four times.
Prereq: DAN 481; coreq: DANC 300 level or above in either ballet or modern.

DAN 491. Teaching Dance. 3 Credits.

Application of teaching theories, course planning methods, teaching resources and techniques. Emphasis on teaching in university situation. Repeatable.
Prereq: DAN 252, 394; DANC 271; coreq: DAN 490.

DAN 494. Contemporary IV. 3 Credits.

Deep investigation and professional training in contemporary dance as a performing art form emphasizing mastery of space, time and energy in movement with a focus on performance skills. Dance Studies and scholarship are also included. Repeatable for a maximum of 24 credits.
Prereq: DAN 394, placement audition or instructor approval.

DAN 496. Ballet Laboratory. 2 Credits.

Dance technique in the ballet idiom. Repeatable for a maximum of 24 credits.
Prereq: placement audition.

DAN 503. Thesis. 1-16 Credits.

Repeatable.

DAN 507. Seminar: [Topic]. 1-5 Credits.

Recent topics include Choreographic Analysis, Contemporary Issues. Repeatable when topic changes.

DAN 508. Workshop: [Topic]. 1-21 Credits.

Repeatable. Topics include rehearsal and performance for department-sponsored events.
Prereq: Audition for performance experiences.

DAN 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Current topics include Neuromuscular Bases of Dance, Topics in Technique, Composition III.

DAN 512. Student Dance Concert. 1-6 Credits.

Students apply ideas learned about concert choreography, production, and management. In a cooperative venture, students produce dance works in Dougherty Dance Theatre. Repeatable for maximum of 24 credits.
Prereq: DAN 255, 352 or equivalent.

DAN 552. Dance Composition III. 3 Credits.

Advanced skills in dance composition to engage critical creative processes for the development of substantial choreographies. Repeatable once for a maximum of 6 credits. Sequence with DAN 351, DAN 352.

DAN 558. Music for Dancers. 3 Credits.

Surveys musical form, style, and expressive content as it relates to dance. Examines the interrelationship of elements of music and dance in significant works from around the world.

DAN 581. Repertory Dance Company: Rehearsal. 1-12 Credits.

Creating and rehearsing new or existing material in preparation for the spring tour. Repeatable four times.
Prereq: audition or application; coreq: DANC 300 level or above in ballet and modern.

DAN 582. Repertory Dance Company: Touring. 1-12 Credits.

Lecture-demonstrations and formal performances of repertory learned in winter rehearsals. Repeatable four times.
Prereq: DAN 4/581; coreq: DANC 300 level or above in either ballet or modern.

DAN 591. Teaching Dance. 3 Credits.

Application of teaching theories, course planning methods, teaching resources and techniques. Emphasis on teaching in university situation.
Prereq: DAN 252, 394; DANC 271; coreq: DAN 590.

DAN 594. Contemporary IV. 3 Credits.

Deep investigation and professional training in contemporary dance as a performing art form emphasizing mastery of space, time and energy in movement with a focus on performance skills. Dance Studies and scholarship are also included. Repeatable for a maximum of 24 credits.
Prereq: DAN 394, placement audition or instructor approval.

DAN 596. Ballet Laboratory. 2 Credits.

Dance technique in the ballet idiom. Repeatable for a maximum of 24 credits.
Prereq: placement audition.

DAN 601. Research: [Topic]. 1-16 Credits.

Repeatable.

DAN 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

DAN 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

DAN 606. Special Problems: [Topic]. 1-16 Credits.

Repeatable. Topics include Formal Compositional Structure, Solo Composition, and student-initiated topics. Limited by faculty workload and availability.

DAN 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

DAN 608. Workshop: [Topic]. 1-16 Credits.

Repeatable. Topics include Performance, Production, Rehearsal.

DAN 609. Practicum: [Topic]. 1-16 Credits.

Repeatable.

DAN 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

DAN 611. Research Methods in Dance. 3 Credits.

Review and evaluation of written and creative research in dance and allied fields. Culminating project is a written proposal for original research in dance.

DAN 613. MFA Professional Paper. 1-16 Credits.

Repeatable.

DAN 690. Music in the Dance Studio. 1 Credit.

Explores issues in using music—live and recorded—in the dance technique studio. Open to graduate dance students only.

Prereq: DAN 591.

DAN 692. Dance Literature. 3 Credits.

Introduction to graduate studies in dance through critical reading of literature of theory and practice.

Prereq: admission to graduate program in dance.

Music

Sabrina Madison-Cannon, Dean

541-346-3761

541-346-0723 fax

121 MarAbel B. Frohnmayr Music Building

1225 University of Oregon

Eugene, Oregon 97403-1225

Facilities

The School of Music and Dance's five-unit building complex includes the 540-seat Beall Concert Hall, acclaimed for its superb acoustics; separate band, choir, and orchestra rehearsal rooms with support facilities; practice rooms; a small recital hall; studio offices, classrooms, and seminar rooms.

In 2008, two new wings were added to the MarAbel B. Frohnmayr Music Building, containing state-of-the-art, acoustically isolated teaching studios, classrooms, and practice rooms. The Leona DeArmond Academic Wing provides studios for the Suzuki Strings Program, a music education teaching laboratory, twenty-eight teaching studios, classrooms, and practice rooms. The Thelma Schnitzer Performance Wing contains a symphony-size rehearsal hall, dedicated rehearsal spaces for jazz and percussion studies, a recording studio, and additional practice rooms. Significant renovations were also made to the existing facilities.

Collier House—the second-oldest building on the UO campus—is listed as one of the school's facilities. Built in 1885–86 by the Collier family, it is a rare example of a late Victorian house in bracketed style, with an Italianate-style interior popular in the Northwest in the late 1800s. Both the house and grounds are listed on the Inventory of Historic Sites and Structures. It has been a residence for a university president and a chancellor, a faculty club, a restaurant, and a meeting house—pub. In August 2004, music history faculty offices and the Early Music Program were moved to Collier House. A variety of courses, seminars, meetings, recitals, and programs are held there.

Music Services, located on the third floor of Knight Library, contains more than 41,000 recordings and 1,000 serials, including composers' complete works, music reference resources, current and bound periodicals, interactive music CD-ROM programs, and a collection of more than

27,000 books and 51,000 scores. The Audio and Video Room (the Douglass Room) holds recordings (LPs, cassettes, and compact disks). Facilities include listening carrels with remote-control capability, individual listening rooms, and two group-listening rooms. The score and record collections' strengths include music by Oregon composers, women composers, and contemporary publications provided by approval plans for recently published North American and European scores. The book collection includes a large German-language collection as well as standard music resources and most university press publications. Reference service to the collection is provided by Music Services. The complete music and recording collections are included in the UO Libraries online catalog (<http://libweb.uoregon.edu>).

The School of Music and Dance houses two pipe organs, including a nationally recognized organ by Jürgen Ahrend of East Friesland, Germany—a concert instrument unique in America—and a two-manual tracker organ by David Petty and Associates. Two of the five harpsichords available for student use are French doubles by William Dowd. The others are a German double by Keith Hill, an Italian by Owen Daly, and a Zuckerman single harpsichord. Nearly half of the collection of 125 pianos are Steinways, which includes six concert grands. All classrooms and practice rooms are equipped with grand or upright pianos, and piano majors have access to locked grand piano practice rooms. Other keyboard instruments include two clavichords and a modern group piano laboratory featuring Roland digital keyboards.

Future Music Oregon features a suite of outstanding studios for electroacoustic and new media composition that provide powerful, high-quality environments in which students learn and create. Studios are equipped with current software, digital mixers, and game controllers, with sensor-based interfaces for technological and artistic exploration.

The university owns an extensive collection of orchestral and band instruments and a distinctive collection of ethnic instruments and reproductions of early musical instruments.

The Pacific Rim Gamelan performs on the beautiful instruments of Gamelan Suranadi Sari Indra Putra, donated to the school in 1986 by John and Claudia Lynn of Eugene. The ensemble is a multicultural composing and performing orchestra, and works composed by its members use instruments from around the world as well as gamelan instruments.

Kyai Tunjung Mulya ("Noble Lotus Blossom") is a complete central Javanese court gamelan orchestra, consisting of more than eighty iron, brass, bronze, teak, and bamboo instruments. Classes and workshops in Javanese gamelan music are taught periodically by visiting musicians from Indonesia.

The Kammerer Computer Laboratory offers students the opportunity to become familiar with a variety of mainstream software for music notation as well as instructional software in music theory and aural skills. Other resources in the lab include MIDI (musical instrument digital interface), sound-generating and sequencing software programs; access to the Internet; e-mail; Microsoft Office applications; and Adobe graphic editing programs for academic use, exploration, and development of computer skills. The lab is equipped for digital audio editing. Our current software listing is Max/MSP, Microsoft Office, Apple Logic Studio, Finale, and Sibelius.

Concerts and Recitals

More than 250 concerts and recitals are presented on campus throughout the year by visiting artists, members of the School of Music

and Dance faculty (Faculty Artist Series), and more than 40 student ensembles. Other regularly scheduled concerts include performances by internationally famous artists sponsored by the Chamber Music at Beall series and the World Music Series.

Hosted events include the Northwest Percussion Festival, Northwest Horn Society regional symposium, International Tuba Euphonium Association Northwest regional conference, American Liszt Society Festival, Northwest Suzuki Institute summer camp, Community Music Institute recitals, Carl Orff workshops, three high school summer music camps, and lectures from Robert M. Trotter Visiting Professors and the Steve Larson Distinguished Lecture Series.

The annual Vanguard Concert Series features 20th-century music in concerts and workshops. Nationally prominent artists give a public concert and hold workshops in which they read, rehearse, and record music composed for them by members of the Composers Forum.

The biennial Music Today Festival, founded and directed by Robert Kyr, is a series of concerts and cultural events that celebrates 20th- and 21st-century music from around the world. The festival features regional performers and ensembles as well as internationally renowned artists.

Jazz concerts and workshops by prominent artists offer opportunities for university students to perform. The Jazz Studies Program hosts the Oregon Jazz Celebration, an annual weekend festival that includes workshops for middle school, high school, and college jazz ensembles.

Since 1969, the School of Music and Dance has hosted the annual Oregon Bach Festival during a two-week period in late June and early July. The festival, founded by Helmuth Rilling and Royce Saltzman, combines an educational program in choral music for academic credit with the offering of some fifty public concerts and events. While the focus is Bach, major choral and instrumental works by other composers are programmed regularly. Distinguished soloists from around the world are featured with the festival chorus and orchestra. Every other year the School of Music and Dance offers a Composers Symposium in conjunction with the Oregon Bach Festival.

THEME (Theory, History, Ethnomusicology, Music Education)—a group of faculty members and graduate students interested in music research—meets three or four times a term on Friday afternoons to share the results of ongoing or recently completed research, discuss the profession of teaching and research, and hear guest speakers. Some recent guests are Anne Azéma, Michael Broyles, Thomas Christensen, Robert Duke, Allen Forte, Robert Gjerdingen, Douglas Hofstadter, Andrew Homzy, Vijay Iyer, Mark Johnson, Harald Krebs, Barbara Lundquist, Henry Martin, Margarita Mazo, Susan McClary, Ingrid Monson, Bruno Netti, Alejandro Planchart, Harold Powers, Katharine Preston, Jihad Racy, Carl Schachter, Christopher Smith, Joseph Straus, Steven Strunk, Michael Tenzer, Alan Walker, and Keith Waters.

Student Organizations

The professional music fraternity, Mu Phi Epsilon, and the Kappa Kappa Psi band fraternity maintain chapters at the University of Oregon. There is also an active collegiate chapter of the National Association for Music Education.

Ensembles

- University Symphony Orchestra
- Chamber Choir
- Oregon Wind Ensemble

- Oregon Jazz Ensemble
- Oregon Wind Symphony
- University Singers
- Opera Ensemble
- Repertoire Singers
- Campus Band
- Campus Orchestra
- Oregon Marching Band
- Green Garter Band
- Yellow Garter Band
- Oregon Basketball Band
- Oregon Electronic Device Orchestra
- Oregon Percussion Ensemble
- Trombone Choir
- Tuba-Euphonium Ensemble
- Jazz Guitar Ensemble
- Brass Ensemble
- Jazz Laboratory Bands
- Small jazz ensembles
- Latin Jazz Ensemble
- Andean Music Ensemble
- Hip-Hop Ensemble
- University Gospel Ensemble
- University Gospel Choir
- Gospel Singers
- Pacific Rim Balinese Gamelan
- Javanese Gamelan
- many other small chamber ensembles offer membership and performance opportunities to qualified students

The Collegium Musicum, a vocal-instrumental group, provides opportunities for the study of 16th- through 18th-century music, using the school's collection of reproductions of Baroque and 18th-century instruments. The repertory and activities of these ensembles complement school courses in history, criticism, and performance-practice studies.

Financial Assistance

For complete information about financial aid, including loans, see the **Student Financial Aid and Scholarships** section of this catalog.

Scholarships

The University of Oregon School of Music and Dance gratefully acknowledges the generous contributions of individuals, foundations, businesses, and organizations that have established named endowed and annual scholarships for the benefit of music and dance students. More than \$500,000 is awarded annually in music scholarships. Although a large portion of these are allocated for undergraduate (<http://music.uoregon.edu/apply/undergraduate-music/financial-aid>) study, limited scholarship funding is also available for graduate students (<http://music.uoregon.edu/apply/graduate-music/financial-aid>). Information on music scholarships is available from the music admissions office of the School of Music and Dance, on the school's website, or by telephone, 541-346-1164 or -5664.

Admitted undergraduate and graduate music majors are eligible for scholarships, which may be granted for up to four years. Most music awards are given on the basis of musical achievement and academic

accomplishment. Some are given on the basis of financial need. To determine scholarship recipients, the music and dance faculty relies on the applicant's academic record, application file, and an audition. Applicants are strongly encouraged to audition in person; however, recorded auditions are also considered.

Graduate Employees

A limited number of graduate employee (GE) positions are available to admitted graduate music and dance majors. In addition to the fellowship stipend, tuition and health insurance coverage is paid by the university. For more information, applicants should contact the assistant dean of admissions and financial aid (<http://music.uoregon.edu/apply/graduate-music/financial-aid>) at 541-346-6191 or the Department of Dance at 541-346-3386.

Fees

Other Fees (per term)	Dollars
Private performance studies (studio instruction), per credit, per term	100
Maintenance fee per term for harpsichord, organ, classical percussion	45
Ensemble fee	45
Rental of university instruments is based on use and value-maximum fee	20–60
Short-term instrument rental (per week)	10
Summer instrument rental	60
Percussion studies instrument fee	45
MIDI music lab course fee	100
Audio recording lab course fee	100
Use of electronic studio course fee	100
Use of organs and harpsichords	45
Music education course fee	35
Keyboard skills course fee	10
Oregon Marching Band uniforms and equipment fee	45–60
Accompanist fee	set by accompanist

Performance Studies

Courses in performance studies are listed with the MUP subject code. Fees are required. These courses customarily include weekly lessons and studio master classes. MUP courses fall into two general categories:

- Basic and Intermediate Performance Studies: MUP 100–163.
- Performance Studies: MUP 171–191, 271–291, 341–361, 371–391, 471–491, 611–631, 641–661, 670–691, 741–761, 771–791.

Enrollment in any performance studies sequence must be preceded by an audition. Auditions are conducted to establish details (e.g., level, credits) for registration.

Students must register for at least 2 credits of performance study. The number of lessons per term is determined in consultation with the instructor. Typically, the number of lessons per term is one less than the number of weeks of instruction in the term.

Enrollment in performance studies is sometimes limited because of faculty teaching loads. Under such circumstances, priority is given to continuing music majors. Students who are not assigned to a faculty member may study with a graduate employee for credit at extra cost.

Juries must precede advancement from one level to the next.

Performance studies courses carry 2 or 4 credits per term. Students giving recitals must be enrolled in performance studies. During the term of the recital, students may not enroll in Reading and Conference: [Topic] (MUS 405) or Reading and Conference: [Topic] (MUS 605) in preparation for their recital. Prerecital hearings are required to evaluate the student's readiness for public performance. After the recital, a faculty evaluation is required. If approval is given, the recital is formally acknowledged as a fulfilled degree requirement.

For details concerning levels, repertory, and any other questions, please contact the individual studio faculty members.

Piano studies students at the Performance Studies: Piano (MUP 171) level or above have an accompanying requirement, described under **Ensemble Requirement** in the Undergraduate section.

General Procedures and Policies

Students are responsible for knowing about degree requirements and university and School of Music and Dance policies and procedures. This information is found in several sections of this catalog, including the **Registration and Academic Policies** (p. 19) and **Graduate School** (p. 945) sections.

Faculty

D. Tyler Abbott, senior instructor (double bass, jazz string bass). BM, 1999, Eastern Washington; MM, 2003, Oregon. (2003)

Barbara Myers Baird, senior instructor (piano, harpsichord, music appreciation). BMus, 1971, Texas Christian; MMus, 1976, Southern Methodist; DMA, 1988, Oregon. (1986)

Molly Barth, associate professor (flute). BM, 1997, Oberlin College; Artist Diploma, 2000, Cincinnati; MM, 2003, Northwestern. (2008)

Jon Paul Bellona, instructor (music technology). BA, 2003, Hamilton College; MM, 2011, Oregon; PhD, 2018, Virginia. (2017)

Jack Boss, professor (theory, composition). BMus, 1979, MMus, 1981, Ohio State; PhD, 1991, Yale. (1995)

Andiel Brown, instructor (gospel choirs). BMus, 2008, Oregon. (2008)

Melissa Brunkan, assistant professor (choral music education). BM, 1995, Minnesota; MMus, 1999, Northwestern; PhD, 2012, Kansas. (2017)

Mandy Burton, instructor (music education). BMus, 2004, MMus, 2006, Oregon. (2014)

David R. Case, senior instructor (classical guitar). BA, 1979, MA, 1984, Oregon. (1975)

Kwan Leong "Pius" Cheung, associate professor (percussion). BMus, 2004, Curtis Institute; Artist Diploma, 2006, Boston Conservatory; DMA, 2010, Michigan, Ann Arbor. (2011)

Jacqueline Cordova-Arrington, instructor (flute). BM, 2008, Michigan; MM, 2010, Cincinnati; DMA, 2015, Eastman School of Music. (2018)

David Crumb, professor (composition, theory). BM, 1985, Eastman School of Music; MA, 1991, PhD, 1992, Pennsylvania. (1997)

Michael P. Denny, senior instructor (guitar, jazz studies). BA, 1992, City College of New York; MA, 1995, Oregon. (1995)

Alexandre Dossin, professor (piano, piano literature). MFA, 1996, Moscow Tchaikovsky Conservatory; DMA, 2001, Texas, Austin. (2006)

Karen Esquivel, senior instructor (opera, voice). BS, 1978, Nebraska, Lincoln; MM, 1990, 2006, DMA, 2009, Florida State. (2011)

C. Brad Foley, professor (saxophone). BA, 1975, Ball State; MM, 1977, DMA, 1983, Michigan. (2002)

Fritz Gearhart, professor (violin). BM, 1986, MM 1988, Eastman School of Music. (1998)

Arnaud Ghillebaert, instructor (viola). DEM, 2006, National Regional Conservatory, Saint-Maur-des-Fossés; MPerf, 2008, Royal College of Music; DMA, 2016, State University of New York, Stony Brook. (2017)

Eliot Grasso, instructor (musicology). BA, 2005, Goucher College; MA, 2007, Limerick; PhD, 2011, Oregon. (2011)

Margret Gries, instructor (musicology, collegium musicum). BA, 1969, Pacific Lutheran; MMus, 1985, Central Washington; PhD, 2012, Oregon. (2012)

Michael Grose, professor (tuba, music appreciation); associate dean, undergraduate studies; summer session coordinator. BM, 1984, MM, 1985, Northwestern. (2001)

Akiko Hatakeyama, assistant professor (music technology). Associate's degree, 1994, Otsuma Women's; AA, 2006, Community College of Philadelphia; BA, 2009, Mills College; MA, 2011, Wesleyan; MA, 2013, Brown. (2016)

Henry Henniger, associate professor (trombone). BM, 2002, Indiana, Bloomington; MM, 2004, Manhattan School of Music. (2010)

Gary Hobbs, instructor (jazz drum set). (1998)

Habib Iddrisu, assistant professor (African dance and music, ethnomusicology). BA, 2002, MA, 2004, Bowling Green State; PhD, 2011, Northwestern. (2013)

David Jacobs, associate professor (conducting, orchestra); director, orchestral studies. BM, 2000, Duquesne; MA, 2002, Central Florida; DMA, 2011, Eastman School of Music. (2012)

John Jantzi, senior instructor (keyboard skills). Certificat d'études supérieures d'orgue avec mention bien, 1984, Conservatoire de Musique de Geneve; AA, 1974, Hesston; BA, 1978, Seattle Pacific; MM, 1995, PhD, 2002, Oregon. (2002)

Winifred Kerner, senior instructor (keyboard skills). BA, 1978, MA, 1980, Wesleyan; MM, 1982, Michigan. (1999)

Wonkak Kim, assistant professor (clarinet). BMus, BA, 2007, North Carolina, Chapel Hill; MMus, 2009, DM, 2012, Florida State. (2017)

Tobias Koenigsberg, associate professor (jazz piano, jazz studies); associate director, jazz studies. BMus, 1998, Oregon; MM, 2003, Eastman School of Music. (2003)

Dean F. Kramer, professor (piano). BMus, 1973, Oberlin Conservatory; MMus, 1976, DMA, 1992, Texas, Austin. (1983)

Lori Kruckenberg, associate professor (musicology). BA, 1985, Bethany (Kansas); MA, 1991, PhD, 1997, Iowa. (2001)

Paul Krueger, instructor (jazz history, jazz studies). BME, 2009, Nebraska, Lincoln; MMus, 2011, Oregon. (2016)

Robert Kyr, Philip H. Knight Professor (composition, theory); director, Pacific Rim Gamelan, Vanguard Concert Series, Music Today Festival. BA, 1974, Yale; postgraduate certificate, 1976, Royal College of Music; MA, 1980, Pennsylvania; PhD, 1989, Harvard. (1990)

Lillian Manis, instructor (string pedagogy); assistant director, Community Music Institute. BA, 2005, Oregon; MM, 2007, Hartt School. (2009)

Terry McQuilkin, instructor (composition). BM, 1977, MM, 1979, Southern California; DMA, 1995, Oregon. (2002)

Brian McWhorter, associate professor (trumpet, music appreciation). BMus, 1998, Oregon; MM, 2000, Juilliard. (2006)

Eric Mentzel, professor (voice, diction, collegium musicum). BM, 1980, Temple; MFA, 1983, Sarah Lawrence. (2002)

Lance Miller, senior sound and video recording engineer (audio recording). AA, 1982, Mt. Hood Community. (1998)

Drew Nobile, assistant professor (theory, musicianship). ScB, 2007, Brown; MA, 2009, Washington (Seattle); PhD, 2014, City University of New York, Graduate Center. (2015)

Gordon Ogo, instructor (music education). BA, 1968, Eastern Washington; MS, 1992, Western Oregon. (2014)

Stephen W. Owen, Philip H. Knight Professor (jazz studies); director, jazz studies. BMusEd, 1980, North Texas State; MMus, 1985, Northern Colorado. (1988)

Timothy Pack, senior instructor (theory, musicianship). BA, 1993, Huntingdon College; MM, 1998, Westminster Choir College, Rider; PhD, 2005, Indiana, Bloomington. (2005)

Sharon J. Paul, Robert M. Trotter Chair of Music; professor (choral conducting); director, choral activities. BA, 1978, Pomona; MFA, 1981, California, Los Angeles; DMA, 1984, Stanford. (2000)

Melissa Peña, associate professor (oboe, music appreciation). BM, 1996, Illinois, Urbana-Champaign; MM, 1998, Missouri, Kansas City. (2012)

Craig Phillips, assistant professor (voice, pedagogy, diction). BMus, 1993, Appalachian State; MMus, 1998, College-Conservatory of Music, Cincinnati; DMA, 2017, North Carolina, Greensboro. (2017)

Steven Pologe, professor (cello, chamber music). BM, 1974, Eastman School of Music; MM, 1978, Juilliard School. (1993)

Robert D. Ponto, associate professor; assistant dean, admissions, financial aid. BME, 1979, Wisconsin, Eau Claire; MM, 1985, Michigan, Ann Arbor. (1992)

David Riley, professor (collaborative piano). BM, 1992, Ithaca College; MM, 1995, Cleveland Institute of Music; DMA, 2000, Eastman School of Music. (2004)

Lindsey Henriksen Rodgers, instructor (musicology). BA, 2003, Walla Walla; MM, 2005, Yale; PhD, 2013, Oregon. (2014)

Stephen Rodgers, professor (music theory, musicianship). MPhil, 2001, PhD, 2005, Yale. (2005)

Idit Shner, professor (saxophone, jazz studies). BA, 1998, Oklahoma City; MM, 2001, Central Oklahoma; DMA, 2007, North Texas. (2005)

Jason Silveira, associate professor (instrumental music education). BM, 2002, MM, 2008, Ithaca College; PhD, 2011, Florida State. (2016)

Marian Elizabeth Smith, professor (musicology). BA, 1976, Carleton; BMus, 1980, Texas, Austin; PhD, 1988, Yale. (1988)

Jeffrey Stolet, professor (music technology, intermedia collaboration); director, Future Music Oregon, CPU Concert Series. BMus, 1977, MMus, 1979, New Mexico; PhD, 1984, Texas, Austin. (1988)

Leslie Straka, professor (viola, chamber music); associate dean, graduate studies; director, Community Music Institute. BM, 1976, MM, 1978, DMA, 1987, Arizona State. (1987)

Andrew Strietelmeier, assistant professor (music education, strings). BME, 2002, Valparaiso; MM, 2004, PhD, 2016, Texas, Austin. (2017)

Ann Tedards, professor (voice, diction, pedagogy). AB, 1970, Sweet Briar; MM, 1972, North Carolina, Chapel Hill; DMA, 1997, Peabody Conservatory of Music, Johns Hopkins. (1987)

Steve Vacchi, professor (bassoon, chamber music). BM, 1990, Eastman School of Music; MM, 1993, Hartt School; DMA, 1997, Louisiana State. (2000)

Lydia Van Dreel, professor (horn). BM, 1991, Wisconsin, Madison; MM, 1993, Juilliard. On leave spring 2016. (2006)

Marc Vanscheeuwijck, professor (musicology, Collegium Musicum). BA, 1982, 1986, MA, 1984, PhD, 1995, Ghent. (1995)

Milagro Vargas, professor (diction, pedagogy, voice). BM, 1977, Oberlin Conservatory; MM, 1981, Eastman School of Music. (1992)

Sarah Viens, instructor (trumpet). BM, 2004, Cleveland Institute of Music; MM, 2007, Temple. (2014)

Claire L. Wachter, professor (piano pedagogy, piano). BM, 1975, Peabody Conservatory; MM, 1977, DMA, 1993, Texas, Austin. (1991)

W. Sean Wagoner, senior instructor (percussion, music appreciation, scoring). BMus, 1994, MMus, 1997, DMA, 2001, Oregon. (2001)

Lawrence Wayte, senior instructor (musicology). BA, 1985, Wesleyan; JD, 1988, Stanford; MA, 1999, San Francisco State; PhD, 2007, California, Los Angeles. (2008)

Beth A. Wheeler, instructor (music education). BS, 2000, Northwest Missouri State; ME, 2012, Graceland; PhD, 2016, Kansas. (2016)

Eric Wiltshire, associate professor (instrumental music education); assistant director, bands. BA, 1991, San Jose State; MA, 1994, Washington State; PhD, 2006, Washington (Seattle). (2006)

Carl Woideck, senior instructor (jazz history, rock music history, blues history). BMus, 1981, MS, 1989, Oregon. (1996)

Juan Eduardo "Ed" Wolf, associate professor (ethnomusicology); coordinator, UO World Music Series. BA, BS, 1993, Notre Dame; MS, 1995, Northwestern; MA, 2007, PhD, 2013, Indiana, Bloomington. (2013)

Emeriti

Wayne Bennett, professor emeritus. BME, 1968, Oklahoma State; MM, 1969, PhD, 1974, North Texas. (1978)

Leslie T. Breidenthal, professor emeritus. BS, 1948, MA, 1949, Columbia; AMusDoc, 1965, Michigan. (1967)

Richard G. Clark, associate professor emeritus. BS, 1964, MA, 1971, Oregon; DMA, 1977, Washington (Seattle). (1982)

David P. Doerksen, associate professor emeritus. BME, 1956, Willamette; MM, 1969, Southern California; DMA, 1972, Oregon. (1983)

J. Robert Hladky, professor emeritus. BMus, 1950, Oklahoma State; MMus, performer's certificate, 1952, AMusDoc, 1959, Eastman School of Music. (1961)

Gary M. Martin, professor emeritus. BA, 1961, MA, 1963, Adams State; PhD, 1965, Oregon. (1966)

James A. Miller, professor emeritus. BA, 1952, Goshen; MMus, 1956, AMusDoc, 1963, Michigan. (1965)

J. Robert Moore, professor emeritus. BMusEd, 1961, MMus, 1962, Tulsa; DMA, 1980, Eastman School of Music. (1975)

Randall S. Moore, professor emeritus. BA, 1963, MA, 1965, Oregon; PhD, 1974, Florida State. (1974)

Harold Owen, professor emeritus. BMus, 1955, MMus, 1957, DMA, 1972, Southern California. (1966)

George W. Recker, associate professor emeritus. Former principal trumpet, Kennedy Center Opera House Orchestra, Florida State University, George Peabody College, 1964–69. (1983)

H. Royce Saltzman, professor emeritus. BA, 1950, Goshen; MMus, 1954, Northwestern; DMA, 1964, Southern California. (1964)

Victor Steinhardt, professor emeritus. BMus, 1964, Mount St. Mary's; MA, 1967, California, Los Angeles. (1968)

Stephen Stone, associate professor and assistant dean emeritus. BS, 1949, MS, 1956, DMA, 1971, Oregon. (1976)

Richard Trombley, associate professor emeritus. BS, 1961, Juilliard School; MMus, 1962, Manhattan School; DMA, 1977, Stanford. (1963)

Mary Lou Van Rysselberghe, senior instructor emerita. BMus, 1956, MMus, 1976, Oregon. (1977)

Jeffrey Williams, professor emeritus. BMus, 1965, North Texas; MS, 1966, Illinois; DMA, 1974, North Texas. (1980)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Ann B. Shaffer, library

Undergraduate Studies

Nonmajors

The School of Music and Dance offers nonmajors a variety of music courses and performance ensembles. For details, see course listings. The following courses, which are open to students who have not had musical instruction, satisfy some of the university's general-education requirements. See **Group Requirements** and **Multicultural Requirement** in the **Bachelor's Degree Requirements** section of this catalog.

Code	Title	Credits
MUJ 350	History of Jazz, 1900–1950	4
MUJ 351	History of Jazz, 1940 to Present	4
MUS 125	Understanding Music	4

Music Minor Programs

The School of Music and Dance offers minors in music, music technology, and audio production. Students wishing to pursue a music minor may submit an application (<http://music.uoregon.edu/undergraduate-music-minor-application>) to the School of Music and Dance at any time during their undergraduate studies. No audition is required.

Minor in Music

The minor in music requires a minimum of 26 credits, 15 of which must be upper division. A minimum of 15 credits must be taken in residence. Courses must be taken for a grade if the graded option is offered. Courses applied to the minor must be graded C– or better or P (pass), and no more than 6 credits may overlap with course work applied to any other music degree program. No specific courses or categories are required. Credits for the minor may be earned by taking any of the following preapproved courses. For additional information, please visit the website (<http://music.uoregon.edu/current-students/undergraduate-music-students>) or contact the music undergraduate office (ugradmus@uoregon.edu).

¹ A maximum of 12 credits may be applied to the minor, chosen from any combination of courses listed for Performance and Ensemble.

² It is recommended that Theory and Aural Skills courses be taken concurrently.

Other music courses may be approved by petition to the undergraduate committee.

Minor in Music Technology

The minor in music technology requires a minimum of 24 credits, 12 of which must be upper-division. A minimum of 14 credits must be taken in residence. Courses must be taken for a grade if the graded option is offered. Courses applied to the minor must be graded C– or better or P (pass).

Music Major Programs

- Bachelor of Arts in Music (Music History and Literature Concentration)
- Bachelor of Arts in Music (Music Theory Concentration)
- Bachelor of Science in Music (Music Technology Concentration)

- **Bachelor of Music in Music: Jazz Studies**
- **Bachelor of Music in Music Composition**
- **Bachelor of Music in Music Education** (p.)
- **Bachelor of Music in Music Performance** (p. 889)
- **Bachelor of Arts in Music (General Music Concentration)**
- **Bachelor of Arts in Music (Popular Music Studies Concentration)**
- **Bachelor of Science in Music (General Music Concentration)** (p. 886)
- **Bachelor of Science in Music (Popular Music Studies Concentration)**

A detailed checklist of requirements for each undergraduate degree is available online.

Students who want a conservatory-style education in music should work toward the bachelor of music (BMus) degree or a music major with the music history and literature concentration, music theory concentration or music technology concentration. The bachelor of arts (BA) and bachelor of science (BS) degrees with the general music concentration or popular music studies concentration are primarily for students who want a broad liberal arts education while majoring in music.

Admission

Students who are eligible for admission to the university may apply to the School of Music and Dance as music majors. For information about admission to the University of Oregon, refer to the Admissions (p. 12) section of this catalog.

Application Procedure

1. Complete the University of Oregon application for admission
2. Review the school's undergraduate music major admission requirements (<http://music.uoregon.edu/apply/undergraduate-music>)
3. Complete the school's online application (<http://music.uoregon.edu/apply/undergraduate-music>)

Early action—submit UO and School of Music and Dance applications	November 1
Early action—undergraduate auditions; recorded auditions and music technology portfolios	Mid-November
School of Music and Dance standard application deadline	January 15
Undergraduate audition days; recorded auditions and music technology portfolios due	Late January through February
School of Music and Dance mails admission and scholarship offers	April 1

For audition dates and submission deadlines for recordings and portfolios, visit the undergraduate music admissions website.

Auditions

In many degree programs, the audition is the most important factor in determining admission to the School of Music and Dance. As part of the admission process, applicants to most music degree programs must either audition (in person or via recording) or submit a portfolio (the option for applicants to the music technology program). Students who submit recorded auditions may be required to audition in person upon arrival on campus. Auditions for admission are held in November, January, and

February. Each student who auditions for admission is automatically considered for a music scholarship. For more detailed information about repertory and procedure, visit the School of Music and Dance admissions website (<http://music.uoregon.edu/apply/undergraduate-music>). (<http://music.uoregon.edu/apply>)

An audition is not required for admission to the BA or BS general music or popular music studies concentrations.

Jazz Studies

Students who want to enter the jazz studies major have a jazz audition. In addition, a placement examination specific to jazz studies is required of transfer students wishing to enter the program.

Music Technology

Students who want to enter the music technology program must submit a portfolio. A classical audition is not required for admittance to the bachelor or science music technology degree program. However, students admitted only on the basis of a portfolio are only considered for the music technology program and are not eligible to pursue other degree programs within the school.

English Language Proficiency

Scores for the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required for students whose first language is not English. For admittance as an undergraduate music major, English language proficiency requirements must be met by one of the following: a minimum total TOEFL score of 575 on the paper-based test or a minimum total score of 88 on the Internet-based test; a minimum total score of 7.0 on the International English Language Testing System (IELTS); or completion of all required Academic English for International Students (AEIS) course work.

Placement Examinations

Incoming music majors take an online musicianship diagnostic, which is designed to assess basic skills in theory and ear training. In addition, all transfer students are required to take a music core placement examination, which determines level placement in music theory, aural skills, and keyboard skills courses. Incoming freshman students may choose to take the music core placement exam (for the purpose of testing out of part of the music core). Study guides for the placement are available from the music undergraduate office.

Admission to a Specific Degree Program

Students are placed in their primary program of choice, as indicated on their School of Music and Dance application, upon Initial admission to the school. Requirements for continued enrollment in music majors vary significantly, as outlined in the chart below. Additional information is available from the undergraduate office.

Program Overlap Limitations

Due to significant curricular overlap, concurrent pursuit of the following music programs is not allowed:

- Music minor with any other major or minor program in music
- Music technology major with music technology minor
- Music technology major with audio production minor
- Music major with general music or popular music studies concentrations with any bachelor of music (BMus) or bachelor of music in music education (BMME) degree

In addition, it is not possible to pursue a bachelor of arts or bachelor of science in music with multiple concentrations.

Music Degree Program Continued Enrollment Requirements

Degree Program	Continued Enrollment Requirements
Bachelor of Arts in Music (General Music Concentration)	Passing grade of C– or better in MUS 131, MUS 132; and passing grade of C– or better in one course in the history and culture category.
Bachelor of Arts in Music (Music History and Literature Concentration)	Submit research paper and unofficial transcript to the musicology faculty; complete an interview with a member of that faculty. WR 121 must be completed and MUS 358 must be taken in residence and passed with a grade of B– or better.
Bachelor of Arts in Music (Music Theory Concentration)	Submit research paper and unofficial transcript to the theory faculty; complete an interview with a member of that faculty. The second-year music theory core (theory, aural skills, keyboard skills) must be taken in residence and passed with grades of B– or better.
Bachelor of Arts in Music (Popular Music Studies Concentration)	Passing grade of C- or better in one of the following: MUS 131, MUS 141, MUS 151, MUJ 180; and passing grade of C– or better in any one course in the history and culture category.
Bachelor of Science in Music (Music Technology Concentration)	Three audio recordings of recent compositions (audio or visual formats)—candidates who have completed MUS 447, MUS 448 may submit two compositions; one- to two-page description of experience with electronic and computer musical instruments, audio recording, or related software, and reasons for enrolling in this option; list of software and hardware in which the student has experience and the level of expertise with each.
Bachelor of Music in Music Composition	Successful completion of Composition I series (MUS 240, MUS 241, MUS 242) with grades of mid-B or better.

Bachelor of Music in Music Education

In addition to two-year musicianship and history and culture core, successful completion of Foundations of Music Education (MUE 326) with grade of B– or better. Application to degree program, audition, and interview. Students who have not made satisfactory progress may apply one time only.

Bachelor of Music in Music: Performance (Brass)	Successful jury to the MUP 386, MUP 387, MUP 388, MUP 389, or MUP 390 level.
Bachelor of Music in Music: Performance (Guitar)	Successful jury to the MUP 380 level.
Bachelor of Music in Music: Performance (Keyboard)	Successful jury to the MUP 371, MUP 372, or MUP 373 level.
Bachelor of Music in Music: Performance (Percussion)	Successful jury to the MUP 391 level.
Bachelor of Music in Music: Performance (Strings)	Successful jury to the MUP 375, MUP 376, MUP 377, MUP 378, or MUP 379 level.
Bachelor of Music in Music: Performance (Voice)	Successful jury to the MUP 374 level.
Bachelor of Music in Music: Performance (Woodwinds)	Successful jury to the MUP 381, MUP 382, MUP 383, MUP 384, or MUP 385 level.

Program Requirements

Accompanying Requirement for Piano Students

Undergraduates studying piano at the Performance Studies: Piano (MUP 171) level or higher as their primary performance medium must fulfill at least half their ensemble requirement by enrolling in Chamber Ensemble: [Topic] (MUS 394) (Accompanying).

Ensemble Requirements for Music Majors

Music majors require ensemble enrollment concurrent with performance studies. Performance studies and ensemble requirements vary by program. A detailed checklist of requirements for each undergraduate degree is available online (<http://music.uoregon.edu/current-students/undergraduate-music-students/undergraduate-checklists>). Students must audition for ensemble placement before each fall term.

Instrumental Majors

Ensembles that satisfy this requirement are

- University Symphony Orchestra
- Oregon Wind Symphony
- Oregon Symphonic Band

Voice Majors

Ensembles that satisfy this requirement are

- University Singers
- Chamber Choir

- Repertoire Singers
- Women's Choir

Assignments take into account the student's preference, level of ability, major performance medium, educational and musical needs, and the needs of the school's ensembles.

Ensemble Credits for Transfer Students

A limited number of ensemble credits may be transferred:

BA in Music (General Music Concentration)—three of the required six terms may be transferred (see checklist for transfer credit limitations)

BA in Music (Music History and Literature Concentration)—all three of the required terms must be completed in residence

BA in Music (Music Theory Concentration)—all three of the required terms must be completed in residence

BA in Music (Popular Music Studies Concentration)—two of the required four terms may be transferred (see checklist for transfer credit limitations)

BS in Music (General Music Concentration)—three of the required six terms may be transferred (see checklist for transfer credit limitations)

BS in Music (Music Technology Concentration)—all three of the required terms must be completed in residence

BS in Music (Popular Music Studies Concentration)—two of the required four terms may be transferred (see checklist for transfer credit limitations)

BMus in Music Composition—three of the required nine terms may be transferred

BMus in Music: Jazz Studies—three of the required nine terms of small jazz ensemble may be transferred; all three of the required terms of classical ensemble may be transferred

BMus in Music Performance—six of the required twelve terms may be transferred

BMME in Music Education—three of the required nine terms may be transferred

Only one approved ensemble per term may be transferred. For the purposes of transfer, two semesters shall equal three terms of credit and one semester shall equal one term of credit.

Exceptions to Ensemble Requirements

Students who meet one of the following exceptions are not required to audition for ensemble placement:

- Harp, classical guitar, harpsichord, and organ students may enroll in MUS 394 Chamber Ensemble: [Topic] (Chamber Ensemble) instead of the large conducted ensembles
- Jazz studies majors must enroll in three terms of classical ensembles, which may include MUS 394 Chamber Ensemble: [Topic], Band: [Topic] (MUS 395), Orchestra: [Topic] (MUS 396), or Chorus: [Topic] (MUS 397)
- With instructor approval, piano students enrolled in performance studies at the Performance Studies: Piano (MUP 171) level or higher may enroll in MUS 394 Chamber Ensemble: [Topic] (Accompanying

or MUS 421 The Collaborative Pianist, MUS 422 The Collaborative Pianist, MUS 423 The Collaborative Pianist instead of large conducted ensembles

- Composition students may enroll in three terms of gamelan in partial fulfillment of the requirement
- Studio guitar students may enroll in a chamber, studio guitar, or jazz ensemble instead of a large conducted ensemble
- Students pursuing the popular music studies concentration have nontraditional ensemble options and requirements. For details, see checklist

Other exceptions to ensemble requirements may be considered by the ensemble petition committee after the student completes the following:

- auditions for the appropriate ensemble auditioning committee (choral or instrumental)
- submits a petition to the music undergraduate office

General Requirements

In addition to the general university requirements for bachelor's degrees (see the **Registration and Academic Policies** (p. 19) section of this catalog), all undergraduate degrees in music require the following:

Core Courses for Traditional Music Major Degree Programs

Code	Title	Credits
Musicianship ¹		
MUS 131–133	Music Theory I-III	6
MUS 134–136	Aural Skills I-III	6
MUS 137–139	Keyboard Skills I-III	3
MUS 231–233	Music Theory IV-VI	6
MUS 234 & MUS 235	Aural Skills IV and Aural Skills V ²	4
History and Culture		
MUS 267–269	Survey of Music History	12
MUS 358	Music in World Cultures	4
Total Credits		41

¹ For some majors, one to three terms of Analysis: [Topic] (MUS 327) may be required beyond the two-year musicianship core. For details, see checklist (<https://music.uoregon.edu/current-students/undergraduate-music-students>).

² Not required for BMus in music: jazz studies or BS in music (music technology concentration). For details, see checklist (<https://music.uoregon.edu/current-students/undergraduate-music-students>).

Satisfactory Progress toward the Degree

Satisfactory progress toward the degree is monitored every term by the director of undergraduate studies.

Courses must be taken for a grade if the graded option is offered. Majors must earn a C– or better in every course—including courses taken outside the School of Music and Dance—required for their degree program.

Students are allowed two attempts to earn a grade of C– or better in any course required for a music major. A student who receives a grade of D+ or worse or a mark of W (withdrawal) or I (incomplete) for a required course is placed on probation. Probationary status must be removed by

the end of the next term in which the course is offered. Any student who fails to fulfill this probation contract is dropped from the major.

Candidates for the BMus, BMME, BA in music (history and literature concentration), BA in music (theory concentration), or BS in music (music technology concentration) who have been in residence for two years but have not successfully completed the two-year musicianship core are placed on probation as music majors. If these courses have not been completed by the end of the third year, the student is suspended from the major. Reinstatement to the major occurs automatically once the courses have been successfully completed.

Candidates for a BMus in music: music performance or a BMME in music education must advance to the next performance level at least once every five terms.

Undergraduate music majors reenrolling after two or more consecutive terms of nonenrollment in the music major curriculum (excluding summer session) are required to petition for readmission to the music major. Depending on the results of this petition, a student may be required to reapply for music major admission through standard music admission processes or reaudition for level placement in performance studies as a music major. Placement exams in theory, aural skills, and keyboard skills may also be required. In addition, undergraduate majors admitted to a specific degree program prior to being unenrolled for two or more consecutive terms may also be required to reapply for admittance to that specific degree program by their major department or area. Students studying abroad or in an approved exchange program are exempt from the readmission petition requirement.

Typical First-Year Program for Music Major Degree Programs

The bachelor of arts in music (both general music and popular music studies concentrations) and the bachelor of science in music (both general music and popular music studies concentrations) can vary significantly in their options for the first year of study.

First Year

Fall		Credits
MUS 131	Music Theory I	2
MUS 134	Aural Skills I	2
MUS 137	Keyboard Skills I	1
MUS 358	Music in World Cultures	4
MUS 395, 396, or 397	Band: [Topic] (Orchestra: [Topic] or Chorus: [Topic])	2
Performance Studies (studio instruction)		4
Fall Credits		15
Winter		
MUS 132	Music Theory II	2
MUS 135	Aural Skills II	2
MUS 138	Keyboard Skills II	1
MUS 395, 396, or 397	Band: [Topic] (Orchestra: [Topic] or Chorus: [Topic])	2
Performance Studies (studio instruction)		4
WR 121	College Composition I	4

Winter Credits		15
Spring		
MUS 133	Music Theory III	2
MUS 136	Aural Skills III	2
MUS 139	Keyboard Skills III	1
MUS 395, 396, or 397	Band: [Topic] (Orchestra: [Topic] or Chorus: [Topic])	2
Performance Studies (studio instruction)		4
WR 122 or 123	College Composition II (or III)	4
Spring Credits		15
Total Credits:		45

Specific Degree Requirements

Minimum requirements for a bachelor's degree in music are 36 credits in the major, including 24 upper-division credits. In addition to general university requirements and the general requirements for all undergraduate music degrees, each undergraduate music degree has the following specific requirements.

Bachelor of Arts

Bachelor of arts degrees require proficiency in a foreign language (see the **Bachelor's Degree Requirements** section of this catalog).

Bachelor of Arts in Music (General Music Concentration)

Code	Title	Credits
Musicianship		
MUS 131	Music Theory I	2
MUS 132	Music Theory II	2
MUS 133	Music Theory III	2
Select a minimum of 10 credits from the following:		10
MUS 126	Music Theory Fundamentals	
MUS 134–136	Aural Skills I-III	
MUS 137–139	Keyboard Skills I-III	
MUS 141	Popular Piano and Musicianship I	
MUS 142	Popular Piano and Musicianship II	
MUS 143	Popular Piano and Musicianship III	
MUS 151	Popular Songwriting	
MUS 231–233	Music Theory IV-VI	
MUS 234–236	Aural Skills IV-VI	
MUS 237–239	Keyboard Skills IV-VI	
MUS 447	Digital Audio and Sound Design

Additional musicianship or history and culture credits ²		4
Performance Studies ³		6-12
Ensembles (six terms)		6-12
Additional credits in music ⁴		12
Total Credits		60-72

¹ Additional survey of music history courses may also count toward the 12 credits required.

² At least 36 total credits in combined musicianship and history and culture categories is required, with a minimum of 16 credits earned in each category.

³ At least three terms on one or more instruments. See also, General Limitations in the Registration and Academic Policies (p. 19) section of this catalog.

⁴ At least 12 credits of MUE, MUJ, MUP, and/or MUS courses, including any upper-division credits necessary to earn 24 total upper-division credits in music.

Bachelor of Arts in Music (Music History and Literature Concentration)

Code	Title	Credits	
Core courses for music major degree programs (listed above)			41
Performance Studies (MUP 171 or above) ¹			6-12
Ensemble (at least three terms)			6
MUS 327	Analysis: [Topic] (two terms)	6	
ARH 204–206	History of Western Art I-III	12	

MUS 405	Reading and Conference: [Topic] (Junior Colloquium, Senior Colloquium)(two terms)	6
MUS 499	Senior Project (two terms) ²	6
Three upper-division music literature courses or seminars		9-12
Total Credits		92-101

¹ At least three terms. See General Limitations in the Registration and Academic Policies (p. 19) section of this catalog.

² Completed under faculty guidance. For details and procedures, consult advisor.

Bachelor of Arts in Music (Music Theory Concentration)

Code	Title	Credits	
Core courses for traditional music major degree programs (listed above)			41
Performance Studies ¹			6-12
Ensemble (at least three terms)			6
MUS 327	Analysis: [Topic] (three terms)	9	
MUS 433–435	Counterpoint	12	
Select three of the following:			9
MUS 430	Schenkerian Analysis		
MUS 431	Schenkerian Analysis		
MUS 416	Post-Tonal Theory I		
MUS 417	Post-Tonal Theory II		
Select two of the following:			6-8
MUS 240–242	Composition I		
MUJ 270	Jazz Theory		
MUS 439	Scoring for Voices and Instruments		
MUS 446	Computer Music Applications: [Topic]		
MUS 447	Digital Audio and Sound Design		
MUS 448	Interactive Media Performance		
Select one of the following:			3-4
MUS 359	Music of the Americas		
MUS 451	Introduction to Ethnomusicology		
MUS 452	Musical Instruments of the World		
MUS 460	Music and Gender		
MUS 462	Popular Musics in the African Diaspora

MUS 448	Interactive Media Performance	
Select one of the following:		2-4
MUS 359	Music of the Americas	
MUS 365	Regional Ethnomusicology: [Topic]	
MUS 367	Survey of African Music	
MUS 451	Introduction to Ethnomusicology	
MUS 452	Musical Instruments of the World	
MUS 490	Balinese Gamelan	
Senior Recital ³		
Total Credits		123-161

- ¹ Proficiency in piano at a level that allows enrollment in Performance Studies: Piano (MUP 241), as determined by the piano faculty, or proficiency in piano at a level that allows enrollment in Performance Studies: Piano (MUP 141) in addition to another instrument or in voice at or above the MUP 171 level. While the proficiency requirement does not carry a minimum number of credits, typically 18–36 credits of performance studies are taken to meet this requirement.
- ² For students whose primary performance medium is piano and are enrolled in Performance Studies: Piano (MUP 171) or above, three terms must be Chamber Ensemble: [Topic] (MUS 394) (Accompanying).
- ³ A public performance of compositions written by the student under the guidance of the composition faculty. Final approval of the student's recital and general qualifications are provided by the composition faculty.
- ⁴ Grades of mid-B or better are required for continued enrollment in the music composition major.

Bachelor of Music in Music Performance

Code	Title	Credits
Core courses for traditional music major degree programs (listed above)		41
Performance Studies ¹		48
Ensemble (at least 12 terms)		24
MUS 327	Analysis: [Topic] (one term)	3
MUS 384	Introduction to Conducting	2
Upper-division MUS electives		5
Junior and senior recitals ^{2,3}		
Total Credits		123

- ¹ Three terms at the MUP 400 level or above with concurrent enrollment in assigned ensemble. Each of the 12 required terms must be taken for 4 credits.
- ² Credit may not be earned toward recitals with Reading and Conference: [Topic] (MUS 405).
- ³ Prerecital auditions must be approved at least four weeks before the proposed recital date. For details, consult studio teacher.

Areas of Specialization

- bassoon
- cello
- clarinet
- classical guitar
- double bass
- euphonium
- flute
- harp
- harpsichord
- horn
- oboe
- organ
- percussion
- piano
- saxophone

- studio guitar
- trombone
- trumpet
- tuba
- viola
- violin
- voice

Students may also specialize in more than one wind instrument. For details, consult studio instructor.

Additional Requirements

Voice Option

Code	Title	Credits
Proficiency in French, German, or Italian equivalent to completion of one year of college study in each of two languages or two years of study in one language (typically 27–30 credits)		
MUS 155–156	Introduction to Lyric Diction	4
MUP 163	Functional Piano (three terms or equivalent)	6
MUS 394	Chamber Ensemble: [Topic] (one term)	1

Piano Option

Code	Title	Credits
Six of the twelve terms of ensemble must be in MUS 394 Chamber Ensemble: Accompanying.		
MUE 471–473	Piano Pedagogy I-III	7
MUE 409	Practicum: [Topic]	1-4

Harpichord and Organ Option

Six of the 12 terms of ensemble must be in MUS 394 Chamber Ensemble: [Topic] (Accompanying).

Strings, Woodwinds, Brass, and Harp Option

In addition to the 12 terms of ensemble, at least three terms of MUS 394 Chamber Ensemble: [Topic] are required.

Percussion Option

In addition to 12 terms of ensemble, 12 terms of MUS 394 Chamber Ensemble: [Topic] (Oregon Percussion Ensemble) are required.

MUE 456	String Methods	3
MUS 486	Instrumental Conducting	3
Total Credits		141-148

- ¹ During the first nine terms, all students enroll in a conducted large ensemble. During the 10th term, students enroll in Small Jazz Ensemble: [Topic] (MUJ 395). Students receiving a School of Music and Dance scholarship enroll in a conducted large ensemble for 11 terms.
- ² Students must pass three terms of Performance Studies on their primary instrument at the MUP 341–391 level. Each course of Performance Studies must be taken for 2 credits.

Other Requirements

- A minimum cumulative grade point average (GPA) of 2.75 and at least two years in residence. Students must achieve a B– or better in all courses with the MUE subject code. Those failing to do so must retake the course before enrolling in student teaching
- Continued enrollment in the music education program, for which students typically apply at the end of their sophomore year, requires a minimum cumulative GPA of 2.75, a grade of B– or better in Foundations of Music Education (MUE 326), a successfully completed audition and application, and faculty approval

Choral Option. Students whose primary performance medium is voice must also pass one term of Functional Piano (MUP 163). Students whose primary performance medium is piano must also pass three terms of Performance Studies: Voice (MUP 174). Students whose primary performance medium is a wind, percussion, or stringed instrument must meet the primary and secondary voice and piano performance requirements listed above.

Elementary Option. Students whose primary performance medium is voice must also pass one term of Functional Piano (MUP 163). Students whose primary performance medium is piano must also pass one term of voice performance studies. Students whose performance medium is a wind, percussion, or stringed instrument must pass one term of voice performance studies.

Instrumental Option (Band and Orchestra). Piano, organ, recorder, harp, guitar, or other nontraditional instruments may not be used to meet the primary studio option requirements.

The current music education checklist is available from the music undergraduate office.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- Music (General Music Concentration)** (p.)
- Music (Music History and Literature Concentration)**
- Music (Music Theory Concentration)**
- Music (Music Technology Concentration)**
- Music (Popular Music Studies Concentration)**
- Music Composition**
- Music Education**

- Music: Jazz Studies
- Music Performance

Graduate Studies

- **Master of Arts in Musicology**
- **Master of Arts in Music Theory**
- **Master of Music in Intermedia Music Technology**
- **Master of Music in Music Composition**
- **Master of Music in Music: Conducting**
- **Master of Music in Music Education**
- **Master of Music in Music: Jazz Studies**
- **Master of Music in Music: Piano Pedagogy**
- **Master of Music in Music Performance**
- **Doctor of Musical Arts in Music Composition**
- **Doctor of Musical Arts in Music Performance**
- **Doctor of Philosophy in Music Composition**
- **Doctor of Philosophy in Music Education**
- **Doctor of Philosophy in Musicology**
- **Doctor of Philosophy in Music Theory**
- **Graduate Certificate in Music Performance**

Admission

Applicants must satisfy general university, Graduate School, and School of Music and Dance requirements governing admission. See the **Graduate School** section of this catalog for information about credits, residence, and transfer of graduate work taken elsewhere.

Submit an online Graduate Admission Application. In addition, send two sets of sealed, official transcripts from all colleges or universities from which a bachelor's and all subsequent degrees were earned; transcripts must show the degrees awarded. Address one set to Office of Admissions, 1217 University of Oregon, Eugene, Oregon 97403-1217. Address the second set to School of Music and Dance, Graduate Admissions, 1225 University of Oregon, Eugene, Oregon 97402-1225.

Additional Requirements for International Students

International applicants must have a credential that is equivalent to a four-year bachelor's degree earned in the United States. These credentials must be received from an institution recognized by the country's educational body that oversees institutional approval, such as the Ministry of Education. Two copies of the following documents should be requested:

- Official transcripts
- Certified English translations of all college or university work
- If the degree and conferral date do not appear on the transcripts, official degree certificates with certified English translations

Send two sets of transcripts, one to the Office of Admissions, 1217 University of Oregon, Eugene, Oregon 97403-1217 USA, the other to the School of Music and Dance, Graduate Admissions, 1225 University of Oregon, Eugene, Oregon 97402-1225 USA.

International applicants must file the International Student Financial Statement online.

A recent TOEFL exam is required of all international graduate applicants whose native language is not English. An acceptable score must be reported directly to the Office of Admissions by December 10 in order for the application to be complete. Master's degree applicants from a non-English-speaking country must provide a TOEFL score of 575 or better

(paper-based test) or 88 or better (Internet-based test) or an International English Language Testing System (IELTS) score of 7.0. Doctoral degree applicants must provide a TOEFL score of 600 or better (paper-based test) or 100 or better (Internet-based test); or an IELTS score of 7.0.

Master's Degree Admission

All submissions must include the University of Oregon online Graduate Application (https://gradweb.uoregon.edu/online_app/application/guidelines1.asp). Following are additional admission requirements for specific programs:

Degree Program	Continued Enrollment Requirements
MA, Musicology	Résumé; statement of purpose; two research or analysis papers in history or ethnomusicology; recent concert or recital programs (optional); three references
MA, Music Theory	Curriculum vitae; statement of purpose; two scholarly writing samples exemplifying scholarship and student's ability to develop a single, coherent line of reasoning and ability to analyze tonal or atonal music or both; Preliminary Written Exam for the Music Theory GE (written test designed to evaluate part-writing and analysis skills); interview with music theory faculty; three references
MMus, Music Composition	Résumé; statement of purpose; scholarly writing sample; evidence of live performance of student works; list of compositions; list of performances of compositions; scores of original works for large and small ensembles that demonstrate marked ability and technical skill in composition; audio or video recordings of compositions; interview with member of composition faculty (optional); three references
MMus, Music: Conducting (Choral, Orchestral, or Wind Ensemble)	Résumé; statement of purpose; scholarly writing sample; recent concert or recital programs conducted; preliminary audition recording; live audition and interview (if invited to campus following review of preliminary recorded audition); three references. For conducting audition details, visit pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf

MMus, Intermedia Music Technology

Résumé; statement of purpose; scholarly writing sample; recent concert or recital programs; intermedia music technology statement; intermedia music technology-related work summary; software-hardware experience; portfolio recordings; three references

MMus, Music: Jazz Studies (Instrumental Performance or Composition-Arranging)

Résumé; statement of purpose; scholarly writing sample; repertoire list (optional); recent concert or recital programs (optional); preliminary audition recording (due by December 10); live audition, if selected from preliminary audition recording; three references. For audition details, visit pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf. For composition and arranging emphasis, submit two representative scores and recordings of arrangements and/or compositions for jazz ensemble. At least one of these pieces should be scored for a large ensemble (10 or more performers). Students admitted on the basis of recorded performances must perform a placement audition upon arrival on campus to begin studies.

MMus, Music Education

Master's music education applicants must have a baccalaureate degree in music education. Résumé detailing teaching experience and educational background; statement of professional and personal goals; scholarly writing sample; copies of concert or recital programs you have conducted (elementary-general applicants may substitute a sample curriculum in lieu of concert-recital programs); recent video recording of K–12 music teaching and ensemble performances; campus visit and interview with members of the music education faculty is recommended; three references

MMus, Music Performance
 Résumé; statement of purpose; research or music analysis paper; repertoire list; recent concert or recital programs; audition (either live or recorded); three references. For current audition requirements and procedures, visit pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf. Saxophone applicants must submit a preliminary audition recording by December 10. Note that any student admitted on the basis of a recorded performance must perform a placement audition upon arrival on campus to begin studies.

MMus, Music: Piano Pedagogy
 Résumé; statement of purpose; scholarly writing sample; repertoire list; recent concert or recital programs; video of student teaching a beginning-level student and an intermediate- or advanced-level student; either a live or a recorded audition; three references. Note that any student admitted on the basis of a recorded performance must perform a placement audition upon arrival on campus to begin studies.

Doctoral Degree (Conditional Admission)

Conditional admission is the normal admission status for persons entering the doctoral program. Conditionally admitted doctoral students become fully admitted after submitting an approved program plan at the end of the year of residency.

All submissions must include the University of Oregon online Graduate Application (https://gradweb.uoregon.edu/online_app/application/guidelines1.asp).

Doctoral students in music must complete one primary area and one supporting area. Details are available from the School of Music and Dance graduate office. Following are additional admission requirements for specific programs:

Degree Program	Continued Enrollment Requirements
PhD and DMA, Music Composition	Résumé; statement of purpose; scholarly writing sample; evidence of live performance of works; list of compositions; list of performances of compositions; scores of original works for large and small ensembles that demonstrate marked ability and technical skill in composition; audio or video recordings of compositions; interview with a member of the composition faculty (optional); three references

PhD, Music Education
 Doctoral music education applicants must have at least one degree in music education. Résumé detailing evidence of at least three years of successful full-time music teaching experience in elementary or secondary public school or both; statement of professional and personal goals; scholarly writing sample; copies of concert or recital programs conducted (elementary-general applicants may substitute a sample curriculum in lieu of concert-recital programs); a recent video recording of K–12 music teaching and ensemble performances; an on-campus interview with members of the music education faculty; three references

PhD, Musicology
 Résumé; statement of purpose; two research or analysis papers in history or ethnomusicology; recent concert or recital programs (optional); if interested in historical performance practice, submit recent audio or video recordings of performances (optional); three references

PhD, Music Theory
 Curriculum vitae; statement of purpose; two scholarly writing samples exemplifying scholarship and ability to develop a single, coherent line of reasoning and ability to analyze tonal or atonal music or both; recent concert or recital programs (optional); Preliminary Written Exam for Music Theory GE (a written test designed to evaluate part-writing and analysis skills); interview with member of music theory faculty; three references

DMA, Music Performance

Résumé; statement of purpose; research or music analysis paper; repertoire list; recent concert or recital programs; audition; three references. For current audition requirements and procedures, visit pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf. Applicants to the DMA, music performance—piano pedagogy option program have two additional application requirements: (1) a list of pedagogical materials and literature used in the applicant's teaching; and (2) a high-quality, 45-minute video recording demonstrating piano instruction of two different works to an advanced-level student. Teaching repertoire may be chosen from works such as the following: Bach two- and three-part inventions; Beethoven, Haydn, or Mozart sonatas, rondos, or a set of variations; a Chopin nocturne or Brahms intermezzo; a Debussy prelude, or a work by Ravel; a modern work written after 1900. Saxophone applicants must submit a preliminary audition recording by December 10. Note that any student admitted on the basis of a recorded performance must perform a placement audition upon arrival on campus to begin studies.

[music/admission/docs/AudRequireCurrent_Grad.pdf](http://pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf). Supporting area applications for choral conducting are due December 10; all others apply during their first year of study.

Admission Requirements for Doctoral Supporting Areas

Degree Program	Continued Enrollment Requirements
Collaborative Piano	Repertoire list; live audition. For audition requirements, visit pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf .
Composition	List of compositions; list of performances of compositions; scores of original works for large and small ensembles that demonstrate marked ability and technical skill in composition; audio or video recordings of compositions
Conducting (Choral, Orchestral, or Wind Ensemble)	Recent concert or recital programs conducted; evidence of two years of successful conducting experience; preliminary audition recording; live audition and interview (if invited following review of preliminary recorded audition). For conduction audition details, visit pages.uoregon.edu/

Intermedia Music Technology	Intermedia music technology statement, intermedia music technology-related work summary; software-hardware experience; three portfolio recordings.
Jazz Studies (Instrumental Performance or Composition-Arranging)	Repertoire list; live audition. For jazz composition and arranging emphasis, submit two representative scores and recordings of arrangements and/or compositions for jazz ensemble. At least one of these pieces should be scored for a large ensemble (10 or more performers).
Multiple Woodwinds	Repertoire list; live audition. For audition details, visit pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf .
Music Education	Résumé detailing teaching experience and educational background; statement of professional and personal goals; scholarly writing sample; copies of concerts or recital programs conducted (elementary-general applicants may substitute a sample curriculum in lieu of concert-recital programs; recent video recording of K–12 music teaching and ensemble performances; three references; interview with members of the music education faculty is recommended
Musicology, Ethnomusicology, or Historical Performance Practice	Statement of purpose (describing reasons for wanting to enroll in this supporting area); two research or analysis papers in history or ethnomusicology. Optional: if interested in historical performance practice, arrange an audition with members of the musicology faculty
Music Theory	Two scholarly writing samples exemplifying scholarship and ability to develop a single, coherent line of reasoning and ability to analyze tonal or atonal music or both; take the Preliminary Written Exam for Music Theory GE (a written test designed to evaluate part-writing and analysis skills)
Performance	Repertoire list; live audition
Piano Pedagogy	Repertoire list; live audition

Violin and Viola Pedagogy

Résumé or curriculum vitae emphasizing teacher training and experience; statement of purpose (one to two pages describing (a) the applicant's experience with teaching and/or working with children ages preschool through high school, as well as students at the college level; (b) the applicant's experience in working a part of a team, on a music teaching staff or otherwise; and (c) the applicant's reason for wanting to enroll in this program and what motivates his or her desire to learn. This statement is in addition to the one requested for general admission); video recording of teaching, preferably in both group and private string instruction settings, no less than 30 minutes in length (this requirement may be waived if the applicant has no prior teaching experience). Supporting area applications for violin and viola pedagogy are due December 10.

Admission Requirements for Graduate Certificate in Music Performance

Applications for admission into the graduate certificate in music performance program are reviewed at the same time as applications for graduate music degree programs.

To be considered for admission, applicants must hold a bachelor of music degree from an accredited institution and must complete a recorded or live audition. Note that any student admitted on the basis of a recorded performance must perform a placement audition upon arrival on campus to begin studies. For current audition requirements and procedures, see the School of Music and Dance website (<https://music.uoregon.edu>).

As with all other graduate certificates, applicants must satisfy minimum admission requirements set by the UO Graduate School.

All submissions must include the University of Oregon Graduate Application, available online (https://gradweb.uoregon.edu/online_app/application/guidelines1.asp).

Entrance Examinations

Before their first term of enrollment, students who are admitted into a graduate music degree program must take the Graduate Entrance Examination in music theory, aural skills, and music history. The outcome of these exams determines whether graduate music students may register for graduate-level music theory and musicology courses or if subsequent courses will be required to meet the proficiency requirement. Students in the graduate certificate in music performance program are not required to meet the Graduate Entrance Examination proficiency level but must pass the Graduate Entrance Examination in order to meet prerequisites to register for graduate-level music theory and musicology classes.

The Graduate Entrance Examination is administered before each fall term during Week of Welcome. Students are required to either pass the GEE or pass required remedial course work in order to meet the

proficiency requirement. Students who fail to pass the examination or pass required remedial undergraduate course work by the end of fall term in their second year will be dismissed from the program.

Students who fail the Graduate Entrance Examination in music theory and/or aural skills (i.e., earn a score of less than 70 percent) will be required to take the undergraduate theory placement exam, the undergraduate aural skills placement exam, or both. Based on the results of the placement exams, students will be required to take the appropriate undergraduate music theory and/or aural skills courses to meet the proficiency requirement. Students who are required to take undergraduate core courses in the first and second years of their program may retake the GEE at the beginning of the second year to satisfy the Level IV requirement. For more information, please see the music school's Procedures and Policies (<https://blogs.uoregon.edu/gradmus/procedures-policies>).

Students scoring between 50 and 69 percent on the music history portion of the GEE are required to take and pass an additional music history survey course from the MUS 660–665 series (in addition to any MUS 660–665 courses required for the degree). Based on the test results and demonstrated areas of weakness, members of the musicology faculty determine one or two of the survey courses to be taken by the student.

Students scoring below 50 percent are required to pass Survey of Music History (MUS 267), Survey of Music History (MUS 268), and Survey of Music History (MUS 269).

Master's Degree Requirements

In addition to the University of Oregon Graduate School's requirements for master's degrees, the School of Music and Dance has the following requirements. For additional information, contact the music graduate office or consult the Info for Grad Students (<https://music.uoregon.edu/current-students/info-graduate-music-students>) website.

A minimum of 9 credits must be taken in 600- or 700-level courses and at least one-half of the required credits must be in courses intended for graduate students only. Degree candidates must complete a terminal project (e.g., recital, thesis, project), all of which must be archived in one of the following locations: Music Services in Knight Library, Scholars' Bank, ProQuest, or Cykler Music Education Library.

Master of Arts in Musicology

Code	Title	Credits
	Performance Studies, at least three terms	6
	Appropriate ensemble, at least three terms	3-6
MUS 503	Thesis	9
MUS 614	Introduction to Musicology	4
	Select four of the following:	12
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
MUS 507 & MUS 607	Seminar: [Topic] and Seminar: [Topic] (three seminars in music history)	9-12
	One graduate course in ethnomusicology	3-4

One course in music history or ethnomusicology, theory, or approved area other than music	3-4
Total Credits	49-57

Language Requirement

Proficiency in a second language selected in consultation with an advisor. Language courses taken to satisfy this requirement may not be used to fulfill the 49 total graduate credits.

Additional Requirements

A final oral examination reviewing the thesis and degree course work.

Master of Arts in Music Theory

Code	Title	Credits
MUS 503	Thesis	9
MUS 530–531	Schenkerian Analysis	6
MUS 516	Post-Tonal Theory I	3
Choose one of the following:		
MUS 533	Counterpoint	
MUS 534	Counterpoint	
MUS 607	Seminar: [Topic] (Music Theory)	1-5
MUS 611	Research Methods in Music	3
MUS 634	Advanced Post-Tonal Theory	3
MUE 639	Pedagogy and Practicum: [Topic]	3
Select two of the following:		
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
Additional theory elective		3
Additional nontheory courses		8
Total Credits		45-49

Language Requirement

Reading proficiency in a second language (usually German), demonstrated by two years of successful undergraduate study or by two courses of the German for Reading Knowledge sequence, German for Reading Knowledge I (GER 570) and German for Reading Knowledge II (GER 571). Language courses taken to satisfy this requirement may not be used to fulfill the 54 total graduate credits.

Additional Requirements

A final oral examination reviewing the thesis and degree course work.

Master of Music in Intermedia Music Technology

Code	Title	Credits
Two 500-level seminars or courses in music outside the music technology area, approved by an advisor		6-8
MUS 550	SensorMusik	3
MUS 570	History of Electroacoustic Music	3
MUS 571	Musical Performance Networks	3

MUS 609	Terminal Project	9
MUS 611	Research Methods in Music	3
MUS 645	Advanced Electronic Composition	18
MUS 693	Oregon Electronic Device Orchestra	4
Two nonmusic courses, approved in advance by the advisor		6-8
Total Credits		55-59

Additional Requirements

- electroacoustic listening exam—a listening examination covering contemporary and classic works of electroacoustic music literature
- technical exam—a four-hour written examination on theoretical aspects of music technology
- final oral examination—reviewing the terminal project and degree course work

Master of Music in Music: Jazz Studies—Composition-Arranging Emphasis

Code	Title	Credits
MUJ 583–584	Advanced Jazz Arranging I-II	6
MUJ 605	Reading and Conference: [Topic] (Research Presentation Preparation)	4
MUS 611	Research Methods in Music	3
MUE 639	Pedagogy and Practicum: [Topic] (Jazz Studies)	3
MUJ 660	Survey of Jazz Composition	3
MUJ 661	Jazz Program Planning and Development	3
Select one of the following:		
MUJ 690	Jazz Laboratory Band III (six terms)	
MUJ 691	Jazz Laboratory Band II (six terms)	
MUJ 692	Oregon Jazz Ensemble (six terms)	
MUJ 695	Small Jazz Ensemble: [Topic] (three terms)	3
At least four 500-level or above seminars or courses in music outside the jazz area ^{1,2}		12-16
Electives at the 500-level or above to bring final total to 54 graduate credits ³		11
Total Credits		54-64

¹ Individualized study and experimental courses do not fulfill this requirement.

² Seminar and courses must be approved by advisor.

³ Chosen in consultation with an advisor.

Additional Requirements

- successful completion of the graduate jazz arranging barrier exam
- a recorded public recital or CD project of works composed under the guidance of a member of the jazz faculty and approved by the jazz studies committee
- a public lecture-presentation of independent research conducted under the guidance of a member of the jazz faculty
- a final oral examination with emphasis on jazz history, literature, and pedagogy

Both the recital-CD project and lecture-demonstration must have prior approval from the jazz studies committee.

Master of Music in Music: Jazz Studies— Instrumental Performance Emphasis

Code	Title	Credits
MUJ 577–579	Advanced Jazz Repertoire I-III	9
MUS 611	Research Methods in Music	3
MUE 639	Pedagogy and Practicum: [Topic] (Jazz Studies)	3
MUJ 661	Jazz Program Planning and Development	3
	Jazz performance studies	12
	Select one of the following:	3-6
MUJ 690	Jazz Laboratory Band III (three terms)	
MUJ 691	Jazz Laboratory Band II (three terms)	
MUJ 692	Oregon Jazz Ensemble (three terms)	
MUJ 695	Small Jazz Ensemble: [Topic] (six terms)	6
	At least four 500-level or above seminars or courses in music outside the jazz area ^{1,2}	12-16
	Electives at the 500-level or above to bring final total to 54 graduate credits ³	3
	Total Credits	54-61

¹ Individualized study and experimental courses do not fulfill this requirement.

² Seminar and courses must be approved by an advisor.

³ Chosen in consultation with an advisor.

Additional Requirements

- successful completion of the graduate jazz performance barrier exam
- a full-length, recorded public recital or CD project demonstrating mastery of jazz performance and showcasing creativity
- a public lecture-presentation of independent research conducted under the guidance of a member of the jazz faculty
- a final oral examination with emphasis on jazz history, literature, and pedagogy

Both the recital-CD project and lecture-demonstration must have prior approval from the jazz studies committee.

Master of Music in Music: Conducting— Choral Emphasis

Code	Title	Credits
	Performance Studies: Voice, at least three terms	6
MUS 607	Seminar: [Topic] (three terms of Advanced Choral Conducting)	6
MUS 607	Seminar: [Topic] (two terms of Choral literature courses)	6
MUE 609	Practicum: [Topic] (three terms)	6
MUS 611	Research Methods in Music	3
MUS 697	Chorus: [Topic] (three terms of Chamber Choir or University Singers)	6
	Select two of the following:	6
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	

MUS 665	Music in the 20th Century	
	Select one of the following:	3
MUS 605	Reading and Conference: [Topic] (OBF Chamber Choir)	
MUS 607	Seminar: [Topic] (Master Class in Conducting associated with the Oregon Bach Festival)	
MUS 680–682	Historical Performance Practices I-III	
	Select one of the following:	3
MUS 507	Seminar: [Topic] (Issues and Practices in Choral Music, Choral Techniques)	
MUE 542	Teaching Singing in the Classroom	
MUE 639	Pedagogy and Practicum: [Topic] (Choral Conducting)	
	Electives in the area of emphasis, chosen in consultation with advisor to bring final total to 54 graduate credits	9
	Total Credits	54

Residence Requirement

Three consecutive terms must be in residence, excluding summer sessions.

Additional Requirements

- final program portfolio
- as a culminating demonstration of professional capability in the major field, the student must conduct a juried, concert-length public performance or the equivalent
- piano proficiency examination
- a final oral examination that covers degree course work

Master of Music in Music: Conducting— Orchestral Emphasis

Code	Title	Credits
MUS 611	Research Methods in Music	3
MUS 624	Instrumental Conducting Laboratory (six terms)	12
MUS 625	Orchestral Music: Bach to Beethoven	2
MUS 626	Orchestral Music: 1825 to Modern	2
MUS 629	Repertoire and Analysis	3
	MUP Performance Studies (three terms)	6
	Select two of the following:	6
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
	Select one of the following:	
MUS 681	Historical Performance Practices II	
MUS 682	Historical Performance Practices III	
	Ensemble (three terms) ¹	6
	Electives at the 500 level or above in the area of emphasis ²	11
	Total Credits	51

¹ Ensemble must be approved by an advisor.

² Chosen in consultation with an advisor.

Additional Requirements

- as a culminating demonstration of professional capability in the major field, the student must conduct a juried, concert-length public performance or the equivalent
- academic year in residence
- a final oral examination that covers degree course work
- a research paper dealing with some aspect of orchestral conducting

Master of Music in Music: Conducting—Wind Ensemble Emphasis

Code	Title	Credits
Performance Studies at the 641 level or above, three terms		
MUS 611	Research Methods in Music	3
MUS 620	Bibliography in Instrumental Conducting	3
MUS 621–623	Wind Repertoire	9
MUS 624	Instrumental Conducting Laboratory (three terms)	6
Select one of the following: 3		
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	3
MUS 695	Band: [Topic] (three terms of Wind Ensemble)	6
Electives in the area of emphasis, chosen in consultation with an advisor 12		
Total Credits		45

Additional Requirements

- as a culminating demonstration of professional capability in the major field, the student must conduct a juried rehearsal and concert-length public performance or the equivalent
- academic year in residence
- a final oral examination that covers degree course work
- a research paper dealing with some aspect of wind ensemble conducting

Master of Music in Music: Piano Pedagogy

Code	Title	Credits
MUE 571	Piano Pedagogy I: Teaching Beginners	3
MUE 572	Piano Pedagogy II: Teaching Groups	2
MUE 573	Piano Pedagogy III: Teaching Intermediate Levels	2
MUE 591	Advanced Pedagogy	3
MUE 609	Practicum: [Topic] (three terms)	3
MUS 611	Research Methods in Music	3
MUS 650–652	Piano Literature	9
MUP 641	Performance Studies: Piano (or above) ¹	12
Appropriate ensemble, at least three terms		3-6
500-level or above seminars or courses in music history, theory, or literature		6
Music electives at the 500-level or above ²		3

MUE 601	Research: [Topic] (Final Project) ³	3
Total Credits		52-55

¹ Minimum of 12 credits.

² Chosen in consultation with an advisor.

³ Project and recital of at least 30 minutes of music performance. If pursuing a concurrent piano performance degree, a lecture-demonstration may serve in lieu of the recital.

Additional Requirement

A final oral examination reviewing the project and degree course work.

Master of Music in Music Composition

Code	Title	Credits
Appropriate ensemble, at least three terms 3-6		
MUS 516	Post-Tonal Theory I	3
Select one of the following: 3		
MUS 517	Post-Tonal Theory II	
MUS 531	Schenkerian Analysis	
MUS 634	Advanced Post-Tonal Theory	
MUS 530	Schenkerian Analysis	3
MUS 533–535	Counterpoint	12
MUS 538	Composers Forum (at least four terms)	4
Select one of the following: 3-4		
MUS 547	Digital Audio and Sound Design	
MUS 548	Interactive Media Performance	
MUS 645	Advanced Electronic Composition	
Select one of the following: 4		
MUS 551	Introduction to Ethnomusicology	
MUS 552	Musical Instruments of the World	
MUS 590	Balinese Gamelan (two terms)	
MUS 605	Reading and Conference: [Topic] (Thesis Proposal)	1
MUS 611	Research Methods in Music	3
MUS 640–642	Advanced Composition Studies (two years of sequence)	18
Select one of the following: 3		
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	3
MUS 503	Thesis ¹	9
Total Credits		72-76

¹ A composition of substantial dimension, composed under the guidance of a member of the music composition faculty, performed and recorded on campus.

Additional Requirements

- proficiency in notation
- proficiency in orchestration

- proficiency in piano at level of MUP 271 Performance Studies: Piano or proficiency in Performance Studies: Piano (MUP 171) and proficiency in another instrument or in Performance Studies: Voice (MUP 174) or above
- public performance—usually a graduate recital lasting 50 minutes—of works composed under the guidance of and approved by the composition faculty
- final oral examination reviewing the thesis and degree course work

Master of Music in Music Education

Candidates are required to establish an area of emphasis among the following:

- Choral music education (voice and piano must be used)
- Elementary general music education (voice and piano must be used)
- Instrumental music education: band (traditional wind or percussion instruments must be used)
- Instrumental music education: orchestra (violin, viola, cello, or double bass must be used)

Code	Title	Credits
MUE 532	Music in School and Society	3
MUE 612	Quantitative Research in Music Education	3
MUE 538	Curricular Strategies in Music Education	3
MUE 649	History of American Music Education	
Select one of the following:		3
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
500-level or above music theory, musicology, or ethnomusicology course		3-4
500-level or above music education courses in area of emphasis ¹		12
600-level or above courses ¹		6
Ensemble, three terms ¹		3-6
Performance Studies, three terms ¹		6-12
Electives ¹		6
Select one of the following:		
MUE 503	Thesis (and oral examination) ²	
Major project and oral examination ^{3,4}		
Total Credits		48-58

¹ Chosen in consultation with advisor.
² Oral examination covers all music education course work.
³ Course work is 6 credits of Research: [Topic] (MUE 601).
⁴ Requires enrollment in Performance Studies: Piano (MUP 641) through Performance Studies: Percussion (MUP 661) or above. During term of recital, must be enrolled in Performance Studies.

Additional Requirements

As needed, courses in expository writing.

Master of Music in Music Performance

Options are available in bass, bassoon, cello, clarinet, collaborative piano, euphonium, flute, guitar, harpsichord, horn, multiple woodwind or brass, oboe, organ, percussion, saxophone, solo piano, trombone, trumpet, tuba, viola, violin, violin and viola performance and pedagogy, and voice.

Code	Title	Credits
MUS 611	Research Methods in Music	3
Performance Studies ^{1,2,3}		24
Appropriate ensemble, at least six terms ⁴		9-12
MUS 691	Collegium Musicum ⁵	1
Select one of the following:		3
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
500-level or above music theory course		3-4
500-level or above course in musicology-ethnomusicology, theory, or literature ⁶		3-4
600-level or above course in musicology-ethnomusicology or theory ⁶		3-4
Total Credits		49-55

¹ MUP 670 Performance Studies: Piano Accompanying through MUP 691 Performance Studies: Percussion
² During the term of the public recital, enroll in Performance Studies: Piano Accompanying (MUP 670) through Performance Studies: Percussion (MUP 691). For procedures, consult advisor.
³ Exception is multiple woodwind or brass instruments option.
⁴ Exception is voice and multiple woodwind or brass instruments option.
⁵ Not required for saxophone students.
⁶ Exceptions are collaborative piano and voice options.

Ensemble Requirements

Before each fall term, students must audition for ensemble placement. Students entering winter and spring terms audition at the time of entrance. Factors for placement include the student's preference, level of ability, major performance medium, educational and musical needs, and the needs of the school's ensembles.

- Instrumental ensemble options: University Symphony Orchestra, Oregon Wind Ensemble, Oregon Symphonic Band
- Voice ensemble options: University Singers, Chamber Choir, Repertoire Singers, Opera Ensemble, Women's Choir
- Students studying harpsichord, organ, harp, or classical guitar may enroll in one of the following courses instead of large conducted ensembles:

Code	Title	Credits
MUS 605	Reading and Conference: [Topic]	1-4
MUS 691	Collegium Musicum	1-3
MUS 694	Chamber Ensemble: [Topic]	1

- Students studying piano must enroll in the following courses:

Code	Title	Credits
MUS 521–523	The Collaborative Pianist	6
MUS 694	Chamber Ensemble: [Topic] (Accompanying)	3

- Students studying collaborative piano must enroll in the following course:

Code	Title	Credits
MUS 694	Chamber Ensemble: [Topic] (Chamber Ensemble)	6

Additional Requirements

Final oral examination with emphasis on history, literature, and pedagogy of the primary performance medium.

Additional Requirements for Selected Options

Harpichord

Code	Title	Credits
MUS 605	Reading and Conference: [Topic] (Harpichord Literature)	3
MUS 650	Piano Literature	3

Multiple Woodwind or Brass Instruments

Code	Title	Credits
MUS 605	Reading and Conference: [Topic] (Wind Instrument Music)	3
	Performance Studies, at least 3 credits in each secondary instrument ¹	6
MUE 639	Pedagogy and Practicum: [Topic] (Woodwinds or Brass)	3

¹ MUP 621 Performance Studies: Flute through MUP 630 Performance Studies: Tuba.

Additional Requirements

- Public recital of both solo and ensemble music on the primary instrument, and performance of a substantial composition on each of the two secondary instruments during a public student recital
- final oral examination with emphasis on history, literature, and pedagogy of the primary and secondary instruments

Organ

Code	Title	Credits
MUS 605	Reading and Conference: [Topic] (Organ Literature)	1-4
MUE 639	Pedagogy and Practicum: [Topic] (Organ)	3

Percussion

Code	Title	Credits
MUS 694	Chamber Ensemble: [Topic] (Oregon Percussion Ensemble)	6-12

Piano

Code	Title	Credits
MUS 650–652	Piano Literature	9

Collaborative Piano

Code	Title	Credits
MUS 155–156	Introduction to Lyric Diction	4
MUS 567–568	Solo Vocal Music	6
MUS 605	Reading and Conference: [Topic]	2
MUP 671	Performance Studies: Piano	4

Additional Requirements

Two public recitals: consult an advisor for procedures.

Stringed Instruments

Code	Title	Credits
MUS 694	Chamber Ensemble: [Topic] (Chamber Ensemble, three terms)	3

Violin and Viola Performance and Pedagogy

Code	Title	Credits
MUE 528	Music for Early Childhood	3
MUE 530	Music Classroom Management	3
MUE 559	Suzuki Pedagogy I	3
MUE 560	Suzuki Pedagogy II	3
MUE 561	Suzuki Pedagogy III	3
MUE 562	Suzuki Pedagogy IV	3
MUE 563	Pedagogy Methods: Violin and Viola	2
MUE 609	Practicum: [Topic] (six terms, CMI Preparation and Teaching)	6

Voice

Code	Title	Credits
MUS 555–556	Lyric Diction	6
MUS 567–568	Solo Vocal Music	6
MUS 574–575	History of Opera	8
MUE 639	Pedagogy and Practicum: [Topic] (Voice)	3

One year of college study in each of the following languages: Italian, French, German.

Doctoral Degree Requirements

In addition to the Graduate School's requirements for doctoral degrees, the School of Music and Dance has the following core and general requirements. For additional information, contact the music graduate office or consult the Info for Grad Students (<https://music.uoregon.edu/current-students/info-graduate-music-students>) website.

At least one-half of the required credits must be in courses intended for graduate students only.

When a graduate student is required to enroll as a full-time graduate student (e.g., doctoral year of residency, graduate employee), the student may not use undergraduate credits as part of the required 9 graduate credits for full-time enrollment. However, undergraduate credits that exceed the 9 graduate credits are acceptable.

Doctor of Musical Arts Core Courses

Code	Title	Credits
MUS 611	Research Methods in Music	3
MUS 629	Repertoire and Analysis	3
MUE 641	College Music Teaching	3
Select two of the following:		6
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
Total Credits		15

Doctor of Philosophy Core Courses

Code	Title	Credits
MUS 611	Research Methods in Music ¹	3
MUS 629	Repertoire and Analysis ²	3
MUE 641	College Music Teaching	3
Select two of the following:		6
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century ³	
Total Credits		15

¹ Not required for PhD in music education or the PhD in musicology.

² Students with a primary or supporting area in music theory are exempt from Repertoire and Analysis (MUS 629).

³ Students with a primary or supporting area in composition must take Music in the 20th Century (MUS 665).

General Degree Requirements

Other courses. Eight credits of nonmusic courses (excluding basic language courses taken to fulfill the language requirement) chosen in consultation with the faculty advisor. Students in the DMA program in music performance (collaborative piano option) must take courses in art history to fulfill this requirement. Students in the PhD program in music education are exempt from this requirement.

Ensemble. After conditional admission, students with a primary or supporting area in piano performance must enroll in three terms of piano accompaniment courses [The Collaborative Pianist (MUS 521), The Collaborative Pianist (MUS 522), The Collaborative Pianist (MUS 523)]. Students with a primary area in music performance (collaborative piano option) must enroll in three terms of chamber ensemble accompaniment courses—Chamber Ensemble: [Topic] (MUS 694). Students with a primary or supporting area in voice, wind, string, or percussion

performance must enroll in three consecutive terms of band, chorus, or orchestra, and they must audition for ensemble placement before each fall term. Students with a primary area in voice may substitute Opera Workshop (MUS 698) for chorus.

In making assignments, a faculty auditioning committee and the performance instructors give priority to the University Symphony Orchestra, University Singers, Chamber Choir, and Oregon Wind Ensemble. Assignments take into account the student's preference, level of ability, major performance medium, educational and musical needs, and the needs of the school's ensembles.

Language. PhD candidates, except those in music education, must demonstrate proficiency in a second and third language, usually chosen from French, German, and Italian. DMA candidates must demonstrate proficiency in a second language, usually French, German, or Italian. Students with a primary or supporting area in voice must complete two years of college study in French, German, or Italian and one year of college study in each of the other two.

Specific Area Requirements

In addition to the degree requirements of the Graduate School and the School of Music and Dance for doctoral degrees referenced above, the following are specific requirements for primary and supporting areas. If approved by the supporting area advisor, courses used to fulfill primary requirements may also be used to fulfill supporting area requirements.

Doctor of Musical Arts in Music Composition—Primary Area

Primary area requirements are the same for the PhD and DMA degrees except for the choice of supporting area. PhD candidates choose from intermedia music technology, ethnomusicology, music education, music theory, or musicology. DMA candidates choose from collaborative piano, choral conducting, jazz studies, multiple woodwinds, music performance, orchestral conducting, piano pedagogy, violin and viola pedagogy, or wind ensemble conducting.

Code	Title	Credits
MUS 516	Post-Tonal Theory I	3
Select one of the following:		3
MUS 517	Post-Tonal Theory II	
MUS 531	Schenkerian Analysis	
MUS 634	Advanced Post-Tonal Theory	
MUS 530	Schenkerian Analysis	3
MUS 533–535	Counterpoint	12
MUS 538	Composers Forum (at least four terms)	4
Select one of the following:		3-4
MUS 547	Digital Audio and Sound Design	
MUS 548	Interactive Media Performance	
MUS 645	Advanced Electronic Composition	
Select one of the following:		2-4
MUS 551	Introduction to Ethnomusicology	
MUS 552	Musical Instruments of the World	
MUS 590	Balinese Gamelan (two terms)	
500- or 600-level seminar or course in musicology/ ethnomusicology or theory		3-4
MUS 603	Dissertation ¹	18

MUS 605	Reading and Conference: [Topic] (Composition Dissertation Proposal) ¹	1
MUE 639	Pedagogy and Practicum: [Topic] (Composition)	3
MUS 640–642	Advanced Composition Studies (two sequences)	18
Total Credits		75-77

¹ Summer session enrollment requires advisor's consent.

Note: Candidates must take MUS 665 Music in the 20th Century as one of the two period survey courses in the core requirements (p. 915). (See Doctor of Philosophy Core Courses, which are listed elsewhere in this catalog.)

Additional Requirements

- proficiency in notation
- proficiency in orchestration
- public performance (60-minute minimum) of compositions completed during doctoral study that have been approved by the music composition faculty—performance on the University of Oregon campus
- reading and recording of the dissertation

Doctor of Musical Arts in Music Performance—Primary Area

Options are available in bassoon, cello, clarinet, collaborative piano, data-driven instruments, euphonium, flute, horn, oboe, percussion, piano pedagogy and performance, solo piano, saxophone, trombone, trumpet, tuba, viola, violin, and voice.

Code	Title	Credits
Two or more seminars or courses in musicology-ethnomusicology or theory at the graduate level		6
MUE 639	Pedagogy and Practicum: [Topic]	3
Performance studies, six terms ¹		24
MUS 601 or MUS 603	Research: [Topic] (Lecture-Document) ^{2,3} Dissertation	6,18
MUS 607	Seminar: [Topic] (DMA Thesis Organization)	1-5
MUS 650–652	Piano Literature ⁴	9
Total Credits		49-65

¹ Performance Studies: Collaborative Piano (MUP 770) through Performance Studies: Percussion (MUP 791).

² DMA students may complete either option.

³ Summer session enrollment requires advisor's consent.

⁴ Piano students only.

Additional Requirement

Three public performances (subject to prerecital approval by faculty jury) on the University of Oregon campus, including one solo recital. For students in the piano performance and pedagogy option: three public performances (recital, one-hour public presentation, one-hour public master class).

In addition, students in the collaborative piano option must meet the following requirements:

Collaborative Piano Option

Code	Title	Credits
MUS 555–556	Lyric Diction	6
MUS 567–568	Solo Vocal Music	6
MUS 574 or MUS 575	History of Opera	4
MUP 612	Performance Studies: Harpsichord ¹	2
MUS 691	Collegium Musicum (one term)	3
MUS 694	Chamber Ensemble: [Topic] (Chamber Ensemble) (3 terms) ²	3
Two art history courses ³		8

¹ Must be taken prior to Collegium Musicum (MUS 691).

² Fulfills ensemble requirement.

³ Fulfills nonmusic courses.

Piano Performance and Pedagogy Option

Code	Title	Credits
MUE 528	Music for Early Childhood	3
MUE 571	Piano Pedagogy I: Teaching Beginners	3
MUE 572	Piano Pedagogy II: Teaching Groups	2
MUE 573	Piano Pedagogy III: Teaching Intermediate Levels	2
MUE 639	Pedagogy and Practicum: [Topic] (Piano Pedagogy and Practicum II)	3
MUE 639	Pedagogy and Practicum: [Topic] (Piano Pedagogy and Practicum III)	3
MUE 647	Psychology of Music	3

Data-Driven Instruments Option

Code	Title	Credits
MUS 550	SensorMusik	3
MUS 570	History of Electroacoustic Music	3
MUS 571	Musical Performance Networks	3

Doctor of Philosophy in Music Composition—Primary Area

Primary-area requirements are the same for the PhD and DMA degrees except for the choice of supporting area. PhD candidates choose from intermedia music technology, ethnomusicology, music education, music theory, or musicology. DMA candidates choose from collaborative piano, choral conducting, jazz studies, multiple woodwinds, music performance, orchestral conducting, piano pedagogy, violin and viola pedagogy, or wind ensemble conducting.

Code	Title	Credits
MUS 516	Post-Tonal Theory I	3
Select one of the following:		3
MUS 517	Post-Tonal Theory II	
MUS 531	Schenkerian Analysis	
MUS 634	Advanced Post-Tonal Theory	
MUS 530	Schenkerian Analysis	3

MUS 533–535	Counterpoint	12
MUS 538	Composers Forum (at least four terms)	4

MUS 547	Digital Audio and Sound Design	
MUS 548	Interactive Media Performance	
MUS 645	Advanced Electronic Composition	
Select one of the following:		2-4
MUS 551	Introduction to Ethnomusicology	
MUS 552	Musical Instruments of the World	
MUS 590	Balinese Gamelan (two terms)	
500- or 600-level seminar or course in musicology/ ethnomusicology or theory		3-4
MUS 603	Dissertation ¹	18
MUS 605	Reading and Conference: [Topic] (Dissertation Proposal) ¹	1
MUE 639	Pedagogy and Practicum: [Topic] (Composition)	3
MUS 640–642	Advanced Composition Studies (two sequences)	18
Total Credits		75-77

¹ Summer session enrollment requires advisor's consent.

Note: Candidates must take MUS 665 Music in the 20th Century as one of the two period survey courses in the core requirements (p. 915). (See Doctor of Philosophy Core Courses.)

Additional Requirements

- proficiency in notation
- proficiency in orchestration
- public performance (60-minute minimum) of compositions completed during doctoral study that have been approved by the music composition faculty—performance on the University of Oregon campus
- reading and recording of the dissertation

Doctor of Philosophy in Music Education— Primary Area

Code	Title	Credits
MUE 532	Music in School and Society	3
MUE 538	Curricular Strategies in Music Education	3
MUE 601	Research: [Topic] ¹	3-6
MUE 603	Dissertation ¹	18
MUE 612	Quantitative Research in Music Education	3
Qualitative research methods		3-4
Quantitative research methods		3-4
Music education research readings (seminar)		3
Additional graduate MUE courses in specialty area to be chosen in consultation with advisor		6
Total Credits		45-50

¹ Summer session enrollment requires advisor's consent.

Note: Candidates are exempt from nonmusic course requirements (p. 915) and core language course requirements (p. 915).

Additional Requirement

A minimum of two consecutive academic years (not including summer sessions) in residency at the University of Oregon.

Doctor of Philosophy in Music Theory— Primary Area

Code	Title	Credits
MUS 516	Post-Tonal Theory I	3
MUS 517	Post-Tonal Theory II	3
or MUS 633	Advanced Schenkerian Analysis	
MUS 530	Schenkerian Analysis	3
MUS 531	Schenkerian Analysis	3
MUS 533	Counterpoint	4
MUS 534	Counterpoint	4
MUS 535	Counterpoint	3-4
or MUS 630	History of Theory I	
MUS 603	Dissertation	18
MUS 607	Seminar: [Topic] (Music Theory)	3
MUS 607	Seminar: [Topic] (Music Theory)	3
MUS 607	Seminar: [Topic] (Music Theory)	3
MUS 631	History of Theory II	3
MUS 632	History of Theory III	3
MUS 634	Advanced Post-Tonal Theory	3
MUE 639	Pedagogy and Practicum: [Topic]	3
Total Credits		62-63

¹ Available during summer session only with advisor's consent.

Note: Students with a primary area in music theory are exempt from MUS 629 Repertoire and Analysis.

Additional Requirement

One public lecture (subject to faculty approval) on the University of Oregon campus.

Doctor of Philosophy in Musicology— Primary Area

Code	Title	Credits
Select two of the following:		6
MUS 530	Schenkerian Analysis	
MUS 531	Schenkerian Analysis	
MUS 630	History of Theory I	
MUS 631	History of Theory II	
MUS 632	History of Theory III	
MUS 633	Advanced Schenkerian Analysis	
MUS 551	Introduction to Ethnomusicology	4
MUS 603	Dissertation ¹	18
MUS 614	Introduction to Musicology	4
Five music history seminars (at least one 607)		15-20
MUE 639	Pedagogy and Practicum: [Topic] (Musicology)	3
MUS 643	Notation of Medieval and Renaissance Music	3

Select one of the following:	3
MUS 680	
MUS 681	Historical Performance Practices II
MUS 682	Historical Performance Practices III
MUS 691	Collegium Musicum
	1
Total Credits	57-62

¹ Available during summer session only with advisor's consent.

Additional Requirements

- consult with advisor and develop a plan to remedy any deficiencies and prepare for comprehensive examinations (no credit earned for this preparation)
- one public lecture (subject to faculty approval) given on the University of Oregon campus

Supporting Area Options

Supporting area options include collaborative piano, choral conducting, ethnomusicology, independent research, intermedia music technology, jazz studies, multiple woodwinds, music education, music performance, music theory, musicology, orchestral conducting, piano pedagogy, violin and viola pedagogy, or wind ensemble conducting.

Choral Conducting—Supporting Area

Code	Title	Credits
MUE 602	Supervised College Teaching (Music)	3
MUS 607	Seminar: [Topic] (Choral Conducting (three terms))	6
MUS 607	Seminar: [Topic] (Choral Literature (two terms))	6
Select two of the following:		6
MUS 607	Seminar: [Topic] (Master Class: Oregon Bach Festival)	
MUS 680		
MUS 681	Historical Performance Practices II	
MUS 682	Historical Performance Practices III	
MUE 609	Practicum: [Topic]	2
MUP 614	Performance Studies: Voice (three terms)	6-12
or MUP 644	Performance Studies: Voice	
MUE 639	Pedagogy and Practicum: [Topic] (Conducting)	3
MUS 697	Chorus: [Topic] (Chamber Choir or University Singers) (three terms)	6
Total Credits		38-44

Additional Requirements

- piano proficiency demonstrated by examination
- one public choral conducting performance (faculty approval required)
- diction proficiency in French, German, Italian, and Latin, which may be demonstrated by successfully completing Lyric Diction (MUS 555–556) or by examination

Collaborative Piano—Supporting Area: Instrumental Emphasis

Both options require a 60-minute public recital, which may show either vocal or instrumental emphasis, though both must be represented.

The student must enroll in Performance Studies: Piano Accompanying (MUP 670) the term before and the term of the degree recital. The recital must be performed on the University of Oregon campus.

Code	Title	Credits
MUS 155–156	Introduction to Lyric Diction	4
MUS 521–523	The Collaborative Pianist	6
MUS 605	Reading and Conference: [Topic] (Instrumental Duo)	2
MUE 639	Pedagogy and Practicum: [Topic] (Piano Accompaniment)	3
MUP 670	Performance Studies: Piano Accompanying (at least three terms)	9
MUS 694	Chamber Ensemble: [Topic] (at least four terms)	4
Total Credits		28

Collaborative Piano—Supporting Area: Vocal Emphasis

Code	Title	Credits
MUS 155–156	Introduction to Lyric Diction	4
MUS 521–523	The Collaborative Pianist	6
Select one of the following:		6-7
Option 1		
MUS 567–568	Solo Vocal Music (both terms)	
Option 2		
MUS 567–568	Solo Vocal Music (one term)	
MUS 574–575	History of Opera (one term)	
MUE 639	Pedagogy and Practicum: [Topic] (Piano Accompaniment)	3
MUP 670	Performance Studies: Piano Accompanying (at least three terms)	9
Total Credits		28-29

Ethnomusicology—Supporting Area

Code	Title	Credits
MUS 551	Introduction to Ethnomusicology	4
Select at least four of the following:		16
MUS 507	Seminar: [Topic] (on a topic in ethnomusicology)	
MUS 508	Workshop: [Topic] (on a topic in ethnomusicology)	
MUS 552	Musical Instruments of the World	
MUS 562	Popular Musics in the African Diaspora	
MUS 605	Reading and Conference: [Topic] ¹	
MUS 610	Experimental Course: [Topic] (Andean Music Ensemble)	
Select one course listed above or from outside the School of Music and Dance (e.g., anthropology, folklore) in consultation with advisor		4
MUE 639	Pedagogy and Practicum: [Topic] (Ethnomusicology) ²	3
Total Credits		27

¹ Available during summer session only with advisor's consent.

² If primary area is musicology, not required.

Historical Performance Practice—Supporting Area

Code	Title	Credits
One art history course chosen in consultation with advisor		4
MUS 533 or MUS 534	Counterpoint	4
MUS 607	Seminar: [Topic] (Rhetoric in Music)	4
MUS 614	Introduction to Musicology	4
MUS 630 or MUS 631	History of Theory I History of Theory II	3
MUE 639	Pedagogy and Practicum: [Topic]	3
MUS 643	Notation of Medieval and Renaissance Music	3
MUS 660	Music in the Middle Ages	3
MUS 661	Music in the Renaissance	3
MUS 662	Music in the Baroque Era	3
MUS 663	Music in the Classical Period	3
Select two of the following:		6
MUS 680		
MUS 681	Historical Performance Practices II	
MUS 682	Historical Performance Practices III	
MUS 691	Collegium Musicum (at least four terms)	4
One undergraduate or graduate course or seminar in English, French, German, Italian, Latin, or Spanish literature before 1800, chosen in consultation with advisor		3-4
Proficiency in performance studies courses		
Total Credits		50-51

Individualized Research—Supporting Area

Student must provide a statement describing the focus and goals, including a list of the courses¹ and an approval page signed by one music faculty member who agrees to serve as the advisor.^{2,3} The individualized research supporting area program plan is subject to approval by the Music Graduate Committee.

¹ A minimum of 24 graduate credits taken at the University of Oregon, including at least four regularly scheduled courses (i.e., not individualized study, studio lessons, ensemble or experimental courses).

² The plan of study must be approved by both a music faculty member who serves as committee coordinator (and may be the primary area advisor) and the Music Graduate Committee.

³ The supporting area committee will guide the student in the approved course plan and will administer the comprehensive exam or capstone project, which will occur after the student completes all course work.

Intermedia Music Technology—Supporting Area

Code	Title	Credits
MUS 446	Computer Music Applications: [Topic]	3
MUS 547	Digital Audio and Sound Design	4
MUS 548	Interactive Media Performance	3
MUS 645	Advanced Electronic Composition (three terms)	9
MUE 639	Pedagogy and Practicum: [Topic] (Intermedia Music Technology)	3
Additional course in consultation with the advisor		
Total Credits		22

Additional Requirement

A final lecture-recital.

Jazz Studies—Supporting Area: Jazz Arranging Option

Code	Title	Credits
Select one of the following:		9
MUJ 580–582	Jazz Arranging I-III	
MUJ 583–585	Advanced Jazz Arranging I-III	
MUE 639	Pedagogy and Practicum: [Topic] (Jazz Studies)	3
MUJ 660	Survey of Jazz Composition	3
MUJ 692 or MUJ 690–691	Oregon Jazz Ensemble (three terms) Jazz Laboratory Band III-II	3
Total Credits		18

Additional Requirements

- a recorded public recital and recording or CD project of works composed under the guidance of a member of the jazz faculty and approved by the jazz studies committee
- final comprehensive examination

Jazz Studies—Supporting Area: Jazz Performance Option

Code	Title	Credits
Select one of the following:		9
MUJ 574–576	Jazz Repertoire I-III	
MUJ 577–579	Advanced Jazz Repertoire I-III	
MUE 639	Pedagogy and Practicum: [Topic] (Jazz Studies)	3
Performance Studies, jazz only ¹		12
MUJ 695	Small Jazz Ensemble: [Topic] (three terms)	3
Total Credits		27

¹ Performance Studies: Piano Accompanying (MUP 670) through Performance Studies: Percussion (MUP 691).

Additional Requirements

- a full-length, recorded public recital or CD project demonstrating mastery of jazz performance and showcasing creativity, under the

guidance of a member of the jazz faculty and approved by the jazz studies committee

- final comprehensive examination

Multiple Woodwinds—Supporting Area

Code	Title	Credits
Performance Studies, select one of the following: ^{1,2} 12-24		
Option 1		
MUP 621	Performance Studies: Flute	
MUP 622	Performance Studies: Oboe	
MUP 623	Performance Studies: Clarinet	
MUP 624	Performance Studies: Saxophone	
MUP 625	Performance Studies: Bassoon	
Option 2		
MUP 651	Performance Studies: Flute	
MUP 652	Performance Studies: Oboe	
MUP 653	Performance Studies: Clarinet	
MUP 654	Performance Studies: Saxophone	
MUP 655	Performance Studies: Bassoon	
MUS 605	Reading and Conference: [Topic] ^{3,4}	6
MUE 639	Pedagogy and Practicum: [Topic] (Multiple Woodwinds)	3
Total Credits		21-33

¹ Performance studies in two secondary woodwind instruments chosen from flute, oboe, clarinet, saxophone, and bassoon, three terms each over two years.

² A juried performance of a sonata or concerto from the standard repertoire and a chamber piece that includes the secondary woodwind instrument that was studied; literature selected in consultation with the faculty member teaching the instrument

³ One course for each secondary instrument covering the history and literature of that instrument. These courses are designed to suit the needs of the student by the faculty advisor for that area.

⁴ Available during summer session only with advisor's consent.

Additional Requirements

End-of-term juried performances for members of the faculty on each of the two supporting instruments as follows:

1. two during the first year on one instrument
2. two during the second year on the second instrument
3. final end-of-term juried performance of both woodwinds

Music Composition—Supporting Area

Code	Title	Credits
MUS 533–535	Counterpoint	12
MUS 538	Composers Forum (four terms)	4
MUE 639	Pedagogy and Practicum: [Topic] (Composition)	3
MUS 640–642	Advanced Composition Studies (four terms)	12
Total Credits		31

Note: Candidates must take MUS 665 Music in the 20th Century as one of the two period survey courses in the core requirements (p. 915).

Additional Requirements

- proficiency in notation
- proficiency in orchestration
- public performance (30-minute minimum) of music compositions completed during doctoral study that have been approved by the music composition faculty—must be presented on the University of Oregon campus

Music Education—Supporting Area

Code	Title	Credits
MUE 612	Quantitative Research in Music Education	3
MUE 639	Pedagogy and Practicum: [Topic] (Music Education)	3
Additional graduate MUE courses chosen in consultation with advisor		9
Performance Studies, three terms		6-12
Total Credits		21-27

Music Performance—Supporting Area

Code	Title	Credits
MUE 639	Pedagogy and Practicum: [Topic]	3
Performance Studies, three terms ¹		12
Large ensemble, three terms		6

¹ MUP 741 Performance Studies: Piano through MUP 761 Performance Studies: Percussion, with the exception of the collaborative piano option.

Additional Requirement

Two public performances (subject to prerecital approval by faculty hearing) on the University of Oregon campus. One must be a solo recital, with the exception of the collaborative piano option.

Students in the Music Performance—Supporting Area in voice are required to perform one public solo recital, and must complete one year of language study in each of three languages (French, Italian, and German).

Solo Piano Option

Code	Title	Credits
MUS 650–652	Piano Literature	9

Music Theory—Supporting Area

Code	Title	Credits
MUS 516	Post-Tonal Theory I	3
MUS 530	Schenkerian Analysis	3
MUS 531	Schenkerian Analysis	3
MUS 634	Advanced Post-Tonal Theory	3
Select one of the following:		4
MUS 533	Counterpoint	
MUS 534	Counterpoint	
MUE 639	Pedagogy and Practicum: [Topic] (Music Theory)	3

MUS 607	Seminar: [Topic] (Music Theory)	3
Other music theory elective		3
Total Credits		25

Note: Candidates are exempt from MUS 629 Repertoire and Analysis in core requirements (p. 915).

Musicology—Supporting Area

Code	Title	Credits
MUS 551	Introduction to Ethnomusicology	4
MUS 614	Introduction to Musicology	4
MUE 639	Pedagogy and Practicum: [Topic] (Musicology)	3
MUS 660	Music in the Middle Ages	3
MUS 665	Music in the 20th Century	3
MUS 507	Seminar: [Topic]	3-4
or MUS 607	Seminar: [Topic]	
Select one of the following:		3-4
MUS 574	History of Opera	
or MUS 575	History of Opera	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 680		
MUS 681	Historical Performance Practices II	
MUS 682	Historical Performance Practices III	
Seminar in jazz		
Other course approved by the advisor		
Total Credits		23-25

Orchestral Conducting—Supporting Area

Code	Title	Credits
MUS 620	Bibliography in Instrumental Conducting	3
MUS 624	Instrumental Conducting Laboratory (three terms)	6
MUE 639	Pedagogy and Practicum: [Topic] (Conducting)	3
MUS 625	Orchestral Music: Bach to Beethoven	2
MUS 626	Orchestral Music: 1825 to Modern	2
MUS 681	Historical Performance Practices II	3
or MUS 682	Historical Performance Practices III	
Ensemble approved by advisor		3-6
Performance Studies, three terms ¹		6-12
Total Credits		28-37

¹ MUP 611 Performance Studies: Piano through MUP 791 Performance Studies: Percussion

Additional Requirement

A juried rehearsal and a juried conducting performance in addition to those required at master's level.

Piano Pedagogy—Supporting Area

Code	Title	Credits
MUE 571	Piano Pedagogy I: Teaching Beginners	3
MUE 572	Piano Pedagogy II: Teaching Groups	2
MUE 573	Piano Pedagogy III: Teaching Intermediate Levels	2
MUE 609	Practicum: [Topic] (three terms)	3
MUE 639	Pedagogy and Practicum: [Topic] (Piano Pedagogy)	3
MUP 641 (or above)	Performance Studies: Piano	12
Total Credits		25

Additional Requirement

If primary area is other than piano performance, a solo 30-minute piano recital (subject to prerecital approval by faculty hearing) on the University of Oregon campus.

Violin and Viola Pedagogy—Supporting Area

Code	Title	Credits
MUE 528	Music for Early Childhood	3
MUE 530	Music Classroom Management (or other course approved by advisor)	3
MUE 559	Suzuki Pedagogy I	3
MUE 560	Suzuki Pedagogy II	3
MUE 561	Suzuki Pedagogy III	3
MUE 562	Suzuki Pedagogy IV	3
MUE 563	Pedagogy Methods: Violin and Viola	2
MUE 609	Practicum: [Topic] (six terms)	6
MUE 639	Pedagogy and Practicum: [Topic] (Violin/ Viola Pedagogy) ¹	3
Total Credits		29

¹ If primary area is string performance, not required.

Additional Requirement

A 90-minute public master class.

Wind Ensemble Conducting—Supporting Area

Code	Title	Credits
MUS 620	Bibliography in Instrumental Conducting	3
MUS 621–623	Wind Repertoire	9
MUS 624	Instrumental Conducting Laboratory (three terms)	6
MUE 639	Pedagogy and Practicum: [Topic] (Conducting)	3
MUS 695	Band: [Topic] (three terms)	6
Performance Studies, three terms ¹		6-12
Total Credits		33-39

¹ Performance Studies: Piano (MUP 611) through Performance Studies: Percussion (MUP 791).

Additional Requirement

A juried rehearsal and a juried conducting performance.

Program Requirements

Comprehensive Examinations

Written and oral comprehensive examinations in the primary and supporting areas are taken before advancement to candidacy but after meeting the following conditions:

1. Completion of core course work
2. Completion of all course work and additional requirements (e.g., recitals, CD recording, capstone presentation) in the examination area
3. Satisfaction of all general degree requirements (not mandatory if the supporting area exam is taken before the primary area exam)
4. Approval from area advisor

Additional information about comprehensive examinations is available from the music graduate office and the advisor.

Advancement to Candidacy

Advancement to candidacy is based on successful completion of comprehensive examinations, approval by the advisory committee of the dissertation or lecture-document proposal, and the recommendation of the advisor.

Dissertation

A dissertation is required in all doctoral degree programs except the DMA in performance, for which a lecture-document that focuses on some aspect of the performance medium may be substituted. Students in the DMA data-driven instruments track are required to complete a digital portfolio dissertation.

For candidates whose primary area is composition, the dissertation must be an original composition of major proportions composed during doctoral study and performed and recorded on the University of Oregon campus.

Time Limit

Doctoral students have seven years from the term of matriculation to complete the degree. All course work, the comprehensive examinations, any required recitals, and the dissertation must be satisfactorily completed before the end of the seven-year period. If this period is exceeded, an additional year of residence or a new set of comprehensive examinations or both are required.

Research (MUE or MUS 601), Dissertation (MUE or MUS 603), and Reading and Conference (MUE, MUJ, or MUS 605) are available during summer session only with advisor's consent.

Final Oral Defense

A final oral defense is required in all degree programs. The candidate is expected to defend the dissertation or lecture-document and show a command of the primary area. Members of the dissertation or lecture-document advisory committee typically conduct the final examination; their appointment is subject to approval by the dean of the Graduate School.

Graduate Certificate in Music Performance Requirements

The graduate certificate in music performance offers postbaccalaureate students the opportunity to focus deeply on performance studies outside the academic rigors of traditional graduate music degrees. Geared toward performing instrumentalists and singers who plan on full-time careers as soloists, chamber musicians, and/or large ensemble members, the one-year certificate program requires three terms of study in applied lessons, three terms of ensembles, one juried public recital, one regional outreach event, and minimal electives as approved by the student's advisor.

The graduate certificate is a one-year standalone program.

Applied lessons: 12 credits (4 credits each term for three terms, MUP 670–695). Applied lessons consist of one-on-one study with faculty specialists. The music school faculty includes 30 performance members. Students typically receive one hour of private instruction and one to two hours of studio class per week. Studio class includes peers in the same medium and provides the opportunity for weekly performances.

One large ensemble per term: 6 credits. Large ensembles at the music school that are eligible to candidates for the performance certificate include Symphony Orchestra, Oregon Wind Ensemble, Opera Workshop, University Singers, and Chamber Choir. These faculty-directed ensembles typically meet five to 10 hours per week and afford participants critical experience preparing and presenting repertoire invaluable to their future career paths.

One small ensemble per term: 3 credits. Small ensembles at the music school that are eligible to candidates for the performance certificate include Chamber Ensemble (typically two to six players, such as a string quartet) and Collegium Musicum, the study of music repertoire of the Medieval, Renaissance, and Baroque periods through rehearsals and extensive sight-reading of vocal and instrumental repertoire.

Electives, approved by the advisor: 6 credits. Music electives may be taken at the 500 level or above; if the student wishes to take 500- or 600-level theory or musicology courses, they must either pass the graduate music entrance exams or UO School of Music and Dance undergraduate courses as required.

Additional Requirements

- One juried public recital on the UO campus
- One community outreach event in the Northwest region

Code	Title	Credits
	Three terms of applied lessons (MUP 670 - 695)	12
	Three terms of large ensemble chosen from:	6
MUS 695	Band: [Topic] (Oregon Wind Ensemble)	
MUS 696	Orchestra: [Topic]	
MUS 697	Chorus: [Topic] (University Singers or Chamber Choir)	
MUS 698	Opera Workshop	
MUS 521–523	The Collaborative Pianist	
	Three terms of small ensemble chosen from:	3
MUS 694	Chamber Ensemble: [Topic]	
MUS 691	Collegium Musicum	
	Electives, approved by advisor	6

Electives must be taken at the 500 level or above; students who wish to take 500- or 600-level theory or musicology courses must either pass the graduate music entrance exams or SOMD undergraduate courses as required.

Total Credits

27

Music Education Courses

MUE 126. Orientation to Music Education. 1 Credit.

An orientation for first year music education majors, including an overview of music education philosophy and contemporary issues in music education. In addition, an exploration of career opportunities in music education and other fields will be covered.

MUE 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MUE 326. Foundations of Music Education. 3 Credits.

Professional orientation for prospective school music teachers; curricular, historical, philosophical, and social foundation of music education; ethical, professional, and social aspects of teaching; comprehensive field experience. Extra fee.

MUE 386. Teaching Laboratory I. 1 Credit.

Practice in teaching using microteaching techniques and music education methods in a laboratory setting.

Prereq: admission to music education. Coreq: MUE 442.

MUE 387. Teaching Laboratory I. 1 Credit.

Practice in teaching using microteaching techniques and music education methods in a laboratory setting.

Prereq: admission to music education. Coreq: MUS 484 or MUS 486.

MUE 388. Teaching Laboratory I. 1 Credit.

Practice in teaching using microteaching techniques and music education methods in a laboratory setting.

Prereq: admission to music education. Coreq: MUE 411 or MUE 413.

MUE 392. Instrumental Techniques: [Topic]. 1 Credit.

Repeatable. Elementary instruction in pedagogy and performance of various instruments. Sections in violin and cello, low brass, high brass, percussion, flute and clarinet, saxophone, oboe and bassoon, and voice. Instrument rental fee.

Prereq: admission to music education.

MUE 401. Research: [Topic]. 1-21 Credits.

Repeatable.

MUE 403. Thesis. 1-12 Credits.

Repeatable.

MUE 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable. Individual study of topics at a level above that available in the standard curriculum.

Prereq: completion of all regularly scheduled courses related to the topic or equivalent.

MUE 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

MUE 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Various advanced topics offered periodically according to student and faculty interest and availability.

MUE 408. Workshop: [Topic]. 1-21 Credits.

Repeatable. Various topics at a level above that available in the standard curriculum.

MUE 409. Practicum: [Topic]. 1-4 Credits.

Repeatable. Practical experience in guiding learning activities.

MUE 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MUE 411. Band Methods. 3 Credits.

Concerns of band teachers in secondary and elementary schools. Observations, procedures, and instructional materials; planning and teaching lessons for analysis and criticism. Sequence. Repeatable once for a maximum of 6 credits; admission to the MUP 300 level in primary instrument required.

Prereq: admission to music education major; admission to the MUP 300 level on primary instrument; MUE 392, MUS 486; coreq: MUE 388 or MUE 406.

MUE 412. Elementary Music Methods. 3 Credits.

Introduction to a variety of skills and techniques necessary for successful music teaching in elementary school settings. Laboratory fee.

Prereq: admission to music education; admission to the MUP 300 level; MUE 411, MUE 413; coreq: MUE 406, MUE 486.

MUE 413. Secondary Choral Methods. 3 Credits.

Secondary choral music curriculum, teaching methods, sight singing and music literacy, developing independent musicianship, philosophical and social foundation of vocal music education in the public schools.

Prereq: admission to music education major; admission to the MUP 300 level in voice or piano; MUS 484; coreq: MUE 388 or MUE 488.

MUE 420. Contemporary Methods. 3 Credits.

Study of contemporary methodologies used in planning and implementation of musical experiences for children in elementary school, including Dalcroze, Kodaly, Orff, and comprehensive musicianship. Laboratory fee.

Prereq: MUE 412, MUS 484.

MUE 428. Music for Early Childhood. 3 Credits.

Musical characteristics and abilities of preschool children. Suitable materials and musical experiences; techniques involving parents and children in a laboratory setting. Laboratory fee. Repeatable once for maximum of 6 credits.

MUE 429. Music in Special Education. 3 Credits.

Music for disabled or gifted learners. Educational and therapeutic uses of music for mentally, physically, and emotionally disabled as well as gifted learners.

MUE 430. Music Classroom Management. 3 Credits.

Techniques in classroom management; crises prevention and intervention; techniques for providing a safe and positive classroom environment; professional ethics and legal expectations. Repeatable twice for a maximum of 9 credits.

MUE 432. Music in School and Society. 3 Credits.

Elementary and secondary school music programs, past and present, and their relationships to the communities they serve.

MUE 438. Curricular Strategies in Music Education. 3 Credits.

Procedures for developing music courses for today's schools; determination of goals, content, instructional materials, and evaluative criteria; exploration of significant curriculum development projects in music education.

MUE 439. Orff-Schulwerk Pedagogy. 3 Credits.

This course is an enhanced pedagogy course designed to prepare preservice students on the elementary track for general music classroom. Students will study the Orff-Schulwerk teaching process; including preliminary play, imitation, exploration, and improvisation. Students will arrange and teach music following the Orff-Schulwerk harmonic sequence.

MUE 442. Teaching Singing in the Classroom. 3 Credits.

Methods for teaching group vocal technique in the classroom with emphasis on elementary, mid-level, and emerging adult voices. Concentration on development of the adolescent changing voice. Prereq: admission to music education; coreq: MUE 387.

MUE 455. Marching Band Methods. 3 Credits.

Teaching methods for secondary school marching bands.

MUE 456. String Methods. 3 Credits.

Teaching methods for the beginning string class in elementary and middle schools. Development of technique sequences for string groups in secondary schools.

MUE 459. Suzuki Pedagogy I. 3 Credits.

Development of skills for teaching beginning violin students and their parents using the Suzuki method, its philosophies, and Book I repertoire. Required observation and teaching assignment with Community Music Institute.

MUE 460. Suzuki Pedagogy II. 3 Credits.

Development of skills for teaching beginning violin students using the Suzuki method, its philosophies, and Book II repertoire; methods for introducing music-reading and basic ensemble skills. Prereq: MUE 459.

MUE 461. Suzuki Pedagogy III. 3 Credits.

Development of skills for teaching intermediate violin students using the Suzuki method, its philosophies, and Book III repertoire, as well as supplementary repertoire, etudes, and scale studies. Prereq: MUE 460.

MUE 462. Suzuki Pedagogy IV. 3 Credits.

Development of skills for teaching advanced intermediate violin students using the Suzuki method, its philosophies, and Book IV repertoire, as well as supplementary repertoire, etudes, and scale studies. Prereq: MUE 461.

MUE 463. Pedagogy Methods: Violin and Viola. 2 Credits.

Principles and techniques of violin and viola teaching selected from the pedagogical approaches of Flesch, Galamian, Dounis, Rolland.

MUE 471. Piano Pedagogy I: Teaching Beginners. 3 Credits.

In-depth study of beginning methods and materials for children and adults. Individual teaching experience. Offered alternating years.

MUE 472. Piano Pedagogy II: Teaching Groups. 2 Credits.

Methods and materials for group instruction of all ages and levels. Survey of learning theories and new technologies. Individual and group teaching experience. Offered alternating years. Prereq: MUE 471; coreq: MUE 409.

MUE 473. Piano Pedagogy III: Teaching Intermediate Levels. 2 Credits.

Study of repertoire, technique, and teaching methods appropriate for intermediate-level piano students. Individual and master-class teaching experience. Offered alternating years. Prereq: MUE 472; coreq: MUE 409.

MUE 486. Teaching Laboratory II. 1 Credit.

Practice in teaching using microteaching techniques and music education methods in a laboratory setting. Prereq: admission to music education.

MUE 491. Advanced Pedagogy: [Topic]. 3 Credits.

Sections in piano and other topics. Repeatable twice in different topics for maximum of 9 credits.

MUE 503. Thesis. 1-16 Credits.

Repeatable.

MUE 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Various advanced topics offered periodically according to student and faculty interest and availability.

MUE 508. Workshop: [Topic]. 1-21 Credits.

Repeatable. Various topics at a level above that available in the standard curriculum.

MUE 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MUE 511. Band Methods. 3 Credits.

Concerns of band teachers in secondary and elementary schools. Observations, procedures, and instructional materials; planning and teaching lessons for analysis and criticism. Sequence. Repeatable once for a maximum of 6 credits; admission to the MUP 300 level in primary instrument or voice required.

Prereq: admission to the MUP 300 level on primary instrument; MUE 392, MUS 486; coreq: MUE 388 or MUE 488.

MUE 512. Elementary Music Methods. 3 Credits.

Introduction to a variety of skills and techniques necessary for successful music teaching in elementary school settings. Laboratory fee.

Prereq: admission to music education; admission to the MUP 300 level; MUE 511, MUE 513; coreq: MUE 486, MUE 606.

MUE 513. Secondary Choral Methods. 3 Credits.

Secondary choral music curriculum, teaching methods, sight singing and music literacy, developing independent musicianship, philosophical and social foundation of vocal music education in the public schools.

Prereq: admission to the MUP 300 level in voice or piano; MUS 484/MUS 584; coreq: MUE 388 or MUE 488.

MUE 520. Contemporary Methods. 3 Credits.

Study of contemporary methodologies used in planning and implementation of musical experiences for children in elementary school, including Dalcroze, Kodaly, Orff, and comprehensive musicianship. Laboratory fee.

Prereq: MUE 412/MUE 512, MUS 484/MUS 584.

MUE 528. Music for Early Childhood. 3 Credits.

Musical characteristics and abilities of preschool children. Suitable materials and musical experiences; techniques involving parents and children in a laboratory setting. Laboratory fee. Repeatable once for maximum of 6 credits.

MUE 529. Music in Special Education. 3 Credits.

Music for disabled or gifted learners. Educational and therapeutic uses of music for mentally, physically, and emotionally disabled as well as gifted learners.

MUE 530. Music Classroom Management. 3 Credits.

Techniques in classroom management; crises prevention and intervention; techniques for providing a safe and positive classroom environment; professional ethics and legal expectations. Repeatable twice for a maximum of 9 credits.

MUE 532. Music in School and Society. 3 Credits.

Elementary and secondary school music programs, past and present, and their relationships to the communities they serve.

MUE 538. Curricular Strategies in Music Education. 3 Credits.

Procedures for developing music courses for today's schools; determination of goals, content, instructional materials, and evaluative criteria; exploration of significant curriculum development projects in music education.

MUE 542. Teaching Singing in the Classroom. 3 Credits.

Methods for teaching group vocal technique in the classroom with emphasis on elementary, mid-level, and emerging adult voices. Concentration on development of the adolescent changing voice. Prereq: admission to music education; coreq: MUE 386.

MUE 555. Marching Band Methods. 3 Credits.

Teaching methods for secondary school marching bands.

MUE 556. String Methods. 3 Credits.

Teaching methods for the beginning string class in elementary and middle schools. Development of technique sequences for string groups in secondary schools.

MUE 559. Suzuki Pedagogy I. 3 Credits.

Development of skills for teaching beginning violin students and their parents using the Suzuki method, its philosophies, and Book I repertoire. Required observation and teaching assignment with Community Music Institute.

MUE 560. Suzuki Pedagogy II. 3 Credits.

Development of skills for teaching beginning violin students using the Suzuki method, its philosophies, and Book II repertoire; methods for introducing music-reading and basic ensemble skills. Prereq: MUE 559; coreq: MUE 609 (Prac Community Music Institute).

MUE 561. Suzuki Pedagogy III. 3 Credits.

Development of skills for teaching intermediate violin students using the Suzuki method, its philosophies, and Book III repertoire, as well as supplementary repertoire, etudes, and scale studies. Prereq: MUE 560; coreq: MUE 609 (Community Music Institute Preparation).

MUE 562. Suzuki Pedagogy IV. 3 Credits.

Development of skills for teaching advanced intermediate violin students using the Suzuki method, its philosophies, and Book IV repertoire, as well as supplementary repertoire, etudes, and scale studies. Prereq: MUE 561.

MUE 563. Pedagogy Methods: Violin and Viola. 2 Credits.

Principles and techniques of violin and viola teaching selected from the pedagogical approaches of Flesch, Galamian, Dounis, Rolland.

MUE 571. Piano Pedagogy I: Teaching Beginners. 3 Credits.

In-depth study of beginning methods and materials for children and adults. Individual teaching experience. Offered alternate years.

MUE 572. Piano Pedagogy II: Teaching Groups. 2 Credits.

Methods and materials for group instruction of all ages and levels. Survey of learning theories and new technologies. Individual and group teaching experience. Offered alternate years. Prereq: MUE 471/MUE 571; coreq MUE 609

MUE 573. Piano Pedagogy III: Teaching Intermediate Levels. 2 Credits.

Study of repertoire, technique, and teaching methods appropriate for intermediate-level piano students. Individual and master-class teaching experience. Offered alternate years. Prereq: MUE 472/MUE 572; coreq: MUE 609.

MUE 591. Advanced Pedagogy. 3 Credits.

Sections in piano and other topics. Repeatable twice in different topics for maximum of 9 credits.

MUE 601. Research: [Topic]. 1-16 Credits.

Repeatable.

MUE 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

MUE 603. Dissertation. 1-16 Credits.

Repeatable.

MUE 605. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable. Individual study of topics beyond regularly scheduled courses.

Prereq: completion of all regularly scheduled courses related to the topic or equivalent.

MUE 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

MUE 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

MUE 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

MUE 609. Practicum: [Topic]. 1-4 Credits.

Repeatable. Professionally related experience, on campus or elsewhere, supervised by a qualified expert both in planning and in carrying out the project.

Prereq: knowledge and competence in the substance of the activity and in curricular planning.

MUE 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MUE 611. Qualitative Research in Music Education. 3 Credits.

An introduction to techniques of qualitative research in educational settings in music, with an emphasis on design and analysis, and with a critical review of current research studies in music education. The approaches to case study, ethnography, phenomenology, narrative and practitioner inquiry will be covered.

MUE 612. Quantitative Research in Music Education. 3 Credits.

A focus on quantitative methodology and research in music education, including an introduction to descriptive and inferential statistics. Terminology, methods, and concepts relating to peer-reviewed research will be explored. Students will also have the opportunity to carry out a study using quantitative methods.

MUE 639. Pedagogy and Practicum: [Topic]. 3 Credits.

Teaching strategies and practical application. Topics include composition, conducting, ethnomusicology, jazz studies, music education, music history, music technology, music theory, performance practice, instrumental conducting, voice, keyboard, strings, woodwinds, brass, and percussion. Repeatable twice when topic changes for maximum of 9 credits.

MUE 641. College Music Teaching. 3 Credits.

Developing knowledge, skills, and attitudes useful for teaching music; current principles of educational psychology at the college level, instructional techniques, tests and measurements.

MUE 647. Psychology of Music. 3 Credits.

Study of psychological, physiological, and neurological aspects of musical behavior and experience, including acoustics, human hearing, perception and cognition, development and expertise, affective response and preference, unusual abilities.

MUE 649. History of Western Music Education. 3 Credits.

A comprehensive overview of philosophical and historical foundations in music education from antiquity to the present day. It involves not only the study of music education from these perspectives, but general education and policy as well.

Prereq: Graduate Standing

Music: Jazz Studies Courses

MUJ 180. Jazz Performance Laboratory. 2 Credits.

Drills and practical application of scales, chords, harmonic progressions, rhythmic patterns, and approach-note groups for development of skills in small jazz ensembles.

MUJ 181. Jazz Performance Laboratory. 2 Credits.

Drills and practical application of scales, chords, harmonic progressions, rhythmic patterns, and approach-note groups for development of skills in small jazz ensembles.

Prereq: MUJ 180

MUJ 182. Jazz Performance Laboratory. 2 Credits.

Drills and practical application of scales, chords, harmonic progressions, rhythmic patterns, and approach-note groups for development of skills in small jazz ensembles.

Prereq: MUJ 181

MUJ 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MUJ 270. Jazz Theory. 2 Credits.

Introduction to jazz harmony: chord symbols, chord voicing practices, analysis, reharmonization practices, scale choices for improvisation, creation of bass lines.

MUJ 271. Functional Jazz Piano I. 2 Credits.

Performance of one- and two-handed comping style including common voice-leading practices, scales, and harmonic formulas. Reading from chord symbols and lead sheets. Sequence.

Prereq: MUJ 270.

MUJ 272. Functional Jazz Piano II. 2 Credits.

Performance of one- and two-handed comping style including common voice-leading practices, scales, and harmonic formulas. Reading from chord symbols and lead sheets. Sequence.

Prereq: MUJ 271.

MUJ 273. Jazz Improvisation I. 2 Credits.

Task-oriented performance of selected standard jazz repertoire. Chord and scale study, solo transcription, analysis, pattern practice, simple compositional forms.

Prereq: MUJ 270.

MUJ 274. Jazz Improvisation II. 2 Credits.

Task-oriented performance of selected standard jazz repertoire. Chord alteration, chord substitution, reharmonization and chromaticism.

Prereq: MUJ 273.

MUJ 350. History of Jazz, 1900–1950. 4 Credits.

History, biography, multiculturalism, and racism in early jazz and swing through modern jazz. Includes Louis Armstrong, Duke Ellington, Charlie Parker, Dizzy Gillespie, Miles Davis.

MUJ 351. History of Jazz, 1940 to Present. 4 Credits.

History, biography, multiculturalism, and racism in modern jazz and free jazz to present. Includes Charlie Parker, Dizzy Gillespie, Miles Davis, John Coltrane, Ornette Coleman.

MUJ 390. Jazz Laboratory Band III. 1 Credit.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Repeatable six times for a maximum of 7 credits. Ensemble fee.

MUJ 391. Jazz Laboratory Band II. 1 Credit.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Repeatable six times for a maximum of 7 credits. Ensemble fee.

MUJ 392. Oregon Jazz Ensemble. 1-2 Credits.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Ensemble fee.

Prereq: audition.

MUJ 395. Small Jazz Ensemble: [Topic]. 1-2 Credits.

Improvisation group. Study current and past small-group jazz performances. Repeatable six times for a maximum of 14 credits. Ensemble fee.

Prereq: audition.

MUJ 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MUJ 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable.

MUJ 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

MUJ 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

MUJ 474. Jazz Repertoire I. 3 Credits.

Development of professional performance skills in improvisation through the study of traditional jazz repertoire. Sequence.

Prereq: MUJ 274.

MUJ 475. Jazz Repertoire II. 3 Credits.

Development of professional performance skills in improvisation through the study of traditional jazz repertoire. Sequence.

Prereq: MUJ 474.

MUJ 476. Jazz Repertoire III. 3 Credits.

Development of professional performance skills in improvisation through the study of traditional jazz repertoire. Sequence.

Prereq: MUJ 475.

MUJ 477. Advanced Jazz Repertoire I. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Prereq: MUJ 476.

MUJ 478. Advanced Jazz Repertoire II. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Prereq: MUJ 477.

MUJ 479. Advanced Jazz Repertoire III. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Prereq: MUJ 478.

MUJ 480. Jazz Arranging I. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

Prereq: MUJ 272.

MUJ 481. Jazz Arranging II. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

Prereq: MUJ 480.

MUJ 482. Jazz Arranging III. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

Prereq: MUJ 481.

MUJ 483. Advanced Jazz Arranging I. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for senior degree recitals. Sequence.

Prereq: MUJ 482.

MUJ 484. Advanced Jazz Arranging II. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for senior degree recitals. Sequence.

Prereq: MUJ 483.

MUJ 485. Advanced Jazz Arranging III. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for senior degree recitals. Sequence.

Prereq: MUJ 484.

MUJ 503. Thesis. 1-16 Credits.

Repeatable.

MUJ 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

MUJ 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

MUJ 574. Jazz Repertoire I. 3 Credits.

Development of professional performance skills in improvisation through the study of traditional jazz repertoire. Sequence.

MUJ 575. Jazz Repertoire II. 3 Credits.

Development of professional performance skills in improvisation through the study of traditional jazz repertoire. Sequence.

Prereq: MUJ 474/MUJ 574.

MUJ 576. Jazz Repertoire III. 3 Credits.

Development of professional performance skills in improvisation through the study of traditional jazz repertoire. Sequence.

Prereq: MUJ 475/MUJ 575.

MUJ 577. Advanced Jazz Repertoire I. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Prereq: MUJ 476/MUJ 576.

MUJ 578. Advanced Jazz Repertoire II. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Prereq: MUJ 477/MUJ 577.

MUJ 579. Advanced Jazz Repertoire III. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Prereq: MUJ 478/MUJ 578.

MUJ 580. Jazz Arranging I. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

MUJ 581. Jazz Arranging II. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

Prereq: MUJ 480/MUJ 580.

MUJ 582. Jazz Arranging III. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

Prereq: MUJ 481/MUJ 581.

MUJ 583. Advanced Jazz Arranging I. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for graduate degree recitals. Sequence.

Prereq: MUJ 482/MUJ 582.

MUJ 584. Advanced Jazz Arranging II. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for graduate degree recitals. Sequence.

Prereq: MUJ 483/MUJ 583.

MUJ 585. Advanced Jazz Arranging III. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for graduate degree recitals. Sequence.

Prereq: MUJ 484/MUJ 584.

MUJ 605. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable.

MUJ 660. Survey of Jazz Composition. 3 Credits.

Overview of important developments and historically significant figures in jazz composition and arranging. Analysis of their music and stylistic traits.

MUJ 661. Jazz Program Planning and Development. 3 Credits.

Designing and nurturing a successful jazz program. Jazz curriculum, grant writing, budgets, resources, organizing student support, setting and reaching program goals.

MUJ 690. Jazz Laboratory Band III. 1 Credit.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Repeatable six times for a maximum of 7 credits. Ensemble fee.

MUJ 691. Jazz Laboratory Band II. 1 Credit.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Repeatable six times for a maximum of 7 credits. Ensemble fee.

MUJ 692. Oregon Jazz Ensemble. 1-2 Credits.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Ensemble fee.

MUJ 695. Small Jazz Ensemble: [Topic]. 1-2 Credits.

Improvisation group. Study current and past small-group jazz performances. Repeatable six times for a maximum of 14 credits. Ensemble fee.

Music Performance Courses**MUP 100. Beginning Class Piano. 2 Credits.**

Beginning-level group instruction for students with little or no previous training. Repeatable once for maximum of 4 credits.

MUP 101. Basic Performance Studies: Voice. 2 Credits.

Beginning-level group instruction for students with little or no previous training. Repeatable twice for maximum of 6 credits.

MUP 102. Basic Performance Studies: Strings. 2 Credits.

Beginning-level individual instruction for students with little or no previous training. Repeatable twice for maximum of 6 credits.

MUP 103. Basic Performance Studies: Woodwinds. 2 Credits.

Beginning-level individual instruction for students with little or no previous training. Repeatable twice for maximum of 6 credits.

Prereq: Audition.

MUP 104. Basic Performance Studies: Brass. 2 Credits.

Beginning-level individual instruction for students with little or no previous training. Repeatable twice for maximum of 6 credits.

Prereq: Audition.

MUP 110. Basic Performance Studies: Classical Guitar. 2 Credits.

Studio Instruction. Repeatable twice for maximum of 6 credits.

Prereq: Audition.

MUP 112. Intermediate Class Piano. 2 Credits.

Continuing group instruction for students who completed MUP 100 or have previous piano experience. Repeatable once for a maximum of 4 credits. Series with MUP 100.

MUP 120. Beginning Guitar I. 3 Credits.

Beginning-level group instruction in the fundamentals of guitar playing, song accompaniment, ensemble playing, reading music, basic music theory, and practice skills. Students must provide own instruments.

Repeatable twice for maximum of 9 credits.

MUP 121. Beginning Guitar II. 3 Credits.

Continued study of topics in MUP 120 with emphasis on chord voicings, finger-style playing, and arranging. Requires music reading and barre-chord skills. Group instruction. Students must provide own instruments.

Repeatable twice for maximum of 9 credits.

Prereq: MUP 120.

MUP 131. Performance Studies: Piano. 2-4 Credits.

Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition

MUP 140. Performance Studies: Voice. 2-4 Credits.

Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 141. Performance Studies: Piano. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 142. Performance Studies: Harpsichord. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 143. Performance Studies: Organ. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 145. Performance Studies: Violin. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 146. Performance Studies: Viola. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 147. Performance Studies: Cello. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 148. Performance Studies: Bass. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 149. Performance Studies: Harp. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 150. Performance Studies: Guitar. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 151. Performance Studies: Flute. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 152. Performance Studies: Oboe. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 153. Performance Studies: Clarinet. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 154. Performance Studies: Saxophone. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 155. Performance Studies: Bassoon. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 156. Performance Studies: Trumpet. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 157. Performance Studies: French Horn. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 158. Performance Studies: Trombone. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 159. Performance Studies: Euphonium. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.

Prereq: Audition.

MUP 160. Performance Studies: Tuba. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.
Prereq: Audition.

MUP 161. Performance Studies: Percussion. 2-4 Credits.

Repeatable. Studio instruction in performance for students with minimal previous training. Repeatable eleven times for maximum of 48 credits.
Prereq: Audition; coreq: MUS 394 Percussion Ensemble.

MUP 163. Functional Piano. 2 Credits.

Group instruction in functional keyboard skills. Repeatable twice for maximum of 6 credits.
Prereq: MUS 138.

MUP 171. Performance Studies: Piano. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 172. Performance Studies: Harpsichord. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 173. Performance Studies: Organ. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 174. Performance Studies: Voice. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 175. Performance Studies: Violin. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 176. Performance Studies: Viola. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 177. Performance Studies: Cello. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 178. Performance Studies: Bass. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 179. Performance Studies: Harp. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 180. Performance Studies: Guitar. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 181. Performance Studies: Flute. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 182. Performance Studies: Oboe. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 183. Performance Studies: Clarinet. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 184. Performance Studies: Saxophone. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 185. Performance Studies: Bassoon. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 186. Performance Studies: Trumpet. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 187. Performance Studies: French Horn. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 188. Performance Studies: Trombone. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 189. Performance Studies: Euphonium. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 190. Performance Studies: Tuba. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition.

MUP 191. Performance Studies: Percussion. 2-4 Credits.

Repeatable. Studio Instruction.
Prereq: Audition; coreq: MUS 394 Percussion Ensemble.

MUP 199. Special Studies: [Topic]. 1-5 Credits.

Recent topics include Breathing Technique and Tuba-Euphonium Routine.

MUP 241. Performance Studies: Piano. 2-4 Credits.

Studio instruction. Repeatable six times for a maximum of 24 credits.
Prereq: Audition to demonstrate proficiency equivalent to completion of 100 level.

MUP 271. Performance Studies: Piano. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to demonstrate proficiency equivalent to completion of 100 level.

MUP 272. Performance Studies: Harpsichord. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to demonstrate proficiency equivalent to completion of 100 level.

MUP 273. Performance Studies: Organ. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to demonstrate proficiency equivalent to completion of 100 level.

MUP 274. Performance Studies: Voice. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to demonstrate proficiency equivalent to completion of 100 level.

MUP 275. Performance Studies: Violin. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to demonstrate proficiency equivalent to completion of 100 level.

MUP 276. Performance Studies: Viola. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to demonstrate proficiency equivalent to completion of 100 level.

MUP 277. Performance Studies: Cello. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to demonstrate proficiency equivalent to completion of 100 level.

MUP 355. Performance Studies: Bassoon. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of 200 level; coreq for majors: enroll in major ensemble.

MUP 356. Performance Studies: Trumpet. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of 200 level; coreq for majors: enroll in major ensemble.

MUP 357. Performance Studies: French Horn. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of 200 level; coreq for majors: enroll in major ensemble.

MUP 358. Performance Studies: Trombone. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of 200 level; coreq for majors: enroll in major ensemble.

MUP 359. Performance Studies: Euphonium. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of 200 level; coreq for majors: enroll in major ensemble.

MUP 360. Performance Studies: Tuba. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of 200 level; coreq for majors: enroll in major ensemble.

MUP 361. Performance Studies: Percussion. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of 200- level; coreq: MUS 394 Percussion Ensemble; additional coreq for majors: enroll in major ensemble.

MUP 362. Performance Studies: [Topic]. 1-5 Credits.

Recent topics include Baroque Cello, Jazz Improvisation, Jazz Composition. Repeatable five times when topic changes for a maximum of 30 credits.

MUP 371. Performance Studies: Piano. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 271; coreq for majors: enroll in major ensemble.

MUP 372. Performance Studies: Harpsichord. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 272; coreq for majors: enroll in major ensemble.

MUP 373. Performance Studies: Organ. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 273; coreq for majors: enroll in major ensemble.

MUP 374. Performance Studies: Voice. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 274; coreq for majors: enroll in major ensemble.

MUP 375. Performance Studies: Violin. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 275; coreq for majors: enroll in major ensemble.

MUP 376. Performance Studies: Viola. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 276; coreq for majors: enroll in major ensemble.

MUP 377. Performance Studies: Cello. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 277; coreq for majors: enroll in major ensemble.

MUP 378. Performance Studies: Bass. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 278; coreq for majors: enroll in major ensemble.

MUP 379. Performance Studies: Harp. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 279; coreq for majors: enroll in major ensemble.

MUP 380. Performance Studies: Guitar. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 280; coreq for majors: enroll in major ensemble.

MUP 381. Performance Studies: Flute. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 281; coreq for majors: enroll in major ensemble.

MUP 382. Performance Studies: Oboe. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 282; coreq for majors: enroll in major ensemble.

MUP 383. Performance Studies: Clarinet. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 283; coreq for majors: enroll in major ensemble.

MUP 384. Performance Studies: Saxophone. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 284; coreq for majors: enroll in major ensemble.

MUP 385. Performance Studies: Bassoon. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 285; coreq for majors: enroll in major ensemble.

MUP 386. Performance Studies: Trumpet. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 286; coreq for majors: enroll in major ensemble.

MUP 387. Performance Studies: French Horn. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 287; coreq for majors: enroll in major ensemble.

MUP 388. Performance Studies: Trombone. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 288; coreq for majors: enroll in major ensemble.

MUP 389. Performance Studies: Euphonium. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 289; coreq for majors: enroll in major ensemble.

MUP 390. Performance Studies: Tuba. 2-4 Credits.

Studio instruction. Repeatable six times.

Prereq: Audition to demonstrate proficiency equivalent to completion of MUP 290; coreq for majors: enroll in major ensemble.

MUP 647. Performance Studies: Cello. 2-4 Credits.

Repeatable. Studio instruction. Repeatable for maximum of 12 credits.
Prereq: Audition to demonstrate proficiency required for admission to MUP 347 or MUP 377; coreq for majors: enroll in major ensemble.

MUP 648. Performance Studies: Bass. 2-4 Credits.

Repeatable. Studio instruction. Repeatable for maximum of 12 credits.
Prereq: Audition to demonstrate proficiency required for admission to MUP 348 or MUP 378; coreq for majors: enroll in major ensemble.

MUP 649. Performance Studies: Harp. 2-4 Credits.

Repeatable. Studio instruction. Repeatable for maximum of 12 credits.
Prereq: Audition to demonstrate proficiency required for admission to MUP 349 or MUP 379; coreq for majors: enroll in major ensemble.

MUP 651. Performance Studies: Flute. 2-4 Credits.

Repeatable. Studio instruction. Repeatable for maximum of 12 credits.
Prereq: Audition to demonstrate proficiency required for admission to MUP 351 or MUP 381; coreq for majors: enroll in major ensemble.

MUP 652. Performance Studies: Oboe. 2-4 Credits.

Repeatable. Studio instruction. Repeatable for maximum of 12 credits.
Prereq: Audition to demonstrate proficiency required for admission to MUP 352 or MUP 382; coreq for majors: enroll in major ensemble.

MUP 653. Performance Studies: Clarinet. 2-4 Credits.

Repeatable. Studio instruction. Repeatable for maximum of 12 credits.
Prereq: Audition to demonstrate proficiency required for admission to MUP 353 or MUP 383; coreq for majors: enroll in major ensemble.

MUP 654. Performance Studies: Saxophone. 2-4 Credits.

Repeatable. Studio instruction. Repeatable for maximum of 12 credits.
Prereq: Audition to demonstrate proficiency required for admission to MUP 354 or MUP 384; coreq for majors: enroll in major ensemble.

MUP 655. Performance Studies: Bassoon. 2-4 Credits.

Repeatable. Studio instruction. Repeatable for maximum of 12 credits.
Prereq: Audition to demonstrate proficiency required for admission to MUP 355 or MUP 385; coreq for majors: enroll in major ensemble.

MUP 656. Performance Studies: Trumpet. 2-4 Credits.

Repeatable. Studio instruction. Repeatable for maximum of 12 credits.
Prereq: Audition to demonstrate proficiency required for admission to MUP 356 or MUP 386; coreq for majors: enroll in major ensemble.

MUP 657. Performance Studies: French Horn. 2-4 Credits.

Repeatable. Studio instruction. Repeatable for maximum of 12 credits.
Prereq: Audition to demonstrate proficiency required for admission to MUP 356 or MUP 386; coreq for majors: enroll in major ensemble.

MUP 658. Performance Studies: Trombone. 2-4 Credits.

Repeatable. Studio instruction. Repeatable for maximum of 12 credits.
Prereq: Audition to demonstrate proficiency required for admission to MUP 358 or MUP 388; coreq for majors: enroll in major ensemble.

MUP 659. Performance Studies: Euphonium. 2-4 Credits.

Repeatable. Studio instruction. Repeatable for maximum of 12 credits.
Prereq: Audition to demonstrate proficiency required for admission to MUP 359 or MUP 389; coreq for majors: enroll in major ensemble.

MUP 660. Performance Studies: Tuba. 2-4 Credits.

Repeatable. Studio instruction. Repeatable for maximum of 12 credits.
Prereq: Audition to demonstrate proficiency required for admission to MUP 360 or MUP 390; coreq for majors: enroll in major ensemble.

MUP 661. Performance Studies: Percussion. 2-4 Credits.

Repeatable. Studio instruction. Repeatable for maximum of 12 credits.
Prereq: Audition to demonstrate proficiency required for admission to MUP 361 or MUP 392; coreq: MUS 694 Percussion Ensemble; additional coreq for majors: enroll in major ensemble.

MUP 662. Advanced Performance Studies: [Topic]. 1-5 Credits.

Recent topics include Baroque Cello, Jazz Improvisation, Jazz Composition. Repeatable five times when topic changes for a maximum of 30 credits.

MUP 670. Performance Studies: Piano Accompanying. 2-4 Credits.

Repeatable. Studio instruction. Concentration on vocal and instrumental repertoire. Repeatable six times.
Prereq: Audition to master's level.

MUP 671. Performance Studies: Piano. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 672. Performance Studies: Harpsichord. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 673. Performance Studies: Organ. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 674. Performance Studies: Voice. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 675. Performance Studies: Violin. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 676. Performance Studies: Viola. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 677. Performance Studies: Cello. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 678. Performance Studies: Bass. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 679. Performance Studies: Harp. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 681. Performance Studies: Flute. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 682. Performance Studies: Oboe. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 683. Performance Studies: Clarinet. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 684. Performance Studies: Saxophone. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 685. Performance Studies: Bassoon. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 686. Performance Studies: Trumpet. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 687. Performance Studies: French Horn. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 688. Performance Studies: Trombone. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 689. Performance Studies: Euphonium. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 690. Performance Studies: Tuba. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 691. Performance Studies: Percussion. 2-4 Credits.

Repeatable. Studio instruction. Repeatable six times.
Prereq: Audition to master's level.

MUP 741. Performance Studies: Piano. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 742. Performance Studies: Harpsichord. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 743. Performance Studies: Organ. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 744. Performance Studies: Voice. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 745. Performance Studies: Violin. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 746. Performance Studies: Viola. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 747. Performance Studies: Cello. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 748. Performance Studies: Bass. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 749. Performance Studies: Harp. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 751. Performance Studies: Flute. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 752. Performance Studies: Oboe. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 753. Performance Studies: Clarinet. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 754. Performance Studies: Saxophone. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 755. Performance Studies: Bassoon. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 756. Performance Studies: Trumpet. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 757. Performance Studies: French Horn. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 758. Performance Studies: Trombone. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 759. Performance Studies: Euphonium. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 760. Performance Studies: Tuba. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 761. Performance Studies: Percussion. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral supporting level.

MUP 769. Performance Studies: Data-Driven Instruments. 2-4 Credits.

Examines how recent technology can be performed in real time to actuate and control musical outcomes. Repeatable 11 times.
Prereq: Audition to doctoral primary area.

MUP 770. Performance Studies: Collaborative Piano. 2-4 Credits.

Studio instruction. Concentration of vocal and instrumental repertoire. Repeatable 11 times.
Prereq: Audition to doctoral primary area.

MUP 771. Performance Studies: Piano. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral primary area.

MUP 774. Performance Studies: Voice. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral primary area.

MUP 775. Performance Studies: Violin. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral primary area.

MUP 776. Performance Studies: Viola. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral primary area.

MUP 777. Performance Studies: Cello. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral primary area.

MUP 781. Performance Studies: Flute. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral primary area.

MUP 782. Performance Studies: Oboe. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral primary area.

MUP 783. Performance Studies: Clarinet. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.
Prereq: Audition to doctoral primary area.

MUP 784. Performance Studies: Saxophone. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.

Prereq: Audition to doctoral primary area.

MUP 785. Performance Studies: Bassoon. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.

Prereq: Audition to doctoral primary area.

MUP 786. Performance Studies: Trumpet. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.

Prereq: Audition to doctoral primary area.

MUP 787. Performance Studies: French Horn. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.

Prereq: Audition to doctoral primary area.

MUP 788. Performance Studies: Trombone. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.

Prereq: Audition to doctoral primary area.

MUP 789. Performance Studies: Euphonium. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.

Prereq: Audition to doctoral primary area.

MUP 790. Performance Studies: Tuba. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.

Prereq: Audition to doctoral primary area.

MUP 791. Performance Studies: Percussion. 2-4 Credits.

Repeatable. Studio instruction. Repeatable 11 times.

Prereq: Audition to doctoral primary area.

Music Courses

MUS 125. Understanding Music. 4 Credits.

Presents the basic elements of music, historical style periods of Western art music, development of jazz and popular music.

MUS 126. Music Theory Fundamentals. 3 Credits.

Introduction to musical notation and basic musical elements, such as staves, clefs, rhythmic values, scales, and chords. Requires no musical background.

MUS 131. Music Theory I. 2 Credits.

Elementary study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence. Coreq: MUS 134, MUS 137.

MUS 132. Music Theory II. 2 Credits.

Elementary study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence. Prereq: MUS 131, MUS 134, MUS 137, or satisfactory placement test score.

MUS 133. Music Theory III. 2 Credits.

Elementary study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence. Prereq: MUS 132, MUS 135, MUS 138, or satisfactory placement test score.

MUS 134. Aural Skills I. 2 Credits.

Elementary ear training through sight singing, dictation, and related activities. Sequence.

Coreq: MUS 131, MUS 137.

MUS 135. Aural Skills II. 2 Credits.

Elementary ear training through sight singing, dictation, and related activities. Sequence.

Prereq: MUS 131, MUS 134, MUS 137 or satisfactory placement test score.

MUS 136. Aural Skills III. 2 Credits.

Elementary ear training through sight singing, dictation, and related activities. Sequence.

Prereq: MUS 132, MUS 135, MUS 138 or satisfactory placement test score.

MUS 137. Keyboard Skills I. 1 Credit.

Performance of rhythmic patterns, scales, intervals, and chord progressions. Harmonization, transposition, improvisation, and figured bass on the keyboard. Sequence. Keyboard lab fee.

Coreq MUS 131, MUS 134.

MUS 138. Keyboard Skills II. 1 Credit.

Performance of rhythmic patterns, scales, intervals, and chord progressions. Harmonization, transposition, improvisation, and figured bass on the keyboard. Sequence. Keyboard lab fee.

Prereq: MUS 131, MUS 134, MUS 137 or satisfactory placement test score.

MUS 139. Keyboard Skills III. 1 Credit.

Performance of rhythmic patterns, scales, intervals, and chord progressions. Harmonization, transposition, improvisation, and figured bass on the keyboard. Sequence. Keyboard lab fee.

Prereq: MUS 132, MUS 135, MUS 138 or satisfactory placement test score.

MUS 141. Popular Piano and Musicianship I. 4 Credits.

Understanding general musicianship—what it is and how it relates to genre and culture—in popular music. Sequence with MUS 142, MUS 143.

MUS 142. Popular Piano and Musicianship II. 4 Credits.

Continuing study of musicianship—integrated music theory, ear training, and piano—through piano instruction in popular music styles. Sequence with MUS 141, MUS 143.

Prereq: MUS 141.

MUS 143. Popular Piano and Musicianship III. 4 Credits.

Continuing study of musicianship—integrated music theory, ear training, and piano—through piano instruction in popular music styles. Sequence with MUS 141, MUS 142.

Prereq: MUS 142.

MUS 151. Popular Songwriting. 4 Credits.

Composing and producing songs using software applications and studying historical examples to understand how musical techniques reflect societal trends and express ideas. Music background optional. Laboratory fee.

MUS 155. Introduction to Lyric Diction. 2 Credits.

Introduction to pronunciation of standard languages for students pursuing careers related to singing. The International Phonetic Alphabet is applied to the texts of simple repertoire. English, Italian, Spanish. Sequence.

Coreq: MUP 174 or above, Voice.

MUS 156. Introduction to Lyric Diction. 2 Credits.

Introduction to pronunciation of standard languages for students pursuing careers related to singing. The International Phonetic Alphabet is applied to the texts of simple repertoire. German, French. Sequence.

Prereq: MUS 155; coreq: MUP 174 or above, Voice.

MUS 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

MUS 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MUS 227. Elements of Electronic Music. 4 Credits.

Introduction to experimental and popular electronic music. Topics include fundamental elements of musical construction, history, technology, composers, musicians, copyright law, sampling, styles, and aesthetics.

MUS 231. Music Theory IV. 2 Credits.

Study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence.

Prereq: MUS 133, MUS 136, MUS 139 or satisfactory placement test score

MUS 232. Music Theory V. 2 Credits.

Study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence.

Prereq: MUS 231 or satisfactory placement test score.

MUS 233. Music Theory VI. 2 Credits.

Study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence.

Prereq: MUS 232 or satisfactory placement test score.

MUS 234. Aural Skills IV. 2 Credits.

Ear training through sight singing, dictation, and related activities. Sequence.

Prereq: MUS 133, MUS 136, MUS 139 or satisfactory placement test score.

MUS 235. Aural Skills V. 2 Credits.

Ear training through sight singing, dictation, and related activities. Sequence.

Prereq: MUS 234 or satisfactory placement test score.

MUS 236. Aural Skills VI. 2 Credits.

Ear training through sight singing, dictation, and related activities. Sequence.

Prereq: MUS 235.

MUS 237. Keyboard Skills IV. 1 Credit.

Performance of rhythmic patterns, scales, intervals, and chord progressions. Harmonization, transposition, improvisation, and figured bass on the keyboard. Sequence. Keyboard lab fee.

Prereq: MUS 133, MUS 136, MUS 139 or equivalent.

MUS 238. Keyboard Skills V. 1 Credit.

Performance of rhythmic patterns, scales, intervals, and chord progressions. Harmonization, transposition, improvisation, and figured bass on the keyboard. Sequence. Keyboard lab fee.

Prereq: MUS 237.

MUS 239. Keyboard Skills VI. 1 Credit.

Performance of rhythmic patterns, scales, intervals, and chord progressions. Harmonization, transposition, improvisation, and figured bass on the keyboard. Sequence. Keyboard lab fee.

Prereq: MUS 238.

MUS 240. Composition I. 3 Credits.

Introduction to musical composition. Problems of notation, scoring for instruments, basic concepts of form; contemporary techniques; emphasis on student's own beginning creative work. Sequence.

Prereq: MUS 133, MUS 136, MUS 139 or equivalent.

MUS 241. Composition I. 3 Credits.

Introduction to musical composition. Problems of notation, scoring for instruments, basic concepts of form; contemporary techniques; emphasis on student's own beginning creative work. Sequence.

Prereq: MUS 240.

MUS 242. Composition I. 3 Credits.

Introduction to musical composition. Problems of notation, scoring for instruments, basic concepts of form; contemporary techniques; emphasis on student's own beginning creative work. Sequence.

Prereq: MUS 241.

MUS 250. Popular Musics in Global Context. 4 Credits.

Surveys the global popular music landscape of the 20th and 21st centuries, with an emphasis on identity and cultural mixture.

MUS 264. Rock History, 1950–70. 4 Credits.

Evolution of rock emphasizing musical style and social context. Roots of rock through the British Invasion.

MUS 265. Rock History, 1965 to Present. 4 Credits.

Evolution of rock emphasizing musical style and social context.

Psychedelic rock to early rap music.

MUS 267. Survey of Music History. 4 Credits.

Study of the history and evolution of music, principally Western art music, from the early Middle Ages to the present.

Prereq: WR 121.

MUS 268. Survey of Music History. 4 Credits.

Study of the history and evolution of music, principally Western art music, from the early Middle Ages to the present.

Prereq: WR 121.

MUS 269. Survey of Music History. 4 Credits.

Study of the history and evolution of music, principally Western art music, from the early Middle Ages to the present.

Prereq: WR 121.

MUS 270. History of the Blues. 4 Credits.

Traces blues music from its African and African American roots through its 20th-century history and its influence on the values of jazz, rhythm and blues, and country music.

MUS 281. Music of the Woodstock Generation. 4 Credits.

Examines the relationship between popular music and social upheavals in the United States during the 1960s.

MUS 322. Music Fundamentals. 3 Credits.

Music notation and terminology; learning musical rudiments through singing simple songs; introduction to simple melodic, rhythmic, and harmonic instruments. Laboratory fee. Educational foundations majors only.

MUS 327. Analysis: [Topic]. 3 Credits.

Techniques of analysis in various types of music. Repeatable when topic changes.

Prereq: MUS 233, MUS 236, MUS 239.

MUS 340. Composition II. 3 Credits.

Composition and public performance of small works for piano, voice, and small ensembles.

Prereq: MUS 242 or equivalent.

MUS 341. Composition II. 3 Credits.

Composition and public performance of small works for piano, voice, and small ensembles.

Prereq: MUS 340.

MUS 342. Composition II. 3 Credits.

Composition and public performance of small works for piano, voice, and small ensembles.

Prereq: MUS 341.

MUS 345M. Music, Politics, and Race. 4 Credits.

Examines a variety of musical forms and their relationship to histories of racial and social justice, inequality, and political movements. Offered alternate years. Multilisted with ES 345M.

MUS 346. Music, Money, and the Law. 4 Credits.

Explores theory and history of relationship between money and music, and corresponding laws that govern and shape that relationship. Topics include copyright, contract rights, media distribution technology, marketing, unions.

MUS 347. Music, Gender, Sexuality. 4 Credits.

Focuses on the intersections of gender, sexuality, race, and identity in popular music and the Western classical canon.

MUS 349. American Ethnic and Protest Music. 3 Credits.

Social change and ethnicity reflected by music of and about Native Americans, African Americans, and women as well as songs of protest and Spanish-speaking groups.

MUS 351. The Music of Bach and Handel. 4 Credits.

Compositions by Bach and Handel such as organ chorales, cantatas, oratorios, operas, and masses; cultural context in Germany, France, Italy, and England for the development of their styles.

MUS 356. Innovative Jazz Musicians: [Topic]. 4 Credits.

Covers one or two innovative and influential jazz musicians per term. Examines issues of history, biography, multiculturalism, racism, and critical reception. Repeatable twice when topic changes for maximum of 12 credits.

MUS 358. Music in World Cultures. 4 Credits.

Explores the music of three world regions in their sociocultural context. Emphasis on listening skills, relationships between music and culture, aesthetics, styles, genres, music structures and forms, and participatory music making.

MUS 359. Music of the Americas. 4 Credits.

African American, Latin American, and Native American music in sociocultural context. Includes listening skills, music-culture relationship, aesthetics, styles, genres, music structures and forms, and participatory music making.

MUS 360. Hip-Hop Music: History, Culture, Aesthetics. 4 Credits.

Examines the history and evolution of hip-hop and rap music in the late 20th and early 21st centuries.

MUS 363. The Beatles and Their Times. 4 Credits.

Presents and examines the music of the Beatles in the context of post-World War II English and United States cultures and 1960s Western youth cultures.

MUS 365. Regional Ethnomusicology: [Topic]. 4 Credits.

Students analyze the music and dance of a specified geographic region in relation to its culture. Covers local performance and genres, social constructions. Repeatable twice for a maximum of 12 credits when geographic region changes.

MUS 367. Survey of African Music. 4 Credits.

Students analyze musical expression—including traditional, neotraditional, and contemporary mass mediated popular music (Afropop)—in Africa and the diaspora.

MUS 380. Film: Drama, Photography, Music. 4 Credits.

Understanding the manner in which drama, photography, and music combine to form the whole through extensive viewing and analysis.

MUS 382. American Musical Theater. 4 Credits.

Students analyze selected American musicals in relation to social conditions and events at different junctures in the 19th, 20th, and 21st centuries. Offered alternate years.

MUS 384. Introduction to Conducting. 2 Credits.

Introduction to conducting with emphasis on the art and study of conducting, baton and left-hand technique, nonverbal communication, leadership, terminology, transpositions, and score reading. Prereq: MUS 233, MUS 236, MUS 239.

MUS 391. Collegium Musicum. 1-3 Credits.

Study of music repertoire of the medieval, Renaissance, and baroque periods through rehearsals and extensive sight-reading; vocal and instrumental repertoire. Ensemble fee. Prereq: audition.

MUS 393. Oregon Electronic Device Orchestra. 2 Credits.

Performance ensemble that uses data-driven musical instruments in combination with software and hardware to perform music and intermedia compositions. Repeatable eleven times for a maximum of 24 credits. Prereq: MUS 447 or MUS 448.

MUS 394. Chamber Ensemble: [Topic]. 1-2 Credits.

Participation in a chamber music ensemble. Accompanying, Brass, Chamber Ensemble, Hip-Hop Ensemble, Jazz Guitar Ensemble, Oregon Percussion Ensemble, String Chamber Ensemble, Studio Guitar Ensemble, Trombone Ensemble, Tuba and Euphonium Ensemble, Woodwind Chamber Ensemble. Repeatable 11 times for a maximum of 24 credits.

Prereq: Audition for certain of the chamber ensembles listed above, per instructor. No audition for Brass Chamber Ensemble, String Chamber Ensemble, or Woodwind Chamber Ensemble.

MUS 395. Band: [Topic]. 1-2 Credits.

Participation in a band. Green Garter Band, Oregon Basketball Band, Oregon Marching Band, Oregon Wind Ensemble, UO Campus Band, Oregon Wind Symphony, Yellow Garter Band. Ensemble fee for Oregon Wind Ensemble, Oregon Wind Symphony, UO Campus Band. Repeatable 11 times for a maximum of 24 credits. Prereq: audition (except UO Campus Band and Oregon Marching Band).

MUS 396. Orchestra: [Topic]. 1-2 Credits.

Participation in an orchestra. University Symphony Orchestra, Campus Orchestra. Ensemble fee. Repeatable 11 times for a maximum of 24 credits.

Prereq: audition (except Campus Orchestra).

MUS 397. Chorus: [Topic]. 2 Credits.

Participation in a choral ensemble. Chamber Choir, Concert Choir, Gospel Singers, Repertoire Singers, University Gospel Choir, University Gospel Ensemble, University Singers, Women's Choir. Ensemble fee. Repeatable 11 times for a maximum of 24 credits.

Prereq: audition or voice screening (except Concert Choir and Gospel Choir).

MUS 398. Opera Workshop. 2 Credits.

Repeatable. Traditional and contemporary repertory for musical theater through analysis, rehearsal, and performance of complete and excerpted works; training in stage movement, diction, and rehearsal techniques. Prereq: audition.

MUS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MUS 401. Research: [Topic]. 1-21 Credits.

Repeatable.

MUS 403. Thesis. 1-12 Credits.

Repeatable.

MUS 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable. Individual study of topics agreed upon by the student and faculty adviser.

Prereq: completion of all regularly scheduled courses related to the topic or equivalent.

MUS 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Various topics at an advanced level, offered periodically according to student and faculty interest and availability.

MUS 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

MUS 409. Supervised Tutoring. 1-21 Credits.

Repeatable.

MUS 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Recent courses include Meditation for Performers and Andean Music Ensemble.

MUS 416. Post-Tonal Theory I. 3 Credits.

Introduction to theory and analysis of post-tonal music. Concepts of pitch-class set analysis and practical applications. Sequence. Offered alternate years.

Prereq: MUS 327.

MUS 417. Post-Tonal Theory II. 3 Credits.

Introduction to theory and analysis of post-tonal music. Concepts of pitch-class set analysis and practical applications. Sequence. Offered alternate years.

Prereq: MUS 416.

MUS 421. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence. Repeatable once each for maximum of 4 credits per course.

Prereq: MUP 271 or above.

MUS 422. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence. Repeatable once each for maximum of 4 credits per course.

Prereq: MUS 421.

MUS 423. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence. Repeatable once each for maximum of 4 credits per course.

Prereq: MUS 422.

MUS 430. Schenkerian Analysis. 3 Credits.

Analytical techniques, developed by Heinrich Schenker, studied through application to music of all periods and styles. Sequence.

Prereq: MUS 327.

MUS 431. Schenkerian Analysis. 3 Credits.

Analytical techniques, developed by Heinrich Schenker, studied through application to music of all periods and styles. Sequence.

Prereq: MUS 430.

MUS 433. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: 16th-century sacred polyphony.

Prereq: MUS 233, MUS 236.

MUS 434. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: baroque imitative counterpoint.

Prereq: MUS 433.

MUS 435. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: varies—typically devoted to more advanced fugal writing, 20th-century counterpoint, or other modal composition.

Prereq: MUS 434.

MUS 438. Composers Forum. 1 Credit.

Formulation of a two- or three-concert series of student compositions; sessions with visiting composers and UO performers and listening projects related to these residencies. Repeatable eleven times for a maximum of 12 credits.

MUS 439. Scoring for Voices and Instruments. 3 Credits.

Techniques of arranging and scoring for various types of choral and instrumental groups.

Prereq: MUS 233, MUS 236, MUS 239.

MUS 440. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital. Repeatable twice for a maximum of 9 credits.

Prereq: MUS 342.

MUS 441. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital. Repeatable once for a maximum of 6 credits.

Prereq: MUS 440.

MUS 442. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital. Repeatable once for a maximum of 6 credits.

Prereq: MUS 441.

MUS 445. Electronic Composition. 3 Credits.

Develops an elementary understanding about how computers and software are used to process digital audio and create musical compositions. Laboratory fee. Repeatable twenty-four times for maximum of 75 credits.

Prereq: MUS 447, MUS 448, MUS 476.

MUS 446. Computer Music Applications: [Topic]. 3 Credits.

Use of computers for music notation, education, analysis, performance, research, and other applications. Repeatable three times when topic changes for maximum of 12 credits.

MUS 447. Digital Audio and Sound Design. 4 Credits.

Examines concepts of digital audio representation, sampling, and processing; considers audio mixing, basic synthesis, and sound modification techniques and fundamentals of electroacoustic composition. Laboratory fee.

MUS 448. Interactive Media Performance. 3 Credits.

Examines concepts of interactive performance using MIDI, digital audio, and video processing, and considers issues related to designing performance algorithms in software. Laboratory fee.

MUS 450. SensorMusik. 3 Credits.

Repeatable. Examines the fundamental principles for microprocessors and sensor interface design within the context of musical performance, composition, and improvisation. Repeatable thrice for a maximum of 12 credits.

MUS 451. Introduction to Ethnomusicology. 4 Credits.

World musics studied in their social and cultural contexts. Compares the varied approaches, ideas, and methods of selected American and European researchers since 1980.

MUS 452. Musical Instruments of the World. 4 Credits.

Examines instruments of the world in their cultural contexts. Covers cross-cultural issues and focuses on particular geographic areas. Includes films, recordings, live demonstrations.

MUS 455. Lyric Diction. 3 Credits.

Analysis and International Phonetic Alphabet transcription of song and opera texts with emphasis on the singer's approach to performance. Offered alternate years.

Prereq: MUS 156.

MUS 456. Lyric Diction. 3 Credits.

Analysis and International Phonetic Alphabet transcription of song and opera texts with emphasis on the singer's approach to performance. Offered alternate years.

Prereq: MUS 156.

MUS 460. Music and Gender. 4 Credits.

Examines the role of gender in shaping the music that is created, performed, taught, and listened to in representative cultures of the world, including the West.

MUS 462. Popular Musics in the African Diaspora. 4 Credits.

Examines social and historical contexts of popular musics in the African diaspora from the 20th century forward. Geographic focus is North America, the Caribbean, and Africa.

MUS 463. Popular Music Studies. 4 Credits.

Explores current research and foundational texts in the interdisciplinary field of popular music studies.

MUS 467. Solo Vocal Music. 3 Credits.

Solo songs with accompaniment; the lute air and Purcell; 19th-century art songs in Germany and France; 20th-century British, American, and Continental song literature; development of bases for artistic performance and sound critical judgment through study of text, voice, and accompaniment. Offered alternate years.

Prereq: MUS 269 or equivalent.

MUS 468. Solo Vocal Music. 3 Credits.

Solo songs with accompaniment; the lute air and Purcell; 19th-century art songs in Germany and France; 20th-century British, American, and Continental song literature; development of bases for artistic performance and sound critical judgment through study of text, voice, and accompaniment. Offered alternate years.

Prereq: MUS 269 or equivalent.

MUS 470. History of Electroacoustic Music. 3 Credits.

Examines the development of aesthetic movements, styles, media, instruments, and performance practice related to electroacoustic music. Repeatable once with no conditions.

Prereq: Standing as a music technology major or meeting the prerequisites for history survey courses.

MUS 471. Musical Performance Networks. 3 Credits.

Examines various types of network architectures and data-processing and mapping strategies that can be applied to real-time musical outcomes. Repeatable with no conditions.

MUS 474. History of Opera. 4 Credits.

Critical study of the musical and dramatic content of operas forming the standard international repertoire, from Monteverdi to Mozart.

Prereq: MUS 269 or equivalent.

MUS 475. History of Opera. 4 Credits.

Critical study of the musical and dramatic content of operas forming the standard international repertoire, from Mozart to the present.

Prereq: MUS 269 or equivalent.

MUS 476. Digital Audio Workstation Tech I. 3 Credits.

Explores how MIDI (musical instrument digital interface) is used to compose, edit, and record using a personal computer. Sequence with MUS 477 and MUS 478. Basic Mac skills recommended. Repeatable once for a maximum of 6 credits. Laboratory fee.

MUS 477. Digital Audio Workstation Tech II. 3 Credits.

Explores the principles and techniques used in recording audio with a computer. Sequence with MUS 476 and MUS 478. Repeatable once for a maximum of 6 credits. Laboratory fee.

Prereq: MUS 476.

MUS 478. Digital Audio Workstation Tech III. 3 Credits.

Explores advanced uses of plug-ins, mixing, and editing using a computer. Sequence with MUS 476 and MUS 477. Repeatable once for a maximum of 6 credits. Laboratory fee.

Prereq: MUS 477.

MUS 479. Data Sonification. 4 Credits.

Sonification uses non-speech sound to reveal new insights about data, insights that may be missed using visualizations and other graphic representations of data. The course explores developing audio applications for discovery and research and covers work in the fields of data sonification and auditory display.

MUS 480. Audio Recording Techniques I. 3 Credits.

Hardware and software techniques for use in a recording studio environment, including microphone usage, recording techniques, and digital production. Sequence with MUS 481, MUS 482. Laboratory fee.

MUS 481. Audio Recording Techniques II. 3 Credits.

Application of advanced recording techniques. Sequence with MUS 480, MUS 482. Laboratory fee.

Pre- or coreq: MUS 480.

MUS 482. Audio Recording Techniques III. 3 Credits.

Focuses on the production concepts and techniques necessary to produce a full-length, professional-quality compact disc. Sequence with MUS 480, MUS 481. Laboratory fee.

Prereq: MUS 481.

MUS 483. Audio Effects Theory and Design. 4 Credits.

Audio effects are common and useful tools used in the recording, mixing, and mastering of music and other sound, as well as in sound design. This course focuses on understanding, designing, and implementing audio effects, and using them for musical projects.

MUS 484. Choral Conducting and Literature. 3 Credits.

Choral conducting, gesture and communication, rehearsal technique, and choral literature appropriate for secondary school choral music programs (grades 6–12), community youth choirs, and collegiate ensembles.

Repeatable once for maximum of 6 credits.

Prereq: MUP 140 or higher. Coreq: MUE 387, MUE 406 Fld Prac Public School.

MUS 486. Instrumental Conducting. 3 Credits.

Conducting techniques as applied to band and orchestral music with emphasis on various styles and periods of music; study of 20th-century rhythms and related conducting problems. Repeatable once for a maximum of 6 credits.

Prereq: major standing. Coreq: MUE 387.

MUS 490. Balinese Gamelan. 2 Credits.

Pacific Rim Gamelan ensemble. Performance of original compositions and traditional music for gamelan. Limited to twelve performers. Three public performances a year.

MUS 499. Senior Project. 3 Credits.

Projects in music history, analysis, theory, composition, performance, or related disciplines designed by the student in consultation with the instructor. Repeatable twice for maximum of 9 credits.

MUS 503. Thesis. 1-16 Credits.

Repeatable.

MUS 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Various topics at an advanced level, offered periodically according to student and faculty interest and availability.

MUS 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

MUS 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MUS 516. Post-Tonal Theory I. 3 Credits.

Introduction to theory and analysis of post-tonal music. Concepts of pitch-class set analysis and practical applications. Sequence. Offered alternate years.

MUS 517. Post-Tonal Theory II. 3 Credits.

Introduction to theory and analysis of post-tonal music. Concepts of pitch-class set analysis and practical applications. Sequence. Offered alternate years.

Prereq: MUS 416/MUS 516.

MUS 521. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence. Repeatable once each for maximum of 4 credits per course.

MUS 522. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence. Repeatable once each for maximum of 4 credits per course.

Prereq: MUS 421/MUS 521.

MUS 523. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence. Repeatable once each for maximum of 4 credits per course.

Prereq: MUS 422/MUS 522.

MUS 530. Schenkerian Analysis. 3 Credits.

Analytical techniques, developed by Heinrich Schenker, studied through application to music of all periods and styles. Sequence.

MUS 531. Schenkerian Analysis. 3 Credits.

Analytical techniques, developed by Heinrich Schenker, studied through application to music of all periods and styles. Sequence.

Prereq: MUS 430/MUS 530.

MUS 533. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: 16th-century sacred polyphony.

MUS 534. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: baroque imitative counterpoint.

Prereq: MUS 433/MUS 533.

MUS 535. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: focus varies—typically devoted to more advanced fugal writing, 20th-century counterpoint, or other modal composition.

Prereq: MUS 434/MUS 534.

MUS 538. Composers Forum. 1 Credit.

Formulation of a two- or three-concert series of student compositions; sessions with visiting composers and UO performers and listening projects related to these residencies. Repeatable eleven times for a maximum of 12 credits.

MUS 539. Scoring for Voices and Instruments. 3 Credits.

Techniques of arranging and scoring for various types of choral and instrumental groups.

MUS 540. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital. Repeatable twice for a maximum of 9 credits.

MUS 541. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital. Repeatable once for a maximum of 6 credits.

MUS 542. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital. Repeatable once for a maximum of 6 credits.

MUS 547. Digital Audio and Sound Design. 4 Credits.

Examines concepts of digital audio representation, sampling, and processing; considers audio mixing, basic synthesis, and sound modification techniques and fundamentals of electroacoustic composition. Laboratory fee.

MUS 548. Interactive Media Performance. 3 Credits.

Examines concepts of interactive performance using MIDI, digital audio, and video processing, and considers issues related to designing performance algorithms in software. Laboratory fee.

MUS 550. SensorMusik. 3 Credits.

Examines the fundamental principles for microprocessors and sensor interface design within the context of musical performance, composition, and improvisation. Repeatable thrice for a maximum of 12 credits.

MUS 551. Introduction to Ethnomusicology. 4 Credits.

World musics studied in their social and cultural contexts. Compares the varied approaches, ideas, and methods of selected American and European researchers since 1980.

MUS 552. Musical Instruments of the World. 4 Credits.

Examines instruments of the world in their cultural contexts. Covers cross-cultural issues and focuses on particular geographic areas. Includes films, recordings, live demonstrations.

MUS 555. Lyric Diction. 3 Credits.

Analysis and International Phonetic Alphabet transcription of song and opera texts with emphasis on the singer's approach to performance. Offered alternate years.

MUS 556. Lyric Diction. 3 Credits.

Analysis and International Phonetic Alphabet transcription of song and opera texts with emphasis on the singer's approach to performance. Offered alternate years.

MUS 562. Popular Musics in the African Diaspora. 4 Credits.

Examines social and historical contexts of popular musics in the African diaspora from the 20th century on. Geographic focus is North America, the Caribbean, and Africa.

MUS 567. Solo Vocal Music. 3 Credits.

Solo songs with accompaniment; the lute air and Purcell; 19th-century art songs in Germany and France; 20th-century British, American, and Continental song literature; development of bases for artistic performance and sound critical judgment through study of text, voice, and accompaniment. Offered alternate years.

MUS 568. Solo Vocal Music. 3 Credits.

Solo songs with accompaniment; the lute air and Purcell; 19th-century art songs in Germany and France; 20th-century British, American, and Continental song literature; development of bases for artistic performance and sound critical judgment through study of text, voice, and accompaniment. Offered alternate years.

MUS 570. History of Electroacoustic Music. 3 Credits.

Examines the development of aesthetic movements, styles, media, instruments, and performance practice related to electroacoustic music. Repeatable once with no conditions.

Prereq: Standing as a music technology major or meeting the prerequisites for history survey courses.

MUS 571. Musical Performance Networks. 3 Credits.

Examines various types of network architectures and data-processing and mapping strategies that can be applied to real-time musical outcomes. Repeatable with no conditions.

MUS 574. History of Opera. 4 Credits.

Critical study of the musical and dramatic content of operas forming the standard international repertoire, from Monteverdi to Mozart. Sequence.

MUS 575. History of Opera. 4 Credits.

Critical study of the musical and dramatic content of operas forming the standard international repertoire, from Mozart to the present. Sequence.

MUS 576. Digital Audio Workstation Tech I. 3 Credits.

Explores how MIDI (musical instrument digital interface) is used to compose, edit, and record using a personal computer. Sequence with MUS 577 and MUS 578. Basic Mac skills recommended. Repeatable once for a maximum of 6 credits. Laboratory fee.

MUS 577. Digital Audio Workstation Tech II. 3 Credits.

Explores the principles and techniques used in recording audio with a computer. Sequence with MUS 576 and MUS 578. Repeatable once for a maximum of 6 credits. Laboratory fee.

Prereq: MUS 576.

MUS 578. Digital Audio Workstation Tech III. 3 Credits.

Explores advanced uses of plug-ins, mixing, and editing using a computer. Sequence with MUS 576 and MUS 577. Repeatable once for a maximum of 6 credits. Laboratory fee.

Prereq: MUS 577.

MUS 580. Audio Recording Techniques I. 3 Credits.

Hardware and software techniques for use in a recording studio environment, including microphone usage, recording techniques, and digital production. Sequence with MUS 581, MUS 582. Laboratory fee.

MUS 581. Audio Recording Techniques II. 3 Credits.

Application of advanced recording techniques. Sequence with MUS 580, MUS 582. Laboratory fee.

Pre- or coreq: MUS 580.

MUS 582. Audio Recording Techniques III. 3 Credits.

Focuses on the production concepts and techniques necessary to produce a full-length, professional-quality compact disc. Sequence with MUS 580, MUS 581. Laboratory fee.

Prereq: MUS 581.

MUS 584. Choral Conducting and Literature. 3 Credits.

Choral conducting, gesture and communication, rehearsal technique, and choral literature appropriate for secondary school choral music programs (grades 6–12), community youth choirs, and collegiate ensembles. Repeatable once for maximum of 6 credits.

Prereq: MUP 140 or higher. Coreq: MUE 387, MUE 606 Fld Prac Public School.

MUS 590. Balinese Gamelan. 2 Credits.

Pacific Rim Gamelan ensemble. Performance of original compositions and traditional music for gamelan. Limited to twelve performers. Three public performances a year.

MUS 601. Research: [Topic]. 1-16 Credits.

Repeatable.

MUS 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

MUS 603. Dissertation. 1-16 Credits.

Repeatable.

MUS 605. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable. Individual study of topics beyond the availability of the standard curriculum.

Prereq: completion of all regularly scheduled courses related to the topic.

MUS 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Studies of various topics at an advanced level offered periodically according to student and faculty interest and availability.

Extra fee for Oregon Bach Festival seminars.

MUS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

MUS 609. Terminal Project. 1-16 Credits.

Repeatable.

MUS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MUS 611. Research Methods in Music. 3 Credits.

Use of reference, research, and bibliographical sources in music. Sequence.

MUS 614. Introduction to Musicology. 4 Credits.

Introduces musicology and several of its subfields; includes current and recent arguments.

Prereq: major standing.

MUS 620. Bibliography in Instrumental Conducting. 3 Credits.

Survey of research in conducting. Discussion of rehearsal strategies and psychology.

MUS 621. Wind Repertoire. 3 Credits.

Survey and analysis of music composed for large wind groups, from 1500 to the present. Sequence.

MUS 622. Wind Repertoire. 3 Credits.

Survey and analysis of music composed for large wind groups, from 1500 to the present. Sequence.

Prereq: MUS 621.

MUS 623. Wind Repertoire. 3 Credits.

Survey and analysis of music composed for large wind groups, from 1500 to the present. Sequence.

Prereq: MUS 622.

MUS 624. Instrumental Conducting Laboratory. 2 Credits.

Study, preparation, and conducting of works for instrumental ensembles in rehearsals and performances. Repeatable twice for maximum of 6 credits.

MUS 625. Orchestral Music: Bach to Beethoven. 2 Credits.

Survey of orchestral music from Bach to Beethoven. Sequence with MUS 626. Offered alternate years.

MUS 626. Orchestral Music: 1825 to Modern. 2 Credits.

Survey of orchestral music from 1825 to the modern era. Sequence with MUS 625. Offered alternate years.

MUS 629. Repertoire and Analysis. 3 Credits.

Analytical interpretations of musical works in a context that focuses on repertoire rather than on particular analytical methodologies. The pieces studied vary each time the course is offered. Repeatable with varying repertoire.

MUS 630. History of Theory I. 3 Credits.

Examination and evaluation of theories of music from ancient times to the 16th century, including Aristides Quintilianus, Boethius, Hucbald, Guido, Franco, Tinctoris, Ramis, and Aron. Offered alternate years.

MUS 631. History of Theory II. 3 Credits.

Examination and evaluation of theories of music from the 16th to 19th centuries, including Glarean, Zarlino, Descartes, Rameau, Tartini, Kirnberger, C. P. E. Bach, Fetis, Sechter, and Helmholtz. Offered alternate years.

MUS 632. History of Theory III. 3 Credits.

Theories of harmony and structure ranging from the mid-19th century to the present, including Hauptmann, Riemann, Schenker, Schoenberg, Hindemith, Babbitt, Forte, Lewin, Straus, and Lerdaahl. Offered alternate years.

MUS 633. Advanced Schenkerian Analysis. 3 Credits.

Advanced analytical techniques developed by Heinrich Schenker.

Pre- or coreq: MUS 431/531 or equivalent.

MUS 634. Advanced Post-Tonal Theory. 3 Credits.

Analytic approaches to twelve-tone music.

MUS 640. Advanced Composition Studies. 3 Credits.

Studio instruction in composition. Repeatable twice for a maximum of 9 credits.

Prereq: MUS 442/MUS 542; coreq: MUS 538.

MUS 641. Advanced Composition Studies. 3 Credits.

Studio instruction in composition. Repeatable twice for a maximum of 9 credits.

Prereq: MUS 640; coreq: MUS 538.

MUS 642. Advanced Composition Studies. 3 Credits.

Studio instruction in composition. Repeatable twice for a maximum of 9 credits.

Prereq: MUS 641; coreq MUS 538.

MUS 643. Notation of Medieval and Renaissance Music. 3 Credits.

Representative examples of notational systems and practices in Western European polyphony from 900 to 1600. Offered alternate years.

MUS 645. Advanced Electronic Composition. 3 Credits.

Repeatable. Develops an advanced understanding of computers and software and how they are used to process digital audio and create musical and mediacompositions. Repeatable with instructor's consent. Laboratory fee.

Prereq: MUS 547, MUS 548, MUS 576; or equivalent.

MUS 650. Piano Literature. 3 Credits.

Advanced study of solo piano literature from Bach to the present.

Sequence with MUS 650, MUS 651, MUS 652. Offered alternate years.

MUS 651. Piano Literature. 3 Credits.

Advanced study of solo piano literature from Bach to the present.

Sequence with MUS 650, MUS 651, MUS 652. Offered alternate years.

Prereq: MUS 650.

MUS 652. Piano Literature. 1-3 Credits.

Advanced study of solo piano literature from Bach to the present.

Sequence with MUS 650, MUS 651, MUS 652. Offered alternate years.

Prereq: MUS 651.

MUS 660. Music in the Middle Ages. 3 Credits.

Sources of Western European music in classical antiquity and the Near East; sacred monophony, secular monophony; development of polyphony. Offered alternate years.

MUS 661. Music in the Renaissance. 3 Credits.

The central Renaissance style in 15th-century France and Italy; high Renaissance music; late Renaissance music; developments in England and Germany; instrumental music; Renaissance music theory. Offered alternate years.

MUS 662. Music in the Baroque Era. 3 Credits.

Musical genres in Italy, France, Germany, Austria, Britain, the Netherlands, Spain, Mexico, and South America in historical, social, political, and cultural contexts—early 17th century through Bach and Handel. Offered alternate years.

MUS 663. Music in the Classical Period. 3 Credits.

Study of galant, Emfindsamer, and classical styles from c. 1730 to Boccherini, Haydn, and Mozart. Focus on instrumental and sacred music, and on opera before Mozart. Offered alternate years.

MUS 664. Music in the Romantic Era. 3 Credits.

Virtuosic and lyric extremes in instrumental and vocal styles. Literary romanticism, descriptive music, and the Lied; opera in France and Italy; Wagner's music drama as Gesamtkunstwerk. Offered alternate years.

MUS 665. Music in the 20th Century. 3 Credits.

Crisis of romanticism and tonality: transition of Debussy, Mahler, and others; new styles of Stravinsky, Schoenberg, Bartok; developments in the United States; implications of recent trends. Offered alternate years.

MUS 681. Historical Performance Practices II. 3 Credits.

Introduction to theory and practice of sound production, rhetoric, pronunciation, instrumentation, pitch, temperament, and ornamentation in period vocal and instrumental solo and ensemble music in the 17th and early 18th centuries. Offered once every third year.

MUS 682. Historical Performance Practices III. 3 Credits.

Introduction to theory and practice of sound production, rhetoric, pronunciation, instrumentation, pitch, temperament, and ornamentation in period vocal and instrumental solo and ensemble music in the late 18th and 19th centuries. Offered once every third year.

MUS 691. Collegium Musicum. 1-3 Credits.

Study of music repertoire of the medieval, Renaissance, and baroque periods through rehearsals and extensive sight-reading; vocal and instrumental repertoire. Ensemble fee.

Prereq: audition.

MUS 693. Oregon Electronic Device Orchestra. 2 Credits.

Performance ensemble that uses data-driven musical instruments in combination with software and hardware to perform music and intermedia compositions. Repeatable 11 times. Repeatable eleven times for a maximum of 24 credits.

Prereq: MUS 547, MUS 548.

MUS 694. Chamber Ensemble: [Topic]. 1 Credit.

Accompanying, Brass Choir, Brass Ensemble, Chamber Ensemble, Trombone Ensemble, Tuba and Euphonium Ensemble, Studio Guitar Ensemble, Jazz Guitar Ensemble, Latin Jazz Ensemble, Oregon Percussion Ensemble. Repeatable 11 times.

Prereq: audition (except chamber ensemble).

MUS 695. Band: [Topic]. 1-2 Credits.

Green Garter Band, Oregon Basketball Band, Oregon Marching Band, Oregon Wind Ensemble, UO Campus Band, UO Symphonic Band, Yellow Garter Band. Ensemble fee for Oregon Wind Ensemble, UO Symphonic Band, UO Campus Band. Repeatable 11 times.

Prereq: audition (except UO Campus Band and Oregon Marching Band).

MUS 696. Orchestra: [Topic]. 1-2 Credits.

University Symphony Orchestra, Campus Orchestra. Ensemble fee.

Repeatable 11 times.

Prereq: audition (except Campus Orchestra).

MUS 697. Chorus: [Topic]. 2 Credits.

Chamber Choir, Concert Choir, Gospel Singers, Repertoire Singers, University Gospel Choir, University Gospel Ensemble, University Singers, Women's Choir. Ensemble fee. Repeatable 11 times.

Prereq: audition or voice screening (except Concert Choir and Gospel Choir).

MUS 698. Opera Workshop. 2 Credits.

Traditional and contemporary repertory for musical theater through analysis, rehearsal, and performance of complete and excerpted works; training in stage movement, diction, and rehearsal techniques.

Repeatable 11 times.

Prereq: audition.

Graduate School

Janet Woodruff-Borden, Dean

541-346-5129

Susan Campbell Hall, first floor

1219 University of Oregon

Eugene, Oregon 97403-1219

Graduate Council

The Graduate Council advises and makes recommendations to the dean of the Graduate School on matters pertaining to graduate study at the University of Oregon, including changes or additions to policies and regulations governing graduate study. The council consists of a representative elected committee of 12 faculty members, two students, and the dean and associate dean of the Graduate School. The current Graduate Council membership is listed on the Graduate School website.

Advanced Degrees and Certificates

Through the Graduate School, the University of Oregon offers study leading to advanced degrees in the liberal arts and sciences and in the professional areas of business, conflict and dispute resolution, design, education, journalism and communication, and music. Program offerings are listed in the **Graduate Majors and Specializations** (<http://catalog.uoregon.edu/graduatemajors>) section of this catalog.

For information about law degrees, see the **School of Law** section of this catalog.

Specific program requirements for most of these degrees appear in the departmental sections of this catalog; general requirements of the Graduate School are stated in this section.

General Information

Students who want to earn a second bachelor's degree should not apply to the Graduate School. They should submit an application for postbaccalaureate undergraduate student status to the Office of Admissions via their website (<https://admissions.uoregon.edu/other-applicants/postbaccalaureate>) or by telephone, 541-346-3201.

Students who want to earn a graduate degree or graduate certificate are admitted to the Graduate School in accordance with the procedures described in this section.

Graduate Admission

To be admitted to the Graduate School for the purpose of seeking a graduate degree or graduate certificate or for enrolling in a formal nondegree graduate program, students must hold bachelor's degrees from a regionally accredited four-year college or university in the United States or its equivalent from a foreign country and must be accepted by the professional school or major department in which they propose to study. International applicants must also submit proof of English language proficiency. Information about requirements may be found online (<https://gradschool.uoregon.edu>).

Graduate Classification

Students seeking certificates or advanced degrees are classified as follows:

- Graduate postbaccalaureate
- Graduate premaster's
- Graduate conditional master's
- Graduate master's
- Graduate postmaster's
- Graduate conditional doctoral
- Graduate doctoral
- Graduate postdoctoral

The university's schools and departments determine their own requirements for graduate admission. Students should become familiar with these requirements before applying and address inquiries about graduate admission to the department or school in which they plan to study, not to the Graduate School or to the Office of Admissions.

Initial student status may be either conditional or unconditional. If a student has not been granted unconditional student status after the completion of 36 credits of graduate course work, the Graduate School may inquire into their status and recommend that a decision on the student's status be made as soon as possible.

A former University of Oregon student must be admitted formally to the Graduate School in the same way as a student from any other college or university.

A student who has been admitted to a graduate program and wants to change their major must apply for admission to the new department.

Applicants must pay a nonrefundable \$70 application fee for domestic applicants or a \$90 application fee for international applicants.

The Graduate School offers fee waivers for applicants who meet specific criteria. More information is available on the website (<https://gradschool.uoregon.edu>).

Application Procedure

Students seeking admission to the Graduate School must submit an online application. Links may be found on each department's or school's website, or by contacting the department directly. Official transcripts from all colleges or universities from which the student has received a bachelor's or advanced degree must be sent to the Office of Admissions upon application.

Departments determine additional transcript requirements. The applicant may also be asked to submit materials such as transcripts of test scores (e.g., Graduate Record Examinations, Miller Analogies Test), evidence of foreign-language proficiency, and letters of reference. The applicant should ascertain from the school or department what additional materials, if any, are expected and send them directly to the department. In some cases, these materials will be collected electronically as part of the online application.

Admission for Graduate Postbaccalaureate Study

Applicants who wish to take graduate course work but do not intend to pursue a specific graduate degree must apply online. Instructions are available on the Graduate School website.

For more information, see Other Graduate Classifications (p. 947) below under **General Requirements and Policies**.

International Applicants

Applicants who are not United States citizens or immigrants are considered for admission to the university as international students.

A satisfactory command of the English language is required for admission to the University of Oregon. International applicants must demonstrate language proficiency through one of the following three methods:

- *Test of English as a Foreign Language (TOEFL)*: Minimum score, 575 (paper) or 88 (Internet-based). Some departments require a higher score.
- *International English Language Testing System (IELTS)*: Minimum score, 7.0 overall band score. Some departments require a higher score.
- *Degree from an English-speaking country*: Submit degree transcripts proving that you have received a bachelor's degree or higher from a regionally accredited United States institution or from an institution in the following countries: Australia, Canada (excluding Quebec), Ireland, New Zealand, or the United Kingdom.

Requesting Scores

Scores should be sent directly from the testing agency to the University of Oregon. The institution code is 4846. You should also have a copy sent to the department to which you are applying, if required. For more information, visit the testing sites online: TOEFL, www.toefl.org (<http://www.toefl.org>); IELTS, www.ielts.org (<https://www.ielts.org>); UO Testing Center, testing.uoregon.edu.

Language Requirement for International Graduate Employees

Graduate students who are nonnative speakers of English who have been hired in teaching positions are required to prove their spoken English proficiency by achieving a minimum score on the Test of Spoken English (TSE), or the speaking component of either the Internet-based TOEFL or the academic version of the International English Language Testing System (IELTS) test. Graduate employees who do not meet the minimum score for these tests must take the UO Speaking Proficiency English Assessment Kit (SPEAK) Test.

International students who want instruction in English as a second language before beginning their studies at the University of Oregon or another university in the United States may enroll in the American English Institute. For more information, visit aei.uoregon.edu.

International students must carry health and accident insurance for themselves and their dependent family members living in the United States. Students' insurance policies must meet the minimum University of Oregon health insurance requirements. These requirements may be met by purchasing the health insurance administered by the University Health Center. This plan may be purchased during the registration process. Questions about the minimum requirements should be directed to the Office of International Affairs via their website (<https://international.uoregon.edu>) or by telephone, 541-346-3206.

Course Numbering System

500–599

Courses that offer graduate-level work in classes that may also include undergraduate students.

600–699

Graduate courses for graduate students only.

700–799

Except in the School of Music and Dance, courses of a highly technical nature that count toward a professional degree only, not toward advanced academic degrees such as an MA, MS, or PhD. Both 600- and 700-level courses with the MUP subject code denote graduate courses that apply toward advanced academic degrees in the School of Music and Dance.

503, 507, 508, 510, 601–610, 704–710

Graduate and professional courses that may be repeated for credit under the same number.

General Requirements and Policies

Students are responsible for staying informed about, and complying with, departmental regulations as well as Graduate School regulations.

Course Registration Requirements and Limits

A graduate student may register for up to 16 credits of graduate or undergraduate course work. Registration in excess of this level, up to a maximum of 18 credits, requires payment of additional fees for each extra credit. During summer session, graduate students are limited to a maximum of 16 credits. Minimum registration is three graduate credits a term.

International students should request information from the Office of International Affairs about Immigration and Naturalization Service regulations and minimum credit requirements.

Graduate students working toward an advanced degree must be enrolled continuously until all degree requirements are completed (see Continuous Enrollment (p. 947)). Furthermore, students who use faculty assistance, services, or facilities must register each term for at least 3 graduate credits to compensate for usage. This includes students who are taking only comprehensive or final examinations or presenting recitals or terminal projects.

In the term in which a degree is granted, the student must register for at least 3 graduate credits. If the student is completing a master's degree thesis in this final term, registration must include at least 1 of the 3 credits in Thesis (503). If a doctoral dissertation is being completed, registration must include at least 3 credits in Dissertation (603). Exceptions may be made depending on the timing of the submission of the thesis or dissertation. See the Graduate School website for details.

Students living elsewhere while writing a thesis or dissertation and sending chapters to an advisor for feedback must register for a minimum of 3 graduate credits a term; they should register for thesis or dissertation credits.

Various on- and off-campus agencies and offices have their own course-load requirements. For example, some agencies that offer student loans set registration requirements. The Office of the Registrar can only certify the number of credits for which a student has officially registered. Because the minimum registration requirements for the Graduate School may not satisfy some agency requirements, it is the student's responsibility to register for the required number of credits.

Course Enrollment for Faculty and Staff Members

Faculty and staff members who want to take graduate courses should refer to the Human Resources office for information about regulations and fees.

Faculty members (including officers of administration) may not pursue an advanced degree in the department in which they hold an appointment. To pursue a degree in another department, they must submit a petition to the dean of the Graduate School for approval. More information about the petition process is available on the Graduate School website.

Joint-Campus Program

Graduate students at the university may, with advisor and departmental approval, take graduate courses at institutions in the Oregon University System participating in the joint campus program. A student registers for these courses with the University of Oregon registrar, who records each grade on the academic record under Joint Campus Experimental Course: [Topic] (JC 610). The student must be a matriculated UO graduate student in an advanced degree program and registered for UO courses during the same term the Joint Campus Experimental Course: [Topic] (JC 610) course is taken. A maximum of 15 credits taken under the joint campus program may be applied toward a graduate degree program. Joint campus course work counts toward the 24 graded credits required for the master's degree. Forms are available in the Office of the Registrar.

WICHE Regional Graduate Programs

The Western Interstate Commission for Higher Education (WICHE) coordinates a graduate exchange program, the Western Regional Graduate Program (WRGP), to enable students from Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming to apply for admission to selected professional programs and, if admitted, to be treated as resident students for tuition purposes.

The University of Oregon currently has WRGP program in historic preservation. For information, visit the website (<https://archenvironment.uoregon.edu/hp>).

WGRP certification must be renewed each academic year.

Grade Requirements

Graduate students must maintain at least a 3.00 grade point average (GPA) in graduate courses taken in the degree program. Grades of D+ or less for graduate courses are not accepted for graduate credit but are computed in the GPA. Similarly, the grade of N (no pass) is not accepted for graduate credit. A grade of pass (P) must represent work equal to or better than a B–.

A GPA below 3.00 at any time during a graduate student's studies or the accumulation of more than 5 credits of N or F grades—regardless of the GPA—is considered unsatisfactory. Additional satisfactory progress requirements and procedures may be found on the Graduate School website.

Other Graduate Classifications

A student not seeking a graduate degree may be classified as a graduate student doing graduate-level work as follows:

- postbaccalaureate graduate
- premaster's
- postmaster's
- postdoctoral
- nonadmitted Community Education Program participant

Credits earned in these classifications are recorded on the student's transcript.

Up to 15 graduate credits earned under one or more of the above classifications may later be counted in a master's degree program if endorsed by the school or department and approved by the Graduate School. Students must submit a Request for Transfer of Graduate Credit form which is available on the Graduate School website. These credits fall within the 15-credit maximum of transfer credit allowed for a master's degree program. Approved credits may be used to meet relevant university degree requirements.

Incompletes

For graduate students, there are two sets of policies regarding incompletes on the student record—the first is departmental, the second involves the Graduate School. Graduate students should become familiar with both sets of policies.

Graduate School policy requires that graduate students must convert a graduate course grade of Incomplete ("I") into a passing grade within one calendar year of the term the course was taken. After one year, the student must petition the Graduate School for the removal of the incomplete.

To be eligible for Graduate School approval on a Petition to Remove an Incomplete, all of the following criteria must be met:

- The incomplete must be no more than seven years old
- The student must have the approval of the instructor to complete the outstanding course requirements
- The student must not have completed a terminal advanced degree since the term of enrollment in the course. Incompletes that remain on the academic record after a degree has been awarded may not be removed. All course work documented on the transcript at the time of the awarding of the degree stands as a permanent record and it is not permissible to revise the record

An incomplete "I" assigned to Research (601) or Terminal Project (609) does not require a petition. Research and terminal project credits require the instructor to submit a Supplementary Grade Report to the Office of the Registrar.

Accumulation of more than 7 credits of Incomplete is considered unsatisfactory. More information about satisfactory academic progress requirements is available on the Graduate School website.

This policy applies to the level of the course and not to the level of the student. An undergraduate student in a graduate-level course will be evaluated under Graduate School policy. A graduate student in an undergraduate level course will follow policies in effect for undergraduate students.

Continuous Enrollment

Unless leave status has been approved, a student in an advanced degree or graduate certificate program must remain in continuous enrollment at the university, taking at least 3 graduate credits each term,

until all the program's requirements have been completed. Registration for summer session is not required unless the student is using university facilities or faculty or staff services. Failure to maintain continuous enrollment effectively withdraws the student from graduate status. See *Permission to Reregister* (p. 948).

On-Leave Status

A graduate student interrupting a study program for one or more terms, excluding summer session, must register for on-leave status to ensure a place upon return. Only graduate students in good standing are eligible for on-leave status.

The Graduate School must receive the application by the last registration day—as noted in the class schedule—of the term the leave begins. Leave status is granted for a specified period excluding summer session. Students with approved leave status need not pay fees. However, students must register and pay fees if they use university facilities or faculty or staff services during the on-leave term.

Master's Students

Master's students, except summer-only students, may apply for a maximum of three academic terms of on-leave status during the course of study for the degree. A master's student who attends the university only during summer session must obtain on-leave status for each ensuing school year. These summer students also must complete all degree requirements within the seven-year time limit.

Doctoral Students

Doctoral students may apply for a maximum of six academic terms of on-leave status during the course of study for the degree. See *Continuous Enrollment* (p. 953) under *Doctoral Degrees*.

Additional details about on-leave status and how to apply are available on the Graduate School website.

Permission to Reregister

A graduate student who fails to maintain continuous enrollment or obtain on-leave status is required to file a *Permission to Reregister* form and petition for reinstatement (using the *General Petition* form). Both forms are available on the Graduate School website. The petition is reviewed by the student's major department and the Graduate School. The student may, at the discretion of the department, be required to meet departmental admission policies and degree completion requirements that are in effect on the date of reenrollment. Doctoral students may, at the discretion of the department, be required to complete the doctoral residency requirement again. They may also be required to retake the comprehensive examinations if completed prior to stopping out, if the department feels that this is necessary in order to demonstrate currency of knowledge.

Review of the *Permission to Reregister* form may result in a change of residency status from resident to nonresident. More information is available from the residency officer in the Office of Admissions.

Graduate Residency

Each graduate degree at the University of Oregon has a residency requirement that dictates how much of the work required for that degree must be completed at the University of Oregon. Please refer to the **Master's Degrees** and **Doctoral Degrees** sections below for details about residency requirements for each type of degree.

Waiver of Regulations

Graduate students may file a petition requesting exemption from any academic requirement. The petition must first be submitted to the academic department for review and supporting statement. The Graduate School then reviews the educational purpose the regulation in question was designed to serve. Petitions are seldom granted if the only reason given is to save the student from inconvenience or expense.

Graduate School petition forms are available on the Graduate School website.

Graduate Tuition, Fees, and Financial Aid Tuition and Fees

The University of Oregon has differential graduate tuition. Please refer to the Office of the Registrar's website for the current tuition and fees schedule: <http://registrar.uoregon.edu/costs/tuition-fees>.

Fellowships and Financial Aid

One purpose of scholarship and fellowship support provided by the UO Graduate School is to enhance the diversity of the graduate student population by seeking talented students from groups historically underrepresented in graduate education. Broadening the talent pool from which graduate students are chosen enriches the educational and scholarly activities of all students and faculty members and is good academic practice. By bringing diverse individuals together to engage in intellectual activities, graduate programs engender respect for intellect, regardless of source, and help to build a community whose members are judged by the quality of their ideas.

At the University of Oregon, financial aid is available through graduate employee (GE) opportunities and research fellowships, training grant stipends, scholarships, work-study, loans, and part-time jobs. GEs are available to qualified graduate students who are enrolled in a graduate degree program. Inquire at the department for specific application deadlines. Fellowship awards are based on the student's potential as a graduate student. All GEs—research, teaching, and administrative—are represented by the Graduate Teaching Fellows Federation (GTFF), American Federation of Teachers, Local 3544. Recruitment and selection follow established published procedures from departments and the provisions of the GTFF contract. Details of appointment procedures are available from the departments. Reappointment is subject to departmental policy but is always contingent upon making satisfactory progress toward the degree.

Teaching Fellowships

Nearly all the schools and departments award graduate employee (GE) opportunities. For 2018–19, minimum-level salaries at 0.49 full-time equivalent (FTE) range from \$14,947 to \$17,828 for the academic year. The minimum appointment is a 0.20 FTE position. Graduate employees (GEs) must be enrolled in an graduate degree program and must register for and complete a minimum of 9 graduate credits toward the degree each term. Credits earned in audited courses do not count. Tuition for up to 16 credits a term, a health insurance premium subsidy, and mandatory fees subsidy are provided by the university. Failure to enroll for and complete the minimum of 9 credits a term may nullify an appointment.

Nonnative speakers of English who accept teaching-related GE positions must demonstrate appropriate English language proficiency. See "Language Requirement for International Graduate Employees" above.

Research Fellowships

A number of departments and schools employ graduate students to work on research projects under the supervision of faculty members. Funds typically come from research grants and contracts. Salaries and tuition policy are the same as for graduate students with teaching fellowships. In addition, some departments have federally supported training grants and consider fellowship applicants for support through these resources.

Fellowships from Other Sources

Graduate students may be eligible for fellowship awards granted by federal agencies and private foundations. Information on internal and external funding opportunities is available on website (<http://research.uoregon.edu>) for the Office of the Vice President for Research and Innovation.

Postdoctoral Fellowships

The University of Oregon participates in several postdoctoral fellowship programs and provides facilities for postdoctoral study under faculty supervision. More information is available from individual schools and departments. Additional resources for postdoctoral fellows can be found on the Graduate School website.

Other Financial Assistance

Some forms of financial aid depend on financial need, defined as the difference between the cost of attending an institution and the amount the student and his or her family can contribute toward these expenses. See the **Student Financial Aid and Scholarships** (p. 30) section of this catalog for information about available aid and application procedures.

International Students

International students may work on campus during the school year but should not expect to work off campus. Those who hold student (F-1) visas are expected to have sufficient funds for the period of their studies. Their dependents are not usually allowed to work. However, if it is necessary for a dependent to work, students should contact the Office of International Affairs.

International students are eligible for institutionally supported teaching and research fellowships described above.

Master's Degrees

Master's degree candidates must fulfill the requirements of the Graduate School, which are listed below. Students must also complete the additional requirements set by the school or department in which the degree is to be awarded. These are described in the departmental sections of this catalog.

Credit Requirements

To earn a master's degree, students must complete an integrated program of study through either a departmental discipline or a program of interdisciplinary studies totaling no fewer than 45 graduate credits. As noted above, some departments require more than 45 credits.

The credits must be taken after admission to the master's degree program (conditional or unconditional) or approved for transfer (see **Transferred Credit** below). Of the total, 24 credits must be in graded courses taken at the UO and passed with a grade point average (GPA) of 3.00 or better. A minimum of 30 credits in the major are required for a master's degree with a departmental major. In addition, at least 9

credits in courses numbered 600–699 must be taken in residence at the University of Oregon.

Students working toward a 45-credit master's degree with thesis must register for a minimum of 36 credits of course work and 9 credits in Thesis (503). Credit for thesis is given pass/no pass.

Second Master's Degree

Students who earned the first master's degree from the University of Oregon may earn a second master's degree in another field by taking at least 30 graduate credits, of which 24 must be in courses taken for letter grades, after official admission as a master's degree candidate in the new major at the university. This provision does not apply to a second master's degree in the Interdisciplinary Studies: Individualized Program (IS:IP). Although the second master's degree may be permitted with reduced credits, complete records of the student's graduate-level study must reflect the equivalent of all requirements for completion of the degree as described in the University of Oregon Catalog. Schools and departments may require more than this 30-credit minimum or deny the request. If the first master's degree is from another institution, the second master's degree program must comply with the standard university master's degree requirements (a minimum of 45 credits). Students pursuing two graduate degrees at the same time must file a concurrent degree form, available on the Graduate School website.

Time Limit

Students must complete all work for the master's degree within seven years, including transferred credits, thesis, the language requirement for an MA, and all examinations. On-leave status does not extend the seven-year deadline except when the leave is for the student's serious health or medical condition or for parenting needs during the 12 months immediately following a child's birth or placement in the home.

Residency and Enrollment Requirements

For a master's degree, the Graduate School requires that a minimum of 30 credits (applicable to degree requirements) be taken at the University of Oregon during at least two terms of study. A second University of Oregon master's degree also requires a minimum of 30 credits and at least two terms of study at the University of Oregon. Individual schools or departments may have additional residence requirements.

Students enrolled in a graduate degree program must attend the university continuously, except for summers, until all the program's requirements have been completed, unless on-leave status has been approved. For more information, see **Course Registration Requirements and Limits** (p. 946), **Continuous Enrollment** (p. 947), **Graduate Residency** (p. 948), and **On-Leave Status** (p. 948) under **General Requirements and Policies**.

Transferred Credit

Graduate Credit from Other Institutions

Graduate credit earned while a graduate student in another accredited graduate school may be counted toward the master's degree under the following conditions:

1. Total transferred credits may not exceed 15 credits in a master's degree program
2. Courses must be relevant to the degree program as a whole
3. The student's home department and the Graduate School must approve the transfer

4. Grades earned must be A+, A, A–, B+, B, or P
5. The courses may not have been used to satisfy the requirements for another degree
6. Transfer courses are subject to the seven-year limit for degree completion

Transferred credit may not be used to meet the requirement of 24 credits in University of Oregon graded graduate courses, nor are they used in computing the UO cumulative GPA.

Reservation of Graduate Credit: Permission to Register for Graduate Credit

An undergraduate student working toward a bachelor's degree must request permission to register for a graduate-level course. The student must file a Reservation of Graduate Credit form with the Graduate School by the first Friday of the term in which he or she wants to enroll in the graduate course. Two options are available for disposition of course credits.

Option 1

Include the graduate-level course in requirements for the bachelor's degree. To be eligible, the student must be admitted as an undergraduate and have earned a minimum GPA of 3.00 in each of the three terms prior to enrolling in the graduate course. Undergraduates receiving less than a grade of B in a graduate-level course will be ineligible for enrollment in graduate-level course work.

Option 2

Reserve the graduate-level course for consideration by a department after admission as a graduate student. This option is available to seniors only and is limited to a maximum of three graduate courses not exceeding a total of 12 credits. To be eligible, the student must have earned a minimum GPA of 3.00 in each of the three terms prior to enrolling in the graduate course. Undergraduates receiving less than a grade of B in a graduate-level course will not be allowed to use the course toward a master's degree, and will be ineligible for further reservations of graduate credit.

Nondegree seeking undergraduate students are ineligible for Registration of Graduate Credit. This includes Community Education Program students and undergraduate postbaccalaureate students. Undergraduates do not qualify to receive credits for the following graduate classes: Research (601), Supervised College Teaching (602), Internship (604), Reading and Conference (605), Field Studies or Special Problems (606), Workshop (508 or 608), Special Topics or Colloquium (508 or 608), and Practicum, Terminal Project, or Supervised Tutoring (609).

Transfer of Reserved Graduate Credit

Undergraduates who completed graduate-level courses at the University of Oregon under the Reservation of Graduate Credit petition process and who reserve the courses by choosing Option 2 on the petition form may apply up to 12 credits toward the master's degree.

Course work taken for letter grades (B or better) and P/N courses, if accompanied by the instructor's statement that the passing grade was equal to a B or better, is eligible for consideration. If approved, these courses can be used to satisfy relevant university master's degree requirements. A Request for Transfer of Graduate Credit form (available on the Graduate School's website) must be filed within two terms of acceptance into a master's degree program and within two years of

earning the bachelor's degree. Any credits transferred under this option fall with the 15-credit transfer maximum.

Other University of Oregon Transferred Credit

A maximum of 15 graduate credits earned at the University of Oregon while classified as a graduate postbaccalaureate student, a nonadmitted graduate student enrolled in the Community Education Program, or a student earning a graduate certificate may later be counted toward the master's degree (see Other Graduate Classifications (p. 947) under General Requirements and Policies), pending school or department endorsement and Graduate School approval. This is within the overall 15-credit maximum for transfer. Grades earned must be A+, A, A–, B+, B, or P. A Request for Transfer of Graduate Credit form (available on the Graduate School website) must be approved for credits completed under these classifications to be applied to degree requirements.

Transfer of Credit for Doctoral Students

There is no formal university transfer credit process for doctoral students. Each program sets its own policy regarding acceptance of transfer credits, and is responsible for tracking how transfer credits fit into departmental degree requirements. Transfer credits can only be used to meet departmental degree requirements; they cannot be used to waive or substitute for minimum Graduate School doctoral degree requirements.

Distinction between MA and MS Degrees

Students pursuing a master of arts (MA) degree must demonstrate competence in a second language. Details of the MA language requirement are available on the Graduate School website. There is no language requirement for the master of science (MS) and professional master's degrees unless the department so specifies.

Examinations and Thesis

The student's major school or department may require qualifying, comprehensive, or final examinations or any combination of these. The content and methods of conducting such examinations are the responsibility of the school or department.

In some fields, master's degree candidates must submit a thesis; in others the thesis is optional. A student who writes a thesis must complete the following procedures:

1. Request information from the major school or department about the various steps involved and the standards expected
2. Consult the Thesis and Dissertation Style and Policy Manual, available on the Graduate School website. Only theses that meet the standards of style and form discussed in that manual are accepted

The advisory committee, appointed by the department, determines the work to be completed in light of the student's academic background and objectives. The number of committee members is determined by the department. The advisor is expected to be a member of the regular faculty, tenured or tenure-track.

Research Compliance

See Research Compliance (p. 950) in the **Doctoral Degrees** section of this catalog.

Summary of Graduate School Requirements

The following outline lists minimum Graduate School requirements for master's degrees. Specific departmental requirements must also be met

before the student is awarded an advanced degree. Credit requirements listed below must be met with graduate credits.

Language requirement	MA only
Minimum GPA	3.00
Minimum thesis credits	9 credits
Time limit for program completion	seven years
Total credit minimum	45 credits
Registration minimum per term	3 credits
Minimum graded credits taken in residence	24 credits
Minimum 600-level credits in residence	9 credits
Minimum credits in major	30 credits
Minimum credits taken at UO	30 credits

The school or department specifies whether a thesis is mandatory or optional; however, a student writing a thesis must register for at least 9 credits in Thesis (503).

Interdisciplinary Master's Degree Programs

Interdisciplinary Studies: Applied Information Management

Information on the multidisciplinary master's degree program in applied information management may be found by selecting the appropriate tab at the top of this page.

Interdisciplinary Studies: Individualized Program

The individualized program is the university's most flexible interdisciplinary program leading to MA and MS degrees. The program is designed for students with specific, well-articulated goals that cannot be reached through established departmental programs. Although flexibility is allowed in program design, the program must be composed of existing graduate courses from approved master's degree programs in three professional schools, in three departments in the College of Arts and Sciences, or in a combination of programs from the professional schools and the College of Arts and Sciences.

The Interdisciplinary Studies: Individualized Program (IS:IP) requires a total of at least 54 graduate credits; a minimum of 15 graduate credits in each of the three areas of concentration; and 9 graduate credits for an integrated terminal project or thesis determined by the student and three advisors during the course of study.

Guidelines in the IS:IP program include the following:

1. A maximum of 15 credits may be used from practicum, field studies, research, and reading and conference courses. Such credit must be distributed across all three areas of the program
2. The terminal project or thesis consists of 9 credits in either Terminal Project (IST 609) or Thesis (IST 503)
3. At least 39 of the 54 minimum credits for the degree must be taken after the candidate is admitted to the IS:IP program

Admission is selective. Acceptance into the program is based on background qualifications, the statement of purpose, and the appropriateness and availability of courses and advisors at the university. An applicant who has been denied admission to a departmental graduate

program at the university must have departmental permission to use that department as a program area.

Consent must be obtained in writing from each of the three advisors, indicating their willingness to serve and their approval of the final listing of courses in each of the three areas. One of the three advisors must be designated as chair. Subsequent changes in the program must be approved by both the advisor in the area involved and the IS:IP director. More information about the IS:IP program is available on the Graduate School website.

Doctoral Degrees

Doctor of Philosophy

The degree of doctor of philosophy (PhD) requires distinguished achievement in both scholarship and original research. The degree is granted chiefly in recognition of the candidate's high attainment and ability in a special field of an academic discipline, as shown by work on required examinations and by the preparation of a dissertation. Minimum university and school or department requirements of residence and study must be satisfied. The requirements for PhD degrees established by the Graduate School are given below. Individual programs have additional specific requirements, which are presented in the departmental sections of this catalog.

Residency and Credit Requirements

For the PhD degree, the student must complete the equivalent of at least 81 credits of graduate-level academic work beyond the bachelor's degree over the course of at least three calendar years.

The doctoral residency requirement is as follows:

- At least 27 credits of graduate course work toward the doctoral degree must be completed at the University of Oregon while classified as a doctoral student. Course work completed as a UO master's student may count toward the doctoral residency requirement under these circumstances: (1) the master's program is in the same major as the doctoral program; (2) no more than one calendar year has lapsed between the last term of enrollment as a master's student and the start of the doctoral program
- Of these 27 credits, at least 14 credits must be in regular course work—i.e., not in individualized study credits such as Research (601), Reading and Conference (605), and Special Problems (606)
- The 18 required credits in Dissertation (603) do not count toward the residency requirement.

Language Requirement

Individual schools or departments may require knowledge of a second language or of other specialized disciplines, such as computer science or statistics, as part of a PhD program. Information about these requirements is available from the school or department.

Candidates for the doctor of philosophy degree at the University of Oregon are expected to have proficiency in at least one language in addition to English if a substantial, relevant body of literature in one or more languages exists in the candidate's specialized field of dissertation research. It is the responsibility of the candidate's advisor or doctoral committee to determine which languages the candidate is expected to know before beginning dissertation research. Guidelines for language proficiency are established by the candidate's home department.

Advisory Committee

The advisory committee, appointed by the department, determines the work to be completed in light of the student's academic background and objectives. This committee usually consists of three or four members, and the student's advisor is chair.

Examinations and Advancement to Candidacy

Every student must pass comprehensive examinations (oral, written, or both) or other similar requirements set by the department that cover the primary areas of the student's program and, if applicable, any supporting area required by the department. The student is responsible for material directly covered in completed graduate courses and for additional independent study in his or her field. Students should consult their department's website or graduate handbook for information about the requirements for advancing to candidacy.

Within two weeks of the student meeting these requirements, the home department and the student must submit a report via GradWeb to the dean of the Graduate School recommending advancement to candidacy.

Dissertation

All candidates must submit a dissertation based on independent and original research. The dissertation must contribute significantly to knowledge, show a mastery of the literature of the subject, be written in acceptable literary style, and conform to the standards outlined in the University of Oregon Thesis and Dissertation Style and Policy Manual. The manual is available from the Graduate School website. Doctoral dissertations must be submitted electronically to ProQuest. Copyright registration is optional. Theses and dissertations completed at the University of Oregon will be available in Scholars' Bank, the UO's open-access repository for the intellectual work of its faculty, students, and staff at the University of Oregon.

Research Compliance

University policy requires that students who intend to engage in research involving human or animal subjects have their research procedures approved before they begin to collect data. Researchers who want to use human subjects may obtain protocol forms and procedures from the Research Compliance Services website (<http://rcs.uoregon.edu>). Researchers who want to use animal subjects may obtain protocol forms and procedures from the Animal Welfare Services website (<https://aws.uoregon.edu>).

Dissertation Committee

Following advancement to candidacy, the candidate's department proposes the membership of the dissertation committee to the dean of the Graduate School, who appoints the committee after approving it.

The committee includes at least four instructional faculty members. Three of the members are from the department awarding the degree and one is from outside the department. When appropriate, some of the home department committee members may be from another department, with the approval of the dean of the Graduate School and the home department. The committee should be proposed to the dean within one month after advancement to candidacy but in no case later than six months before completion of the dissertation defense.

A detailed description of the policy on dissertation committees is available on the Graduate School website.

Dissertation Registration

Registration for Dissertation (603) is allowed only after the candidate has advanced to candidacy. Doctoral students must have a minimum of 18 credits of Dissertation (603) to graduate. Doctoral students are required to enroll for a minimum of 3 credits of Dissertation (603) in the term of degree completion and during any other term in which they are utilizing faculty time or university resources.

Defense of Dissertation

Formal, public defense must take place on campus at a date set by the committee chair and approved by the Graduate School.

Tentative approval of the dissertation by the committee is recommended prior to formal defense. This evaluation is based on copies of the final manuscript, which the candidate provides for the dissertation committee at least three weeks before the formal defense.

The approved application for final oral defense must also be filed with the Graduate School three weeks before the formal defense. Visit the Graduate School website for specific instructions.

The time and place of the defense must be publicly noted. The dissertation committee must be present at the defense (with some exceptions—see the Graduate School website for details), and the chair of the committee must certify to the Graduate School within two weeks following the defense that the defense was held as scheduled.

Completion of Dissertation

Within two weeks following the defense of the dissertation but before the dissertation is submitted to the Graduate School, each member of the dissertation committee must confirm in writing either approval or disapproval of the final version. Approval requires a unanimous vote. In the event of a split vote, the dean of the Graduate School determines the review procedure after consultation with the student, the department chair (or the school or college dean), and the committee.

Committee members should sign the Certificate of Completion, signaling approval of the dissertation, only if they have seen and approved what is substantially a final draft and if they are willing to delegate the overseeing of remaining minor revisions to the chair. If this is not the case, they should not sign the Certificate of Completion. If no signed approval form is received by the Graduate School within two weeks following the scheduled oral defense, another oral defense must be scheduled. Once the dissertation has been approved by the committee, the student must submit the dissertation electronically to the Graduate School. Visit the Graduate School website for deadlines and submission instructions.

Time Limit

The seven-year time limit for completing a doctoral degree begins with the first term of admission as a conditional or regular doctoral student at the University of Oregon. The required year of residency, the completion of advancement to candidacy requirements, and the completion of the doctoral dissertation must all be accomplished within this seven-year period. On-leave status does not extend the seven-year deadline except when the leave is for the student's serious health or medical condition or for parenting needs during the 12 months immediately following a child's birth or placement in the home.

A petition for an extension of the period can only be considered if the student has already advanced to candidacy and has an approved dissertation proposal by the end of the seventh year. Petitions for extension of the seven-year limit may include the requirements of

recompleting the doctoral residency requirement, advancement to candidacy requirements, or both. Petitions are evaluated case by case and are not automatically granted.

Continuous Enrollment

Unless on-leave status has been approved, a student enrolled in a doctoral program must attend the university continuously until all the program and university requirements, including submission of the dissertation to the Graduate School, have been met. To be continuously enrolled, the student must register for 3 graduate credits each term excluding summer sessions. See On-Leave Status (p. 948) under General Requirements and Policies.

On-Leave Status

While on on-leave status, the doctoral candidate acknowledges that he or she is not using any university or faculty services (e.g., no examinations are being taken, no committee changes are being processed, and no dissertation chapters are being submitted for review). On-leave status maintains the student's status as a degree candidate and reserves a place for dissertation supervision and other academic affairs upon the student's return to active enrollment within the seven-year time limit.

Doctor of Education

The Doctor of Education (DEd) degree is granted in recognition of the candidate's mastery of theory, practice, and research in professional education. Candidates for the DEd degree must meet the requirements established by the College of Education. The general requirements for residence, dissertation, advancement to candidacy, time limit, and continuous enrollment are the same as for the PhD degree. The dissertation may be either a report of research that makes an original contribution to knowledge or a study in which the student takes knowledge that is available and produces a constructive result of importance and value for educational practice.

Doctor of Musical Arts

Requirements for the doctor of musical arts (DMA) degree include formal admission, proficiency and comprehensive examinations, second languages, a program of study including area of emphasis, and a dissertation, lecture document, or digital portfolio. Requirements for residence, time limit, and continuous enrollment are the same as those listed for the PhD degree. See the **School of Music and Dance** section of this catalog for details.

Chronological Summary of Procedures Leading to Doctoral Degrees

- Admission**
- Continuous enrollment.** Students enrolled in advanced degree programs must attend the university continuously (except for summers) until all the program's requirements are completed, unless on-leave status has been approved. Minimum enrollment is 3 graduate credits a term
- Course work and residence.** Student's advisory committee, appointed by the department, school, or college, determines the program, which must include at least 81 credits of accredited graduate work beyond the bachelor's degree over the course of at least three years, of which at least 27 credits must be completed at the University of Oregon
- Second languages or other specialized knowledge.** Regulations are set by the department, school, or college
- A comprehensive examination or other similar requirements** covering the major discipline advances the student to candidacy for the degree. Advancement to candidacy is completed after the majority of required course work has been completed and after most of the requirements for the degree, except completion and defense of the dissertation, have been satisfied
- Appointment of dissertation committee, registration for Dissertation (603), and completion of dissertation.** The committee is appointed following advancement to candidacy and at least six months before completion of the dissertation. Typically, the committee consists of at least three members of the graduate faculty of the candidate's home department as well as a Graduate School representative who is a graduate faculty member from outside the candidate's department. A minimum of 18 credits in Dissertation (603) are required after advancement
- Application for degree** made to the Graduate School. Deadlines and instructions are available on the Graduate School website
- Defense of dissertation.** The approved application for final oral defense must be filed with the Graduate School no fewer than three weeks before the date of defense
- Dissertation publication,** arranged through the Graduate School
- Granting of degree** at end of term in which all degree requirements are satisfied
- Diploma,** with commencement date, issued by Office of the Registrar

AIM 609. Terminal Project. 1-6 Credits.
Repeatable.

AIM 610. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

AIM 642. Managing Organizations in Technological Environments. 3 Credits.

Examines critical issues in business and provides a framework for redesigning organizations in response to change. Topics include market trends, work force changes, and environmental conditions.

AIM 646. Creating Business Solutions with Technology. 3 Credits.
Methods of aligning information technology planning with corporate goals and objectives. Topics include strategic planning, design and evaluation of technology projects.

AIM 654. Information Design and Communication. 3 Credits.
Addresses concepts, vocabulary, tools and technologies related to the design and preservation of electronically processed and print information that increases attention and understanding.

AIM 656. Information Design Trends. 3 Credits.
Examines information design trends, as they affect standards and website implementation, from a project manager's perspective.

AIM 665. Project Management. 3 Credits.
Presents theoretical and practical applications of scheduling and project management. Topics include planning, budgeting, and evaluation using project management tools.

AIM 668. Information Systems and Management. 3 Credits.
Information systems, how they change, the role of management, and the structure of organizations. Topics include the strategic role of information, managing systems implementation, and end-user computing.

Joint Campus Courses

JC 610. Joint Campus Experimental Course: [Topic]. 1-15 Credits.

Research Centers and Institutes

The university's interdisciplinary centers and institutes provide opportunities for graduate training and research. Members hold faculty positions in related academic departments. Students who want to work in one of the institutes as part of thesis or dissertation research must satisfy the graduate degree requirements of the related department through which they earn their degree.

Students who want to work in any of these fields may obtain information about the programs and financial aid from institute and center directors as well as online (<http://research.uoregon.edu/content/uo-research-centers-and-institutes>).

Center for Cybersecurity and Privacy

Jun Li, Director

541-346-4424

ccsp.uoregon.edu

The Center for Cybersecurity and Privacy conducts a variety of research projects and educational efforts focusing on the security of computer networks and systems. The center brings together faculty members working in multiple departments and schools, including the Department of Computer and Information Science, the Department of Philosophy, the Charles H. Lundquist College of Business, the School of Law, and Information Services, among others.

Center for High-Energy Physics

Eric Torrence, Director

541-346-4898

uoregon.edu/~chep

The Center for High-Energy Physics enhances the physics research activities at Oregon by sponsoring seminars on topics in high-energy physics, hosting visiting scientists, supporting graduate student research, aiding interaction between experimental activities and theoretical investigations of Oregon scientists, and fostering communication of research to the broader community.

Center for the Study of Women in Society

Michelle McKinley, Director

541-346-5015

csws.uoregon.edu

This multidisciplinary research center generates, supports, and disseminates research on gender and all aspects of women's lives. A member of the National Council for Research on Women, the center is one of 95 women's research and policy centers in the United States and among 300 such centers in more than 80 countries.

Committee on the Advancement of Women Chemists

Geri Richmond, Director

coach.uoregon.edu

The committee is a grassroots organization working to increase the number and career success of women scientists and engineers. In

addition to providing avenues for networking and mentoring of scientists and engineers at all levels, it works closely in an advisory capacity with many institutions, government organizations, and departments to create a professional workplace that provides an equal opportunity for discovery.

Institute for a Sustainable Environment

Heidi Huber-Stearns, Director

541-346-0675

sustainable.uoregon.edu

The institute performs interdisciplinary research at the nexus of ecological, economic, and social sustainability, resolving complex problems and enabling communities to sustain economies and environmental systems through investigation and analysis of natural resource management, land use, climate change, rural development, transportation, renewable energy, natural hazards, and environmental education.

Institute of Ecology and Evolution

Matt Streisfeld, Director

541-346-4532

ie2.uoregon.edu

The Institute of Ecology and Evolution, established in 2002 as the Center for Ecology and Evolutionary Biology, promotes and facilitates research and graduate education in ecology and evolutionary biology. The institute encourages scientific interactions among its members and between members and the wider academic community.

Institute of Molecular Biology

Ken Prehoda, Director

541-346-7992

molbio.uoregon.edu

The University of Oregon offers a wide variety of research and training opportunities in contemporary molecular, structural, cellular, and developmental biology. The institute fosters research and training in contemporary biology at the molecular level by bringing scientists from biology, chemistry, and physics into a common intellectual and physical space.

Institute of Neuroscience

David McCormick, Director

541-346-4556

www.neuro.uoregon.edu

The Institute of Neuroscience is an interdisciplinary research group of scientists, with faculty members and students drawn from the Departments of Biology, Human Physiology, and Psychology. Its laboratories offer graduate and postdoctoral training in the neurosciences with projects that address the development of the nervous system and human cognitive processes.

Institute of Theoretical Science

Dietrich Belitz, Director

541-346-5204

uoregon.edu/~its

The Institute of Theoretical Science is a center for research in several interrelated disciplines that encompass mathematics, theoretical chemistry, and theoretical physics. Research interests of the institute's

members include particle physics, astrophysics and cosmology, gravitational physics, condensed matter physics and statistical mechanics, group representation theory, geometric analysis, atomic physics, nonlinear dynamics, optical physics, biophysics, and the foundations of quantum mechanics.

Materials Science Institute

Darren Johnson, Director

541-346-6442

materials.science.uoregon.edu

The purpose of the Materials Science Institute is to study the structure and properties of materials, to educate in the sciences of materials, and to serve Oregon as a resource in these sciences. Since 1985, the institute has more than tripled the size of its research program, developed four new graduate programs in materials, and contributed to the state's prosperity through collaboration with more than 25 Oregon companies.

Oregon Advanced Computing Institute for Science and Society

Allen D. Malony, Director

541-346-0534

www.nic.uoregon.edu

The center researches the application of computer science and numerical computation to problems with brain modeling and imaging. High-performance computing plays a significant role in the research at the center.

Oregon Center for Optical, Molecular, and Quantum Science

Steven van Enk, Director

541-346-4528

oco.uoregon.edu

The center encompasses research in basic and applied aspects of optics in physics and physical chemistry. Members of the center are instructors in physics and chemistry; associate members are from these departments as well as from institutions outside the university; students—undergraduate, master's, and doctoral—are involved in all aspects of research at the center.

Oregon Humanities Center

Paul Peppis, Director

541-346-3934

ohc.uoregon.edu

The center is the sole interdisciplinary umbrella organization for the humanities at the University of Oregon. It seeks to promote and strengthen the humanities both on campus and in the broader community by supporting faculty research and teaching, fostering collaboration among the disciplines, and sponsoring a wide variety of public programs.

Oregon Institute of Marine Biology

Craig M. Young, Director

541-888-2581

uoregon.edu/~oimb

Founded in 1930, the Oregon Institute of Marine Biology is the third-oldest marine laboratory on the Pacific Coast. The 130-acre campus,

located about two hours from Eugene, maintains housing and research facilities for visiting investigators and students from other institutions. Members of the resident faculty are from the UO Department of Biology, conducting research on the development, ecology, evolution, and physiology of marine organisms worldwide from the intertidal zone to the deep sea.

Prevention Science Institute

Elizabeth A. Stormshak, Director

541-346-9396

psi.uoregon.edu

The Prevention Science Institute is a multidisciplinary institute focused on understanding human development, preventing behavioral health problems, and implementing effective interventions in community settings, engaging in research on social and emotional processes among children, adolescents, and families to improve their lives and well-being throughout their lifespan. The institute also provides vital professional and research training for graduate and undergraduate students.

Research Core Facilities

The university's research core facilities are administered to promote excellence in research, innovation, and graduate education at the University of Oregon. To that end, these specialized facilities provide access to specific types of research capacity—equipment, material, data acquisition, data analysis, consultation and expertise, and other services.

Aquatic Animal Care Services

Tim Mason, Manager

541-346-4598

Aquatic Animal Care Services provides support for research involving fish and other aquatic vertebrates. Its primary duty is to support the Zebrafish International Research Center, which has recently been expanded with the support of a National Institutes of Health American Recovery and Reinvestment Act facilities grant. This facility supports the work of dozens of researchers who use zebrafish as a model system for genetics, development, host-microbe interactions, and neurobiology. Zebrafish research was founded at the University of Oregon in the early 1980s by George Streisinger and has since spread to include thousands of researchers drawn from institutions around the world.

Center for Advanced Materials Characterization in Oregon

Kurt Langworthy, Director

541-346-3660

camcor.uoregon.edu

The Center for Advanced Materials Characterization in Oregon is a user facility housing a comprehensive array of materials characterization instrumentation and expertise to serve the needs of researchers on the University of Oregon campus, regional industries, and academic institutions. The facilities provide infrastructure for research in chemistry, nanoscience, engineering, physics, materials science, geology, bioscience, and optics.

Genomics and Cell Characterization Core Facility

Doug Turnbull, Director

541-346-5170

gc3f.uoregon.edu

The Genomics and Cell Characterization Core Facility supports scientific research at the University of Oregon by offering genetic and genomic technologies. The facility provides in-house services and specialized equipment, including Sanger DNA sequencing, microarray-based genotyping, microarray printing, robotics for high-throughput manipulation of DNA samples, and next-generation, Illumina-based, high-throughput DNA sequencing and associated bioinformatics. In the near future, the facility will offer cell-sorting services.

Greenhouse Facility

Susan Belcher, Interim Manager

541-346-2546

uogreenhousefacility.uoregon.edu

The University of Oregon Greenhouse Facility comprises more than 6,000 square feet of greenhouse space and a one-acre field to support

research and teaching activities. The facility consists of a small greenhouse on the fourth floor of Onyx Bridge, two large greenhouses near Campus Operations, and the Quonset, with an incubator, growth chambers, drying ovens, potting bench, and more. The facility supports the research and teaching missions of the faculty and students in multiple academic departments and institutes across the university, as well as many universities throughout the country. The facility is staffed by a part-time greenhouse manager and by student workers.

Histology and Genetic Modifications Core Facility

Ute Hostick, Manager

541-346-4935

hgem.uoregon.edu

The facility provides all the services necessary to produce and maintain genetically modified mice. These services range from designing projects to maintaining colonies. The facility also houses histology services.

Research Advanced Computing Services

Nick Maggio, Director

541-346-6990

hpcf.uoregon.edu

Research Advanced Computing Services (formerly the High-Performance Computing Research Core Facility) supports research computing at the University of Oregon by providing large-scale computing resources, performance storage, high-speed data transfer capabilities, and support for data sharing. In addition, it provides consulting services in the computational sciences, training on the use of resources, and supports grant proposals through formal partnerships or by providing letters of support.

Robert and Beverly Lewis Center for Neuroimaging

Fred Sabb, Director

541-346-0337

lcni.uoregon.edu

The Lewis Center for Neuroimaging, a component of the Brain, Biology, and Machine Initiative at the University of Oregon, supports interdisciplinary, multifaceted research in cognitive neuroscience and biological imaging. The center has a Siemens Magnetom Skyra 3T magnetic resonance imaging (MRI) unit and full capabilities for the design and fabrication of magnetic resonance coils to support a broad range of research needs and applications.

Technical Science Administration

John Boosinger, Director

541-346-4683

tsa.uoregon.edu

The Technical Science Administration is a collection of professional machinists and electrical engineers who help support internal and external research projects and equipment. The shops prototype sophisticated instrumentation for novel research projects, engineer creative solutions and products, and repair, upgrade, or retrofit existing scientific instrumentation.

Terrestrial Animal Care Services

Monte Matthews, Director

541-346-4957

teacs.uoregon.edu

Terrestrial Animal Care Services is responsible for administering all activities related to the care and use of animals. Its functions include procurement of all live vertebrates for research and teaching, supervision of animal technicians, control of animal holding facilities, and provision of veterinary care. Terrestrial Animal Care Services also has the responsibility for developing and implementing a plan for obtaining accreditation from the Association for Assessment and Accreditation of Laboratory Animal Care International for the University of Oregon's animal care and use program.

Undergraduate Studies

Undergraduate studies, a division of the Office of Academic Affairs, offers programs that enrich the academic life of undergraduate students in all majors and preprofessional programs. Under the leadership of the vice provost for undergraduate studies, the division promotes

- a campus culture of intellectual curiosity and engagement
- opportunities for students at all levels to be creative and to work in close association with outstanding faculty members
- a coherent approach to general education

The central responsibility of the division is to introduce students to the university and the world of ideas, supporting those who are curious and intellectually vigorous regardless of their cultural background or socioeconomic circumstances.

Courses

UGST 100. Temporary Group-Satisfying Course. 4 Credits.

UGST 101. Introduction to University Study. 3 Credits.

Helps students learn, adapt, and apply effective study skills, including strategies for time management, note taking, critical reading, writing, and test preparation.

UGST 111. Academic Residential Community—Arts and Letters: [Topic]. 1-4 Credits.

Introduces students to the academic and social aspects of university life and to the discipline of Arts and Letters with a small group environment with Arts and Letters faculty. Repeatable twice for a maximum of 4 credits.

UGST 112. Academic Residential Community—Social Science: [Topic]. 1-4 Credits.

Introduces students to the academic and social aspects of university life and to the discipline of Social Sciences with a small group environment with Social Sciences faculty. Repeatable twice for a maximum of 4 credits.

UGST 113. Academic Residential Community—Science: [Topic]. 1-4 Credits.

Introduces students to the academic and social aspects of university life and to the discipline of Science with a small group environment with Sciences faculty. Repeatable twice for a maximum of 4 credits.

UGST 199. Special Studies: [Topic]. 1-4 Credits.

Repeatable.

UGST 200M. Temporary Multilisted Course. 4 Credits.

UGST 298. Temporary Group-Satisfying Course. 4 Credits.

UGST 300. Temporary Group-Satisfying Course. 4 Credits.

UGST 399. Special Studies: [Topic]. 1-4 Credits.

Repeatable.

UGST 400M. Temporary Multilisted Course. 4 Credits.

UGST 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

UGST 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

UGST 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

UGST 408. Workshop: [Topic]. 1-4 Credits.

Repeatable.

UGST 409. Practicum: [Topic]. 1-9 Credits.

Repeatable.

UGST 410. Experimental Course. 1-4 Credits.

Repeatable.

UGST 609. Practicum: [Topic]. 1-4 Credits.

Repeatable for a maximum of 6 credits.

Academic Advising

Lori Manson, Director, Academic Success Programs

Grant Schoonover, Director, Student Engagement Programs

541-346-3211

541-346-6048 fax

101 Oregon Hall

The Office of Academic Advising assists students in making a smooth transition to the university, understanding general-education requirements, class scheduling, solving academic problems, and understanding academic sanctions and petitioning processes. The office supports students seeking guidance to achieve academic success, working closely with students in academic distress who may need particular assistance in navigating campus resources.

See **Preparatory Programs** in this section of the catalog for information about advising in preprofessional areas of study.

Academic Standing

Academic standing at the University of Oregon is determined by the grade point average (GPA) a student earns in university courses. Good academic standing means that the student has a cumulative UO GPA of 2.00 or better.

Academic sanctions are explained in the **Registration and Academic Policies** section of this catalog. Advisors in the Office of Academic Advising are available to assist students who want to discuss their academic standing.

National Student Exchange

The University of Oregon is one of nearly 160 colleges and universities throughout the country with membership in the National Student Exchange. Participating campuses are located in all fifty states, several territories, and Canada. Qualified students at member institutions may apply for exchange enrollment at a participating school. This program enables students to study in different geographical areas of the United States and Canada and take advantage of specialized courses or unique programs that may not be available on their home campuses. Participation in the program is limited to one year.

To qualify, a UO student must have a 2.50 cumulative grade point average (GPA) or better and have a record of good conduct at the university. Students typically participate in the exchange program during the sophomore or junior year. Students apply during winter term for the following academic year. Participants are assessed in-state tuition by the host institution or pay their usual University of Oregon tuition while on exchange. Materials are available in the Office of Academic Advising. For more information, contact Karla Haught, 541-346-3211.

Preparatory Programs

Students may begin preparing for the following professional or graduate programs at the University of Oregon. Some of the programs simply require a bachelor's degree for admission, while others require specific undergraduate courses, standardized examinations, and field experience. Students who are interested in the preparatory programs should consult appropriate university advisors as listed below.

Forensic Science, Preparatory

Deborah B. Exton, Head Advisor

541-346-4629

Forensic science is the application of scientific principles and technological practices to the study and resolution of criminal, civil, and regulatory issues. The role of the forensic scientist is twofold: to analyze physical evidence and to provide expert testimony in a court of law. This information is helpful in determining the innocence or guilt of the suspect. The University of Oregon provides advising and course work for students interested in pursuing a career or graduate study in the forensic science field, but does not offer a degree in forensic science. The majority of positions in crime laboratories require a minimum of a bachelor's degree in a physical science. The choice of major depends on your interests and the area of forensic science in which you plan to seek employment. Advanced degrees are useful for career advancement and may be required for certain positions. Employment opportunities exist in law enforcement agencies at the local, state, and national level as well as in the private sector. Employment can also be found within such agencies as the U.S. Food and Drug Administration, Environmental Protection Agency, Fish and Wildlife Service, and Drug Enforcement Administration.

Minimum Requirements

- Bachelor's degree in any discipline, although biology, chemistry, computer and information science, general science, or physics are most appropriate
- For graduate programs, scores from Graduate Record Examinations; a few schools will accept Medical College Admission Test scores instead
- Letters of recommendation from science faculty members

Suggested Science Courses

- A yearlong biology sequence is recommended. Check with the preforensic science advisor for the option that is best for you
- General Chemistry (CH 221, 222, 223) with laboratories (CH 227, 228, 229) or Honors General Chemistry (CH 224H, 225H, 226H) with laboratories (CH 237, 238, 239); Organic Chemistry (CH 331, 335, 336) with laboratories (CH 337, 338)
- Instrumental Analysis (CH 429) is strongly recommended
- Calculus I,II (MATH 251, 252) and a course in statistics
- General Physics (PHYS 201, 202, 203) with laboratories (PHYS 204, 205, 206)

Additional recommended course subjects are photography and public speaking.

A complete list of graduate programs is available from the head advisor. Students are urged to contact the graduate programs of their choice for information about application procedures.

Law, Preparatory

Willie and Donald Tykeson Hall

prelaw.uoregon.edu

Law schools require that applicants for admission have a bachelor's degree. They do not, however, require specific undergraduate majors or prescribe a specific prelegal curriculum. Law schools suggest that prospective students choose majors that provide education in broad cultural fields, which orient students to the general societal framework within which our legal system has developed.

Whatever the undergraduate major, prelaw students should place considerable emphasis on the development of skills in English composition and communication and on acquiring the ability to read with understanding, to think logically, and to perform research and analysis competently. Many law schools advise against a large concentration of courses in vocational training.

The following courses would be appropriate. They are not required for admission, nor do they substitute for a broad, well-developed educational background.

- College Composition I (WR 121 (<http://uocatalog.uoregon.edu/search/?P=WR%20121>)), College Composition II (WR 122 (<http://uocatalog.uoregon.edu/search/?P=WR%20122>)), College Composition III (WR 123 (<http://uocatalog.uoregon.edu/search/?P=WR%20123>)), Advanced Composition (WR 423 (<http://uocatalog.uoregon.edu/search/?P=WR%20423>))
- Introduction to Economic Analysis: Microeconomics (EC 201 (<http://uocatalog.uoregon.edu/search/?P=EC%20201>)), Introduction to Economic Analysis: Macroeconomics (EC 202 (<http://uocatalog.uoregon.edu/search/?P=EC%20202>))
- Inventing America (HIST 201 (<http://uocatalog.uoregon.edu/search/?P=HIST%20201>)), Building the United States (HIST 202 (<http://uocatalog.uoregon.edu/search/?P=HIST%20202>)), American Century (HIST 203 (<http://uocatalog.uoregon.edu/search/?P=HIST%20203>))
- Introduction to Accounting I (ACTG 211 (<http://uocatalog.uoregon.edu/search/?P=ACTG%20211>)), Introduction to Accounting II (ACTG 213 (<http://uocatalog.uoregon.edu/search/?P=ACTG%20213>)), or Accounting: Language of Business Decisions (BA 215 (<http://uocatalog.uoregon.edu/search/?P=BA%20215>))
- Critical Reasoning (PHIL 103 (<http://uocatalog.uoregon.edu/search/?P=PHIL%20103>)), Social and Political Philosophy (PHIL 307 (<http://uocatalog.uoregon.edu/search/?P=PHIL%20307>)), Social and Political Philosophy (PHIL 308 (<http://uocatalog.uoregon.edu/search/?P=PHIL%20308>)), Logic, Inquiry, and Argumentation (PHIL 325 (<http://uocatalog.uoregon.edu/search/?P=PHIL%20325>)), Introduction to Philosophy of Law (PHIL 344 (<http://uocatalog.uoregon.edu/search/?P=PHIL%20344>))
- Legal Process (PS 275), Constitutional Law (PS 470), United States Supreme Court (PS 484)
- Public Speaking as a Liberal Art (ENG 200) or Oral Controversy and Advocacy (ENG 330)
- Literature and additional expository writing courses
- Undergraduate legal studies courses (LAW) or conflict resolution courses (CRES)
- Journalism—Media and Society (J 201), Communication Law (J 385)

Courses in psychology and sociology are recommended.

Accredited law schools in the United States typically require their applicants to submit scores from the Law School Admission Test (LSAT). The examination is given multiple times a year. Consult the Law School Admission Council's website, lsac.org, for online registration

and additional information. Registration must be completed at least a month before the testing date. For those planning to attend law school immediately upon graduation, it is recommended that the examination be taken in the spring of the junior year or at the earliest possible date in the senior year.

Each law school has its own admission criteria. The primary predictors of admission are LSAT scores and grade point averages. Various subjective factors are also considered. Students should use the pass/no pass option with restraint. They should expect to provide letters of recommendation and statements of purpose.

Additional information about prelegal study and law school admission is available from the Law School Admission Council's website (<https://www.lsac.org>) and the UO prelaw advising blog (<https://prelaw.uoregon.edu>). Students who want more information or assistance should speak with an advisor in Tykeson Hall, the college and careers building.

Teacher Education, Preparatory

Angel Dorantes, Advisor

541-346-0658

124 Lorry I. Lokey Education Building

Several options are available to students who want teaching careers. The available teaching licensure programs at the UO are graduate-level master programs. Students who want elementary teaching licenses may earn a bachelor's degree in educational foundations and apply to the graduate UO Teach program. Both are administered by the Department of Education Studies.

Students who want middle-secondary teaching licenses complete their undergraduate degree in the content area in which they want to teach, then apply to the UO Teach program. Areas of undergraduate preparation appropriate for this program include languages (Chinese, French, German, Japanese, and Spanish), general social science studies, biology, chemistry, English, mathematics, physics, or integrated science. Students interested in social studies should consider the social studies teaching concentration in the General Social Science Program.

Master's Teacher Licensure Program (UO Teach)

These graduate-level licensure programs take one year to complete and emphasize school practicum, teaching methods, and pedagogy. With additional work, a master's degree can be earned. For more information, contact Amy Harter—uoteach@uoregon.edu, 541-346-1360—for additional questions regarding licensure and the master's programs.

Students interested in teaching music should contact the School of Music and Dance.

Admission to any of the graduate programs is competitive and requires a strong academic record. The University of Oregon also offers graduate programs in teaching special education and music. Applicants are expected to have tested their interest in teaching through various experiences with young people. It is important for prospective candidates to make early and regular contact with graduate programs at the university or other colleges to keep abreast of application timetables and admission requirements.

For additional information for the educational foundations program, please visit <https://education.uoregon.edu/edf>; for the UO Teach program, <https://education.uoregon.edu/uoteach>.

Accessible Education Center

Hilary Gerdes, Senior Director

541-346-1155

541-346-6013 fax

155 Oregon Hall

uoaec@uoregon.edu

The University of Oregon is dedicated to the principles of equal opportunity in education and recognizes disability as an aspect of diversity integral to the university and to society. The mission of the Accessible Education Center is to ensure the access and full inclusion of students with disabilities; the center staff works to create an educational environment that is usable, equitable, sustainable, and inclusive for all members of the university community. Inclusive design is promoted as a necessary approach to creating that environment.

The center is a resource to the university community on issues related to disability, inclusion, and access. Students, parents, and community members are encouraged to contact the office with questions, concerns, or requests regarding full participation in university classes, programs, and offerings. Members of the faculty and staff are encouraged to consult with the center on a range of student accessibility, accommodation, and universal design issues.

The office provides consultation, outreach, training, and direct support and services in the form of academic accommodations under guidance from the Americans with Disabilities Act and Section 504 of the Rehabilitation Act of 1973. These include, but are not limited to, academic advising, accessible technology assistance, classroom relocation, alternative testing procedures, instructor notification, note taking, and sign-language interpreting. The Accessible Education Center meets with students to discuss individual access needs and educational history, and reviews documentation to establish eligibility for services.

The university does not discriminate on the basis of disability in admission or access to, treatment of, or employment in its programs or activities. Modifications to academic requirements are made when needed to ensure that such requirements neither discriminate nor have the effect of discriminating on the basis of disability against a qualified applicant or student.

First-Year Programs

Amy Hughes Giard, Director

541-346-1241

107 Oregon Hall

The University of Oregon's nationally recognized first-year programs for freshmen offer

- coherent, high-quality class experiences shaped by the student's interests and imagination
- the environment of a fine small college with the courses and resources of a major research university
- opportunities early in the college career to get to know a small group of students and faculty members who share particular interests

First-Year Interest Groups (FIGs)

In a FIG, 20 freshman students jointly take two general-education-satisfying courses and a faculty-led College Connections seminar during fall term. Students engage in projects and assignments specific to each FIG as faculty members offer mentoring and advising. The seminar may also include informal out-of-class events such as hikes, dinner with the professor, or excursions to concerts or plays. Each group has a FIG academic assistant—an advanced undergraduate student—who assists in the seminar to help new students navigate the university. There are more than 50 FIGs to choose from each year.

Honors and Awards

Academic Honors

Departmental Honors

Many departments at the University of Oregon offer a bachelor's degree with honors in the academic major. Students may graduate with honors in the following majors:

College of Arts and Sciences—anthropology; biochemistry; biology; chemistry; Chinese; cinema studies; classics; comparative literature; computer and information science; earth sciences; economics; English; environmental science; environmental studies; ethnic studies; French; general science; general social science; geography; German; history; humanities; human physiology, international studies; Italian; Japanese; linguistics; marine biology; mathematics; medieval studies; philosophy; physics; political science; psychology; religious studies; Romance languages; Russian, East European, and Eurasian studies; sociology; Spanish; theater arts; women's, gender, and sexuality studies.

Charles H. Lundquist College of Business—accounting; business administration.

College of Design—art history; planning, public policy and management.

School of Journalism and Communication—journalism: advertising; journalism: media studies; journalism: public relations.

Specific requirements of departmental honors programs are listed in the departmental sections in this catalog.

Honors Lists

Dean's List

The Dean's List is announced after each fall, winter, and spring term. To qualify, a student must be an admitted undergraduate, complete at least 15 credits for the term, and have a term GPA of 3.75 or better; 12 of the 15 credits must be graded. Credits deducted for regression do not count toward the 15-credit requirement. Grade changes recorded through the second week of the subsequent term resulting in a change to the term GPA can affect the Dean's List notation (removal or addition).

Junior Scholars

The 100 undergraduates with 90 to 134 credits, the last 45 taken at the UO, and the highest GPAs are named junior scholars by the Mortar Board senior honor society during winter term.

Latin Honors

Graduating seniors who have earned at least 90 credits in residence at the University of Oregon and have successfully completed all other

university degree requirements are eligible for graduation with Latin honors. These distinctions are based on students' cumulative GPA levels for each academic year, determined by rounding the previous five-year running average to the first decimal point. Postbaccalaureate students are not eligible for Latin honors. The Office of the Registrar computes Latin honors upon graduation.

Honor Societies

One means of recognizing outstanding students at the University of Oregon is through election to membership in a chapter of a local, national, or international honor society. Criteria for membership and the scope of activities vary. Some focus on scholastic achievement; others consider grades and other factors such as community service and leadership. Some honor societies select members by invitation only; for others, students must submit applications.

Initiation Fees

Many honor societies charge initiation fees. The Olwen William Harris Endowment Fund has been established to help students who cannot afford to pay initiation fees. To receive money from this fund, students must complete a request form, available from the Office of the Dean of Students. An advisory committee reviews all requests and dispenses the awards.

Honoraries Based on Scholarship

(membership by invitation)

Golden Key

Golden Key national honor society recognizes scholastic achievement in undergraduate fields of study. Eligibility is limited to the top 15 percent of juniors and seniors. Students must have a 3.70 GPA and a minimum of 45 credits at the university to be invited. A membership reception is held in the spring, and two scholarships are awarded annually to outstanding junior and senior initiates. Initiation fee: \$95.

Phi Beta Kappa Society

Kevin Hatfield, President

541-346-1977

pbk.uoregon.edu

Founded in 1776, the Phi Beta Kappa Society is the oldest and most prestigious honor society in the nation. The UO has the only Phi Beta Kappa chapter in the Oregon University System.

The society honors students whose undergraduate academic records fulfill the objectives of a liberal arts education. Selection for Phi Beta Kappa is not automatic, but students do not have to apply or be nominated for consideration.

After screening academic records, a committee of Phi Beta Kappa members makes recommendations to the membership at large. Following an election meeting in late May, elected students are invited to join. Also elected are the Oregon Six—six students voted the most outstanding of those elected to membership that year. Students who accept the invitation to join are initiated before spring commencement. Initiation fee: \$85.

Criteria for membership are listed on the Phi Beta Kappa website. Students are typically invited to join the society shortly before they graduate.

Honoraries Based on Scholarship, Leadership, and Service

(membership by invitation and application)

Friars

Established in 1910, Friars is the oldest honorary on campus. Membership is composed of faculty members and of students who have completed at least three years of study. Criteria are contributions to the university, potential for community leadership, and commitment to the university as alumni. No application is required. Prospective members are nominated by the active membership. New members are selected each spring.

Mortar Board

A national honor society for seniors, Mortar Board emphasizes excellence in the areas of scholarship, leadership, and service. To be eligible for membership, students must have at least a 3.00 GPA, must be a full-time student at the University of Oregon, and must have attained junior academic standing as of fall term. Selection and initiation of qualified candidates takes place spring term. Fee: \$90.

Professional Organizations

Alpha Kappa Delta

C. J. Pascoe, Advisor

541-346-1384

cpascoe@uoregon.edu

An international sociological honor society, Alpha Kappa Delta is open to juniors and seniors who meet the following criteria: a cumulative GPA of at least 3.30, a cumulative GPA in UO sociology courses of at least 3.00, and completion of at least five sociology courses at the University of Oregon, at least four of which must be graded. Members investigate sociological issues and problems through social and intellectual activities that lead to improvement of the human condition. Initiation fee: \$55.

Alpha Kappa Psi

Chuck Kalnbach, Advisor

541-346-6164

akpsi@uoregon.edu

Alpha Kappa Psi is a national, professional fraternity for majors and minors in business, computer and information science, and economics. Founded to enhance the business education of men and women, the organization's mission is to develop well-trained, ethical, skilled, resourceful, and experienced business leaders. To achieve this, each chapter supplements the traditional classroom experience with business field trips, seminars, career activities, research surveys, and other professional events. A cumulative GPA of at least 3.00 is required for membership. Alpha Kappa Psi stands for the highest ideals of conduct and achievement in university and professional life. Initiation fee: \$100.

Asklepiads

Megan Weiler, Advisor

541-346-8035

mweiler@uoregon.edu

Asklepiads is for students interested in careers in the health sciences. Activities include dispensing prehealth sciences literature, maintaining information files on medical schools, supervising preceptorships in health

fields, and arranging tours of the Oregon Health and Science University in Portland. Information and applications are available on OrgSync (<https://orgsync.com/48859/chapter>).

Beta Alpha Psi

Shannon Dolan, Advisor

541-346-9197

sdolan@uoregon.edu

Beta Alpha Psi is a national scholastic and professional accounting and finance fraternity. Its primary objectives are to encourage and recognize scholastic and professional excellence in the field, to provide members with opportunities for self-development and association with practicing accountants and finance professionals, and to encourage in members a sense of ethical, social, and public responsibility. A cumulative GPA of at least 3.00, with a 3.00 in the upper-division accounting and finance courses, is required for membership. Additional requirements include 10 volunteer hours and 10 professional hours. Initiation fee: \$100.

Beta Gamma Sigma

Jonathan Moulton, Advisor

541-346-8694

jmoulton@uoregon.edu

Beta Gamma Sigma, a national scholastic honor society in business administration, promotes the advancement of education in the art and science of business and fosters integrity in the conduct of business operations. To be eligible for membership, a student must rank in the top 10 percent of the junior class, the top 10 percent of the senior class, or the top 20 percent of a master's degree program, or be a graduating doctoral candidate. Membership is by invitation only. Selection is by a faculty committee. Beta Gamma Sigma is strictly an honorary organization with no formal meetings other than the social functions accompanying initiation. Initiation fee: \$75.

Delta Phi Alpha

Chartered in 1936, Delta Phi Alpha is a national honor society dedicated to promoting the study of German language, literature, and civilization; to furthering an interest in and a better understanding of German-speaking people; and to fostering a sympathetic appreciation of German culture.

Membership is open to graduate and undergraduate students who have completed two years of college German. Students must have an overall GPA of 2.70 and a GPA of 3.30 in their upper-division German courses. Initiation fee: \$25.

Kappa Kappa Psi

Kappa Kappa Psi is an honorary band fraternity, a brotherhood dedicated to the betterment of bands and ensembles at the University of Oregon. The fraternity provides service around the School of Music and Dance, the campus, and the community, and honors high-quality musicians and students with membership. Initiation fee: \$110. Active dues: \$100 per year.

Kappa Tau Alpha

Kappa Tau Alpha is a national honor society that recognizes and encourages high scholastic and professional standards among journalism majors. Membership is by invitation to undergraduate and graduate students in the top 10 percent of their classes. Faculty members in the

School of Journalism and Communication select new members. Initiation fee: \$30.

Mathematics Association of America

The student chapter of the Mathematics Association of America sponsors films and talks on subjects that are not usually encountered in the classroom. The talks, by students and faculty members, are geared to undergraduates. Students are welcome to attend events regardless of whether they choose to join the chapter.

Mu Phi Epsilon

An international music fraternity, Mu Phi Epsilon members gain experience in public performances. Music majors who have reached second-term freshman standing in the music-major curriculum are eligible for election on the basis of scholarship, musicianship, character, and personality. Activities include presenting musical programs on and off campus, organizing receptions at musical events, and hosting guest artists. Initiation fee: \$43.

Order of the Coif

Margaret L. Paris, Advisor
541-346-3880
mparis@uoregon.edu

Chartered at the UO in 1934, Order of the Coif is a national law school honor society that recognizes superior scholarship and promotes the ethical standards of the legal profession. The School of Law faculty selects members from the top 10 percent of each graduating class. Initiation fee: \$25.

Phi Beta

www.phibeta.com (<http://www.phibeta.com>)

Phi Beta is a professional fraternity for students of music, speech, drama, dance, or art. It aims to encourage high professional standards and support for the creative and performing arts. Membership criteria are based on scholarship and intellectual achievement, career development, and the use of students' talents to serve other students, schools, and communities. Initiation fee: \$25.

Pi Alpha Alpha

Pi Alpha Alpha, a national honor society, promotes scholarship and recognition among students and professionals in public affairs and administration and fosters integrity and creative performance in government and related public service. To become members, past or present students or teachers must display high academic achievement or outstanding public service in public-affairs or public-administration programs of universities that belong to the National Association of Schools of Public Affairs and Administration. Initiation fee: \$30.

Psi Chi

The purpose of the national Psi Chi society is to encourage, stimulate, and maintain scholarship among psychology undergraduate and graduate students. Potential members must be in the top 35 percent of their class and have at least 12 credits in psychology. A 3.00 GPA is required of graduate students. Selection by application takes place throughout the year. Initiation fee: \$35.

Sigma Tau Delta

Corbett Upton, Advisor

541-346-3961
cupton@uoregon.edu

Sigma Tau Delta is the international English honor society, an organization that confers distinction for high achievement in English language and literature in undergraduate, graduate, and professional studies. Sigma Tau Delta also recognizes the accomplishments of professional writers who have contributed to the fields of language and literature. A member of the Association of College Honor Societies, Sigma Tau Delta began in 1924 at Dakota Wesleyan University. There are more than 800 active chapters located in the United States, the Caribbean, Europe, and the Middle East. To be eligible to apply, students must have a minimum overall GPA of 3.25 and a minimum English GPA of 3.50, and have completed at least three semesters or five terms of college course work and four English courses by the spring term. Initiation fee: \$45.

Upsilon Pi Epsilon

Michal Young, Advisor
541-346-4140
michal@uoregon.edu

Upsilon Pi Epsilon is the only existing honors society in the computing and information disciplines. Its mission is to recognize academic excellence at both the undergraduate and graduate levels. Criteria for membership are available from the advisor. Initiation fee: \$15.

Service Organizations

Alpha Phi Omega

apo@uoregon.edu

A service honorary organization for undergraduate and graduate students, Alpha Phi Omega develops leadership skills and promotes friendship by serving the local community. Applications are accepted year-round in Suite 4 of the EMU. Initiation fee: \$15.

Awards and Prizes

Individual and Organization Awards

Listed are major university awards presented during Family Weekend in May. Selection criteria are available from the honors and awards coordinator in the Office of the Dean of Students.

- American Association of University Women Senior Recognition Award (senior woman)
- Arts and Advocacy in the Lesbian Community Award (art or music student)
- Bess Templeton Cristman Award (junior woman)
- Burt Brown Barker Vice Presidential Cups (men's and women's living organizations)
- Centurion Awards (undergraduate and graduate students)
- Robert and Opal Clark Scholarship (any student)
- Dean's Award for Service (senior)
- Doyle Higdon Memorial Trophy (sophomore student-athlete)
- Ella Travis Edmundson and Mercy Travis Davis Scholarship (sophomore, junior, and senior women)
- Emerald Athletic Award (senior student-athlete)
- Friendship Foundation Awards (international student)
- Frohnmayer Award (fifth-year senior)

- John Moore Scholarship (lesbian, gay, bisexual, and transgender concerns)
- Gerlinger Cup (junior woman)
- Gherty-Moore Nontraditional Student Scholarship
- Golda Parker Wickham Scholarship (any student)
- Graduate Service Awards (master's or doctoral students)
- R. J. Hoyman Scholarship (lesbian, gay, bisexual, and transgender concerns)
- International Student Awards (any student)
- Jackson Athletic Trophy (senior woman athlete)
- Jewel Hairston Bell Award (person of color)
- Jim Buch Award (junior)
- Koyl Cup (junior man)
- Mary Hudzikiewicz Award (freshman)
- Maurice Harold Hunter Leadership Scholarship (junior man from Oregon)
- Mother's Club Scholarships (any student)
- Nontraditional Student Award
- Osher Scholarship (reentry nontraditional students)
- Paul Olum Award (senior)
- Ray Hawk Award (senior)
- School of Music and Dance (music students)
- Theresa Kelly Janes Award (any student)
- Vernon Barkhurst Award (sophomore)
- Wilson Cup (senior)

Fellowships and Scholarships

For information about other fellowships and scholarships, see Student Financial Aid and Scholarships and departmental sections of this catalog.

- Neil D. Blackman Memorial Scholarship (political science award to undergraduate and graduate students studying humanities or political philosophy relevant to human rights and the responsibilities of individuals to democratic institutions)
- Thomas Condon Fellowship in Paleontology (graduate student of paleontology)
- Eric Englund Scholarship (senior or first-year graduate student in English or history)
- Alice Henson Ernst Scholarship (first-year graduate student in English)
- Barry M. Goldwater Scholarship (sophomore or junior math and science majors)
- Fulbright Grants for Overseas Study (graduate students)
- Fulbright-Hays Dissertation Research Abroad Program (doctoral candidates)
- German Academic Exchange Service Study Grant
- Walter and Nancy Kidd Scholarships (undergraduate students)
- Marshall Scholarship
- Rhodes Scholarship
- Rotary International Ambassadorial Scholarship (junior or senior-year undergraduate or graduate)
- Stanley Maveety Scholarship (first-year graduate student in English)
- Lloyd Staples Fellowship (undergraduate and graduate students in geological sciences)
- Truman Scholarship (junior-year undergraduate student)

- James C. Stovall Fellowship Fund (awards to undergraduate students of geological sciences)

Prizes

Several cash prizes are awarded for student essays and other competitions. The Department of Women's, Gender, and Sexuality Studies administers the Bruce M. Abrams Award in Lesbian, Gay, Bisexual Studies. The winning undergraduate project, which may be from any discipline, is honored with a \$500 prize.

The Department of Mathematics administers the William Lowell Putnam examination, a national competition offering prizes to top finishers.

The George W. Cherry Speech Award is a scholarship given to the best public speaker in the forensics program.

The Department of Philosophy oversees the George Rebec Essay Contest. Two prizes—\$100 gift certificates to the Duck Store—are awarded for the best undergraduate and graduate essays on any area of philosophy. Walter and Nancy Kidd Writing Prizes for undergraduate students are administered by the Creative Writing Program.

Students should inquire at their home departments about additional contests or competitions for expository or creative writing or other student projects.

Tutoring and Academic Engagement Center

Jeremiah Bridges, Director

541-346-5759

413 Knight Library
engage.uoregon.edu

The Tutoring and Academic Engagement Center offers resources and guidance to help students improve their learning and the quality of their course work.

Tutoring

Free drop-in tutoring for mathematics and writing is available throughout the week on the fourth floor of Knight Library. Writing tutors offer feedback that aids students in taking the next step in their studies. For math help, tutors circulate throughout the room to clarify concepts in algebra, trigonometry, and calculus.

For consistent, ongoing help throughout the term, students should consider small-group tutoring. Groups of six or fewer students meet two hours a week for support in specific math, language, and science courses. For individual tutoring and costs, contact the center office, where a tutor database for many UO courses is maintained.

Class Encore

Small study groups for challenging classes allow students to gather once a week outside of class to practice course concepts and strategies. Peer leaders attend the classes and design collaborative activities for each group meeting. Offerings typically include groups for accounting, biology, chemistry, computer science, and mathematics.

Courses

One- to 3-credit courses offer strategies to improve the quality of course work, enhance learning, and boost academic confidence. Subjects

include time management, test-taking, memory improvement, speed reading, and more.

Individual Meetings

Learning specialists are available to meet students on an individual basis to discuss specific concerns, suggest study approaches, and offer resources that help students reach their educational goals.

Workshops

Throughout the year, the center's Get Savvy program features free workshops on academic success topics such as maximizing time or preparing for midterm examinations that are available throughout the year.

Test Preparation

The center offers preparation for the Graduate Record Examination and Medical College Admission Test. These test preparation workshops are designed to help students gain knowledge, skills, practice, and confidence.

Undergraduate Support Program

This program offers academic support to students who have the potential, motivation, and commitment to earn University of Oregon degrees, despite having faced obstacles that affected previous academic performance. Students are notified of eligibility at the time of their admission.

Supplementary Academic Programming

The college experience may not be limited to what is learned solely on the university campus. Continuing and Professional Education offers options for those returning to higher education after a period away, those interested in noncredit educational opportunities, or those who seek degree credit outside the classroom. Opportunities to study abroad are available through the Office of International Affairs for those who want to expand their intellectual and cultural horizons and to broaden their perspective of the world. For those who want to pursue a career in the military, the Department of Military Science provides opportunities to study leadership principles, military organization and history, and the place of the armed forces in serving the goals of national policy.

Continuing and Professional Education

Sandra Gladney, Executive Director

541-346-4231

800-824-2714

Baker Downtown Center

975 High St., Suite 110

1277 University of Oregon

Eugene, Oregon 97403-1277

Continuing and Professional Education at the University of Oregon, working in partnership with campus schools and colleges, selected vendors, and national credentialing associations, provides educational opportunities to people seeking instruction and enrichment beyond the traditional campus experience.

Academic Programs

Applied Information Management (AIM) Master's Degree

aim.uoregon.edu

The Applied Information Management Program is no longer accepting applications for admission, and the program will be closing. Current students may find information on the requirements they must fulfill to graduate online (https://aim.uoregon.edu/degree_resources/degree_requirements.php).

Community Education

cep.uoregon.edu

An important dimension of the University of Oregon's responsibility to continuing education is the Community Education Program, which makes university courses available to people who are not formally admitted to the university.

Community education students may register for a maximum of 8 credits per academic term. Credits earned through the Community Education Program are listed on a student's permanent UO academic record.

Lifelong Learning

Osher Lifelong Learning Institute

osher.uoregon.edu

The Osher institute is part of a national network of more than 120 programs serving seasoned adults in the continued pursuit of knowledge. This noncredit program is designed for adults 50 and older, providing year-round access to a variety of lectures, short courses, peer-led study and discussion groups, educational tours and field trips, and shared interest groups. Annual or six-month registration options are available. The institute has two program sites: central Oregon and the Eugene-Springfield area.

Nearly 800 members engage in learning experiences led by institute staff members, independent scholars, community experts, and current or retired university faculty members in an informal classroom setting. Membership is open to all interested adults; a previous affiliation with the University of Oregon is not a requirement of membership.

UO Insight Seminars

uoinsight.uoregon.edu

UO Insight Seminars are short-term, in-depth investigations of art, literature, poetry, philosophy, history, architecture, archaeology, religion, and current events. Led by UO and guest faculty members who provide formal study guides and lead college-level discussions, the seminars offer college-level study for the sake of personal fulfillment.

Other Services

continue.uoregon.edu/services

Customized Training

By partnering with Continuing and Professional Education, businesses, nonprofits, and government organizations can develop and administer trainings on- or offsite.

Conferences and Special Programs

Administrative support is provided for a variety of conferences and noncredit workshops, including events offered by academic departments and individual faculty members developing activities for UO students and community members, academic societies, associations, regional meetings, and nonacademic community-interest programs.

Military Science

Sharel L. Pond, Department Head

541-346-3102

800-542-3945

541-346-2813 fax

1679 Agate St.

1297 University of Oregon

Eugene, Oregon 97403-1297

mcmahond@uoregon.edu

The Department of Military Science, an instructional department that reports to the senior vice president and provost, offers four years of military science courses, lower and upper division. The 300- and 400-level courses are restricted to contracted Reserve Officer Training Corps (ROTC) cadets pursuing commissions as officers in the United

States Army. The 100- and 200-level courses are open to qualified and interested students.

Curriculum

The curriculum is an interdisciplinary course of study designed to meet the following objectives:

1. Provide opportunities to learn and practice leadership styles, dimensions, and techniques
2. Provide an understanding of the historical role of the US Army and how that role supports the goals and objectives of national policy
3. Develop and improve communication skills using practical oral and written exercises
4. Develop an understanding of the professional military ethic
5. Provide general knowledge of the structure of the US Army, its organization, and how its various components work together
6. Provide an understanding of American military history and the leadership principles that cause military leaders to succeed or fail

Lower Division

Lower-division (100- and 200-level) courses are offered for 1 or 2 credits each. The 100-level courses are offered to freshmen; the 200-level courses are offered to sophomores and upperclassmen. These courses provide the basic framework of knowledge and emphasize basic military terms, leadership, organization, and military history.

Upper Division

Upper-division (300- and 400-level) courses primarily are offered for 4 credits each. These courses are offered only to contracted cadets, or those in the process of contracting, who have satisfactorily completed the two three-course sequences Military Science I (MIL 121–123) and Military Science II (MIL 221–223). They provide the advanced leadership, decision-making, communication, ethics, and tactical education to prepare the student to become a commissioned officer in the U.S. Army.

Extracurricular Activities

The department supports a variety of events including ranger challenge (a club sport), intramural football, basketball, softball, and color guard for all home football games and UO Commencement.

About ROTC

The US Army supports ROTC programs at colleges and universities throughout the United States. Students who take military science courses may also participate, by contractual arrangement with the Department of the Army, in the process that leads to a commission. Each cadet must take, in addition to military science courses, a course in military history and in written communication. Most of these courses count toward general-education group requirements for a bachelor's degree.

The US Army sponsors two-, three-, and four-year federal scholarships, awarded competitively by the Army to students who seek a commission. It is possible for undergraduate students to obtain a commission through either a two-, three-, or four-year program of instruction. Graduate students who meet age requirements and have two academic years remaining at the UO may also pursue a commission through ROTC. Students interested in pursuing a commission, a scholarship, or both should contact the department.

Courses

MIL 121. Military Science I. 2 Credits.

Constitutional beginnings, organization, and role of today's army; physical fitness; introduction to equipment and small-unit operations.

MIL 122. Military Science I. 2 Credits.

Operational and survival skills, topographic map reading and land navigation, first-aid, small-unit tactics, and practical exercises with Army weapons and equipment.

MIL 123. Military Science I. 2 Credits.

Characteristics and methods of successful leadership--building trust, understanding, cooperation, and communication; responsibilities of leadership including personal motivation and ethics.

MIL 131. Physical Training. 1 Credit.

Participatory physical training program that follows the U.S. Army's physical fitness program. Prepares students for the rigors of military activities through a systematic physical conditioning process. Repeatable five times for a maximum of 6 credits.

MIL 141. Ranger Challenge. 3 Credits.

Course training focuses on basic infantry individual and team skills. Course culminates in squad-sized teams competing against other schools in the region. Repeatable once for a maximum of 6 credits.

MIL 191. Leadership Laboratory. 1 Credit.

Repeatable. Laboratory for practical experience. Assesses cadet leadership potential, communication, problem-solving, and decision-making skills. One field-training exercise a term. Repeatable five times for maximum of 6 credits.

MIL 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable. A current topic is Physical Fitness Training. Repeatable six times for maximum of 6 credits.

MIL 221. Military Science II. 2 Credits.

Basic leadership and technical military skills--map reading, first aid, and communication skills. Focus is individual abilities and building effective teams.

MIL 222. Military Science II. 2 Credits.

Purpose, roles, and obligations of commissioned officers; organizational values and their application to the decision-making process; military tactics in small-unit operations.

MIL 223. Military Science II. 2 Credits.

Self and team development in Army operations; comprehension and use of the five-paragraph Operations Order; tactics; land navigation.

MIL 321. Military Science III. 4 Credits.

Teaches the sixteen leadership dimensions and application to infantry tactics, operation orders, and orienteering. Lectures, laboratory, field training exercises.

Prereq or coreq: MIL 223

MIL 322. Military Science III. 4 Credits.

Strengthens individual abilities with experience in marksmanship, drill, and tactics. Lectures, laboratory, field training exercises.

Prereq: MIL 223

MIL 323. Military Science III. 4 Credits.

Evaluates leadership abilities in tactical and nontactical settings. Lectures, laboratory, field training exercises.

Prereq: MIL 223

MIL 331. Physical Training. 1 Credit.

Emphasizes physical fitness and overall good health. Focus is on the intensity, duration, and frequency of fitness training, resulting in improved health and physical fitness. Repeatable five times for a maximum of 6 credits.

MIL 405. Reading and Conference: [Topic]. 1-3 Credits.

Repeatable.

MIL 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

MIL 421. Military Science IV. 4 Credits.

Planning, evaluating, and conducting unit training and practical exercises. Lectures, laboratory, and field training exercises.
Prereq: MIL 323.

MIL 422. Military Science IV. 4 Credits.

Study of judicial and nonjudicial proceedings and administrative actions available to commanders. Lectures, laboratory, and field training exercises.

Prereq: MIL 323.

MIL 423. Military Science IV. 4 Credits.

Duties and responsibilities of a lieutenant; ethical decision making, counseling subordinates, evaluation reports, transition to active duty. Lectures, laboratory, and field training exercises.

Prereq: MIL 323.

Study Abroad

Office of International Affairs

Dennis Galvan, Vice Provost for International Affairs

541-346-5851

333 Oregon Hall

<http://international.uoregon.edu>

The Office of International Affairs manages study-abroad and overseas internship opportunities, welcomes and supports international students and scholars, and coordinates the wide range of international projects and transnational partnerships launched and maintained in many university academic units. The university enrolls more than 3,250 international students from nearly eighty countries, and sponsors 190 study-abroad programs in ninety countries. More than 1,200 UO students participate in study or internships abroad each year.

Global Studies Institute

Lori O'Hollaren, Director

541-346-1521

110 Gerlinger Hall

gsi.uoregon.edu

The Global Studies Institute supports internationally oriented research centers, programs, and initiatives to enhance faculty research, enrich the student experience, and promote the University of Oregon's academic excellence at home and with partners around the world. It hosts and supports nine of the university's key international projects and initiatives (listed below) and serves as a coordinator and promoter of the full range of international programs, projects, and initiatives on campus. In partnership with schools and colleges, the institute encourages interdisciplinary and cross-regional research, curriculum development, and community outreach, and pursues a program of fundraising and

grant writing to sustain global projects with the greatest impact on student success and faculty recruitment and retention.

Constituent units and programs of the Global Studies Institute include the following:

- Center for Applied Second-Language Studies, casls.uoregon.edu
- Center for Asian and Pacific Studies, caps.uoregon.edu
- Center for Global Health
- Gabon-Oregon Center, goc.uoregon.edu
- Oregon Statewide Area Studies Consortia (Oregon East Asia Network and Oregon African Studies Consortium)
- United Nations Educational, Scientific, and Cultural Organization (UNESCO) Crossings Institute for Conflict-Sensitive Reporting and Intercultural Dialogue, unesco.uoregon.edu
- University of Oregon Global Justice Program

Global Education Oregon

Thomas Bogenschield, Executive Director

541-346-3207

333 Oregon Hall

geo.uoregon.edu

Global Education Oregon (GEO) offers more than 300 programs in more than 90 countries where UO students may study, conduct research, or participate in a wide range of internships or service-learning experiences. These opportunities include full-term study-abroad programs; academic year exchanges with international universities; and short-term, faculty-led programs often held during the summer session. For complete information about all program opportunities, visit geo.uoregon.edu.

New Programs

The Study Abroad Programs Committee reviews GEO-sponsored study-abroad programs and approves new program proposals. Information about programs currently under development is available from the Office of International Affairs.

Internships

University of Oregon students may earn academic credit while they gain professional development experience abroad. Internships are open to juniors, seniors, and master's degree students who are currently enrolled in a UO degree program. Financial aid, including scholarships, is available. Several GEO programs allow students to combine part-time internships and part-time study in the same term abroad.

Grants and Scholarships

Because students are registered at the University of Oregon while participating in a study-abroad program, they are eligible to receive most or all of their UO-awarded financial aid. In addition, numerous scholarships are available for both undergraduate and graduate students planning to study or intern abroad, including new scholarships for first-generation college students and students with disabilities..

Distinguished international scholarships are also available to qualified graduating seniors and graduate students for research, university study, and international teaching. Fulbright grant applications must be submitted to the Fulbright Program advisor in early fall. The Office of International Affairs offers scholarship and grant advising for students. For a comprehensive overview of funding options abroad, visit geo.uoregon.edu/scholarships.

Course Equivalencies

When you participate in a GEO or GEO-sponsored study-abroad program, you will receive University of Oregon credit. For complete details, refer to the course equivalency process (<http://geo.uoregon.edu/course-equivalency>) and the Office of the Registrar course equivalency database (<https://registrar.uoregon.edu/geo-course-equivalencies>).

Academic Resources

To help students succeed in navigating the rigors of competitive higher education, the University of Oregon offers an array of support programs and resources for dedicated scholars in their quest for academic excellence.

Information Services

Jessie Minton, Vice Provost for Information Services and Chief Information Officer

541-346-1702
541-346-4397 fax
257 Computing Center
1212 University of Oregon
Eugene, Oregon 97403-1212
cio@uoregon.edu
<http://is.uoregon.edu>

Information Services provides a variety of campus-wide services:

- Email accounts and passwords
- Calendaring
- Telephones and voicemail
- Wireless and wired networking
- Data centers
- Virtual servers and storage
- Technology Service Desk, a help desk for questions about accounts, software, wireless, and other technology.

Information Services also operates the administrative software for finance data, student records, human resources records, and payroll, as well as a business reporting and analysis service.

Technology Service Desk

541-346-4357
68 Prince Lucien Campbell Hall
1225 University of Oregon
Eugene, Oregon 97403-1225
<https://service.uoregon.edu>

The Information Services Technology Service Desk ("tech desk") supports and aids university-affiliated students and members of the faculty and staff with their computing needs. Tech Desk services include the following:

- Software troubleshooting
- Account support
- First-level Ethernet and wireless network support
- Education in personal computing best practices

The tech desk offers in-person support Monday–Friday, 8:00 a.m.–5:00 p.m. During fall, winter, and spring terms, telephone support is available Monday–Friday, 8:00 a.m.–7:00 p.m.; during summer session, Monday–Friday, 8:00 a.m.–5:00 p.m. Help may be requested through the UO Service Portal (<https://service.uoregon.edu>) at any time. More information may be found online (<https://service.uoregon.edu/TDClient/KB/ArticleDet?ID=31879>).

UO Service Portal

<https://service.uoregon.edu>

The UO Service Portal includes the following:

- Catalog of information technology (IT) services
- How-to guides, troubleshooting information, and answers to common questions
- Online help-request function
- Contact information for participating IT support teams

Labor Education and Research Center

Robert Bussel, Director

541-346-5054
541-346-2790 fax
1675 Agate St.
1289 University of Oregon
Eugene OR 97403-1289

The Labor Education and Research Center (LERC) was established at the University of Oregon in 1977 with funding provided by the Oregon legislature to serve the educational and research needs of Oregon workers and their organizations. LERC has an advisory board that includes representatives from state labor and community organizations and other related constituencies. A university-based advisory committee also works with LERC faculty members on campus educational programs.

The center serves as a liaison between members of Oregon's labor relations community and the state university system. The center's research and educational programs provide a catalyst for interaction among labor leaders, public officials, arbitrators, labor relations specialists, community and nonprofit organizations, and members of the academic community.

The center produces educational programs including seminars, conferences, workshops, and short courses on campus and throughout the state. It offers training and education to workers and unionists in grievance handling, arbitration, collective bargaining, health and safety, and other issues of concern in today's complex and rapidly changing economy. Most of these programs are offered without credit.

The broader labor relations community of arbitrators, mediators, and labor relations professionals is served through LERC's conferences and programs on public- and private-sector labor law, worker participation, and labor-management cooperation.

Faculty members conduct both applied and scholarly research on current and emerging issues in labor relations and working life. Areas of research include the changing environment and structure of collective bargaining, sustainability and green jobs, immigration and Oregon's changing workforce, workplace health and safety, economic justice and the low-wage economy, privatization, and worker rights in organizing and dispute resolution.

For students enrolled at the University of Oregon, the LERC faculty teaches for-credit courses in academic departments on topics such as labor history, labor policy, immigration, and economic justice. In addition, LERC also provides a participatory learning experience for undergraduate students, an intensive internship with Oregon labor organizations on

research and related projects—Supervised Field Study (LERC 406). Students earn 4 credits each term of the internship. To participate, students must get preapproval from the LERC faculty.

The center's faculty members work with students to determine how a LERC course fits into their academic programs. Faculty members are available to students for consultation related to the center's interest areas. More information is available from the center.

LERC in Portland

LERC offices in Portland offer services to the metropolitan area through general and specialized programs. The Portland office is located in the University of Oregon's White Stag Block at 70 NW Couch Street, Suite 353; telephone 503-412-3721.

The Labor Education and Research Center is a member of the United Association for Labor Education and the Pacific Northwest Labor History Association.

Faculty

Robert Bussel, professor. BA, 1973, Cornell; MEd, 1983, Rutgers; PhD, 1993, Cornell. (2002)

Sherman Henry, instructor. BA, 2007, National Labor College; MS, 2011, Florida International. (2016)

Jennifer Hess, associate research professor. BS, 1983, Western Washington; MPH, 1996, Washington (Seattle); PhD, 2004, Oregon. (2002)

Gordon Lafer, professor. BA, 1983, Swarthmore; MA, 1989, MPH, 1992, PhD, 1995, Yale University. (1997)

Sarah Laslett, instructor. BA, 1991, California, Berkeley; MA, 2000, Minnesota, Twin Cities. (2015)

About the Libraries

The University of Oregon Libraries supports the teaching, learning, and research programs of the university and is open to the general public. The range of support provided to the faculty and students is broad, including

- reference and research assistance
- information literacy and research data management instruction
- access to print, media, and digital collections, including extensive special collections and archives
- interlibrary loan services
- access to computers and electronic resources
- instructional technology support and training
- media-rich classroom facilities
- wireless access
- campus-wide classroom technology support

The UO Libraries, an Association of Research Libraries member, houses one of the largest research collections in the Pacific Northwest, with more than 3.1 million titles in its general collection, and serves as many as 50,000 users per week during the fall and winter terms. Extensive holdings of manuscripts, microforms, CDs, DVDs, phonograph records, films, videotapes, slides, maps, and state, federal, and international documents complement the core collections. To meet the growing demand for digital resources, the UO Libraries continues to expand its digital holdings, with more than 1,311,000 digital objects and one million digital newspaper pages currently available online.

Facilities and Resources

The University of Oregon Libraries comprises seven libraries: Knight Library (the main branch), four on-campus branch libraries, and two off-campus branch libraries. On-campus libraries include the John E. Jaqua Law Library, located in the Knight Law Center; the Allen Price Science Commons and Research Library, located in the Lorry I. Lokey Science Complex; the Mathematics Library in Fenton Hall; and the Design Library in Lawrence Hall. Off-campus libraries include the Loyd and Dorothy Rippey Library at the Oregon Institute of Marine Biology in Charleston, Oregon, and the Portland Library and Learning Commons. Reference and research service is provided in all libraries. For hours of operation, consult the website (<http://library.uoregon.edu>).

The libraries provide access to an array of services and technology resources, including technology workshops and help desks, scanning equipment, digital cameras, color printers, and desktop computers equipped with production, presentation, and graphics software. The libraries also offers technology-rich spaces such as the Visualization Lab and DeArmond MakerSpace in the Price Science Commons and the Digital Research, Education, and Media (DREAM) Lab in Knight Library. Facilities for audio and video transfer and editing are available in Knight Library.

The UO Libraries' website is an excellent starting point from which to explore myriad information resources and services. With robust search capabilities, the website provides access to information on library

services and programs and to resources in all formats. Materials not held by the UO Libraries or its regional partners may be borrowed through interlibrary loan.

The library's online catalog is updated constantly with information about library materials, new books and book orders, and electronic journals. Users can search numerous online periodical indexes, databases, newspapers, e-books, and e-journals. Search tools for e-journals are accompanied by a feature that allows users to easily locate the full text of articles. Convenient access to unique digital collections is provided through the website as well.

Services

The UO Libraries' instructional programs include technology workshops, in-class presentations by librarians, and credit courses on research methods, information access, data management, and digital scholarship. These programs reach more than 22,000 students and faculty members each year.

The library provides a full range of instructional technology services, including classroom technology design and maintenance, educational video production, streaming media services, support for the university's learning management system, and instructional technology assistance for teaching, learning, research, public service, and outreach. The library also provides delivery and maintenance of instructional technology equipment to classrooms across campus.

The UO Libraries collaborates with faculty members and students to advance research and scholarly communication using new media and digital technologies. Based on a foundation of access, sharing, and preservation, the library provides digital asset management, digital preservation, training, consultations, and tools for digital scholarship. The library also manages and maintains the UO Scholars' Bank, an online archive of the scholarly output of the campus community, and assists researchers with the organization, management, and curation of data.

The staff of the UO Libraries is committed to the principle of equal opportunity in education, research, and service, and strives to ensure that collections, services, and facilities are accessible to all users. For more information, consult the website (<http://library.uoregon.edu/library-accessibility>). For assistance or accommodation, please contact a staff member in person at any service desk or by phone, email, or a live chat session. Special accommodation requests may be directed to the Library Administration office staff at 541-346-3056.

Borrowing

Students who are currently enrolled or registered and University of Oregon faculty and staff members may borrow materials from the UO Libraries. They also may borrow materials and receive online article deliveries from any of the other libraries with which the UO Libraries has reciprocal lending agreements. A number of document delivery services are available, including special programs for distance-education students. Through its course reserves program, the library provides students with access to selected course readings. Information on access to user accounts and other services is available on the library's website.

Student Employment

The library employs students to assist in all facets of library operations, and students often are able to work in areas related to their academic, professional, and personal interests. For more information, contact the library's Human Resources office at 541-346-1898.

History

The first official library at the University of Oregon was established in 1891, when Henry Villard donated a book collection valued at \$1,000. As collections grew during the next twenty years, the library moved to progressively larger quarters in various locations. In 1905 the legislature appropriated funds for a new library building, now Fenton Hall. The building was completed in 1907, and a fireproof stack annex was added in 1913.

Knight Library was designed by Ellis F. Lawrence and constructed in 1937. The facade has been described as "exotic, a combination of modernized Lombardy and Greco-Roman with art deco details." The building contains exceptionally fine exterior and interior decorative work, including the fifteen stone heads by Edna Dunberg and Louise Utter Pritchard, ornamental memorial gates by O. B. Dawson, carved wooden panels by Arthur Clough, and two large murals painted by Albert and Arthur Runquist. The 1937 building and the quadrangle it faces are listed on the National Register of Historic Places.

Additions to Knight Library were constructed in 1950 and 1966. During a third expansion and renovation project, a 132,000-square-foot addition was completed in 1992, and substantial renovation of the existing building was completed in 1994.

Donor Program

Gifts from alumni and friends help strengthen library collections, enhance library facilities, purchase new technology, employ student assistants, and preserve Oregon's rich history. Library donors receive the annual publication *Building Knowledge*. For more information, call the Library Administration office at 541-346-3056.

Faculty

Megan Austin, assistant librarian; law instruction librarian. BA, 1990, Maryland, Baltimore County; JD, 1993, Arizona. (2016)

Jaye A. Barlous, associate librarian; law reference librarian. BA, 1986, Florida Atlantic; JD, 1989, Nova Southeastern; MLIS, 2003, Washington (Seattle). (2010)

Alexandra M. Bisio, assistant librarian; lead processing archivist. BA, 2009, Santa Clara; MLIS, MA, 2012, Simmons College. (2017)

Multicultural Academic Excellence

Jane Irungu, Director

541-346-3479

541-346-3416 fax

164 Oregon Hall

<https://inclusion.uoregon.edu/content/center-multicultural-academic-excellence-cmae>

cmae@uoregon.edu

The Center for Multicultural Academic Excellence is committed to the retention, support, and academic success of historically underrepresented and underserved populations, including low-income, first-generation, and multiple-identity students. The center provides academic services, leadership development, cultural programming, and dedicated space structured around a program of best practices for student access and success. Services include but are not limited to the following:

- academic advising and support
- scholarship administration
- leadership development and mentoring
- cultural programming
- advocacy (academic petition; financial aid; bias or discrimination)
- graduate school preparation
- tutorial assistance
- dedicated space (computer laboratory with printing privileges)
- selected course offerings with preregistration, including

Code	Title	Credits
WR 121	College Composition I	4
WR 122	College Composition II	4
MATH 111	College Algebra	4
MATH 241	Calculus for Business and Social Science I	4
MATH 242	Calculus for Business and Social Science II	4
MATH 243	Introduction to Methods of Probability and Statistics	4

The Center for Multicultural Academic Excellence sponsors the Reach for Success middle school visitation program, a multicultural Awards and Graduation Ceremony, and multicultural speakers and presenters. The office also provides technical, advisory, and financial support of student organizations, and it enhances the new student experience by participating in IntroDUCKtion, Week of Welcome activities, Duck Days, and a fall orientation retreat for new students of color.

Services are free. All students, in particular those historically underrepresented, are encouraged to use the center.

Museums

Jordan Schnitzer Museum of Art

Jill Hartz, Executive Director

1430 Johnson Lane

1223 University of Oregon

Eugene, Oregon 97403-1223

jsma.uoregon.edu

The Jordan Schnitzer Museum of Art (JSMA) is a visual arts resource for students, faculty members, and visitors. The museum collects, preserves, studies, exhibits, and interprets works of art for the benefit of the UO curriculum and for the enrichment of the general public. The museum's 14,000 piece collection has strengths in Asian, Pacific Northwest, and American art and has recently expanded collecting into the areas of European and Latin American art. More than half of the museum's

collection is searchable online, thanks to grants from the Oregon Cultural Trust.

The JSMA presents exhibitions and programs that emphasize cross-cultural understanding, provide broad education experiences, and support collaborative and interdisciplinary opportunities on and off campus. The collection galleries feature art from the Americas, Europe, China, Japan, and Korea, enhanced with a provocative series of special exhibitions and a full complement of programs designed to keep visitors engaged. A multicultural destination, the museum offers Spanish language materials throughout the galleries.

As a nationally accredited university museum, the Jordan Schnitzer Museum of Art is an important teaching resource. Its exhibitions and programs are based on the multidisciplinary curricular and extracurricular interests of university and community audiences. Museum staff and faculty members lecture, teach, and lead museum tours for UO students and others in the community. Student involvement is encouraged at several levels, beginning with a free student membership program and ranging from internships, practicums, and paid and volunteer opportunities to service on advisory committees.

Opened in 1933 and designed by architect and former dean of the architecture school Ellis Lawrence, the museum, including its Prince Lucien Campbell Memorial Courtyard, is on the National Registry of Historic Places. In 2005, the museum reopened after a few years of renovation, doubling its original size. Today, in addition to its galleries, the museum houses an art-making studio, lecture and reception halls, a museum café, and two exterior courtyards.

Admission is free for museum members, children under eighteen, UO and other college students, and UO faculty and staff members. University identification is required. The museum hours are Wednesday through Sunday, 11:00 a.m. to 5:00 p.m., with extended evening hours every Wednesday until 8:00 p.m.

Museum of Natural and Cultural History

Eugene, Oregon 97403-1224

MNCH@uoregon.edu (mnh@uoregon.edu)

mnch.uoregon.edu

The Museum of Natural and Cultural History links research and teaching activities with public programs and exhibits on the natural sciences and cultural history, including extensive research on Oregon archaeology, geology, history, and natural history.

The museum holds important collections of anthropological, archaeological, biological, and paleontological materials. These include the world's oldest shoes, 10,000-year-old sagebrush bark sandals from Fort Rock Cave, and evidence of North America's oldest house, a 9,400-year-old summer settlement buried under layers of volcanic ash near Newberry Crater.

Museum exhibits focus on Pacific Northwest geology, archaeology, biology, Native American cultures, and traditional cultures worldwide. Each year, courses in anthropology, biology, geology, architecture, design, and other departments and schools use the museum. Faculty and staff members lecture, teach, and lead museum and field tours for

UO students and the broader community. Internship, individual study, volunteer, and employment opportunities are available for students. Graduate students and visiting scholars use the collections for research leading to theses, dissertations, and other publications or reports.

Offering tours and educational activities for children, families, and community groups, the museum works closely with local and regional school districts and other community groups.

Admission is free for UO students, faculty, staff, and museum members, \$6 for adults, \$4 for seniors and youth, and \$12 for families; visitors presenting electronic benefit transfer (EBT) cards are admitted at a reduced rate. Admission is free for all on the first Friday of every month. The museum is open Tuesday through Sunday, 11:00 a.m. to 5:00 p.m., and open late on Thursdays until 8:00 p.m.

Oregon State Museum of Anthropology

Jon M. Erlandson, Director
541-346-3031

The Oregon State Museum of Anthropology and its research collections are part of the Museum of Natural and Cultural History. It was established by the Oregon Legislative Assembly in 1935 as the official repository for state-owned anthropological collections. It also houses research collections resulting from archaeological fieldwork in Oregon as well as ethnographic objects from around the world.

Highlights include an extensive collection of ancient basketry from excavations in the dry caves of eastern Oregon and historic Native American basketry from across the western United States. The museum's collections division curates archaeological specimens obtained through its own work in Oregon as well as specimens from other research projects and makes them available for study, exhibition, and loan.

Condon Collection of Fossils

541-346-3461
214 Volcanology Building
1272 University of Oregon
Eugene, Oregon 97403-1272

The Condon Collection, part of the Museum of Natural and Cultural History collection, is the State of Oregon's official repository for publicly owned paleontological materials. It includes geological specimens collected by Thomas Condon, pioneer geologist and professor of natural history and geology at the University of Oregon. Condon was one of the first professors to join the faculty of the university when it was established in 1876. When he died in 1907, his extensive personal collection of fossils, which he used for teaching, became the permanent possession of the university. Since 1907 the collection has been added to by various people, particularly A. J. Shotwell during the 1950s and 1960s.

The collection includes approximately 85,000 specimens. Vertebrate fossils make up the bulk of the collection, but it includes some invertebrate fossils, large holdings of fossil plants (largely leaf impressions), and several thousand skulls and skeletons of recent mammals, birds, reptiles, amphibians, and fish. Several hundred published technical papers document the collections. Some research on the collections has been published in the Museum of Natural and Cultural History bulletin series. For more information, visit the museum website (<http://natural-history.uoregon.edu>).

ROTC

Air Force ROTC

541-737-3291
800-633-7352
AFROTC Detachment 685
308 McAlexander Field House
Oregon State University
Corvallis, Oregon 97331
oregonstate.edu/dept/afrotc (<http://oregonstate.edu/dept/afrotc>)

Students interested in obtaining an officer's commission in the United States Air Force upon graduation may join the Air Force Reserve Officers Training Corps (AFROTC) program offered through the Department of Aerospace Studies at Oregon State University. Undergraduate credits earned in this program may be transferred to the University of Oregon as elective credits. Students may complete a degree in any field while in the program. Students are responsible for tuition and fees as assessed by Oregon State University.

Programs

The following programs are open to qualified students.

Four-Year Program

The four-year program consists of the general military course (six terms of lower-division air force studies courses, including a laboratory each term) and the professional officer course (six terms of upper-division air force studies courses, including a laboratory each term). Four-year cadets attend a field training course for four weeks during the summer before their junior year of college.

Students may enter the freshman class at the start of the fall, winter, or spring terms. Sophomores may enter at the start of the fall term and take the freshman- and sophomore-level courses concurrently.

Before enrolling in the professional officer course during the last two years of the program, the student must meet AFROTC qualification standards and requirements.

Two-Year Program (currently inactive)

Entry is competitive. Application should be made early in the fall term of the student's sophomore year. Participants must attend a field training course for six weeks in the summer before their junior year of college. The curriculum includes six terms of upper-division aerospace studies courses, including a laboratory each term. Applicants must have two years remaining in college after the field training, which may be undergraduate or graduate work or a combination of the two.

Commitments

Students in the four-year program incur no obligation during their first two years in AFROTC unless they are awarded a scholarship. After enrolling in Air Force Leadership and Management, the student agrees to accept a commission if it is offered. Scholarship students incur a commitment at the beginning of their sophomore year. Upon accepting their commission, pilots incur an obligation of 10 years after completion of pilot training; combat systems officers and air battle managers incur a six-year obligation after initial training, and all others agree to serve for four years after receiving the commission.

Scholarships

Scholarships are available for qualified students. Interested high school students should apply online by December 1, prior to the academic year for which the student is applying. Each scholarship covers the cost of tuition, laboratory fees, incidental expenses, \$600 a year for textbooks, and as much as \$500 as a monthly stipend.

For further details, visit the website, contact the AFROTC Detachment at the telephone numbers listed above, or e-mail afrotc@oregonstate.edu.

Allowances, Uniforms, Textbooks

Students on an Air Force ROTC scholarship or enrolled in the professional officer course are paid a monthly stipend. Uniforms and textbooks for both the general military course and professional officer course are provided by the Air Force. The University of Oregon offers a discount on room and board for scholarship winners.

Field Training

One summer field-training session is required for Air Force ROTC programs; successful completion is required for cadets prior to membership in the professional officer course. Students are paid varying amounts for each of these training periods.

Standards

Cadets must be US citizens of sound physical condition and high moral character and must be commissioned as Air Force officers before reaching age 30.

Other Educational Opportunities

After completing AFROTC requirements, advanced degrees may be sought by delaying active-duty commitments. Some commissioned officers continue advanced studies through fully funded Air Force Institute of Technology programs. Special provisions are available for medical and law students.

For more information about Air Force ROTC programs, write to the department mailing address or visit the Oregon State University AFROTC website.

University of Oregon in Portland

503-412-3696

70 NW Couch St. and 109 NW Naito Ave.

Portland, Oregon 97209

<http://pdx.uoregon.edu>

The University of Oregon has offered programs in Portland for more than 100 years. Continuing this tradition, the University of Oregon Portland—based in the historic White Stag Block—offers students and professionals advanced learning opportunities, professional graduate degree programs, and access to city and industry leaders. Students have access to support services, career counseling, branches of the UO Libraries and the Duck Store, and state-of-the-art maker-spaces.

Events, exhibits, lectures, and networking opportunities for students and community members take place in both the White Stag Block and the 109 NW Naito building.

College of Design

The College of Design at the University of Oregon Portland partners in multiple ways with the city and the metropolitan area through teaching, research creative work, and service activities. Portland is an extraordinary urban laboratory for the University of Oregon students and faculty members.

The School of Architecture and Environment offers master's degrees in architecture and historic preservation. Students can earn a bachelor of fine arts (BFA) or a master of science in sports product design from the School of Art and Design.

Research centers include the Energy Studies in Buildings Laboratory—with a climate chamber, mirrored-box artificial skies, heliodons, and wind tunnels—and Urbanism Next, which focuses on the secondary impact of new technology on city development.

Charles H. Lundquist College of Business

The Oregon Executive Master of Business Administration Program allows accomplished executives to hone their skills and reinvigorate their careers through interactions with peers, faculty members, and members of the UO's business network. The sports product management degree program offers both full-time and online options to earn a master's degree that prepares graduate students to learn the business of creating athletic and outdoor apparel, footwear, and equipment.

School of Journalism and Communication

The multimedia journalism and strategic communications graduate programs in Portland provide flexible schedules for working professionals. Students have access to the Oregon Reality Lab, a place to use emerging technology such as virtual reality, augmented reality, and 360-degree video. The Agora Journalism Center is the gathering place for innovation in communication and civic engagement.

School of Law

UO law school students can spend their third year studying in Portland. The School of Law's Portland Program includes specialized courses, externships, and a bridge to practice. Students build relationships with Portland-area employers and practitioners through mentorships, innovative programming, and networking events.

Physical Education

Chantelle Russell, Associate Director

The physical education program offers physical activity courses for university students, UO faculty and staff members, and members of the Eugene-Springfield community. Physical education courses emphasize the development of physical skills, improvement in fitness levels, and the acquisition of knowledge that contributes to a healthy lifestyle.

Approximately 140 courses are offered each term in a variety of activity areas—aquatics and scuba, fitness, individual activities, leadership, martial arts, mind-body, outdoor pursuits, racquet sports, running, team sports, and weight training. This ever-changing array of courses is taught by an exceptional staff of faculty members and contract employees.

Most classes meet twice a week for 1 credit. As many as 12 credits in physical education may be applied as electives to a bachelor's degree. Each term's offerings are listed in the Schedule of Classes online. Students may register for courses through DuckWeb, which is explained in the **Registration and Academic Policies** section of this catalog.

Students and members of the staff, faculty, and community may enroll in physical education courses as noncredit participants, if space is available. Noncredit participants pay the PE course fee and register in person at the service desk in the Student Recreation Center or online (<https://recweb.uoregon.edu>) once registration is open for the term.

Opportunities are available for students who have disabilities or who need special accommodations in order to participate in physical education courses. More information and support is available by calling 541-346-4113, 8:00 a.m.–5:00 p.m., Monday–Friday, or visit the PE and Rec website (<https://uorec.uoregon.edu/pe-classes>).

Fees for Physical Education Courses

Course	Fee
Activity (1 credit)	\$60
Activity (2 credits)	\$120
Outdoor pursuits	\$84–\$185
Practicum (1–3 credits)	\$40

Some courses require additional fees to pay for equipment, transportation, contract expenses, and certification. Fees and fee-refund schedules are printed in each term's schedule of classes.

Faculty

Anne Borland, senior instructor (outdoor pursuits). BA 1987, Oregon. (2008)

Daniel Crowe, senior instructor (outdoor pursuits). BA, 1997, Concordia College. (2004)

David Rubino, senior instructor (individual activities, martial arts, running, team sports, weight training); assistant director. BS, 1987, State University of New York, Cortland; MA, 1988, Northern Colorado. (2001)

Elayne Quirin, senior instructor (mind-body). BA, 1977, State University of New York, Buffalo. (1993)

Jackie Lindsay, senior instructor (fitness). BA, 2017, Northwest Christian. (1997)

Joan Dobbie, senior instructor (mind body). BA, 1967, State University of New York, Potsdam. (1998)

Justine Halliwill, senior instructor (martial arts, mind body). BS, 2005, Oregon. (2005)

Linda Metzger, senior instructor (fitness). BA, 2008, Platteville; WI. (2011)

Michele Bulgatz, senior instructor (mind body). BA, 1985, California, Santa Barbara. MS, 1994, Oregon. (2001)

Michie Kawada, senior instructor (aquatics, fitness). BA, 1998, Oregon. (2002)

Natacia Hicks, senior instructor (mind body). BS, 2007, Oregon. (2009)

Ryan Kelly, senior instructor (martial arts). (1999)

Viriam Khalsa, senior instructor (mind body). BA, 1976, Antioch College; MBA, 1990, Oregon. (2003)

Emeritae

Karla S. Rice, senior instructor emerita. BS, 1962, Central Michigan; MA, 1965, Michigan State. (1967)

Becky L. Sisley, professor emerita; athletic liaison. BA, 1961, Washington (Seattle); MSPE, 1964, EdD, 1973, North Carolina, Greensboro. (1965)

Lois J. Youngen, associate professor emerita. BS, 1955, Kent State; MA, 1957, Michigan State; PhD, 1971, Ohio State. (1960)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Physical Education: Aquatics—Scuba Courses

PEAS 199. Special Studies: [Topic]. 1 Credit.
Repeatable.

PEAS 368. Scuba: Basic. 2 Credits.
Repeatable. Open water certification. Techniques and equipment used in underwater diving. Water safety, diving physics, medical aspects of diving, and decompression. Leads to basic scuba certification. Equipment provided. Repeatable once for maximum of 4 credits.
Prereq: Beginning swim experience

PEAS 369. Scuba: Advanced. 1 Credit.
Repeatable. Advanced open water diver certification. Navigation, deep diving, night diving and other topics. Develop underwater skills and learn speciality diving activities. Equipment provided. Repeatable once for a maximum of 2 credits.
Prereq: PEAS 368 or equivalent.

PEAS 370. Scuba: Rescue Diver. 1 Credit.
Repeatable. Rescue Diver certification. Concepts of self rescue, psychological and physical stress, tows, assists, in-water resuscitation and rescue techniques. Equipment provided. Repeatable once for maximum of 2 credits.
Prereq: PEAS 369 or equivalent.

PEAS 375. Scuba: Deep Diver. 1 Credit.
Learn to dive to greater depths and develop special skills for deep dive planning, organization, procedures, techniques and hazards. R once for a maximum of 2 credits.

PEAS 378. Scuba: Nitrox. 1 Credit.

Instruction in diving with enriched air to extend 'no decompression' limits, increasing time spent underwater. Repeatable once for a maximum of 2 credits.

PEAS 380. Scuba: Underwater Digital Photography. 1 Credit.

Advanced diving skills and photographic technique, planning, organization, procedures, problems, hazards, and enjoyment of underwater still photography in a safe and supervised environment. Vearrier.

Prereq: PEAS 368

PEAS 381. Scuba: Dive Master I. 1-2 Credits.

Repeatable. Dive master certification. Preparation toward becoming a diving instructor. In-depth knowledge of general diving theory and watermanship skills. Assist a PADI instructor with the supervision of underwater diving students, dive planning and organization. Equipment provided. Repeatable once for a maximum of 4 credits.

Prereq: PEAS 370; 18 years old, 20 logged dives.

PEAS 382. Scuba: Dive Master II. 1-2 Credits.

Repeatable. Advanced watermanship skills, leading to certification as a Dive Master. Responsible for demonstrating techniques and skills, class management, and assist students with common problems. Construct an underwater map. Repeatable once for a maximum of 4 credits.

Prereq: PEAS 381 or equivalent.

PEAS 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Aquatics Courses**PEAQ 111. Learn to Swim. 1 Credit.**

Learn to swim and gain confidence/comfort in shallow and deep water. A beginning course for the non-swimmer to learn how to float, submerge comfortably, and move through the water. Repeatable once for a maximum of 2 credits.

PEAQ 121. Water Fitness I. 1 Credit.

Repeatable. Principles of effective water-based conditioning. Cardio respiratory fitness and strength building workout. An effective workout to music using both shallow and deep water. Repeatable once for a maximum of 2 credits.

PEAQ 122. Water Fitness II. 1 Credit.

Repeatable. Principles of effective water-based conditioning. Cardio respiratory fitness and strength building workout. An effective workout to music using both shallow and deep water. Repeatable once for a maximum of 2 credits.

PEAQ 140. Paddleboard Yoga. 1 Credit.

All the benefits of yoga delivered on top of the water. The standup paddleboard (SUP) provides a balance challenge to strengthen and tone your core while gaining strength, awareness and range of motion from head to toes. A playful and unique experience for all levels. Repeatable once for a maximum of 2 credits.

PEAQ 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEAQ 201. Swimming I. 1 Credit.

Repeatable. A beginning swim course for those who need to learn breathing and fundamental stroke work in freestyle and backstroke. Must be able to swim one length of the pool and be comfortable in deep water. Repeatable once for a maximum of 2 credits.

PEAQ 202. Swimming II. 1 Credit.

Repeatable. An intermediate-level swim course for those who want to master freestyle and breathing; improve technique in backstroke, breaststroke, and butterfly; and improve stroke efficiency and endurance. Repeatable once for a maximum of 2 credits.

PEAQ 203. Swimming III. 1 Credit.

Repeatable. An advanced-level swim course emphasizing endurance, sprint, and stroke work. Must be proficient in all four strokes: butterfly, backstroke, breaststroke, and freestyle. Repeatable once for a maximum of 2 credits.

PEAQ 351. Lifeguard Certification. 1 Credit.

Repeatable. StarGuard Lifeguard, First Aid and CPR for the Professional Rescuer certification course. Repeatable once for a maximum of 2 credits.

Prereq: Pass swimming test.

PEAQ 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Certification Courses**PEC 199. Special Studies: [Topic]. 1-5 Credits.**

Repeatable.

PEC 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PEC 408. Workshop: [Topic]. 1-5 Credits.

Repeatable.

Physical Education: Fitness Courses**PEF 131. Body Sculpting I. 1 Credit.**

Repeatable. Emphasizes muscular endurance training for the upper body, lower body, and abdominals. Dumbbells, soft weights, tubing, steps, small medicine balls, and body resistance challenge every major muscle group in the body. Repeatable once for maximum of 2 credits.

PEF 132. Body Sculpting II. 1 Credit.

Repeatable. Intermediate level emphasis on muscular endurance training for the upper body, lower body, and abdominals. Dumbbells, soft weights, tubing, steps, small medicine balls, and body resistance challenge every major muscle group in the body. Repeatable once for maximum of 2 credits.

Prereq: PEF 131 or equivalent.

PEF 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PEF 201. Pilates Matwork I. 1 Credit.

Repeatable. The physiological and biochemical basis of the Stott Pilates method. Students perform essential matwork exercises using the five basic principles of Pilates exercise to lengthen and strengthen the entire body. Repeatable once for a maximum of 2 credits.

PEF 205. Pilates Yoga Fusion. 1 Credit.

Repeatable. This course combines Pilates and Yoga techniques to improve balance and flexibility while building a strong muscular core. Repeatable once for credit.

PEF 207. Fitness Yoga. 1 Credit.

Incorporates fitness moves with traditional yoga postures in a flowing format. Use of breath and principles of alignment to condition strength, core, balance, and flexibility, along with focus, concentration, and relaxation. Repeatable once for a maximum of 2 credits.

PEF 208. Fitness Barre. 1 Credit.

A fusion of Pilates, yoga and elements of aerobics to deliver a total body workout. Focus on posture, body awareness, strength, flexibility, and balance through low-impact, isometric and dynamic movements using a barre for a prop. All fitness levels, no dance experience necessary. Repeatable once for a maximum of 2 credits.

PEF 220. . 1 Credit.

Designed for beginners, focusing on form and technique and introducing concepts of CrossFit through simple workouts. Students will develop comfort and strength in barbell lifts, and use body weight and other equipment for loading during the workouts that are done with an element of speed. Repeatable once for a maximum of 2 credits.

PEF 221. Cross Fit I. 1 Credit.

Introduction to highly functional cross-training movements, constantly varied and performed with intensity. Strength, endurance, power, and agility are built in a supportive, team-oriented environment. Sequence with PEF 222. PE activity courses are repeatable once for credit.

PEF 222. Cross Fit II. 1 Credit.

Intermediate and advanced dynamic exercises and training progressions. Technique, strength, endurance, power and agility are enhanced. Sequence with PEF 221. PE activity courses are repeatable once for credit.

Pre-requisite: PEF 221 or equivalent experience.

PEF 241. Group Cycling I. 1 Credit.

Repeatable. A high intensity workout on a specialized stationary cycle (Startrac V-bike). Designed for beginning to intermediate fitness levels, students exercise to music using a variety of riding techniques. Equipment care, muscular activation and endurance, and cardiorespiratory fitness, are covered. Repeatable once for a maximum of 2 credits.

PEF 243. Cycle Sculpt. 1 Credit.

A combination of indoor cycling and functional strength training for students who are pressed for time and want to improve strength, endurance and cardio conditioning. Appropriate for all fitness levels, learning to apply various riding techniques and full body exercises. Repeatable once for a maximum of 2 credits.

PEF 251. Fitness Kickboxing. 1 Credit.

Repeatable. Practice jabs, punches, footwork, and kick patterns adapted from martial arts for the aerobics participant. Features a warm-up, more than 30 minutes of skills training and combinations, a cool-down, and stretching. Repeatable once for a maximum of 2 credits.

PEF 261. Cardio Fusion. 1 Credit.

A fusion of aerobic dance, martial arts, and yoga movements, this course focuses on improving strength, cardiovascular fitness, and neuromuscular coordination. Repeatable. All PE activity classes are repeatable once for credit.

PEF 291. Speed and Agility. 1 Credit.

Topics include techniques for acquiring speed, agility, and conditioning; learning movement skills and applying energy systems. Minimal lectures complement practical application of drills. Repeatable once for maximum of 2 credits per activity.

PEF 301. Core and Stretch. 1 Credit.

Gain physical strength, flexibility, and muscular endurance while learning about physiology and anatomy. Develop personalized training program. Repeatable once for maximum of 2 credits.

PEF 311. Boot Camp. 1 Credit.

Sport conditioning drills, running, resistance training, and dynamic core work to improve cardiovascular fitness, muscular endurance, agility, and flexibility. For students with a good base of physical fitness. Repeatable once for credit.

PEF 321. Zumba. 1 Credit.

Repeatable. Fitness and dance moves to Latin rhythm and music: salsa, meringue, cumbia, and others. Simple enough for beginners yet can challenge the fitness of advanced exercisers. Repeatable once for credit.

PEF 326. Fitness Dance. 1 Credit.

Cardiovascular workout, dance moves and routines to Top Forty hits, music videos, and hip-hop. Typical class features warm-up, 30 minutes of dance, and cool-down. Repeatable once for credit.

PEF 335. Healthy Cooking. 1 Credit.

Learn cooking basics and nutrition education through a combination of lecture and activity in the kitchen; including food preparation and tasting, grocery store tour, deciphering food labels, shopping on a budget, and basic cooking techniques for grains, vegetables, and proteins. Repeatable once for a maximum of 2 credits.

PEF 340. Personal Trainer. 3 Credits.

Lecture and lab experiences for administering fitness assessments in individual and group settings. Prepares the student for the American Council on Exercise Personal Trainer Certification Exam.

PEF 342. . 3 Credits.**PEF 344. Healthy Weight Loss. 2 Credits.**

For students in need of weight management guidance who are motivated to use a lifestyle approach (nutrition, exercise, stress management) to lose a moderate amount of weight.

PEF 345. Nutrition and Performance. 3 Credits.

Explores the influence of nutrition on athletic performance and health. Includes body composition assessment, nutritional analysis, and personal dietary and training behaviors. Risks and benefits of nutritional supplements.

PEF 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PEF 408. Workshop: [Topic]. 1-5 Credits.

Repeatable.

Physical Education: Individual Activities Courses

PEI 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEI 201. Juggling I. 1 Credit.

Repeatable. Introduces and develops juggling skills with balls, rings, clubs and other props. Emphasis on creative exploration, relaxation and fun. Repeatable once for a maximum of 2 credits.

PEI 202. Juggling II. 1 Credit.

Repeatable. Advanced development of juggling skills with balls, rings, clubs and other props. Visual independence and imagination, relaxation and breath awareness. Repeatable once for a maximum of 2 credits. Prereq: PEI 201 or equivalent.

PEI 241. Golf I. 1 Credit.

Repeatable. Introduction to the game. The majority of class time is at the driving range learning swing techniques for distance, pitching, chipping and putting, rules, etiquette, and golf vocabulary. Students must provide their own transportation.

PEI 242. Golf II. 1 Credit.

Repeatable. For the experienced golfer who wants to refine their skills. Includes review of swing techniques for all situations, rules, etiquette, and golf vocabulary. Students must provide their own transportation.
Prereq: PEI 241 or equivalent.

PEI 243. Golf III. 1 Credit.

Emphasis on course play for the advanced golfer to hone basic skills. Includes time on the driving range and putting green. Students must provide their own transportation. Repeatable once for a maximum of 2 credits.
Prereq: PEI 242 or equivalent.

PEI 244. Golf Swing Exercise. 1 Credit.

Improve your golf swing in the off-season via swing specific exercises. Sequence with Golf I, Golf II, Golf III. All PE activity classes are repeatable once for credit.
Prereq: PEI 243 or equivalent.

PEI 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Intercollegiate Athletics Courses

PEIA 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEIA 301. Lacrosse. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 305. Acrobatics and Tumbling. 1 Credit.

Repeatable. Varsity athletes may earn a PE credit for their team workouts during their competitive season. All PE activity courses are repeatable once for credit.

Prereq: Must be a varsity team member.

PEIA 311. Women's Golf. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 312. Men's Golf. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 317. Women's Tennis. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 318. Men's Tennis. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 323. Women's Cross-Country. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 324. Men's Cross-Country. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 329. Women's Track. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 330. Men's Track. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 341. Softball. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 342. Baseball. 1 Credit.

Repeatable. Varsity athletes may earn a PE credit for their team workouts during their competitive season. All PE activity courses are repeatable once for credit.

Prereq: Must be a varsity team member.

PEIA 346. Sand Volleyball. 1 Credit.

Repeatable once for maximum of 2 credits.

Prereq: varsity athletes only.

PEIA 347. Volleyball. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 350. Soccer. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 353. Women's Basketball. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 354. Men's Basketball. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 360. Football. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 371. Sport Conditioning I. 1 Credit.

Repeatable. A strength and conditioning training opportunity for varsity and club sport student-athletes. Sequence with PEIA 372, 373. All PE activity courses are repeatable once for credit.

PEIA 372. Sport Conditioning II. 1 Credit.

Repeatable. A strength and conditioning training experience for varsity and club sports student-athletes. Sequence with PEIA 371, 373. All PE activity classes are repeatable once for credit.

PEIA 373. Sport Conditioning III. 1 Credit.

A strength and conditioning training experience for varsity and club sport student-athletes. Sequence with PEIA 371, 372. All PE activity courses are repeatable once for credit.

PEIA 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Leadership Courses

PEL 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PEL 310. Coaching. 2 Credits.

Addresses all aspects of coaching from kindergarten through college.

Topics include philosophy, objectives and outcomes, communication styles, writing workouts, discipline, and age-appropriate skills, drills and strategies. Sequence with PEL 409 is possible with successful completion of the course.

PEL 311. Coaching II. 2 Credits.

Practical application of knowledge and skills from PEL 310 Coaching I, by implementing strategies and techniques in teaching or coaching situation.

Students will write a practice plan and teach a technical and tactical skill to the class. Sequence with PEL 310.

Prereq: PEL 310 or equivalent experience.

PEL 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PEL 408. Workshop: [Topic]. 1-5 Credits.

Repeatable. Professional topics in physical education.

PEL 409. Practicum: [Topic]. 1-4 Credits.

Repeatable. Practical experiences in equipment and facilities management service, outdoor pursuits, recreation and intramurals, and physical education. Repeatable six times for a maximum of 6 credits.

Physical Education: Martial Arts Courses

PEMA 115. Self-Defense. 1 Credit.

Repeatable. Fundamental concepts of self defense. Mental and physical strategies, awareness and reaction training. Class theme is prevention, covering the "Three As": Awareness, Assessment, Action. Repeatable once for a maximum of 2 credits.

PEMA 116. Women's Self Defense. 1-2 Credits.

Supportive, empowering class focusing on verbal and physical skills for avoiding and resisting assault. Includes boundary-setting, de-escalation, assertiveness, healthy relationship skills, and effective fighting techniques.

PEMA 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEMA 255. Kickboxing. 1 Credit.

Repeatable. This dynamic martial art includes punching and kicking skills, techniques and the rules of competitive kickboxing. Develops balance, flexibility and strength. All PE courses are repeatable once for credit.

PEMA 311. Jeet Kune Do I. 1 Credit.

Repeatable. Basic concepts of Jeet Kune Do and the Filipino Martial Arts. Basic movements, including strikes, kicks, grappling, and defensive weaponry. Develop individualized training methods. Repeatable once for a maximum of 2 credits.

PEMA 312. Jeet Kune Do II. 1 Credit.

Repeatable. Intermediate concepts of Jeet Kune Do and the Filipino Martial Arts. Demonstrate movements, immobilization techniques, and practical self defense skills. Repeatable once for a maximum of 2 credits. Prereq: PEMA 311 or equivalent.

PEMA 321. Jiu-Jitsu I. 1 Credit.

Repeatable. Introduction to concepts of Brazilian Jiu-Jitsu. Combative activity incorporating throwing, falling, grappling, holds, and safe positioning. Development of practical self-defense knowledge and skills. Repeatable once for a maximum of 2 credits.

PEMA 322. Jiu-Jitsu II. 1 Credit.

Repeatable. Basic and intermediate motions of Brazilian Jiu-Jitsu. History, rules and scoring system for sport, escape movements, submission holds. Repeatable once for a maximum of 2 credits. Prereq: PEMA 321 or equivalent.

PEMA 331. Mixed Martial Arts I. 1 Credit.

Introductory techniques from boxing, wrestling, jiu-jitsu and muay thai. Rules and scoring system of competitive mixed martial arts. Sequence with PEMA 332. PE activity courses are repeatable once for credit.

PEMA 332. Mixed Martial Arts II. 1 Credit.

Intermediate techniques; building on skills learned in PEMA 331. Develops strategy, game-plan skills, training methods; increases physical strength and skills. Sequence with PEMA 331. PE activity courses are repeatable once for credit.

PEMA 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Mind-Body Courses

PEMB 101. Meditation I. 1 Credit.

Repeatable. Fundamentals of body alignment, breathing, mental focus, and relaxation. Philosophy of yoga as it applies to the different styles and methods of meditation, the nature of thought, awareness, and management of thought processes. Repeatable once for a maximum of 2 credits.

PEMB 103. Mindful Meditation. 1 Credit.

Learn and apply mindfulness practices, including mindful movement, breath work, and body scans, that enhance overall well-being by calming the mind, concentrating fully, releasing stress, and being more attentive in the present moment. Improves focus, mood and relieves stress. Repeatable once for a maximum of 2 credits.

PEMB 108. Kundalini Meditation. 1 Credit.

Repeatable. Fundamentals of using the body, breath, and mind to focus attention. Concepts of mantra (sound), mudra (form), and timing to achieve meditative states. Purification of the mind, self awareness, and energy. Repeatable once for a maximum of 2 credits.

PEMB 131. Tai Chi I. 1 Credit.

Repeatable. Fundamentals of Tai Chi, a traditional centuries old Chinese art. Yang-style short form emphasizes relaxation, balancing and breathing skills. Individual dance-like movements linked together in a continuous and smooth-flowing sequence to release stress and improve flexibility. Repeatable once for a maximum of 2 credits.

PEMB 132. Tai Chi II. 1 Credit.

Repeatable. Intermediate concepts of both Yang and Chen styles of Tai Chi. Use of body strength, flexibility, and mental control skills. Coordination of eyes, movement, breathing, and internal energy. Repeatable once for a maximum of 2 credits. Prereq: PEMB 131 or equivalent.

PEMB 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEMB 201. Gentle Yoga. 1 Credit.

Repeatable. Beginning hatha yoga postures to reduce stress, discomfort or pain. Techniques for relaxation and mental focus, breathing patterns, and personal energy. Modify positions to accommodate injury or physical limitations. Increase strength, body alignment, comfort, balance, and flexibility. Repeatable once for a maximum of 2 credits.

PEMB 211. Hatha Yoga I. 1-2 Credits.

Repeatable. Beginning hatha yoga postures and meditation techniques. Increase strength, balance and flexibility. Improve mental concentration and relaxation with yoga poses and breathing awareness. Relieve tension and fatigue. Repeatable once for a maximum of 2 credits.

PEMB 212. Hatha Yoga II. 1-2 Credits.

Repeatable. Intermediate hatha yoga poses and meditation techniques to improve mental concentration and relaxation. Breathing awareness exercises, mind and body flexibility. Repeatable once for a maximum of 2 credits. Prereq: PEMB 211 or equivalent.

PEMB 213. . 1-2 Credits.

PEMB 216. Vinyasa Flow Yoga. 1 Credit.

Repeatable. Based on a specialized and dynamic sequence of postures and focused breathing techniques. Participation aids in development of postural strength, stability, and muscular flexibility. All PE activity courses are repeatable once for credit.

PEMB 221. Sports Yoga I. 1 Credit.

Repeatable. Covers important yogic concepts and practices for athletes. Improve your flexibility and strength as you learn yoga techniques, practice, and philosophy. Sequence with PEMB 222. Repeatable once for credit.

PEMB 222. Sports Yoga II. 1 Credit.

Covers advanced yogic concepts and practices for athletes. Improve your flexibility and strength as you learn yoga techniques, practice, and philosophy. Sequence with PEMB 221. Repeatable once for credit.
Prereq: PEMB 221.

PEMB 231. Kundalini Yoga I. 1 Credit.

Repeatable. Introduction to the 'Yoga of Awareness', a science that includes breath, postures, sound, chanting and meditation. Improve flow of energy and consciousness with practice exercises. Repeatable once for a maximum of 2 credits.

PEMB 232. Kundalini Yoga II. 1 Credit.

Repeatable. Continuing work with breath, postures, sound, chanting and meditation. Relaxation, improved health and concentration, increased energy, flexibility, and clarity of mind. Repeatable once for a maximum of 2 credits.

Prereq: PEMB 231 or equivalent.

PEMB 234. . 1 Credit.

Practice postures and alignment principles to strengthen the body as well as the lungs and the mind. Emphasis is placed on building muscular endurance and stamina through an athletic, fitness-based approach to flowing yoga poses and breath. Repeatable once for a maximum of 2 credits.

PEMB 302. Ashtanga Yoga. 1 Credit.

Repeatable. Advanced techniques of yoga using breath, movement, focus of eyes, and mastery of the mind. Learn control of the senses and stamina. Repeatable once for a maximum of 2 credits.

Prereq: PEMB 211 or equivalent.

PEMB 305. Aerial Silks Yoga I. 1 Credit.

Breath work and yoga postures for increasing strength and wellness, using the silk hammock as a prop to adjust intensity levels up and down. An emphasis on safe inversions and aided relaxation floating in a silk hammock. Sequence with PEMB 306. Repeatable once for a maximum of 2 credits.

PEMB 306. Aerial Silks Yoga II. 1 Credit.

Intermediate yoga poses using the silk hammock and breath work for increasing strength, endurance, and mind and body connection. An emphasis on safe inversions with silks and aided relaxation cocooned in a hammock. Sequence with PEMB 305. Repeatable once for a maximum of 2 credits.

PEMB 320. Yoga Wellness Techniques. 1 Credit.

Learn and apply effective techniques for managing stress and increasing well-being. In a fun, supportive and calming atmosphere, students will gain lifelong tools for coping with stress. The weekend material will include safe, strengthening asana (poses), breathing, active relaxation, and meditation techniques. Repeatable once for a maximum of 2 credits.

PEMB 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Outdoor Pursuits Courses

PEO 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEO 242. Bouldering I. 1 Credit.

Techniques for rock climbing without the security of a rope. Emphasis is on safety, skill development and conditioning.

PEO 251. Rock Climbing I. 1 Credit.

Repeatable. Basics of safe and responsible rock climbing. Equipment, knots, belaying, rappelling and a range of other climbing techniques. Conducted on the indoor rock climbing wall. Repeatable once for a maximum of 2 credits.

PEO 252. Rock-Climbing Fitness. 1 Credit.

Repeatable. Continued development of basic climbing skills, with emphasis on improving flexibility and injury prevention. Refine face and crack climbing techniques. Conducted on the indoor climbing wall. Repeatable once for a maximum of 2 credits.

Prereq: PEO 251 or equivalent.

PEO 285. Wilderness Survival. 1 Credit.

Repeatable. Our gateway course must be passed (C- or better) prior to participating in our backcountry-oriented courses. Emphasizes navigation, safety and survival. Repeatable once for a maximum of 2 credits.

PEO 315. Basics of Technical Rescue. 2 Credits.

Introduces students to basic technical rescue skills including, knots, rope management, belaying, rappelling, transporting an injured climber, lowering, raising and improvised rescue techniques. All PE courses are repeatable once for credit.

Prereq: PEO 251 or equiv experience.

PEO 325. Swift-Water Safety. 1 Credit.

Repeatable. Covers methods of crossing shallow and deep swift-water streams. Includes hazard assessment, swimming techniques, knots, rope work, technical systems, pendulum and Tyrolean traverse crossings. All PE courses are repeatable once for credit.

Prereq: PEO 285 and basic swimming ability.

PEO 331. Outdoor Rock Climbing. 2 Credits.

Repeatable. Introduction to anchor building, basic rescue techniques, and outdoor climbing in the context of classroom sessions and a 3-day outing to Smith Rock. Sequence: PEO 251 or equiv experience. All PE courses are repeatable once for credit.

Prereq: PEO 251

PEO 341. Introduction to Lead Climbing. 1 Credit.

Repeatable. Emphasizes leading on bolts at the indoor climbing wall with emphasis on transitioning safety and anchor building skills to the outdoor environment. Repeatable once for a maximum of 2 credits.

Prereq: PEO 366

PEO 351. Backpacking. 2 Credits.

Repeatable. For those with little or no backpacking experience. Introduces the basics of backpacking in the context of classroom sessions and a three-day outing to the Oregon Coast. Repeatable once for a maximum of 4 credits.

Prereq: PEO 285

PEO 353. Backcountry Cuisine. 1 Credit.

Students learn how to plan menus, package food, and implement "leave no trace" cooking and baking techniques utilizing backcountry stoves and cooking systems. Repeatable once for a maximum of 2 credits.

PEO 356. Backcountry Navigation. 2 Credits.

Repeatable. Provides an opportunity to master efficient on- and off-trail navigation techniques on a three-day trip in rugged subalpine terrain. Repeatable once for a maximum of 4 credits.

Prereq: PEO 285 and 351 or equivalent experience.

PEO 362. Mountaineering. 2 Credits.

Covers basic mountaineering skills during classroom sessions and an intensive three-day mountain outing. Emphasis on hazards, rigging, roped travel, ice ax arrests, belays, and rescue.

Prereq: PEO 285, PEO 351 or equivalent experience.

PEO 366. Vertical Rescue Techniques. 2 Credits.

Repeatable. Introduces vertical rescue techniques including belay escapes, passing a knot, rope ascension, counterbalance, lowering and raising rescues. Held at the rescue facility and rock wall. Repeatable once for a maximum of 4 credits.

Prereq: PEO 315 or 331 or equivalent experience

PEO 371. Snow Camping. 2 Credits.

Repeatable. Emphasis on winter camping skills, campsite selection, construction of snow shelters, winter route finding, and survival techniques. Repeatable once for a maximum of 4 credits.

Prereq: PEO 285 and 351 or equivalent experience.

PEO 391. Avalanche Safety. 2 Credits.

Repeatable. Avalanche safety information and skills including beacons, snowpits, stability evaluation, safe travel and basic rescue during classes and on a three-day outing. Repeatable once for a maximum of 4 credits.

Prereq: PEO 285 and 371 or equivalent experience

PEO 392. Backcountry Survival. 1 Credit.

Repeatable. Basic survival skills for cool, wet, and windy Pacific Northwest environment. Topics/techniques include survival gear and techniques, emergency shelters, and fire building. Repeatable once for a maximum of 2 credits.

Prereq: PEO 285 and 351 or equivalent experience

PEO 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEO 411. Leadership Dynamics. 2 Credits.

Discover how leadership, group dynamics, risk management, and other factors play an integral role in shaping the character, productivity, and safety of teams.

Prereq: PEO 285.

PEO 412. Leading in Nature. 2 Credits.

Focuses on the natural history of the regions explored on field outings and on developing outdoor teaching skills.

PEO 413. Field Leadership. 2 Credits.

Focuses on campcraft, field leadership, navigation, and safety skills. Includes a three-day outing and van driver training.

Prereq: PEO 285, PEO 351 or equivalent experience.

Physical Education: Racquet Sports Courses**PERS 199. Special Studies: [Topic]. 1-2 Credits.**

Repeatable.

PERS 211. Table Tennis I. 1 Credit.

Repeatable. Introduction to table tennis, including rules, scoring, and etiquette. Service, strokes, and game strategy. Repeatable once for a maximum of 2 credits.

PERS 212. Table Tennis II. 1 Credit.

Repeatable. Intermediate game strategies and skills. Repeatable once for a maximum of 2 credits.

Prereq: PERS 211 or equivalent.

PERS 231. Badminton I. 1 Credit.

Repeatable. Basic strokes, court positioning and strategies. Introduction to equipment, rules, scoring, and etiquette. Repeatable once for a maximum of 2 credits.

PERS 232. Badminton II. 1 Credit.

Repeatable. Intermediate shots, positioning and strategy through drills, match play, and class tournaments. Repeatable once for a maximum of 2 credits.

Prereq: PERS 231 or equivalent.

PERS 241. Racquetball I. 1 Credit.

Introduction to this fast-moving indoor sport. Skills, drills, strategies, rules, and participation in game play. Repeatable once for a maximum of 2 credits.

PERS 242. Racquetball II. 1 Credit.

For intermediate to advance players. Practice of fundamental skills and teaching of advanced skills: drive, lob, and Z serves; passing shots; back-wall kill. Repeatable once for a maximum of 2 credits.

PERS 271. Tennis I. 1 Credit.

Repeatable. Introduction to basic strokes, the serve, basic strategy, and beginning level positioning. Rules, scoring and etiquette will also be taught. Repeatable once for a maximum of 2 credits.

PERS 272. Tennis II. 1 Credit.

Repeatable. Refinement of basic strokes and introduction to advanced strokes and positioning. Drills, game play, and a class tournament.

Repeatable once for a maximum of 2 credits.

Prereq: PERS 271 or equivalent.

PERS 273. Tennis III. 1 Credit.

Repeatable. Advanced level singles and doubles positioning, strategies and skills. Repeatable once for a maximum of 2 credits.

Prereq: PERS 272 or equivalent.

PERS 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Running Courses**PERU 101. Fitness Walking. 1 Credit.**

Repeatable. Learn proper walking form, increase cardio endurance, and acquire knowledge to organize workout programs. Students experience various walking routes in the campus area. Repeatable once for maximum of 2 credits per activity.

PERU 131. Jog-Run. 1 Credit.

Repeatable. Instruction in running mechanics including intervals and pacing. Various running surfaces and courses, injury prevention, and cardiovascular endurance are emphasized. Repeatable once for a maximum of 2 credits.

PERU 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PERU 331. 5K Training I. 1-2 Credits.

Repeatable. Techniques for increasing speed and preparation for road racing. Repeatable once for maximum of 2 credits per activity.

Prereq: PERU 131 or equivalent.

PERU 332. 5K Training II. 1-2 Credits.

Repeatable. Increased mileage and speedwork for runners wanting to improve road race results. Repeatable once for maximum of 2 credits per activity.

Prereq: PERU 331 or equivalent.

PERU 341. 10K Training. 2 Credits.

Repeatable. Designed for the more experienced runner who wants base building, longer runs, longer speed workouts and to learn strategies for longer races. Repeatable once for a maximum of 4 credits.

Prereq: PERU 332 or equivalent.

PERU 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Team Sports Courses

PETS 101. Bocce Ball. 1 Credit.

Learn pointing, blocking, spocking; offensive and defensive strategies; scoring, safety, rules, and etiquette that combine for a fun environment for learning this ancient game.

PETS 111. Flag Football. 1 Credit.

Throwing, catching, running, cutting, pulling flags; strategies and techniques; offense, defense, game rules, and ground rules that create a safe and fun playing experience. Repeatable once for a maximum of 2 credits.

PETS 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PETS 232. Volleyball II. 1 Credit.

Repeatable. Designed for students with previous volleyball experience and want to continue play. Skill-building, rules, offensive and defensive strategies. Repeatable once for a maximum of 2 credits.

Prereq: beginning volleyball experience.

PETS 233. Volleyball III. 1 Credit.

Repeatable. Advanced play in a friendly atmosphere. Skills, drills, big hits, occasional blocks, aces. Repeatable once for a maximum of 2 credits.

Prereq: PETS 232 or equivalent.

PETS 242. Basketball II. 1 Credit.

Repeatable. Designed for students with previous basketball experience and want to continue play. Shooting, ball handling, defense, give go, and the back door. Repeatable once for a maximum of 2 credits.

Prereq: beginning basketball experience.

PETS 243. Basketball III. 1 Credit.

Repeatable. Advanced play, including offenses, defenses, drills, and full-court action. Repeatable once for a maximum of 2 credits.

Prereq: PETS 242 or equivalent.

PETS 252. Ultimate Frisbee I. 1 Credit.

Repeatable. Introduction to basic skills, including throws, catches, moves, strategies, and rules. Sequence with PETS 253, 254. Repeatable once for a maximum of 2 credits.

PETS 253. Ultimate Frisbee II. 1 Credit.

Repeatable. Intermediate and advanced play and skill development. Sequence with PETS 252, 254. Repeatable once for a maximum of 2 credits.

Prereq: PETS 252 or equivalent.

PETS 254. Ultimate Frisbee III. 1 Credit.

Advanced level; includes skill review, creating offenses and defenses, learning advanced skills, and the application of self-officiating. Sequence with PETS 252, 253. Repeatable once for a maximum of 2 credits.

PETS 261. Soccer I. 1 Credit.

Repeatable. Introduction to the basic skills of passing, dribbling, heading, tackling, and shielding. Game strategies and rules are taught through drills and team play. Repeatable once for a maximum of 2 credits.

PETS 262. Soccer II. 1 Credit.

Repeatable. Develop proficiency in soccer skills through drills and games. Group and team tactics as well as official soccer rules. Repeatable once for a maximum of 2 credits.

Prereq: PETS 261 or equivalent preferred.

PETS 263. Soccer III. 1 Credit.

Repeatable. Advanced techniques, principles of attack and defense, and kicks--corner, free, and penalty. Repeatable once for a maximum of 2 credits.

Prereq: PETS 262 or equivalent preferred.

PETS 265. Indoor Soccer II. 1 Credit.

Repeatable. Intermediate and advanced play, using the walls of a court as an additional dimension to play. Repeatable once for a maximum of 2 credits.

Prereq: beginning soccer experience.

PETS 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Weight Training Courses

PEW 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEW 211. Weight Training I. 1 Credit.

Repeatable. Technique for basic lifts in a variety of workout formats.

Develop strength and muscular endurance. Weight training principles and physical fitness evaluation. Repeatable once for a maximum of 2 credits.

PEW 212. Weight Training II. 1 Credit.

Repeatable. Advanced weight training exercises are introduced. Students can expect to work more independently. Intermediate program design, exercise science, and evaluation of strength and muscular endurance.

Repeatable once for a maximum of 2 credits.

Prereq: PEW 211 or equivalent.

PEW 220. Olympic Weight Lifting. 1 Credit.

A beginning technique course for the Olympic lifts (snatch and clean and jerk) following a progression of drills and exercises designed to develop movement patterns, muscular endurance, strength and power. Practice quality repetitions and receive feedback with focus and conscious effort. Repeatable once for a maximum of 2 credits.

PEW 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Student Services

R. Kevin Marbury, Vice President for Student Life

Administrative units at the University of Oregon provide a network of student services that support success in the classroom and challenge students to develop as individuals through an array of cocurricular experiences.

Emergencies

Many support services, including the Office of the Dean of Students (541-346-3216), the University Health Center (541-346-2770), and the University Counseling and Testing Center (541-346-3227) provide emergency aid to students during regular office hours—8:00 a.m. to 5:00 p.m., Monday through Friday.

The University Counseling and Testing Center offers a crisis line staffed at all hours by mental health professionals, and the University Health Center offers a health nurse advice line when the center is closed (541-346-2770, then press 1). In addition, a 24-hour, round-the-clock crisis line is available for those seeking support after experiencing sexual violence (541-346-7233).

In case of any other emergency, call 911 or the UO Police Department (541-346-2919).

ASUO

Associated Students of the University of Oregon

541-346-3724

Erb Memorial Union, Suite 4
 asuo@uoregon.edu

The Associated Students of the University of Oregon (ASUO) is the recognized representative organization of students at the university. Its network of committees, activities, and student organizations serves student needs and interests. The ASUO gives students the opportunity to plan and direct their own groups, to become involved in many aspects of university life, and to influence the decisions that affect the quality of education and student life at the university. Students who pay into the incidental fund are members of the ASUO.

Organization

The ASUO comprises three branches of student government—the ASUO Executive, the Constitution Court, and the Student Senate. Funding committees include the Programs Finance Committee (PFC), the Athletic and Contracts Finance Committee (ACFC), the Department Finance Committee (DFC), and the Erb Memorial Union Board (EMU Board).

Members of the senate and certain members of the PFC, ACFC, DFC, and EMU Board are elected. The remaining members of these bodies and the Constitution Court justices are appointed. Together these bodies provide governance, leadership, and representation for students.

ASUO Executive

The ASUO Executive comprises an elected student body president, vice president, and as many as 24 appointed students who serve as cabinet members. The president is elected during ASUO's campus-wide election in the spring, and members of the executive serve one-year terms.

The executive is responsible for university-wide campaigns, the oversight of recognized student organizations, and officer and committee appointments. Members of the executive identify issues and endeavors of importance to UO students and take steps to improve the student experience. The executive welcomes all students to submit their ideas for campus improvements to the ASUO president, who can be reached at asuopres@uoregon.edu.

In addition to coordinating campaigns, the executive approves, oversees, and works with more than 200 student organizations recognized by the association. Students who want to form a student organization and seek recognition may contact the programs coordinator at asuoprogram@uoregon.edu.

The executive also coordinates all appointments to university committees, task forces, and work groups. Students interested in serving the university by participating on a committee should contact the chief of staff at asuocos@uoregon.edu.

Student Senate and Finance Committees

The ASUO legislative branch consists of the 24-member Student Senate and four finance committees comprising seven to 12 student members each. A majority of the positions on the Senate and its finance committees are elected during the association's campus-wide election in the spring; a small number are appointed by the executive. Members of the legislative branch serve either one- or two-year terms.

The Student Senate, which includes 10 financial senators, 13 academic senators, and a first-year senator, is responsible for initiating funding and policy decisions, confirming presidential appointees, and ratifying actions of the finance committees.

The Senate debates policy and financial decisions and holds confirmation discussions at its weekly hearings that occur every Wednesday evening at 7:00 p.m. in the Dusty Miller Room, 107 Erb Memorial Union. Students and faculty and staff members are welcome to attend these hearings, and time is set aside during each meeting for those assembled to address the Senate.

Programs Finance Committee. This Senate subcommittee consists of nine students who are responsible for recommending the allocation and appropriation of incidental fees for ASUO-recognized student organizations. Any such organization is eligible to request money from the incidental fund, and this committee meets with each organization annually to discuss budget requests and examine its financial performance. This process typically begins in October and wraps up in January (for the following fiscal year). Any ASUO-recognized student organization trying to reach the Programs Finance Committee may contact its representatives at pfc@uoregon.edu.

The Athletics and Contracts Finance Committee. This Senate subcommittee consists of seven students who are responsible for recommending the allocation and appropriation of incidental fees for contracted service providers. It examines nine contracts annually, evaluates their performance, and makes decisions related to continuation

of contracted services for UO students. Included in the committee's purview are

- Lane Transit District (LTD) bus passes for students
- student legal services
- advocacy services for students
- sexual assault support services
- athletics tickets for students
- student newspaper publication and distribution services
- child-care services at Spencer View Housing
- opportunities for students to engage in advocacy through OSPIRG and the Oregon Student Association

Students trying to reach the Athletics and Contracts Finance Committee may contact its representatives at acfc@uoregon.edu.

Department Finance Committee. This Senate subcommittee consists of seven students who are responsible for recommending the allocation and appropriation of incidental fees for department-based programs of the university. It oversees expenditures to 14 units within the university, including but not limited to the Mills International Center, the Safe Ride and Designated Driver Shuttle Program, Student Government Engagement and Success, Conflict Resolution Services, the UO Zero-Waste Program, and the Women's Center. Individuals trying to reach the Departments Finance Committee may contact its representatives at dfc@uoregon.edu.

EMU Board. The EMU Board is technically a subcommittee of the Student Senate, and also exists to advise Erb Memorial Union representatives on matters relating to the use of the facility. The EMU Board consists of 12 students and several administrators. The EMU Board Finance Committee is responsible for recommending the allocation and appropriation of incidental fees for the EMU and for all EMU-based programs. It examines expenditures and endeavors of the Craft Center, Club Sports, Center for Student Involvement, Moss Street Children's Center, KWVA-FM, the Sustainability Coalition, and several administrative units. The EMU Board may be reached at emuboard@uoregon.edu.

Constitution Court

The Constitution Court is a five-member body appointed by the student body president and confirmed by Student Senate. Associate justices serve terms for the duration of their time as UO students.

The court has the authority to rule on any question arising under the ASUO Constitution or any rule promulgated under it. This review power covers almost any action by ASUO government bodies, programs, and—in special cases such as elections—actions by individual students within programs. The Constitution Court has broad powers to impose sanctions to compel compliance with its rulings.

Students who are interested in learning more about the court may contact the chief justice at concourtchief@uoregon.edu.

Counseling Center

Shelly Kerr, Director

541-346-3227

541-346-2842 fax

University Health, Counseling, and Testing Center Building, Second Floor
1590 E. 13th Ave.

counseling.uoregon.edu

The University Counseling Center, a unit of the Division of Student Services and Enrollment Management, provides mental health programs and services to currently enrolled UO students; consultation and education and prevention programs for faculty and staff members, parents and families of students; and training and supervision to graduate-level therapists. A professional support and crisis line is available when the center is closed.

The Counseling Center provides initial assessment, brief individual therapy, support and therapy groups, crisis intervention, referral to community resources, and education and prevention workshops to UO students. Issues commonly addressed include depression, anxiety, suicidal thoughts, relationship concerns, psychosis, mania, identity development, body image concerns, eating disorders, grief and loss, and sexual assault. Psychologists and counselors provide consultation on issues relevant to the mental health of students and education and prevention programs to members of the university community. The Collegiate Recovery Center provides support for students in recovery from drug and alcohol addiction. More information, including hours of operation, is available on the website (<http://recovery.uoregon.edu>).

Dean of Students

Kris Winter, Associate Vice President and Dean of Students

541-346-3216

164 Oregon Hall

uodos@uoregon.edu

dos.uoregon.edu

The Office of the Dean of Students is a unit within the Division of Student Life that helps students derive full benefit from their university experience by providing education and support programs and services. The office staff works to ensure that all students are supported and accepted and that the obstacles to student success are minimized.

Bias Education and Response Team

The Bias Education and Response Team works to provide students who have witnessed an act of bias, or have themselves become the target of such an act, an opportunity to be heard and supported. Filing a report of bias with the response team adds information that helps improve the climate on campus and in the community. The report form is available on the Office of the Dean of Students (<https://dos.uoregon.edu>) website.

Multicultural Education, Student Engagement and Support

This unit provides support to the programs that enhance the educational, cultural, and social development of students with a special emphasis on the unique needs of students of color and historically underrepresented and marginalized student groups. It acknowledges, celebrates, and promotes the diverse cultural experiences of each member of the university community, strives to build collaborative relationships, and advocates for social justice.

Fraternity and Sorority Life

Fraternities and sororities are organizations that focus on scholarship and learning, leadership, brother- and sisterhood, community service, philanthropy, and community awareness among members. Since the founding of the first fraternity in 1776, hundreds of Greek-lettered organizations have been established across college campuses in North

America. A longtime part of the student experience at the University of Oregon, the fraternity and sorority community has existed since 1900, when the first fraternity was established on campus. The mission of Fraternity and Sorority Life is to enhance the quality of student life at the University of Oregon by aiding members of the Greek community through advising with a developmental approach, educating with a purpose, collaborating with stakeholders, promoting academic success, encouraging civic responsibility, advocating for healthy lifestyles, and advancing values-based leadership and decision-making.

More than 3,300 students are currently involved in more than 30 Greek-lettered organizations.

Holden Center for Leadership and Community Engagement

The Holden Center helps prepare students to be positive contributors on campus, within the community, and globally. The center provides opportunities for students to develop as leaders and citizens, regardless of their previous experience or exposure to leadership roles. Members of the center's multidisciplinary staff work directly with students to increase their leadership efficacy and capacity, explore their strengths and passions, teach them new skills and effective practices, help involve them in productive collaborations, and increase their chances of success as agents of change.

Many entry points and opportunities exist for students to get involved at the center, including advising, mentorship, teaching, and experiential programming, with space for students to grow and excel as leaders, get involved with the community, find solutions to problems, and improve the future. These efforts include workshops on identifying individual talents and group effectiveness; volunteer opportunities to help students cultivate their involvement in the local community; service-based trips regionally and internationally; and an intensive leadership development institute.

Honors and Awards

See the **Honors at Oregon** section of this catalog for information about honorary societies, outstanding-student awards, scholarships and prizes, and the Dean's List.

Lesbian, Gay, Bisexual, and Transgender Education and Support Services

Understanding and acceptance are essential to creating a welcoming environment for lesbian, gay, bisexual, transgender, queer, questioning, intersex, and ally students. This program develops and provides educational services related to homophobia and heterosexism; assists student organizations and academic units in bringing speakers to campus for educational programs; serves as a referral source for and provides consultation to members of the lesbian, gay, bisexual, and transgender community; and offers support services for lesbian, gay, bisexual, and transgender people and their heterosexual allies.

Nontraditional and Veterans Engagement and Success

Nontraditional students—students over the age of 24, students who are reentering the university after a break, student parents, and veterans—are offered support and assistance specific to their needs. The office works closely and advises the Nontraditional Student Union, ensuring that nontraditional student needs are heard and addressed.

Parent and Family Programs

Parent and Family Programs is a unit in the Division of Student Life, operating with the conviction that informed parents and family members are a valuable resource for their students as well as the larger university community. The program office offers support and resources—communication, event coordination, and other opportunities for participation—to parents and families of UO students, including assistance in navigating the university and in addressing parental concerns.

Parent and Family Programs hosts activities for parents and family members during Week of Welcome, Fall Family Weekend, and Spring Family Weekend. Family members are also encouraged to stay involved through the Parent and Family Association, the Regional Representative Volunteer Program, the Parent Professional Network, or the Parent Leadership Council.

For more information and important dates, visit the website (<https://families.uoregon.edu>).

Sexual Violence Prevention and Education

The Sexual Violence Prevention and Education team utilizes a variety of initiatives to educate, train, and build awareness around complex issues of sexual and dating violence at the University of Oregon. Specific programs include Get Explicit, Sexual Assault Awareness Month, and the interactive facilitation group Sexual Wellness Advocacy Team (SWAT).

Sexual Violence Response and Support Services

This program provides a comprehensive 24-hour response to students who have experienced sexual harassment, sexual assault, domestic or dating violence, and stalking. For more information or to receive help, call 541-346-SAFE or visit safe.uoregon.edu.

Student Conduct and Community Standards

The Office of Student Conduct and Community Standards protects the rights, health, safety, and well-being of every member of the university community while promoting the educational objectives of the university. All students are held responsible to the community standards in the UO's student conduct code. The conduct code may be viewed in full by visiting the dean's website.

Substance Abuse Prevention and Student Success

The Substance Abuse Prevention and Student Success program addresses high-risk drinking and substance abuse on the UO campus and its impact on students' academic and personal success. With evidence-based, comprehensive, and coordinated efforts, staff members of the program collaborate with campus and community partners to provide alternative programming and services to students.

The Duck Store

Arlyn Schaufler, General Manager

541-255-0700

895 E. 13th Ave.

uoduckstore.com (<http://uoduckstore.com>)

The Duck Store (formerly the University of Oregon Bookstore), located just west of the campus, is open daily, Monday through Thursday, 7:45 a.m. to 7:00 p.m.; Friday, 7:45 a.m. to 6:00 p.m.; Saturday, 10:00 to 6:00

p.m.; and Sunday, 10:00 a.m. to 6:00 p.m. Special hours apply during term breaks and holidays. Check the website for exceptions.

The Duck Store comprises five departments: books, technology, art and school supplies, sportswear (UO-related apparel and memorabilia), and the Duck Store Café.

History

The Duck Store was established in 1920 as a cooperative and is now run as a nonprofit organization owned by UO students and members of the faculty and classified staff. Policy is decided by a board of directors composed of eight students, two faculty members, and one classified staff member. The directors are selected in annual elections by the membership.

General Services

The Duck Store offers no-charge check cashing for amounts up to \$20, ATM machines, postage stamp sales and a mail drop, UPS package service, and fax service. The store also provides the university community with graduation regalia and announcements.

The bookstore offers course book rentals and e-books as well as traditional textbooks. University of Oregon students and members of the faculty and staff receive a discount off the publisher's list price of new textbooks and at least 32 percent off used books. Students may resell their books at any time. For the best prices and buy-back dates, visit uoduckstore.com/student (<http://uoduckstore.com/student>). Dates are posted on the Duck Store website. Thousands of book award and school supply scholarships have been awarded since 2003. For more information on the awards program, visit the website.

Art and School Supplies

The art and school supplies department in the store basement is Oregon's largest art store south of Portland. As well as housing a wide variety of art and architecture materials, it offers everything you need in school and office supplies. Local artists frequent the Duck Store for its extensive selection of art supplies and the personal service from its knowledgeable staff.

Technology

The technology department provides computers, software, and technology solutions for the UO community. Low educational prices on hardware and software are available for UO students, faculty, and staff. The computer department also provides a Kodak instant-print kiosk and fax services.

Duck Store Café

The Duck Store Café gourmet coffee and espresso counter features specialty coffee drinks, food, and snacks.

Sportswear, Gifts, and Cards

The sportswear department carries the latest officially licensed UO sportswear, gifts, and Oregon memorabilia. Profits return to campus and support the discount on course materials, and help other campus units provide benefits for UO students and alumni. Visit the Duck Store main

floor for a selection of distinctive gifts, greeting cards, and magazines, or visit the main website.

Knight Law Center

The Duck Store serves the John E. Jaqua Law Library with the Court Café, selling coffee, beverages, and food. Students can pick up law course packets and books and send faxes. Court Café hours may be found on the Duck Store website.

The Duck Store at the Rec

The Duck Store at the Student Recreation Center features a Shake Smart location selling protein drinks, acai bowls, and other food and beverages. Students using the Rec Center may purchase yoga mats, swimsuits, water bottles, protein bars, and other items needed in a gym environment. Hours may be found on the Duck Store website.

Other Locations

Duck Store locations may be found at Autzen Stadium and Valley River Center. During home football games, the Club Store is also open inside Autzen Stadium, and two retail locations are open during events at Matthew Knight Arena.

For the convenience of students, alumni, and friends of the university outside the Eugene area, the Duck Store sells university sportswear and insignia merchandise at the University of Oregon facility at the White Stag Block in Portland, the Washington Square Mall in Tigard, and the Clackamas Town Center in the Portland Metro area. For directions to any of these locations, visit the website (<https://www.uoduckstore.com/find-a-store>).

Internet Store

The Duck Store online is a great resource for reserving course books, ordering merchandise and gifts, finding information about current events, and much more.

Erb Memorial Union

Laurie Woodward, Director

541-346-6064

1228 E. 13th Ave.

emu.uoregon.edu

The Erb Memorial Union (EMU) is the community center for the University of Oregon. A unit within the Division of Student Life, the EMU provides programs, facilities, food, and other services for students and the entire campus community.

Through the various programs, services, and student organizations that have offices in the EMU, students are provided with a safe place to explore new ideas and take risks, an environment that fosters real-world experience and a process that allows students to learn at their own pace—all within the framework of staff support and guidance. Other services provided include a wellness center, guest services desk, ticket office, computer and copy centers, the Mills International Center, art galleries, a branch of the Duck Store, healthy food options, banking services, and a variety of meeting and event spaces for student groups and the campus community to use.

The programs and services listed below are managed through the EMU and provide students with a broad array of activities and experiences designed to complement and enhance the educational experience.

Board

The Erb Memorial Union Board is responsible for making general policy decisions and long-range plans for the Erb Memorial Union. The board approves allocation of the EMU's multimillion dollar budget, assigns space for student organizations, and advises the EMU staff in the union's management and administration. The sixteen-member board comprises twelve students, three faculty representatives, and one EMU staff representative.

Associated Students of the University of Oregon (ASUO)

The ASUO is the student governing body at the University of Oregon. With more than 200 student organizations, the ASUO offers students many opportunities to direct their own programs, become involved in every aspect of student life, and influence the decisions that affect the quality of education at the UO. Many of these programs have offices in the building, including the Women's Center, Multicultural Center, Men's Center, Designated Driver Shuttle, Student Veterans Center, and the Nontraditional Student Union. For more information, see the Associated Students of the University of Oregon section of this catalog.

Club Sports

Club Sports is an athletic and leadership program that provides UO student with the opportunity to compete in a variety of team and individual sports and activities. Club teams practice, host games, and events, travel to competitions throughout the US, and contend for national championships every year. Currently there are 43 club teams with more than 1,250 participants. For more information, call 541-346-8025, or visit the website at clubsports.uoregon.edu.

Craft Center

The Craft Center offers workshops in ceramics, woodworking, glassblowing, jewelry, fibers, painting, photography, silkscreen, glass torch working, and many areas of the visual arts in a collaborative environment designed to enhance the student experience in a creative atmosphere free from grades and assignments.

Well-equipped studios are available for use. Current UO students may sign up for a free pass each term. Materials and supplies are sold for each studio area. The center's professional staff members, instructors, and student staff members are excellent resources for students' artistic projects. For more information, call 541-346-4361, or visit the website at craftcenter.uoregon.edu.

Center for Student Involvement

The Center for Student Involvement is the hub for student organizations and groups on campus. The staff supports and puts on large events such as Ducks after Dark, Flock Party, and Homecoming, but also works to present cultural events in music, film, performing arts, contemporary topics, and the visual arts that reflect the diverse interests of students and encourage a social and educational exchange for both the campus community. The office serves as a resource center for student groups to meet and plan events.

The Center for Student Involvement supports student organizations and activities that enliven UO traditions, keep students engaged, and strengthen the campus community. The center manages many student

organization services that enhance students' ability to get involved. In addition, staff members advise the Student Activities Board and create safe, fun student events that create positive learning opportunities.

KWVA 88.1 FM

KWVA is the student radio station, broadcasting at 88.1 FM and on the Internet. KWVA broadcasts 24 hours a day, 365 days a year. Programs are produced at KWVA in the Erb Memorial Union, and include diverse music, news, and sports. Students and non-students are welcome to participate as DJs and as news, sports, production, and marketing volunteers. No experience is necessary. For more information, call 541-346-4091 or visit the website, kwvaradio.org (<http://kwvaradio.org>).

Moss Street Children's Center

Moss Street Children's Center provides developmentally appropriate child care for infants, toddlers, preschoolers, and school children in kindergarten through the fifth grade. Priority for child-care services is given to enrolled students; however, members of the UO faculty and staff, as well as community families, may also enroll if space is available. Many students work in the program as employees or volunteers and receive practicum credit through various academic departments. The center is located on the edge of campus at 1685 Moss St. For more information, call 541-346-4384 or visit the website, moss.uoregon.edu.

Outdoor Program

The Outdoor Program offers a variety of affordable, cooperative activities such as hiking, rafting, kayaking, backpacking, rock climbing, skiing, and snowboarding. The program provides trip-planning resources, skill-building clinics, and a free do-it-yourself bike maintenance shop in the EMU. The Outdoor Program "Barn," where students may rent low-cost outdoor equipment and bikes, is located five blocks from the EMU, at the corner of University Street and East 18th Avenue. For more information, call 541-346-4365 or visit the website at outdoorprogram.uoregon.edu.

Student Sustainability Coalition

The Student Sustainability Coalition (SSC) is a collaborative space for student-led initiatives that fosters and supports the simultaneous pursuit of human equity, environmental vitality, and economic well-being. By working together with individual students, student groups, and academic programs, the SSC helps students develop the skills, strategies, and networks necessary to achieve a more sustainable world. The coalition also plans university-wide events throughout the year, including the Sustainability Fair and Earth Week. For more information, call 541-346-8321 or visit the website (<https://emu.uoregon.edu/sustainability>).

UO Scheduling and Event Services

This office facilitates the scheduling and support for most nonacademic use of UO buildings, rooms, and outdoor spaces. Scheduling and Event Services offers professional planning assistance to both university and unaffiliated groups for their events, provides the necessary personnel and technical equipment to aid in the success of those events, and helps sponsors navigate campus policies to assure their events are in compliance. For more information, call 541-346-6000 or visit the website at scheduling.uoregon.edu.

UO Card Office

This office provides students, faculty and staff members, and guests with official university identification cards to be used for a number of services

across campus. Your photo ID card may be used as a debit card for purchases on campus with a UO Duck Bucks account.

UO Ticket Office and Passport Center

This office provides a full range of ticketing and box office services for university student groups and departments, including the University Theatre, UO School of Music and Dance, and Oregon Bach Festival. As a sales outlet for Ticketmaster, TicketsWest, Hult Center, WOW Hall, and Matthew Knight Arena, the Ticket Office sells admission for a broad range of events in Eugene, Portland, and throughout the Pacific Northwest. For more information, call 541-346-4363 or visit the website at tickets.uoregon.edu.

The Ticket Office also serves as a US passport application acceptance location and passport photo center. This is a drop-in passport location; no appointments are needed for passport acceptance or photos.

Health Services

541-346-2770

University Health, Counseling, and Testing Center Building
1590 East 13th Avenue (at the corner of 13th and Agate)
health.uoregon.edu

The University Health Center is a unit of the Division of Student Services and Enrollment Management. The center is nationally accredited, offering high-quality primary care and specialty care services to help UO students stay healthy. These services are provided by a highly qualified staff that includes board-certified physicians and nurse practitioners, dentists, registered nurses, certified medical assistants, laboratory and x-ray technicians, athletics trainers, physical therapists, pharmacists, dental hygienists, health-promotion staff members, massage therapists, an acupuncturist, a dietician, and a support staff.

Health Care Services

- Primary care
- Acute care
- Allergy and asthma care
- Dental care
- Endocrinology
 - Diabetes management
 - Transgender medicine
- Laboratory and x-ray
- Massage and acupuncture
- Minor surgical procedures
- Pharmacy
- Physical therapy
- Psychiatry
- Sexual assault exams
- Sports medicine
- Sexually transmitted infection screening and treatment
- Tobacco cessation
- Travel clinic
- Vaccines

Other Services

- Health promotion and student well-being
- Nutrition and food security

- Stress and sleep management
- Sexual health
- Physical activity
- Body acceptance
- Protection-Connection sexual health supply program
- Body Project body acceptance intervention
- Promotion of a smoke- and tobacco-free campus
- Student health insurance program
- Communicable disease management and control

Hours of Operation

The center's normal hours of operation for the fall through spring terms are 9:00 a.m. to 5:00 p.m., Monday through Friday, and from 9:00 a.m. to noon on Saturday. Summer session hours are 9:00 a.m. to 4:30 p.m., Monday through Friday, and closed weekends. The center is closed on all university holidays. Some clinics may have extended hours; please refer to the website for more information.

Appointments

Students are encouraged to make appointments by calling 541-346-2770 during weekday hours or by logging in to the online portal (<https://health.uoregon.edu/myuohealth>).

A nurse advice line is available for students 24 hours a day at 541-346-2770.

Local emergency rooms and after-hours clinics are available for emergency and immediate care when the center is closed.

Student Health Fee and Health Center Charges

The UO student health fee allows eligible students to access the center's services. In addition, the student health fee funds wellness activities, provides access to contraceptives and safer sex resources, and enables the health center respond to and manage communicable disease outbreaks and campus health emergencies.

Students are responsible for payment of medical services at the center, when referred for medical services not available at the center, and when using medical services outside of the center. Check the website (<https://health.uoregon.edu/costs-services>) for further information about the cost of services.

Student Health Insurance

The University of Oregon provides the UO Student Health Benefits Plan, which offers excellent coverage at affordable rates, including 100 percent coverage for most services at the University Health Center. International students are automatically enrolled in the plan; domestic students must opt-in to the plan before published deadlines.

The University Health Center is now accepting some insurance plans as an in-network provider. Check the website (<https://health.uoregon.edu/insurance>) for further information about insurance billing options.

Immunization Requirements

The University of Oregon has immunization and communicable disease screening requirements for all incoming students. Students are encouraged to satisfy all of their immunization requirements before arriving on campus. The following vaccines are required:

- Measles, mumps, and rubella (MMR) (two doses or proof of immunity or birthdate prior to 1957)

- Meningococcal quadrivalent (serogroups A, C, Y, and W-135) vaccination for all students younger than 22 (dose received on or after age 16)
- Varicella (chickenpox) (two doses or proof of immunity)
- Tetanus-diphtheria-pertussis (Tdap) (one dose on or after age 11)

Incoming students also must complete an online screening questionnaire for tuberculosis (TB). Results of this evaluation, in addition to documentation of required vaccinations (or evidence of immunity to these diseases) must be submitted to the center. Visit the health center website (<https://health.uoregon.edu/enrollment-requirements>) for more information.

While not required at this time, the center highly recommends vaccines for meningococcal B strain, hepatitis A and B, and human papillomavirus (HPV), in addition to an annual flu shot. Pneumococcal vaccine is recommended for students with certain medical conditions.

Other General Information

The University Health Center is a covered entity of the Health Insurance Portability and Accountability Act of 1996 and the health-care services provided are confidential. Medical records, patient bills, and other patient information are released only with the specific written authorization of the patient, unless required by law.

The center is a member in good standing with the American College Health Association and is fully accredited by the Accreditation Association for Ambulatory Health Care.

For more information, visit the website (<https://health.uoregon.edu>).

Intercollegiate Athletics

Rob Mullens, Director

541-346-4481

Len Casanova Athletic Center
2727 Leo Harris Parkway

Head Coaches

Dana Altman, men's basketball

Mario Cristobal, football

Katrina Dowd, women's lacrosse

Kelly Graves, women's basketball

George Horton, baseball

Robert Johnson, men's and women's cross-country, track and field

Casey Martin, men's golf

Kat Mertz, women's soccer

Nils Schyllander, men's tennis

Ria Scott, women's golf

Alison Silverio, women's tennis

Matt Ulmer, volleyball

Mike White, softball

Keenyn Won, acrobatics and tumbling

Intercollegiate athletics at the university is an integral part of the institution. The university has a rich heritage in men's intercollegiate athletics, one that includes seven National Collegiate Athletic Association (NCAA) track-and-field championships, six NCAA cross-country championships, and the first-ever NCAA basketball championship in 1939. University women earned national track-and-field titles six times—including a run of five consecutive indoor championships from 2010 to 2014—in addition to women's cross-country titles in 1983, 1987, and 2012. The men claimed NCAA track championships in 1962, 1964, 1965, 1970, 1984, 2009, and 2014, as well as cross-country titles in 1971, 1973, 1974, 1977, 2007, and 2008.

Success in sports has made Eugene and the university an attractive site for national championships. The university has been the host for collegiate national championships in men's and women's track and field, women's basketball, gymnastics, wrestling, and golf.

Eugene was the site of the 1972, 1976, 1980, 2008, and 2012 Olympic Team Trials in track and field. In addition, the University of Oregon has hosted nine NCAA meets and seven U.S. national championships.

Men's and women's teams in various sports have won conference and regional championships. Many university athletes have won individual national titles and participated in the Olympic Games, World Championships, and other major competitions.

Emphasis on academics and athletics has resulted in the university accumulating ninety-three Academic All-Americans, five NCAA Top-Eight awards, and a number of NCAA postgraduate scholarship recipients.

The university fields eight sports for men and 12 for women. Men's sports are baseball, basketball, cross-country, football, golf, tennis, and indoor and outdoor track and field. Women's sports include acrobatics and tumbling, basketball, cross-country, golf, lacrosse, soccer, softball, tennis, indoor and outdoor track and field, and volleyball. Sand volleyball is the latest addition to the women's side; intercollegiate competition began during 2013–14. Women's intercollegiate athletics, organized in 1973, joined the Department of Intercollegiate Athletics in 1977.

The University of Oregon belongs to the NCAA; both men and women compete at the Division I level. The longtime organizer of men's athletics, the NCAA, began sponsoring women's championships in the 1981–82 season.

The university also belongs to the Pacific-12 Conference (Pac-12). Other members of the Pac-12 are Arizona, Arizona State, UCLA, USC, California, Colorado, Stanford, Oregon State, Utah, Washington, and Washington State.

The UO football program—participants in 27 bowl games since the 1916 season—has been selected for 21 postseason appearances in the last 25 years, including Bowl Championship Series victories in the 2002 and 2013 Fiesta Bowls and the 2012 Rose Bowl.

Pac-12 schools have captured more NCAA titles than any other conference in the nation.

Duck Athletic Fund

The Duck Athletic Fund, the fundraising arm of the Department of Intercollegiate Athletics, has as its primary mission the funding of athletic scholarships. Home offices are in the Len Casanova Athletic Center on

the UO campus; call 541-346-5433. There are branch offices in Eugene and at the University of Oregon in Portland. The University of Oregon in Portland is at 70 NW Couch St.; call 503-725-3825.

International Student and Scholar Services

Abe Schafermeyer, Senior Director

541-346-3206
333 Oregon Hall

International Student and Scholar Services provides a wide array of advising services and programs to nearly 2,500 international students regarding visa and immigration matters, academic support and success, and social and cultural adjustment.

Primary programs include prearrival resources, a comprehensive on-campus orientation attended by more than 750 students each year; academic writing support and tutoring services offered in collaboration with the Tutoring and Academic Engagement Center; ExplOregon, a social and cultural adjustment program that organizes more than 50 local and statewide events and field trips each year; and a peer mentor program that brings together newly arrived international students and returning students.

International Student and Scholar Services is a long-time partner of the Friendship Foundation for International Students, a local community organization that coordinates short-term home stays, cultural conversations, and friendship programs. The unit also administers \$1.4 million worth of scholarship programs for international students, among them the award-winning International Cultural Service Program, Global Corners International Graduate Student Recruitment and Retention awards, international work-study assistance, and other resources.

In addition, International Student and Scholar Services offers services to 250 visiting international researchers, faculty and staff members, including advising on a wide range of immigration, employment, and adjustment matters.

Investigations and Civil Rights Compliance

Darci Heroy, Associate Vice President, Chief Civil Rights Officer, and Title IX Coordinator

541-346-3123
541-346-4168 fax
677 E. 12th Ave., Suite 452

The Office of Investigations and Civil Rights Compliance (formerly the Office of Affirmative Action and Equal Opportunity and the Office of the Title IX Coordinator), offers the UO community a place to discuss and report concerns regarding discriminatory or harassing behavior, and helps identify how such concerns may best be addressed and resolved. The office supports the university's compliance with federal and state laws regarding prohibited discrimination and harassment and equal employment opportunity. In addition, the chief civil rights officer who oversees its functions serves as the university's Title IX coordinator. Staff members of the office work with students, faculty and staff members, and campus community members to promote an environment free from discrimination and harassment.

To report a concern or complaint, please visit the website and click on *How to Report*.

Direct related inquiries to the office via telephone at the number listed above or by mail to 677 E. 12th Ave., Suite 452, 5221 University of Oregon, Eugene, Oregon 97403-5221.

Mills International Center

Sonja Rasmussen, Director

541-346-0887

The Mills International Center, located in the Erb Memorial Union, is known on campus as "a meeting place for the world." More than 31,000 students and members of the faculty and community visit the center annually to study, attend international events, relax, or use the media resources—travel and adventure books and DVDs, international magazines, newspapers, cookbooks, CDs, and films. Groups from all over campus reserve the center for their activities, and more than 200 events were held at the center last year.

Orientation

Cora Bennett, Director, Student Orientation Programs

541-346-1167
450 Oregon Hall
5263 University of Oregon
Eugene, Oregon 97403-5263
orientation@uoregon.edu (uointro@uoregon.edu)
orientation.uoregon.edu

Student Orientation Programs introduces new and prospective students and their families to the university's intellectual climate, improving the quality of the new-student experience by providing assistance with academic, social, and personal adjustment to the university.

Ambassador Program

Through the Ambassador Program, undergraduate student leaders participate in various recruiting, public relations, and leadership activities for prospective new students and visitors to the university. Ambassadors assist with weekly campus tours six days a week at various times throughout the year; please visit the website for current list of tour offerings. In addition, ambassadors staff a telephone-calling project and participate in campus open houses, college fairs, and high school visitations. Ambassadors are trained to interact with potential UO students, answer general questions about the university, and help ease anxieties about college life at the University of Oregon.

IntroDUCkTion

This is a one- or two-day orientation program for new students and their families, which takes place for each academic term. University faculty and staff members and trained undergraduate student leaders coordinate programs that offer information about the University of Oregon's academic programs and support services. New students meet with an academic advisor and register for courses for their first term. During the program, participants may live in the residence halls, become familiar with campus, and acquire college survival skills before Week of Welcome activities in September. In addition to the student program, a

separate but concurrent parent and family program is offered during each two-day program.

Week of Welcome

This five-day orientation and transition program is held in September before the start of fall term. Faculty members and returning students help ease incoming first-year and transfer students' transition to the University of Oregon by presenting dozens of academic, social, and cultural activities. During the orientation, new students meet other students, start their college careers smoothly, and discover the campus and community resources vital to their academic success.

Physical Education and Recreation

Lynn Nester, Director
541-346-4113
Student Recreation Center
rec.uoregon.edu

The Department of Physical Education and Recreation—one of four units in the Division of Student Life—educates and inspires the campus community to live active, balanced lives.

Recreational Facilities

The Student Recreation Center provides state-of-the-art equipment and spaces for all sport and fitness needs of the UO campus community. The recreation complex is located primarily on 42 acres at the southeast corner of the campus. Membership to the center is included in fees for most currently enrolled students; faculty and staff members, alumni, and community members are eligible to purchase memberships on an annual or term-by-term basis.

The newly expanded and renovated Student Recreation Center has a climbing wall, bouldering wall, suspended running track, 12-lane lap pool, warm water leisure pool, hot tub, eight basketball and volleyball courts, fitness and weight rooms, locker rooms, four racquetball courts, squash court, multipurpose rooms, and mat rooms. A wide variety of spaces are available for open recreation during open hours, and additional spaces are made available outside of scheduled classes and programs. Equipment and towels are also available for the use of members.

Physical education and recreational programming may take place at the center or one of the other facilities or fields managed by the department. Two multipurpose rooms are located in Gerlinger Hall; Gerlinger Annex has two gymnasiums primarily used for physical education classes and intramural sports. The Student Tennis Center is located behind McArthur Court and features six courts. In addition, six outdoor courts are located near the corner of East 18th Avenue and Onyx Street. Four lighted artificial turf fields are located east and south of the Student Recreation Center. For more information about facilities and court reservations, call 541-346-4183.

Inclusive Recreation

The department is committed to providing a welcoming and inclusive environment that promotes the right of every person to lead a healthy, balanced life. Inclusion is one of the department's core values, and when designing the center renovation, developing programming, and purchasing exercise equipment, accessibility was a guiding principle.

A variety of accommodations are provided to ensure that people of all abilities are encouraged to participate in programs and activities.

Intramural Sports

The intramural sports program provides opportunities for members of the university community to participate in a variety of sports and recreational activities. All ability levels are welcome, from beginning athletes trying a sport for the first time to seasoned competitors. Purchasing an intramural membership for a low, flat rate opens access to the multiple leagues, tournaments, and special events offered each term. Some of the most popular activities are flag football, basketball, soccer, volleyball, softball, and ultimate Frisbee. For more information, call 541-346-4113 or visit the website.

Recreational Fitness

Recreational fitness programs provide high-quality, inexpensive opportunities to exercise in drop-in or scheduled formats. Offerings include Webfoot CrossFit, "Group X" training (cycling, body sculpting, boot camp, yoga, F45 functional group training, and kick boxing), and personal training.

An official affiliate, Webfoot CrossFit is a strength and conditioning program incorporating weightlifting, gymnastics, and body-weight and high-intensity training. Coaches work to increase flexibility, strength, and power; workouts include modifications for all fitness levels. Students may purchase a Webfoot CrossFit workout pass to join any scheduled workout of the day.

The Group X program offers a variety of workout sessions led by student instructors for drop-in participation. Workouts include modifications for every fitness level to ensure that everyone may participate and work toward meeting their fitness goals. Students and center members may purchase an unlimited Group X workout pass for \$35 per term and drop in at their convenience.

Nationally certified personal trainers perform fitness assessments and create individualized training programs for students. Each session includes a risk assessment and goal-setting consultation, personalized workout program, and physical training to refine the participant's technique and form.

For more information, call 541-346-4113 or visit the website.

Youth and Family Programs

The department strives to support inclusive, active lifestyles for members of the university community, including their families. Children are welcome in the Student Recreation Center for Duck Trails youth camps, a variety of youth and family lessons, family recreation time, and multiple special events per year.

Duck Trails provides multiple summer and school-year camps, introducing campers to a variety of fun activities designed to promote teamwork and friendship.

The Student Recreation Center is an independent, authorized provider of the Starfish Swimming Program—a nationally recognized swim instruction curriculum developed by the Starfish Aquatics Institute. Lessons are open to all children from ages 18 months to 14 years.

Police Department

Matthew Carmichael, Chief of Police
541-346-2919

541-346-0947 fax
2141 E. 15th Ave.
police.uoregon.edu

The University of Oregon Police Department (UOPD) is responsible for the general safety of the campus community twenty-four hours a day, seven days a week. Its police officers are the primary law enforcement providers on campus, trained to exceed standards established by the Oregon Department of Public Safety Standards and Training.

The department works closely with all campus departments as well as community law enforcement and emergency, health, and safety agencies to plan for and maintain a safe environment, and to quickly and effectively resolve safety and security issues. Residents and visitors should report campus crimes or safety concerns immediately to the UOPD by calling 541-346-2919 or, in emergencies, 9-1-1.

The UOPD receives its police powers under the Oregon Revised Statutes (Section 352.383). The department employs state-certified police officers as well as security officers and civilian personnel—including student security assistants—in various roles. University police officers have the same authority and basic training as other police officers in the state, with advanced training developed to support a global campus environment.

In compliance with the federal Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, the University of Oregon prepares an annual report that describes campus safety and security programs and services.

A copy of the university's annual security and fire safety report is available on the department website. This report includes statistics for the previous three years about reported crimes that occurred on campus; in certain off-campus buildings or property owned or controlled by the University of Oregon; and on public property within or immediately adjacent to and accessible from campus. The report also includes institutional policies about campus security, such as alcohol and drug use, crime prevention, the reporting of crimes, and sexual assault.

UOPD facilitates and manages building access control, provides first response for medical or other emergencies, crime prevention, emergency dispatch, security assessment, and special event safety planning. UOPD personnel patrol the campus and respond to needs 24 hours a day, by vehicle, by bicycle, and on foot.

UOPD is part of the Safety and Risk Services unit within the Office of the Vice President for Finance and Administration. The department joins Emergency Management and Fire Prevention and Risk Management and Environmental Health and Safety in a shared mission to safeguard the campus and reduce vulnerabilities so that students and members of the faculty can safely learn, teach, and conduct research.

Special Services

High School Equivalency Program

Armando I. Bravo, Recruiter
541-346-0881
1685 E. 17th Ave.
hep@uoregon.edu
education.uoregon.edu/HEP

Federally funded and sponsored by the University of Oregon, the High School Equivalency Program is a multicultural, bilingual, alternative education program for migrant and seasonal farm workers. The program

offers services to students with a wide range of academic and language skills and provides instruction in social, academic, and critical-thinking skills necessary to pass the general educational development (GED) test and to be placed in college, job training, or employment. The program office is open weekdays from 8:00 a.m. to 5:00 p.m.

McNair Scholars Program

Lynette L. Danley, Director
541-346-2182
65 Prince Lucien Campbell Hall
5256 University of Oregon
Eugene, Oregon 97403
mcnair.uoregon.edu

The McNair Scholars Program, supported by a federal Trio Grant, prepares qualified juniors and seniors for graduate study leading to PhD degrees. Students engage in funded research, receive faculty mentorship, present at local and national conferences, participate in and publish scholarly works, produce competitive Graduate School applications, and locate funding sources for advanced study.

Pathway Oregon

Grant Schoonover, Director
541-346-3226
68 Prince Lucien Campbell Hall
pathwayoregon.uoregon.edu

Pathway Oregon is a UO program that provides comprehensive support to eligible students. Advisors assist students in making choices that help them achieve their academic, personal, and career goals. This program is offered to eligible students at the time of their admission to the University of Oregon.

Speech-Language-Hearing Center

Margit Mayr-McGaughey, Director
541-346-6772
HEDCO Education Building
education.uoregon.edu/clinic

The Speech-Language-Hearing Center is part of the Communication Disorders and Sciences program at the College of Education. Graduate student clinicians, under the supervision of licensed clinical faculty members, provide high-quality services to individuals with speech, language, cognitive, and hearing disorders. Services include diagnostic evaluations and individual and group therapy to people of all ages and cultural backgrounds. The center provides community outreach and serves as a local, state, and national resource for innovative clinical service and research.

Student Support Services

Tara Parrillo, Director
541-346-3226
68 Prince Lucien Campbell Hall
trioss.uoregon.edu

Student Support Services, a college retention program funded by a federal Trio Grant, provides qualifying students comprehensive support, including academic and personal counseling, study skills workshops, and assistance securing financial aid and scholarships.

Undergraduate Support Program

541-346-3226
68 Prince Lucien Campbell Hall
tlc.uoregon.edu/usp

The Undergraduate Support Program offers academic support to students who have the potential, motivation, and commitment to earn University of Oregon degrees, despite having faced obstacles that affected previous academic performance. Students are notified of eligibility at the time of their admission.

Veterans Affairs

Julia Pomerenk, University Registrar
541-346-3119
220 Oregon Hall
registrar.uoregon.edu/veterans

The Office of Veterans Affairs, a unit within the Office of the Registrar, helps eligible student veterans, reservists, and dependents obtain educational benefits in compliance with the procedures and regulations of the United States Department of Veterans Affairs (VA). The office provides basic information about educational benefits administered by the VA and also those provided by Oregon state laws.

Eligible students should contact the office by telephone, e-mail, or mail as soon as they are admitted to the university. The mailing address is Office of the Registrar, 5257 University of Oregon, Eugene, Oregon 97403-5257. The office is open from 8:00 a.m. to 5:00 p.m., Monday through Friday.

Veterans Access, Choice, and Accountability Act of 2014 Veterans Health Care and Benefits Improvement Act of 2016 Department of Veterans Affairs Expiring Authorities Act of 2018

The following individuals shall be charged the in-state rate, or otherwise considered a resident, for tuition and fees purposes:

- A veteran using educational assistance under either Chapter 30 (Montgomery GI Bill—Active Duty Program) or Chapter 33 (Post-9/11 GI Bill), of Title 38, United States Code, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence) and enrolls at the University of Oregon within three years of discharge or release from a period of active duty service of 90 days or more.
- Anyone using transferred post-9/11 GI Bill benefits (38 U.S.C. § 3319) who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence) and enrolls at the University of Oregon within three years of the transferor's discharge or release from a period of active duty service of 90 days or more.
- Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the University of Oregon. The person so described must have enrolled at the University of Oregon prior to the expiration of the three-year period following discharge or release as described above and must be using educational benefits under either Chapter 30 or Chapter 33 of Title 38, United States Code.
- Anyone using benefits under the Marine Gunnery Sergeant John David Fry Scholarship [38 U.S.C. § 3311(b)(9)] who lives in the state

of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).

- Anyone using transferred post-9/11 GI Bill benefits (38 U.S.C. § 3319) who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence) and the transferor is a member of the uniformed service who is serving on active duty.
- Anyone using educational assistance under Chapter 31, Vocational Rehabilitation and Employment, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence)

GI Bill® is a registered trademark of the US Department of Veterans Affairs. More information about education benefits offered by the department is available at the official US government website (<https://www.benefits.va.gov/gibill>).

Veteran Priority Registration

Students who are either active members of the military, veterans with an honorable discharge or general discharge under honorable conditions, or dependents receiving federal veterans' educational benefits and who self-report to the Office of the Registrar are offered priority registration for courses. Students who are eligible for priority registration are able to register before other students in their category as shown below. Priority is given to graduate students, then to undergraduates. Seniors register before juniors, juniors before sophomores, and so forth, based on number of credits accumulated.

1. Graduate and postbaccalaureate students
2. Seniors with 135 or more credits
3. Juniors with 90 or more credits
4. Sophomores with 45 or more credits
5. Freshman students with fewer than 45 credits

Veterans Benefits and Transition Act of 2018

The following policy (38 U.S.C., section 3679) applies to any covered individual, who is any individual entitled to educational assistance under Chapter 31, Vocational Rehabilitation and Employment, or Chapter 33, Post-9/11 GI Bill benefits:

1. Any covered individual is permitted to attend or participate in the course of education during the period beginning on the date on which the individual provides to the University of Oregon a certificate of eligibility for entitlement to educational assistance under Chapter 31 or 33 (a "certificate of eligibility" can also include a "Statement of Benefits" obtained from the Department of Veterans Affairs website —eBenefits, or a VAF 28-1905 form for Chapter 31 authorization purposes) and ending on the earlier of the following dates: (a) the date on which payment from the VA is made to the institution or (b) the date that is 90 days after the date the institution certified tuition and fees following the receipt of the certificate of eligibility.
2. The University of Oregon will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual's inability to meet his or her financial obligations to the institution due to the delayed disbursement funding from the VA under Chapter 31 or 33.
3. The University of Oregon requires the covered individual to take the following additional actions:

- Submit a certificate of eligibility for entitlement to educational assistance no later than the first day of a course of education
- Submit a written request to use such entitlement
- Provide additional information, if requested, necessary to the proper certification of enrollment by the educational institution
- Make a payment for the amount that is the difference between the amount of the student's financial obligation and the amount of the VA education benefit disbursement and understand that late fees may apply to these charges

Yamada Language Center

Jeffrey Magoto, Director

541-346-4011

541-346-3917 fax

175 McKenzie Hall

ylc@uoregon.edu

babel.uoregon.edu

The Yamada Language Center is the university's center for language teaching and learning, with resources and facilities to support more than 25 world languages. The center is an active partner with the university's language and linguistics departments, providing training, equipment, and technology to more than 200 instructors and 4,000 students.

The center's classrooms are designed for language teaching, featuring state-of-the-art audio-visual technology and furniture that can be easily reconfigured for a variety of active teaching environments. In addition, the student center offers space for lectures, workshops, and conversation practice. A library of films and multilingual reading material in a variety of languages are also located there.

Among the center's key student services are the Self-Study Language Program, Foreign Language Exchange, and an annual Foreign Languages and International Studies Day. The center is also one of the founding members of the UO Language Council, a campus group aimed at raising the profile and impact of language study.

As a research unit, the center develops web-based software that serves the campus and the worldwide language teaching community. Its Virtual Language Laboratory and ANVILL (A National Virtual Language Laboratory) applications are used by thousands of students daily.

Student Alumni Association

541-346-2107

1720 E. 13th Ave., Suite 119

uosaa@uoregon.edu

www.uoalumni.com/saa (<http://www.uoalumni.com/saa>)

The Student Alumni Association is an organization of students led by students that maintains University of Oregon traditions, inspires commitment in students, and serves the greater community. As the student arm of the UO Alumni Association, the organization seeks to

- increase the career opportunities of students by providing opportunities for them to network with alumni
- provide leadership opportunities for students in the organizing of campus and community events
- provide professional development opportunities for students through internships

- generate excitement surrounding university activities and traditions, creating a legacy of student involvement

Student Housing

Michael Griffel, Director

541-346-4277

Walton Hall

1220 University of Oregon

Eugene, Oregon 97403-1220

housing@uoregon.edu

housing.uoregon.edu

The Office of University Housing is dedicated to providing student housing that promotes academic success through academic residential communities and student-centered services. As a unit of the Division of Student Services and Enrollment Management, the staff is committed to supporting the mission of the University of Oregon.

The university requires all first-year students live on campus. Students may choose housing options in a residence hall community, which include room and board, and apartment communities. A small number of university houses in residential neighborhoods adjacent to campus are also available. The office also offers dining services with healthy options that incorporate locally sourced, organic ingredients whenever possible for residents and the campus community.

Residence Halls and Academic Residential Communities

The university maintains 10 residence hall communities (<http://housing.uoregon.edu/residence-halls>), which house approximately 4,375 students during the academic year. All residence halls have study areas, TV lounges, and laundry facilities, and a few have community kitchens. Available room types include single-, double-, or triple-occupancy, as well as a limited number of suites and rooms with bathrooms or sinks. All rooms contain a bed, desk, chair, and a wardrobe, dresser, or closet for each resident. Ethernet and/or Wi-Fi access are included in room-and-board charges. In addition to the amenities, a dedicated staff of professionals and student leaders live in the halls to help ease the college experience in the halls and ensure residents are aware of resources.

The Office of University Housing partners with campus departments and academic schools and colleges to offer a variety of academic connections and academic residential communities (<http://housing.uoregon.edu/academics>) (ARCs) for residents. Such programs include Art and Design, Building Business Leaders, Business Residential Community, Carnegie Global Oregon, Environmental Leaders, Global Engagement (with Chinese, French, German, Japanese, and Spanish communities), Health Services, LGBTQIA (Lesbian, Gay, Bisexual, Transgender, Queer, Intersex, and Asexual) Scholars, Living in German, Media and Social Action, Multicultural Scholars, Musical Scholars, Native American and Indigenous Studies, Robert D. Clark Honors College, Service-Learning, Social Activism, and Umoja Pan-African Scholars. The residence halls also connect students with faculty members, advisors, and tutors through programs such as the Faculty Fellows, Advisor Fellows, Faculty-in-Residence, and in-hall tutoring.

Specialized communities are another way residents can tailor their communities. The housing office also offers the Gender Equity Hall, Quiet Hall, and Wellness Hall. For more information, visit the housing website.

Dining on Campus

The residence halls have five flexible meal plans (<http://housing.uoregon.edu/meal-plans>). Meal plans operate on a point system loaded weekly on a student's campus ID. Each meal plan also comes with Duck Bucks to use in other locations on campus. With the exception of the Carson limited plan, students may use their meal plan points in any of the nine housing dining venues, which offer a range of choices from all-you-care-to-eat venues to individually prepared entrées and deli or market items to go. Venues include a traditional all-you-care-to-eat dining center, a burrito and taco station, coffee houses, a bistro, a stir-fry grill, pasta bar, two deli-style locations, "gastro grub," and markets with everything from sushi to sandwiches, soups, entrées, fresh fruit, açai bowls, and beverages.

Applying for Housing

Only students admitted to the university may apply for on-campus housing. After receiving notice of admission from the Office of Admissions, students should visit the website (<http://housing.uoregon.edu/apply>) and fill out an online application form. After completing and submitting the online application, students must then read and sign the online housing contract and make an online payment of their nonrefundable application fee and a prepayment to immediately secure a housing space.

As noted before, living on campus is a requirement (<http://housing.uoregon.edu/live-on>) for all first-year students. Residence hall and room preferences are granted on a first-come, first-served basis, although returning residents are given priority in room choices. Information and instructions on applying for residence hall housing (<http://housing.uoregon.edu/residence-hall-application>) may be found on the housing website.

Residence Hall Contract and Rates

Residence hall contracts cover the full academic year. For residence halls, the academic year begins a few days before classes start in fall term (September 20, 2018) through the end of spring term (June 14, 2019), excluding winter break. During the winter break and summer session, residents may stay in the halls for an additional fee.

Residents must sign a contract that explains the rights, privileges, and responsibilities of residence hall occupancy. These terms are based on consideration for other residents, health and safety standards, and compliance with established state laws and the University of Oregon student conduct code. Failure to comply with the terms and conditions of occupancy can lead to eviction.

Room and board charges are billed to students' university accounts. Rates vary based on room type and meal plan. For information about billing and rates (<http://housing.uoregon.edu/costs>), please visit the housing website.

Family Housing and University Apartments

The Office of University Housing maintains apartment communities and a limited number of houses for approximately 500 students and their families. Accommodation in Family Housing and University Apartments (<http://housing.uoregon.edu/apartments>) is open to full-time students. One building offers single-dwelling units for graduate students; other one-, two-, and three-bedroom apartments may be occupied by graduate

or undergraduate students who are 20 or older or are either married, in a domestic partnership, or have minor children.

Apartments and houses are unfurnished, although each unit is equipped with a stove and a refrigerator. On-site laundry facilities are available in apartment communities, and laundry hook-ups are available in most houses. Some buildings include Ethernet service with the rent. In addition, some apartment communities have playgrounds, recreation rooms, community gardens, childcare programs on site, and recycling facilities.

Residents of Family Housing and University Apartments may pay with cash or debit or credit cards for meals at any of university housing's dining venues or purchase the Ducks Dine On (<http://housing.uoregon.edu/ducks-dine-on>) plan.

Rates

Rental rates vary by community or house, based on size and amenities. Occupancy limits are based on the number of bedrooms and the number of people in the household. There are a limited number of units that can accommodate three UO students; otherwise, no more than two adults may reside in a single unit.

To be eligible for a housing assignment, students must be enrolled and maintain full-time status at the university. Applications for Family Housing and University Apartments must be accompanied by a nonrefundable application fee. In addition, a security deposit and a prepayment toward the first month's rent are required at the time the offer is accepted.

Testing Center

Jeff Bulkley, Director

541-346-3230

University Health, Counseling, and Testing Center Building, Second Floor
1590 E. 13th Ave.

testing.uoregon.edu

The Testing Center, a unit of the Division of Student Services and Enrollment Management, schedules, coordinates, and administers a wide range of assessment testing for students and community members. The center works closely with the Accessible Education Center to provide proctoring for students with accommodations. The Testing Center also administers academic examinations, required placement examinations, Credit by Examination programs, proctored academic tests, and national computer-based testing programs such as the Graduate Record Examination (GRE), Graduate Management Admissions Test (GMAT), Test of English as a Foreign Language (TOEFL), Miller Analogies Test (MAT), Praxis, California Basic Educational Skills Test (CBEST), and Oregon Educator Licensure Assessment (ORELA) teacher-certification tests. In addition to its computer-based testing program, the center organizes the on-campus administration of the paper-and-pencil GRE Subject Tests, Law School Admission Test (LSAT), and the Multistate Professional Responsibility Examination (MPRE). Students and community members taking online, distance-education courses are also able to have their examinations proctored at the center.

Registration materials and information are available on the website (<https://testing.uoregon.edu>) or by e-mailing a request (testing@uoregon.edu) to testing@uoregon.edu. The center is located in 270 University Health, Counseling, and Testing Center Building. Tests are administered by appointment. Hours of operation are listed on the website.

Transportation Services

David Reesor, Director
541-346-5444

The Transportation Services department coordinates the use of sustainable transportation options and provides parking services for students, members of the faculty and staff, and campus visitors. The department currently maintains approximately 3,200 parking spaces on or adjacent to campus in more than 60 lots and one multilevel underground garage, and operates the university's Access Shuttle, a free, on-campus ride service for students, employees, and visitors with limited mobility.

University Career Center

Director

541-346-3235
Willie and Donald Tykeson Hall, Garden Level

The University Career Center is a unit of the Division of Student Life that exists to support the career readiness, preparation, and professional development of students. Its mission is to help students learn about career options and paths; develop strategies to find and prepare for part-time jobs, internships, and full-time career opportunities; meet potential employers; and reach their fullest career potential.

Career Coaching

Career-readiness coaches help students learn about the world of employment—career choices, applications for jobs, internships, and graduate school—and assist with job and internship search strategies. Group sessions, workshops, and individual coaching appointments are available to help students advance their goals.

The center website provides a multitude of resources on careers, jobs and internships, search strategies, and employer profiles.

Jobs, Internships, and Career Resources

Handshake. Each year thousands of jobs—part-time, full-time, work-study, summer, international, and internship opportunities—are listed in Handshake (<https://career.uoregon.edu/handshake>), the university's online career services tool listing jobs, internships, and other career resources. The center also actively develops part-time jobs, internships, and full-time career opportunities for students.

On-Campus Recruiting Program, Career Discovery, and Networking Events. The on-campus recruiting program brings more than 200 employers to campus each year, and career fairs and many career-related events with opportunities to interact with employers are held annually. Panels of industry experts demystify the world of employment and offer career and job-search advice.

Internship for Credit. This course offers students academic credit for engaging in supervised, preprofessional, career-related learning experiences. Students gain professional experience, develop skills, and explore career fields, all while earning credit. More information may be found on the center website.

University Career Center Partner Program. This program introduces students to employers who are committed to hiring University of Oregon

students. They offer a variety of opportunities ranging from part-time jobs to internships and career positions.

Student Employment Enhancement Initiative. Hundreds of student employee positions are available each year at a variety of times. In an effort to make the student employment experience as meaningful as possible, this program supports student supervisors and, ultimately, students. More information about this program is available online (<https://uoose.uoregon.edu>).

Support

The University Career Center is committed to providing customized opportunities and partnerships that support students who identify as traditionally underrepresented or underserved.

Multicultural Career Alliance. The alliance provides programming focused on career exploration and future employment opportunities for traditionally underrepresented groups of students, such as students of color, students with disabilities, student veterans, and students who identify as LGBTQ.

International Student Career Alliance. A collaborative effort to respond to the career and professional development needs and opportunities of international students on campus.

Student Veteran Career Peer Advising. Student veterans on campus are provided with career assistance through peer-advising sessions. The services offered include assistance writing résumé and cover letters as well as full-and part-time job and internship searches.

For more information about career exploration and academic planning, see the **Academic and Career Planning** (p. 39) section of this catalog.

Work-Life Resources

Jennifer Mirabile, Senior Human Resources Programs Coordinator
541-346-2195 or -3195
541-346-2548 fax
677 E. 12th Ave., Suite 400
hr.uoregon.edu/worklife

University Work-Life Resources, a program in Human Resources, coordinates information about campus and community child-care options, resources for families and elder care, work and life resources, wellness programs, help with life events, and university work-life policies.

UO Affiliated Child-Care Programs

Co-op Family Center

The center is an independent, nonprofit co-operative located in Spencer View Family Housing. Student families receive priority and a tuition discount. The center serves children eight weeks to 10 years. For more information, visit the website (<http://coopfamilycenter.org>) or telephone 541-346-7400.

Moss Street Children's Center

The center offers university student families priority and a tuition discount, serving children three months through third grade. It is described more fully under Erb Memorial Union in this section of the catalog. For more information, visit the website (<https://moss.uoregon.edu>) or telephone 541-346-4384.

Vivian Olum Child Development Center

The center, which offers priority services to employee families, has seven classrooms and serves as many as 110 children, from eight weeks old through fifth grade. For more information, visit the website (<https://olum.uoregon.edu>) or telephone 541-346-6586.

Family Community Opportunities

A subscription-based email listserver for the UO community provides information about family-related campus and community events and programs. More information on the listserver and how to subscribe is available online (<https://lists-prod.uoregon.edu/mailman/listinfo/uofamilies>).

Financial Assistance for Child Care

ASUO Student Child-Care Subsidy

Funded by student incidental fees, the program pays a percentage of child-care expenses for low-income students. UO-affiliated and licensed community child-care expenses are covered. More information and applications are available from the ASUO Executive office, Erb Memorial Union, Suite 4; call 541-346-0632.

Employee-Dependent Child-Care Account

UO employee parents have an opportunity to pay for dependent care with pretax income. For more information, call the Human Resources Benefits Office, 541-346-3085.

Graduate Assistance Fund

This program assists graduate students facing financial hardship in the care of a new child or a medical issue. For more information, visit the website (<https://gradschool.uoregon.edu/current-students/assistance-fund>).

Oregon Department of Human Services Child-Care Subsidy

Working families whose combined income is below 150 percent of the federal poverty level may be eligible for financial help with child-care costs. For more information, visit the website (<http://www.oregon.gov/DHS/ASSISTANCE/CHILD-CARE/Pages>).

Graduate Families GE

Questions, concerns, or needs related to graduate students with families may be found online (<https://gradschool.uoregon.edu/students-with-families>) or directed to Graduate Families Graduate Employee via email (familyge@uoregon.edu). Graduate Families GE serves as a resource, providing referrals and support, hosting free family events, and managing the graduate families listserver, a subscription-based email service for the UO community providing information about family-related campus and community events and programs. More information on the listserver is available online (<https://lists-prod.uoregon.edu/mailman/listinfo/uofamilies>).

Lactation Support Rooms

Each of the seven lactation support rooms provide a private space for student, faculty, and staff mothers to nurse or express milk. View the Family-Friendly Resources (<https://map.uoregon.edu/s/family-friendly>) map for specific lactation room locations. UO parents may register to

use one of the campus lactation rooms by contacting a staff member in Human Resources, 541-346-2195.

The Personal Refrigerator Lending Program provides nursing mothers working for the university with small, apartment-sized refrigerators for their campus offices and workspaces in which to store expressed milk. Call Human Resources to request a refrigerator.

School and Summer Camp Information

Information on the Eugene 4J, Bethel, and Springfield school districts as well as UO-affiliated summer camps are available on the Human Resources website (<https://hr.uoregon.edu>).

Youth and Family Program

The Department of Physical Education and Recreation offers a variety of youth lessons and family recreation time, as well as summer and no-school day camps. For more information, telephone 541-346-4183.

Academic Calendar

Fall Term 2019

Initial registration: May 20–30

Week of Welcome: September 27–30

Classes begin: October 1 (no classes are held September 30, 2019, in observance of Rosh Hashanah)

Last day to drop courses without recorded "W": October 5

Last day to register or add courses: October 6

Thanksgiving vacation: November 28–29

Fall term final examinations: December 9–13

Winter vacation: December 14, 2019–January 5, 2020

Winter Term 2020

Initial registration: November 18–27, 2019

Classes begin: January 6

Last day to drop courses without recorded "W": January 11

Last day to register or add courses: January 12

Martin Luther King Jr. Day holiday: January 20

Winter term final examinations: March 16–20

Spring vacation: March 21–29

Spring Term 2020

Initial registration: February 24–March 4

Classes begin: March 30

Last day to drop courses without recorded "W": April 4

Last day to register or add courses: April 5

Memorial Day holiday: May 25

Spring term final examinations: June 8–12

Commencement Day: June 15

Summer Session 2020

Initial registration: May 4–8

Classes begin: June 22

Independence Day holiday: July 4

Eight-week session ends: August 14

Labor Day holiday: September 7

Twelve-week session ends: September 11

Fall Term 2020

Initial registration: May 18–28

Week of Welcome: September 25–28

Classes begin: September 29 (no classes are held September 28, 2020, in observance of Rosh Hashanah)

Last day to drop courses without recorded "W": October 3

Last day to register or add courses: October 4

Thanksgiving vacation: November 26–27

Fall term final examinations: December 7–11

Winter vacation: December 12, 2020–January 3, 2021
